"Recognizing voluntary labor as a wise and beneficent appointment of Providence, conducive to the well-being of individuals, indispensable to the existence of society, honorable in itself, and deserving, therefore, to be cherished and encouraged: We, inhabitants of Leominster, in order to promote the interests of agriculture and all industrial pursuits, and especially to benefit those engaged therein, by inciting to investigation, to reflection and to action, and by furnishing facilities for a free interchange of opinions, thereby to call forth the results of individual observation and experience, and to elicit practical and scientific information, do hereby constitute ourselves an association and adopt the following constitution:

"ART. 1. The name of this Association shall be

The Leominster Farmers and Mechanics' Association."

The rest of the constitution need not be given. The annual meeting was to be in January, and a fair and cattle show for the exhibition of farm products, live stock and manufactured articles, was to be held in the fall of each year. How well the association has accomplished the objects named in the preamble is left for those better acquainted with its work to say. It is enough to state here, that the annual fair and cattle show, has for many years been one of the most interesting of days to all the people of the town, and the exhibitions from year to year are full proof that all the *farmers* have not moved West.

Since the organization of the society the following persons have served in the offices named :

Temporary organization.—Dr. Sewall Richardson, president ; J. Q. A. Pierce, secretary.

1852.—President, Leonard Burrage ; Secretary, Joseph Darling.

1853.—President, Leonard Burrage ; Secretary, Joseph Darling.

1854.—President, Solon Carter ; Secretary, J. C. Allen.

1855.—President, Solon Carter ; Secretary, J. C. Allen.

1856.—President, Dr. C. C. Field ; Secretary, James Bennett.

1857.—President, Dr. C. C. Field ; Secretary, James Bennett.

1858.—President, Daniel R. Haynes ; Secretary, James Bennett.

1859.—President, D. R. Haynes ; Secretary, James Bennett.

1860.—President, W. B. Hosmer ; Secretary, James Bennett.

1861.—President, Solon Carter ; Secretary, J. B. Allen.

1862.—President, Solon Carter ; Secretary, J. B. Allen.

1863.—President, Ward M. Cotton ; Secretary, A. L. Burditt.

1864.—President, Ward M. Cotton ; Secretary, J. W. Gates.

1865.—President, Whiting Gates ; Secretary, J. W. Gates.

1866.—President, Whiting Gates ; Secretary, J. W. Gates.

1867.—President, William Tilton ; Secretary, J. W. Gates.

1868.—President, William Tilton ; Secretary, James M. Bronson.

1869.—President, Isaac Cowdrey ; Secretary, James M. Bronson.

1870.—President, Isaac Cowdrey ; Secretary, James M. Bronson.

1871.—President, Wm. F. Burrage ; Secretary, James M. Bronson.

1872.—President, Wm. F. Burrage ; Secretary, James M. Bronson.

1873.—President, Howard M. Late ; Secretary, J. W. Gates.

1874.—President, C. C. Boyden ; Secretary, J. W. Gates.

1875.—President, C. C. Boyden ; Secretary, J. W. Gates.

1876.—President, J. H. Goodale ; Secretary, J. W. Gates.

1877.—President, J. H. Goodale ; Secretary, J. W. Gates.

1878.—President, Geo. Woods ; Secretary, J. W. Gates.

1879.—President, Geo. Woods ; Secretary, J. W. Gates.

1880.—President, D. E. Wheeler ; Secretary, C. G. Harrington.

1881.—President, Clesson Kenney ; Secretary, James M. Bronson.

1882.—President, C. H. Merriam ; Secretary, James M. Bronson.

1883.—President, C. H. Merriam ; Secretary, James M. Bronson.

1884.—President, Dr. F. E. Nims ; Secretary, Charles H. Rice.

1885.—President, Dr. F. E. Nims ; Secretary, Charles H. Rice.

1886.—President, Geo. H. Wheelock ; Secretary, Charles H. Rice.

1887.—President, Geo. H. Wheelock ; Secretary, Charles H. Rice.

1888.—President, Wm. B. Tisdale ; Secretary, Charles H. Rice.

1889.—President, C. S. Buss ; Secretary, Charles H. Rice.

The association held its first fair September 29, 1852.

COMBS.—When we turn from agriculture to the mechanical industries of the town we must give comb-making the place of honor. This is done, not because it was the very first kind of manufacturing engaged in here, but because for many years it employed a larger proportion of the inhabitants than any other, and from the peculiar nature of the business, as then conducted, it required less capital and employed a larger percentage of labor as compared with the value of the product. For this reason there were many small manufacturers, and Leominster came to have the fact and the feeling of prosperity. In this business men acquired wealth, moderate in amount, it is true, but ample for the times. In this way, also, grew up that comfortable, well-to-do feeling which still holds its own in this community.

The comb business was brought to Leominster from West Newbury about the year 1775, possibly the year before. As one goes on Pleasant Street towards the farm of C. C. Boyden, he passes to the left the old Hills house, where the first combs were made in Leo-

minster. This house, which had, amid the early mutterings of the Revolution, the honor to cradle a new and important industry for this town, was built in 1759 by Elias Carter, and by him sold to Mr. Hills in 1774. It is now the property of Cornelius Whitcomb and B. F. Blodgett. In this house Obadiah Hills began to make combs from horns. He used only the kitchen of his house for his shop, and worked, as did all others for many years, wholly by hand. For some years Obadiah, Smith and Silas Hills worked at this business in different parts of the town; but Joseph Tenney, John Chase and Edward Love, all of whom came to Leominster from West Newbury, were also comb-makers, as were John Kendall and Jonathan Johnson. While John Buzzell, a worker in shell as well as horn, seems to have been the first to give any thought to the making of comb-tools, it is on record that Jabez Love, Thomas and Charles Hills owned the first screw-press which came to town. The first press of this kind was built in a hut in Ashby woods, so that no one might infringe upon the plan. The inventor was McPherson Smith, and the letters patent are still kept as a treasure by the Hills family. They bear the signature of John Quincy Adams as Secretary of State. Previous to this time the old wedge-press was in universal use.

The material used in this business was, at least for many years, of small value. It was a practice in the early days to bring the horns from Worcester, after they had been cut in pieces with a hand-saw, in the saddle-bags, for which those times were famous. It is thus made clear that nearly all the value of the combs was in the one item of labor.

It may be of interest to look back to some of these early methods in comb-making. As stated already, nearly all the work was done by hand in the early comb-shops. The tools were very few and exceedingly rude. The horn, cut as above described, was thrown into hot water to soften. It was then pressed flat by means of the old wedge-press, one of the most conspicuous objects in every comb-shop of those days. This press was so arranged that when the pieces of horn were in place between like pieces of iron, the horn could be pressed flat by wedges driven in opposite directions. When this work was finished the pieces were taken from the press and again softened by soaking in hot water. In this condition the material was ready for the next step, which was the cutting of the teeth. This must have been a very interesting process, for it was done by means of a common hand-saw. A sharp knife was used to shave the comb; and the smoothing and polishing were done by means of rubbing, at first with sand and water, and after the comb was colored, with chalk, vinegar and other preparations.

A number of small blocks of wood, a foot long and three or four inches in diameter, were used in bending the combs. A circular piece was cut from the side of each block of the exact size and shape desired,

the comb put in its place and the piece of wood fixed over the comb. There were staples in the sides of the block, and by passing a stick through these the pieces of wood were held in place and the combs bent to the required shape. "When the combs were ready for the market they were wrapped in the coarsest and poorest wrapping paper, in dozen packages, with one on the outside for a sample. It is only within the past thirty-five years that boxes have been used."

The change which time has brought to this, as to all other kinds of business, is strikingly illustrated by recalling the fact that in the early days of comb-making it was not unusual for a man to make up what stock was on hand, pack the combs in his saddle-bags and start for the nearest market. In these days of rapid transit, of varied and perfect machinery, of large sales and small profits, such a state of things seems hardly possible.

The apprentice system was a marked peculiarity of this business as at first conducted. The young men bound out to learn this trade usually served not less than three years and commonly lived in the family of their employer. Many of the old comb-makers would have in their household from six to twelve young men, who were serving an apprenticeship for the business. The system had this advantage, at least, that the whole business was mastered and the workmen made intelligent.

The system of barter, under which the early comb-makers did business, is another point of special interest. Few combs were sold for money. If the manufacturer had not a store of his own, he sold his combs to dealers in Boston and received orders on the stores in town doing business with the Boston merchants. These orders were in turn passed to the help in the different comb shops in payment for their services and so wandered on their slow journey back to the giver in Boston. The business *was* slow, and, as it seems to-day, tiresome; but it suited well the thought and method of those days. It would be interesting to describe the tools used in this early work, but to give any clear idea cuts would be needed, and to compare the old way with the new would require far too much space. Many men prominent in the affairs of Leominster were among the leading comb-makers of their time. The old comb business, with its slow hand-work, its narrow quarters, its rude tools, its barter trade, its apprentice system, is now largely in the remembrance of a few of the oldest residents. It seems strange to our thought and habit, but it was at the foundation of Leominster's property. Although this business is not now the most important of Leominster's industries, there are still many firms and a large number of men employ in the trade. E. B. Kingman & Company have a large factory on Water Street. The business was started in 1871 by Charles L. Joslin, A. W. Williams and W. L. Palmer. In 1877, Mr. Palmer retired and the other partners continued the business till 1883;

then Mr. Williams was the sole owner until December last, when he sold to the present company. W. D. Earl & Company have a large button factory on Earl Street. The business was started by them in 1870 and has been conducted by the same parties to the present time. B. F. Blodgett & Company are engaged in a profitable comb and jewelry business. The firm started in 1869, and then consisted of B. F. and E. F. Blodgett and Alanson Richardson. In 1874 D. E. True became a member and in 1876 Mr. Richardson withdrew. Damon, Howe & Co. manufacture comb and horn goods. Both are natives of Leominster and the sons of old comb-makers. Other firms are engaged in different departments of this business, as Derby, Whitcomb & Co., Tenney & Porter, H. E. Davis and Spill Bros.

Before referring to those industries which occupy most of the water privileges within the limits of Leominster, it may be well to state briefly the business history of these natural centres of power, so far as it is now possible to obtain the facts. This method is preferred that the kinds of business may be grouped without regard to location.

Beginning with the central part of the town, manufacturing has seemed to centre and hold its own at three places, where water-power could be obtained, although steam is largely used at all three places at present.

The privilege now owned and occupied by the F. G. Smith's Piano Case Works was first improved in 1763, and was one of the earliest centres for business in Leominster. Mark Lincoln and his son, Captain Ephraim Lincoln, and, after him, Otis Stearns, had a fulling-mill at this place, and employed skilled workmen, we are told, in dressing home-made cloth. The same site was used for a comb-shop by Wheelock & Fletcher, and by them sold to the Porter Brothers in 1857. A new dam was erected, and, after a brief trial of other goods, the firm began the manufacture of piano cases.

In the spring of 1880 the real estate was sold to Steinway & Sons, of New York. On September 2d of the same year the factory was wholly destroyed by fire. The present building, which is on the south side of the river, opposite the old shop, was partly finished at the time of the fire. The new building was leased one year to Porter Brothers, and then sold to its present owners.

Coming nearer the Centre, to the privilege on Pond Street. This was occupied for the first time in 1850. In that year Carter, Patch & Cowdrey built a dam and erected the first shop. This was used in part by James H. Carter for a comb-shop, and in part by Somers & Blotchford for the manufacture of horn buttons. Another mill was built on the opposite side of the road in 1853, and by the same parties. J. C. Lane and John C. Gove occupied this building for different parts of the piano business. Mr. Lane was followed by Allen & Jewett, who were using the

building when it was burned. The property passed from the ownership of Carter, Patch & Cowdrey to that of John H. Lockey in 1865, and was by him sold to Samuel S. Crocker. Mr. Crocker built a brick four-set woolen-mill, and, with Solon Perry and Frank T. Crocker, began the manufacture of woolen goods. This business was continued by different parties until November 8, 1876, when it passed into the hands of the present owner, Edward M. Rockwell.

So far as any record indicates, the first place where water was used as a power in Leominster is near the site now occupied by the shoe-shop of Valpey & Anthony. This place has been occupied for manufacturing purposes probably from the incorporation of the town or earlier. Mr. Wilder says: "That when, in December, 1740, the Selectmen laid out a private way from O. Carter's through the land of Jonathan, Rufus and Ebenezer Houghton, after describing this last angle, say 'thence straight to Josiah White's saw-mill. It was, he says, probably near the place where the F. & W. R. R. crosses Monoosnock brook.'"

This was as early, if not earlier, than the building of the Wilson Mill on the Nashua River. A grist mill was built at this place by Joseph Beaman about 1775. It is not likely that this site escaped the usual fate of all these early privileges, viz., of being used as a comb-shop; but of this fact there is no present record. When J. C. Lane came to Leominster in 1845 and established the piano-case business, he found a building on this spot and used it for his work. The property passed into the hands of John H. Lockey, by whom two large piano-case factories were built, and each in turn wholly destroyed by fire. At the time of the last fire the shop was occupied for different kinds of business, Mr. Lockey having moved his works to the shop on the opposite side of the railroad.

The history of the other privileges in or near the Centre will be sufficiently indicated when treating of the business now carried on at these places.

On the Nashua River, or, as it is called in the records, the North River, three centres of power have long been in use. Beginning at the highest point on this river, and not following the order of time, the site now occupied by the furniture manufacturing establishment of Merriam, Hall & Co. is, doubtless, that of the paper-mill referred to in the following: "The third paper-mill was erected by Caleb Leland in 1802. It was a one-vat mill, and is about two hundred rods higher up the stream than the Wilson Mill. It was occupied by Leland and others till 1807, when it was sold to Edward Simmons, and in 1836, by him to William S. Parker of Boston." It is probable that this mill was suffered to fall to decay, or was taken down, for when the present factory of Merriam, Hall & Co. was erected in 1864, only a dam was found on the site. The buildings constructed in 1864 have been enlarged and improved, but the same business still occupies the site.

Lower down the stream is the site of the old Wilson Mill, built before 1740; and about this spot, moving up and down a few rods, have been nearly all the paper-mills of the past. As this business still occupies its old camping-ground, it will be necessary to give some account of the mills built here under that head. It is proper to say here, that this mill was owned by Ebenezer Wilder, and only came into the possession of Jonathan Wilson as part of his wife's dowry after the death of her father, in 1746. Mr. Wilder, in speaking of this, takes occasion to hint at a moral on the question of "marrying women supposed to be rich;" for Wilson lived above his means and failed. The mill passed into the hands of Major James Richardson, who also failed; but whether it was on account of, or for the *want* of a rich wife, Mr. Wilder does not say. At all events the old mill passed into the hands of agents, was rented, sold, and variously dealt with, till it became the property of Amos Haws in 1830, and was finally sold to Jonas Kendall & Co., and by them converted into a paper-mill.

Still farther down the stream is another privilege, first occupied in 1837. In that year Major Amos Haws, who owned the land, built a saw and grist-mill. The power was obtained by cutting a canal about one hundred rods from the main stream. Mr. Haws owned and operated this mill about nine years, "and ground over fifteen thousand bushels of grain annually, one-fifth of which was wheat." The mill was then sold to Joseph Cozzens, and by him to Walter Wright, who continued the business for some years, until the property passed by the hands of a Mr. Rolf to its present owner, "The Harwood Manufacturing Company." This completes the list of manufacturing sites which deserve special mention, either on account of long use or because they would not find natural reference in the regular statement of business interests.

**PAPER-MAKING.**—This stands before, or equal to, the boot and shoe business in the order of time. It is one of the industries which began in Leominster in the last days of this last century, and is still a vital and profitable part of her manufacturing interests. Three paper-mills were erected on the Nashua River before the present century was three years old. The first was built as early as 1796, and the water to operate it was taken from the old Wilson pond, no new dam being made, although the building stood several rods below the old mill. The first owners were William Nichols and Jonas Kendall. The value of paper made the first year is estimated at four thousand dollars. The mill was run by the parties above named, and by Jonas Kendall & Sons until 1845, when it passed into the hands of Edward Crehore, by whom the mill was greatly enlarged. Deacon Samuel Crocker, the pioneer Baptist of Leominster, and his son, Deacon Samuel S. Crocker, who still resides here after a long and successful career as a paper manufacturer, were among those employed in this mill during its early history.

In 1801 these same parties built another paper-mill farther down the stream. This was operated by them until 1804, when the new mill passed into the hands of William Nichols, and Jonas Kendall retained the one first mentioned. In a few years this property passed into the hands of Boston parties, and the mill, becoming unfit for use, was taken down. The third paper-mill was erected about two hundred rods up the stream from the old Wilson mill and has been mentioned as probably occupying the site of the factory of Merriam, Hall & Co.

The original paper-mill was sold about thirty years ago to George Wheelwright who greatly enlarged and improved the works. The present owners, The George W. Wheelwright Paper Company, have still further improved their facilities, until, where the product for the first year had a value of four thousand dollars, now seven tons is the daily output of the mill, and the product has a yearly value of about three hundred thousand dollars. This business employs a large number of hands, and has, during the last ninety years, been an important factor in the prosperity of the town.

**BOOTS AND SHOES.**—Leominster has never been a boot and shoe town in the usual sense in which the term is employed. Still, for nearly a century there has been much successful manufacturing in this line, and within the past year or two the business has been largely increased. It is now wholly confined to the manufacture of ladies' shoes, and, judging from the present outlook, this industry is likely to increase still further in value.

Except for some nine years previous to 1845, when the Burrages of North Leominster were engaged in this business, the manufacture of boots and shoes was almost wholly confined to the establishment of M. D. Haws, also of North Leominster, until, in 1887, the factory of Valpey & Anthony was built.

The business of M. D. Haws was established by his grandfather, Benjamin Haws, in 1796. At first it was a custom business. In due time this business descended to his son, Major Amos Haws, and was sold by him in 1833 to Bartimeus Tenney. In June, 1839, Mr. M. D. Haws bought the business, which he continued until November, 1885. As first conducted by Mr. Haws, the making of men's boots and shoes was part of the business; but this part of the work was finally dropped, and the manufacture of ladies' and misses' shoes was the principal business. Still, some men's shoes were made as long as Mr. Haws continued to manufacture. As the business increased the old shop was moved, and a new and larger factory built on the present site. This has been twice enlarged already, and a third addition is now planned, and will soon be built.

In 1885 the manufacturing part of this business was rented to Mr. H. O. Smith, of Lynn, whose success is evident from the fact above named, that the shop is to be enlarged to accommodate his work.

The other firm engaged in the manufacture of ladies' shoes, Valpey & Anthony, occupy the old site of Josiah White's saw-mill, to which reference has already been made. The business was started in the city of Lynn, some twenty years ago, by the same gentlemen who now own the property. When, in 1886, the labor troubles made it advisable to distribute the shoe business somewhat, Mr. Anthony came to Leominster and examined the "burnt district" so called; the place where the Lockey buildings stood. The result of his visit was the purchase of the land upon which the present buildings were erected, early in 1887. A part only of this business has as yet been transferred to Leominster, but it is not improbable that more may follow.

**TANNERIES.**—The first work in this line was at North Leominster, in a yard "immediately east of the Wilson Mill-pond, on the south side of the way, leading from the 'great bridge' into the broad road." One of the early settlers, as is supposed, owned and worked this tannery, and it passed from him to the ownership of a man named Gates, some time in the last quarter of the last century. It seems not to have prospered sufficient to warrant its continuance.

The next tannery was in this part of the town. It was started before 1780, and continued at the original place until 1835, at which time it had passed by the way of Benjamin Hawks, Levi Adams, B. Perkins and Thomas Stearns, to the ownership of William Burrage and Asa Pierce, Jr. It is said to have been located on land of Oliver Carter, about one-half mile west of the meeting-house. When Thomas Stearns sold to William Burrage, he built a new yard near where the Reed Toy Works now stand, and continued the business until Mr. J. C. Lane bought the property, in 1847.

This finishes the history of the tanneries on this side of the Nashua River. But Wm. Burrage began the business at North Leominster in 1790. The business was small at first, but was increased in extent and profit year by year, until it came into the possession of the late Captain Leonard Burrage, in 1824. Either alone or in company with George S. Burrage, he continued the business for the next twenty years. The work was done, during all these years, by the old processes, which required a large amount of manual labor. The results seem satisfactory, however, for it is said that all "who engaged in the business acquired more than a competency of this world's goods." In 1844 the property was sold to Babcock & J. M. Burrage, who were the first to put in steam. In this way they increased very largely the product of the tannery. The business passed from this firm to Putnam & Phelps, and then to the present owners, Phelps & Harrison. As illustrating the growth of this business, the fact may be recalled that even in the tannery of Mr. Leonard Burrage the annual product was less than ten thousand dollars, and putting this beside the present result, where, with forty-seven

hands, there is an annual product of nearly or quite a quarter of a million of dollars. This business seems to have been somewhat migratory in its habits in the past, but has finally settled to its present place and ownership, and will no doubt remain one of the permanent and growing industries of the town.

**PIANOS AND PIANO-CASES.**—Both for the character of the men employed and the value of the product, piano-making, in all its branches, is an important industry in any community. It has proven so in Leominster. It employs, at the present time, a large amount of capital and many of the most skilled workmen.

Mr. J. C. Lane, a brother of Howard M. Lane, chairman of the present Board of Selectmen, began the business in Leominster in the year 1845. At first what is known as skeleton piano-cases were made, and the work was done in a small building standing near where the shoe-shop of Valpey & Anthony now is. The only machinery used was one circular saw. The first work in the veneering of cases, which was done in Leominster, was by Andrew G. Reckard, then one of Mr. Lane's workmen, now owner of a small factory near his home on Church Street. To Mr. Lane also belongs the honor of making the first complete piano ever manufactured in town. Other parts of the piano began to be made in town about the same time. Mr. J. C. Gove, one of Mr. Lane's workmen, commenced to make desks and the smaller parts of the instrument. He moved, at a later date, to one part of the building owned by Carter, Patch & Cowdrey, on Pond Street. Piano keys were made by Luther Stone in a house which stood at the time near where the Albert Lamb place now is on Main Street. The work at that time was all done by hand; but when, finally, power was required, Mr. Stone moved to the building on Mechanic Street where Tenney & Porter now are. Here the work was continued by Mr. Stone for several years. But, in the end, both these branches of business seemed to die out. Whether there was too little profit in the business itself, or too little energy in the conduct of its affairs, is not known. Mr. J. C. Lane continued to occupy the small shop above referred to only until he could finish a larger building, and one better suited to his purpose. This new building was completed and his business moved there about 1847. This factory is the wooden building now occupied by the W. S. Read Toy Company. Here Mr. Lane continued for several years, and then sold his fixtures and rented the building to Mr. J. H. Lockey, and moved to a shop on Pond Street. But, after three years he came back to the old shop, and manufactured cases until 1857. His brother, Howard M. Lane, was engaged in the same business for twenty years at the same place. Other firms have, at different times, carried on this business in town which are not now represented in any way in our business interests; but as the results did not effect the general outcome of the manufacture in the town, special

mention will not be made of these firms. But Mr. Lane was the pioneer of the business in Leominster. He brought to the town, and gave it permanent foothold, one of the most important of our industries: important because it employs so many and so skillful a class of workmen, contributes so directly to the intelligence and good name of the town, by increasing the average mechanical skill and culture of its citizens. For these reasons his name is mentioned with honor in this chapter.

At the present time there are within the town limits six firms engaged in piano work of some kind. Two of these make and finish the instruments ready for the market. The W. H. Jewett & Co. piano stands high with the trade as a well-made instrument of superior tone and finish. The business was commenced in 1861 by W. H. Jewett and George A. Allen, and continued by them until 1869, when Mr. Allen retired. The business was then the making of both piano-cases and pianos, and the Allen & Jewett piano is well remembered. During the year named the factory of this firm, which stood on Pond Street, was wholly consumed by fire. The firm of W. H. Jewett & Co. was formed in October, 1870, and consisted, at first, of W. H. Jewett and R. B. Richardson, of Woburn, but later on was reorganized, and now the members are W. H. Jewett and his two sons, with F. J. Woodbury, a nephew of the senior member. The business is conducted in Allen's block.

Mr. Andrew G. Reckard, one of the oldest and best piano-makers of Leominster, to whom reference has already been made as having veneered the first piano-cases manufactured in town, and who was at one time foreman for J. C. Lane, has a small factory on Church Street, near his residence. He makes a few pianos of superior workmanship in all respects. These pianos will bear comparison with the very best instruments offered in the market. All the work of finishing is done by Mr. Reckard himself, whose superior mechanical skill and fine musical taste warrant the best results.

The John H. Lockey Piano-Case Company is the oldest of the firms which are now conducting this branch of the business; for, although the present corporation has been very lately formed, the business itself dates back to 1851, when John H. Lockey, the senior member of the company, began business for himself in the factory of J. C. Lane. Either alone, or with his brother, Joseph P. Lockey, or as the head of the present firm, Mr. Lockey has continued this business most, if not all of the time until now. In the interests of his business he erected one or both of the buildings already mentioned as burned on the site of Valpey & Anthony's shoe shop, as well as the building now occupied by this piano-case company. The cases made by Mr. Lockey have always been regarded as among the very best in the market, in make, style and finish. Everything is done at this factory in the most thorough manner: none but ex-

perienced and skillful workmen are employed, many of these men having been with Mr. Lockey for years, and are, in every sense of the word, *master-workmen*.

The Hon. John H. Lockey has been so long and intimately connected with the business interests and civil affairs of Leominster, and has contributed so largely to the growth and development of the town by his business talents and extensive building, that mention should be made of the fact to his honor. Not only has he conducted important business interests in the town for more than thirty years, employing many able mechanics, treating his employes with a courtesy and liberality of which their long service with him is a most ample witness; but he has, at different times, increased the business facilities of the town by building, with taste and thoroughness, at least three large factories, one to replace the first which was burned. Mr. Lockey has also built two private residences which are among the best and most substantial in town. In civil life, also, Mr. Lockey has rendered important service. He has served on many committees, when the business was of permanent interest to the town, giving freely of his time and influence to measures of public improvement and to whatever has seemed for the best good of the community. Mr. Lockey has been elected by the town as its Representative and by the district as Senator; and in both cases did efficient service at the "General Court." Any sketch of our business interests should name Mr. Lockey as one of the men who have contributed most liberally and effectively to the growth of the town. Mr. J. M. Lockey is now associated with his father in the business of the company.

The F. G. Smith Piano Case Works are located about a miles west of the Common and the business history of the site has already been given. The works are the property of F. G. Smith, of New York, successor to William Bradbury, and one of the largest piano manufacturers in the United States. The work here is done directly for the New York branch of the business and the Leominster factory is under the management of Mr. W. L. Porter, a very skillful mechanic and one of the original founders of the piano case business at this place. The cases made at this factory are of excellent quality, employing the labor of many of the best mechanics in town.

Charles J. Cobleigh has a large piano case factory at West Leominster. The original buildings on this site were erected by S. A. Meads and designed for a sash and blind shop. But when the Arlington Piano Company's factory was burned, in 1872, this property came into their possession. It was used by them while the business was continued. In August, 1879, Mr. Cobleigh began business for himself and in January, 1880, moved to the Arlington Shop. Previously he had been in the employ of John H. Lockey and others in the same business. Since 1880 he has made large additions to the original buildings and in many ways improved the ap-

pearance and value of property at West Leominster. The business employs a hundred men and very largely through Mr. Cobleigh's energy and business ability West Leominster is, to-day, a busy, comely and thriving part of the town.

J. P. Lockey & Co. commenced the business of making piano-cases in 1885, in what was the Union Comb shop, a large factory on Central Street. The location here mentioned was first occupied for business purposes in 1846. At that time, in order to accommodate the comb business of Joslin & Graham, this property was purchased, the dam built which flows the Union Comb Co.'s pond and a shop erected in 1846-47 by Mr. Charles L. Joslin. The property came by different hands to the possession of the Union Comb Co. This company erected a large factory, which in a few years was burned and rebuilt. It was in this last shop that the company now spoken of began the manufacture of piano-cases. The company remained here until October 1, 1886, when the property was sold to the Richardson Carriage Co., and the piano-case works were moved to the Whitney & Rice mill on Mechanic Street. At this place the business is now conducted by the original owners associated with Mr. Geo. L. Rice.

**WOOLEN GOODS.**—It is evident that the woollen industry proper had a beginning in Leominster as early as 1800. Many years previous, we have found, while tracing the business history of the site now owned by F. G. Smith, that a mill was erected there to dress home-made cloth. But if this be claimed as not a proper beginning of the woollen business, we read that in 1799 Nichols & Kendall built a mill on the Nashua River for the manufacture of woollen goods. In the next year the property was rented to John Taylor, an Englishman, experienced in the making of woollen cloth and was by him operated in a small way till 1810. At that time, it may be inferred, that he acquired the property by purchase, for he enlarged both factory and power and managed an increased business until 1828, when the mill suffered the fate of all like structures on that stream and was quietly converted into a paper-mill.

From 1828 to 1865 there is no evidence that the woollen business had a home or any mention within the limits of the town. It seems to have died from memory or thought. Curiously enough, when it was started again, the mill was built by a man who had spent his life and made his fortune in the paper business. It was a kind of restitution for the theft of the old woollen-mill thirty-seven years before.

This new mill was the four-set brick mill already mentioned as built by S. S. Crocker on Pond Street.

The woollen business is now represented in Leominster by E. M. Rockwell at this mill on Pond Street, and by the Leominster Worsted Company at their new factory, just below. The mill on Pond Street has been enlarged and remodeled by Mr. Rockwell, and is now a complete nine-set mill. For

the greater part of his business life Mr. Rockwell has either been engaged in woollen manufacturing or in superintending the making of machinery for that purpose.

The Leominster Worsted Company began their present mill in the fall of 1887. It was finished and went into operation January, 1888; but the business itself was commenced by E. M. Rockwell and William Rodgers in May, 1886. William H. Chase takes the place of Mr. Rockwell in the present company.

**CHILDREN'S CARRIAGES.**—The nature of this business, the skill and intelligence required in the workmen, as well as the large capital employed and the high wages paid, unite to make this, like the piano business, one of the important working forces in the well-being of the town. It has proved, all will concede, the most important of Leominster's industries. The following history of its growth and progress was prepared under the direction of one who best knows the facts.

"The manufacture of children's carriages in Leominster was begun in a very modest manner by F. W. & F. A. Whitney in the year 1858, at which time the few in use were, as a rule, homely in shape and rudely constructed. The present beauty and perfection in design was not even dreamed of at that time, and it was a slight, unimportant circumstance which led to the establishment of this valuable industry in Leominster. While on a visit to Greenfield, Mass., Mr. F. A. Whitney noticed on the street a baby-carriage, somewhat different from the stereotyped pattern, and it occurred to him that the manufacture in new and attractive designs might be made profitable; upon his return home he consulted with his cousin, Mr. F. W. Whitney, and found him equally confident and willing to embark in the business. Accordingly they hired a small portion of the Lockey shop, located where the shoe factory of Messrs. Valpey & Anthony now stands, and, with only a few men in their employ, began work.

In 1861, soon after the outbreak of the Civil War, Mr. F. A. Whitney sold his interest to F. W. Whitney, and entered the service of the Christian Commission. After some months of labor he returned, and purchased, once more, his share in the business. In 1862 the building, then partially occupied, was consumed by fire, occasioning much loss, with no insurance: with the exception of one planer scarcely anything was saved. This planer is still in use by the company.

After the fire the firm resumed work in the shop recently occupied by the Leominster Worsted Co., situated on Water Street, using two other buildings, located where the depot now stands, for finishing purposes. In 1863 F. A. Whitney purchased the entire business. In 1865 he was requested to vacate the position he occupied, and then arose a problem, difficult to solve, where he should next locate. The

water privilege to be obtained upon the tract of land known as "Paradise" settled the question, and accordingly he erected at once, the westerly of the present group of buildings. A more desirable spot could hardly have been chosen: it was conspicuous for its natural beauty, and perfectly suited to the growing requirements of the business, whose early history had always been attended by uncertainty and discouragement, the losses by fire and removals making it seem an unequal struggle. Then the difficulty of conveying goods to town arose; as there was no bridge across the stream, it was necessary to carry them by a path through the woods, for nearly a mile. Finally, Mr. Whitney petitioned the town to build a bridge; there was much opposition by some of the leading citizens, who thought it an unnecessary outlay of money; but after a time, owing, in a great measure, to the influence of Mr. Alfred L. Burditt, chairman of the Board of Selectmen, and his associates, a bridge was built, which has since been replaced by a substantial iron structure. Other buildings were erected, and the business grew and increased until, while in the first two or three years five or six hundred covered the number of carriages manufactured, 1871 found the sales enlarged to twelve thousand. At that time, in order to still better facilitate business, a joint stock company was formed and incorporated, known as "The F. A. Whitney Carriage Company," with F. A. Whitney, president; F. W. Whitney, treasurer; Wm. B. Whitney, superintendent of wood and iron department, and S. M. Frost, secretary and traveling salesman. F. A. Whitney, F. W. Whitney, Wm. B. Whitney and S. M. Frost, directors and owners of the entire stock. Not a season has passed since 1871 without the addition either of buildings, lumber-sheds, or improvements in labor-saving devices, to increase production, economize cost, and secure the best mechanical results. The enterprise has proved remarkably successful, furnishing employment to a large number of people, and contributing greatly to the material prosperity of the town. In 1885 Mr. S. M. Frost retired from the business, and F. H. Shaw, J. P. Holman, Philip Lothrop and Wm. C. Burditt, employes of the company, became stockholders. In 1886 Wm. B. Whitney retired, and Geo. W. Foster, formerly of the firm of Foster Bros. & Kenney, entered the employ of the company and took an interest. A few months ago Mr. F. H. Shaw sold his interest, leaving the present management as follows: F. A. Whitney, president and treasurer; Wm. C. Burditt, secretary; Geo. W. Foster, traveling salesman, and F. A. Whitney, J. P. Holman, P. Lothrop and Geo. W. Foster, directors.

The company was never in a better condition to manufacture than at the present time, with one hundred and fifty employes, and shipping goods to all parts of the United States, South America and Australia."

Of her citizens, there is no one whom Leominster

honors more, or who better deserves the honor, than Mr. F. A. Whitney. It is doubtful if any other man has contributed more than he to the permanent and healthy growth of our mechanical industries. Not only did he help to establish this most important business, but it was chiefly by his foresight and energy that it passed its most critical time, took possession of a location admirably fitted for its accommodation and development and came to its present liberal, permanent and prosperous condition. Mr. Whitney is not a native of Leominster, but he has been for many years, covering the whole of his business career, closely connected with the religious and industrial life of the town. While his business record is an honor to himself, both as a manufacturer and an employer, and has been and is a vital, working force in our growth and prosperity, the buildings he has planned with so much taste, and caused to be so thoroughly constructed, will remain as a permanent element in Leominster's future industrial history.

In the same line of business the Richardson Carriage Company have been for two years located in Leominster. They occupy the old Union Comb Shop, which they have twice enlarged. The business is prosperous and employs many hands. It is now and will be one of the important elements in our progress, but as a late comer, its history is hardly demanded in this sketch.

**MACHINERY.**—Thurston Richardson, a man of much more than ordinary mechanical ability, and especially skillful as a worker in iron, seems to have been the first in Leominster to make the manufacture of machinery a regular business. He worked in a small shop on Union Street, and devoted his attention largely to the manufacture of comb tools. While in Boston purchasing machinery for the Union Comb Co., Mr. Richardson was exposed to the small-pox, of which disease he died. From that time there has been some business of this kind in town, managed by different parties and located at different places; but the iron industry has never been extensive or prominent.

At present there are four firms in town working in iron,—Gould & Cook, manufacturers of the Gem Pencil-sharpener; J. A. Stowell, John Mather and Austin A. Smith. These firms do the general jobbing business of the town, and some or all of them undertake the making of shafting, gearing, hangers, pulleys, etc. Mr. Smith has of late made a number of rattan machines of excellent quality; but none of the firms employ many hands or undertake very heavy work. It is a direction in which the possibilities of Leominster have not been largely developed.

Nearly allied to this business, however, is the making of apple-parers, which has been, and is still, somewhat more largely carried on in town. The business was commenced by Lockey & Howland in 1856, and by them made very profitable. Later Mr.

Lockey managed the business alone; but in the end it was sold and moved from town. Some time after, Mr. F. W. Hudson started the same business, but under different patents, and continued it with success till within a few years, when he sold his interest to his son, C. E. Hudson, the present owner. The business employs, at some seasons of the year, fifteen or more hands, and is of growing importance.

**CHAMBER FURNITURE.**—It is not at all probable that the history of this industry in Leominster can bear a date much earlier than 1864. The exact date of the business conducted by a Mr. Pratt in the Lane & Prescott shop is not known to the writer and it is *possible* that Mr. George A. Bishop began work at the same place a short time before the year above named. But the year 1864 is the time when the business took such form as permanently to affect the interests of the town.

At present there are two firms in Leominster engaged in this business: the Leominster Furniture Company and Merriam, Hall & Co. at North Leominster. The business of Merriam, Hall & Co., was established in 1864, at which time the first buildings of the present factory were erected. The original partners were George Hall, Samuel Merriam and Edward Pickard. Two of the three, at least, had not been residents of Leominster previous to this time. The relations of Mr. Merriam to this business are embodied in the sketch of his life. The firm now consists of George Hall, one of the original owners and his son, Arthur H. Hall, both wholly familiar with the business. The buildings have been several times enlarged and are now carefully arranged and adapted to the needs of the business. The firm have lately purchased a large tract from the Moses Richardson estate, erected a large store-house and conducted it by a side-track directly with the Fitchburg Railroad. This enables them to handle freight with large economy of time and labor. The business is wholly the making of chamber suits in ash, oak and cherry. About ninety men are employed and the annual product is ten thousand suits.

About the same year Blodgett & Bishop began to make chamber suits in what was called the Lane & Prescott shop. Soon after, they erected the factory now used by the company at the lowest point on Monoosnock Brook which has yet been occupied for manufacturing purposes. Bishop & Hogan succeeded Blodgett & Bishop, and when Mr. Hogan retired the firm became George A. Bishop & Company. In this form the business continued until 1878, when Mr. Bishop died very suddenly. For the next two years there were two firms, Martin, Bates & Co., and A. J. Bates & Co., but in 1880 the present corporation was formed, known in law as The Leominster Furniture Manufacturing Company. The original facilities of the plant have been largely increased by the addition of store-house, lumber-sheds, &c. The business of the corporation is the manufacture of chamber suits

in pine, ash, oak and chestnut. The mill has both steam and water-power and accommodates about fifty men. This company finish a few suits, but no goods are finished at the factory of Merriam, Hall & Co.

**TOYS AND GAMES.**—This business is conducted by W. S. Reed and C. E. Dresser, who constitute the W. S. Reed Toy Company. So far as the writer has found any clue to the business history of the site now occupied by this corporation, it is contained in the following:

"About the year 1763 another saw-mill was erected further down the stream (Monoosnock Brook), by Rufus Houghton. This was afterwards known as the Fullum Mill." From about 1825 to 1847 this mill was occupied by Thomas Stearns for a tannery, when the property was sold to J. C. Lane, who erected the present wooden building. But there is no certainty that the new shop was built on the exact site of the old mill; indeed, it seems probable that it was farther to the north and west and the "Fullum Mill" stood nearer the place now occupied by the Rattan Works. It is perhaps needless to say that the shop erected by Mr. Lane for his piano-works in time came to be used for the manufacture of combs.

In 1874 the New England Toy Company, consisting of W. S. Reed, Seymour Lyman & F. A. Whitney, was organized. The company manufactured a few styles of children's blocks, and published one or more primers of the same general character. But as the business was never able to earn its own living, it died at the age of eighteen months.

In July, 1876, W. S. Reed, having secured several patents upon inventions of his own, began the manufacture of toys in a building owned by the Whitney Carriage Company. In 1879 he purchased the Lane & Prescott shop and soon after, to accommodate his rapidly increasing business, built the present brick factory.

In 1881 the present corporation was formed, with W. S. Reed as president and C. E. Dresser as treasurer. All the stock is owned by these gentlemen, which fact possesses at least this advantage, that the whole corporation can hold office.

The company manufacture toys, games and novelties of every description; many of these are among the most attractive in the market and have an extensive sale, reaching even beyond the limits of the United States. They make also several styles of tables and other goods not included under the general term of toys. These last are among the best and most convenient of household articles.

In 1886 the company began the manufacturing of a case used to transport liquids through the mails. These cases are of wood, lined with cork and to one end is fitted a tight screw-cap cushioned with rubber. A glass bottle is placed inside this case, holding the liquid to be transmitted. This is one of the best mailing cases in the market and said to be the only one having the approval of the Postmaster-General.

The business of this corporation forms one of the leading industries of Leominster.

**LEATHER BOARD.**—Among the industries which have been established within the past twenty years and are now at home in Leominster, this is one of the most important. It is located on the Nashua River at the site occupied by the grist-mill erected by Major Amos Haws at the request of his fellow-citizens. The property was purchased and the business established in 1868. The company is known as the Harwood Manufacturing Company, and the owners are J. A. Harwood, of Littleton, and Nahum Harwood, of Leominster.

As first stated the business consisted of the manufacture of leather board, but the making of boot and shoe stiffenings and chair-seats has been added, and the capacity of the plant increased from one to three tons per day. In 1883 the buildings were wholly destroyed by fire; but the ruins were removed and new buildings erected with no unnecessary delay. These buildings have all modern appliances for the accommodation of the business and the comfort of the workmen. The factory has both water and steam-power, and employs about sixty men. This business has been prosperous from the beginning, and by furnishing constant employment to so many skilled mechanics, has been and is an important agent in quickening the growth of the town. It is a strong and staple business.

**MANUFACTURE OF WHITE SHIRTS.**—Less than nine years ago this whole business was foreign to the thought and knowledge of Leominster. Probably no one at that time had the least idea that Leominster would ever be known in the State, much less in the country, for its manufacture of white shirts. Still the business is evidently here to stay, and has already attained most ample proportions. Its beginnings and history may be briefly stated.

In September, 1880, G. F. Morse & Co. purchased a few machines and a small quantity of cloth and were preparing to start this business, when C. E. Dresser and D. C. Nickerson, either because it *was a new business* or because it promised success, bought the material and began the work. With these gentlemen Mr. F. A. Whitney was, soon after, associated. This infant industry was put in the care of George A. Gane, at the time a manufacturer of custom shirts in Fitchburg, for none of the partners had any practical knowledge of the business. This is the opening chapter of its history. It may be doubted if any of the gentlemen engaged in starting the work had any clear idea of what was to come of it all. The whole thing seems to the writer as in some sense an accident, or, at most, an experiment in its starting.

The first owners continued the business until May, 1881, when it was sold to E. A. Buffinton, of Detroit. It has never been known in what ratio the first owners divided the profits. Mr. Buffinton was as

thoroughly fitted for this business as a man could be who had been superintendent of a large *shoe* factory and had never made a shirt in his life. But he had energy and business ability, and these answered until the experience could be acquired. Under the management of Mr. Buffinton the business began to increase and assume a more permanent form. The beginnings were small, twenty machines and a single floor in a comparatively small building; but in the second year a laundry was added and another room. At the end of five years the whole business was moved to a new and much larger building erected by Mr. A. W. Williams for its accommodation. This building has since been enlarged. The company has at the present writing a contract with the Superintendent of the Women's Reformatory Prison at Sherborn, and a branch factory at Provincetown, Mass. They sell, also, the goods made by the Bay State Shirt Company. This, in brief, is the history of the Leominster Shirt Company. In 1887 Mr. C. C. Foster became associated in the business.

About a year later than the organization of the Leominster Shirt Company, Mr. G. A. Gane, who had left the employ of Mr. Buffinton, started what is called the Wachusett Shirt Company. It was cradled in a small room in Paton's Block, and in its infancy had only eight machines. In July, 1882, Mr. F. A. Whitney took part in this business. From its first quarters the business moved to the shop of W. D. Earl & Co., and from there to the upper story of a building owned by the Whitney Carriage Company. It soon spread from this single floor all through the building and began to feel cramped even in its larger quarters. Under these conditions Mr. Whitney planned and erected extensive additions, which were finished and dedicated December 5, 1885. This building is a model of convenience and comfort, every way admirably adapted to its purpose. This building accommodated the business for something more than a year, but in June, 1886, Mr. Whitney determined to erect another and still finer factory, and the work was finished the following year. This new building is of brick and is without doubt the most complete and elegant manufacturing building in any town of this size in the State. Nothing that would improve the sanitary condition, the convenience for doing business or increase the comfort of the employés is omitted. The structure is an ornament to the town and, accidents apart, will remain for many generations a permanent addition to the business possibilities of Leominster. The company is doing, and has every facility for doing, an extensive and profitable business. It is not easy to see how better accommodations could be planned or desired.

The Bay State Shirt Company was organized in October, 1885, by A. G. Morse, of Leominster, and George H. Priest, of Sterling. Mr. Priest soon withdrew, and it is now a stock company. The business has been twice enlarged, uses about a hundred ma-

chines and sells its goods through the Leominster Shirt Company.

After this review, it will hardly be claimed that the manufacture of white shirts is not an important industry in Leominster. It is young, but certainly very large of its age. With facilities for making a thousand dozen of shirts in a day, Leominster is not likely to fail in any demand made upon her in this direction.

Leominster has other important industries, some well under way and others in process of development. The rattan works, now only fairly commenced, promises to add to the permanent forces of the town. A. W. Colburn & Co. employ some twenty-eight men in the manufacture of musical merchandise. Aldrich Cook has a factory for doing all kinds of enamel work. Tenney & Kenney are manufacturers of builders' supplies, as window-frames, doors, etc. A. A. Tisdale & Co. manufacturers of reed goods, carriage-bodies, etc. The Union Desk Company located here in 1887, manufacturing all kinds of desks and library tables. But as the history is substantially complete, perhaps the enumeration has proceeded far enough to show that the claim was a just one, that Leominster could afford to be judged by the character and extent of her manufacturing industries.

No town can be exempt from the action of those forces which affect trade and currency. Business will have its times of depression in any community. Nor is there any wish to state the case for Leominster any more favorably than the facts will warrant. But considering the extent of her industries and their variety, the general character of the employes for skill and intelligence, it may fairly be claimed that Leominster will suffer as little from labor depressions or labor troubles, will offer as constant employment and at as favorable wages to her mechanics as any other town in this Commonwealth. If to this be added the considerations which would naturally come from her pleasant surroundings, healthy location, superior advantages of education, of social culture and religious training, who will say that the two questions, standing at the opening of this chapter, do not here find so favorable an answer as to make Leominster a most desirable place for a home?

## CHAPTER CLVIII.

### LEOMINSTER—(*Continued.*)

#### MILITARY.

LEOMINSTER has an honorable war record. She would, indeed, be unworthy both of her ancestors and the times of her birth, if in all the struggles for liberty, she had *not* made full proof of her patriot-

ism. It is true that the first settlers of the town had no personal experience of the tomahawk and the scalping-knife; but the story of what their fathers had suffered was a close remembrance; and these hardy pioneers had barely time to build their rude homes, "establish God's house in the wilderness," connect the hill-tops by roads and erect here and there a mill to grind their corn and saw their logs, when the alarm of war sounded at the North, and the sword did not, for the next thirty-and-five years, rest easy in its scabbard. The origin and the early environments of the town were favorable for the growth of patriotism; and so it is no surprise to find that in all wars, where the records can be obtained, Leominster was at the front.

Leominster hardly knew herself to be a town when King George's War began in 1744. If any requisition was made upon Leominster for this war, there does not appear to a record of the fact; but as the chief event was the siege and taking of Louisbourg, and as the burden of this expedition rested upon New England, and particularly upon Massachusetts, it may well be that Leominster was represented at that famous siege. Possibly some son of hers learned there that which was practiced thirty years later for England's benefit. But the past must be allowed to keep its secret as regards this war.

The French and Indian War, so called, soon followed, and in this contest we are able to find the work of Leominster. Her quota of troops was thirty-six, and these names make a part of the list:

Lieutenant Benjamin Whitcomb, Captain Jonas Johnson, Luke Richardson, Jonas White, Wm. Warren, Samuel Warren, Joseph Polly, Jonas Clark, Jonathan Houghton, Captain Wm. Boutelle, Sergeant John White, Elias Carter, Zenas Whitcomb, Benjamin Stevens, Jonathan White, Jonas Spofford, Benjamin Whitcomb.

The following muster-roll, also, shows that a company marched from Leominster in answer to a special case of alarm. The taking of the fort was no doubt the cause of the return. Whether all were Leominster men or not cannot now be ascertained. The roll is of interest.

A muster Roll of a foot Company, commanded by Thomas Wilder, of Leominster, detached out of Col. Oliver Wilder's Regiment, that marched on the Alarm for the relief of Fort William Henry as far as Springfield. Gone 14 days.

Captain Thomas Wilder, Lieutenant Samuel Nourse, Ensign Josiah Bayley, Sergeant Nathaniel Page, Sergeant Caleb Sawyer, Sergeant Oliver Hale, Sergeant Nathan Bennett, Corporal Wm. Wilder, Corporal Nathaniel Hastings, Corporal Phineas Wheelock, Corporal John Pollard, Benjamin Wheelock, Jonathan White, James Simonds, Rufus Houghton, Amos Kendall, Kendall Boutell, Joseph Polley, Nathaniel Colburn, Luke Richardson, Asa Johnson, Oliver Wyman, James Ballard, Gardner Wilder, Phillip Vorbach, Silas Bayley, Jacob Houghton, Obadiah Gill, Samuel Moore, Henry Satel, Thomas Fife, James Snow, Mathey Knight, Samuel Bruce, Wm. Pollard, James McBride, Jabez Bears, Elijah Wilson, Jonathan Holman, John Pyper, John Grout, Jonathan Messau, Jonathan Page, Joseph Davis, Reuben Wyman, Jacob Gould, Aaron Taylor, Jonathan Page, Jr., Ephraim Osborn, Timothy Fox, Seth Dodge, John Leach, Zebulon Dodge, Jonathan Wood, Silas Dutton, Jonathan Holt, Asa Satel, Wm. Kimball, Reuben Smith, John Symonds, Amos Haseltine, William Seward, Samuel Hodgekin, David Pierce, Abijah Pratt, Daniel Pierce.

Worcester SS: January 8<sup>th</sup>, 1758. Then Cap. Thomas Wilder person-

ally appeared and made oath to the truth of the above roll that each person set thereon served the whole term and took nothing on account of the Province but what is there set forth.

THOMAS WILDER.

Sworn before me.

JOSEPH WILDER, *Justice of the Peace.*

Mr. Wilder, in his history, says, that of those who were drafted, some went willingly, and others furnished substitutes; and, what is still more remarkable, all lived to return and unite in the general thanksgiving over the conquest of Canada. This thanksgiving occurred October 9, 1760. Leominster was thus happily through the first severe war after her incorporation. Through the more serious troubles just at hand she was not to pass without the stain of blood.

If one could, in imagination, enter a Leominster home anywhere between the years 1765 and 1775, he would find, as the evening came on, the family gathered about the immense fire-place, discussing the darkening prospects of the Colonies and their relation to the mother country. It is likely that little mention would be made of absolute separation from England. But the spirit was only waiting motive and direction. Leominster was not disloyal; but there was liberty in her blood. England, in her selfishness, taught her Colonies to think, to organize, to pay and to fight, and they bettered the instruction. It was pleasant music to English ears when, on June 17, 1745, New England men beat the triumphal march into Louisbourg; but when, on June 17, 1775, thirty years after, the same drums were heard at Lexington, the music was less agreeable. Still, it was the same old tune.

What the town did in these years of preparation may be briefly summarized. The people of Leominster were loyal to King George while King George was loyal to the Colonies; but their allegiance to him was held within the larger feeling of liberty,—a determination to maintain their equal and just rights of freemen, to secure which they had braved exile, danger and death. In witness of this, the closing words of an address, adopted March 3, 1766, may be quoted. The people of Boston were suffering under the laws of the British Parliament. The address was one of sympathy, and closes with these words: "WE MUST, WE CAN, AND WE WILL BE FREE. We cannot part with our creation right. We are obliged forever to assert it, as it is our glory to be in subjection to that Supreme Power which made us free."

It appears from the spirit and temper of this address that the people of Leominster were not one whit behind the rest part of Massachusetts in their love for liberty and in their willingness to take any risk for its possession. There is clear proof that this interest did not fail or become faint. For example, in September, 1768, a committee of three was appointed to meet other committees in Boston and to consider questions relating to the public good. About four years after, Leominster took occasion, in town-

meeting, to approve the doings of Boston in regard to their troubles with the British government. In August, 1774, Leominster, with other towns, appointed a Committee of Correspondence. These committees were not only a means of collecting intelligence, but were also the first step towards organization, and in the end gave the country the Continental Congress.

When, in the progress of events, the port of Boston was closed, a committee was appointed to consider the state of the country, and they made this report:

We are of the opinion that as the Delegates from the several Colonies are soon to meet in Congress, in order to point out and advise what is best to be done at this alarming crisis, it will be most proper in us to wait until we are informed what measures they recommend before we come to any particular Resolutions concerning the matter, except as follows:

1st. That we will to the utmost of our abilities strictly and steadfastly pursue such methods as shall be recommended by the said Congress as the most likely to recover our just rights and privileges.

2d. That we will heartily endeavor as much as in us lays to awaken and stir up every person to a thorough sense of the real certainty there now is of America being reduced to the most abject slavery and poverty; and the danger there also is of the loss of our religious, as well as our civil rights and privileges, unless we unitedly endeavor by a steady and manly opposition to prevent it.

3d. We earnestly recommend it to the consideration of this town whether it is not their indispensable duty to afford some relief to the industrious poor of the town of Boston, who are really exposed to the most severe hardships by means of the late cruel Acts of Parliament.

4th. We recommend peace, firmness and a manly fortitude in asserting and maintaining, to the utmost of our abilities, all our just, lawful and constitutional rights and privileges.

THOMAS LEGGETT,	} Committee
ISRAEL NICHOLS,	
STEPHEN JOHNSON,	
JOHN JOSLIN, JR.,	
THOMAS GOWING,	

August 27, 1774.

When war was the only possibility, Leominster was not a moment behind. A large number, considering the population of the town, marched at once to Lexington, June 17, 1775. The names of the members of this company who belonged in Leominster are given below:

Captain David Wilder, Sergeant Rufus Houghton, Sergeant Abijah Butler, David Kendall, Josiah Whitcomb, James Joslin, David Wilson, William Nichols, Ebenezer Stuart, Ephraim Bates, David Clarke, Josiah Colburn, Asa Kendall, Richard Stuart, Reuben Gates.

A company was at once enlisted into the service for eight months, and some of the same re-enlisted for the war. Of this company of eight months' men all but a very few were from Leominster, and for this reason their names are given below:

*Continental Twenty-third Regiment of Foot, commanded by Colonel Asa Whitcomb.*—Captain David Wilder, Lieutenant Jonathan Gates and Lieutenant Timothy Boutell, commissioned April 19, 1775. Sergeants Francis Lane, William Warner, Josiah Carter, Peter Joslin; Corporals, Levi Warner, Samuel Buss, James Butler, Jonathan Warren; Drummer, Thomas Rogers; Fifer, Abijah Haskell; Privates, Charles Eames, James Boutelle, Abel Bigelow, John Battles, Isaac Blodgett, Amos Brown, Levi Blood, Jonathan Colburn, Stephen Chase, Nathaniel Chapman, David Clark, Elisha Carther, Josiah Colburn, David Clark, Jr., Daniel Edson, David Fleeman, John Farmer, Reuben Gates, Jonathan Gates, Jr., Joshua Hemenway, Henry Hall, Benjamin Hale, John Hale, Joshua Holt, David Hale, Luke Johnson, Jonathan Kendall, Jacob Kibberiger, Asa Kendall, Amos Kendall, Philip Lock, John Lock, Ebenezer Osgood, Joshua Prouty, Asa Priest, David Robinson, Joseph Smith, Benjamin Stearns, Zebedee Simons, John Stone, Samuel Salter,

Aaron Sampson, Othniel Taylor, Joshua White, Henry Winchester, Samuel Willard, John Whitney, Isaac Whitmore, Josiah White, Ebenezer Wood, James Wood, Philip Winter, Luke Wilson, Jacob Winter, Joseph Smith, Jr.

All except eight enlisted April 19, 1775.

Not only did Leominster respond promptly and hartily to every call for men and means in the regular services, but she was ready with help in such special emergencies as came in this section of the country. It is known that in the case of Burgoyne's invasion many volunteers went to Bennington in addition to the company whose names are here printed. At this battle Thomas Joslin, a brother of the captain, was killed by the first shot of the enemy.

This company marched from Leominster, but probably some were from the neighboring towns:

#### ROLL.

Roll of Captain John Joslin's Company in Colonel Job Cushing's Regiment, who marched from Leominster for Bennington on the last of July, A.D. 1777, by order of Council, to "joyn" General Seth Warner, as follows:

Captain, John Joslin; Lieutenants, Boman Brown and Benjamin Spaulding; Sergeants, Francis Lane, David Sawin, John Wood and Timothy Fulim; Corporals, Stephen Miles, Barnabas Wood, Benjamin Stuart and John Goodridge; Drummer, Nehemiah Follensbe; Fifer, Nathaniel Follensbe; Privates, Jonathan Adams, Asa Buttrick, John Ben-nitt, Asa Brooks, Samuel Bowers, William Boutel, Stephen Bayley, Jonathan Benjamin, Richard Haseltine, John Cohe, Joseph Davis, Samuel Danforth, Nicholas Dike, Edward Fuller, Thomas Farnsworth, Joseph Fisher, Oliver Fullam, Jacob Goodail, Jonathan Graves, Levi Graves, Zeeb. Green, Jonathan Gipson, Elijah Houghton, Obediah Holt, Israel Hale, John Hale, Samuel Hartwell, Aaron Hodskins, Elijah Holt, John Holt, Jacob Holt, Phinehas Hemenway, Samuel Hutchinson, Thomas Joslin, Thomas Kimball, Philip Lock, Nathaniel Lane, Joshua Millens, Samuel Miller, Levi Miles, James Marble, Ezekiel Medcalf, Isaac Puffer, Amos Putnam, Daniel Pushe, Mitchels Richards, Nathaniel Russell, Jeruthan Ramond, Samuel Sanderson, Aaron Sanderson, Joseph Stuart, Benjamin Sterns, Jacob Spofford, Jonathan Stiles, Silas Spaulding, Asa Savig Taylor, Robert Upton, Willis Wilder, Samuel Wood, Nathaniel Walker, James Wood, James Walker, John Whitcomb, Joseph Houghton and Jos. Priest.

From the record of those times we may pick a few points of interest and such as will throw much light upon the general spirit of the town during the Revolutionary struggle. It is clear that the people of Leominster were never moved by a mere sense of exact duty. There was manifested a large-hearted love and loyalty for the cause in all their acts, which tell how fully they had committed themselves to the service of liberty. The question was not: How can we meet this requisition so as just to relieve ourselves of its terms? but each call was filled promptly, fully and often more. There was something left over; a spirit of largeness in the service, indicative of the love which went with the offering. Still the men of that time, as now, did their own thinking. They could not be pushed too far even in the service of their country. June 3, 1778, we find that in town-meeting assembled they voted a remonstance to the "General Court," "setting forth that they had at all times fully met all calls upon them for men or material; but so many other towns had failed in these respects as greatly to increase their burdens and that they could not much longer furnish men at their

own expense." Still we find that in the next call there was no trouble or delay in furnishing the men, and when the State, in September, 1780, voted a large supply of beef for the army, Leominster paid for three hundred and thirty-four pounds more than her proportion, which was seventy-two hundred pounds. This fairly illustrates the spirit of the men who controlled this town during the Revolution.

There is another fact worthy of mention and of more than passing interest. Mr. Wilder, in his history, has this statement, which stands still uncontradicted: "Although the men of this town were loyal subjects of their King before the Revolution, yet during the whole time of the struggle for Independence no one was accused, or even suspected, of being a Tory, or unfriendly to the cause." That is worthy of remembrance, and may well be a matter of pride to the present inhabitants. ALL the people were loyal to the cause of freedom. It is pleasant to believe that the town did its WHOLE duty, that there was no one within its limits who did not love the cause of the nation, labor for its success and rejoice in its triumph. *It is a good record.*

Still another point of interest appears in this, that the people of Leominster have always favored the exact defining of power on the part of the Legislature by a Constitution. Unrestricted power for State or nation was not their idea of liberty. Hence we find that the town voted by large majorities for a State Constitution and instructed their representative to work for the same. At a later period, also, the town voted in favor of adopting the National Constitution.

The method adopted by the town to fill its several quotas is interesting, and at this date somewhat amusing. The town divided itself into classes or districts. Each class was to provide and pay for a man. In this capacity the classes acted separately, levied taxes and made contracts. The business was done in no half-pledged manner, as appears from the following contract, made by one of these classes with the man who was to serve them:

LEOMINSTER, April 10, 1781.

I, the subscriber, do engage to serve in the Continental army for three years, unless sooner discharged, for the class of which Capt. Joshua Wood is the head, provided the class pay me two thousand dollars in paper money or silver, at the exchange, before I go, and eighteen three-year old midding cattle, provided I stay two years and six months; and if I stay one year and six months said cattle are to be two years old; and if I stay but one week said cattle are to be one year old.

DAVID JOSLIN.

LANCASTER, April 12, 1781.

Then passed muster, David Joslin, for a Continental soldier for the term of three years, and for the town of Leominster and Capt. Joshua Wood's class.

Before me,

WM. DUNSMOOR, *Mst. Mast.*

This young soldier was a mere boy, and tradition says that it required high-heeled shoes and some extra under-garments to take him safely through the examination. He made a good soldier, however, served out his time and received his cattle as per agreement.

Many instances of special patriotism and the cheerful bearing of burdens incident to the times could be given. The women were in no way behind the men in this regard, and all did their duty well. What has now been said, however, must suffice. "The souls of the people were tried and their pockets drained, but they stood up to the work like men."

It is not at this time possible to give any full list of those who served as regular soldiers in the army during the Revolution. Mr. Wilder mentions the names of eleven and thinks that five more were included in the first enlistment of three years' men. The late James Bennett, Esq., had at the time of his death collected a large number of the names of those who served in this and other wars, but the lists are not designated with sufficient clearness so that a full record can be made. Entries which were clear to him cannot now be properly placed. The record is sufficiently full, however, so that all will admit that the town passed with credit through this great struggle.

In the Rebellion of Daniel Shays, which came but a few years later, this town fully sustained its reputation and stood firmly for law and order. Its quota of men for the militia was filled with characteristic promptness, and the town in addition furnished two of the officers—Ensign John Buss and Maj. Timothy Boutelle. The record, at this day, has its chief interest in the fact that, while Leominster furnished men to put down these insurgents, none of the insurgents themselves claimed a home within her limits.

**THE WAR OF 1812.**—This war is the next point of interest in the military history of the town. In common with other towns in this part of the country, Leominster, in her corporate capacity, does not seem to have been directly connected with this war. When our coast was threatened, a full company of artillery, under Capt. Joseph Tenney, marched to South Boston, and were on duty three months.

Without doubt some volunteers went from Leominster, but the writer can give the names of only two—Elisha Carter, who served nine months in the Eleventh United States Infantry, from June, 1812, to March, 1813. He died at Burlington, Vt., at the age of thirty-five years. The other was Jonathan Carter, of whom no account can be given.

**CIVIL WAR.**—It is greatly to be regretted that so large a part of Leominster's record in the Civil War is now lost. The history which could so easily have been written at the time, and which would to-day be of such incalculable interest and value, was neglected or forgotten in the hurry and excitement of the war. When men are busy in *making* history, they usually fail either to note its importance or record its facts. They are too near to see its bearing upon the future, too much interested in the events themselves and too large a part of the history to remember that there will ever come a time when the transactions

will not be as present and vivid to the minds of all men as they are to their own thought. In this way what Leominster did and suffered in the Great Rebellion was left, for the most part, unrecorded. There was no weekly paper to chronicle the doings of the people, and the records of the town are but the dry, cold bones of what was once a life so intense that its pulsations reached and affected every home in the community.

Writing in 1852, less than ten years before the Civil War, Mr. Wilder said of the military spirit of the town: "Even at the present day, should their political rights and privileges be infringed, a vast majority of the inhabitants of this town would doubtless at once stand forth in the defence of freedom and to sustain the laws and support the Constitution, both of this Commonwealth and of the United States." This was strikingly true in the years from 1861 to 1865; but before giving such details of the history as can now be obtained, this general statement is proper.

The old record of the Revolution was repeated. Leominster furnished four hundred and four men, and her quota was more than full. She "stood forth" nobly and well in the defence of freedom and in support of the laws and the Constitution. The insight which we get here and there of the town during the war shows active and sustained interest, energy and zeal in doing her part in suppressing the Great Rebellion.

At the opening of the Civil War there was one company of militia in town, Company A of the Ninth Regiment. It was originally chartered as a company of artillery in 1787, and for many years two field-pieces with the necessary appliances were kept in town. The company was an honor to the State, and especially to the citizen soldiery of the town of Leominster. This is the company which has already been referred to as marching to South Boston during the War of 1812. After this war it was changed into an infantry company. The first move in the War of the Rebellion, so far as Massachusetts had any part, was to muster the militia companies of the different towns into the service of the United States for three months. Company A, of Leominster, desired to go under this call, but was too late, as it had been decided to accept only such as would enlist for three years. The form of agreement was this:

"We, the undersigned, by our signatures hereto annexed, do hereby severally agree to serve as members of the Massachusetts Volunteer Militia for the term of three years, unless sooner discharged, from the date of our being mustered into the service, in accordance with the terms of the proclamation of the President of the United States, issued May 3d, 1861." Under these conditions this old Company A enlisted as Company A in Fifteenth Massachusetts Regiment. To their first offer of services the following reply was received:

COMMONWEALTH OF MASSACHUSETTS,  
Adjutant-General's Office, May 9, 1861.

*George W. Rockwood, Co. A, 9th Regt.:*

DEAR SIR,—Your letter of the 7th instant, enclosing the offer of your Company to serve three years in according with the President's proclamation, gives pleasure to the department.

The promptness with which you respond, as well as the eagerness you manifest, is honorable to yourselves and gratifying to those at headquarters.

I will make note of your application, but at present no answer can be given.

Yours truly,  
WM. SCHOULER,  
Adjt.-General.

This company was, however, mustered into service on the 12th of July following, and contained, we suppose, the first soldiers who went to the Civil War from Leominster.

The occasion of the departure of this company, June 28, 1861, was the first great day of the war for Leominster. The citizens presented Captain Rockwood with a sword before the company left town, and the people were present in great numbers to bid the soldiers "God speed." The presentation speech was made by Rev. Eli Fay, of the Unitarian Church, and Mr. Ward M. Cotton, a former captain of this company, was marshal of the day. Rev. Mr. Fay was full of patriotic enthusiasm and we give a few words of his speech, which must have been one of unusual power:

*Captain Rockwood:*

Your fellow-citizens have thought it proper to make some expression of their appreciation of your willingness to leave the quiet scenes in which you have so long mingled and to serve your race, your country and your God on the battle-field; and they have chosen me as their representative, to express, as words can but feebly express, the satisfaction we feel that you are willing to go and to lead a goodly number of our fellow-citizens to the field of mortal combat (if need be) in defense of the liberties of our country. . . . Sir: We have given you our men—our young men—we have given them, understanding the awful hazard of war, and I charge you, before God, to bring them back to us alive, or bring back to our distressed country, in order and liberty, the price of their blood. And as a slight testimonial of the profound sympathy which the community feel for you in view of the trying and responsible duties of your post, they have requested me to present this sword to you. Sir: Minister of the gospel of peace as I am, yet, under the circumstances, I cheerfully comply with that request. . . .

Mr. Fay was a man of intense convictions upon the questions of the war, and no man in Leominster did more efficient service than he in helping on the good cause. In this connection it is interesting to note how the same events appeared to one of the soldiers of this company. It helps us to get around on the other side of these things and see how little, after all, most men realized the severe work on hand. The record is made by the first sergeant of the company, and one whose name is now on the Leominster Soldier's Monument.

LEOMINSTER, June 28, 1861.

Agreeable to orders, the Company met at their Armory at 8 o'clock A.M., and, putting on the new Uniform, fitting some new members, after a short Drill under the Captain, numbering seventy officers & privates, they were dismissed till 11¼ A.M., when they met again, forming in line before the Old Armory, gave it three rousing cheers before leaving it for the Seat of War. The Company then marched into the Street, where a large delegation of the citizens of Leominster, under

command of Mr. Ward M. Cotton, formerly Captain of the Old Artillery Company, forming a Guard of Honor, escorted the Company to the Town Hall, where a collation was in readiness for the members of the Company and their friends.

After being seated, Mr. Ward M. Cotton, in behalf of the citizens of Leominster, invited the Company to a social dinner, and as the soldiers needed no urging, all fell to with a will, and an enormous mass of eatables disappeared in a wonderful short time.

At 12½ o'clock P.M. order was given to "fall in," and, escorted by the guard of honor, the Company marched through the principal streets to the Depot on the Fitchburg and Worcester Railroad, where a halt was made. The last Good-by and "God bless you" were whispered to the soldiers by rosy lips and a last hearty grip between friends.

Recorded by H. P. JORGENSEN,  
1st Sergeant of Company "A"

The experience of this day was not peculiar to Leominster; but was part of the general history of the times. Most of the towns started off their first soldiers with music, feasting and speaking. It seems well, even at this writing, that it was so; for the fearful work of the future was thus hidden for a moment, and the hearts of men burned with patriotic zeal. If the suffering and death had been seen from the beginning, it might not have been as easy to leave home and friends for the safety of the country.

Below, the names of the original members of Company A are given. The roll is of interest because it contains the first who enlisted from Leominster, and it is given in full because all the commissioned officers and so many of the privates were from this town.

The muster-roll of Company A, Fifteenth Massachusetts Volunteers, mustered into service of the United States July 12, 1861, by Captain Marshall, United States Army, and certified by Captain Rockwood:

Captain George W. Rockwood, First Lieutenant Leonard Wood, Second Lieutenant Frank W. Polly, First Sergeant Hans P. Jorgenson, Second Sergeant Reuben M. Holman, Third Sergeant Everett A. Brown, Fourth Sergeant Charles H. Stevens, Fifth Sergeant Wm. E. Wheelock, Henry Joy, First Corporal Charles A. Lamb, Second Corporal Andrew W. Cowdrey, Third Corporal Fred L. Hildrith, Fourth Corporal Wallace W. Derby, Fifth Corporal John M. Robbins, Sixth Corporal S. F. Maynard, Drummer Horatio Willard, Drummer G. F. Moore, Wagoner Frank E. Colburn, Ethan Allen, J. F. Bartlett, Eugene A. Bennett, Frank E. Benton, J. S. Brown, Robert Owen, G. W. Brown, O. J. Bugbee, Charles T. Brown, Henry Burnett, Sanford Botham, E. E. Betherly, J. S. Carlton, Lucien A. Cook, C. M. Coolidge, George D. Critchet, John H. Craine, G. M. Cook, Alexander Cooper, George B. Damon, Walder W. Davis, T. H. Davidson, Daniel Dunn, J. W. Farren, Sumner M. Frost, C. H. Fletcher, Franklin Gardner, Luther S. Hapgood, J. H. Hapgood, J. M. Howe, F. E. Hatch, Thomas A. Joslin, Augustus Johnson, Charles Joy, J. W. Kingsbury, J. J. Kendall, Edward Lord, J. H. Lalor, Peter McGee, Fordyce May, Wm. Maynard, H. A. Moore, C. G. Moore, Charles F. May, J. W. Nurse, Charles O. Nichols, Moses L. Nutting, G. F. Newton, A. A. Pelton, Asepoh Rice, Edward B. Robbins, Andrew J. Rugg, Jacob Rugg, Thomas B. Ross, J. Gould Snow, S. S. Stocking, Wm. H. Savage, J. Sullivan, Henry T. Taylor, John Tripp, Charles B. Woods, Joseph Willard, G. E. Wilder, E. L. Wilder, Cornelius W. Wilder, E. K. Wilder, E. Wilson, Wm. B. Whitney, Charles A. Wheelock, O. B. Williams, G. H. Watson, George Wood.

*Leominster Soldiers in the Civil War.*—Of course many of the men credited to Leominster under the different calls, were citizens of other towns at the time of enlistment. These are included in the four hundred and four above-named. Nor is it supposed that the list of Leominster men is complete. Perhaps it

would not now be possible to obtain all the names. At the time it would have been comparatively easy to trace the history of each man who enlisted from Leominster and to give his full war record. The favorable moment was not improved and now the information has mostly gone with the actors themselves. The list here given, therefore, does not claim to be complete. Such as it is, it will be found interesting:

John B. Allen, Co. C, 53d Regt.; Charles Ausburn, Co. C, 53d Regt.; Geo. A. Atkenson, Co. A, 13th Regt.; W. P. Andrew, 2d Regt. H. Art.; Frank O. Atherton, Co. H, 24th Regt. Art.; James Anderson, Co. H, 57th Regt.; Daniel Butterfield, Co. C, 53d Regt.; Mark K. Brown, Co. C, 53d Regt.; George W. Bixby, Co. C, 53d Regt.; George A. Bishop, Co. C, 53d Regt.; Frank C. Benton, Co. A, 15th Regt.; Asa Everett Brown, Co. A, 15th Regt.; Robert Brown, Co. A, 15th Regt.; Charles T. Brown, Co. A, 15th Regt.; Owen H. Buck, 1st Bat. Inf.; F. A. P. Batchelder, 3d R. I. H. Art.; Luke W. Brooks, Co. A, 36th Regt.; Abidan Burdett, Co. K, 4th Cav.; James Burt, 16th Bat.; Frank P. Blair, Co. E, 57th Regt.; Thomas E. Billings, 2d Regt.; Wm. A. Burrage, Co. H, 33d Regt.; Ebenezer F. Cozzens, Co. C, 53d Regt., Nov. 6, 1862; Albert F. Creed, Co. H, 21st Regt., Aug. 22, 1861; Joseph F. Chaffin, 23d Regt. Band, Oct. 14, 1861; C. Adolphus Chase, 1st Regt. Band, June 1, 1861; Andrew W. Cowdrey, Co. A, 15th Regt., July 12, 1861; Frank E. Colburn, Co. A, 15th Regt., July 12, 1861; John H. Crain, Co. A, 15th Regt., July 12, 1861; Charles A. Colburn, Co. A, 15th Regt., Nov. 26, 1861; Charles G. Crosby, Co. A, 15th Regt., Aug. 14, 1862; James Coulter, Co. H, 29th Regt., Dec. 19, 1861; Solon H. Carter, Co. A, 36th Regt., Aug. 14, 1862; Charles C. Capette, Co. B, 26th Regt., Mar. 7, 1864; Thomas Collins, Co. E, 57th Regt., June 25, 1864; George W. Channell, 2d Cav., Feb. 24, 1865; Amos H. Cook, 2d Cav., Feb. 24, 1865; John B. Davis, Co. C, 53d Regt., Nov. 8, 1862; George B. Damon, Co. G., 57th Regt., Mar. 10, 1864; Worcester F. Dodge, 1st Regt. Band, June 1, 1861; Daniel Dunn, Co. A, 15th Regt., July 12, 1861; Alden Derby, Co. A, 15th Regt., Aug. 9, 1862; Charles H. Derby, Co. A, 36th Regt., Aug. 4, 1862; Alfred Danforth, Co. B, 2d H. Art., Dec. 22, 1863; George W. Divoll, 7th Bat., Jan. 5, 1864; William Daily, Co. B, 19th Regt., Jan. 16, 1865; E. W. Dotan, Co. C, 23d Regt., Jan. 13, 1865; Josiah S. Davis, Co. E, 33d Regt., —, 1865; William A. Easler, Co. C, 53d Regt., Nov. 6, 1862; Joseph G. Eaton, 1st Regt. Band; Ives B. Foster, Co. C, 53d Regt., Nov. 6, 1862; John Ferguson, Co. C, 53d Regt., Nov. 6, 1862; Charles E. Fisher, Co. C, 53d Regt., Nov. 6, 1862; Eleaser T. Flint, Co. C, 53d Regt., Nov. 6, 1862; John Foster, Co. F, 26th Regt., Nov. 5, 1861; Sumner M. Frost, Co. H, 24th Art., Aug. 22, 1864; Stevens Fosdick, blockade ship "Connecticut," Feb. 21, 1865; J. D. Fairbanks, Co. B, 26th Regt.; James Gilchrist, Jr., Co. C, 53d Regt., Nov. 6, 1862; John A. Gilchrist, Co. F, 25th Regt.; Jerome S. Gates, Co. C, 53d Regt., Nov. 6, 1862; Edward P. Gee, Co. A, 15th Regt., March 26, 1864; Charles E. Gould, 21st Regt., Aug. 23, 1861; Amos N. Gleason, 21st Regt., July 30, 1861; Harris W. George, Co. H, 23d Regt., Sept. 19, 1861; Le Roy Gallup, Co. A, 36th Regt., Aug. 9, 1862; George P. Gibson, Co. A, 36th Regt., Aug. 14, 1862; Leonard Goodrech, Co. A, 36th Regt., Aug. 9, 1862; Frank George, Co. D, 3d Cav., Feb. 15, 1864; Wm. C. Gowell, Co. A, 1st Bat., Feb. 1, 1865; Warren E. Gilchrist, 1st Band; Edmund Hardy, Co. C, 53d Regt., Nov. 6, 1862; George T. Holt, Co. I, 21st Regt., Aug. 23, 1861; Wm. Holmes, Co. E, 1st Regt., June 18, 1861; Reuben M. Holman, Co. A, 15th Regt., July 12, 1861; George A. Houghton, Co. A, 21st Regt., July 30, 1861; Luther M. Hapgood, Co. A, 15th Regt., Dec. 14, 1861; Wm. S. Hale, Co. A, 15th Regt., Aug. 9, 1862; Cyrus Hadley, Co. G, 57th Regt., March 10, 1864; Robert Hosea, Co. F, 59th Regt., Feb. 20, 1864; Luther S. Hapgood, 26th H. Art., Aug. 18, 1864; Henry S. Harris, Co. H, 29th Art., Aug. 29, 1864; George H. Hardy, Co. D, 21st Regt., Jan. 26, 1864; Josiah Houghton, Co. I, 21st Regt.; R. T. Hays, 14th Bat., March 6, 1865; Robert Hammon, Co. I, 61st Regt., Jan. 21, 1865; A. E. Houghton, 3d Brigade Band, Feb. 23, 1865; Albert Houghton, Co. D, 2d Regt.; Augustine Horton, Co. H, 1st Regt.; Adelbert Johnson, Co. C, 53d Regt., Nov. 6, 1862; Wm. H. Johnson, Co. H, 21st Regt., Aug. 22, 1861; George N. Jennings, Co. M, 3d H. Art., Aug. 29, 1864; Augustus Johnson, Co. A, 15th Regt.; Charles Joy, Co. A, 15th Regt.; Wm. H. F. Kelley, Co. C, 53d Regt., Nov. 6, 1862; Patrick Kenefie, Co. C, 53d Regt., Nov. 6, 1862; Michael Kenefie, Co. E, Washington Ter. Vol.; Richard King, 30th Regt., Jan. 5, 1865; Russell B. Lewis, Co. C, 53d Regt., Nov. 6, 1862; James M. Lewis, Co. E, 53d Regt., Nov. 6, 1862; Patrick J. Leahy, Jr., Co. E, 25th Regt., Oct. 7, 1861;

James Laughren, 1st Band, Sept. 7, 1861 (re-enl. Aug. 18, 26th H. A.); Francis W. Lewis, Band, 1st Regt., May 25, 1861 (re-enl. Nov. 24, 1863, Corps d'Afrique); Cyrus Lock, 7th Battery, January 5, 1864; John Lyons, Company E, 25th Regiment, September 20, 1861; Adam B. Lang, Veteran Reserve Corps, February 15, 1865; Wm. F. McMeekin, Co. C, 53d Regt., November 6, 1862; Loxen L. Moore, 1st Regt. Band, June 1, 1861; Gilman F. Moore, Co. A, 15th Regt., July 12, 1861; William Maynard, Co. A, 15th Regt., July 12, 1861; Sylvander F. Maynard, Co. A, 15th Regt., July 12, 1861; Stilman A. Meads, Co. A, 36th Regt., Aug. 9, 1862; Louis W. Morgan, Co. A, 36th Regt., Aug. 4, 1862; James A. Marshall, Co. A, 36th Regt., 1862; James McDonough, 7th Bat., Jan. 5, 1864; Patrick McAdams, Co. H, 61st Regt., Jan. 11, 1865; Addison D. Maynard, Co. C, 53d Regt.; Harry Morse, Co. Rice, Co. C, 53d Regt., Nov. 10, 1862; George W. Rockwood, Co. A, 15th Regt., July 12, 1861; Edward B. Rollins, Co. A, 15th Regt., July 12, 1861; Jacob Rugg, Co. A, 15th Regt., July 12, 1861; John D. Robenson, Co. A, 32d Regt., Nov. 28, 1861; Charles Richards, 2d H. Art., Sept. 17, 1864; John Roche, 19th Regt., Jan. 21, 1865; James M. Robbins, 24th Co., H. Art., Aug. 18, 1864; Charles O. Roach, 31st Regt.; Cornelius Sullivan, Co. C, 53d Regt., Nov. 6, 1862; Charles H. Stevens, Co. A, 15th Regt., July 12, 1861; Saburd S. Stocking, Co. A, 15th Regt., July 12, 1861; Timothy Sullivan, Co. H, 29th Regt., Dec. 19, 1861; John Schouw, Co. H, 29th Regt., Nov. 23, 1861; Robert Stevens, Co. A, 36th Regt., Aug. 14, 1862; Charles W. Stearns, Co. A, 36th Regt., Aug. 9, 1862; John T. Sargent, Jr., Eng. Corps; Joel A. Stratton, Co. C, 53d Regt., Nov. 6, 1862; John D. Shedd, Co. I, 32d Regt.; Fosdic Stevens, blockade ship "Connecticut"; George M. Tenney, Co. C, 53d Regt., Nov. 6, 1862; Albert M. Thomas, Co. E, 21st Regt., July 30, 1861; Stephen A. Tisdale, 1st Regt. Band, Aug. 1, 1861; George E. Tisdale, 1st Regt. Band, June 1, 1861; Andrew Tisdale, 1st Regt. Band, June 1, 1861 (re-enl. April 11, 1863, 3d Brig. Band); Henry T. Taylor, 15th Regt., Co. A, July 12, 1861; Charles H. Taylor, Co. A, 15th Regt., July 12, 1861; Levi Tower, 24th H. A., Aug. 25, 1864; Michael Thompson, 2d H. A., Sept. 3, 1864; George S. Tannett, 1st Cav., Jan. 3, 1865; John Tisdale, 1st Regt. Band, June 1, 1861; George Thompson, Co. C, 53d Regt.; Patrick Walsh, Co. C, 53d Regt., Nov. 6, 1862; Casseus A. Woodworth, Co. C, 53d Regt., Nov. 6, 1862; Luke A. Wilder, 1st Regt. Band, June 14, 1861; Hibbard P. Wheeler, 1st Regt. Band, June 1, 1861; George F. Wheelock, 21st Regt., Aug. 23, 1861; William E. Wheelock, 15th Regt., July 12, 1861; Horatio Willard, 15th Regt., July 12, 1861; Edward Wilson, 15th Regt., July 12, 1861; Leonard Wood, 15th Regt., July 12, 1861; William Whitney, 15th Regt., Aug. 9, 1862 (died Nov. 17, 1862); William B. Witney, 24th H. A., Aug. 22, 1864; Charles N. Wood, 32d Regt., Sept. 3, 1863; John D. Wyer, 32d Regt., Nov. 28, 1861; Hiram L. Wheeler, 32d Regt., Jan. 4, 1864.

*Private Action.*—Before considering what action the town, as a town, took to encourage enlistment, the work of private citizens in this direction may well find place. In many, if not most of the towns in the State, considerable sums of money were raised by subscription for the purposes of a recruiting fund. It appears from the following list that Leominster was not behind in this regard. As this paper is the only one found and bears the date of 1864, it is very likely a summary of several subscriptions:

\$7250

**Town Action.**—This brings the record naturally to the corporate action of the town, as the first vote relates to a private subscription. The summary of votes here given makes the action and the spirit of the town as clear as it can be made in the space allowed to this sketch:

At a town-meeting held May 6, 1861, a letter to the selectman from Johnson C. Burrage, Alvah A. Burrage, Charles C. Burrage (three noble brothers), sons of Leominster, residing in Boston, enclosing the sum of seven hundred dollars, afterward increased to \$810, was read, and was as follows: "We desire to have the money appropriated to purchase of Revolvers, Pistols, to be used by the Patriotic Citizens composing Company 'A' of the 9th Regt., Light Infantry, in defense of the Government and Liberties of our Country." Feeling assured that our dear old native town will ever do her part in sustaining and defending the free institutions transmitted to us by our fathers, we are, with great respect,  
(Signed) JOHNSON C. BURRAGE, etc.

The following was unanimously adopted:

"Resolved, That the generous and timely gift of our esteemed friends, Messrs. Burrage, of Boston, excites in us feelings of lively gratitude; and responding, as we do, most heartily to the patriotic sentiments contained in the letter, covering the gift, we assure them that the love of freedom and of right, so nobly vindicated by the Citizens of their native Town in 1776, is still maintained and cherished here in 1861."

At the same meeting the treasurer was authorized to borrow five thousand dollars and the same appropriated for the relief of the families of such citizens of the town as may be called into the military service of the United States the present year; and to refund such sums of money as shall have been already advanced for the proper outfit of such citizens as may be called into such service, and a committee of ten was chosen, who, with the selectmen, were charged with the duty of administering to the relief of soldiers' families.

It was also "voted to instruct the Town Clerk to petition the Legislature to legalize and confirm the action of the Town as above stated."

At a town-meeting held Sept. 2, 1861, the selectmen were instructed to furnish aid to soldiers' families contemplated in Chap. 222 of the laws of 1861.

July 29, 1862, the town voted to pay a bounty of \$110 for that purpose.

Sept. 2, 1862, the town voted to pay \$100 bounty to each volunteer to fill the town's quota under the President's call, August 4, 1862, and the treasurer was authorized to borrow \$6000 for that purpose.

A larger number than was called for from this town having volunteered, at the town-meeting, held Nov. 4, 1862, it was voted to pay said additional number the bounty of \$100 each.

August 29, 1863, the town voted to pay into the treasury of the State its proportion of money for the reimbursement of bounties, as provided in Chap. 218 of the laws of 1863, and authorize their treasurer to borrow the sum required.

At the same meeting the town authorized their treasurer to borrow \$3000 and the selectmen were instructed to apply the same for the relief of soldiers' families.

Dec. 10, 1863, the sum of \$600 was appropriated and a committee chosen to aid the local recruiting officer in obtaining volunteers.

Also the sum of \$12 per month was voted as special relief to the family of Michael Kennepeck, as long as he remains in the United States' service.

The sum of \$500 was appropriated to be expended at the discretion of the selectmen for relief of soldiers' families in addition to the aid already provided for by the votes of the town.

March 7, 1864, the town appropriated \$8000 in aid and for the relief of soldiers' families.

At a town-meeting, April 4, 1864, the following resolves were adopted:

"Resolved, That the town raise and appropriate the sum \$6875, that the same be assessed at the next annual assessment, and that the selectmen draw their orders on the treasurer for the sum of \$125 for each and every volunteer furnished by the town, who has not already received that amount from a fund contributed by the citizens of the town under a call of the President dated Oct. 17, 1863, and February 1, 1864.

"Also that the selectmen be instructed to reimburse from the treasurer such sums of money as citizens of the town have contributed for the purpose of raising volunteers since Feb. 11, 1864, according to an act passed March 15, 1864.

"Resolved, That the town raise and appropriate the sum of \$4000, to be paid as bounties to volunteers to fill the quota of Leominster, under the call of the President, dated March 4, 1864.

"Resolved, That the town offer a bounty of \$125 to each citizen of the town now in service of the United States, who may re-enlist as a part of its quota."

July 27, 1864, the treasurer was authorized to borrow \$7250, and the selectmen were authorized to expend the same in procuring this town's proportion of soldiers under the call of July 18, 1864, by the payment of bounties to volunteers.

Jan. 2, 1865, the town voted to raise the sum of \$3375 by loan in anticipation of receipts, and the selectmen were authorized to expend said amount in procuring volunteers to fill the quota of the town under the call of Dec. 19, 1864, and at an adjourned meeting, held Feb. 13, 1865, the sum of \$2750 was added to the amount voted January 2d, for the purpose of procuring volunteers.

Town officers for 1861: Selectmen, M. D. Haws; Alanson Richardson, John H. Lockey; Town Treasurer, Porter Piper; Town Clerk, J. C. Allen.

From the record given above it appears that the town raised over forty thousand dollars in specific sums, and that aid and bounty was often voted where it is not easy to ascertain the exact amount. Leominster, therefore, dealt most liberally with all the questions growing out of the war.

**Soldiers' Aid Society.**—In addition to the sums raised by the town and by individuals, this society did most efficient service. It was organized October 7, 1861. The object, as expressed in the constitution, was "To furnish articles for the relief and comfort of the soldiers." The first officers were: President, Mrs. J. W. Backus; Vice-President, Miss H. Nichols; Secretary, Mrs. E. Y. White; Treasurer, Mrs. J. W. Jorden; Directors, Miss Eudocia Hatch, Mrs. Emerson Prescott, Mrs. Solon Carter, Miss Carrie Colburn, Mrs. M. Richardson, Mrs. William Morse, Mrs. Liberty Kendall, Mrs. Eli Fay.

The following is an abstract of the work of this society from its organization until June 27, 1863, at which time a large amount of hospital supplies were forwarded:

*Summary of Articles sent for the First Two Years.*—4 barrels dried apples, 2 barrels crackers from School Ward No. 6, 12 boxes filled with wine, vinegar, jellies and preserves for the sick; the following is a list of articles: 720 shirts, 238 sheets, 296 pillow-cases, 627 pairs socks, 399 pairs drawers, 153 pairs

mitten, 68 pillow ticks, 38 bed-quits, 499 towels, 14 blankets, 40 cushions, 7 fans, 6 eye-shades and 15 flannel gowns.

The material sent during the last years was in about the same proportion and amount. There were one hundred and fifty-eight women connected with this society; they held one hundred and fifteen public meetings during the war for work, besides preparing many entertainments for the purpose of raising funds to carry on their enterprise. It is not now possible to give any estimate of the value of the material contributed. It must have been several thousand dollars, to say nothing of that value which all service of this kind possesses, and which cannot be estimated in dollars.

It is thus seen that, both in their public and private capacity, the men and women of this town united most heartily in carrying on the work of the war. It may be safely said that Leominster left nothing undone on her part to bring back order and liberty to our distressed country.

The secret history of this war, here as elsewhere, its suffering and anguish, can never be written. Leominster dismissed her first soldiers with feasting and flying banners. This for Leominster, and on her scale, was the "pomp and circumstance of war." But when, in less than five months, her first martyr came back from the fatal field of Ball's Bluff, Leominster understood what price the maintenance of liberty was likely to demand at her hands. She paid *this full price* in blood before 1865. Company A of the old Fifteenth saw almost two-score battles, and there was hardly any part of the service to which Leominster did not pay full tribute. Of this, the names on her monument are a swift witness.

*Soldiers' Monument.*—In the spring of 1866 the town appropriated the necessary funds for a soldiers' monument. The committee to whose hands was committed the work of carrying out the wishes of the town was John H. Lockey, Leonard Burrage, Joel Smith, Solon Carter and William Tilton.

The monument is a handsome shaft of Quincy granite. The base is six feet, ten inches square. The first stone above the base bears the names of the four battles in which Leominster soldiers were especially engaged,—Ball's Bluff, Gettysburg, Port Hudson and Knoxville. Upon the four sides of the die are the names of the men who were killed in battle or died in service. At the time of his death James Bennett, Esq., had, by the most pains-taking effort, obtained many facts in regard to each of these men. By permission of the writer of this sketch, this record, in an abbreviated and unsatisfactory form, appears in "Leominster Historical and Picturesque." The following is the record as Mr. Bennett left it, only adding a word here and there to make the sentences complete. In justice to Mr. Bennett, who, of all the men in town, seems to have been the only one who attempted to find or preserve these facts,

the matter should be kept in such form as to show his work. The names are given in the order of the tablets:

FRONT TABLET (facing east).

*Corporal Andrew W. Cowdrey*, son of William Cowdrey, was born in Lunenburg June 12, 1834; enlisted in Leominster, his place of residence; was mustered into the United States service July 12, 1861, in Worcester, 15th Regt., Co. A., Mass. Vols., under Captain George W. Rockwood; started for Washington August 8, 1861. He was severely wounded in the battle of Ball's Bluff, Va., October 21st, and died of his wounds November 3, 1861, at Poolsville hospital, on the Maryland shore. He left a wife and two children. He was buried in Leominster with military honors. Corporal Cowdrey was the first man from Leominster lost in the War of the Rebellion.

*George H. Gallup*, private in 15th Regt., Co. A., Mass. Vols., son of James B. Gallup, was born in Leominster December 16, 1843. He enlisted at Worcester August 7, 1861; started the next day with his company for Washington; went with General McClellan to the Peninsula Campaign; was taken sick at Savage Station of typhoid fever. In the last letter he ever wrote his father he says: "Being left behind at Chickahominy sick, I was taken prisoner by Major-General Jones June 29th. I gave one soldier my rubber blanket to carry my things; exchanged my canteen with another to assist me, and when we arrived at Richmond prison, I was put into a filthy tobacco-house for a prison, the floor my only bed, and the 27 days I was a sick prisoner there I received no medicine nor medical care." He was exchanged at Fortress Monroe; was sick there of diphtheria, and died of suffocation by falling into a foul vault August 6, 1862, at Fortress Monroe Hospital.

*Corporal Franklin Gardner*, son of Volney Gardner, born January 8, 1841, in Sterling Mass., enlisted at Leominster into the 15th Regt., Co. A., Mass. Vols.; was mustered into the service of the United States at Worcester, July 12, 1861, and went to the front with his company; was in the battle of Ball's Bluff, the Peninsula Campaign under General McClellan. Rev. Eli Fay, then a pastor in Leominster, after the battle of Antietam, Md., visited him at the hospital near the battle-field at Sharpsburg, September 24th, seven days after he received his wounds. He was removed on the 25th to the Patent Office, Washington, D. C., where he died from his wounds October 6, 1862. Mr. Fay did not regard him dangerous, for he found him reading on his bed. He loved to read history; he had just been making "history." He was one of the "Color Guard," and took up the colors from the hands of three who had been shot dead by his side. He received three balls: the first passed through a limb, the second through his thigh, the third in his stomach; he could not get up after that, but kept the flag waving till the next guard took it; the company was in that engagement but half an hour. He fell in the battle Wednesday morning, September 17th, and lay there within the enemies' lines till Friday morning, when our men went to bury the dead and remove the wounded; he was then placed in the hospital at Sharpsburg. His grave at Washington, D. C., lies near the road, range No. 7, block No. 2, the sixteenth grave from the fence opposite the entrance and on a line with a large locust tree.

*Hans Peter Jorgenson*, a native of Denmark in Europe, enlisted at Leominster into the 15th Regt., Co. A., Mass. Vols.; was mustered into the United States service at Worcester; went to the seat of war as orderly-sergeant; he was in the battle of Ball's Bluff; he had his canteen struck by a ball. He was wounded in his right arm and was detailed to recruit. October 22, 1861, he was promoted to second lieutenant; July 19, 1862, to first lieutenant; and October 28, 1862, to a captain; and was in command of Co. A., 15th Regt., when he was killed on the field at the battle of Gettysburg. He had seen service in the campaigns of the Danish army, and was twice wounded when fighting the Prussians in Schleswig and Holstein, once in his arm by a ball and also on the head by a sabre. After he enlisted into the United States service, it was remarked by a friend of his, "you not being a citizen of the United States were not obliged to enter the army, for you could not have been drafted," he quickly answered, "Freedom is the same everywhere, I cheerfully give my life in its defence."

*Corporal Charles A. Lamb*, son of Albert Lamb, of Leominster, was born at Leominster January 25, 1838. He enlisted into the 15th Regt., Co. A., at Leominster; was mustered into the service June 12, 1861; went with the company to Washington August 8, 1861. He was in the battle of Ball's Bluff, where he was taken prisoner and hurried away to a tobacco-house in Richmond, where he sickened and died of congestion of the lungs, November 25, 1861.

*Sergeant Edward B. Rollins*, son of Jonathan Rollins, was born at Montpelier, Vt., January 20, 1828; enlisted at Leominster in the 15th

Regt., Co. A, Mass. Vols., and was mustered into the United States service June 12, 1861; went with his company to Washington August 8th. After fighting at Ball's Bluff he reached the Maryland shore, and seeing some of our boys on the Virginia shore who were not taken prisoners, he procured a skiff, rowed it over amid the whistling of balls, got the soldiers into it and landed them in safety. He sent his wife a beautifully wrought card with the names of eleven hard-fought battles that he had been in, viz.: Ball's Bluff, Yorktown, West Point, Fair Oaks, Savage Station, White Oak Swamp, Malvern Hill, South Mountain, Antietam, Fredericksburg, Chancellorsville; he left a space for one more, and wrote his wife that after one more battle he should probably come home; he went into the twelfth battle July 2, 1863, and was killed on Gettysburg battle-field. He left a wife and four small children.

*Captain Charles H. Stevens*, enlisted at Leominster; was mustered into the service of the United States June 12, 1861; left camp for Washington August 8, 1861, as fourth sergeant in the 15th Regt., Co. A. He participated in the battle of Ball's Bluff, the Peninsular Campaign, Antietam and Gettysburg; he was promoted to second lieutenant July 19, 1862; to first lieutenant October 21, 1862; to a captain July 4, 1863. He was wounded near Bristow Station, where the head of the column was attacked by infantry and artillery. After about an hour's fighting the enemy gave way. Lieutenant Stevens died October 15th of wounds received the 14th; he was wounded in the foot at Savage Station; at Gettysburg he was wounded in the leg while supporting our batteries, probably by our own men.

*John Gould Snow*, son of Thomas S. Snow, of Leominster; enlisted at Leominster; was mustered into the United States service June 12, 1861. 15th Regt., Co. A, Mass. Vols., went to Washington, D. C., August 8, 1861. He was in the battle of Ball's Bluff and shared in six other battles with his company, when he sickened and died of chronic diarrhoea, December 10, 1863, at Fairfax Hospital, Virginia. He was an only child and died a single man.

*Sergeant John Tripp*, son of John L. Tripp, born in the city of Lowell December 19, 1847; enlisted in the 15th Regt., Co. A, Mass. Vols.; was mustered into the United States service at Worcester, January 12, 1861; went to Washington, D. C., with his company, August 8th, and was in seventeen battles. He was wounded at the battle of Gettysburg; he was taken prisoner at Petersburg, Va., and was carried to Andersonville, and when Sherman marched from Atlanta to the sea he was hurried away to another place; he was paroled, entered our lines exhausted by starvation, cold and sickness, and died in a hospital at Baltimore, Md., March 19, 1864. His body was buried in Leominster Cemetery, March 23d, with military honors. He was detailed to the position of nurse in the hospital soon after the battle of Ball's Bluff and distinguished himself for fidelity, kindness and cheerfulness among the sick and wounded in Poolsville Hospital.

*Sergeant George E. Wilder*, son of George Wilder, of Leominster, was born at Petersham, June 17, 1842; enlisted in the 15th Regt., Co. A, Mass. Vols., at Leominster; was mustered into the United States service June 12, 1861; went with his company to Washington, D. C. He was with his company, in the Peninsular Campaign under McClellan; was shot in the head near Spotsylvania the last hour of the battle and died May 17, 1864, while under Grant. He was never married.

*William L. Whitney*, a private, son of William Whitney, late of Leominster, was born in Princeton, September 10, 1833; enlisted into the 15th Regt., Co. A, Mass. Vols. He died at the hospital in Washington, D. C., of fever. He was a single man.

#### RIGHT HAND.

*Geo. W. Divoll*, private, son of Thomas Divoll, late of Leominster, born at Lancaster July 31, 1826; enlisted at Leominster in the 7th Mass. Battery, and was mustered into the United States service January 5, 1864, under Captain P. A. Davis. When he enlisted he had a wife, who died about the time of his death, which occurred September 21, 1864. He died of chronic diarrhoea, in the hospital at New Orleans.

*Horace R. Barker*, private, son of Ephraim Barker, of Walpole, N. H., born in Granby, Mass., May 6, 1837; enlisted in the 21st Regt., Co. D, from West Fitchburg, under Captain Theodore S. Foster, went into camp at Worcester, July 19, 1861; left Worcester August 23d, for Annapolis, Md., where the company joined General Burnside's expedition to North Carolina. He died at Newbern, N. C., of typhoid fever, April 19, 1862.

*Rufus H. Carter*, private, son of David Carter, born at Leominster February 12, 1840; enlisted at Fitchburg into the 21st Regt., Co. D, under Captain Theodore S. Foster, and was mustered into the United States service July 19, 1861; he participated in the battles of the company and was mustered out at Blaines Cross-roads, East Tennessee, De-

cember 31, 1863, and re-enlisted into the Veteran Volunteers. He was killed on the battle-field at Petersburg, Va., by a ball from a sharp-shooter, September 30, 1864. He was never married.

*Albert F. Creed*, private, son of Moses Creed, was born in Leominster March 15, 1845; enlisted into the 21st Regt. Mass. Vols. under Captain Rice, and was mustered into the United States service August 22, 1861. He died at Newbern, N. C., in the hospital, of typhoid fever, May 2, 1862. He was never married.

*John F. Crosby*, private, son of John Crosby, of Leominster, born in Leominster Aug. 12, 1842; enlisted at Boston in the 23d Regt., Co. D, Mass. Vols., a recruit to fill the regiment. He re-enlisted for three years. When ordered by the enemy to surrender he replied, "never." They fired at him and cut off part of his ear. He was under McClellan in the Peninsula Campaign. He was wounded at the battle of Kingston by the enemy, and when the Union troops were ordered to retreat, the fire was so sharp the commander ordered the men to crawl till they reached a less exposed position. While thus retreating a gun in the rear by dragging was discharged, and the ball entered Crosby's back; he was helped along by his comrades in arms to an ambulance; the ball was never cut out at his chest, as he was too exhausted when he arrived in camp. He was four weeks in the hospital in Newbern, N. C. He was then put on board a steamer bound for the North, but died on board in New York Harbor, April 22, 1865. He was brought home and buried with military honors. He was never married.

*First Sergeant Artemas S. Farwell*, son of Peter Farwell, of Leominster, born in Fitchburg, July 29, 1835; enlisted into a New Hampshire Regt. three months' Vol. militia, and served out his time; he then re-enlisted at Fitchburg into the 25th Regt., Co. F., Mass. Vols., under Captain Foss. He was in the battles of Roanoke, Va. and Newbern, N. C. He died at Newbern, Nov. 23, 1862, of diphtheria, and was buried at Leominster. He was never married.

*Frank George*, son of William George, born at Topsam, Vt., Aug. 28, 1836; enlisted into 3d Regt., Co. D., Mass. Vol. Cavalry. He was taken prisoner in the Shenandoah Valley, Va. Two commanders of Confederates, dressed in the U. S. uniform, with a U. S. flag, rode up to them and shouted "we have come to relieve you," which threw the company off their guard, and they then took them prisoners. They stripped them of their clothing, gave them some dirty rebel rags to barely cover their nakedness, and marched them off on foot as prisoners. It was five days before the rebels gave them any rations. He was first imprisoned at Belle Isle. He was sent from there to Andersonville slaughter pens. When Sherman went from "Atlanta to the Sea" he was hurried away to Salisbury prison, where he died of starvation December 6, 1864.

*George A. Houghton*, private, son of Levi Houghton, of Lunenburg, born in N. Chelsea, Mass., July 20, 1845; enlisted at Worcester, August 24, 1861, into the 21st Regt., Co. I, Mass. Vols. He died of ship fever at Hatteras Inlet, on board the transport ship "Northerner," January 20, 1862. He was buried in the sand on the beach by Chaplain George S. Balt and a band of sailors who volunteered to go ashore in the violent gale. They gathered sea-shells and placed at the head of the grave. George H. was on the muster-roll. It should have been George A., as that was the proper initial letter.

*William H. Johnson*, private, son of Henry Johnson, of Leominster, born in Leominster, August 11, 1831; enlisted into the 21st Regt., Co. H, Mass. Vols. He died in hospital at Newbern, N. C., June 18, 1862, of typhoid fever. He left a wife.

*Captain James Musters Mallon*, son of William S. Mallon, of Boston, born in Manchester, Mass., March 7, 1835; enlisted in the 1st Mass. Vols., Co. A, May 23, 1861. He was discharged, but re-enlisted October 18, 1863, and was appointed and commissioned first lieutenant of the 3d North Carolina Colored Vols. He was killed at Wilmington, N. C., September 23, 1865, while endeavoring to quell a mutiny in another company. He was commissioned captain, but the commission arrived two days after he died, and was forwarded to his friends by Captain Rembough.

*James E. Marshall*, private, son of James H. Marshall, of Leominster, born in Leominster January 27, 1843, was drafted and assigned to the 32d Regt., Co. I, September 1, 1863. He was shot dead near Laurel Hill, Va., soon after getting that series of battles through the Wilderness under General Grant, May 12, 1864. He was never married.

*John C. Ready*, private, son of John Ready, born in Canada March 8, 1841, enlisted in Lynn, Mass., into the 1st Regt., Co. A., Mass. Vols., went with General McClellan into the campaign of the Peninsula, and died in Columbia Hospital of wounds received at the second battle at or near Fair Oaks, Va., July 6, 1862.

*Charles H. Sinclair*, private, son of Charles P. Sinclair, born at Leominster November 25, 1839, enlisted in the 21st Regt., Co. A, Mass. Vols., August, 1861. He was killed at Newbern, N. C., March 14, 1862. He was shot through the head. He was never married.

## LEFT HAND.

*First Lieutenant Alfred R. Glover*, enlisted at Camp Stevens, from Groton, into Co. C, 53d Regt. Mass. Vol. Infantry. He was killed June 14, 1863, at Port Hudson, while attacking the works.

*Corporal Albert H. Carter*, son of Sumner L. Carter, born at Leominster May 31, 1844, enlisted into the 36th Regt., Co. A, in July, 1862; passed to the front in September. He was shot dead on the battle-field near Spottsylvania in the battle of the Wilderness May 6, 1864. He was not married.

*Sergeant Charles H. Derby*, son of David S. Derby, born at Leominster October 9, 1839, enlisted into the 36th Regt., Co. A, Mass. Vols., under Captain Thaddeus L. Boker, of Leominster, August 1, 1862. He was killed at Hanover Court-House, Va., on the battle-field by being shot through the head. He was not married.

*Henry K. Derby*, son of Henry Derby, of Leominster, born in Leominster October 2, 1840, enlisted at Leominster October, 1861. He had not been assigned to a regiment or company when he was taken sick at Fort Warren, in Boston Harbor. He obtained a furlough to go home, and died there January 5, 1862, of pneumonia.

*Corporal Leonard Goodrich*, son of Benjamin Goodrich, of Lunenburg, born in Leominster May 5, 1842, enlisted at Leominster August 1, 1862, in the 36th Regt., Co. A, left for Washington September 2, 1862. He was in no battles, died at Washington, D. C., December 31, 1862, of typhoid fever. A single man.

*Sergeant Le Roy R. Gallup*, son of William Gallup, of Foster, R. I., born at Foster June 25, 1831; enlisted in the 36th Regt., Co. A, Mass. Vols., August 1, 1862, under Captain Thaddeus L. Boker. He was killed by the premature bursting of one of our own shells while lying in front supporting our batteries at Campbell's Station, near Knoxville, Tenn. He left a wife and two children.

*Roland H. Moore*, private, son of Samuel H. Moore, born in Chazy, Clinton County, N. Y.; was drafted at Greenfield to fill the quota of Leominster, and was assigned to the 36th Regt., Co. C, Mass. Vols. He died at Bealston Station, Va., December 6, 1863, of exhaustion and diarrhoea, aged thirty-one years. He was not married.

*Andrew B. Osborn*, private, son of Benjamin Osborn, born at Fitzwilliam, N. H., April 19, 1824; enlisted into the 36th Regt., Co. A, Mass. Vols., and was discharged April 22, 1863, for disability. He re-enlisted in the 16th Battery Mass. Vols., and was mustered into the service of the United States March 11, 1864, and was assigned to provost duty, where he served till near his death. He died at Camp Angus General Hospital, Alexandria, Va., January 31, 1865, of heart disease. He left a wife and two children. His body was deposited in the cemetery at Leominster, with military honors.

*John F. Owens*, private, son of Benjamin Owens, of Leominster, born in Vernon, N. J., March 2, 1840; enlisted at Leominster, and was mustered into the 5th Regt., Co. E, Mass. Vols., and died in camp at Readville April 13, 1865, of diphtheria. His body was deposited in Leominster Cemetery, with military honors and by the Sons of Temperance, of which the young soldier was an officer at the time of his enlistment.

*John Schouw*, born in Amsterdam, in Holland, Europe; enlisted from Leominster into the 29th Regt., Co. H, Mass. Vols. He died on board a steamer transport at the wharf at Cairo, Ill., August 20, 1863, of dysentery. He left a wife and three children.

*Abel Lafayette Wilder*, son of Abel Wilder, of Leominster, born at Leominster December 20, 1845; enlisted from Leominster into the 3d Regt., Co. D, of Mass. Cavalry, and was mustered into the service of the United States November 1, 1862; left the State November 15th, as the regiment was originally the Forty-first Infantry and was organized into cavalry June 17, 1863. He was taken prisoner at the same time, place and under the same circumstances as his brother-in-law, Frank George. To keep himself and companions from starving he sold, for a trifle, a valuable present sent by his sister to him as a token of her love, for they were made to march five days without any rations. He weighed one hundred and eighty pounds when taken and was a picture of health, but he was starved to death at the rebel prisons, and died just about the time that Frank George died.

## BACK.

*John McDonough*, private, son of Michael McDonough, of Leominster; born in Ireland June 20, 1843; enlisted into the 20th Regt., Co. F, Mass. Vols. He was killed at the battle of Antietam. When the 20th Regt.

was discharged there were twenty-two men present whose term of service expired.

*Daniel Butterfield*, a private, son of David Butterfield, was born at Tyngsboro', Mass., July 27, 1833; enlisted into the 53d Regt., Co. C, and was mustered in under Captain Joel A. Stratton, and went out under the call for nine months' service; he died May 4, 1862, at St. Louis, Mo., of erysipelas.

*Eli A. Ellick*, private, son of William C. Ellick, of Leominster, was born at Fitchburg April 23, 1843; enlisted at Worcester, and was mustered into the Veteran Reserves January 1, 1864; he was killed at Petersburg, Va., June 17, 1865.

*Ira B. Foster*, private, son of Gardner Foster, of Shirley, born in Hopkinton, N. H.; enlisted in Leominster, 53d Regt., Co. C, Mass. Vols., for nine months' service under Captain Joel J. Stratton; he was wounded near Port Hudson, La., in the neck; it was in the morning; he went to the rear, had his neck bound up with cotton to stop the flow of blood, then returned and fought through the day; he did no more service; was sent to Baton Rouge to the hospital, where he died; he left a wife.

*John Ferguson*, private, born in Nova Scotia of Scotch parents; enlisted at Leominster into the 53d Regt., Co. C, Mass. Vols., for nine months' service; he was sent from Opelousas sick, and died at Marine Hospital, New Orleans, La., June 15, 1863, of chronic diarrhoea; he left a wife.

*Edmund Hardy*, son of Dr. Samuel Hardy, Cornish Flat, N. H., was born at Scotland, N. Y., December 11, 1833; enlisted at Leominster, Mass., 53d Regt.; died at Island Hospital, Brashear City, La., May 30, 1863, of diarrhoea; he left a wife.

*Adelbert W. Johnson*, private, son of Frederick Johnson, of Leominster, born in Leominster September 5, 1837; enlisted at Leominster in the service of the United States for nine months in 53d Regt., Co. C, Mass. Vols.; he was severely wounded at Port Hudson June 14th, requiring amputation; he died from the effects of his wounds July 11, 1863, at hospital Port Hudson; he was not married.

*Martin Luther Jordan*, private, son of Rev. J. W. P. Jordan, born at West Brookfield, Mass., September 9, 1846; enlisted at Worcester into the 57th Regt., Co. H, Mass. Vols., December 28, 1863; he died in the hospital at Washington, D. C., June 9, 1864, of pneumonia; he was a single man.

*Sergeant James Munford Lewis*, rifle-major, born in Sterling, Mass.; enlisted at Leominster September 16, 1863, for nine months' service, 53d Regt., Co. C, Mass. Vols.; he came home sick and died there before he was mustered out of the service; he left a wife.

*Lewis Richardson*, private, son of Thurston Richardson, of Leominster, born in Sterling March 14, 1848; enlisted into the 57th Regt., Co. H, Mass. Vols.; he was killed on the battle-field in the battle of the Wilderness, under General Grant, May 6, 1864; a minor and unmarried.

*George Thompson*, private, son of William Thompson, of Boylston, born in Stoddard, N. H.; enlisted in the 53d Regt., Co. A, Mass. Vols.; went out under Captain Joel A. Stratton.

*Eugene Sullivan*, born in Ireland; enlisted in Leominster in the 36th Regt., Co. A, Mass. Vols.; went out with the company under Captain Thaddeus L. Barker September 2, 1862; died at Nicholasville, Ky., September 1, 1863, of fever; a single man.

The monument was formally dedicated September 12, 1867. Capt. Leonard Wood was marshal of the day, and several of those who had served in the War of 1812 as members of the old Leominster Artillery were present on the platform. On account of the absence, from sickness, of Hon. John H. Lockey, Mr. Joel Smith acted as chairman. Rev. W. J. Batt, Rev. Horace Parker, of Ashby; James Bennett, Esq., Rev. Rufus P. Stebbins, a former pastor of the Unitarian Church; Rev. Geo. S. Ball, of Upton, a native of Leominster and chaplain during the war, took part in the exercises of dedication. The grounds have since been graded and enclosed.

CHARLES H. STEVENS POST 53, G. A. R.—Two years after the close of the war an unsuccessful attempt was made to establish a post of the G. A. R. in Leominster. L. A. Cook, A. J. Parker, F. W. Polly, E. A. Bennett and Charles H. Wilder were

the authors of this movement. Not meeting with sufficient encouragement from the old soldiers, these men joined a Fitchburg encampment. The first decoration exercises in town were conducted by the comrades named above, as a detachment of Post 19, of Fitchburg. The charter of the present post was granted June 13, 1868, and had as charter members, besides those named above, Aldrich Cook, C. B. Flagg, J. G. Eaton, Wm. A. Burrage, J. F. Chaffin and Geo. A. Browne. The post was organized July 9th of the same year, in the upper story of Gardner Hall, with Comrade Lucien A. Cook as its first commander. The post has, at different times, occupied a variety of halls in town, but now has an excellent and permanent encampment.

The record of the post has been such as to receive the approbation of the entire community. In its membership are many of the most respected citizens, and its work is worthy of the highest praise. By its action, Leominster was the first town in the State to contribute money for a Soldiers' Home in Massachusetts. It has ever been first in planning and executing good work. The post has expended nearly two hundred and seventy-five dollars a year in charity for the past twenty years, and several hundred families have received aid. At one time it suffered severely through the rascality of its quartermaster, W. H. Lovering, who deserted with the funds of the encampment. But the help and sympathy of the community, and the energy of the members, soon placed it again on a sound financial standing, and its work went on without interruption. It is now doing this work successfully and is an honor to the community. The names of its past commanders are: Lucien A. Cook, Wm. A. Burrage, F. W. Polley, Joel A. Stratton, N. B. Ellis, Charles A. Wheeler, C. B. Flagg, Wm. B. Frissell, Thomas J. Ames, Madison Beal, Aldrich Cook, Clesson Kenny, A. W. Allen and W. D. Blanchard. Thomas A. Hills is the present commander.

**WOMAN'S RELIEF CORPS, NO. 31, DEPARTMENT OF MASSACHUSETTS.**—The first movement in the way of organizing a relief corps was in February, 1878. Then a few ladies met to consider measures for aiding the Post in its work. In March following "The Ladies' Auxiliary Corps" was organized. January, 1881, this corps became the "Leominster Relief Society," and the next December it was reorganized with its present name. It has rendered most efficient aid in the work of the Post, and is held in equal honor. Mrs. Sarah F. Gallup is now president of the corps.

**E. A. BENNETT CAMP 52, SONS OF VETERANS.**—The members of this camp were mustered in December 15, 1885. The object is to keep fresh in mind what was accomplished by the fathers in bringing peace and honor to the country. Only those whose fathers served in the Civil War can become members. G. H. Woodworth is the present captain.

This completes the organizations which owe their

existence to the Civil War and also the military history of the town. It may be added that the old artillery company renewed its organization after the war and continued until December, 1885, when it was disbanded by order of the adjutant general. The year before it had but few members at the annual muster; but the company was being rapidly filled by the efforts of Capt. Winch at the time the order was received. Its centennial would have occurred fifteen months later.

However imperfectly the foregoing record is given, it shows this: that Leominster has not been behind the chief of her sisters in the work and suffering required to secure and maintain our liberty.

## CHAPTER CLIX.

### LEOMINSTER—(*Continued.*)

#### CIVIL AND MISCELLANEOUS.

ANY general sketch of our civil affairs must be brief. The town managed its ecclesiastical business in its corporate capacity almost wholly for eighty years; much of this time, also, there was war, or the preparation for war, so that a very large part of the business at any town-meeting would have relation to the church, or the school, or the military—topics which have already been treated at considerable lengths. This state of things must have continued at least until 1800.

The first town-meeting was warned by Joseph Wheelock, by authority of the "General Court," and held at the house of Jonathan White, innholder, July 9, 1740. The election of officers was the only business transacted. The officers were the same as are now chosen, except that there were two hog-reeves, a surveyor of clapboards and shingles and two men to look after the deer.

The second town-meeting was held September 1st of the same year. The town voted: "To Build a Bridge Cross the river *where* the Road is laid out to sd. river." Forty pounds were raised to build this bridge, and this sum could be worked out. No other business was transacted at this meeting. The bridge was the one over the Nashua at North Leominster where the stone bridge now is. It was for many years known as the "great bridge."

The next meeting of the town was December 5, 1740. The action of this meeting referred to the building of a meeting-house, of which mention has already been made. At this meeting, also, the town voted to raise £40 to provide weights and measures, a town stock of powder, bullets and flints and a town-book, and to defray other town charges. No other meetings were held the first year. This is Leominster as she first appears. Here is a civil organization—a

set of town officers; here is a movement for public improvements—"a bridge over the only river which could not be forded at all times;" a good religious beginning—a church planned and the money provided to pay for it; a little common property—a set of weights and measures and a record-book, and means for public defense. This is all. But it is a good beginning; shows the lines of progress, and is sufficient to give by suggestion the whole civil history of the town until after the Revolution. To provide for the religious training of the people, to educate the children, and to make such improvements as were demanded, was all that could be done by men who must subdue a forest for bread and fight a veteran nation for liberty. We see it all in these meetings. Roads and bridges were built, the general affairs were looked after, the public tax was not heavy until 1775, and public attention and thought were very largely confined to the lines already indicated. The people did not think it necessary to send a representative until 1774, just at the beginning of the Revolution. The thought and the feeling of the town during this struggle has already been described. But at its close a new danger appeared. The people had taxed themselves heavily during the Revolution to meet all the requirements made upon them, and now there was little or no gold and silver in circulation, and paper money was nearly worthless. "But even under all these unfavorable circumstances the men of this town generally sustained their credit and honestly paid their debts. Some few, however, who sold their farms and took their pay in paper money, were ruined." The town passed thus safely through its first financial crisis. It was, however, a most severe trial to many towns of Worcester County. Taxes were high and there was great suffering, resulting in the temporary outbreak known as Shays' Rebellion.

**PUBLIC IMPROVEMENTS.**—Previous to the close of the Revolution all the principal roads of the town had been located substantially where they are now. The first was the one passing through North Leominster to Fitchburg and Lunenburg. This was laid out by Lancaster in 1734. As the custom then was, it passed over the highest hills; and it forms to-day part of Main and Prospect Streets, North Leominster. It was originally laid out five rods wide, and was known as the "broad road." The second road was from the "great bridge" to this same broad road, and is that part of Main Street running from the stone bridge, North Leominster, to the little brook near the old engine-house. Other roads were built, and were "kept in such repair that the town did not suffer by comparison with the neighboring towns."

Of late, of course, new streets have been opened in all directions, and broad sidewalks built. But it is still true that this part of our civil affairs is well administered. The roads are carefully laid out and well built; and, with the sidewalks, are kept in ex-

cellent condition. Leominster may safely invite comparison with other towns in this particular.

It will be remembered that the second town-meeting took action in regard to a bridge over the Nashua River. This bridge was built immediately. It was of wood, and the abutments were made of pine logs, many of them from two to three feet in diameter, and firmly locked together. One hundred and thirty years later, when the town attempted to clear a way for a new bridge, these old logs were not only found, but they were, except from one-half to an inch on the outside, as sound as when put in place. The old logs still remain as part of the road-bed, for the foundation was so solid and the logs so hard to remove that when the new stone bridge was erected, in 1872, only so much of the old foundation was removed as to give room for the new stone abutments. The rest was made the foundation of the road. The new stone bridge over the Nashua is one of the finest structures in the county, costing nearly twenty-five thousand dollars. It is certainly an honor to any town.

Among the other improvements in the highways is the new arched stone bridge over the Monoosnock Brook, on Mechanic Street, built in 1873. "This is a very fine structure, made of Leominster granite, dimension work, laid full joints in the best cement mortar, on a solid ledge foundation, fifty feet wide and a twenty-foot arch, with a capped granite railing."

There is also another fine stone bridge over the Nashua at North Leominster, near the furniture establishment of Merriam, Hall & Co. This bridge cost about twelve thousand dollars, and is a most substantial structure. There is, in addition to these named, a very excellent iron bridge over Monoosnock Brook, near the Wachusett Shirt Factory. It is the last and one of the best of the new bridges built by the town.

**PUBLIC PARK.**—Leominster has, properly speaking, no public park. Of late the Common, so-called, has been improved and beautified until it is now a most attractive place. Its history may be briefly given. Of course in the early days such a thing as a park was not in all their thoughts. They did buy land for a new church lot, however, and so, as appears in the history of the churches, the land which is now the Common and much more came into the possession of the town as church property. On this the Second Church was built and remained until the town erected the present Unitarian Church, in 1823. The old house was then moved on to the lot at the head of Church Street, and fitted up as Gardner Hall. But the town owned the land now vacant only in its parochial capacity, and so when the First Congregational Society was formed in 1836, this open space became the property of that society; for the society inherited all that the town owned as a parish. In 1841, however, the society conveyed this by deed to the town for a public Common.

In a sketch of Leominster by C. H. Merriam it is stated that at the time this conveyance was made the land was unfenced, barren, with little, if any shade. We are also assured that only after much opposition were the citizens permitted to set out a tree apiece. The trees set out under this "grant" are the present elms and maples which now so beautify the Common. It took fifteen years to induce the town to allow this lot to be fenced, even at private expense, so convenient was it for parties coming to town to drive over this plot of ground at will. But, in 1856, the town voted to erect a fence and raised and appropriated the necessary money. In the condition in which this action left the Common it remained substantially for a quarter of a century. It was unsightly at best and was allowed to keep itself. A few years ago, largely through the efforts of the Town Improvement Society, this lot was graded, laid out in plots according to a plan prepared by Mr. H. C. Burdett, a son of A. L. Burdett, a fine fountain put in place, a drinking-fountain, the gift of Mr. S. M. Frost, erected, and the whole so beautified as to make it worthy of the town.

In the matter of strictly public buildings Leominster has but little to say. Until 1823 the meeting-house was also the town-house. Here all public business was transacted. After the present Unitarian Church was dedicated the old church, moved and located as above stated, was used for town-meetings and other public business. The other parts of the building were used for school-rooms. Gardner Hall, as it was called, was an attractive and pleasant building. It served its purpose well until a new hall was built, in 1850. The upper part was then used, first as a High School room and finally for a variety of purposes until 1870, when the house was wholly destroyed by fire.

The present town-hall was begun in 1850 and dedicated the following year. It was considered at the time an elegant structure, and Mr. Wilder speaks of it with much enthusiasm. It has since been raised and a story built underneath for a library-room, etc. But at the present time it is wholly inadequate to meet either the needs of the town or the wants of the library. The town has appointed a committee to consider how the present demands in this direction can best be satisfied.

Upon none of her public improvements, however, has Leominster more reason to congratulate herself than upon a plentiful supply of pure water. Leominster water-works were built in 1873. The history in outline is this: The matter rested in the minds of the people as a half-formed thought, or, possibly, little more than a suggestion, when Manson D. Haws caused an article to be inserted in the town warrant of the meeting to be held November 8, 1870, "To see what action the town will take to obtain water." Under this article Manson D. Haws, Charles H. Merriam, John H. Lockey, Joel C. Allen and Cephas

Derby were appointed a committee to examine the subject. On the 28th this committee recommended that the town petition the Legislature for leave to take a supply of water from the most desirable place within four miles of the Centre. The town adopted this report, and the committee were instructed to present the petition. Augustus Whitman was added to the committee, and Dr. G. W. Pierce appointed in place of Mr. Lockey, who declined to act further. The permission was granted and the town voted to accept of the same at its annual meeting in April, 1872. The vote was four hundred and ninety-seven in the affirmative and one hundred and seventy-six in the negative.

After the necessary preliminary surveys, etc., the town voted, December 30, 1872, to proceed with the work, and elected a Water Board as follows: Emery Tilton, Dr. G. W. Pierce, H. M. Lane, George Hall, Charles H. Merriam and William Howland. Charles H. Merriam was chairman, H. M. Lane clerk and W. M. Howland treasurer. The necessary funds were obtained by a loan under vote of the town, and the works were completed and the water let into the pipes December 23, 1873. The town began to furnish water January 1, 1874. The water is taken from Morse Brook, at a distance of less than two miles from the Centre; there is a fall of one hundred and eighty-three feet at the curb-stone about the soldiers' monument; the works drain an area of twelve hundred and twenty-five acres; the storage is about one hundred and fifty million gallons, and the whole has cost the town a little over one hundred and seventy thousand dollars. By repeated analysis the water is proved to be unusually pure; the supply is more than abundant; the works more than pay the cost of running and the interest on the loan, if a reasonable sum be allowed for water used by the town; the value and safety of property is greatly increased; no single improvement adopted by the town has so clearly and powerfully worked for its growth and prosperity as has its excellent water supply.

This would seem to cover all the town improvements which need special mention. The town has in its corporate capacity provided proper cemeteries, and has always caused the same to be well cared for. Nothing unsightly is seen in connection with either the old or the new burying-ground.

Leominster has always been most faithfully served by her representatives. Below are the names of all who have been elected to this office since the town first availed itself of the privilege of sending a delegate to the General Court.

1774, Israel Nichols; 1777, J. Joslin and Israel Nichols; 1780, Israel Nichols; October, Thomas Legate, first under the Constitution; 1783-85, Israel Nichols; 1786, Timothy Boutelle; 1787-88, David Wilder; 1789-91, Israel Nichols; 1793, Timothy Boutelle; 1795, Thomas Legate, Jr.; 1796-98, Thomas Gowing; 1800, '01, '03-06, Jonas Kendall; 1807-08, Abijah Rigelow; 1809, A. Bigelow and D. Wilder, Jr.; 1810, D. Wilder, Jr., and Joel Crosby; 1811-12, D. Wilder, Jr., and Benjamin Perkins; 1813, David Wilder, Jr., and B. Lawrence; 1814, Joel Crosby

and B. Lawrence; 1815-17, Bezaleel Lawrence; 1818, Joel Crosby; 1819, J. Crosby and B. Lawrence; 1820, Bezaleel Lawrence; 1821, Jonas Kendall; 1824-25, William Perry; 1826, Joel Crosby; 1827, Joel Crosby and D. Wilder; 1828, D. Wilder and J. Crosby; 1829, J. Crosby and Wilder Carter; 1830, W. Carter and Charles Grout; 1831, W. Carter and Charles Grout; 1831, November, Wilder Carter and Carter Gates; 1832, L. Burrage and C. Grout; 1833, D. Wilder and C. Gates; 1834, D. Wilder and C. Gates; 1835, February, P. S. Burditt; 1835, C. Gates and P. S. Burditt; 1836, P. S. Burditt and Charles W. Wilder; 1837, Charles W. Wilder; 1838, Jabez B. Low; 1839, Rufus Kendall and C. Hills; 1840, Charles Hills; 1841, Charles Hills; 1842-44, Leonard Burrage; 1845, Charles W. Wilder; 1846, James Burditt; 1847, Charles W. Wilder; 1848, Charles W. Wilder; 1849, Solon Carter; 1850, George S. Burrage; 1851, Joel Crosby Allen; 1852, Joseph S. Darling; 1853, no election; 1854, Alanson Richardson; 1855, William Heustis; 1856-57, James Bennett; 1858, Charles L. Joslin; 1859, Francis Tinker; 1860, J. Q. A. Pierce; 1861, Manson Dana Haws; 1862, no election; 1863, Joel H. Stratton; 1864, Daniel R. Haynes; 1865, John H. Lockey; 1866, no election; 1867, Howard M. Lane; 1868-70, Charles H. Merriam; 1871, no election; 1872-73, Caleb Clesson Field, M.D.; 1874, George Hall; 1875-76, Francis C. Bowen; 1877-78, George F. Colburn; 1879-80, Dwight B. Look; 1881-82, Joel Smith; 1883, Rev. William B. Toulmin; 1884-85, James Hadley; 1886-87, Morrell A. Greenwood; 1888, no election.

In the above list the entry "no election" means that Leominster was part of a Representative district, and the election in those years went to some other town in the district. The dates given refer to the time of election. The service was the following year.

The town has also been well served by its town officers. Below are given the names of the moderators at each of the annual town-meetings, the town clerks, selectmen and town treasurers for each year since the town was incorporated. Such a list is both interesting and valuable:

1740, July 7th.—Moderator, Joseph Wheelock; Clerk, Thomas Houghton; Selectmen, Nathaniel Carter and Thomas Wilder; Treasurer, Gershom Houghton.

1741, March 2d.—Moderator, Thomas Davenport; Clerk, Jonathan Wilson; Selectmen, Ebenezer Polly and Thomas Wilder; Treasurer, Gershom Houghton.

1742.—Moderator, Jonathan White; Clerk, Thomas Davenport; Selectmen, Joseph Wheelock, Ebenezer Polly, Jonathan White, Treasurer, Jonathan Wilson and Nathaniel Carter.

1743.—Moderator, Thomas Davenport; Clerk, Thomas Davenport; Selectmen, Jonathan White, Jonathan Wilson, Joseph Wheelock, Thomas Houghton and Nathaniel Carter; Treasurer, Jonathan White.

1744.—Moderator, Jonathan White; Clerk, Jonathan Wilson; Treasurer, Jonathan Wilson; Selectmen, Capt. Jonathan White, Thomas Wilder, Joseph Wheelock, G. Wilder and Jonathan Wilson.

1745.—Moderator, Jonathan White; Clerk, Jonathan Wilson; Selectmen, Thomas Houghton, Oliver Carter, Benjamin Whitcomb and Jonathan Carter; Treasurer, Ebenezer Polly.

1746.—Moderator, Benjamin Whitcomb; Clerk, Jonathan Wilson; Selectmen, Leonard White, Joseph Wheelock, Nathaniel Carter, Jonathan Wheelock and Benjamin Whitcomb; Treasurer, Thomas Wilder.

1747.—Moderator, Thomas Wilder; Clerk, Jonathan Wilson; Selectmen, Jonathan White, Thomas Wheelock, Thomas Houghton, Thomas Wilder and Jonathan Wilson; Treasurer, Thomas Wilder.

1748.—Moderator, Benjamin Whitcomb; Clerk, Jonathan Wilson; Selectmen, Jonathan Wilson, Abijah Smith, Nathaniel Carter, Joseph White; Treasurer, John Joslin.

1749.—Moderator, Benjamin Whitcomb; Clerks, Jonathan Wilson and Jonathan White; Selectmen, Joseph Wheelock, Nathaniel Carter, Philip Swelser and Jacob Peabody; Treasurer, Jonathan Wilson.

1750.—Moderator, Jacob Peabody; Clerk, Jonathan Wilson; Treasurer, Jonathan Wilson; Selectmen, Jonathan Wilson, Nathaniel Colburn, Jacob Peabody, Benjamin Whitcomb and G. Houghton.

1751.—Moderator, Benjamin Whitcomb; Clerk, Jonathan Wilson; Treasurer, Jonathan Wilson; Selectmen, Joseph Wheelock, Ebenezer Colburn, Jonathan White, Benjamin Whitcomb and Jonathan Wilson.

1752.—Moderator, Jonathan White; Clerk, Jonathan Wilson; Treasurer, Jonathan Wilson; Selectmen, Abijah Smith, Jonathan Wilson, Joseph White, Nathaniel Bennett and Daniel Johnson.

1753.—Moderator, Benjamin Whitcomb; Clerk, Nathan Bennett; Treasurer, Nathan Bennett; Selectmen, Jonathan White, Nathaniel Colburn, Oliver Carter, Thomas Wilder and A. Houghton.

1754.—Moderator, Abijah Smith; Clerk, Nathan Bennett; Treasurer, Nathan Bennett; Selectmen, Jonathan White, Abijah Smith, Jacob Peabody, Daniel Paine and Jonathan Houghton.

1755.—Moderator, Jacob Peabody; Clerk, Jacob Peabody; Selectmen, Jonathan White, Nathaniel Colburn, Jonathan Wilson, William Divoll and Jacob Peabody; Treasurer, Jonathan White.

1756.—Moderator, Thomas Wilder; Clerk, Jonathan Wilson; Selectmen, Jonathan Wilson, Nathan Bennett, Abijah Smith, Jonathan Carter and Oliver Hall; Treasurer, Nathan Bennett.

1757.—Moderator, Benjamin Whitcomb; Clerk, Jonathan Wilson; Selectmen, Jonathan Wilson, Abijah Smith, Nathan Bennett, Jonathan Carter and Oliver Hall; Treasurer, Nathan Bennett.

1758.—Moderator, Benjamin Whitcomb; Clerk, Jonathan Whitcomb; Selectmen, Jonathan Wilson, Benjamin Whitcomb, Abijah Smith, Oliver Carter and Abijah Houghton; Treasurer, Israel Nichols.

1759.—Moderator, Abijah Smith; Clerk, Jonathan Wilson; Selectmen, Jonathan Wilson, Benjamin Whitcomb, Abijah Smith, A. Houghton and Joseph White; Treasurer, Israel Nichols.

1760.—Moderator, Benjamin Whitcomb; Clerk, Nathan Bennett; Selectmen, Jonathan Wilson, Abijah Smith, Nathan Bennett, Benjamin Whitcomb and Oliver Hoar; Treasurer, Israel Nichols.

1761.—Moderator, Abijah Smith; Clerk, Oliver Hoar; Selectmen, Jonathan Wilson, Abijah Smith, Caleb Sawyer, Oliver Hoar and Israel Nichols; Treasurer, Israel Nichols.

1762.—Moderator, Abijah Smith; Clerk, Oliver Hoar; Selectmen, Jonathan Wilson, Benjamin Whitcomb, Israel Nichols, A. Houghton and Oliver Hoar; Treasurer, Wm. Bennett.

1763.—Moderator, Jonathan Wilson; Clerk, Oliver Hoar; Selectmen, Jonathan Wilson, Oliver Hall, Josiah Carter, Jonas Richardson and Joseph Beaman; Treasurer, Jonathan Wilson.

1764.—Moderator, Oliver Hall; Clerk, Oliver Hoar; Selectmen, Thomas Legate, Oliver Hoar, Capt. Benjamin Whitcomb, Jonathan White and Oliver Hall; Treasurer, Dan Johnson.

1765.—Moderator, Col. Jonathan White; Clerk, Oliver Hall; Selectmen, Col. Jonathan White, Capt. Benjamin Whitcomb, Jonathan Wilson, Oliver Hall and Oliver Hoar; Treasurer, David Johnson.

1766.—Moderator, Col. Johnson White; Clerk, Oliver Hall; Selectmen, Oliver Hall, Dr. Thomas Gowing, Stephen Johnson, Capt. Thomas Legate and Jonas Richardson; Treasurer, Josiah Carter.

1767.—Moderator, Capt. Benjamin Whitcomb; Clerk, Stephen Johnson; Selectmen, Stephen Johnson, Capt. Thomas Legate, Dr. Thomas Gowing, Joseph Carter and Stephen Buss; Treasurer, Joseph Carter.

1768.—Moderator, Capt. Jonathan White; Clerk, Stephen Johnson; Selectmen, Capt. Thomas Legate, Stephen Johnson, Dr. Thomas Gowing, Josiah Carter and Stephen Buss; Treasurer, Thomas Gowing.

1769.—Moderator, Capt. Thomas Legate; Clerk, Stephen Legate; Selectmen, Thomas Legate, Thomas Gowing, Stephen Johnson, Isaiah Carter and Nathan Johnson; Treasurer, Thomas Gowing.

1770.—Moderator, Israel Nichols; Clerk, Stephen Johnson; Selectmen, Thomas Legate, Stephen Johnson, Thomas Gowing, Josiah Carter and John Joslin; Treasurer, Thomas Gowing.

1771.—Moderator, Benjamin Whitcomb; Clerk, Stephen Johnson; Selectmen, Jonas Richardson, Israel Nichols, Jonathan White, Mark Lincoln and Phillips Sweetser; Treasurer, Dr. Thomas Gowing.

1772.—Moderator, Jonathan White; Clerk, Stephen Johnson; Selectmen, Thomas Legate, Thomas Gowing, Stephen Johnson, Joseph Carter and Mark Lincoln; Treasurer, Dr. Thomas Gowing.

1773.—Moderator, Thomas Gowing; Clerk, Stephen Johnson; Selectmen, Thomas Legate, Dr. Thomas Gowing, Stephen Johnson, Captain Josiah Carter and Mark Lincoln; Treasurer, Thomas Gowing.

1774.—Moderator, Dr. Thos. Gowing; Clerk, Stephen Johnson; Selectmen, Thomas Legate, Dr. Thos. Gowing, Stephen Johnson, Deacon Israel Nichols and Dr. John Joslin; Treasurer, Dr. Thomas Gowing.

1775.—Moderator, Thos. Gowing; Clerk, Mark Lincoln; Selectmen, Deacon Israel Nichols, Major Joseph Carter, Mark Lincoln, Lieutenant Edward Phelps and Lieutenant Luke Richardson; Treasurer, Deacon John Joslin.

1776.—Moderator, Dr. Thos. Gowing; Clerk, Mark Lincoln; Selectmen, Israel Nichols, Colonel Joseph Carter, Mark Lincoln, Lieutenant Luke Richardson and Captain David Wilder; Treasurer, Deacon John Joslin.

1777.—Moderator, Dr. Thos. Gowing; Clerk, Timothy Boutelle; Selectmen, Israel Nichols, Lieutenant Luke Richardson, Captain David Wilder, Timothy Boutelle and Lieutenant Jacob Benett; Treasurer, Captain John Joslin.

1778.—Moderator, Dr. Thomas Gowing; Clerk, Thomas Boutelle; Selectmen, Captain David Wilder, Thomas Boutelle, Lieutenant Jacob Benett, Oliver Houghton and John Richardson; Treasurer, Captain John Joslin.

1779.—Moderator, Dr. Thos. Gowing; Clerk, Thos. Gowing; Selectmen, Thos. Gowing, Captain David Wilder, Timothy Boutelle, Oliver Houghton and John Richardson; Treasurer, John Joslin.

1780.—Moderator, Captain David Wilder; Clerk, Thos. Gowing; Selectmen, Thos. Gowing, David Wilder, Timothy Boutelle, Nathaniel Carter and William Lincoln; Treasurer, John Joslin, Jr.

1781.—Moderator, Captain David Wilder; Clerk, Thos. Gowing; Selectmen, William Lincoln, Thomas Wilder, Joseph Carter, Samuel Stickney and Ephraim Carter; Treasurer, John Joslin.

1782.—Moderator, David Wilder; Clerk, John Richardson; Selectmen, William Lincoln, Thomas Wilder, Josiah Carter, Ephraim Carter and John Richardson; Treasurer, John Joslin.

1783.—Moderator, Major Timothy Boutelle; Clerk, John Richardson; Selectmen, Joseph Carter, Ephraim Carter, John Richardson, John Woods and Edward Lowe; Treasurer, John Joslin.

1784.—Moderator, Major Timothy Boutelle; Clerk, John Richardson; Selectmen, Dr. Thos. Gowing, Major Timothy Boutelle, Major David Wilder, John Richardson and Lieutenant John Wood; Treasurer, Captain John Joslin.

1785.—Moderator, Major Timothy Boutelle; Clerk, John Richardson; Selectmen, Major David Wilder, Major Timothy Boutelle, John Richardson, Lieutenant John Wood and Caleb Leland; Treasurer, Captain John Joslin.

1786.—Moderator, Major David Wilder; Clerk, John Richardson; Selectmen, Major David Wilder, Timothy Boutelle, John Richardson, Lieutenant John Wood and Caleb Leland; Treasurer, Captain John Joslin.

1787.—Moderator, Major David Wilder; Clerk, John Richardson; Selectmen, Thos. Gowing, Major David Wilder, William Lincoln, Richard Stewart and John Richardson; Treasurer, John Joslin.

1788.—Moderator, Lieutenant William Lincoln; Clerk, John Richardson; Selectmen, Major David Wilder, John Richardson, William Lincoln, Richard Stewart and Captain Luke Johnson; Treasurer, John Joslin.

1789.—Moderator, Major David Wilder; Clerk, John Richardson; Selectmen, David Wilder, William Lincoln, John Simonds, John Richardson and John Woods; Treasurer, John Joslin.

1790.—Moderator, David Wilder; Clerk, John Richardson; Selectmen, Major David Wilder, Colonel Timothy Boutelle, Lieutenant John Woods, John Lincoln and Thomas Legate; Treasurer, Captain John Joslin.

1791.—Moderator, Colonel Timothy Boutelle; Clerk, John Richardson; Selectmen, Major David Wilder, Colonel Timothy Boutelle, Lieutenant John Woods, John Simonds and Thomas Legate; Treasurer, Captain John Joslin.

1792.—Moderator, Timothy Boutelle; Clerk, Captain John Wood; Selectmen, Major David Wilder, Timothy Boutelle, John Woods, John Simonds and Thomas Legate; Treasurer, John Joslin.

1793.—Moderator, David Wilder; Clerk, John Wood; Selectmen, David Wilder, Colonel Timothy Boutelle, John Woods, John Simonds and Lieutenant Thomas Legate; Treasurer, Captain John Joslin.

1794.—Moderator, David Wilder; Clerk, John Woods; Selectmen, David Wilder, Timothy Boutelle, John Simonds, John Woods and Thomas Legate; Treasurer, John Joslin.

1795.—Moderator, Timothy Boutelle; Clerk, John Woods; Selectmen, John Simonds, John Woods, Captain John Buss, James Boutelle and John Gardner; Treasurer, John Joslin.

1796.—Moderator, John Simonds; Clerk, John Woods; Selectmen, John Lincoln, John Buss, James Boutelle, John Gardner and David Boutelle; Treasurer, John Joslin.

1797.—Moderator, John Buss; Clerk, John Wood; Selectmen, John Buss, John Gardner, James Boutelle and David Boutelle; Treasurer, Captain Luke Joslin.

1798.—Moderator, Colonel Timothy Boutelle; Clerk, John Woods; Selectmen, John Buss, John Gardner, David Boutelle, Thomas Hale and Elisha Wilder; Treasurer, Captain Luke Joslin.

1799.—Moderator, John Buss; Clerk, John Gardner; Selectmen, John Buss, John Gardner, Thomas Hale, Elisha Wilder and Bezaleel Lawrence; Treasurer, Captain Luke Joslin.

1800.—Moderator, Thomas Legate; Clerk, John Gardner; Selectmen, John Simonds, John Buss, John Gardner, Thomas Hale and Elisha Wilder; Treasurer, Captain Luke Joslin.

1801.—Moderator, Thomas Hale; Clerk, John Gardner; Selectmen, John Simonds, John Gardner, Thomas Hale, Luke Joslin and Ephraim Lincoln; Treasurer, Metaphor Chase.

1802.—Moderator, John Buss; Clerk, John Gardner; Selectmen, John Simonds, John Buss, John Gardner, Luke Joslin and Ephraim Lincoln; Treasurer, Metaphor Chase.

1803.—Moderator, Jonas Kendall; Clerk, Abijah Bigelow; Selectmen, John Simonds, John Buss, William Burrage, Abijah Bigelow and Abel Kendall; Treasurer, Metaphor Chase.

1804.—Moderator, John Buss; Clerk, Abijah Bigelow; Selectmen, John Simonds, Abijah Bigelow and Abel Kendall; Treasurer, Metaphor Chase.

1805.—Moderator, Captain John Buss; Clerk, Abijah Bigelow; Selectmen, John Simonds, John Buss, Abijah Bigelow, William Burrage and Abel Kendall; Treasurer, Metaphor Chase.

1806.—Moderator, John Buss; Clerk, Abijah Bigelow; Selectmen, John Buss, Abijah Bigelow, William Burrage and Abel Kendall, Calvin Hale; Treasurer, Metaphor Chase.

1807.—Moderator, Abel Kendall; Clerk, Abijah Bigelow; Selectmen, Nathan Burrage, Abel Kendall, Calvin Hale, Luke Joslin and Edw. Wilder; Treasurer, Asa Johnson.

1808.—Moderator, Calvin Hale; Clerk, Abijah Bigelow; Selectmen, Abel Kendall, Calvin Hale, Luke Joslin, David Wilder and Smith Hills; Treasurer, Asa Johnson.

1809.—Moderator, Abel Kendall; Clerk, Abijah Kendall; Selectmen, Abel Kendall, Calvin Hale, Luke Joslin, Enoch Boutelle and Stephen Johnson; Treasurer, Asa Johnson.

1810.—Moderator, Luke Joslin; Clerk, Abijah Bigelow; Selectmen, Abel Kendall, Stephen Johnson, Enoch Boutelle, Abel Carter and Wilder Carter; Treasurer, Asa Johnson.

1811.—Moderator, Abel Carter; Clerk, Josiah Richardson; Selectmen, Dr. David Wilder, Jr., Stephen Johnson, Wilder Carter, Jonathan Carter and Josiah Richardson; Treasurer, Smith Hills.

1812.—Moderator, Calvin Hale; Clerk, Josiah Richardson; Selectmen, Stephen Johnson, Wilder Carter, Jonathan Carter, Josiah Richardson and Rufus Kendall; Treasurer, Smith Hills.

1813.—Moderator, Calvin Hale; Clerk, Josiah Richardson; Selectmen, David Wilder, Rufus Kendall, Levi Nichols, Abel Carter and Thomas Hills; Treasurer, Smith Hills.

1814.—Moderator, Calvin Hale; Clerk, Josiah Richardson; Selectmen, Rufus Kendall, Abel Carter, Silas Allen, William Lincoln and William Wilder; Treasurer, Smith Hills.

1815.—Moderator, Abel Carter; Clerk, Josiah Richardson; Selectmen, Abel Carter, Wm. Wilder, Josiah Richardson, Wilder Carter and John Kendall, Jr.; Treasurer, Smith Hills.

1816.—Moderator, Abel Carter; Clerk, Wm. Perry; Selectmen, Abel Carter, Wm. Wilder, Wilder Carter, John Kendall and Wm. Perry; Treasurer, Smith Hills.

1817.—Moderator, Abel Carter; Clerk, Wm. Perry; Selectmen, John Kendall, Wm. Perry, John Buss, Chas. Hills and Wm. Wilder; Treasurer, Stephen Johnson.

1818.—Moderator, Abel Carter; Clerk, Wm. Perry; Selectmen, Abel Carter, Wm. Wilder, Wm. Perry, John Buss and Chas. Hills; Treasurer, Stephen Johnson.

1819.—Moderator, Abel Carter; Clerk, Joseph G. Kendall; Selectmen, David Wilder, Joseph G. Kendall and Daniel Gates; Treasurer, Bezaleel Lawrence.

1820.—Moderator, Abel Carter; Clerk, Joseph G. Kendall; Selectmen, David Wilder, Jos. G. Kendall and Jabez B. Lowe; Treasurer, Bezaleel Lawrence.

1821.—Moderator, Abel Carter; Clerk, Jos. G. Kendall; Selectmen, Joseph Kendall, Jabez B. Lowe and Israel Nichols; Treasurer, Bezaleel Lawrence.

1822.—Moderator, David Wilder; Clerk, Joseph G. Kendall; Selectmen, Joseph Kendall, Abel Carter, Wm. Wilder, Carter Gates and Leonard Burrage; Treasurer, Bezaleel Lawrence.

1823.—Moderator, David Kendall; Clerk, Joseph G. Kendall; Selectmen, Joseph G. Kendall, Wm. Wilder, Carter Gates, Leonard Burrage and Moses Chase; Treasurer, Bezaleel Lawrence.

1824.—Moderator, David Wilder; Clerk, Joseph G. Kendall; Selectmen, Joseph G. Kendall, Carter Gates, Leonard Burrage, Moses Chase and John Taylor; Treasurer, Bezaleel Lawrence.

1825.—Moderator, David Wilder; Clerk, Joseph Kendall; Selectmen,

Carter Gates, Leonard Burrage and Moses Chase; Treasurer, Bezaleel Lawrence.

1826.—Moderator, David Wilder; Clerk, Joseph G. Kendall; Selectmen, Leonard Burrage, Moses Chase and Chas. Grout; Treasurer, Bezaleel Lawrence.

1827.—Moderator, David Wilder; Clerk, Joseph G. Kendall; Selectmen, Moses Chase, Chas. Grout and Otis Stearns; Treasurer, Bezaleel Lawrence.

1828.—Moderator, Levi Nichols; Clerk, Joseph Kendall; Selectmen, Chas. Grout, Otis Stearns and James Burditt; Treasurer, Bezaleel Lawrence.

1829.—Moderator, Joseph G. Kendall; Clerk, Wm. Perry; Selectmen, Chas. Grout, Otis Stearns and James Bennett; Treasurer, Bezaleel Lawrence.

1830.—Moderator, Levi Nichols; Clerk, Wm. Perry; Selectmen, Otis Stearns, James Burditt and George H. Hills; Treasurer, John Taylor.

1831.—Moderator, Carter Gates; Clerk, Wm. Perry; Selectmen, George H. Hills, Abel Bowers and Luke Buss; Treasurer, John Taylor.

1832.—Moderator, Carter Gates; Clerk, Wm. Perry; Selectmen, George H. Hills, Abel Bowers and Phinehas Burditt; Treasurer, John Taylor.

1833.—Moderator, Hon. David Wilder; Clerk, Henry Allen; Selectmen, Phinehas Burditt, Seneca Colburn and Ward M. Cotton; Treasurer, John Taylor.

1834.—Moderator, Levi Nichols; Clerk, Henry Allen; Selectmen, Phinehas Burditt, Seneca Colburn and Ward M. Cotton; Treasurer, John Taylor.

1835.—Moderator, Charles W. Wilder; Clerk, Henry Allen; Selectmen, Seneca Colburn, Ward M. Cotton and Amos Haws; Treasurer, John Taylor.

1836.—Moderator, Charles W. Wilder; Clerk, Albert Smith; Selectmen, Ward M. Cotton, Amos Haws and John Taylor; Treasurer, John Taylor.

1837.—Moderator, Carter Gates; Clerk, Albert Smith; Selectmen, Ward M. Cotton, James H. Carter and Carter Gates; Treasurer, Henry Allen.

1838.—Moderator, Charles W. Wilder; Clerk, Luke Lincoln; Selectmen, James H. Carter, Silas Hills and Joseph Haskell; Treasurer, Henry Allen.

1839.—Moderator, Leonard Burrage; Clerk, Luke Lincoln; Selectmen, Silas Hills, Joseph Haskell and Charles Carter; Treasurer, Henry Allen.

1840.—Moderator, Leonard Burrage; Clerk, Luke Lincoln; Selectmen, Joseph Haskell, Thomas Hills and Ephraim Robbins; Treasurer, Henry Allen.

1841.—Moderator, Leonard Burrage; Clerk, Luke Lincoln; Selectmen, James H. Carter, Ephraim Robbins and George S. Burrage; Treasurer, Henry Allen.

1842.—Moderator, Leonard Burrage; Clerk, Luke Lincoln; Selectmen, James H. Carter, George S. Burrage and Jacob Puffer; Treasurer, Joseph S. Darling.

1843.—Moderator, Charles W. Wilder; Clerk, Luke Lincoln; Selectmen, George S. Burrage, Wm. Nichols and Alanson J. Whitcombe; Treasurer, Joseph S. Darling.

1844.—Moderator, Solon Carter; Clerk, Luke Lincoln; Selectmen, George S. Burrage, James Burditt and Emory Burrage; Treasurer, Joseph S. Darling.

1845.—Moderator, Charles W. Wilder; Clerk, Joel C. Allen; Selectmen, James Burditt, Emory Burrage and Wm. S. Carter; Treasurer, Joseph S. Darling.

1846.—Moderator, Leonard Burrage; Clerk, Joel C. Allen; Selectmen, James Burditt, Emory Burrage and Wm. S. Carter; Treasurer, Artemus Gates.

1847.—Moderator, Ward M. Cotton; Clerk, Joel C. Allen; Selectmen, Wm. Nichols, Charles W. Wilder and Solon Carter; Treasurer, Artemus Gates.

1848.—Moderator, Leonard Burrage; Clerk, Joel C. Allen; Selectmen, Wm. Nichols, Charles W. Wilder and Solon Carter; Treasurer, Artemus Gates.

1849.—Moderator, Solon Carter; Clerk, J. C. Allen; Selectmen, Wm. A. Nichols, Solon Carter and Charles W. Wilder; Treasurer, Artemus Gates.

1850.—Moderator, Wm. A. Nichols; Clerk, J. C. Allen; Selectmen, Charles W. Wilder, J. Q. A. Peirce and Joseph Darling; Treasurer, Charles H. Colburn.

1851.—Moderator, Leonard Burrage; Clerk, J. C. Allen; Selectmen, J. Q. A. Pierce, Augustus Morse and Merrit Wood; Treasurer, Caleb C. Field.

1852.—Moderator, Leonard Burrage; Clerk, J. C. Allen; Selectmen, J. Q. A. Pierce, Augustus Morse and Merrit Wood; Treasurer, Porter Piper.

1853.—Moderator, Solon Carter; Clerk, J. C. Allen; Selectmen, William A. Nichols, J. Q. A. Peirce and Joseph S. Darling; Treasurer, Porter Piper.

1854.—Moderator, Leonard Burrage; Clerk, J. C. Allen; Selectmen, William A. Nichols, J. Q. A. Peirce and Merrit Wood; Treasurer, Porter Piper.

1855.—Moderator, Solon Carter; Clerk, J. C. Allen; Selectmen, Solon Carter, Merrit Wood and Manson D. Haws; Treasurer, Porter Piper.

1856.—Moderator, Solon Carter; Clerk, J. C. Allen; Selectmen, Manson D. Haws, Charles H. Merriam and Jairus Litchfield; Treasurer, Porter Piper.

1857.—Moderator, Solon Carter; Clerk, J. C. Allen; Selectmen, Charles H. Merriam, Charles C. Boyden and Charles L. Joslin; Treasurer, Porter Piper.

1858.—Moderator, Solon Carter; Clerk, J. C. Allen; Selectmen, Charles C. Boyden, Charles L. Joslin and Samuel Putnam; Treasurer, Porter Piper.

1859.—Moderator, Daniel R. Haynes; Clerk, J. C. Allen; Selectmen, Charles C. Boyden, Charles L. Joslin and Manson D. Haws; Treasurer, Porter Piper.

1860.—Moderator, Daniel R. Haynes; Clerk, J. C. Allen; Selectmen, Charles Joslin, Manson D. Haws and Alanson Richardson; Treasurer, Porter Piper.

1861.—Moderator, Solon Carter; Clerk, J. C. Allen; Selectmen, Manson D. Haws, Alanson Richardson and John H. Lockey; Treasurer, Porter Piper.

1862.—Moderator, Solon Carter; Clerk, J. C. Allen; Selectmen, Manson D. Haws, Alanson Richardson and John H. Lockey; Treasurer, Porter Piper.

1863.—Moderator, Daniel R. Haines; Clerk, J. C. Allen; Selectmen, Alanson Richardson, Charles H. Merriam and William F. Howe; Treasurer, Porter Piper.

1864.—Moderator, Manson D. Haws; Clerk, J. C. Allen; Selectmen, John H. Lockey, William F. Howe and Alfred L. Burditt; Treasurer, Porter Piper.

1865.—Moderator, Manson D. Haws; Clerk, J. C. Allen; Selectmen, William F. Howe, A. L. Burditt and Samuel Putnam; Treasurer, Porter Piper.

1866.—Moderator, C. L. Joslin; Clerk, J. C. Allen; Selectmen, A. L. Burditt, Samuel Putnam and D. B. Look; Treasurer, J. C. Allen.

1867.—Moderator, Manson D. Haws; Clerk, J. C. Allen; Selectmen, Samuel Putnam, Alanson Richardson and Stephen A. Miller; Treasurer, J. C. Allen.

1868.—Moderator, Charles L. Joslin; Clerk, J. C. Allen; Selectmen, Alanson Richardson, Stephen A. Miller and Cephas Derby; Treasurer, J. C. Allen.

1869.—Moderator, Manson D. Haws; Clerk, J. C. Allen; Selectmen, Stephen A. Miller, Cephas Derby, Levi Goss; Treasurer, J. C. Allen.

1870.—Moderator, Charles L. Joslin; Clerk, J. C. Allen; Selectmen, Levi Goss, Samuel Merriam, Joel A. Stratton; Treasurer, J. C. Allen.

1871.—Moderator, John H. Lockey; Clerk, J. C. Allen; Selectmen, Samuel Merriam, Joel A. Stratton, George F. Colburn; Treasurer, J. C. Allen.

1872.—Moderator, Manson D. Haws; Clerk, J. C. Allen; Selectmen, Samuel Merriam, Joel Stratton, Jonas Gates; Treasurer, J. C. Allen.

1873.—Moderator, C. L. Joslin; Clerk, J. C. Allen; Selectmen, J. A. Stratton, G. F. Colburn, N. C. Boutelle; Treasurer, J. C. Allen.

1874.—Moderator, C. L. Joslin; Clerk, J. C. Allen; Selectmen, J. A. Stratton, N. C. Boutelle, N. Harwood; Treasurer, J. C. Allen.

1875.—Moderator, John H. Lockey; Clerk, J. C. Allen; Selectmen, N. E. Boutelle, N. Harwood, J. P. Lockey; Treasurer, J. C. Allen.

1876.—Moderator, M. D. Haws; Clerk, J. C. Allen; Selectmen, W. F. Howe, Cephas Derby, A. O. Wilder; Treasurer, J. C. Allen.

1877.—Moderator, M. D. Haws; Clerk, J. C. Allen; Selectmen, Cephas Derby, A. O. Wilder, George Hall; Treasurer, J. C. Allen.

1878.—Moderator, Howard M. Lane; Clerk, J. C. Allen; Selectmen, Cephas Derby, A. O. Wilder, M. C. Chapman; Treasurer, J. C. Allen.

1879.—Moderator, Howard M. Lane; Clerk, J. C. Allen; Selectmen, Samuel Merriam, George H. Wheelock, James Hadley; Treasurer, J. C. Allen.

1880.—Moderator, H. M. Lane; Clerk, J. C. Allen; Selectmen, Samuel Merriam, George H. Wheelock, James Hadley; Treasurer, J. C. Allen.

1881.—Moderator, F. C. Bowea; Clerk, J. C. Allen; Selectmen, George H. Wheelock, James Hadley and D. B. Look; Treasurer, J. C. Allen.

1882.—Moderator, H. M. Lane; Clerk, J. C. Allen; Selectmen, George Wheelock, C. W. Carter and Clesson Kenney; Treasurer, J. C. Allen.

1883.—Moderator, H. M. Lane; Clerk, J. C. Allen; Selectmen, Cephas Derby, C. W. Carter and James Skinner; Treasurer, J. C. Allen.

1884.—Moderator, H. M. Lane; Clerk, J. C. Allen; Selectmen, C. W. Carter, James Skinner and Dwight B. Look; Treasurer, J. C. Allen.

1885.—Moderator, H. M. Lane; Clerk, C. A. Joslin; Selectmen, H. M. Lane, Cephas Derby and C. A. Hunt; Treasurer, C. A. Joslin.

1886.—Moderator, H. M. Lane; Clerk, C. A. Joslin; Selectmen, H. M. Lane, C. A. Derby and C. A. Hunt; Treasurer, C. A. Joslin.

1887.—Moderator, H. M. Lane; Clerk, C. A. Joslin; Selectmen, H. M. Lane, C. A. Hunt and G. F. Colburn; Treasurer, C. A. Joslin.

1888.—Moderator, H. M. Lane; Clerk, C. A. Joslin; Selectmen, H. M. Lane, C. A. Hunt and G. F. Colburn; Treasurer, C. A. Joslin.

**FIRE DEPARTMENT.**—There was no provision by the town for protecting property from fire before the year 1846. At that time the town purchased a "water engine" known as "Torrent, No. 1." This was in the care of a private company until 1848, the date of the first legal organization. About this time a second engine was purchased, and named "Union, No. 2." It was stationed at North Leominster. A few years before the introduction of water the town added a steamer to its fire apparatus. The department has always been in excellent condition, and was never more efficient than now. With its large supply of water, and its well-organized and disciplined Fire Department, Leominster is well protected against loss from fire. Emory Tilton was the first chief of this department. The others have been: Henry Stearns, D. B. Stratton, James Skinner and George R. Damon. The present chief is William H. Spaulding.

**RAILROADS.**—The Fitchburg Railroad was the first within the limits of the town. It was chartered in 1842; two of the chief movers in the matter, Abel Phelps and Alvah Crocker, were natives of Leominster, although not at the time residents of the town. This road passes through North Leominster, and connects the town with Boston direct, with the North by means of the Cheshire and Central Vermont, with New York and the West by the Tunnel. The standing and business of this road is well known.

The Fitchburg and Worcester road, now a part of the Old Colony system, was next, its charter bearing the date of 1847. Dr. Charles W. Wilder, a resident of Leominster, was one of the principal movers in this enterprise. He was its first president and a life-long director. The road connects the town directly with leading points to the South. The Old Colony Northern Division is the last of the railroads passing through the town. It connects Leominster Centre directly with Boston, Taunton, New Bedford and points along the Cape. The railroad facilities are, therefore, ample both for business and for pleasure.

**BANKS.**—Leominster has but one National Bank. The First National Bank was chartered in 1864. It

began business with John H. Lockey as president, and Joel C. Allen as cashier. The capital was one hundred and fifty thousand dollars, afterwards increased. When the charter expired, in 1884, the bank closed up its affairs and the present institution, The Leominster National Bank, began business with a capital of one hundred and fifty thousand dollars. Hamilton Mayo is president; A. L. Burditt, cashier; Directors: Hamilton Mayo, Charles L. Joslin, John M. Lockey, F. A. Whitney, Geo. L. Rice, Nahum Harwood, A. L. Burdett, A. W. Williams.

The Leominster Savings Bank was incorporated under the laws of the State in 1865. John H. Lockey, Leonard Burrage and James H. Carter were the original charter members. Dwight B. Look is president of the bank, and A. L. Burdett, clerk and treasurer. The banking interests of the town are well conducted. Its commercial affairs, also, are in the hands of honorable and capable men and women, and are generally conducted with energy and success. The scope of the present article does not require separate and detailed mention.

**PRINTING.**—The first paper known to have been printed in town was the *Rural Repository*. It was a weekly paper, published by Charles Prentess, and lived to be eighteen months old. The *Political Focus*, by Charles and John Prentess, was commenced June, 1798, and continued until November 28, 1799. John Prentess was the founder of the Keene, N. H., *Sentinel*. The *Telescope* was published by Adams & Wilder from June 2, 1800, to October 14, 1802, when it died of starvation.

Charles Prentess published several books, among which may be mentioned a volume of his own writings in prose and verse; a poem and a volume of Dramatic Dialogues, by Rev. Charles Stearns, of Lincoln, Mass. Dr. Adams published two or three editions of his Scholar's Arithmetic and his Understanding Reader, Mental Arithmetic, Book-keeping and Measurement.

The Scholar's Arithmetic was sold to John Prentess about 1806. It was several times revised, and large editions of it sold as late as 1848. Another edition was issued still later by J. W. Prentiss & Co. This last book was the first written arithmetic which the writer ever used. It was the common text-book of his district school days. It does not appear that any attempt was made to publish a paper in Leominster after the death of the *Telescope* until June 2, 1872, when *The Leominster Enterprise* was started by F. N. Boutwell. This paper was conducted by him until January, 1884; from that time till January, 1885, it was managed and edited by A. G. Moore, since which time it has been conducted by Joel D. Miller, the present owner.

**LEOMINSTER GAS-LIGHT COMPANY.**—The streets and public buildings have been lighted by gas since October, 1873, at which time the Leominster Gas-Light Company put its works in operation. The

Hamilton Mayo

capital stock of the company is fifty thousand dollars, and since 1879 the works have been managed by Howard M. Lane, as lessee. The company furnishes oil gas of twenty-eight candle-power, and pays an annual dividend of five per cent. on the capital stock.

The Leominster Electric Light Company have nearly finished their plans and expect soon to furnish light and also to operate a street railway. Still, the company can hardly be said to have a history at the present writing.

Perhaps two other topics might find a word of mention at the close of this sketch. It seems fair to say that Leominster is justly distinguished for the number and character of her homes. It would not be hard to find towns with more costly buildings and more spacious grounds; but it may be doubted if there are many within the limits of this Commonwealth where so large a proportion of the houses and grounds are kept with care. There is a thrift and neatness in all the surroundings which speaks of comfort, culture and peace for all who dwell beneath the roof. Leominster is a town with *many* comfortable homes, but very few, if any, *mansions*; she cares most carefully for her poor, is disfigured by very few unkept places and rejoices in a sober and industrious population.

In matters of temperance and good order, too, Leominster challenges comparison. By this it is not meant that, when the use of liquor was universal, Leominster was for prohibition. In the days when New England rum was considered necessary both to settle a minister and to raise a barn, no doubt this town took its share and paid for it. What is meant is, that in all stages of the temperance reform, since it has been a reform, Leominster has been at the forefront; that to-day, by a very large majority, she is with the most advanced sentiment on this subject. Leominster *is* and long *has been* a decided and persistent temperance community. She believes in prohibiting the traffic. She has been, also, noted in all her history for the good order on her streets and in her public assemblies, for the intelligence and enterprise of her people, for the faith and integrity of her public doings. Leominster is not ashamed of her industries or their management, of the opportunities for education, for social and religious culture which she offers; she is not ashamed of the men who have represented her on the field or in the administration of affairs.

We recall the old report: "The district is mountainous and poorly supplied with meadow," and add this: To the peace of the valley the hills round about add strength and beauty, and Leominster abides by her history.

## BIOGRAPHICAL.

### HAMILTON MAYO.

Among her citizens, there is not one whom the people of Leominster hold in higher esteem for integrity, good judgment, business and professional ability than Hamilton Mayo.

Mr. Mayo is the only son of William and Maria Mayo, of Westminster, Mass., where he was born February 26, 1851. From the schools of his native town he entered the Meriden Academy, Meriden, N. H., and graduated in 1869. The next four years were spent at Dartmouth College, from which institution he graduated in 1873, and from the Albany Law School in 1874. He was immediately admitted to the bar and in February of the following year (1875) opened an office in Leominster.

Since that time Mr. Mayo has devoted his energies to the practice of his profession and to such financial duties as naturally come to a man in his position. As a lawyer, Mr. Mayo is careful, correct and painstaking; a very safe counselor, one who gives advice with a sufficient reason back of his advice. His analysis of whatever comes to his hand is very clear and eminently satisfactory; he would win a case rather by clearness of statement and justness of argument than by fervor of appeal. His mind and temper are distinctly judicial.

In 1883 Mr. Mayo was appointed trial justice, an office which he still holds and administers with judgment and discrimination.

Mr. Mayo is also a careful and successful financier, and holds, with credit to himself and profit to others, important trusts in this direction. He is president of the Leominster National Bank, a trustee and one of the board of investment of the Savings Bank and has in charge valuable estates.

In all the duties and the relations of a citizen, Mr. Mayo bears an honorable part; he is willing to give both time and effort for the permanent and healthy growth of the town. He has taken active part in civil affairs, both in shaping the policy of the town and in matters of administration. He is now a member of the Water Board and for some years he served the town as one of the School Committee. After the death of Dr. C. C. Field, Mr. Mayo was elected chairman of the board. Although not an active director of work in the school-room, he gave the town most excellent and efficient service in this office, and his retirement from the board was a distinct and positive loss to the schools of Leominster.

As a public speaker Mr. Mayo does not often come before the people, but when occasion does bring him out he is listened to with marked respect and attention. His speeches show a sharp analysis of the subject, a full mastery of principles, and a clear statement of essential points—things which in themselves make for conviction.

November 20, 1878, Mr. Mayo married Florence G. Curtis, of Portland, Maine, a most estimable lady, whose death within the past year ended a home life of much promise.

#### JOEL SMITH.

Mr. Joel Smith was born in Leominster, Aug. 23, 1812. He was a son of Joel and Abigail Smith, and was one of four brothers, of whom only the oldest is now living. At an early age he was left to the care of an uncle, Mr. James Divoll, whose residence was on Prospect Street, North Leominster.

On a farm located off this street, as it turns towards Shirley, Mr. Smith spent his boyhood up to the fourteenth year, and received his education in the public schools of the town. At the age of fourteen he went to Wilton, N. H., for the purpose of learning the carpenter's trade. His reason for giving up this plan may be stated in his own words: "My weight at that time was ninety pounds. After eleven months' service my weight was reduced to eighty pounds. Taking the advice of my uncle and elder brother, I returned to Leominster and served an apprenticeship with Jonas Colburn for the comb business." That this change was a wise one Mr. Smith's skill as a workman and success as a manufacturer of these goods is sufficient proof. When his trade was learned, after the manner of those times, Mr. Smith worked for some years as a journeyman comb-maker, and in 1834 went to Willington, Conn., remaining two years. Returning to Leominster in 1836, he began business for himself in company with Geo. W. Smith and John Nourse. The shop where they manufactured combs stood just south of the spot now occupied by the "Leominster House." Some years later Mr. Smith was in business with Abel Chase and Oliver Patch, in a building which stood on the site of what was afterwards the Union Comb Shop, now the Richardson Carriage Company's Works. When the building was enlarged and the Union Comb Company formed, Mr. Smith became president of the company, the other members being Oliver Patch, Stephen Tisdale, John Bates and James Gallup. Mr. Smith was president of this company for five years, from 1867 to 1872.

The property was wholly destroyed by fire in 1872, and after the shop was rebuilt the company was changed and Mr. Smith withdrew. He soon started again for himself in a part of the Lockey Piano Shop, which then occupied the site of Valpey & Anthony's shoe factory. Here, in 1879, Mr. H. R. Smith, a son of Isaac Smith, was received into the business with his uncle.

The firm was known as Joel Smith & Company, and continued business until 1885, when Mr. H. R. Smith withdrew. During this time the firm met with a severe loss in the fire which wholly destroyed that part of the Lockey Piano Shops which stood south of the railroad. After the fire the business was again started in a shop connected with the factory of W. D.

Earl & Co. Here Mr. Joel Smith continued to manufacture horn goods after Mr. H. R. Smith left the firm, until he moved (within the present year) to more convenient quarters in a part of the comb shop of Mr. A. W. Williams, on Water Street.

Here he was doing business with Mr. John Bates at the time of his death, October, 1888.

The circumstances attending the death of Mr. Smith were as follows: As usual, Mr. Smith had witnessed the annual parade of the Fire Department, in the work and good name of which he was greatly interested. He was, so far as is known, in his usual health. Late in the afternoon he had spent some time in conversation with Mr. Gardner Morse, as to matters of mutual interest and memory. As the early evening was cool, Mr. Smith said he would go to his home and warm himself before it was time for supper in the town hall. He was present at the supper, and took part in the speaking as usual. Previous to the supper he and Mr. F. A. Whitney had made this agreement: that Mr. Whitney should call upon Mr. Smith for a speech, and upon its delivery should pay a certain sum—to be named by Mr. Smith—to the Fire Department. This arrangement, so pleasantly conceived, had just been as happily completed, and at the conclusion of his speech, which had been a very apt and pleasant one, he turned to leave the hall and died almost instantly.

Some mention should be made of Mr. Smith's work outside of his own private business. He was a man who never thought that all his time and energy ought to be consumed for his own personal profit. So far as town matters go, Mr. Smith was a liberal and public-spirited citizen. Of this his whole history is ample proof. Nothing which would in his judgment aid the town was foreign to his thought or effort. Mr. Smith was one of the original corporate members of the Leominster Savings Bank, and a member of the board of trustees from its first organization in 1867; also a member of its investment committee from 1873 until his death. He was appointed a director of the First National Bank of Leominster September 20, 1875, to fill the vacancy caused by the death of his former partner, Oliver Patch, and was elected president in 1884. He was a director in the Leominster National Bank from its organization in July, 1884. During the more than thirteen years while he was director—with the exception of the time when he was a member of the Legislature—he was absent from the regular weekly meetings of the board only ten times. Mr. Smith often served and honored his town in places of public as well as private trust. It must suffice to mention in this connection his services in the Legislature in 1882-83. As a representative he did faithful and efficient service, honoring himself and the office which he held. Any mention of Mr. Smith would seem incomplete which did not make prominent his connection with the anti-slavery reform and the cause of temperance.

*Julius Smith*

C. L. Joslin

In those times, when it cost something to be an anti-slavery man, Mr. Smith was such a man. He was a member of the Leominster Anti-Slavery Society, formed in 1838. Later, he was associated with such men as Dr. Joel S. Bingham, Dea. Isaac Cowdrey, Isaac Smith, Jonas Colburn and Oliver Patch in the Leominster branch of "The Anti-Man-Hunting League."

At the home of Mr. Smith there was always a warm welcome for the fugitive slave. The story cannot now be fully told, but it should be said that in all the work of those hot and eventful years from 1840 to 1861 Mr. Smith bore earnest and honorable part.

Mr. Smith was also an earnest, consistent and persistent friend of temperance. He gave time, money and effort to the cause. Whatever he undertook he did with a will. His whole heart was in his work. Leominster has had few more honored citizens.

September 1, 1836, Mr. Smith married Miss Eliza Taylor, who survives him.

#### CHARLES LORING JOSLIN.

Among the early settlers of the town of Lancaster was Thomas Joslin, who, with his wife and five children, came from England in the year 1635. He came to Lancaster in 1653, after a residence in Hingham and Watertown, Mass., and died there in 1660. His son Nathaniel, who, with his father, signed the first covenant for a town government for Lancaster, lived there until 1676, when, in the fearful Indian massacre of that year, a large part of the inhabitants were killed or taken prisoners, and the rest were forced to abandon their homes. At this time he escaped to Marlborough, where he spent the rest of his life. He died in 1694.

His son, Peter Joslin, returned, as did many others, to the ancestral lands in Lancaster. In the renewed Indian attack of 1692 he was not as fortunate as his father had been; in his absence in the field, his wife and three children, together with a woman living in the family, were killed. In a subsequent attack upon the town of Lancaster the Indians massacred his second wife, with her infant child. With this Peter Joslin, the connection of the family with Leominster begins. He was not until the very last of his life, however, a resident of Leominster, but he was one of the original proprietors of the "new grant." His name appears on the famous agreement which the town of Lancaster made with those who should purchase these lands of the Indians. This was in December, 1711, and at some time, probably not long after this, he acquired a considerable tract of land in North Leominster, which is still known as "Joslin Hill." He did not himself settle this land, but at least one of his sons, the issue of a fourth marriage, became a resident of this town. It is from this son, John Joslin, that the family of Mr. Charles L. Joslin descends. Members of this family have always taken

an active part in town and public affairs. John Joslin, Jr., a son of the first man of this name who settled in Leominster, was captain of the company which marched from this town to Bennington on the occasion of Burgoyne's invasion. A younger brother, Thomas Joslin, was killed in that battle. The first-named was a deacon of the town church for over forty years, town treasurer for a long period, and represented the town at the General Court. In the struggles for liberty this family has always been well represented, as is seen above, and as appears from the record of Colonel George C. Joslin in the War of the Rebellion.

Passing one generation, we find that Major Elias Joslin, the father of the subject of this sketch, was a life-long resident of Leominster. He was born here November 10, 1795, and died July 11, 1874. He took an active part in the military affairs of the town, went to South Boston in the War of 1812 as a member of Captain Tenney's company; was promoted through the different grades to that of major. He married Elizabeth Stearns, who survived him ten years. The children now living are,—William, the eldest, who lives in Illinois; Charles L., in Leominster; John E., in Chesterfield, N. H.; Mary E., who married N. G. Thorn, and lives in Haverhill, Mass.; James T., in Hudson, Mass.; Martha A., who married William B. Tisdale, and lives in Leominster; Colonel George C., in Boston, and Ella L., who resides in Cambridge, Mass.

*Charles Loring Joslin* was born in Leominster January 12, 1823, and received his education in the public schools. At the age of sixteen he was apprenticed, as most other boys were, to learn comb-making. He served with Thomas G. & Joseph G. Merriam, who had their place of business where the town farm buildings now are. He remained with this firm until the death of Thomas G. Merriam, when he began business for himself, his partner being the late Dana Graham. They bought the business of Luther Longley, and located in a small building just beyond the present blacksmith-shop of Charles Welcome, on Central Street. Here these two young men started an active and increasing business. In two years the business demanded more room and something better than horse-power. To supply both, a tract of land containing thirty-five acres, at the right of Central Street, was purchased, and the dam built, which flows the Union Comb Company's Pond, so called. On this land Mr. Joslin built a comb factory in 1846-47; and also began housekeeping in the only house which then stood on the land named above.

This business was continued for two years, when Mr. Joslin sold his interest to Mr. Graham, and built another factory on Union Street, where he made combs in company with his brother-in-law, Mr. E. G. Adams. The building where they began work was sold to Pollard & Butterick and in 1857 removed to a lot near the old hotel and was used for a clothing-

house until it was destroyed by fire. The firm then occupied a part of the first Locke Piano Shop. But soon after this Mr. Adams sold his interest to Mr. Joslin, and on account of failing health retired from business. In the spring of 1871 Mr. Joslin built the main part of the A. W. Williams comb shop upon land which he had purchased of Putnam & Phelps. Here the firm of Joslin, Palmer & Williams carried on the comb and jewelry business for five years, when Mr. Palmer sold his interest to the other partners. They continued until 1883, when Mr. Joslin disposed of his interest to Mr. Williams. Mr. Joslin has not, since then, been engaged in manufacturing.

In public matters Mr. Joslin has always taken an active interest, and has served the town most acceptably in many places of honor and trust. He has frequently been elected moderator of the annual and other town-meetings; was for several years a member of the Board of Selectmen, and in 1859 represented the town in the State Legislature. In all these places Mr. Joslin has earned the unqualified approval of his fellow-citizens.

Mr. Joslin has also been closely connected with the financial matters of the town. He was a director of the First National Bank of Leominster from its organization in 1864 until its charter expired twenty years later, and holds the same office in the Leominster National Bank. He is, at the present writing, vice-president of the Leominster Savings Bank, and has been connected with that institution for many years. In all these relations Mr. Joslin would be regarded a safe and wise counselor.

In October, 1846, Mr. Joslin married Miss Martha J. Adams, of Townsend. They have four children—Martha D., who married John T. Brown, of New York; Clara A., who married J. W. Wetherbee, of Leominster; Mary E., and Charles A., since June, 1884, the town clerk and treasurer of Leominster, who married Alice A., daughter of George F. Morse.

It thus appears not only that Mr. Joslin's family has been an honorable part of the history of Leominster from the very first, but that he has himself contributed directly and potentially to the growth and prosperity of the town. For more than forty years he was an important part of her industrial life, conducting his business with skill, honesty and success. In public position and private life he has acted as a man and a citizen of Leominster ought. He is respected by his fellow-citizens and has reason to respect himself. No one would think of mentioning the men who have and do conserve the best interests of Leominster and not include his name among the number.

Mr. Joslin occupies one of Leominster's most delightful homes, where he and his good wife are enjoying a well-earned rest from the more pressing cares of life.

#### MANSON DANA HAWS.

Among the able and successful business men of Leominster, Manson Dana Haws holds an honorable place. Born here August 28, 1817, educated, for the most part, in the public schools of the town, spending his entire business life here, Mr. Haws is a thorough Leominster man in sympathy and desire. His father, Major Amos Haws, was only two years old when the family moved to Leominster, and so even he may well be called a native of this town. Honesty, prompt and energetic business habits seem to be a part of the family inheritance. Major Haws was a marked man in these respects, and the same is true of the present generation. They are of the sturdy New England stock, possessing marked individuality of character and holding honesty as a cardinal virtue.

Until his sixteenth year the subject of this sketch remained at home. Then, as his father had sold his boot and shoe business, he went to Fitchburg to perfect himself in that trade, spending a year with Manassa & John Sawyer. At the end of that time he went to Worcester, and served the rest of his apprenticeship with James Whitcomb, remaining until 1838. At the close of this term of service Mr. Haws was offered a position of superintendent of the shoe department in the Worcester Insane Asylum, but declined the offer, and spent a year working at his trade in Sterling and Randolph.

In May, 1839, at the request of Bartimus Tenney, who had purchased the business of Major Haws, Manson Dana returned to Leominster to begin the manufacture of boots and shoes at the old stand. For engaging in this special business he does not seem wholly responsible, as there had been, so it would seem, for a long time in the Haws family a certain natural bent in this direction—father, grandfather and great-grandfather had lived by the awl and won honor from the last.

Manson D. Haws began the manufacture of boots and shoes June 9, 1839, and continued without interruption until November 1, 1885. At first the business included the making of both boots and shoes for men and women, but after a time the first part of the work was dropped, and the manufacturing largely confined to ladies' shoes, although some men's shoes were made so long as Mr. Haws continued to manufacture. As things are regarded to-day, this business was never large. At first three to ten hands were employed; and during the last half of the time eighteen to twenty-five; the value of the goods produced was about fifty thousand dollars a year. The shop where Mr. Haws began business stood nearly opposite his present residence. As the business increased a new building was erected, in 1850, on the site of the present factory. This shop has been twice enlarged, once to give more room for the business itself, and once to give room for steam-power, as well as to increase still further the facilities for manufacturing.

*M. D. Haws*

*George H. Morse*

Mr. Haws conducted his business with great skill and energy, making his own sales and purchases and giving personal direction to the work. He earned and deserved success. During the forty-six years that the manufacturing was in his hands there was no enforced idleness. The help were never out of work, except when they demanded a vacation, and for a brief time while the shop was enlarged. Few men who employ others can say as much. In these times, when men are eager for large profits and for wealth, even if it comes by uncertain ways, it is well to remember that there is success in the lawful and comparatively limited lines of trade.

In 1885 he rented his factory to Mr. O. H. Smith, and retired from manufacturing with the esteem of his fellow-citizens and the confidence of all with whom he had had business relations.

As a business man, Mr. Haws is prompt, exact and methodical. He believes in giving present and personal attention to whatever he wishes well done. He not only expects that the use of honest means will bring success, but he is careful and painstaking in his methods of doing business. Thus, when the government overhauled the internal revenue returns, after the war, Mr. Haws was one of the few men whose books were found correct—a fact in which he may take just pride.

Mr. Haws has also filled worthily many places of public and private trust. In 1862 he represented the town at the "General Court." For six years he was one of the selectmen of the town, and for three years chairman of the board. In 1876 he was appointed justice of the peace. He was for many years often called to preside at the "Annual Town-Meeting" and at other times and places. His service in all these ways has been most acceptable to his fellow-townsmen and honorable to himself. When the time came to furnish the town with a better water supply, Mr. Haws was the first to act, by causing an article to be inserted in the town warrant; and he was a member of the committee to select a suitable place for obtaining the water, and to go to the Legislature for a charter which would enable the town to take water.

Mr. Haws has, for many years, been prominent in financial affairs. At one time he was a director of the First National Bank of Leominster. He was, also, for some years, a trustee and one of the "board of investment" of the Leominster Savings Bank. In 1875 he was elected a director of the Rollstone National Bank of Fitchburg, which position he still holds. He is also a trustee of the Worcester-North Savings Institution of Fitchburg, having been elected in 1879. In all these positions Mr. Haws has given faithful and honorable service. He has been, and is often, called to settle estates and to hold estates in trust. In more than one instance, when acting as executor, he has, by the request of the testator, been excused from giving surety upon his personal bond

although these estates exceeded a hundred thousand dollars in value.

In religious convictions Mr. Haws is a Unitarian of the old school, and has been, during all his active life, an active and influential member of the First Congregational (Unitarian) Society of Leominster. In his political faith he is a temperance Republican, straightforward and consistent in his devotion to its principles, although hardly to be classed as an active partisan. That his fellow-citizens consider Mr. Haws worthy of honor appears from the fact that the proposal to offer his name as a candidate for Presidential elector from the Eleventh District, when made in a large meeting of his party, was received with marked approval.

Mr. Haws is a man of decided opinions, positive and determined in his purposes when convinced that they are right, and fully able to give a reason for his convictions.

After an active life, successful and helpful, Mr. Haws is spending an age of comparative leisure in a home which he built for himself, just over the way from the place of his birth.

March 5, 1843, he married Lucy Ann Graham, of Lunenburg, Mass. They have no children.

#### GEORGE FRANKLIN MORSE.

The Morses, whose descendants now live in Leominster, came to this country from England before the middle of the seventeenth century, for it is on record that Joseph Morse, the not remote ancestor of the subject of this sketch, settled in Ipswich, Mass., as early as 1635. It appears from the town records of that town that Joseph Morse was a man of high intelligence and sterling character—one of those men whose religious convictions, views of civil polity and faithful allegiance to duty, as they understood it, have made New England famous and influential in this republic.

George Franklin Morse is the second of eight children of Gardner and Mary Ann Morse, and was born in Leominster, Oct. 16, 1835, in the house known as the Micah R. Ball place, on West Street. His father is a native of Dorchester, Mass., but he moved to Leominster in the year 1827, when he was sixteen years of age. Like most Leominster boys of his time, Gardner Morse was apprenticed to learn the comb business. Indeed, the old apprentice system then prevailed in all trades, and it was held necessary for one to learn all parts of a business before he was considered competent to work as a journeyman or to manufacture for himself. There was, under this method, a loss in time, but a gain in intelligence.

Mr. Morse, after finishing his apprenticeship, began business at once. He married, in 1833, Mary Ann Willard, of Sterling, and was an active part of the social and business life of Leominster until forced by his advanced years to husband his remaining strength.

His home, for nearly half a century, was in what is familiarly known as the Morse Place, on West Street, to which place he moved in April, 1836. Here all the family were born, except George F., already named.

By force of location, therefore, George F. Morse began his education at what is called No. 2; at that time, however, a large and flourishing school. When the High School was organized, he was admitted as one of its first pupils, continuing his connection for the next four years. At the age of sixteen he went to Boston to learn the importing business with the house of Hill, Burrage & Co., two members of which were natives of Leominster—Alvah and Charles H. Burrage. With this house Mr. Morse remained two years, when he returned to Leominster and entered the employ of G. & A. Morse, spending the years 1855–56 with them. This firm was engaged in the comb business, and also, as was quite the custom of that time, had a large store for the sale of general merchandise. Mr. Morse served as book-keeper for them.

In 1857 Gardner Morse, William Booth, Joseph F. Goodhue and George F. Morse formed a partnership, under the name of G. Morse & Co., which continued until the Morse Comb Company was organized, with George F. Morse as secretary. This was the first stock company organized in Leominster. Within the year this company lost their factory by fire and did not rebuild, but the firm of G. Morse & Son took the place, and continued until the beginning of the war in 1861.

From 1861 to 1863 Mr. Morse was in the Quartermaster's Department of the army. In 1862 he joined the Third Division of the Third Army Corps, then under the command of Gen. Whipple, and remained with the division until after the battle of Fredericksburg.

After leaving the army and before returning to Leominster, in connection with Gen. Augustus Morse, he bought the City Hotel property at Annapolis, Md., and held it for one year.

From 1864 to 1868 Mr. Morse was again engaged in the comb business in Leominster, but the year following he spent in Boston, as proprietor of the Creighton House; but as he had little desire for this business, he sold the property, after a year of successful management, to Mr. F. E. Balch, and returned to his native town.

In 1871 Mr. Morse again commenced the comb business, this time adding the sale of horns to the work of manufacturing. The name of the firm was G. Morse & Co., and the following year George F. and Albert G. Morse assumed that part of the business which pertained to the buying and selling of horns, organizing the firm of G. F. Morse & Co. For the next twelve years they pushed this business with great energy and marked success. The constantly increasing demand for horns during these years, for the manufacture of combs and jewelry, rendered extensive traveling necessary in order to obtain the goods,

which must be gathered from countries where large herds of cattle are found. In furtherance of his business, Mr. Morse, in 1875, visited California, in 1880 Cuba and Mexico. Returning from Havana to the City of Mexico he had the good fortune to travel in company with Generals Grant and Sheridan, as the former was completing his tour of the world. In 1881 also Mr. Morse made a brief tour of Europe.

In 1882 Mr. Morse was elected president of the South Hill Gold Mining Company of Amador, California, and spent a part of that year at the mines. He still holds this office and frequently spends the winter in California, looking after the interests of this property. When the Hecla Powder Company of New York was organized Mr. Morse was elected its president and served till 1888, when he refused a re-election. He is also a director of the Leominster Gas-Light Company.

At the first annual meeting of the Wachusett National Bank of Fitchburg, Mr. Morse was elected one of the directors, to which office he has been annually re-elected, and where he has rendered valuable service. In 1874 he was appointed notary public by Governor Thomas Talbot and still holds the office. He has also filled with credit to himself and with satisfaction to those who elected him many other places of honor and trust.

Mr. Morse is an energetic and successful business man. Beginning life with no special aids from fortune or position, the success which he has achieved may fairly and justly be attributed to his own skill and energy, and in it he may take lasting satisfaction.

In his religious views Mr. Morse is a Unitarian, and has always been warmly interested in that society; in political faith, he is a temperance Republican, a decided, active and influential member of that party.

In his home life Mr. Morse has been most fortunate. In 1859 he married Miss Mary Tufts, of Fitchburg, a most admirable lady, pleasant and helpful, and their delightful family of five children—one son and four daughters—is not only one of the pleasantest of home circles, but must be strength and inspiration to any man. It is homes like this which force upon our attention the fact, that after all, very much of any man's power and success depends upon the fire-side.

As a native of the town, Mr. Morse has always been actively interested in all that pertained to the welfare and development of Leominster, and has been one of the important factors in her growth.

#### NAHUM HARWOOD.

The old homestead of the Harwood family is in Littleton, Mass. Here the elder brother, Hon. J. A. Harwood, still makes his home; at the same place Col. Nahum Harwood, the father, spent his life, and from this centre, for several generations, have come worthy representatives of the best New England life and thought.

*Nahum Harwood*

Very Truly Yours  
S. Munroe

Into this family and at this homestead Nahum Harwood, now of Leominster, was born, September 4, 1833. He was *well* born in the best New England sense—that is, born to an inheritance of ideas and character rather than of wealth. Young Harwood received both a common school and academic education: the first in the schools of Littleton and the last at the academy at Westford, Mass., and in that at Ludlow, Vt. This was the general course of education at that time, when it stopped short of the full college training.

After leaving school Mr. Harwood spent three years with T. & J. Doane, of Boston, and in their service became master of the business of civil engineering. To this profession he devoted several years in Massachusetts and Maine, and also at Omaha, Nebraska, but did not desire to make this the business of life.

Mr. Harwood's first business enterprise was that of making flour. For that purpose he operated for several years a mill at Harvard, Mass. This mill was sold to capitalists from Newburyport, who formed a company for the manufacture of leather board. Of this company Nahum Harwood was treasurer and active manager until 1868, when he formed a partnership with his brother, J. A. Harwood, of Littleton, Mass., and the company purchased the Cozzen's Mill, so called, situated on the Nashua River, North Leominster. They at once began the manufacture of leather board. In time the business of making boot and shoe stiffenings and chair-seats was added and the capacity of the plant increased by new machinery and buildings until the manufactured products were trebled. The business now employs more than sixty workmen, many of them skilled laborers, and requires a one hundred and twenty-five horse-power, furnished by three water-wheels and a Putnam engine of large capacity. The works are run twenty-four hours each working day. This business has been from the start one of the thriving and profitable industries of Leominster; it is conducted by Mr. Harwood on the most honorable and satisfactory business methods and has been a most decided success.

Of late years other business interests have taken some of the time and attention formerly given to the manufacture of leather board. Mr. Harwood has large business relations in California and often spends a part of the year in that State. He is also filling many places of honorable trust, more or less of a public nature. He is one of the directors of the Leominster National Bank and, of the Leominster Gas-Light Company, and is the vice-president of the Eastern Associates, a mutual benefit insurance association of Boston.

Mr. Harwood has also served the town as one of its selectmen for two terms, 1874 and 1875.

In politics Mr. Harwood is a Democrat, and favorably regarded by the men of his party. This will appear from the fact that he has three times been

named as the Democratic candidate for State Senator. He was a delegate from the Tenth Massachusetts District to the National Democratic Convention at St. Louis in 1876. In 1880 he was the candidate of the party for the office of Presidential elector from the same district, and in the next year a candidate for representative to the General Court. In all these contests it is much to the credit of Mr. Harwood that his vote much exceeded the average vote of his party, and nothing to his discredit that he was not elected from a district so strongly Republican.

In 1858 Mr. Harwood married Miss Sarah J. Mullikin, daughter of the late John W. Mullikin, of Charlestown, Mass. They have two daughters; the younger is the wife of Mr. W. H. Chase, of the Leominster Worsted Co.

The prompt and effective business habits of Mr. Harwood have been implied in the description of his manufacturing interests. Whatever he undertakes is pushed by honorable methods, with characteristic energy and usually with good success.

Mr. Harwood has a most pleasant home and family; has built up in Leominster a business which contributes greatly to the prosperity of the town; is a man of marked ability and character, honored by his fellow-citizens and esteemed by all who know him. He must rank with Leominster's best business men.

#### SAMUEL MERRIAM.

Dea. Samuel Merriam was for many years an active and influential part of the civil, business and religious life of Leominster. He was not a native of the town, but was born in Mason, N. H., July 29, 1818, and received his education in the public schools of that town. At the early age of seventeen he was entered as an apprentice to learn the tin and stove business with a firm having the somewhat suggestive name of Scripture & Ames. As the custom of the times was, he remained with this firm until he reached his majority, and then began work as a journeyman, first at Woonsocket, R. I., and then at Nashua, N. H.

The first business venture in which Mr. Merriam engaged was in West Boylston, Mass., in the spring of 1844; but as the business failed fully to meet his expectations, he sold it in the fall of the same year, and moved to Worcester, Mass., where he began business with P. D. Russell. Here he remained until 1850, when he moved to Fisherville, N. H., as it was then named, but is now Penacook, and at once entered into business relations with H. H. Amsden. In 1853, in connection with this gentlemen and B. F. Caldwell, he began the manufacture of pine furniture under the firm-name of Caldwell, Amsden & Co.

Wherever Mr. Merriam had his home, he was warmly interested in the prosperity of the place, and took an active part in the conduct of its civil affairs. Thus, while a citizen of Penacook, he served for several years as a member of the Common Council

and as alderman. In 1863 and 1864 he was a member of the State Legislature of New Hampshire.

In the spring of 1864, Mr. Merriam came to Leominster, and in connection with George Hall, of Nashua, N. H., purchased the land and water privilege at North Leominster now owned and occupied by the firm of Merriam, Hall & Co. At that time there was only a dam on this site, the remains of an old paper-mill. The new company at once erected the necessary buildings and prepared for the manufacture of chamber furniture. The business thus established has been continued under the same firm-name—Merriam, Hall & Co.—to the present time; but it is now owned and managed by George Hall & Son. Mr. Merriam was an active and energetic partner in this business until a few years before his death, when failing health compelled him to seek partial release from care and work.

In Leominster, Mr. Merriam exhibited the same public spirit which had marked his thought and action in other places. He served the town most acceptably as one of the selectmen, and was chairman of the board at the time of his death. He was a director of the First National Bank; and in other ways also rendered able and honorable service for the community.

Mr. Merriam was evangelical in his religious faith and a Baptist in his denominational affiliations, having united with a church of this order while still a young man in his native town. He was greatly interested in all that related to the Baptist Church, willing to spend time and money for the success of his denomination. He was an active member of the Central Baptist Church, one of its deacons and its Sabbath-school superintendent for many years. In all ways he was helpful in the work of the church and influential in its councils. And yet Mr. Merriam was not simply a Baptist; he was an earnest and most worthy Christian gentleman, whose affections took in the broad interests of the faith which he loved.

Mr. Merriam was interested in matters outside his own town and immediate church; he was connected with the Baptist Vineyard Association and greatly interested in its work. He worked wisely for the development of that property and the success of that religious movement.

April 15, 1844, Mr. Merriam married Miss Sybel Preston, of New Ipswich, N. H. Of this union were born two children—a daughter, who died in infancy, and a son, Edward Preston, a graduate of Harvard College, who died suddenly at Cottage City, August 15, 1885. Those acquainted with the facts in Mr. Merriam's life must admit that he was one of the potent factors in the best life, thought and growth of Leominster. He died December 30, 1880.

#### HIRAM W. PITTS.

Mr. Hiram W. Pitts was, for some years previous to his death, a prominent citizen of Leominster, ac-

tively interested in the prosperity of the town, although not directly a part of her industrial life.

The immediate ancestors of that branch of the Pitts family to which the subject of this sketch belonged lived in Taunton, Mass., and were, for several generations, actively engaged in manufacturing. In proof of this, it may be mentioned that the great-grandfather of Hiram W. Pitts was a successful manufacturer of brass clocks; that his son owned and operated a grist-mill, spending his life in Taunton; that, in the next generation, James Pitts, after marrying a daughter of Major Zebulon White, of Norton, Mass., who had won fame and honor during the Revolution by casting cannon for the Government, engaged in the business of a millwright in East Bridgewater and also devoted some time to the manufacture of cotton machinery. His children were: James, William, Hiram W. and Seth Pitts.

Of these Hiram W. was born December 2, 1814, and during the following year his father moved to what was then Lancaster, but is now Clinton, Mass. The land and mill privilege now owned by the Lancaster Mills Corporation was purchased by Mr. Pitts when that entire section of country was nearly an unbroken forest. He immediately erected a large saw-mill and also a small cotton-factory. These different kinds of business Mr. Pitts continued until his death, in 1835. It was in his father's mill that Hiram W. learned his first lessons in the business of cotton manufacturing. Until he was eighteen he spent the larger part of each year in such work in the cotton factory as suited his age and strength. Still, after the manner of those days, eight weeks of each winter and, until he was twelve years old, ten weeks of each summer were scrupulously given to the business of acquiring an education. It was during this time that young Pitts, impelled by hereditary tendencies or for some other good reason, devoted all the time he could save from school to the repairing of clocks and to making and fitting knife-blades. In this way he was able to buy a few books and save some money for future use.

The first business venture in which Mr. Pitts engaged covered the time from 1835 to 1842. During these years, in company with his brothers, he successfully manufactured satinets-warps in the cotton-mill above named. About the year 1842 this mill property was sold to E. B. Bigelow and the Lancaster Mills Corporation formed. After six months spent in Worcester, Mass., Mr. Pitts moved to West Fitchburg and was for two years superintendent of the mills owned by Colonel Ivers Phillips. He then spent one year in the mill which he owned at the time of his death. At the expiration of this year Mr. Pitts, in company with Edwin F. Wheeler, began running a mill located at Sanquoit, N. Y. This mill was operated by Messrs. Pitts & Wheeler under contract, and soon after the owners of the property desired the company to take another mill owned by them and located at Coopers-

*H. W. Pitts*

town, N. Y. The offer was accepted, but Messrs. Pitts & Wheeler dissolved partnership and Mr. Pitts took the mill at Cooperstown, removed there at once and remained most of the time until he began business with Benjamin Marshall, of Troy, N. Y.

Mr. Marshall was an Englishman by birth, but came to this country in 1803. He was at first largely and successfully engaged in commerce, but in 1825 he turned his attention to manufacturing. In that year he built the mills at Utica, N. Y., and in 1826 he built the Hudson Print Works and the Ida Cotton-Mills, at Troy, N. Y. Later he came into possession of a cotton-factory at Middlebury, Vt. It was only in connection with this last mill that Mr. Pitts entered into partnership with Mr. Marshall. By the terms of the agreement, Mr. Marshall furnished the mill and capital, and Mr. Pitts managed the business, bought the stock and sold the goods.

In 1851, in order fully to relieve Mr. Marshall of care, Mr. Pitts assumed the entire business, furnished the capital and continued the business of making sheetings and carpet-warps. There was a partnership entered into at this time with Frederick W. Harris, but it lasted only one year; but in 1854 Mr. Pitts permanently increased his facilities by purchasing an adjoining mill privilege, a fourth interest in which he sold to Harmon A. Sheldon. Here they built a grist-mill and conducted a successful business until 1866.

In 1858 Mr. Marshall died, but Mr. Pitts continued to occupy the cotton-factory at Middlebury, Vt., until 1862. In 1864 he acquired by purchase the mill-property in Fitchburg, which he owned and occupied at the time of his death, but he did not begin to manufacture there until the year 1867. In 1866 Mr. Pitts moved his family to Leominster, and remained a citizen of this town during the remainder of his life, although his chief business interest was in Fitchburg, and for a time after 1867 he again operated the cotton-factory at Middlebury, Vt.

Immediately after taking possession Mr. Pitts enlarged his Fitchburg mill, making its capacity more than three times what it had been before, and ten years later he erected a new mill, 101 feet by 48, with a large boiler-room and ample power. For the first year in Fitchburg, Mr. Pitts manufactured sheetings, but after that the whole plant was devoted to the making of carpet-warps, a business in which Mr. Pitts was remarkably successful.

Mr. Pitts was twice married. His first wife was Miss Betsey Burdett, of Leominster, who lived only one year. His second marriage was with Miss Mary A. Merriam, of Fitchburg, and occurred in the year 1846. This wife and their three children survived him; Abby E. and Ella L. live with their mother, at the old homestead in Leominster; B. Marshall Pitts, the only son, continues his father's business, and resides in Fitchburg.

Mr. Pitts was a careful and successful man of business, a good citizen, honored and respected in the

communities where he resided. He devoted most of his time and energy to his private business affairs; still Mr. Pitts did good service for the town of Middlebury in places of honor and trust, and was a director of the Safety Fund National Bank of Fitchburg from its organization until his death.

## CHAPTER CLX.

### MILFORD.

BY WILLIAM T. DAVIS.

THE town of Mendon was originally called the Quinshipaug Plantation, and its territory was within the jurisdiction of the Nipmuck Indians when they were living in their glory before King Philip's War. It consisted of land eight miles square, and was granted by the Massachusetts Colony Court October 16, 1660, on the petition of Gregory Belcher, James Penneman, Thomas Mekens, Moses Payne, Edmund Quincy, Robert Twelves and Peter Brackett. On the 22d of April, 1662, for the consideration of the sum of twenty-four pounds sterling, the Indian proprietors of the land released their title, and a deed running to Moses Payne and Peter Brackett, of Braintree, was signed by Annawassamauke, *alias* John, and Quash-aamit, *alias* William of the Blue Hills, and Great John Namsconont, *alias* Peter, and Upanbohqueen, *alias* Jacob of Natick. The deed described the land "as eight miles square, lying about fifteen miles from Medfield, and is bounded one mile to the east of a small river which lieth about three miles to the eastward of Nipmug Great Pond, and so from the line of one mile on the east of that small river is to run eight miles west or westerly, and is to lie three miles to the south or southward of the path that leads to Nipmug Great Pond, and five miles on the other side of that part north or northwards."

On the 15th of May, 1667, the town of Mendon was incorporated, and on the 19th of February, 1691-92, an additional tract of land, which has since been designated as the "North Purchase," was, for the consideration of three pounds sterling, conveyed to a committee of the town, consisting of Ferdinando Thayer, Joseph White, Sr., Josiah Chapin, Abraham Staples, Sr., Samuel Hayward, James Lovett and Samuel Read. The grantors were John Awasomog and Amos Awasomog and Peter Ephraim, heirs to John Awasomog, late of Natick. The land was described in the deed as "laying upon the north side of the township of Mendon, butted and bounded as followeth: Southerly upon Mendon line and easterly upon Sherburne line to the height of Maspenock Pond, and northerly upon a line of marked trees until it comes to Maspenock Pond, westerly partly upon the abovesaid Maspenock Pond and partly upon a

river commonly known by Mendon Mill River home to Mendon line aforesaid."

On that part of the territory of Mendon which is now Milford the first allotment of land seems to have been made to Benjamin "Alby," in 1664, and consisted of an acre for a mill-lot. In 1670 a twenty-acre house-lot was laid out to John Sprague, near "Albee's" mill-lot. On this lot the first dwelling-house, in what is now Milford was built. Not long after the settlers began to move into the territory in considerable numbers. Among the earliest were Seth Chapin, John Jones, Ebenezer and Joseph Sumner, William Cheney, Benjamin Wheaton, Jonathan Hayward and his nephew, Jonathan, and Thomas White. The affairs of the town were conducted smoothly until after the incorporation of Uxbridge, in 1727, which was set off from Mendon, and somewhat disturbed the territorial equilibrium. The project of a new meeting-house was started, and became, as in many other towns before, a fruitful source of dissension. The result was that the Mill River dissentients from the action of the First Church, on the 15th of April, 1741, "with the assistance of the elders and messengers of the church of Hopkinton and the church of Holliston, solemnly framed themselves into a church state by signing a church covenant." In the following November the following petition was presented to the General Court:

To his Excellency William Shirley, Esq., Capt.-General and Governor-in-Chief in and over his Majesty's Province of the Massachusetts Bay, &c.; and to the Honble, the Council and the House of Representatives of said Province in General Court assembled this 25th d. of November, 1741.

The petition of sundry inhabitants of the town of Mendon in said Province hereunto subscribing, Humbly sheweth: That the said Town of Mendon, in answer to a petition of sundry inhabitants on the Easterly side of Mill River in said Town, did, at their meeting on September the 22, 1741, vote their consent That the lands in said Township lying on the Easterly side of Mill River to the County road by Sheffield's Mill, then bounding on said road to Bellingham and bounding on Bellingham, Holliston and Hopkinton, with all the lands and inhabitants who dwell on these lands within said lines, be a distinct and separate Township; that the lands set off by the Town as aforesaid, with the polls and estates rateable to the support of the ministry and being within said boundaries, are not (your petitioners conceive) more than about one-third part of said Town, considered in respect to polls and estates; that there are five families on the westerly side of Mill River who choose to congregate with your petitioners and to be laid to them, whose lands, also, at least some of them, will be much incommoded by remaining to the old Town; which families, if added to your petitioners, will, as your petitioners hope, render their charge of maintaining the gospel possible.

Your petitioners are nevertheless humbly of opinion that it would be more conducive to the peace and welfare of the whole that your petitioners and others within the Bounds aforesaid, with the addition of those few families, be created a precinct, rather than a separate Township, and that the Ministry of both the Churches and Congregations in said Town may be supported by a Joint Stock, and every one attend the public ministry that is most convenient and agreeable.

Your petitioners humbly pray your Excellency and the Honble Court that the Inhabitants of Mendon dwelling on the Easterly side of Mill River and adjoining as aforesaid to Bellingham, Holliston and Hopkinton, with their lands in said Township, together with other lands on the Westerly side of said River up to a Road called the Eight Rod Road, and including Nathan Tyler's house and lands up to Upton line, may be created a separate Town in a separate precinct, or that the public Ministry of both the Churches and Congregations in the Town of Mendon be supported by a Tax or Assessment upon the whole Town, as your Excel-

lency and Honors shall judge most meet and convenient. And your petitioners shall ever pray, i.e.

John Jones.	Samuel Scammell.
Joseph Jones.	Ephraim Daniels.
Moses Tenney.	Joshua Underwood.
Habijah French.	James Godman.
Moses Gage.	William Legg.
Ichobod Thayer.	Dearing Jones.
James Sumner.	Josiah Chapin.
Eliphalet Wood.	Benjamin Hayward.
William Cheney.	John Chapin.
Nathaniel Jones.	William Cheney, Jr.
John Benney.	Nehemiah Nelson.
Amos Benney.	Benjamin Hayward, Jr.
Nathaniel Nelson.	Samuel Hayward.
Thomas Chaddock.	Joseph Sumner.
Abraham Jones.	Ebenezer Boynton.

And we, whose names are hereunder written (being the owners of the lands of the five families above-named), humbly pray that we, with our lands, may be annexed to the new Town or precinct unless the Ministry be jointly supported.

NATHAN TYLER,  
JOHN THWING,  
THOMAS WHITE.

In response to this petition the following order was passed December 23, 1741:

A Petition of John Jones, and a considerable number of others, inhabitants of the Town of Mendon, Praying that the Petitioners, with their families and Estates, within the Bounds expressed in the Petition, be erected into a separate Town or Precinct.

In the House of Representatives, Read again together with the answer of the Town of Mendon thereupon, and voted the prayer of the Petition be so far granted as that the Inhabitants of Mendon, with their Estates lying on the Easterly side of Mill River, and bounded by said Rivers—Bellingham, Hopkinton and Holliston, including the Families with the Estates on the west side of said River to the Eight Rod road, as expressed and described in the Petition, together with Nathan Tyler and his lands, Samuel Rawson, Daniel Lovel, William Hayward, Thomas White, Daniel White, William Hovey, Josiah Adams, Benjamin Green, Samuel Green and Ebenezer Albee, with their Estates in the old or standing part of said Town, or so many of them as shall join the Petitioners in building a Meeting-House and settling a Minister be, and hereby are, erected into a distinct and separate Precinct; and that the Inhabitants thereof be invested with the same powers and Privileges as other Precincts do enjoy, saving, nevertheless, that Jonathan Hayward, John Green, Obadiah Wheelock, James Albee, Joseph Corbet, Thomas Beard, Benjamin Albee, James Albee, Jr., John Kilburn, John Green, Jr., Ebenezer Wheelock, William Sprague, Joseph Rockwood, Jonathan Hayward, John Hayward, Wm. Sprague, Jr., and John White, living within the above-mentioned bounds, or so many of them as shall desire it, together with their Estates, may continue to the standing part of said Town so long as they attend the public worship there in a stated way and no longer, Provided that the said Inhabitants so set off shall, within the space of two years from this time, erect a convenient Meeting-House and settle a learned Orthodox Minister for the public worship of God.

On the 18th of January, 1742, or according to old style, 1741-42, a meeting was held at the house of Sylvanus Nelson, and the precinct was organized, at which Daniel Taft presided, and the following officers were chosen: William Cheney, Jr., clerk; Capt. Daniel Lovett, Ensign, Nathan Tyler; Deacon, Nathaniel Nelson; Jonathan Hayward, Jr., and John Jones, Jr., precinct committee. A committee was appointed at a meeting held on the 26th of January to select a site for a meeting-house, consisting of Deacon Ebenezer Reed, of Uxbridge, Deacon Thomas Marshall, of Holliston, and Elder Joseph Haven, of Hopkinton. On the 18th of March John Jones, of Hopkinton, and Ebenezer Littlefield, of Hollis-

ton, were added to the committee, and on the 13th of April the committee rendered the following decision :

We are of opinion That the Knowl or Rising Ground at the Country Road leading from Holliston to Mendon, where the Cross-Roads meet which comes from Habijah French's, and on the southwesterly corner of Joseph Sumner's Lot in said Mendon Easterly Precinct, is the best place for a Meeting-House to stand on, and will accommodate the Inhabitants of said Precinct with the families in the standing part of Mendon, viz. : Josiah Adams, Benjamin Green and Samuel Rawson.

With only a slight change, the meeting-house was built on the spot designated by the committee, and Rev. Amariah Frost was ordained December 21, 1742, only two days within the time specified in the act of incorporation. Mr. Frost was a graduate of Harvard in the class of 1740. The precinct thus formed was generally known as the "Easterly Precinct of Mendon," and the church was designated "the second church of Christ in Mendon." After the incorporation of the precinct as a town in 1780, the name of the church was changed to "The First Church of Christ in Milford."

But the people of the precinct were not many years contented with a separation in the ministry alone from the old town. As early as 1753 a movement was begun, and though encountering opposition it never subsided until its purpose was accomplished. Finally at a town-meeting held on the 1st of March, 1779, the town agreed to a separation, and a conference committee was appointed representing the three precincts then existing, of which Jonathan Jones, Seth Nelson and Ichabod Thayer were members on the part of the Easterly or Second Precinct. The conference committee on the 3d of May, 1779, came to an agreement of which the following is the text :

ARTICLE 1st. That the Meadow or land usually flowed by the Mill Pond formerly occupied by Lieutenant William Sheffield, on the north side of the Country Road, belonging to said Town, shall still remain and continue the property of said Town of Mendon, although said Second Precinct should become a separate Town ; and in case said Town of Mendon should have occasion to Eject Jeremiah Kelley, the present occupier of said Pond, or any other person or persons, who may hereafter occupy said lands, from the possession of said Premises, or they shall not keep a good Grist-Mill in repair at or near the Premises, agreeable to the original agreement between said Town and Matthias Puffer and David How,—then the said Second Precinct, although they should become a separate Town, shall have the three-eighths parts of what said Town of Mendon shall recover, they, the said Second Precinct, paying the three-eighths parts of the cost and charge that may arise in recovering the same.

ARTICLE 2d. Agreed, that the said Second Precinct draw their equal proportion of the School Money, according to the Valuation of the said Town : also, one-third part of the Ministry money belonging to the said Town : also, their equal proportion of the said Town's stock of Arms and Ammunition.

3d. Agreed, that the said Second Precinct take their equal proportion of the Poor maintained by the Town, according to the Tax said Precinct pays ; and also, after said Precinct is set off as a separate Town, there shall be any Poor sent to this Town from proper authority to be maintained by this Town, and it shall appear that the persons so brought were the usual or original Inhabitants of the said Second Precinct, then the said Second Precinct shall receive and maintain them as their Poor.

4thly. That the said Second Precinct pay their equal proportion of all the charges that have [arisen] or shall arise within the Town of Mendon prior to their being incorporated as a separate Town, of whatever name or nature.

5thly. That if there appears to be a surplussage of money, over and above paying all the Town's debts and charges, when they, the said Second Precinct, shall become a separate Town, then the said Second Precinct to draw their equal proportion, according to their Valuation.

A committee was appointed to draw a petition to the General Court, consisting of Captain Gershom Nelson, Jonathan Jones and Ichabod Thayer, Jr., and in response to their petition the following act of incorporation was passed by the General Court :

#### ACT OF INCORPORATION.

STATE OF MASSACHUSETTS BAY.

IN THE YEAR OF OUR LORD ONE THOUSAND SEVEN HUNDRED AND EIGHTY.

*An Act for Incorporating the Easterly Precinct in the Town of Mendon, in the County of Worcester, into a Separate Town by the Name of Milford.*

Whereas it appears that the Inhabitants of the Easterly Precinct in the Town of Mendon, in the County of Worcester, labor under many Difficulties in their present Situation, for Remedying of which they Earnestly request they may be Incorporated into a Separate Town.

Be it therefore Enacted by the Council and House of Representatives in General Court Assembled, and by the Authority of the same that the Easterly part of the Town of Mendon, in the County of Worcester, bounded as follows, Vizt. : beginning at a heap of Stones on Bellingham Line, on the North of the Country Road, then running West, and bounded South on said Road until it comes to a Road called the eight-rod Road, now reduced to a four-rod Road, then North, and bounded westerly on said Road, as it is now Stated by the Town of Mendon, until it comes to Upton Line, thence on Upton Line to Hopkinton Line, thence on Hopkinton Line to Holliston Line, thence on Holliston Line to Bellingham Line, thence on Bellingham Line to the Bounds first mentioned—Be and hereby is Incorporated into a Town by the Name of Milford, and that the Inhabitants thereof be and they are hereby Invested with all the Powers, Privileges & Immunities which the Inhabitants of the Towns in this State do or may by Law enjoy.

And Provided Nevertheless, and be it further Enacted that the Inhabitants of the said Town of Milford shall be held to take and maintain their Proportionable part of the Poor of said Town of Mendon that are now maintained as such, or that shall be hereafter Returned from any other Town as belonging to said Mendon before the said Town of Milford was Incorporated.

And Be it further Enacted that the Inhabitants of said Town of Milford shall be held to pay their Proportionable part of all Town, County and State Taxes that are already raised, or granted, to be assessed on the Inhabitants of said Town of Mendon, or that shall be granted to be assessed on said Town of Mendon during the present Sitting of the Great and General Court, and be held to repair & Build one-half of the Bridges and mend and repair one-half the Roads on which they are bounded lying in the Town of Mendon forever.

And Be it further Enacted that all the Proprietors belonging to the Propriety of the Town of Mendon, that shall be Incorporated into the Town of Milford shall hold all their Common Rights in the Common and Undivided Lands in the Propriety of the former Township of said Mendon as though they had not been set off into a Separate Town—And their Proportionable part of the Ministry and School Money belonging to said Town of Mendon that have accrued to them by the Sale of the School and Ministry Land.

And Be it further Enacted That Joseph Dorr, Esq<sup>r</sup>., be and he is hereby directed and empowered to issue his Warrant directed to some Principal Inhabitant of said Town of Milford requiring him to warn the Inhabitants of said Town of Milford qualified by Law to Vote in Town Affairs to Assemble and meet at some Suitable time and Place in said Town, to choose all such Officers as Towns by Law are Required and empowered to choose in the month of March Annually, and to Transact all other matters & Business necessary to be done in said Town.

IN THE HOUSE OF REPRESENTATIVES, April 11, 1780.—This Bill having been read three several times, pass'd to be enacted.

JOHN HANCOCK, *Speaker*.

In accordance with the provisions of the act, Joseph

Dorr, of Mendon, issued his warrant, dated April 25, 1780, for a meeting of the town of Milford, to be held on the 1st day of May, 1780, at the meeting-house, and at said meeting Joseph Dorr was chosen moderator; Caleb Cheney, clerk; and Lieut. Jesse Whitney, Caleb Cheney, Warfield Hayward, Ebenezer Read and Stephen Albee, selectmen; and Caleb Cheney, treasurer; Lieut. Jesse Whitney, Caleb Cheney, Warfield Hayward, Ebenezer Read and Stephen Albee were chosen Committee of Correspondence; Adam Chapin, Ichabod Thayer, Jr. and Moses Chapin, assessors; Joseph Cady and Obadiah Ward, constables; Jonathan Jones and Josiah Chapin, surveyors of highways for the First District; Levi Thayer and Samuel Davis, for the Second District; Boyce Kimball, for the Third District; Dr. Elias Parkman, for the Fourth District; Captain Gershom Nelson and Captain Samuel Warren, tything-men; Capt. Ichabod Thayer, Jr., Oliver Daniell and Joseph Jones, Jr., fence-viewers; Captain Gershom Nelson, sealer of lumber; Jesse Hayward, sealer of leather; Amos Shepherdson, Nathaniel Saunders, Caleb Boynton, Jr., and Ephraim Hayward, hog-reeves; and Deacon Abijah French, deer-reeve. At this time the population of the town was about seven hundred and fifty. It had just passed with its mother town through the Revolutionary War and was in a reduced state in its financial condition, and, with the exception of one or two grist and saw and, perhaps, fulling-mills, had no industry in which its people could be employed beside that of agriculture. During the Shays' Rebellion in 1786 it remained loyal to the Government, but was so far impressed with the burdens which caused it as to be opposed to extreme measures against those who were engaged in it. On the 27th of January, 1787, after its suppression, its people voted in town-meeting "to send a petition to the General Court that those who have heretofore arisen to oppose the sitting of the Courts of Justice in several counties of this Commonwealth, and all those who are now under arms in opposition to the authority of the same, on condition they shall disperse and return to their several homes, and behave themselves peaceably in future, may not be molested in their persons or property in consequence of what they have heretofore done."

The affairs of the precinct, which, by the act of incorporation, had become a town, went smoothly on until the death of Mr. Frost, on the 11th of March, 1792. After an interval of about eight years an invitation was extended to Rev. David Long to settle as pastor, with a settlement of one hundred and fifty pounds, payable one-half in one year and one-half in two years, and an annual salary of eighty pounds. His ordination took place May 20, 1801, on a stage erected in the open air, and a large number of clergymen took part in the services. During his pastorate, which continued until his resignation, in 1844, a new meeting-house was erected. In 1819 the precinct reorganized itself, according to the forms of law, as a

parish, and, in opposition to the claim of the town that the meeting-house was a municipal possession, demolished the old structure and built a new one on its site. On the 15th of November the parish accepted the house from the architect, and, by the sale of pews, raised a fund more than sufficient to defray its cost. On the 25th of November the meeting-house was dedicated.

Rev. Smith Bartlett Goodenow, the next pastor, was installed October 20, 1844, and dismissed January 1, 1846. He was followed by Rev. Preston Bird, who was installed May 24, 1849, and dismissed February 16, 1852. Rev. James Trask Woodbury succeeded and served from his installation, July 15, 1852, until his death, January 16, 1861. The successor of Mr. Woodbury was Rev. Alfred A. Ellsworth, who was ordained September 4, 1862, and dismissed June 28, 1865. Rev. James B. Thornton, who succeeded Mr. Ellsworth, was installed November 22, 1865, and resigned January 28, 1868. Rev. Sylvester C. Kendall followed, and served five years from his installation, August 5, 1868, until his dismissal, June 12, 1873. Rev. Dr. Merrill Richardson was installed June 12, 1873, and died December 12, 1877, being succeeded by Rev. Oliver S. Dean, who was installed September 20, 1877. The present pastor is Rev. Webster Woodbury, who was preceded by Rev. Charles L. Wetherby. In 1867 and 1868 the meeting-house of the parish was removed to the present site, and enlarged and remodeled. Its dedication occurred on the evening of the day of the installation of Rev. Mr. Kendall, August 5, 1868. The cost of the improvements, with a new organ, was a little in excess of twenty-six thousand dollars.

During the life of the Second Precinct only the Congregational Society existed within its limits. In 1781, the first year of the incorporated town, Universalism made its appearance and Rev. Adams Streeter began to preach, holding services once a month. The earliest members of the Universalist Society appear to have been Samuel French, Noah Wiswall, Ebenezer Sumner, John Claffin, Caleb Boynton, Samuel Bowker, Ebenezer Wheelock, Ebenezer Sumner, Jr., Nahum Clark and David French. Meetings were held in the houses of the several members of the society, and Mr. Streeter continued his regular monthly ministrations until his death, September 22, 1786. On the 28th of December, 1787, the society formally adopted and subscribed a religious compact, but had no regular preaching until May 31, 1790. At that date Rev. Zephaniah Lathe was engaged for monthly services and continued his engagement until 1797, and was followed until 1821 by Rev. Joshua Flagg, Rev. Nathaniel Smith, Rev. Richard Carrique, Rev. Caleb Rich and others. During the year 1820 a brick church was erected, and dedicated January 10, 1821. The society was incorporated December 6, 1824. The succession of ministers as given by Mr. Ballou, in his valuable "History of Milford," has been as follows: Rev. Thomas Whitte-

more, 1821 to 1822; Rev. Jacob Frieze, from 1822 to 1824; Rev. Adin Ballou, from 1825 to 1831; Rev. Elbridge Wall, 1833; Rev. Rufus S. Pope, 1835; Rev. H. W. Morse, 1837; Rev. Z. Baker, 1838; Rev. William Bell, 1841-42; Rev. William R. G. Melli, 1843; Rev. Benjamin H. Davis, 1844-46; Rev. William Coe, 1847; Rev. Willard Spaulding, 1848; Rev. Henry A. Eaton, 1849-53; Rev. David H. Plumb, 1853-54; Rev. James R. Johnson, 1855-60; Rev. George Hill, 1860-65; Rev. Russell P. Ambler, 1865-66; Rev. Gerherdus L. Demarest, 1867-73; Rev. Edward A. Perry, 1873-78; Rev. Royal T. Sawyer, 1878. The present pastor is Rev. Samuel A. Gardner. On the 2d of March, 1850, a church organization was formed within the society, and during the winter of 1850 and 1851 the meeting-house in which the society now worships was erected, and dedicated May, 1851, on which occasion Rev. Hosea Ballou preached the sermon.

A Methodist Society was organized in the North School-house August 28, 1811. There had been occasional preaching in the north part of the town since 1792, and at various times Rev. George Cannon, Rev. John Harper, Rev. George Pickering, Rev. Joseph Snelling, Rev. Joshua Soule and Rev. Nehemiah Coy had officiated. In 1815 a meeting-house was built near the North Purchase School-house, as it stood at that time, but after a few years the society languished, and in 1860 the meeting-house was burned. After 1811 the succession of ministers appears to have been: Rev. Isaac Bonney, 1811-18; Rev. Erastus Otis, 1820-22; Rev. Hezekiah Thatcher, 1823; Rev. Herman Perry, 1825; Rev. Thomas W. Tucker, 1826; Rev. O. Robbins, 1833; Rev. Alexander T. Temple, 1835; Rev. Nathaniel Spindel, 1836; Rev. John Dale, 1837-38; Rev. Lorenzo Johnson, 1839; Rev. Thomas Johnson, 1839; Rev. William Tozer, 1840-43; and others.

In 1836 the Methodists of the central village were permitted to occupy the Town Hall for religious services. A society was organized in 1844, and in 1849 a meeting-house and parsonage were built, the latter at the expense of Lee Claffin, a brother in the church. In 1864 the meeting-house was enlarged and improved. The succession of ministers has been: Rev. Henry E. Hempstead, 1846-47; Rev. Joseph Whitman, 1848-49; Rev. C. W. Ainsworth, 1850-51; Rev. Albert A. Cooke, 1851; Rev. Isaac Smith, 1852-53; Rev. Aaron D. Sargeant, 1854-55; Rev. Daniel Richards, 1856; Rev. J. M. Baily, 1857-58; Rev. George G. Jones, 1859-60; Rev. Edward S. Best, 1861-62; Rev. Joseph Scott, 1863-65; Rev. William G. Leonard, 1866; Rev. Lazarus Crowell, 1867-68; Rev. William H. Hatch, 1869-71; Rev. Rodney H. Howard, 1872-75; Rev. Porter M. Vinton, 1875-77; Rev. Geo. F. Eaton, 1877; Rev. Charles Young, 1880. The present pastor is Rev. Charles Tilton.

Though there are evidences of the existence of those holding to the Baptist faith in Milford as early

as 1785, no Baptist Society was organized until February 15, 1853. The Pine Street Baptist Church was recognized by an ecclesiastical council on the 10th of March, on which occasion a sermon was preached by Rev. N. Colver. Rev. J. W. Russell was the first pastor, and remained until October 22, 1854. On the 29th of August, 1855, Rev. Levi A. Abbott was ordained, and continued his services until April, 1858. Rev. Horace G. Hubbard was ordained September 22, 1858, and left July 16, 1859. Rev. Joseph Ricker followed January 1, 1861, and remained until 1865. During his pastorate the meeting-house of the society was built and dedicated July 18, 1861. Mr. Ricker was followed in short pastorates by Rev. Mr. Paige, Rev. Wm. Carr and Rev. Mr. Reding, until 1874, when Rev. Julius B. Robinson was settled, and continued his services until June, 1879. On the 19th of September, 1879, Rev. E. A. Woodsum was ordained, on which occasion Rev. Dr. O. S. Stearns, of the Newton Theological Institution, preached the sermon. The successors of Mr. Woodsum have been Rev. Spencer H. Albert and the present pastor, Rev. R. W. Farr.

Trinity Parish, of the Protestant Episcopal Church, was organized in April, 1864, and was duly incorporated in the following May. Its services were held in Washington Hall until the erection of its church, which was consecrated March 21, 1871. At the consecration a sermon was preached by Bishop Manton Eastburn. The officiating clergymen of this church have been Rev. Henry Adams, 1864; Rev. George G. Jones, 1865-68; Rev. E. B. Allen, 1869-70; Rev. Reginald H. Howe, 1871-72; Rev. John M. Benedict, 1873-74; Rev. William F. Lloyd, 1876-77; Rev. George R. Wheelock, 1878-79; Rev. William James Alger, 1881, and the present pastor, Rev. John B. Wicks.

Roman Catholicism in Milford dates its birth at a visit of Rev. James Fitton, of Boston, who solemnized Mass at the house of Edward McGovern in 1836. In 1847 Rev. John Boyd began to gather a society and to hold regular Sabbath services. In 1848 a church edifice was built in what was formerly the pasture of Noah Wiswall, and consecrated as "St. Mary's Church" in that year by Right Rev. Bishop Fitzpatrick, on which occasion Father Mathew preached a sermon. Rev. George A. Hamilton began his services as the first regular pastor March 1, 1850, and was succeeded by Rev. Michael Carohen in 1853 and Rev. Edward Farrelly in 1854. Rev. Patrick Cuddihy succeeded Mr. Farrelly in 1857, during whose pastorate the present church of the society was built and opened for public worship December 25, 1870. The church contains the organ of the Old South Church of Boston, which was bought in 1878. The old church was in some way disposed of and removed.

For a sketch of the Hopedale Community and the Hopedale Church, since April 7, 1886, the date of the incorporation of the town of Hopedale, beyond

the limits of Milford, the reader is referred to the history of Hopedale in these volumes.

The educational interests of the town may with propriety be considered as next in importance to those of a religious character. In 1784 the town was divided into eight districts. In 1799 these districts were readjusted, and in 1802 reduced in number to six. In 1829 the number was increased to seven. In 1836 an eighth district was formed in the northeasterly part of the town, and in 1841 another adjustment was made, and the town divided into eleven districts. In 1847 a twelfth was formed. In 1850 a High School was established, and a graded system of schools adopted as far as was practicable, thus necessitating further changes in the districts. Finally on the 25th of May, 1853, a committee, consisting of Leander Holbrook, J. T. Woodbury, C. F. Chapin, Henry Chapin, A. J. Sumner, Nelson Parkhurst and Adin Ballou was appointed to consider and report on the expediency of abolishing the district system, and in accordance with their report the system was abolished.

Before the incorporation of the town such schools as there were within the territory of Milford were probably kept in private houses. On the 1st of March, 1791, the town voted "to raise £240 to build and repair school-houses in the Town of Milford, and each District to pay their own cost." At this date, therefore, it seems to be certain that there were school-houses in the town, which had probably been built not long after the creation of districts, in 1784. It is not proposed to recite the successive steps taken by the town and districts in building houses and developing the system of education.

At the time of the abandonment of the district system there was no school-house in Hopedale District, No. 12.

The school-houses in the other eleven districts were valued by the selectmen as follows :

Old No. 1, near Widow (Amasa) Parkhurst's.....	\$450
No. 2, near brick church.....	1500
No. 3, old academy.....	1500
No. 4, near Obed Daniels'.....	375
No. 5, Bear Hill.....	375
No. 6, South Milford.....	150
No. 7, city.....	400
No. 8, Silver Hill.....	516
No. 9, North Purchase.....	550
No. 10, (Fountain Street) near Crosby's.....	500
No. 11, (Deer Brook) Wild Cat.....	275

According to the last annual report of the School Committee, there were seventeen schools in the town, supported at an expense of \$21,227.01. The number of children in the town, between five and fifteen years of age, at the date of the report, February 13, 1888, was 1529, and the average number of children belonging to the schools in the year 1887 was 1267. Besides the day-schools, there was an evening-school, with an enrollment of fifty-five scholars.

In connection with the public schools mention should be made of the Milford Academy. It was incorporated February 11, 1828, with a capital of

\$1650, divided into thirty-three shares of fifty dollars each. It was in operation from 1828 to 1841, when it was sold to District No. 3, and became the property of the town on the abandonment of the district system. Its preceptors at various times were Ira Cleveland, Jr., Henry Mellen Chamberlain, Charles Thurber, Mr. Moore, Mr. Gorman, Mr. Wilmarth, Daniel Perry, Miss Clark and Charles R. Train.

The Town Library, re-enforcing as it does the educational system of the town, should be referred to at this point in our narrative. At a meeting held on the 30th of August, 1858, the following resolutions, offered by Mr. Edwin Battles, were adopted by the town :

1st, That the town do establish and maintain a public library under the statute of 1851, chapter 305.

2d, That the town do appropriate the full sum of money which it is by law authorized to grant, to establish a public library ; to wit, as many dollars as there were ratable polls in Milford in the enumeration of 1857.

3d, That the town proceed to choose a board of thirteen trustees, who shall have full authority to do all legal and necessary acts, to purchase a town library, to make by-laws, and appoint officers for the same, with power to fill all vacancies in their own body ; and this board shall continue in office till the next annual March meeting, and until others are chosen in their stead.

4th, That all by-laws proposed by said trustees shall be submitted to the town for its ratification.

5th, The following named persons were chosen said trustees : Andrew J. Sumner, Elias Whitney, John G. Gilbert, H. B. Staples, B. Wood, George W. Stacy, Francis Leland, Edwin Battles, H. H. Bowers, Daniel S. Chapin, J. R. Davis, Charles C. Johnson and Dwight Russell.

6th, That the treasurer of the town be authorized to borrow the sum of one thousand dollars for the purchase of books and for fitting up a room or rooms for the town library, and hold the same subject to the order of the selectmen.

7th, That the selectmen draw the money for the town library at the request or order of the trustees of the same.

The trustees proceeded with the necessary steps of organization, and reported to the town a code of by-laws, rules and regulations, which were ratified at a legal meeting, November 8, 1858. The library receives an annual appropriation from the town for its support, and, according to the last annual report, contained seventy-six hundred and thirty-five volumes.

Among the educators of the people, the newspapers of the town must not be overlooked. There are three weekly newspapers,—the *Milford Gazette*, conducted by G. M. Billings; the *Milford Journal*, conducted by Cook & Sons, and the *Times*, conducted by J. P. Gallagher. There are also two daily papers,—the *Journal*, conducted by Cook & Sons, and the *News*, conducted by Mann & Leahy.

## CHAPTER CLXI.

### MILFORD—(Continued.)

#### BOUNDARIES—THE REVOLUTION.

THE boundary lines of Milford have at different times been changed, sometimes by adjustments of old

lines and sometimes by absolute alterations provided for by law. In 1794 a readjustment of the line between Milford and Mendon became desirable, and for that purpose committees were chosen by the two towns. The report of the joint committees, made on the 29th of November in that year, was accepted by the town March 3, 1795. The committee reported that they "met and settled the line between the town of Mendon and Milford (over the North Hill, so called); beginning at a heap of stones, being the southeast corner of Paul Nelson's land; thence North 37 rds; East 40 Rods to a Walnut Tree with a heap of stones round it; thence South,  $26\frac{1}{2}$  Ds. East, 196 Rods to a White Oak Tree, being the Northeast Corner of Seth Davenport's land, on the south side of the Road leading from the widow Tyler's to Milford. Philip Ammidon, Seth Chapin, Luke Aldrich, Committee of Mendon. Ephm. Chapin, Ichabod Thayer, Jr., Committee of Milford."

At the same meeting the town accepted the report of a committee concerning the Upton line, which involved an exchange of certain small parcels of land. In 1835 an act of the General Court altered the line between Milford and Hopkinton and Holliston, and annexed some territory, with the families living on the same, to Milford. The act provided,—

That the dividing lines between the towns of Milford, Holliston and Hopkinton shall be altered, and shall hereafter be established as follows, to wit: beginning at a heap of stones on the line between the towns of Milford and Hopkinton, at the road near the dwelling-house of Samuel McFarland; thence easterly about one and three-fourths miles to a stone monument by the side of Deer Brook, so-called; thence north, sixty and a half degrees east, twenty-five rods on the line between Hopkinton and Holliston; thence due south until it comes to the line between Holliston and Milford; and that part of said Milford which lies north of the first-mentioned line, shall hereafter belong to Hopkinton, in the county of Middlesex; and that part of Hopkinton, which lies south of said first-mentioned line, shall hereafter belong to Milford, in the county of Worcester; and that part of said Holliston, which lies west of the last-mentioned line, shall hereafter belong to said Milford.

Still another alteration was made by an act of the General Court passed April 1, 1859, which provided that—

The dividing line between the towns of Milford and Holliston shall be altered, and shall hereafter be established as follows, to wit: beginning at a point on the lines between the towns of Holliston and Hopkinton, sixty-four rods easterly from the northwest corner of Holliston, and running southerly until it comes to a point on the line between the towns of Holliston and Milford, 132 rods and 15 links easterly from the southwest corner bound of Holliston; and that part of Holliston, which lies west of the above described line, shall hereafter be annexed to and belong to the town of Milford.

The last alteration was made by the act of the General Court passed April 7, 1886, incorporating the town of Hopedale. The first section of that act describes the new town as—

All that territory now within the town of Milford comprised within the following limits, that is to say beginning at a point in the westerly part of Milford, a short distance north of West Street, where the Upton line leaves Mill River; thence following the centre of said River to and across West Street to a stone monument, half way between the arch of the culvert over said river; thence south thirty-nine degrees five minutes East about eight thousand four hundred eighty-five feet to a stone monument in a wall dividing the land of Delano Patrick and

Frank Kilcline; thence along said wall south fifty-eight degrees forty-five minutes East about three hundred thirty six feet to a stone monument in the northwesterly line of Freedom Street; thence south thirty-five degrees fifteen minutes East about three thousand six hundred twenty-six feet to a stone monument at the corner of Main and Aden Streets; thence south thirty three degrees five minutes East about one thousand two hundred and twelve feet to Green Street; thence continuing on said course about two thousand four hundred fifty-six feet to a stone monument; thence south seventy-six degrees thirty minutes East about eight hundred twenty-five feet to the southeast corner of Howard and South Main Streets; thence continuing in the same course about one thousand six hundred forty-two feet to the centre of Charles River; thence following the centre of said River in a southerly direction to the town line between Milford and Bellingham; thence following said town line in a southerly direction to the junction of the towns of Milford, Mendon and Bellingham; thence following said Mendon line to its junction with Upton; thence following the Upton line to the point of beginning.

By the incorporation of Hopedale, the town of Milford lost about thirteen hundred of its population.

With regard to the part performed by the town of Milford in the Revolutionary War it is difficult to make any precise statement. At the time of its incorporation, in 1780, the war was in its fifth year, and many of its people were already in the service to the credit of the mother town. At the beginning of the war there were companies of minute-men in the town of Mendon, two of which were largely constituted of men from the Second or Easterly Precinct. The rolls of these companies,—the second and fourth companies of Mendon,—a large number of whom were Second Precinct men, are as follows:

*Second Company.*

Dr. Wm. Jennison, capt.	Samuel Cobb, lieut.
Caleb Cheney, lieut.	Adams Chapin, sergt.
—— Jones, sergt.	Wm. Jennison, Jr., sergt.
Josiah Brown, corp.	John Gibbs, sergt.
Samuel Bowditch.	Sheffield Partridge, corp.
Joseph Gibbs.	Asa Albee, corp.
John Hayward.	Wm. Lesure, corp.
Jesse Hayward.	Samuel French, drummer.
Jona. Hayward.	David French, fifer.
Jacob Hayward.	Edmund Bowker.
Joshua Hayward.	Samuel Davis.
Warfield Hayward.	Ebenr. Davis.
Joseph Jones, Jr.	Aaron Davis.
John Jones.	Wm. Cheney.
Abraham Jones, Jr.	Benjamin Norcross.
Eli Partridge.	Henry Nelson.
Seth Thayer.	Amos Shepherdson.
Josiah Wheelock.	Abraham Stearns.
Wm. Ward.	Eli Whitney, Jr.
Daniel White.	Samuel Warren.
Benjamin Vickery.	

The other Mill River company, numbered "the Fourth Company of Mendon," consisting of the following-named officers and men:

Gershom Nelson, capt.	James Albee.
Jesse Whitney, lieut.	Ephraim Chapin.
Josiah Nelson, lieut.	Enoch Perry.
Moses Chapin, sergt.	Darius Sumner.
Simeon Wiswall, sergt.	Levi Hayward.
Joseph Cody, sergt.	Nathan Beal.
Nathl. Parkhurst, corp.	Gershom Twitchell.
Ephraim Parkhurst, corp.	Levi Legg.
Levi Thayer, corp.	Samuel Jones.
Daniel Legg, corp.	Daniel Chapin.
Ichabod Nelson, corp.	Isaac Littlefield.
Gershom Legg.	Moses Gage.
Robert Corbett.	Isaac Chapin.

Ebenezer Read.  
Jonas Parkhurst.  
Elisha White.  
John Robinson.  
Aron Merrifield.  
Stephen Chapin.  
Daniel Wedge.  
Ichabod Corbett.  
Daniel Hayward.

David Chapin.  
Samuel Thayer.  
David Legg, Jr.  
Alexander Wheelock.  
James Sprague.  
Jonas Twitchell.  
Darius Holbrook.  
Silas Brooks.  
Josiah Kilburn.

These Mendon companies marched to Cambridge after the battle of Lexington. Of these, many enlisted as three months' men into the regular army, and among them appear the following Mill River names:

Samuel French, sergt.  
Amos Shepherdson.  
David French.  
James Sprague.  
Benjamin Vickery.  
Asa Albee.  
Edmund Bowker.  
Samuel Cobb, capt.  
Peter Corbett, corp.  
Wm. Cheney.  
Wm. Legg.  
Wm. Lesure.  
Jona- Twitchell.  
Samuel Thayer.  
Joel Thayer.  
Joseph Cody, lieut.  
Adams Chapin, sergt.

Isaac Chapin.  
Josiah Chapin.  
Jno. Dewing.  
Wm. Brown.  
Aaron Davis.  
Samuel Davis.  
Robert Mingo (a negro man).  
Henry Nelson.  
Daniel Norcross.  
Benjamin Norcross.  
Sheffield Partridge.  
Joseph Passmore.  
Aquilla Ramsdell.  
Daniel White.  
Jona. Whitney.  
Elias Whitney.  
Samuel Warren, capt.

Upon the incorporation of Milford the two towns made equitable division of their arms, ammunition, and military responsibilities then existing. The action taken by Milford after its incorporation is indicated by the following votes:

1780, June 26th.—It was voted that the town assume payment of all fines imposed on its officers for delinquencies in filling the draft.

Sept. 11th.—Voted to give each soldier that marched to R. I., upon the late alarm, twelve days, a thousand dollars.

Oct. 2d.—It was voted that the selectmen pay out of the town's money "for the clothing called for by the State, if it cannot be got from the State before the creditors want their money."

Oct. 16th.—"Voted that Capt. Saml. Warren, Jno. Robinson and Obadiah Wood be a Committee to procure the beef called for by the State, and deliver it to Jacob Davis, Esq., agent for that purpose in Charlton."

Oct. 16th.—"Voted that Ebenr. Holbrook, Capt. Gershom Nelson and Capt. Ichabod Thayer be a Committee, in conjunction with the Selectmen) to procure the articles for the soldiers that the Selectmen have given security for."

Dec. 25th.—Voted that Capt. Saml. Warren, Ebenr. Holbrook and Lt. Joseph Cody be a com. to procure beef, or money in lieu of beef, at the town's cost, agreeable to a resolve of Gen. Ct., passed Dec. 4, 1780.

Dec. 25th.—Voted to raise \$15,000 to procure beef.

1781, Jan. 8th.—Voted to raise 1,000 hard or silver

dollars for the purpose of hiring ten soldiers for 3 years, or during the war.

May 14th.—Voted that Dea. Gideon Albee, Josiah Wheelock, Lt. Seth Thayer, Obadiah Wood and Lt. Joseph Gibbs be a com. to hire soldiers the ensuing year.

Aug. 20th.—Voted to risk, as a Town, the fine for the 2 Continental men said Town is delinquent in raising.

Dec. 5th.—Voted that Seth Nelson and Daniel Wedge, Constables, be the men to hire the remaining part of the Continental men. Voted £160 to hire said men.

1782, March 18th.—Voted to raise £150 forthwith for the purpose of hiring 4 Continental soldiers for 3 yrs., and that no town order "should answer this Rate."

During the War of 1812, when it was thought that Boston was in danger, the State militia was called into service, including the Milford Artillery Company, which continued in service two months. The following is the roll of the company in camp at South Boston, September 12, 1814:

Rufus Thayer, capt.	Lewis Hayward, corp.
Ezra Nelson, lieut.	Calvin Johnson, corp.
Henry Nelson, lieut.	Clark Sumner, corp.
Levi Rockwood, sergt.	Levi Saunders, mus.
Clark Ellis, sergt.	Moses Littlefield, mus.
Samuel Nelson, Jr., sergt.	Ethan Weston, mus.
Leonard Chapin, sergt.	James Bowker, mus.
Isaac Davenport, corp.

When the War of the Rebellion broke out the first meeting to consider matters in relation to the war was held on the 13th of May, 1861, at which Aaron C. Mayhew, Obed Daniels, Winslow Battles, J. C. Scammell, A. C. Withington, F. A. Johnson and A. W. Walcott were appointed to consider and report a "plan of procedure in relation to the course the Town should adopt in respect to the war." This committee, reported that the town appropriate three thousand dollars to equip the soldiers of Milford who have enlisted, and for incidental expenses; two thousand dollars for a contingent war fund; and ten thousand dollars to pay State aid to soldiers' families, and for other purposes. One dollar a day was allowed to each person "belonging to Company A," while engaged in drilling. The report was accepted;

and James R. Claffin, Elias Whitney, John Morris, Edwin Battles and Freeman Walcott were chosen "to carry out the recommendations contained in the report." On the 11th of June provision was made for the payment of State aid to the families of soldiers, and to parents, brothers and sisters dependent upon them; the whole, for both, not to exceed twenty dollars a month to each family and dependents of a soldier. December 9th six thousand dollars were appropriated for State aid to soldiers' families.

On the 31st of March, 1862, twenty thousand dollars were appropriated for aid, during the year, to the families and dependents of volunteers belonging to Milford, and the following resolutions were unanimously adopted:

*Resolved*, By the inhabitants of the town of Milford, in legal town-meeting assembled, that we have heard with pride of the heroic conduct of the officers and soldiers of Company B, Twenty-fifth Regiment Massachusetts Volunteers, and our other fellow-citizens of Milford engaged in the battles of Roanoke and Newbern.

*Resolved*, That our thanks are due to an overruling Providence, and our congratulations to our fellow-citizens in the fields aforesaid; that amid perils by sea, in the camp and in the shock of battle, so few have paid for their patriotism with their lives; that the patient endurance of these, our fellow-citizens, their unflinching courage and their glorious victories, will live forever in the history of the town of Milford.

*Resolved*, That we tender them our congratulations, that, as members of the Twenty-fifth Regiment, and bearers of the flag, they were the first to raise the flag of our old Commonwealth over the batteries of the enemy at Newbern.

*Resolved*, That we tender to the friends of those who have fallen in the service our heartfelt sympathies, with the assurance that the names of the fallen will ever be held in honored memory.

*Resolved*, That these resolutions be recorded in the town records, and a copy of the same be sent to Capt. Willard Clark, commanding said company.

On the 20th of July the selectmen were authorized to pay a bounty of one hundred and twenty-five dollars for each volunteer who shall enlist for three years, and be credited to the quota of the town and to open a recruiting-office in the town. A bounty of one hundred and twenty-five dollars was also directed to be paid to volunteers for nine months' service.

On the 9th of June, 1864, the bounty to persons enlisting for three years was fixed at one hundred and twenty-five dollars, and twelve thousand dollars were appropriated to pay the same. Provision was also made to give the returning soldiers belonging to the town a public reception by the citizens.

Milford furnished one thousand one hundred and forty-two men for the war, which was a surplus of one hundred and thirty-two over and above all demands. Twenty-five were commissioned officers. The whole amount of money appropriated and expended by the town on account of the war, exclusive of State aid, was sixty-two thousand six hundred dollars (\$62,600).

The amount of money paid by the town during the war for State aid to soldiers' families, and repaid by the Commonwealth, was as follows: In 1861, \$6,419.86; in 1862, \$20,500; in 1863, \$22,715.76; in 1864, \$28,000; in 1865, \$18,500. Total amount \$96,135.62.

The following is a list of soldiers furnished by Milford during the war:

Charles O. Adams, wagoner, enl. in Co. F, 36th Regt., for three years.  
 Orrick H. Adams, corporal, enl. in Co. F, 36th Regt., for three years.

 John Sullivan.....killed at Fredericksburg Dec. 13, 1862  
 Simeon Sullivan.....killed at Antietam  
 Michael Sullivan.....died at Andersonville Oct. 9, 1864  
 John J. P. Swan.....died June 26, 1862  
 Dennis Sweeny.....killed at Fredericksburg Dec. 13, 1862  
 George W. Sweet.....died of wounds June 17, 1864  
 Jotham L. Tyler.....died at Crab Orchard, Ky., Sept. 7, 1863  
 Orrin S. Tyler.....killed at Petersburg June 23, 1864  
 Thomas Tienan.....died Jan. 16, 1862  
 Albert H. Tucker.....died in North Carolina Jan. 21, 1862  
 Harrison T. Walcott.....killed in Wilderness May 5, 1864  
 Patrick Wallace.....died at Andersonville July 14, 1864  
 Robert Wallace.....killed in Wilderness May 6, 1864  
 Hosea Warren.....died at Danville Oct. 1, 1864  
 Thomas Welsh.....killed at White Oak Swamp June 30, 1862  
 Walter Wilkinson.....killed at Williamsburg May 5, 1862  
 Dan'l Williams.....died at Roanoke Island of wounds May 10, 1862  
 Daniel Wynn.....killed at Antietam Sept. 17, 1862

The list of soldiers is a long one, and contains

some who won distinction and lasting fame. The names of Draper and Underwood will be inscribed with that of Scammell on the page of history, and illumine for generations the annals of the town.

## CHAPTER CLXII.

### MILFORD—(*Continued.*)

It is, of course, impossible, in the limited space allotted to this sketch, to specify the different establishments which contribute to the industrial interests of Milford. It must be sufficient to refer to their general character and the progress they have made in the hands of accomplished and enterprising men. Fifty years ago the industries of the town were confined to a small cotton-mill, the manufacture of something over one hundred thousand pairs of boots, a small tannery and other smaller enterprises, all of which yielded a product not exceeding two hundred and seventy-five thousand dollars. In 1845 this product had increased to perhaps three hundred and fifty thousand. In 1855, with the facilities for business which railroad communications with Boston had developed, it had increased to nearly two millions of dollars. The value of boots and shoes alone manufactured in the town had risen from a little over one hundred thousand dollars in 1835 to more than a million and a half. At the present time, though the boot and shoe business is temporarily dull, the enterprise and prosperity of the town have more than held their own, notwithstanding the incorporation of the town of Hopedale, which had been one of its most industrious and active districts.

The establishments of Colburn, Fuller & Co., Charles W. Shippee, Claffin & Thayer, James S. Kelley, Charles F. Quiggle and R. E. Foster & Co., in the shoe business; of Benjamin H. Spaulding and Jones & Wilkinson, straw-goods manufacturers; the granite quarries of the Milford Granite Company, Norcross Brothers, Theodore Sherman, John Cuddihy and Robert Ross and other smaller industries too numerous to mention give the town an air of prosperous activity and substantial wealth.

Among the institutions and corporations which have both contributed to the prosperity of the town and been rendered necessary by it, are the Milford National Bank, the Milford Savings Bank, the Home National Bank, the Milford and Woonsocket Railroad Company, the Milford and Hopkinton Railroad, the Milford Gas Company and the Milford Water Company. There are in addition the usual volunteer associations found in our larger towns, having for their object either social, literary or philanthropic purposes. Among these are the Montgomery Lodge of Free and Accepted Masons, chartered in 1797; the Mount Lebanon Royal Arch Chapter, char-

tered in 1824; the Milford Commandery of Knights Templars, chartered in 1859; the Masonic Mutual Relief Society; the Tisquantum Lodge, No. 46, Independent Order of Odd Fellows, chartered in 1844; the Quinshepaug Encampment, No. 20, chartered in 1867; the Knights of Pythias, Bay State Lodge, No. 51, organized in 1870; Division No. 7, of Ancient Order of Hibernians; the Improved Order of Red Men, Oghneta Tribe, No. 15; the Daughters of the Forest; the Milford Lodge of Knights of Honor, No. 692, organized in 1887; Fidelity Lodge, No. 21, Independent Order of Good Templars, instituted in 1863; Elmwood Lodge, No. 129, instituted in 1872, and a Catholic Temperance Association, organized in 1859; the Major E. F. Fletcher Post 22, of the Grand Army, and the Royal Arcanum, Nipmuck Council, No. 907.

Among the men of Milford who have given distinction to the town there are those who must not be overlooked in this narrative. The first to be mentioned, as well in distinction as in point of time, must be General Alexander Scammell. He was the son of Dr. Samuel Leslie Scammell, and was born in 1744 in that part of Mendon now Milford. He graduated at Harvard in 1769, in the class with Theophilus Parsons, William Tudor, Peter Thacher, Peleg Wadsworth and James Winthrop. Immediately after leaving college he taught a public school in Plymouth two years, and then removed to Portsmouth, New Hampshire, where he studied law and occupied himself somewhat with the business of a surveyor. In August, 1772, he served in some capacity on board the armed sloop "Lord Chatham," bound from the Piscataqua River to Boston with plans, reports and dispatches for the lords of the treasury. In 1775 he was appointed brigade major of the New Hampshire militia, and in 1769 colonel of the Third New Hampshire Regiment, and was wounded at the battle of Saratoga. He rose to the rank of adjutant-general in the army, and at the siege of Yorktown, on the 30th of September, 1781, he received a wound, of which he died in Williamsburg in the following month. A stone was erected over his grave bearing this inscription, selected from Humphrey:

"Which conquering armies from their toils returned,  
Reared to his glory, while his fate they mourned."

Rev. Stephen Chapin was born in Milford, November 4, 1778, and died in Washington, October 1, 1845. He graduated at Harvard in 1804 and received the degree of Doctor of Divinity from Brown University in 1822. He was first settled in Hillsborough, New Hampshire, and afterwards in Mt. Vernon in the same State. He was also settled for a time at North Yarmouth, Maine, and in 1822 was appointed Professor of Theology in Waterville College. In 1828 he became president of Columbian College, at Washington, and resigned in 1841, four years before his death.

Horace B. Claffin, son of John Claffin, was born in

Milford, December 18, 1811. He began his business life in a dry-goods store in his native town, but afterwards removed to Worcester, where he established a successful firm. In 1843 he removed to New York and for many years was the senior partner in the well-known house of Claflin & Mellen. After the retirement of Mr. Mellen the large business of the firm was carried on under the title of H. P. Claflin & Co. In one year it is within the writer's knowledge that the sales of the house reached seventy millions of dollars. Under the clouds of the war and the shadows of various financial crises the house of H. P. Claflin & Co. was sometimes staggered and threatened with disaster; but through all its losses it went successfully on and under the management of the sons of Mr. Claflin it still rears its head proudly among the largest business houses in the land.

Adin Ballou Underwood, son of Orison and Hannah (Bond Cheney) Underwood, was born in Milford, May 19, 1828, and graduated at Brown University in 1849. He was admitted to the Worcester County bar in 1853, and two years later removed to Boston. In April, 1861, he was commissioned captain in the Second Massachusetts Infantry Regiment, and in September, 1862, became colonel of the Thirty-third Regiment. He was engaged in the battles of Fredericksburg, Chancellorsville, Gettysburg and Lookout Mountain, in the last of which he was disabled by serious wounds from further military service. In November, 1863, he was made brigadier-general, and in September, 1865, was brevetted major-general.

For many years he occupied the office of surveyor in the Boston Custom House, and is now living in Milford, beloved and respected by his fellow-citizens and honored by all who know him.

Aaron Claflin Mayhew was the son of John and Nancy (Freeland) Mayhew, and was born in Hopkinton, July 22, 1812. He removed to Milford in 1829, and learned the tanner's trade with Hon. Lee Claflin. In 1835 he formed a partnership with David S. Godfrey for the manufacture of leather, and afterwards of boots and shoes. After the death of Mr. Godfrey, he formed a partnership, in 1853, with George W. Howe and John S. Leland, under the title of A. C. Mayhew & Co. After the death of Mr. Leland, in 1857, Sullivan C. Sumner took his place. Mr. Mayhew was president of the Milford National Bank from the time of its original establishment, in 1854, until his death, and represented his town in the House of Representatives and his district in the Senate. He was also a member of the Governor's Council two years, during the administration of Governor Banks. His death, which was sudden, occurred September 26, 1880.

William Claflin is the son of Hon. Lee and Sarah (Adams) Claflin, and was born in Milford, March 6, 1818. Though largely and successfully engaged for many years in Boston in the shoe and leather business, he is more popularly known as a politician and

public officer. He was a member of the House of Representatives from 1849 to 1852, a member of the Senate in 1860-61 (and in the latter year its president), Lieut.-Governor from 1866 to 1869 and Governor from 1869 to 1872. He has been also a member of Congress, and with all these honors in the past he is still vigorous in body and mind and the recipient of universal respect.

Rev. Adin Ballou, though not a native of the town, has been so long a resident, and by his authorship of the "History of Milford" has so closely identified himself with its interests, that he should be mentioned among those who make up its roll of honor. Mr. Ballou is descended from Maturin Ballou, who came to New England and settled in Providence Plantation about 1640. He is the son of Ariel and Edilda (Tower) Ballou, and was born in Cumberland, Rhode Island, April 23, 1803. In 1822 he was converted to the doctrines of Universalism. In 1823 he preached to several Universalist congregations in Mendon, Bellingham and Medway, and to the First Universalist Society in Boston. In April, 1824, he was settled over the Universalist Society in Milford, and in 1827 over the Prince Street Society in New York. In July 1828, he resumed his position in Milford, which he held until 1881, when he took charge of the First Congregational Parish in Mendon. In 1842 he removed to Hopedale, to make, with others, "the experiment of establishing a fraternal community on the true Christian basis." The history of the Hopedale Community and the connection of Mr. Ballou with its career may be found thoroughly narrated in the "History of Milford," of which he is the author. Mr. Ballou has been through life an active thinker and reformer, and has been also a prolific writer. He is now living in Hopedale, resting from his labors at the age of eighty-six, and, as he says himself, "confidingly as well as contritely, he casts himself for final disposal into the bosom of God's forgiving love as manifested through his blessed Son."

William Franklin Draper is the son of George and Hannah (Brown Thwing) Draper, and was born in Lowell, April 9, 1842. He was a draughtsman by occupation and he enlisted as a private, September 5, 1861, in Company B, Twenty-fifth Massachusetts Regiment, for three years. He was promoted to second lieutenant October 11, 1861; to first lieutenant April 15, 1862; to captain in the Thirty-sixth Regiment August 12, 1862; to major August 17, 1863; to lieutenant-colonel May 6, 1864; and to brevet brigadier-general October 12, 1864. He was engaged in battles at Roanoke Island in February, 1862, at Newbern in March, 1862, at Fort Macon in the same year, at Fredericksburg in December, 1862, at Vicksburg in July, 1863, at Jacksonville in July, 1863, at the Wilderness and other battles during the last Virginia Campaign, and was discharged in October, 1864, at the expiration of his term of service. General Draper is living at his home in Hopedale, a prominent candi-

ate for the succession as Governor of the Commonwealth. He has recently exhibited an independence of spirit which, while attracting honest and conscientious citizens to his candidacy, may diminish his chances for a nomination. The power of what are called "boodle" politicians is so great that it is possible his repudiation of their aid and influence may hazard his success in the convention. On the other hand, it is possible that a reaction may be set in motion by his bold stand, which shall in the end well an overwhelming tide in his favor.

In order that it may be seen who have been prominent in the affairs of the town in the different generations since its incorporation the following lists are inserted in this narrative, showing who have acted as selectmen, moderators of annual meetings, town clerks, town treasurers and representatives to the General Court:

## Selectmen.

1740. Jesse Whitney.	Moses Gage.
Caleb Cheney.	James Perry.
Wardell Hayward.	Samuel Nelson.
Ebenezer Beach.	1751. Oliver Daniel.
Stephen Abbe.	David Stearns.
1761. Gershom Nelson.	Josiah Ball, Jr.
Eliaz Pondman.	James Melvin.
Aariz Merrifield.	Nathl. Parkhurst.
Eljah Thayer.	1762. Seth Nelson.
Samuel Warren.	Isabod Thayer.
1762. Samuel L. Scammell.	Benjamin Godfrey.
Adam Chapin.	James Perry.
Oliver Daniel.	John Scammell.
Michael Madden.	1763. David Stearns.
David Stearns.	Jonas Parkhurst, Jr.
1763. Jonathan Jones.	James Melvin.
John Robinson.	Ellis Perry.
Noah Wiswall.	Oliver Daniel.
Jesse Hayward.	1764. Caleb Cheney.
Josiah Ball, Jr.	Eljah Thayer.
1764. Seth Nelson.	Adams Chapin.
Seth Thayer.	Ephraim Chapin.
Ephraim Chapin.	Samuel Rockwood.
Ephraim Parkhurst.	1765. Nathl. Parkhurst.
Abraham Jones, Jr.	Samuel Jones.
1767. Robert Corbett.	Samuel Nelson.
Moses Chapin.	Nathl. Lagg.
Nathl. Parkhurst.	Samuel Warren.
Daniel Wedge.	1766. Eljah Thayer.
Isabod Thayer.	Oliver Daniel.
1768. John Chapin.	Adams Chapin.
Mordecai Day.	Samuel Jones.
Daniel Hunt.	Josiah Nelson, Jr.
Benjamin Godfrey.	1767. John Dewing.
Samuel Warren.	Phineas Davis.
1767. Ephraim Chapin.	Darius Sumner.
John Chapin.	Oliver Daniel.
Ebenezer Sumner.	Eljah Thayer.
Duke Kelly.	1768. Oliver Daniel.
Oliver Daniel.	Isabod Thayer.
1768. Nathl. Wood.	Benjamin Godfrey.
Anna Shepherdson.	Jonas Parkhurst, Jr.
Caleb Cheney.	Ebenezer Sumner, Jr.
Oliver Daniel.	1769. Adams Chapin.
Ephraim Chapin.	David Stearns.
1769. Samuel Jones.	Nathl. Parkhurst.
Josiah Nelson.	James Perry.
Darius Sumner.	Edmond Bowker.
Adams Chapin.	1800. Isabod Thayer.
Jonas Parkhurst, Jr.	Nathl. Parkhurst.
1790. Samuel Jones.	James Perry.
Darius Sumner.	George Kelly.

John Corbett.	Salvator Sumner.
1800. Samuel Nelson.	Rufus Thayer.
Hachaliah Whitney.	Lera Nelson.
Robert Saunders, Jr.	Levi Chapin.
Samuel Jones.	1817. Ona Parkhurst.
Ephraim Chapin.	Amasa Leland.
1802. Nathan Chapin.	Nathan Wood.
Pearley Hunt.	Rufus Thayer.
Samuel Nelson.	John Clafin, Jr.
James Perry.	1821. Alexander Cheney.
Samuel Jones.	Ona Parkhurst.
1803. David Jones.	Artemas Thayer.
Abel Abbe.	Nathan Wood.
Ezra Jones.	John Clafin, Jr.
Adams Chapin.	1823. Ariel Bragg.
David Stearns.	Amasa Parkhurst.
1804. Nathl. Parkhurst.	Ebenezer Hunt.
Samuel Nelson.	Pearley Hunt.
Hachaliah Whitney.	Ellis Perry.
Daniel White.	1825. Ariel Bragg.
Levi Chapin.	Amos Parkhurst.
1805. Samuel Pondman.	Eliza Nelson.
John Clafin.	Ezek. Green.
Ellis Perry.	Pearley Hunt.
Samuel Nelson.	1827. Amariah Daniels.
Samuel Jones.	Nathl. Parkhurst.
1806. Zurel Hayward.	Ariel Bragg.
Pearley Hunt.	Ebenezer Hunt.
James Perry.	Pearley Hunt.
David Stearns.	1822. Zurel Ball.
1807. Eliza Nelson.	Joel Day.
Ezek. Green.	Amariah Daniels.
Levi Chapin.	Ariel Bragg.
James Perry.	Eliza Nelson.
Nathl. Parkhurst.	1823. Eli Chapin.
Ebenezer Hunt.	John White.
Hachaliah Whitney.	Alexander Cheney.
Ebenezer Sumner, Jr.	Amasa Parkhurst.
Samuel Nelson.	Ezek. Green.
Samuel Jones.	1824. Sylvester Dean.
Amasa Parkhurst.	Luther Haven.
John Clafin, Jr.	Ononias D. Beck.
Pearley Hunt.	Eli Chapin.
Ellis Perry.	Isabod Parkhurst.
Samuel Nelson.	1825. Clark Sumner.
1808. Ira Cleveland.	Luther Haven.
Ezek. Green.	Salvator Sumner.
John Corbett.	Eliza Nelson.
James Perry.	1826. Lee Clafin.
David Stearns.	Silas Parkhurst.
1811. Amos Pond.	Samuel Daniels.
Edmond Bowker.	Rufus Thayer.
James Perry.	John Clafin, Jr.
David Stearns.	1827. Rufus Chapin.
Ariel Bragg.	Amos Chapin.
1812. Ariel Bragg.	Samuel L. Scammell.
Ezek. Green.	Artemas Thayer.
Zurel Hayward.	Rufus Thayer.
Levi Chapin.	1828. Eli Bowker.
Isabod Thayer.	Eli Chapin.
1813. Nathl. Parkhurst.	Ira Cleveland.
Eliza Nelson.	John Clafin, Jr.
Pearley Hunt.	Wm. Godfrey.
Ebenezer Sumner, Jr.	1829. Moses Adams.
Nathaniel Parkhurst.	Clark Mills.
1814. Simon Nelson.	Silas Parkhurst.
Amasa Parkhurst.	Zurel Hayward.
Levi Chapin.	John Clafin, Jr.
Pearley Hunt.	1830. Samuel Wardell, Jr.
Ellis Perry.	Peter Rockwood.
1815. Henry Nelson.	Amasa Leland.
John Parkhurst.	Lee Clafin.
Ariel Bragg.	Zurel Hayward.
Levi Chapin.	1831. David Clark.
David Stearns.	Clark Mills.
1816. Samuel Daniel.	Artemas Thayer.

Samuel Daniell. Ithiel Parkhurst. 1832. Lowell Fules. Clark Ellis. Silas Parkhurst. Artemas Thayer. Amariah Daniels. 1833. Rufus Thayer. Lowell Fules. Artemas Thayer. John Clafin, Jr. Rufus Thayer. 1834. Clark Ellis. Lee Clafin. Sullivan Sumner. Ira Cleaveland. Henry Nelson. 1835. John Corbett. Aaron Clafin. Clark Ellis. Clark Sumner. Luther Haven. 1836. Hastings Daniels. John Mason. Wm. Godfrey. Samuel L. Scammell. Sullivan Sumner. 1837. Adam Hunt. Dana Perry. John Cheney. Isaac Davenport. Otis Parkhurst. 1838. Emory Walker. Seth P. Carpenter. Ellis Sumner. Isaac Davenport. Wm. Godfrey. 1839. Ziba Thayer. Dexter Walker. John Mason. Sylvester Dean. Henry Nelson. 1840. Horatio N. Smith. Chester Clark. Orison Underwood. David S. Godfrey. Ellis Sumner. 1841. Joseph Albee. George Hancock. Joel Holbrook. Elmer Cobb. Henry Nelson. 1842. Peter Corbett. Jeremiah Kelley. Elias Whitney. Willard Bragg. Sullivan Sumner. 1843. Otis T. Nelson. Willard Haven. Ellis Sumner. Adam Hunt. John Corbett. 1844. Whitman V. Cook. Horace B. Hero. Hiram Hunt. Seth P. Carpenter. Clark Sumner. 1845. Andrew J. Sumner. Ira Wight. Stephen Cook. Elbridge G. Cook. John Corbett. 1846. Alfred Bragg. Sullivan Sumner. Adam Hunt. 1847. Martin Fletcher.	Alfred Bragg. Clark Ellis. 1848. Andrew J. Sumner. Horace B. Hero. Clark Ellis. 1849. Waldo C. Perry. Elias Whitney. Sullivan Sumner. 1850. Horace B. Hero. Willard Haven. Elias Whitney. 1851. John McWales. Hiram Hunt. Jeremiah Kelley. 1852. James H. Barker. Aaron C. Mayhew. Appleton Bragg. 1853. John McWales. Henry Nelson. Aaron Clafin. 1854. Obed Daniels. Andrew J. Sumner. Ziba Thayer. 1855. Seth C. Shepard. John G. Gilbert. Samuel W. Hayward. 1856. Artemas B. Vant. Obed Daniels. John McWales. 1857. George B. Pierce. Artemas B. Vant. John Mason. 1858. Obed Daniels. James H. Barker. Andrew J. Sumner. 1859. Obed Daniels. James H. Barker. Andrew J. Sumner. 1860. Zelek Darling. Seth C. Shepard. John Corbett. 1861. George B. Pierce. Obed Daniels. James H. Barker. 1862. Leonard Hunt. George Jones. Obed Daniels. 1863. Leonard Hunt. Obed Daniels. Andrew J. Sumner. 1864. Wm. S. Wilkinson. Henry O. Lothrop. Elbridge G. Cook. 1865. James R. Davis. John S. Mead. Zibson C. Field. 1866. James R. Davis. John S. Mead. Zibson C. Field. 1867. Albert C. Withington. James R. Davis. James H. Barker. 1868. Lansford B. Felton. George B. Blake. James H. Barker. 1869. Stephen J. Onion. Richard Carroll. Albert C. Withington. 1870. Albert M. Sumner. John S. Mead. Zibson C. Field. 1871. James R. Davis. Zibson C. Field. John S. Mead. 1872. Henry C. Scott. Albert C. Withington.	James H. Barker. 1873. Zimri Thurber. Henry C. Scott. James H. Barker. 1874. James Bergin. Zimri Thurber. James R. Davis. 1875. James Berger. James R. Davis. Zimri Thurber. 1876. Lawrence Read. Zimri Thurber. James R. Davis. 1877. Joseph B. Bancroft. Charles F. Chapin. James Bergin. 1878. Isaac N. Davis. Joseph B. Bancroft. John S. Mead. 1879. Daniel J. Cronan. Matthew P. Callanan. Joseph B. Bancroft. 1880. Daniel J. Cronan. Matthew P. Callanan. James R. Davis. 1881. James R. Davis. Daniel J. Cronan. Wm. B. Hale. 1882. Wm. B. Hale. Daniel J. Cronan. Isaac N. Crosby. 1883. Isaac N. Crosby. Philip A. Gleason. Joseph B. Bancroft. 1884. Philip A. Gleason. Joseph B. Bancroft. R. E. Foster. 1885. Philip B. Bancroft. Philip H. Curran. A. A. Clark. 1886. Philip H. Curran. Alonzo A. Cook. Henry A. Clark. 1887. H. C. Scott. M. W. Edwards. C. H. Walker. 1888. P. P. Fields. M. W. Edwards. C. H. Walker.	Amos Sheperdson, 1787. Capt. Nathl. Parkhurst, 1804, '07, '13. Lt. Ephraim Chapin, 1788, '89, '94, 1800. Col. Saml. Nelson, 1807, '08, '09, '12, '13, '16. Pearley Hunt, Esq., 1808, '11, '12, '14, '19, '21, '22, '38. Esek Green, 1812. Ebenr. McFarland, 1811. Majr. Levi Chapin, 1816, '18. John Clafin, 1817, '18, '29. Col. Ariel Bragg, 1819, '20, '21, '22, '23, '24, '25, '34, '36, '37. Dr. Gustavus D. Peck, 1824, '25. Nahum Legg, 1819, '25, '26, '32. Col. Saml. L. Scammell, 1825, '26, '27, '28, '29. Newell Nelson, Esq., 1831. Capt. Sylvester Dean, 1829, '34, '35, '36, '37, '38, '40, '41. Isaac Davenport, Esq., 1829, '38, '42, '44, '47. William Godfrey, 1832, '35. Clark, Ellis, Esq., 1830, '31, '32, '35, '37, '39, '49, '51, '52, '55. Col. Sullivan Sumner, 1833, '42. Majr. Clark Sumner, 1833, '38, '43, '44. Capt. Henry Nelson, 1834, '36, '38, '39, '40, '41, '43, '44, '48, '56. Hon. Lee Clafin, 1835. Capt. Rufus Thayer, 1835. Artemas Thayer, 1835. Henry Ball, 1835. Aaron Clafin, 1835, '40, '54. Amasa Leland, 1836. John McWales, 1836, '41, '53. Ellis Sumner, Esq., 1836, '42, '44, '46. Col. Peter Corbett, 1838. Africa Madden, 1839. Capt. Albert Newhall, 1840. John Erskine, Esq., 1841. Dexter Walker, 1841. Seth P. Carpenter, Esq., 1842. Charles F. Chapin, Esq., 1842, '49, '55, '59, '60. Alfred Bragg, 1845, '46, '47. John M. Parkhurst, 1847. Andrew J. Sumner, 1845, '48, '49, '51, '58. James R. Davis, Esq., 1848, '57, '60, '61, '62, '63, '64, '65, '66, '67, '70, '71, '72, '73, '74, '75, '76, '77, '78. Col. Lewis Johnson, 1848. Henry Chapin, 1849. Charles K. Scribner, 1849. Simpson Bixby, 1850. George Crocker, 1850. Otis Parkhurst, Jr., Esq., 1850. John G. Gilbert, 1850. Elias Whitney, 1851. Appleton Bragg, 1852. Charles Leland, 1852. Gen. Orison Underwood, 1852, '54, '56, '58, '59, '61, '62, '64, '67. Willard Bragg, 1852. Edwin Battles, 1854. Rev. James T. Woodbury, 1853, '54, '55, '59. Herman H. Bowers, 1855. Hon. Aaron C. Mayhew, 1843, '49, '53, '57, '59, '61, '62, '63, '66, '73.
--	--	---	--

## Moderators.

Leonard Hunt, 1842.

Col James H. Barker, 1858.

Amos Holbrook, Esq., 1860.

Capt. Elbridge Mann, 1860.

Bartholomew Wood, 1860.

Dr. A. C. Fay, 1861.

Hon. Winslow Battles, 1862.

George Draper, 1863.

George B. Blake, 1867, '68, '69, '70,

'71, '72, '74, '76, '77, '78, '79,

'80, '81, '82, '83, '84.

William Spencer, 1869.

Stephen J. Onion, 1870.

Albert C. Withington, 1877.

Joseph H. Wood, 1885.

Henry E. Fales, 1886, '87, '88.

#### Town Clerks.

Caleb Cheney, 1781, '82, '83, '87, '88, and also treasurer.

Samuel Jones, 1784, '85, '86, 1807 to 1816.

Adams Chapin, 1789, '90, '91, '92 to 1807.

John Clafin, Jr., 1816, '17.

Newell Nelson, 1818 to '26.

Clark Ellis, 1826 to '29.

Isaac Davenport, 1829 to '37.

Newell Nelson, again 1837 to '43.

John Erskine, 1843 to '48.

Leander Holbrook, 1848.

John Erskine, again, 1849, '50.

Charles F. Chapin, 1851 to '55, '56 to '59.

William H. Burbank, 1855.

Lewis Fales, 1859 continuously to '81.

Lewis Hayden, 1881, '82, '83, '84, '85, '86.

John T. McLaughlin, 1887-88.

#### Town Treasurers.

David Stearns, 1787 to 1826.

Gustavus D. Peck, 1826, '27, '33.

Samuel L. Scammell, 1828, '29.

John Clafin, Jr., 1830, '31.

Lee Clafin, 1832.

Henry E. Fales, of Milford.....	1886
James Lally, Jr., of Milford.....	1887
Thomas McCovey, of Blackstone.....	1887
James Lally, Jr., of Milford.....	1888
Thomas McCovey, of Blackstone.....	1888

The population of Milford since the introduction of the shoe industry has steadily increased. In 1815 it was probably about one thousand, in 1825 about twelve hundred and fifty, in 1835 fifteen hundred, in 1845 twenty-five hundred, in 1855 about seventy-five hundred, in 1865 about nine thousand, in 1875 about ninety-eight hundred, and in 1885 ninety-three hundred and forty-three. At the date of this sketch, after deducting the population of Hopedale, it probably stands at about ten thousand. The town owns no water-works, but the inhabitants are supplied by the Milford Water Company with water, and an annual appropriation is made to pay for water for fire purposes. It has a good Fire Department, with two steam fire-engines and three hose companies and a hook-and-ladder company, and is thus well provided against serious disaster.

The following list of expenditures of the town for the year 1887 will exhibit the working of its municipal machinery, and with this list this imperfect sketch must close. The writer wishes, however, before closing, to give due credit for a large amount of information to the exhaustive "History of Milford," prepared by Rev. Adin Ballou, who, while furnishing the town with a memorial of inestimable value, has completed a lasting one of himself:

Highway department.....	\$11,066.26
Incidentals.....	9,474.80
Schools.....	21,225.06
Poor department.....	10,236.09

#### BIOGRAPHICAL.

##### JOHN CLAFLIN.

The Claflins have been more or less prominent in Milford for over eighty years. They came directly or

indirectly from Hopkinton, and they are said to be of Scotch extraction; their ancestors may have been among the Scotch immigrants who helped to settle Hopkinton at an early period. (See "History of Milford.")

*John Claflin*, the son of John and grandson of Ebenezer, was born in Holliston, June 24, 1775; he married Lydia, daughter of Henry and Jerusha (Burnap) Mellen, of Hopkinton, in 1798 (she having been born December 15, 1777); they came to Milford in 1798, resided two years on the Noah Wiswall place, carrying on there the business of cordwainer; then bought about forty acres of land, with its buildings, of Samuel Rockwood, the place recently occupied by Benjamin D. Godfrey, and lived there four years. He next purchased, of his father, the lot where the Mansion House now stands, containing about four acres, with the buildings thereon. There he kept store and tavern five years. This was probably the first tavern kept on that spot. Thenceforth, steadily advancing in enterprise and increasing in wealth, he became one of our most influential citizens; shrewd and successful in public affairs as well as private; captain and then major of artillery; invested first or last with the most responsible town offices, and holding for thirty years nearly, previous to his death (which occurred July 10, 1848), a continuous commission as justice of the peace. His children were: Sylvia, Amelia, Charlotte, Direxa, Aaron, Jerusha, Horace B., Sophia A., William Bainbridge.

##### H. B. CLAFLIN.

Horace B. Claflin was born at Milford, Mass., December 18, 1811, his father being John Claflin, general country store-keeper, farmer and justice of the peace. He was educated at common school and the Milford Academy.

At the age of twenty he, in company with his brother, Aaron, and brother-in-law, Samuel Daniels, succeeded his father in business at Milford. The latter gave each of the three boys one thousand dollars to start with. The following year (1832) they opened a dry-goods store at Worcester, in connection with their general store at Milford. In 1833 Aaron took the Milford store, leaving Horace in exclusive possession of the Worcester business. He remained in Worcester until July, 1, 1843 (marrying, meantime, Agnes Sanger, daughter of Colonel Calvin Sanger, of Sherborne, Mass.), and then, with William F. Buckley, he formed the firm of Buckley & Claflin, and began a wholesale dry-goods business at 46 Cedar Street, New York. In 1850 they built a store at No. 57 Broadway, and moved into it in January, 1851. The following July (1851) Mr. Buckley retired, and Mr. Claflin made up a firm with William H. Mellen and several juniors, under the style of Claflin, Mellen & Co. In 1853 Mr. Claflin and others built, at 111 Broadway, the building known as Trinity Building,

*John Claphin*

*H. M. Allen*

*Aaron Claflin.*

whither the business was transferred on the completion of the structure. There the firm did a rapidly-increasing business until January, 1861, when they moved into the store corner of Church and Worth streets, running through to West Broadway.

The great expansion of their trade, in view of their largely increased room, came at an unfortunate time. By the late Civil War the firm's assets were largely locked up and rendered almost worthless, and Claflin, Mellen & Co. were compelled to ask their creditors to accept seventy per cent. on long time in settlement of their accounts. A large majority of the creditors accepted these terms, but claims to the amount of about one million dollars could not be adjusted on extended time, and were bought up by friends of Mr. Claflin at about fifty cents on the dollar. Very speedily after resumption the firm began to discount the compromise notes, and long before maturity of the extension, the seventy cents, and thirty cents additional, with interest on everything, had been paid. Then Mr. Claflin sought out all who had sold their claims for cash (at about fifty cents), and paid them the balance needful to make up one hundred cents and interest.

January 1, 1864, Mr. Mellen retired, and since then the style of the firm has been H. B. Claflin & Co. Their sales during the war amounted in one year (from May 1st to May 1st) to seventy-two million dollars.

In the panic of 1873 the firm, with millions of dollars of bills receivable on hand, could not get discounts rapidly enough to meet their open accounts at maturity. No paper with their name on it went to protest, but they asked their creditors to accept notes at an average of five months, with interest added, in settlement of the open accounts, and most of the creditors were willing to extend this accommodation. The notes were paid at an average of about ninety days—say two months before maturity. The ability of Mr. Claflin may be judged fairly by the magnitude of the business which he built up, which from 1865 to the time of his death far exceeded that of any other commercial house in the world. He was the pioneer of that development of modern business by which the old-fashioned jobbing houses became importers, and even manufacturers, as well as distributors of merchandise, a development which has now extended to many other branches of trade, with a constant tendency to the minimum of profit and consequent benefit to the consumer. The fortune which he accumulated is a very inadequate measure of his success, for his great liberality to his associates prevented him from keeping to himself the share of the profits which he might fairly have claimed. More than a score of persons who stood in confidential relations to him in the business (partners and others) retired to leisure at various times with ample fortunes, not one of them having contributed a dollar in money to the firm's capital.

If he had been avaricious his accumulations would probably have been thrice what they were, but he preferred gratitude to money. In measuring his work, too, not only his individual fortune and those of his immediate associates must be reckoned, but note should also be taken that hundreds of fortunes throughout the United States have had their beginning in the generosity of Mr. Claflin. It was a great satisfaction to him to give young men a liberal start, and perhaps no other man has lived in this country who has helped so many beginners with money and with unexampled credit, until they have become able to sustain themselves.

He was a man of strong convictions and of noble principles. In 1850 it was unpopular—it cost something—to be known as an opponent of slavery, but when the Castle Garden meeting was called in that year, he, in his quiet way, let every one know that he was an uncompromising friend of freedom, and it was a satisfaction to him to be published in the list of "Black Republicans," which many of the newspapers held up for abuse.

Although strongly Republican in his political views, and a Republican Presidential elector in 1872, in 1884 he voted for President Cleveland (when most of his personal friends were in favor of Mr. Blaine), because he was a sincere believer in civil service reform.

His life was remarkably happy. He said to his sons many times, "I should be glad to live my life over again, for with all its mistakes and disappointments it has been full of happiness." Only a man of good heart and clear conscience could say that.

Mr. Claflin's benevolence was without limit. He was always thinking of the poor and needy, and frequently said to his family, "We must try to give pleasure to poor people, not to the rich; the latter do not need our attention." His cheerfulness was wonderful. His conversation sparkled with humor. Even in the most trying times his presence was like sunshine to his family and friends. He was a living illustration of Sir Humphrey Davy's charming lines: "Life is made up not of great sacrifices or duties, but of little things, in which smiles and kindness and small obligations, given habitually, are what win and preserve the heart and secure comfort."

His pleasures, except those of business, were found at home. He belonged to no clubs, entertained and went into society comparatively little; but in his home circle, and among the few who were very intimate with him, the charm of his bright face, his overflowing merriment, and his sweet seriousness will never be forgotten. He loved more than most men, and every one that lived in his immediate presence had an affection for him beyond expression in words. He died November 14, 1885, in the seventy-fourth year of his age.

## AARON CLAFLIN.

Aaron Claflin was born in Milford, April 20, 1807. He grew up and succeeded his father, John Claflin, in business. He married Mary, daughter of Captain Rufus and Hannah (Parkhurst) Thayer, April 17, 1828. He has devoted himself honorably and successfully to business, mainly in manufacturing boots, and especially as a wholesale dealer in that general line, managing, since 1842, a large and flourishing boot and shoe store in New York City, and residing in Brooklyn much of his time. But he has constantly given Milford a large share of his business enterprise and wealth.

The numerous substantial edifices in our Centre, occupied under his auspices, or affording ample accommodations to other business men, together with public halls, &c., proclaim his deep interest in the thrift of his native town. Besides these, he owns and runs a large model farm of two hundred and fifty acres on Silver Hill, with probably as much pecuniary benefit to others as to himself. This is his rural home, which he visits quite regularly from month to month, making such temporary stays as convenience and pleasure dictate.

He is an expert at minding his own business, treating his fellow-creatures commendably, dispensing his benefactions unostentatiously, and thus insuring to himself a corresponding measure of respectful goodwill. His memory is a most remarkable encyclopædia of town history, genealogy and interesting facts. Milford owes Mr. Claflin and family a high tribute of solid honor and gratitude.

Mr. Claflin's children are as follows: Fidelia, Charles F., George W., Mary L., John H., Josephine B., Adla M., Henry A.

Mrs. Aaron Claflin died July 18, 1875.

## HON. AARON C. MAYHEW.

Mr. Mayhew came to Milford from Hopkinton in the year 1829, and entered the employ of the late Lee Claflin to learn the tanner's trade. With a resolute ambition and energetic will to achieve success in the world he did so. Having mastered his trade and married a congenial helpmeet, he entered into partnership, March 25, 1835, with David S. Godfrey, for the manufacture of leather, under the firm-name of Godfrey & Mayhew. The firm soon commenced to manufacture boots and shoes. Their business grew and prospered. Mr. Godfrey having died, Mr. Mayhew formed, in 1853, a co-partnership for prosecuting the same line of business with George W. Howe and John S. Leland, under the firm-name of A. C. Mayhew & Co. Mr. Leland died in 1857, and Sullivan C. Sumner took his place in the firm, which, with slight changes, remained in continuous activity. Mr. Mayhew was several years president of the Milford Fire Insurance Company, vice-president and on the Investment Committee of the Milford Savings Bank

from its incorporation in 1851. He was made president of the Milford National Bank at its institution in 1854, and held that responsible position until his death, which occurred September 26, 1880. Meantime he was distinguished in civil and political life as moderator of many town-meetings, selectman, representative to General Court two years, twice a State Senator, a member of Governor's Council under Banks two years, on the State Central Committee of the Republican party for several years, and a Presidential elector on the Grant and Wilson ticket in 1872. Such is the outline of his personal and public success, from the humble beginning whence he started.

His pedigree was also honorable. He placed in the hands of Rev. Adin Ballou documents and a genealogical tree which make him a descendant of the celebrated Mayhews that distinguished themselves in the early times of New England as civilizers of the Indians. Thomas came over from England in 1631; he was immediately admitted a freeman, settled at Watertown, held numerous responsible civil offices, and finally, under a grant from the Earl of Sterling, was made superintendent of Nantucket, Martha's Vineyard and the adjacent islands, for the purpose of governing, civilizing and Christianizing the Indians there. He left Watertown with a colony of whites for his domain, and his son, Thomas, as a preacher to the Indians. This son died when the father was seventy years of age; and finding it impossible to procure a successor who understood the language of the natives, he took his son's place, ministering till his death, at the advanced age of between ninety and one hundred years. (See Mayhew Genealogy, "Milford History.")

ZIBEON C. FIELD.<sup>1</sup>

Zibeon C. Field, of Milford, is the son of Zibeon and Lydia (Howe) Field, and was born in Paris, Maine, on the 25th day of December, 1831. He is a direct descendant of the eminent English astronomer, Sir John Field. He is also a lineal descendant of John Alden, the last surviving signer of the famous compact made on board the "Mayflower."

Mr. Field first came to Milford in 1848, and worked for some time in a boot shop, but his health having become impaired, in 1852 he sailed for California, going around Cape Horn in the good ship "R. C. Winthrop." After having passed three years there at work in the mines, he returned to Milford, but soon after engaged in the provision business in Roxbury. It was not till 1858 that he was permanently established in Milford, where he has ever since been carrying on a coal and lumber business in connection with his brother, Perley T. Field.

He has been married twice; his first wife was Lydia

<sup>1</sup> By C. A. Dewey.

James Greely  
A. C. Chapman  
— III —

*Ziburn L. Field*

A., the daughter of Colonel Peter and Hopestill (Prentiss) Corbett, by whom he had four children. She died March 21, 1872. His second wife, whom he married June 17, 1874, was Anna, the daughter of Almon and Sarah A. (Darling) Thwing, of Hopedale. By this marriage the town lost one of the best of its teachers.

Mr. Field has always shown a lively interest in public matters, and been willing to do his share of work for the common good. For two years he was foreman of the Washington Hook-and-Ladder Company of Roxbury. In Milford he served some time on the Board of Engineers; for five years he was chairman of the selectmen, and for three years a member of the School Committee. For two years, in 1864 and 1865, he was a member of the General Court, where he served on the committees on horse-railroads and on railways and canals. He was also appointed by Governor Andrew as a justice of the peace.

He was an active and efficient worker as agent of the town in recruiting soldiers for the war. He went to Washington in 1864 and, by a personal interview with President Lincoln, secured the credit of one hundred and thirty-seven three years' men to Milford, for whom the town had received no credit in the settlement between the State and National governments, thus saving for the town many thousand dollars.

For several years past Mr. Field has declined to accept of any civil office, but still takes a warm interest in politics, and is now chairman of the Republican League of Milford. He is a member of the Universalist Church, and has long been one of the standing committee of the parish.

Mr. Field has played well his part in life. Successful in his private business, he is one of those public-spirited and most valuable men who are always ready to lend a hand in aiding any good work which may advance the interests of the town. Quick and clear in his perceptions, and endowed with a large share of common sense, he has always shown the courage of his convictions, and has ever been disposed to stand up for what he believed to be right. He enjoys the respect of the entire community in which he lives, and has long been regarded as one of the leading and most influential citizens of Milford.

## CHAPTER CLXIII.

### RUTLAND.

BY CHARLES R. BARTLETT.

*Indian Deed and Grant of Twelve Miles Square—Proprietorships and Hardships of Early Settlers—Location and Surface—Roads and Schools—Revolutionary War—Encampment of Burgoyne's Army—Indians.*

AN Indian deed, dating back more than two hundred years, December 22, 1686, given and executed by

Joseph Trask, *alias* Puagastion, of Pennicook; Job, *alias* Pompamamay, of Natick; Simon Piticom, *alias* Wananapan, of Wamassick; Sassawannow, of Natick; James Wiser, *alias* Qualipumt, of Natick (Indians who claimed to be lords of the soil), to Henry Willard, Joseph Rowlandson, Joseph Foster, Benjamin Willard and Cyprian Stevens, for twenty-three pounds of the then currency, of a certain tract of land twelve miles square, comprising about one-eighth part of Worcester County, including what is now the whole of Rutland, Oakham, Barre, Hubbardston, more than one-half of Princeton and nearly or quite one-half of Paxton.

Upon the petition of the descendants of Maj. Simon Willard, of Lancaster, to the General Court for the confirmation of their title to the above tract of land, on the 23d of February, 1713, the following order was passed:

That the lands in the Indian Deed, and according to their butts and bounds, be confirmed to the children of the said Simon Willard, deceased, or to their legal representatives and associates, provided that within seven years' time there be sixty families settled thereon, and sufficient lands reserved for the use of the Gospel ministry and schools, except what part thereof the Hon. Samuel Sewell, Esq., hath already purchased, and that this grant shall not encroach upon any former grant, or grants, or exceed the quantity of twelve miles square.

The town to be called Rutland and to lye to the county of Middlesex.

This deed was received April 14, 1714, and entered with the record of deeds for the county of Middlesex, liber 16, page 541—Samuel Phelps, registrar. This tract of land contained ninety-three thousand one hundred and sixty acres, the south corner butting upon Muschopauge Lake; the northeast boundary on Worcester—what is now Holden—of about six miles; the northwest, including the larger part of Princeton, by a line running on the south base of Mount Wachusett and the northwest border of Hubbardston, eleven miles; the southwest being the present southwest boundary of Hubbardston and Barre, thirteen miles; the southeast answering to the southwest boundary of Barre and Oakham, eleven miles and thence to Worcester line, cutting Paxton into nearly equal halves by a line running due east through the centre of the town to Worcester line, seven and one-half miles, and thence northwest on Worcester about five miles to the point of beginning, which was probably at the angle marked by a monument standing in the swamp between the land of F. G. Bartlett, in Rutland, and Geo. C. Bond, in Holden, and about two hundred rods south of Muschopauge Lake.

The proprietors as named in the associate deed, at a meeting in Boston, December 14, 1714, voted that the contents of eight miles square be surveyed and set off for the settlement of sixty-two families, in order to the performance of the conditions of the grant. The six miles square granted to men who would go on and settle was that part which is now called Rutland.

The meeting appointed Thomas Howe, Stephen

Minot, Thomas Smith, Estes Hatch, Jacob Stevens Ephraim Wilder and Samuel Wright a committee to transact the concerns of the proprietors. Agreeable to the vote of the proprietors, the committee set off lands equal to six miles square, which was surveyed by Mr. Ward. After this survey the committee surveyed and set off sixty-two house-lots of thirty acres each, in the form of an oblong square, in the most eligible and safe part of the town, and so calculated as to have a fort or garrison to flee to when attacked by the Indians. The first settlers were from respectable families from Boston, Concord, Lexington, Sudbury, Marlboro', Framingham, Lancaster, Brookfield, and emigrants from Ireland, who brought letter testimonials of their church fellowship. They were men of great courage and determination, who bid defiance to the dangers and privations that awaited them in their new country, and, shouldering their guns, axes and such other utensils for farming, with a scanty supply of provisions, set out for their new homes.

(One man, Simon Davis, from Sudbury, carried a plow on his back several miles.)

The first work of the settlers was the felling of trees, and the clearing of the land to raise something for the coming year, and the erecting of log huts. Their food was wild game or such as they brought from home on their backs or on horses; their drink from the water of the fine, sparkling springs, which they found in great abundance; their lodging in their blankets.

In the autumn they returned to their friends. Again, the following spring, they returned to renew the work of clearing the land and building huts.

Some raised small quantities of grain. Only a few wintered in the settlement, nearly all returning to their friends to spend the winter.

The next spring, 1719, they commenced moving their families to their new homes; as yet no woman had accompanied them, to grace by her presence the houses they had toiled so hard to erect, during the two previous seasons.

The first male child was born to Moses and Eunice How, September 23, 1719, for which fortunate event he had one hundred acres of land given to him. Mr. and Mrs. How came from Brookfield. They had born to them ten children—five sons and five daughters. Mr. How buried his wife and three daughters in the fall of 1741. He married for his second wife, Mrs. Hannah Head, by whom he had one son, Jonas, whose descendants of the fifth, sixth and seventh generations are living in town at the present time—Mrs. Eunice Howe Bartlett, widow of the late Capt. Charles Bartlett, now in her eighty-third year, her son, Walter H. Bartlett, and grandchildren, Harold, Munroe and Bessie Howe. Mr. How held the offices of selectman, assessor and treasurer, and was a justice of the peace. The late Col. Calvin G. Howe descended from this family. So rapid was the settle-

ment, that within four years they numbered fifty families, and June 7, 1720, they selected a place for the first meeting-house to stand. It was in front of the old burying-ground, and in the succeeding year the house was so far completed as to be used for public worship.

In June of 1720 the committee of Rutland, whose names have been previously mentioned, met to inquire the state of the settlers, and proceeded from house to house, and lot to lot, to see if they had fulfilled the conditions of settlement. This was an important visit to the young settlers, and no doubt the committee were received with a great deal of courtesy, and, it may be presumed, in many cases with no small degree of pride, as the few acres of cleared and cultivated land, with the little log cabin made cheerful and inviting by the thrifty housewife, and the rosy faces of the children partially hidden behind mother's apron, were exhibited to them.

Nearly all the settlers had the gratification of the sanction of the committee; others, an extension of time. After the settlers had performed their conditions, the six miles square was confirmed to them by the committee June 26, 1721, and incorporated as a town by the General Court in 1722, although the title was confirmed in 1713. Worcester County was incorporated August 2, 1731, Rutland being one of the first eight organized towns of the county.

It is the geographical centre of the State, fifty miles west of Boston, and forty east of the Connecticut River,—an equal distance from New Hampshire on the north, and Connecticut on the south. It is also the most central town in the county. (Tradition says that it failed of being its shire town by one vote.)

The centre has an elevation of twelve hundred and twenty feet above tide-water, and is the highest town centre between Boston and Northampton. There can be distinctly seen, from the centre of the town in a clear day, the church spires in fourteen different towns, and points are seen seventy-five and eighty-five miles distant in the western part of the State and Vermont.

Muschopauge Hill, one mile northeast of the centre, the highest point of land in town, thirteen hundred and fifty feet above sea-level, has a commanding view to all points. There is a place on this hill of roots and herbs, called the "Indian Garden." The surface of the town is generally hilly, although the hills are very smooth and well rounded, and—what is quite remarkable—every one has been cultivated at some time on its very top. The soil is a rich loam for the most part, with a clay sub-soil, although along the valley of the Ware River and in some sections of the west part of the town it is somewhat sandy. It is, perhaps, better adapted for grass and grazing than to the raising of grain.

The six miles square was said to contain 20,439 acres, good measure. By the census of 1885 there

was found to be 22,246 acres, divided as follows: 3,385 acres of mowing land; 923 acres under cultivation for principal crops, market gardens, nurseries, orchards, etc.; 9665 acres of pasture land; 1050 acres unimproved land; 114 acres unimprovable land; 1639 acres woodland over sixty years' growth; 5428½ acres of thirty years' growth, and less.

Nearly all kinds of wood common to New England are found here,—white and hard pine, chestnut, oak, hemlock, spruce, walnut, maple, birch of the various kinds, beech, elm, poplar, cedar, etc. It is estimated that there are more acres of woodland at the present time than there was fifty years ago, although that fact, however, cannot be fully determined, as there was no census taken of agricultural statistics as far back as 1840. The old primeval forests have nearly all succumbed to the "woodman's axe," and a new growth has taken its place. Many pastures have been allowed to run up to white pine, hard wood and white birch, which seems to be naturally characteristic to the soil. Some very valuable white or sap pine lots have grown within the past thirty or forty years. The greater part of the lumber manufactured is sawed from white pine into box-boards, which find a ready market in North Brookfield, Spencer and Worcester. Also quite a large quantity of such lumber is made into boxes by O. W. Roberts & Co., of North Rutland. A considerable quantity of chestnut is manufactured into railroad ties, which also find a ready sale and home market to the Boston and Maine Railroad at good prices. The woolen-mills afford quite a market for cord-wood, as a large quantity is used for making steam-power to carry the machinery employed.

Muschopauge Lake, or a point near it, is the starting and ending point of the Indian deed. It is situated at the east base of Muschopauge Hill; is a beautiful sheet of water, about three-fourths of a mile long and nearly one-half mile in width. The waters are, as the meaning of the name "Muschopauge" indicates, clear and cold. It is entirely fed by springs, as no stream runs into it. The bottom is hard and gravelly, and can be seen to a great depth. At some places in the lake the water has been found to be nearly one hundred feet deep. This supplies the water-power for Austin's Mills (formerly Broad's Mills) in Holden, although, on account of the deep basin that contains it, it cannot be drawn or lowered only about three or four feet. If this great body of pure water was accessible to some large city, it would be eagerly sought after and highly appreciated. Although there are some excellent fish in the lake,—pickerel, perch and pouts,—yet it is very seldom that a good string can be caught, probably because of the great number of smaller fish which afford a plenty of food for the larger ones.

Demond Pond, about one and one-half miles southwest of the centre, is a fine sheet of water, only about half as large as "Muschopauge," but possess-

ing the same qualities. Long Pond, near the village of West Rutland, is about two miles long, is quite narrow, more resembling a river than a pond, is fed by springs and the water from Demond Pond, by Buck Brook, and is a reservoir for mills and factories. Moulton Pond or reservoir, one-half mile north of the centre, covers what was formerly called the "Ministry," or Captain King meadow, and meadowland owned by A. H. Miles. It affords a good water-power, and abounds in pickerel, which are caught in great abundance through the ice every winter. The larger portion of Rutland being so elevated, there is but one river, the East Branch of the Ware, flowing through the town. This river has its source on the west side of Wachusett Mountain in Princeton.

It enters this town near the angle where the monument marks the boundary of the three towns of Hubbardston, Princeton and Rutland, passing through the intervalle for a little more than a mile to North Rutland, affording there good water-power for several mills, the principal power being what was formerly called Bigelow's Mills, now owned by O. W. Roberts & Co., who have just rebuilt a good, substantial saw-mill and box-shop on the old site, where a similar mill was destroyed by fire last July. On the stream about a quarter of a mile below is a saw-mill, owned by Addison Childs; and just below this mill is a shoddy-mill, owned by M. R. Moulton.

The river follows the valley at the base of very abrupt hills to New Boston, a mile and one-half south of North Rutland, where there is another good water-power, and a saw and shoddy-mill owned by Owen McGann. From this point it makes a complete horse-shoe in the next half-mile; then flowing on into the town of Barre, near the junction of the three towns of Barre, Hubbardston and Rutland. The course of this river is very circuitous through this town, traversing a distance of nearly six miles and leaving the town within two and a half miles of the point of entrance.

Perhaps the next most important stream is Long Meadow Brook, which takes its water from Long Pond. At the upper falls or north end of Long Pond is one of the best sites for mills or factories in town, which has been for a number of years unoccupied. In 1728 there was a saw-mill built here by Ephraim Jones. In 1836 Joseph Demond had a grist-mill, saw and shingle-mills in full operation. This stream flows northwesterly about two miles through Long Meadow into the East Branch of the Ware at New Boston School-house. Mill Brook received its name by having the first mills in Rutland carried by its power. It has its main source from Moulton Pond, and its course is westerly through Meeting-House Meadow, and enters Long Meadow Brook at a distance of two miles. The woolen-mill of M. R. Moulton is at the upper falls of this stream, and about a mile and a half farther down the stream is the turning-mill of Paul Wheeler, where his famous axe-helves

are turned out of oak and hickory. Formerly, before Moulton's Pond was flowed, the chief source of this brook was from two springs, lying near each other, about half a mile east of the Centre. One of the above-mentioned springs is on the place of Rev. Geo. S. Dodge, from whom a right has been purchased by the Central Mass. R. R. Co. to take the supply of water needed at the water-tank at Rutland station. The other spring is on the land of Geo. S. Gates, and the water is used to supply tanks for the breeding of trout. There are also several small springs on the west side of Muschopauge Hill, which flow into this pond.

Pomagusset Brook is made up of waters that flow from meadows in the northerly part of the town, and runs westerly into the Ware, between New Boston and North Rutland. There was at one time a saw-mill upon this brook, owned by William Davis, near where the Hubbardston road crosses this stream, and just below the reservoir recently flowed by Mr. G. R. Edson for the purpose of breeding carp.

Sewall's Brook has its source north of Miles Hill (formerly Joyner's Hill), and runs northerly through Sewall's Meadow (now owned by Mrs. Alonzo Davis), and falls into the Ware below Pomagusset Brook. All the above-named streams enter the Ware, and are thus mingled with the waters of the Connecticut and emptied into Long Island Sound.

Harwood's Brook has its source in the north part of the town, and, with the help of other small streams, forms a handsome brook and empties into the Quinapoxet, in Holden. There is one saw-mill upon this stream, now fast going to decay, formerly run by James L. Monroe, in which a considerable amount of lumber was manufactured. It is a curious fact that the water shed from the east side of the barn on the farm of Wm. C. Temple runs into this brook, and thence into the Merrimac River, and the water shed on the west side of the same barn runs into the Connecticut River by falling into Mill Brook.

Davis Brook has its source at or near one of the springs before mentioned as one of the sources of Mill Brook, the spring on the land of Geo. S. Gates, where it is said that the waters divide, a part mixing with the Connecticut and a part with the Merrimac. This brook runs southeast about two miles and unites with Wood Hill Brook, which has its source from springs north of Turkey Hill Pond, and flows through Holden into the Nashua River.

Mullikin Brook arises from several springs easterly of Pound Hill, and passes into Holden near its northeast corner, and then into the Nashua and Merrimac.

There are several other streams of minor importance—as Dublin Brook, which runs southerly into Spencer; Cold Brook, which passes into Oakham; and also Folly Brook; Stevens Brook runs northerly into Barre.

Although Rutland is on the height of land, it is well watered; and every farm is watered either by a pond, river, brook or springs of pure water.

The following list includes the names of the original proprietors of the sixty-two house-lots:

Samuel Wright, Cyprian Wright, Jacob Stevens, Robert Patrick & Co., Simon Davis, William Blair, Samuel Ball, Josiah Haynes, Joseph Wright, Estes Hatch, Samuel Sewall, Graves & Barnard, Clarke & Hendry, Joseph Stevens, Ezekiel Day, Wm. Blair, Daniel Shepard, Henry Franklyn, David Melvin, Jonathan Willard, Thomas Read, Jacob Farrar, Ebenezer Davis, Samuel Stone, Jonathan Waldo, Jonathan Waldo, J. & J. Crosby, Benjamin Fletcher, John Dakin, John Barber, Mark Perkins, John Charnock, Edward Rice, Jonathan Sewall, Jonathan Willard, John Buttolph, Wm. & J. Allen, Thomas Wheeler, Thomas Smith, James Pitts, Michael Gill, Thomas Fitch, John Smith, John Jeffries, Samuel Goodenow, Thomas How, Isaac Gibbs, Daniel How, Moses How, Estes Hatch, Jonas Clark, James Browning, Eleazer Browne, Samuel Davis, Joseph Stevens, George Robbins, Eleazer Heywood, Edward Rice, Minister's Lot.

An order from the General Court passed July 6, 1722, authorizing and empowering Capt. Samuel Wright to call a meeting of the freeholders and other inhabitants of the town of Rutland on the last Monday of July current, to choose town officers to serve until the general meeting in March next. The town was notified accordingly, and this was the first legal town-meeting ever held in Rutland. The following officers were chosen: Capt. Samuel Wright, moderator, Capt. Samuel Wright town clerk; Capt. Samuel Wright, Ens. Joseph Stephens, Lieut. Simon Davis, selectmen; Capt. Samuel Wright, Ens. Joseph Stephens, Daniel How, assessors; Ens. Joseph Stephens, town treasurer; Moses How, Eleazer Heywood, constables; Daniel How, Edward Rice, Robert McClem, Wm. Finton, surveyors of highways; James Browning, John Crawford, tythingmen; Daniel How, Edward Rice, fence-viewers; Peter Moore, sealer of leather; John Dakin, Robert McClem, Hugh Hamilton, inspectors of swine; Capt. Samuel Wright, clerk of the market.

Rutland has about eighty-five miles of road or highway. All roads laid out previous to 1750 were from the proprietors' land. The main street or the ten-rod road granted by the grand proprietors was on May 8, 1743, confirmed by them as follows, viz.:

*Vote*, That the Road or Street Ten Rods wide, beginning at the Ministry House Lot (so-called) No. 62, and running Northeasterly over Meeting-House Hill (so-called), and ending at the parting of the roads on Rocky Hill (so-called), by the corner of Col. Hatches Division Land, be granted and confirmed to the town of Rutland, as a common for public use, Benefit and Behoof without any manner of Alienation or appropriation forever.

THOMAS FRINK, *Mod'r.*

By vote of the town the bounds of the ten-rod road or street in the centre was re-located to eight rods, thereby releasing to the abutters one rod in width upon each side of the street. The proprietors and General Court made some provision for schools. It

was one of the conditions of the grant of six miles square to the settlers, that one-sixty-third part should be set apart and appropriated for schooling forever. Accordingly, what was known as house lot 63 and its after divisions was set off for this purpose. This lot included a part of the hill that is now owned by Horace King. In 1744 the school lands were £156 4s. 10d. and the proceeds put upon interest. For the first twenty years after the grant there was but very little privilege of schools, there being no school-houses, and it being dangerous for children to go from house to house on account of the Indians and wild beasts. In October, 1733, the town voted to provide a school-master before November, and chose Capt. John Hubbard, Eleazer Ball and Dunkin McFarland a committee for that purpose. It was voted to have the school kept two-thirds of the time in the middle of the town at Col. Hatch's house, and one-third at the west end by Long Pond. This school was taken by a Mr. Whittaker, which was the first public school taught in Rutland. In 1734 the town built two school-houses, one near the meeting-house and the other southwest of Cedar Swamp or Demond Pond in Dublin (so-called). For several years before the Revolution there was a Latin Grammar School kept in the Centre District through the year, to which Col. Murry gave twenty dollars annually for its encouragement.

During the Revolutionary War education was very much neglected. The sum granted by the town yearly was about seven hundred dollars. A considerable sum was given in addition by individuals for primary and high schools.

On May 8, 1786, Rutland appointed a committee, of which Gen. Rufus Putnam was chairman, to ascertain a proper and convenient number of school plots and the bounds of the same. The committee made a very particular description of the bounds of each plot and the heads of every family in the same. The report was not accepted, but was recorded, showing that there were one hundred and seventy-nine families living in Rutland at that time, and is valuable for reference because of its giving the names of the heads of all the families and where they were severally located, and it is quite probable that they were afterwards adopted with slight modifications, as they are substantially the same now with one exception, that of No. 9, which has been added. If Rutland has not taken the lead among the other towns in the county in the education of its children, it is but fair to say that it has not fallen much behind, considering its means to contribute for such support. The present year it has maintained ten schools of twenty-four weeks each and another school for the more advanced scholars of twenty weeks, at a cost of about two thousand dollars.

Among those who deserve special mention for having done much to advance the cause of education in this town by teaching and by serving upon the School

Committee since 1820, are Rev. Josiah Clark, Edwin Henry, Col. Calvin G. Howe, Deacon Abram H. Temple, Hon. J. W. Bigelow, Daniel Bartlett and Walter A. Wheeler.

Rutland was by no means backward in the part it took in the Revolutionary War. It was united, almost to a man, in asserting and defending its rights and privileges, and notwithstanding the friendliness of Colonel Murry to the British rulers, who had appointed him one of the mandamus councillors—he being the leading spirit in the town, having represented the town in the General Court for more than twenty years—yet the town, in 1765, instructed him to “use his best endeavors in the General Assembly to have the rights and privileges of the Province vindicated and preserved to them and their posterity.” The Stamp Act was repealed, and the people were so rejoiced that they erected a liberty-pole—probably in the triangle formed by the Paxton with the ten-rod road—and a day was kept of feasting and gladness. Colonel Murry was further instructed by the town in 1773 as follows: “And if anything further should occur in derogation to our privilege, we caution you that you consent not to anything which may relinquish any part thereof, and although your attachment to the present administration to us is apparent, yet, sir, inasmuch as you accept the office of our Representative, we expect you will make our instructions the rule of your conduct in said office, so far as we are at any time capable particularly to point out to you.” At length the people became so exasperated with the Tory principles of Colonel Murry that they threatened him with violence; he, having intelligence of their intended visit, the night previous left town for the last time by a back road. At the breaking out of the war, in 1775, fifty of the most active and patriotic young men volunteered their services, were officered and equipped to be ready to march at a moment's warning. Thomas Eustis was chosen captain; John Stone, first lieutenant; Elijah Stearns, second lieutenant. They engaged in the first eight months' service, and were in the memorable battle of Bunker Hill. One young man, Benjamin Read, was killed in this battle. March 6, 1775, the town voted “that all the militia from sixteen years of age and upwards be required to meet at the common place of parade on Monday, the 13th day of March next, in order for the ‘Alarm Men’ to form themselves into a company, and to choose officers to command and discipline them, and that each be supplied with arms and ammunition.” More than sixty responded to this call, and chose David Bent captain, whose commission was “honor and patriotism.”

At this time they drew a solemn, patriotic obligation; the following is the last clause: “And as the law of self-preservation requires us at this time to prepare ourselves for repelling, Force by Force, in case we should be reduced to such a fatal necessity. Therefore we do hereby firmly covenant and engage

with each other under the sacred Ties of Honor, Virtue and Love of Country, that we will endeavor forthwith to be equipped with arms, ammunition and accoutrements, according to Province Law, with the addition that each soldier shall have thirty bullets, instead of twenty. And furthermore, that we will each of us respectfully adhere, obey and conform to all the military orders, injunctions and penalties of said captain, or his successors in office, with his or their subalterns, in every respect consistent with the Law of the Province, in such case made and provided, to all intents and purposes as though the said officers were commissioned by a constitutional captain-general of the Province, until some other military regulations shall take place."

The town also mounted a "Field Piece," which was manned by Paul More, Eleazer Collier, George Clark, Joseph Hill, Jason Read, George Smith, Jr., Peter Newton, John Smith, Luke Moore, Timothy Munroe, Gideon Brown and Samuel Gates. In 1777 this town's quota to be raised for three years, or for the war was thirty-six men. The town voted to raise enough to give them twenty pounds each. The quota to recruit the Continental Army was fourteen. It was voted to give them ninety pounds each in hard money, or its equivalent in other property. It cost the town more than £1400 as a part of the expense of the war. The town furnished one hundred and three men of the following names: Daniel Adams, Adonijah Bartlett, Isaac Briant, William Bridge, Peter Bent, Jr., John Briant, Samuel Browning, William Brittan, Silas Bent, Thomas Ball, John Bruce, Moses Baxter, Levi Brown, Oliver Chickering, James Cowden, Asa Church, Caleb Clap, Joshua Clap, John Cunningham, Ephraim Curtis, Eli Clark, George Clark, Abiather Childs, Samuel Dunlap, John Davis, Eliakim Davis, Alpheus Davis, Seth Duncan, Asa Davis, Thomas Eustis, Daniel Estabrook, Benjamin Estabrook, John Fesenden, John Forbes, James Forbes, Robert Forbes, Jonas Flint, Tilly Flint, Samuel Frink, Jacob Fisk, Jeduthan Green, Zadock Gates, Nathan Goodale, Joel Hubbard, Abraham Hagar, Noah Harrington, Daniel Henderson, Jesse Huckingson, David Howe, Micah Howe, Matthias Howe, Luther Johnson, Delitha Johnson, Joseph King, Nathaniel Laughton, Benjamin Meade, Willard Moore, Timothy Monroe, Solomon Munroe, Robert Munroe, Benjamin Munroe, Alexandra Murray, Timothy Medcalf, Benjamin Miles, Samuel Moor, Hezekiah Newton, John Powers, Jonathan Pollard, Aaron Phelps, Abel Parmenter, Jonas Parmenter, Benjamin Reed, Jr., Nathan Reed, Abiah Rice, John Rice, Josiah Rice, Jonas Stone, Samuel Stone, Jr., John Stone, Israel Skinner, George Smith, Enoch Smith, Elijah Stearns, John Stearns, Luther Stevens, Hugh Smith, Jeduthan Stone, Israel Stone, William Smith, Jonas Smith, James Smith, Elijah Stone, Isaac Smith, David Smith, David Underwood, Phineas Walker, Jonas Walker, Daniel

Walker, Abraham Wheeler, Isaac Wheeler, Joseph Wright, James Williams, Joseph Wood.

It was a time of danger, distress, hardship and privation. The contributions of money, clothing, food and other stores were a severe drain upon the resources of the inhabitants, but they cheerfully bore the burdens which were necessary for the achievement of national life and constitutional freedom. The average age of thirty-six who returned from the war, taken at the date of their death, is eighty-seven years, five months.

Government considering Rutland a suitable place for the safe encampment of Burgoyne's army, appointed John Frink, Esq., Jonas Howe, Esq., and Colonel Daniel Clap a committee to build barracks. This committee contracted with Captain Thomas Reed and caused to be erected a building one hundred and twenty feet long, forty feet wide and two stories high, containing twenty-four rooms twenty feet square, with chimneys. The building was thoroughly built, clapboarded and shingled and arranged with suitable bunks for the soldiers. The lot selected was at the junction of the Rutland and Barre road with the New Boston road, three hundred and seventy rods westerly from the meeting-house. It contained several acres of land and was enclosed by a piquet fence twelve feet high. The terms of the capitulation granted by General Gates to General Burgoyne contemplated the speedy passage of Burgoyne's troops to Europe, they stipulating not to serve again in America during the war. Boston was agreed upon as the point of embarkation, and Burgoyne's troops were marched to Cambridge to be near the shipping point. Disputes and misunderstandings arising between Burgoyne and the Continental Congress, the embarkation was deferred and finally the troops were left as prisoners of war, a part being removed from Cambridge to Rutland, and in November, 1778, all were removed to Virginia, where they remained till near the end of the war, when they were exchanged in 1781-82 and removed to New York, where they embarked for Europe. Lieutenant Aubury, a British officer under Burgoyne, who wrote a description of Burgoyne's campaign and the subsequent captivity of his army, in a work of two volumes entitled "Travels through the Interior Part of America in a Series of Letters by an Officer," published in London in 1789, gives the best accounts of the movements of Burgoyne's troops after the capitulation, or convention, as they called it, and from him these facts are obtained. He says: "It was understood at the convention that the troops were to be stationed on Prospect and Winter Hill in Cambridge, and the officers were to be quartered in Boston and the neighboring towns. On this supposition some of the officers had pushed forward and got into Boston, and were immediately ordered out. The English troops were on Prospect and the German on Winter Hills. The officers have Cambridge, Mystic and Watertown to quar-

ter themselves, and a parole of about ten miles in circumference, but to preserve order and regularity among the troops three officers of each regiment reside in the barracks. It is no little mortification that I cannot visit Boston, the second city in America, and the grand emporium of rebellion, but our parole excludes us from it; what makes the mortification still greater, is, that we can go as far as the ferry at Charlestown and are debarred crossing it." The above letter was written from Cambridge on November 30, 1777. In a letter of May 20, 1778, from Mystic, he says: "The intention of congress is very apparent as to our detention as prisoners, no doubt as hostages, in case of failure to the southward the ensuing campaign, and the apprehensions that some division may be made near Boston so that our soldiers might be released, or escape to any army that may make a landing. The council of Boston, under pretense that the troops would fare better, removed the first brigade of the British, consisting of the artillery, advanced corps, and Ninth Regiment on the fifteenth of last month from Prospect Hill to a place called Rutland, fifty-five miles farther up the country, at which place they are to stay till further orders from congress. The rest of the British troops are soon to follow. As to the Germans, the Americans look upon them as being so tame and submissive that they are to remain at their old quarters on Winter Hill. By an officer who came from Rutland we learn that the first brigade arrived there the 17th about two o'clock. The men were sent to the barracks that were picketed in with pickets near twenty feet high and had been treated with great severity, were very badly supplied with provisions, and denied to go out for anything among the inhabitants. The officers with great difficulty obtained quarters in the neighboring houses, and those at a considerable distance from each other. It happened rather fortunately for the troops that a vessel under a flag of truce arrived with some necessaries just before they marched, otherwise the men would have been in a wretched state." Notwithstanding the intention of sending another detachment to Rutland, no other was sent, only the one sent in April, 1778.

These prisoners of war spent the summer of 1778 in Rutland. The commissioned officers by parole quartered themselves, as Lieutenant Aubury says, "in private houses;" they lived in style, had waiters, kept horses, paid their bills regularly, and conducted themselves in accordance with the articles of convention. Three of these officers won the affections and married three young ladies, whose names were Stone, McClennathan and Hall. While here they were guarded by Captain William Tucker, of Charlton, and Captain Peter Woodbury, of Royalston, with their companies. There were two sentinels at the gate, one at each corner of the stockade, one at the guard-house, and one at the store-house at the parting of the Dublin road. The non-commissioned officers and soldiers, by obtaining a permit from the officers of

the guard, would go out and purchase of the inhabitants potatoes and such other provisions as were not supplied to them for rations by the government. It was said that "you could hardly turn your eyes in any direction without seeing Red Coates," which refutes the statement of Lieutenant Aubury that they "were treated with great severity" and "denied to go out for anything among the inhabitants." These barracks were afterward used for dwellings, store, card-factory and tavern. Two-thirds were taken down and the other third destroyed by fire about sixty years ago. The old "Guard House" was permitted to stand to become a "Centenarian" it being taken down in 1888, just one hundred and ten years from the time of its erection. The only thing left to mark this historic spot is a large well, nine or ten feet in diameter and nearly seventy-five feet deep. The masonry of this well remains intact to this day. The land upon which these barracks were erected is now owned by Mr. Miles Holden and Mrs. Amy S. Hunt. Although it cannot be said that Rutland was ever a permanent settlement of the Indians, yet they made frequent excursions to this town, as the names given to some of the hills, ponds and meadows indicate. In 1722 the Eastern Indians, exasperated by some supposed encroachments on their lands, again took the tomahawk. The war was carried on in a manner peculiarly bloody in the settlements within Maine and New Hampshire. Rutland, although removed from the scene of action, felt the fury of their vengeance. During the two succeeding years the inhabitants continued to receive the most violent assaults from them. Several were killed or captured. As late as 1747 the town petitioned the General Court to fortify this town from the Indians by building garrisons, and with a suitable number of men for its defense.

Among those killed by the Indians was the first minister of Rutland, Rev. Joseph Willard, and Samuel and Joseph Stevens, who were killed the same day, the 14th of August, 1723. On the morning of this day Deacon Joseph Stevens, with his four sons, left home to go to Meeting-house Meadow to make hay. While thus engaged they were surprised by five Indians. Mr. Stevens escaped to the bushes, two of his sons Samuel and Joseph, were killed and scalped, and the other two, Phinehas, the oldest, and Isaac, the youngest, were carried into captivity. They were taken to Canada, where they were held for more than a year, and were redeemed only after great trouble and expense. Deacon Stevens made two journeys to Canada in their behalf, which, it is said, with other expenses, so reduced his circumstances that he had to be assisted in his old age by the town he had done so much to build up. He lived on house-lot No. 15, where Mr. B. F. Browning now lives, about seventy-five rods west of the meeting-house. The older brother, Phinehas, would, while on that long and weary march to Canada, take his little brother Isaac upon his back and carry him till rested.

Isaac was so young that he acquired Indian habits—was taught their warfare, and by fighting little Indian boys with lances, etc., his body was punctured and scarified.

It is said that his squaw mother so won his affections that he would willingly have stayed with the Indians. Phinehas was married in 1734, lived in Rutland several years and was an active and useful citizen. He removed to Charlestown, N. H., and was a prominent man in building up and defending that place. Isaac married Mercy, daughter of Captain John Hubbard, in 1743, and settled in Rutland.

After the circumstances above narrated two of this same party of Indians came upon Rev. Mr. Willard, who was supposed to have been at work making hay or hunting (for he had his gun with him) in "Ministry" meadow, what is now flowed by Moulton Pond. One of their guns missed fire, the other did no execution. Mr. Willard returned the fire and mortally wounded one of the Indians; the other closed in with Mr. Willard, who would have been more than a match for him if the other three had not come to his assistance. It was a considerable time before they succeeded in killing Mr. Willard, however. Phinehas Stevens beheld a part of this tragedy. It must have been a painfully sad event in the early history of Rutland. Joseph Wood, Uriah Ward and James Clark were killed by the Indians August 3, 1724, the last known to have been killed by them in this town.

## CHAPTER CLXIV.

### RUTLAND—(*Continued.*)

*Ecclesiastical History—Cemeteries—Physicians—Business Enterprise—Civil War—Grand Army—Dedication Soldiers' Monument—Eminent Men.*

THE early settlers were people of strong religious conviction, and a year prior to the incorporation of the town, in 1722, they erected a house of worship and selected Rev. Joseph Willard to be their minister, who was murdered by the Indians a few days before the time set for his installation. Mr. Willard had been an ordained minister in Sunderland, this State. The town remained without a settled pastor until the ordination of Rev. Thomas Frink, November 1, 1727. A strong Presbyterian element developed in the church, and about forty withdrew and built a house for worship at or near the junction of the Paxton and Spencer roads, not far from the house owned by the late Summer Putnam. Having certain privileges granted them, the house was taken down and set up in Rutland "West Wing," or what is now Oakham. In consequence of so many withdrawing from the church Mr. Frink tendered his resignation. At first the church did not grant his request. His request was renewed and laid before the town September 8, 1740, which "voted that the town is willing that the Rev.

Mr. Frink should be dismissed from his pastoral relations to the church and do refer the manner of his dismission to the church." Thereupon the church "voted that the church do comply with the pastor's request, and accordingly dismiss him from his pastoral relation to the church and town, and recommend him to the grace of God and holy church fellowship." At a church meeting, November 17, 1741, it was voted to extend a call to Rev. Joseph Buckminster, in which the town concurred, December 9, 1741. He was ordained September 15, 1742. It was said at the close of his ministry that the town and the church were so well united in him that every person in town who paid any taxes, paid a part of his salary (which was sixty-five pounds in gold or silver and the use of the ministerial lands). He died November 3, 1792, in the seventy-third year of his age and the fifty-first year of his ministry. Mr. Buckminster came from Framingham to Rutland, having graduated at Harvard University in 1739. He bought and lived on the south side of the road, a hundred rods west of the meeting-house. It was said of him that "he had a dignified and ministerial appearance, wore a gray or white wig, cocked hat and white bands; was a man of talents and learning, and set his face like a flint against immorality of every kind." In 1793 the church invited the Rev. Hezekiah Goodrich to settle with them in the gospel ministry, in which the town concurred, April 15th. Mr. Goodrich, in his answer, said: "Permit me here to acknowledge my affectionate gratitude for the respect paid me in this act of yours. Permit me further to say that the several steps you have taken relative to this matter have not failed to gain my most serious attention. When I heard of the unanimity of the brethren of the church, and was presented by their committee with a vote expressive, as they said, of their sincere desire and earnest request that I should consent to settle with them in the gospel ministry, and when I was informed of the general harmony of the society in concurring with the same, and the comfortable provisions made for my support (which was one hundred pounds per year), I could no longer remain indifferent to your wishes, etc." Mr. Goodrich's ordination occurred June 19, 1793, and he continued his pastoral relations with the church until his death, February 7, 1812. Mr. Goodrich was born in Wethersfield, Conn., and secured his education at Yale College. He bought and built an house-lot 62, which was originally laid out as the ministry lot, December 15, 1812. The church voted to invite Rev. Luke Baldwin Foster to take charge of the church. The town being legally warned and convened, voted "to concur with the church in the choice of Mr. Foster for their pastor." Mr. Foster was duly ordained February 24, 1813, and lived only about four years to dispense the gospel to this people. He died May 23, 1817, at the age of forty-eight years. The church voted unanimously, March 30, 1818, to invite the Rev. Josiah Clark to become their pastor,

and on April 14th the town unanimously concurred, and he was ordained on June 2d of that year. Mr. Clark died July 11, 1845, at the age of sixty years. During his pastorate of twenty-seven years he won the hearts of all his people, and his memory is still dear to many of the older citizens of the town, who so well remember his labors among them. His portrait, life-size, is hung in the church at the rear of the pulpit, through the kindness of the Hon. J. W. Bigelow.

Rev. Daniel R. Cady was ordained October 29, 1845, and dismissed October 11, 1849. He afterwards settled at Arlington and Westboro', where his widow still resides. Rev. George E. Fisher was ordained February 27, 1850, and dismissed May 13, 1852. Rev. David Burt was installed January 10, 1856, and dismissed February 25, 1858. Rev. Clarendon Waite was ordained February 25, 1858, and dismissed March 13, 1866. Rev. Henry Cummings was installed September 5, 1866, and dismissed July 1, 1874. The five above-mentioned pastors were dismissed at their own requests. Rev. Geo. S. Dodge was installed December 27, 1877, and, after a successful pastorate of nearly twelve years, is still in great favor with the people. Although there have been long intervals between the dismissal and settlement of pastors, yet the deficiencies have been filled for the most part by able and learned clergymen. The above record is something of the history of those pastors who have been ordained or installed over the First Congregational Church in Rutland since 1721, who have, without exception, been able and eminent Christian men, under whose lead and direction the church and town have been greatly blessed. They have been able to "come in and go out before this people" in such a way as to rarely ever cause dissension or division in the church or community.

About 1840 the Methodists began to hold meetings. They soon formed a church and society, and had stated preaching in the Town Hall till 1844, at which time they built a house of worship on the south side of Main Street, nearly opposite the Congregational Church. The society flourished for some time, but after about fifteen years, when many of the ablest members had died or left town, the society was given up and the church building allowed to run down. In 1865 the house was purchased by James G. Read, of this town, who purposed to fit it up for tenements, but, owing to some dispute in the title, he never carried his plans into execution. In 1881 the Catholics, having held services at intervals in a house at the junction of the "Irish Lane" with the Barre and Paxton road, in looking about for a site to build a church, finally bought this old building and put it in excellent repair, where they hold services every alternate Sunday. The Adventists in 1874 built a chapel at North Rutland, where they have held services regularly. The society, being poor, have not been able to employ a pastor, but have had to depend

upon pastors and laymen from other churches and places.

The first church edifice that was built in Rutland was erected in 1720, and occupied in 1721, a year before the incorporation of the town. It was located near the southeast corner of the old burying-ground, and was forty and one-half feet long by thirty feet in width, with galleries. In 1759 a second house was built in front of the first, which was much larger, being sixty feet long by fifty feet wide, with posts, twenty-four feet, and said to have been a well-finished house. The town in 1760 chose a committee to sell the old church. There is no record to be found of their report; but, as the treasurer's report shows a credit to Colonel Murry, who was one of the committee, for £13 10s. it is to be supposed that he purchased and removed the building for a tenement on one of his estates. The second church was burned February 28, 1830, supposed to have taken fire from the stove, as it was discovered to be on fire about half an hour after the services ended on that Sunday.

About two-fifths of the society at this time signed off. Those that remained rebuilt during the same year a house seventy-seven feet long by forty-eight feet wide and twenty-feet posts, with a tower. On October 11th of the same year the pews were sold within a few hours for enough to pay for the house and land it stood upon, after reserving a pew for the minister and six others for strangers. This house was burned January 7, 1849. The present house was built that year on the same spot, and dedicated February 15, 1850. The dimensions of the building are seventy-two feet long by fifty wide and twenty-four-feet posts, with a handsome spire one hundred and twenty feet high. The house is quite an imposing looking structure. It was built at a cost of eight thousand dollars, and considered at that time one of the finest country churches in the country. The basement remained unfinished until 1876, when the Ladies' Benevolent Society, aided by contributions from friends, finished a very pleasant and commodious vestry, with ladies' parlor and kitchen adjoining, which is much enjoyed by the church and society. A clock was placed on the spire in 1885, the gift of former residents of the town.

The old burying-ground, lying west of the town hall, was laid out and given to the town by the Grand Committee, in 1743, containing about four acres. It was used for a public burying-place about one hundred years. In 1842, June 30th, Colonel C. G. Howe, with sixteen others, formed themselves into a corporation, under authority of the General Statute, with the title of the "Rural Cemetery Association of Rutland."

The first purchase of land contained about three and one-half acres, and a subsequent purchase was made of two acres and one-fourth—in all, five and three-fourths acres. Roads were built, lots located and the ground publicly consecrated October 8, 1842.

Rev. Josiah Clark delivered the address. The spot selected was one-half mile east of the Centre, opposite the residence of O. C. Fairbank. The location is naturally adapted for this purpose, the soil being sandy and the surface diversified by gentle depressions and elevations. More than three hundred lots have been fitted up, and the many monuments, tablets and headstones evince that the living honor the memory of the dead. At New Boston (so called) is a cemetery still used for burial purposes. There is also a well-kept cemetery in West Rutland.

Rutland has been favored with educated and skilled physicians. The first doctor we have any records of was Dr. Hezekiah Fletcher, who lived fifty-six rods east of the meeting-house, and died in 1754. His son, Dr. Alpheus Fletcher, succeeded him, but died, after practicing twelve years, in 1766. Dr. John Frink, son of Rev. Thomas Frink, next succeeded to the practice, who, together with his son of the same name, practiced in town for more than eighty years. They lived on the Paxton Road, about one hundred rods south of the centre of the town, on the place now owned by R. C. Prescott. The following named gentlemen have practiced in town since 1836: Drs. Clapp, Saltmarsh, Ordway, Safford, Warren, Tripp, Newell, Rood, Herbert, Slocum, Fellows, Shannon and W. E. Chamberlin, the present physician.

All of the above-mentioned are dead, except Shannon and Chamberlin.

Of those who practiced the longest was Dr. B. H. Tripp, whose term commenced in 1849 and ended at his death, in 1873. He built up a large practice in this and adjoining towns, to which he closely applied himself. He was held in esteem by the fraternity, and was often called in counsel on important cases. Dr. Tripp, with twelve other petitioners to the Legislature, May 10, 1869, were granted power to locate and build the Massachusetts Central Railroad from Williamsburg, in Hampshire County, to Mill Village, in Sudbury, in Middlesex County. None of the projectors of this enterprise did more to organize and conduct the necessary preliminary work than he. Had it not been for his efforts this town might not have been favored with the good railroad facilities we now enjoy.

In comparing the business industries of fifty years ago with the present time, we find that there were in operation four grist-mills, six saw-mills, one chair factory, one satinet factory and one shoe-peg factory. Now we have five saw-mills, two shoddy-mills, one box-mill, one turning-mill, one basket factory, two woolen-mills and one butter creamery. During this period there sprang up quite a flourishing boot and shoe business. M. S. P. Dean built a large shoe-shop about three hundred feet in the rear of his hotel, where the "Muschopauge House" now stands, and carried on the manufacturing of boots and shoes for several years, employing thirty or forty hands.

Perhaps nearly or quite as many more took out piece-work from this shop and other shops in adjoining towns. This industry has nearly all died out, and there are probably not more than a half-dozen persons in town who are in any way engaged in the business. There was also carried on, for nearly fifty years, by the late David W. Fletcher, on "Pound Hill," one mile east of the Centre, a large carriage-building and repairing business. He had skilled workmen employed to build new work or repair, and make good any broken or defective part. Mr. Fletcher received the larger part of the patronage from this and the adjoining towns, which he was able to keep until he was eighty years old, when declining years forced him to give up the business. He died in 1877, in his eighty-fourth year. Mr. David F. Smith has a carriage repair-shop at the Centre, where all the business is done in that line that is now done in town. The basket business at West Rutland, started by C. & A. J. Pierce, has also sprung up, where ten or twelve men are employed, and steam-power is used. In 1886 quite a number of the citizens, mostly farmers, organized themselves into an association, for the purpose of making butter, under the title of the "Rutland Co-Operative Creamery Association."

It had become quite a serious question with many farmers, who found it almost impossible to manufacture their dairy products at home, on account of the overworked housewife and the incompetency of servants, to find out the best way of disposing of this particular work. A good substantial building was erected and equipped, with suitable machinery and apparatus, and commenced the manufacture of butter the same year the company was organized. The services of Mr. E. J. Prouty, of this town, who had been a long time engaged in the business in the West, was secured to take the management of the business. The butter produced is uniform in quality and uniformly good, has a high reputation and so great is the demand that it is impossible to fill the orders. There are two stores at the Centre—one kept by F. A. Nichols and the other store, post-office and market by H. Converse. Two at West Rutland—one by J. W. Adams and the other store and market by F. B. Stearns; also one store at North Rutland, kept by C. H. Young.

Rutland being an agricultural town, farming must be the leading industry. There are many well-kept farms, which testify to the good management of the owners. Although the condition of the farmer has very materially changed within the past forty or fifty years, yet his condition is not so deplorable now as some would have you believe. Many of the products which he then could raise with profit for the market are met with such competition from the West that he has to turn his attention to raising and producing such crops as find a ready market at good prices. Because fortunes are not made rapidly by

farming, and the city affords greater attractions, only a few young men stay on the farm, yet, undoubtedly, a larger per cent. of those who do remain meet with success in life than of those who go away. The fathers and mothers being left thus alone, or to carry on the farm with the assistance of such help as must be accepted, often become discouraged, and sell the "old homestead."

Many farms have changed ownership during the past few years. But very few have been deserted, however, and some of our best farmers are among those who have recently come into town. A "Farmers' Club" has been in successful existence for nearly twenty-five years, and its meetings afford excellent opportunity for the interchange of views on farm topics.

The same spirit was aroused at the commencement of the Civil War that possessed those who fought for our independence. At the breaking out of the war about fifty of our young and middle-aged men responded to their country's call, and at the subsequent calls for men Rutland was not behind in filling the quota. She furnished more than one hundred men for the war, about twenty-five per cent. of whom died in service or were killed in battle.

The town was ever ready to assist and remunerate those who served their country in time of peril. At a meeting of the town May 2, 1861, the town voted, "In view of the present critical condition of our beloved country, and for the purpose of aiding and assisting such of our citizens as may, or have been, so patriotic as to volunteer their services in defence of their country, hereby resolve that we will make up their pay to one dollar per day with what they shall receive from Government, etc."

At a meeting called July 26, 1862, the town "voted to appropriate the sum of \$1600, to be paid out as a bounty in sums of \$150, to those who will voluntarily enlist before the 1st of September next, to make up the quota to serve for three years under a call of the President July 2, 1862." It was voted in August of the same year "To guarantee the sum of \$100 each, to be paid to such of our citizens as may voluntarily enlist and be sworn into the service of the United States before the 1st day of September next, to make up the quota of three hundred thousand men to serve for nine months under a call of the President August 4, 1862." The town has generously disbursed aid to deserving soldiers and their families. It is said that every soldier who went from or belonged to this town had an honorable record.

Several of the returned soldiers applied for and obtained a charter July 1, 1870, to organize a "Post of the G. A. R., under the name of Major George C. Marshall Post No. 136." This organization numbers about forty members and is in a flourishing condition. In its early existence it started what was called the "Soldiers' Monument Fund," and for this object it labored several years, by holding fairs, having lec-

tures, etc.; then uniting with the citizens under the title of the "Rutland Soldiers' Monument Association," with united effort and an appropriation of five hundred dollars from the town, erected in 1879 a handsome monument to perpetuate the memory of those who enlisted to put down the Rebellion, twenty-two of whom laid down their lives in the service. The monument is of Pittsford, Vt., marble, twenty-two feet high and five feet square at the base, surmounted by the full-sized statue of a soldier at "parade rest," facing the south or street. It is located in the centre in front of the "Muschopauge House." It is a handsome specimen of artistic workmanship, executed by Murphy & Magone, of the "Boston Marble Works" of Worcester. Besides the names of the eighty-two soldiers engraved on its four sides are the names of some of the prominent battles in which they were engaged: "Antietam" and "Wilderness" on the south, "Kingston" and "Whitehall" on the east, "Newbern" and "Vicksburg" on the west and "Roanoke" and "Goldsboro'" on the north. On the front above the "die" is a finely-chiseled representation of the national coat-of-arms, and on the pedestal or base, "Erected in 1879." It was erected at a cost of a little less than fifteen hundred dollars. The monument was dedicated July 3, 1879, the occasion drawing together from this and other places the largest number of people that ever congregated here. Had the day opened pleasantly a much larger number would have been present, many of the G. A. R. Posts being kept away by the threatening clouds of the early morning. As it was, fifteen posts were present, accompanied by four bands of music. The exercises of the day were delayed a considerable time beyond the printed programme on account of the weather, but the clouds broke away in season for a full carrying out of the programme, though at a later hour.

The Committee of Arrangements were C. R. Bartlett, A. K. Learned, A. B. Fisher, Major M. B. Bessey, Rev. G. S. Dodge, Mrs. Mary J. Smith, Mrs. L. A. Baker and Mrs. E. W. Hubbard. The Committee on Reception were Hon. J. W. Bigelow, Dr. J. G. Shannon, William J. Stearns, Deacon R. B. Miles, and B. W. Potter, Esq., the latter representing Worcester. The Committee of Reception established their headquarters at the residence of Mr. Bigelow, nearly opposite the monument; it was profusely and handsomely decorated for the occasion with bunting and flags, with an evergreen archway over the gateway, enclosing the words,—"Reception Committee's Headquarters."

The exercises of the day began about noon with the moving of the procession from the vicinity of the Town Hall, where it had been formed as delegations from out of town arrived. The procession moved under the chief-marshalship of Captain C. W. Dodge in the following order to the monument, around which the bands of music were encircled, and while

they played several patriotic airs, Mr. Murphy, the builder, removed the veil just as the procession began to move. First in line were the fifteen Grand Army Posts, with over four hundred men; next, invited guests in carriages; thirty-eight young ladies representing the "Personation;" children of the public schools, visitors and citizens generally. The huge tent, which had been erected close by the monument, where the speaking exercises were to take place, was soon filled. The company was called to order by C. R. Bartlett, president of the day, who, after preliminary remarks, introduced the chaplain of the day, Rev. George S. Dodge, who read from the Scriptures and offered prayer. The children of the public schools then sang under the direction of Mr. H. M. Lyon, of Holden, "Our Country, the Land of the Free;" after came the novel and exceedingly interesting exercise of the "Service of Personation" by thirty-eight young ladies in appropriate costumes, each representing a State of the Union. All were attired in white and arranged upon a pyramid of seats, surmounting the whole being the "Goddess of Liberty." This beautiful feature of the day's program was under the direction of Mr. A. K. Learned, and was a very fine affair. At the conclusion of this "Personation" the audience sang with effect the old hymn of "America," accompanied by the bands of music. Next came the dedicatory address, which was delivered by Rev. Joseph F. Lovering, of Worcester, chaplain-in-chief of the Grand Army of the Republic. This was a very able and eloquent production, and well received. He began by referring to some of the principal points in the early history of the town, the important part borne by its citizens in the Revolutionary War and the War of the Rebellion. Emphasizing his confidence in a hopeful future, judging from the glorious record of the past in our country, he concluded by saying: "With this hope speaking from yonder statue, quickening the pulse-beats, I look with courage into the future; I see villages cluster on the hill-sides and on the distant prairies; I see lakes and rivers and seas populous with the freightage of states and nations; I see railroads and telegraphs enmesh the land; I hear the hum of Briarean-armed industries along the country streams and within the populous cities; I see homes bud and blossom and bear fruit, and virtue increase, and intelligence rise, and of all such progress there is no conceivable end. As I see the nation in its outgoings, and seek to survey its probabilities, I see no setting sun. It rises higher and higher still in its full-orbed meridian splendor. Let us go forth into that day. Let us rejoice that our nation is the nation whose feet walk in the path built of material stronger than New England granite, even New England righteousness and truth, whose arms renew their strength like the wings of its eagle, whose eyes look beyond its stars for the homes of its destiny. Let us rejoice in the hope that when it

shall enter into the fulness of the day before it, it shall not only give honor to the heroism of the fathers or to the patriotism of the statesmen of the citizens, but it shall give honor, also, illustrious and well-deserved, because of his heroic patriotism, and his patient heroism to the immortal memory of the Union soldier." Dinner was served at two o'clock. The exercises of the afternoon commenced at three, with singing by the children,—*"The Flag of our Country,"* after which the president of the "Soldiers' Monument Association," Mr. C. R. Bartlett, in behalf of the association, presented, with appropriate remarks, the monument to the town, and it was accepted, in behalf of the town, by Mr. M. M. Smith, of the Board of Selectmen. Speeches then followed by Colonel Olin, of the Governor's staff; Major J. B. Fairbanks, of Oakham; B. W. Potter, Esq., of Worcester; Ledyard Bill, of Paxton; Deacon J. T. Everett, of Princeton; Captain J. H. Gleason, of Holden, and others.

Prominent among the early settlers was Capt. Samuel Wright. He held the offices of selectman, assessor, clerk of the town, and moderator of its meetings for many years, justice of the peace, deacon of the church, captain of the militia and surveyor and committee in dividing the lands of six miles square, and recording the same in the proprietors' book, which he did in a very plain and legible hand. Many of the bounds and corners made more than one hundred and fifty years ago can now be found. Mr. Wright kept a tavern in front of the first meeting-house, on the opposite side of the street, where much of the first business of the town was done. (The old records show that the town would frequently during the session of its town-meeting vote to "adjourn for fifteen minutes," which was quite suggestive.) This house was taken down or removed before the Revolution. He died January 15, 1740.

Capt. Peter Davis, although not a proprietor, was an early settler of Rutland, and was one of the most enterprising inhabitants. He was a large land-holder, his lands extending from Mill Brook to Hubbardston line, four miles, on that line five hundred and seventy-five rods. In 1759 his taxes were the highest on the list except Colonel Murry's. He was not only a large land-holder, but did a large business at North Rutland, where, previous to 1759, he built a saw and grist-mill, which was a great convenience to the people of this and adjoining towns. He was a very industrious man, an early riser, and not only interested in his own concerns, but filled many offices in the proprietary, town and militia. Colonel John Murry, with his mother and several others, sailed from Ireland and arrived in America in the early settlement of Rutland. When he stepped on shore he was not only penniless, but in debt for his passage. For a short time he tried manual labor, but he was too lazy to work. Through the assistance of a friend he commenced peddling, then kept a small store, and

was afterward a purchaser of cattle for the army. By enterprise and good fortune he became the most wealthy man in Rutland in his day. He owned lands from east of the meeting-house to the bounds of Dublin and New Boston. He married after his arrival a lady with whom he sailed to America, Elizabeth McClanathan, by whom he had ten children. Mrs. Murry died in 1761. He then married Miss Lucentia Chandler, of Boston, by whom he had one child. The second Mrs. Murry died, and he married, in 1769, Miss Deborah Brindley, of Boston, by whom he had one child. The wives of Colonel Murry were buried in Rutland. He placed horizontally over the graves large, handsome stones, underpinned with brick, with appropriate inscriptions. It was said that on representation day all his friends that could ride, walk, creep or hobble were at the polls, and if any went home dry it was not his fault. He represented the town twenty years in succession. One writer, in speaking of him, said that "After he had ascended the pinnacle of honor he fell out of the United States." Because of his sympathizing with the British rulers, he was threatened with violence, and fled the country. His lands were confiscated and sold. Alexander, his oldest son, did not leave town, but entered the service of his country and was wounded. One of his father's farms was reserved for him by the Government, which also granted him a pension. Colonel Murry was said to be a large, fleshy man, and when dressed in his regimentals, with his gold-bound hat, made a superb appearance. The house in which he lived was seventy-five rods west of the church, on the south side of the street, and was torn down about thirty years ago, having become very much dilapidated. Nothing but the cellar-hole remains to mark the spot.

General Rufus Putnam was born in Sutton, Mass., April 9, 1738. His father died when he was seven years old; he then went to live with his grandfather, where he lived about two years, until his mother again married, and he lived with his step-father till 1753. He had few advantages of schooling and few books of his own. Through perseverance he got pennies enough together to buy a spelling-book and an arithmetic. With these two invaluable articles, the foundation of all, even the most profound learning, he soon made considerable progress in the rudiments of education. At the age of sixteen he was bound as an apprentice to the millwright trade, under his brother-in-law, Daniel Matthews, of Brookfield. There he was not refused the use of candles to pursue his studies during the long winter evenings. His attention was chiefly turned to arithmetic, geography and history. During this portion of his life, from sixteen to nineteen years, he was busily occupied in acquiring the practical art of the millwright. It required some knowledge of geometry to form perfect circles, divide them into numerous equal portions, and lay out the exact angles necessary in building

water-wheels. He thus gradually enlarged his knowledge of mathematics. His physical frame grew full as rapidly as his mind, and at the age of eighteen he was a large muscular man of six feet.

The war between Great Britain and France commenced in 1754. The accounts of the several battles and the exploits of his relative—then Captain Israel Putnam—led him, in his nineteenth year, to enlist as a soldier; his term of service was a little short of a year. Being determined to see more of military life, he joined a corps of Rangers to reconnoitre the southern extremity of Lake Champlain. During this campaign he endured many hardships and many privations. After passing the winter at home and forgetting the sufferings of the last campaign, he again enlisted in the provincial service. Thus far the war had been a continued scene of disgrace and disaster to the crown. He again enlisted April 2, 1759, and was now advanced to the post of orderly sergeant. During this campaign Putnam rendered important service in the erection of fortifications, which totally demolished the French power on the lakes and led to their final expulsion from North America. He returned to Brookfield on the 16th of December. He took an active part in the campaign of 1760, first as recruiting officer and later as ensign in Colonel Wilard's regiment.

In 1761 Mr. Putnam bought a mill and tools on Horse Pond Brook in North Brookfield, where he lived and carried on the mill and a farm connected with it till May, 1781, when he bought one of Colonel Murry's confiscated farms in Rutland for nine hundred pounds, whither he removed and where he made his home till his removal to Ohio, in 1787. He married, in 1761, Elizabeth Ayers, of North Brookfield, who died the same year, leaving an infant, which survived but a few months. In January, 1765, he married Persis Rice, daughter of Zebulon Rice, of Westboro', by whom he had a numerous family of children.

Mr. Putnam entered the Revolutionary War as lieutenant-colonel of Colonel David Brewer's regiment. His regiment was stationed at Roxbury, in General Thomas' division of the army, soon after the battle of Lexington. The general and field-officers of this division, after the battle of Bunker Hill, met in council to determine the best course to pursue in their present almost defenceless situation, exposed at any time to an attack of the enemy without any better protection than a board fence. It was decided that lines should be thrown up for the defence of the town. When this was decided the difficulty arose where to find a man capable of directing the works. Military engineers were rare among the colonial troops. At length it was mentioned to General Thomas that Colonel Putnam had seen some service in that line in the late war against Canada, but upon being solicited to undertake the work he frankly told the commander that he never had read a word on

that branch of science. The general would take no denial, and Colonel Putnam reluctantly set about tracing out lines in front of Roxbury, towards Boston and various places in the vicinity, especially at Sewel's Point. While thus engaged Generals Washington and Lee came over to view the condition of the troops. They so highly complimented his works that he was encouraged to persevere. All the defences of Roxbury, Dorchester and Brookline were of his construction.

In the winter of 1776, while General Washington was deeply engaged in making an attack on the British army in Boston, he invited Colonel Putnam to dine with him. They discussed the matter freely of storming the city. It was agreed that if they could maintain themselves on that neck of land, the command of the town and harbor would be such as would compel the enemy to leave the place. The cold weather that had made a bridge of ice, so that a passage was opened for them to advance upon Boston, had also frozen the earth to such a depth in the open country of Dorchester Neck as to make it impossible to throw up a line of earthworks. However, Washington told Colonel Putnam to consider the matter and report to him immediately. He describes what follows as providential. "I left headquarters in company with another gentleman, and on our way came by Gen. Heath's. I had no thought of calling until I came against his door, and then I said, 'Let us call on Gen. Heath,' to which he agreed. I had no other motive than to pay my respects to the General. While there I cast my eye on a book which lay on the table, lettered on the back, 'Muller's Field Engineer.' I immediately requested the General to lend it to me. He denied me. I repeated my request. He again refused, and told me that he never lent his books. I then told him that he must recollect that he was one who at Roxbury, in a measure, compelled me to undertake a business which, at the time, I confessed I never had read a word about, and that he must let me have the book. After some more excuses on his part, and close pressing on mine, I obtained the loan of it."

In looking at the contents his eye was caught by the word "chandelier," a new word to him. He read carefully the description and soon had his plan ready. The chandeliers were made of stout timbers ten feet long, into which were framed posts five feet high and five feet apart, placed on the ground in parallel lines, and the open spaces filled in with bundles of fascines strongly picketed together, thus forming a movable parapet of wood instead of earth. The men were immediately set to work in the adjacent orchards and woodlands cutting and bundling up fascines and carrying them, with the chandeliers, on to the ground selected for the work. They were put in their place in a single night. When the sun went down on Boston on the 4th of March, Washington was at Cambridge and Dorchester Heights as nature or the

husbandman had left them in the autumn. When Sir William Howe rubbed his eyes on the morning of the 5th he saw through the heavy mists the entrenchments, on which, he said, the enemy had done more in a night than his whole army would have done in a month. Howe took prompt measures to attempt to dislodge the Americans the next night, before their works were made impregnable. But, by another providence, a "fearful storm at night" made it impossible to cross the bay until the American works were perfected. And thus, no doubt, the first great military success or achievement of this kind of the Revolutionary War was due to Rufus Putnam. Senator Hoar, in a recent centennial address, said: "The veteran British army, aided by a strong naval force, got out of Boston before the strategy of Washington, the engineering of Putnam, and the courage of the untried yeomen." In August, 1776, Congress appointed him engineer, which was announced by General Washington to him as follows:

NEW YORK, Aug. 11, 1776.

COLONEL PUTNAM:

Sir:—I have the pleasure to inform you that Congress has appointed you an engineer with the rank of Colonel, and pay of sixty dollars a month. I beg of you to hasten the sinking of vessels and other obstructions in the river at Fort Washington, as fast as possible. Advise Gen. Putnam constantly of the kind of vessels you want and other things, that no delay that can possibly be avoided may happen. I am, sir, your assured friend and servant,

G. WASHINGTON.

Colonel Putnam was placed in charge of the important fortifications at West Point. He took an important part in the capture of Burgoyne, and on the 8th of January, 1783, was commissioned a brigadier-general in the army of the United States.

Before the war broke up a petition of two hundred and eighty-eight officers was sent to Congress for a grant of lands north and northwest of the Ohio River to the veterans of the army in redemption of the pledges of Congress. General Putnam was the leader in this movement. A year later he renews his request to Washington for aid in this project, to which Washington replied that he has exerted every power with Congress that he is master of, but Congress adjourned without action. In 1785 Congress appointed General Putnam one of the surveyors of the northwestern lands. He says in his letter, accepting this office, that "a wish to promote emigration from among my friends into that country, and not the wages stipulated, is my principal motive." His engagements were such that he could not leave Massachusetts that year, having been appointed by the Legislature one of a committee for the sale of the eastern lands held by the Commonwealth, and also superintendent of the surveys to be made that year. At his request General Tupper, an old associate, was appointed by Congress in his stead one of the surveyors of lands lying northwest of the Ohio River. In January, 1787, he volunteered to assist General Lincoln in suppressing Shays' Rebellion. In April he was appointed justice of the peace, and in May of the same year was chosen

Representative of the town of Rutland. After the return of General Tupper from his partial survey of the Ohio country, he visited his old friend and comrade General Putnam, at his home in Rutland, and during this visit, on the 9th of January, 1786, a conversation occurred between General Rufus Putnam and General Benjamin Tupper, as they sat before the great fire-place in Putnam's farm-house during that winter evening. They conversed long and earnestly of their long-cherished plans. The old soldiers so strengthened each other's faith in the future that they could no longer rest inactive. They joined in a brief address to the people, proposing a plan of organization. This first appeared in the newspapers of Boston January 25th, under the caption of "Information," signed by Rufus Putnam and Benjamin Tupper, and dated Rutland, January 10, 1786. The subscribers stated that they took "this method to inform all officers and soldiers who have served in the late war, and who are by a late ordinance of the honorable Congress to receive certain tracts of land in the Ohio country, and also all other good citizens who wish to become adventurers in that delightful region, that from personal inspection, together with other incontestable evidences, they are fully satisfied that the lands in that quarter are of much better quality than any other known to the New England people; the climate, seasons, products, etc., are, in fact, equal to the most flattering accounts that have ever been published of them; that, being determined to become purchasers, and to prosecute a settlement in that country, and desirous of forming a general association with those who entertain the same ideas, they beg leave to propose the following plan, viz.: That an association by the name of the Ohio Company be formed by all such as wish to become purchasers, etc., in that country who reside in the Commonwealth of Mass. only, or to extend to the inhabitants of other states, as shall be agreed on." It was further proposed that in order to bring such a company into existence all persons who wished to promote the scheme should meet in their respective counties at places designated, on the 15th of February following, and choose delegates, who should assemble at the "Bunch of Grapes Tavern," in Boston, on Wednesday, the 1st day of March, 1786, and there determine upon a plan of association.

The delegates at that historic meeting were Manassah Cutler, of Essex County; Winthrop Sargent and John Mills, of Suffolk; John Brooks and Thomas Cushing, of Middlesex; Benjamin Tupper, of Hampshire; Crocker Sampson, of Plymouth; Rufus Putnam, of Worcester; Jelaiel Woodbridge and John Patterson, of Berkshire; and Abraham Williams, of Barnstable. It was decided to raise a fund of not less than one million dollars, in shares of one thousand dollars each.

After about a year another meeting was held at Brackett's Tavern in Boston, and it was reported that, although only two hundred and fifty shares had been

subscribed for, there were many in Massachusetts, also in Connecticut, Rhode Island and New Hampshire, who were inclined to become adventurers, and who were only restrained by the uncertainty of obtaining a sufficient tract of country collectively for a good settlement. It was now decided to make direct and immediate application for the purchase of lands in the territory northwest of the Ohio River, and as an agent to negotiate with Congress, the association chose one of their own number, Rev. Manassah Cutler, pastor of a little Congregationalist Church in the hamlet of Ipswich (now Hamilton), Mass. Dr. Cutler labored most zealously for the cause, especially with the Southern members, and so won their friendship, by his genial, hearty manner, that the ordinance was passed.

The contract exceeded by far any ever before made in the United States. It contained one million five hundred thousand acres upon the Ohio, at the mouth of the Muskingum.

In December, 1787, the advance detachment was sent out under command of Major Haffield White, being sent ahead to build boats upon the Youghiogheny, a small affluent of the Monongahela, in Western Pennsylvania. Another party started January 1, 1788, which General Putnam would have commanded but for business, which led him to New York; he, however, joined them on the 24th in Eastern Pennsylvania, and at length, after three months of hardship and misfortune, they reached what is now "Marietta," and thus was begun, by forty-eight men from Massachusetts, the State of Ohio and of the Northwest Territory.

The contract price of the "Ohio Purchase" was one million dollars. The total valuation of real and personal property for taxation in 1880 was forty-six million five hundred and eighty-one thousand two hundred and ninety-two dollars, showing an annual increase on that price of fifty per cent. It is said that there is no other colony in the whole West in which the original and distinguishing characteristics are so distinctly preserved as in Marietta, Ohio. It has a peculiarly Eastern or New England aspect; the substantial buildings, the stately elms, the spacious door-yards offer a pleasant suggestion of the New England village.

It is hard to refrain from saying more concerning this distinguished man, who, for five years and more, made his home in Rutland. The old house in which he lived is still in fine condition, and is owned by Mr. E. F. Meade. It is really the most historic place in town, and perhaps deserves the space we have given to it. About fifty persons emigrated or followed General Putnam from Rutland to Ohio.

A relative of General Rufus Putnam by the same name came from Warren, Mass., and settled in this town about 1809. He practiced law, was a justice of the peace, and was the means of settling many differences of the inhabitants in a peaceful way, always

recommending an adjustment of the difficulty without the help or exercise of the law. He was a man in whom the people had great confidence, and many persons who were at variance became reconciled, and were also saved expensive lawsuits, by heeding his counsels. His son, Mr. George A. Putnam, has held the office of town clerk for twenty-five years successively.

Deacon Jonas Read, author of "Read's History of Rutland," was born April 21, 1759; died June 2, 1839. No historian writes his own biography. Mr. Read was one of Rutland's most valued and useful citizens. He built thirty-two of the seventy parts of the forty-three miles of turnpike built from Amherst, through the towns of Pelham, Greenwich, Hardwick, New Braintree, Oakham, Rutland, Holden, Worcester, to the great road in Shrewsbury, and had charge of a portion of this turnpike for many years. He held many offices of public trust, and collected and arranged a valuable historical work up to the year 1836, which was reissued with a supplement up to 1879, by Daniel Bartlett, of this town. From this history many quotations are brought into this work, for which the above authors are entitled to due credit.

The following persons belonging to Rutland have held offices in the county: William Caldwell, Esq., sheriff from 1793 to 1805; Moses White, sheriff from 1811 to 1812 and justice of the Court of Sessions in 1807; Daniel Clap, Esq., from 1784 to 1816; Francis Blake, clerk of the court, 1816 and '17; J. Warren Bigelow, County Commissioner from 1862 to '77.

The following gentlemen have represented the town in the Senate and House of Representatives: Hon. John Fessenden, Senator from 1787 to '91; Hon. Francis Blake, Senator from 1810 to '12, and from 1813 to '15; Hon. Thomas Blood, Senator from 1816 to '18; George S. Flint, Representative, 1836 and '37; Calvin G. Howe, 1838; William Davis, 1839 and '40; Warren Flagg, 1841; Henry Brigham, 1843 and '44; D. W. Fletcher, 1845 and '46; William F. Davis, 1847 and '48; George A. Gates, 1850; D. W. Fletcher, 1851; Miles Demond, 1853; Charles M. Temple, 1854; Abram H. Temple, 1855; J. Warren Bigelow, 1856; Franklin Hathaway, 1859; Z. G. Gates, 1861; Joseph Davis, 1862; Alonzo Davis, 1865; Willis Smith, 1868; Moses Smith, 1873; Charles R. Bartlett, 1878; and Richmond H. Potter, 1883.

Rutland was the residence, for a few years, of the late "Madame Jumel," who died in New York in 1865. In 1794 a poor vagrant family, consisting of a young girl, her sister, mother and step-father, came into this town. They had been shipped from "pillar to post," having been helped by the authorities of one town over the line into another, coming from North Brookfield to Rutland. The names of the girls were Polly and Betsey Bowen, the mother's name Phebe and the step-father's name Jonathan Clark. It is

said that their "manner of life" previously may be inferred from what it was in Rutland. They lived in a small one-story cabin, partly under ground, about fifteen or twenty feet in area, built into the southerly side of a hill, called "Goose Hill," in what is known as "New Boston." The site of their house is now included in the town burying-ground, and stood where the gate now stands. It had but one room, which the whole family occupied in common, with a single chimney on one side; with two doors, leading respectively to the road and to the roof. Just within the front door, opening upon a road now discontinued, Clark used to sit on his bench and work at his trade of shoemaking. His wife worked out in the families of their neighbors, to whom she not unfrequently complained of the crossness of her husband. He had been formerly a captain in the Revolutionary War, but had become very much dissipated. The family did not go to meeting, nor the girls to school, and some incidents related by the older people, who in 1834 recollected the family, indicated that the reputation of the young women was not above suspicion.

After living in town a little more than three years, they removed to North Carolina, where Mr. and Mrs. Clark were carried off by an epidemic in 1798. The two girls in some way managed to get to Washington, and afterwards to New York, where Betsey, who possessed great beauty and an attractive manner, captivated the very wealthy French merchant, Stephen Jumel, and became his wife about 1804. Thus the lowly-born, uneducated Betsey Bowen rose from her obscurity and poverty and became the wife of one of the merchant princes of New York, the possessor of wealth and everything that wealth could command. They lived together until 1832, when Jumel died, having settled upon his wife a large estate, and she was designated as "Madame Jumel." But she was destined to fill a much higher and more distinguished social position.

Late in the same year, 1832, she was married to Aaron Burr, who had been Vice-President of the United States from 1801 to 1805, the first term of President Jefferson's administration. This was an ill-advised, unhappy and brief union. He was then seventy-six and she about fifty-five. They separated in 1833, and she applied for a divorce. It is not on record that she obtained a divorce, but she took the name of her first husband, and ever afterward was called "Madame Jumel."

Having unlimited means at her disposal, she spent much of her time in France, and was very much flattered at the French court on account of her wealth and beauty. She was for many years well known in Saratoga, where it is said "that she bought and took possession of a large establishment in one day." Here she made great display of her dress and equipage, riding in a chariot drawn by eight magnificent horses.

The estate settled on her by her first husband consisted largely of real estate in New York City—on Broadway, Seventh Avenue, &c.; a large tract of land on Washington Heights, including the historic mansion of the English Colonel Morris, at one time Washington's headquarters, overlooking Harlem River, in which she resided at the time of her death, being over ninety years of age. After her death her will was admitted to probate, giving the bulk of her estate to the Episcopal Church and its rector at Washington Heights. The members of her family, consisting of a nephew and niece, children of a daughter of her sister Polly, whom she had adopted, and their father, Nelson Chase, Esq., a lawyer of New York City, all of whom resided with her, and had reasonably expected to succeed to her estate, were

obtained, and summoned Mr. Reuben Walker and his sister, both very aged people, who lived neighbors to the Bowens, as witnesses, and they went to New York to give testimony in the case.

**MUSCHOPAUGE HOUSE.**—The Muschopauge House stands in the centre of the town, on the spot where the parsonage was built for the first minister in Rutland in 1723 by Rev. Joseph Willard, who was killed that year by the Indians in a meadow about half a mile north of the centre. In 1762 an addition was built to the west end of the parsonage and opened for a tavern, which was kept for more than a hundred years for a "Wayside Inn." In 1880 it was purchased by the present owner, having become untenable by being so much out of repair. In 1883 the present house was built by

MUSCHOPAUGE HOUSE.

given but little. The late celebrated Charles O'Connor was retained on their behalf, and he brought suit to annul the will. It was in the course of the preparation for the trial of this case, which engrossed all his great learning, and which he intended making the crowning effort of his professional career, that the early history of "Madame Jumel" was hunted up, and the clouds of romance which surrounded it were dissipated.

The will was set aside, and Mr. Chase and his children became possessed of the estate. Two or three other suits were brought by pretended heirs, and the estate has been involved in great litigation. Finally there was a compromise effected with the heirs of Steven Jumel, in France, and Mr. Chase became possessor of "Jumel Mansion" in 1882, where he has since lived.

Pending these lawsuits the counsel for Mr. Chase came to Rutland, where some of the above facts were

Messrs. L. Q. Spaulding and C. R. Bartlett, to satisfy a want of more ample accommodations for summer visitors upon the delightful hills of Rutland. The good patronage the house has received since its opening, June, 1884, attests the appreciation of the guests for such accommodations. This house, unlike many summer hotels, is thoroughly and substantially built, well appointed in every respect, both as to the arrangement and furnishing of rooms and the table, which receives the best attention that experienced cooks and the market affords.

From the observatory can be seen several mountain peaks seventy-five and eighty-five miles distant—Everett, Greylock, Stratton, Dorset, etc.—while in comparatively near view are Monadnock, Watatic, Wachusett, etc., which are clearly seen to their very base. Church spires from fourteen town centres can be distinctly seen. The almost innumerable smooth and well-rounded hills, and the valleys cutting into

each other in every direction, with here and there a lake, a winding stream or roadway, first seen, then lost to view, as it enters a belt of woodland in the valley below, then coming out again on a neighboring hillside, only to disappear once more, and the whole landscape, dotted over with villages and farm-houses, making one of the finest views in New England. The house has nearly four hundred feet in length of piazza, by ten in width. The lawns surrounding the house are large and attractive, comprising more than two acres of ground. The house has accommodations for about one hundred guests. It is under the management of the owner, Mr. C. R. Bartlett, who bought out Mr. Spaulding's interest in 1887.

#### BIOGRAPHICAL.

##### WILLIAM J. STEARNS.

The late Wm. J. Stearns, of West Rutland, who died December 27, 1887, was a son of Adolphus and Nancy Stearns, born in Holden, September 3, 1837, and was a feeble child, the youngest of ten children. He received his education in the public schools of the town; was married to Ellen M. Moore, of the same town, November 14, 1858. At this time he was in a mill at Oakdale, in charge of the weave-room; came to Unionville, in Holden, soon after and worked for Chandler Pratt in the same capacity until the mill closed; then went to Worcester and worked for Washburn & Moen in wire-mill. He came back to Unionville and commenced to manufacture hoop-skirt tape on his own account. Made a good article and was successful, but through the treachery of a friend, had to abandon the business. After this he began to peddle tea and spices, which business he followed until June 27, 1871. His natural inclination leading him again to engage in manufacturing, he moved to Oakdale and manufactured cotton batting and bed-comforters, which he continued to do until the 16th of the following May; he then moved to Tatnuck, where he engaged in the same business, when in the fall of 1872 the mill was robbed and burned. He soon after, in 1873, bought what was known as the Woodis Mill in West Rutland and again started the business of making bed-comforters and cotton batting, making about twenty-four comforters per day and furnishing cotton batting to adjoining towns. He continued this business about two years, when his mill and house were burned April 29, 1876. He set immediately to work and built a much larger and better mill on another privilege, a few rods farther up the stream, when he commenced the manufacture of satinets, running one set of machinery, employing about fifty hands. This was successfully carried on until 1882, when the mill was destroyed by fire. This unexpected calamity would have daunted the courage of

most men; but, with his natural determination to rise above every obstacle that came in the way of his ambition, he set himself to work to secure the assistance of some friend in this emergency, and such a friend was found in the person of N. A. Lombard, of Worcester, through whose kindly aid he was enabled to build, in 1884, a mill of double the capacity of the former, which has subsequently been added to and improved, in which two sets of machinery are operated, and nearly one hundred hands are employed. The mill has been kept running day and night a larger portion of the time, to fill the orders. Mr. Stearns, since his last start in business, has built a large tenement-house, store and market, purchased and improved several estates, among others his own elegant house, and altogether owning more than one-half of the village of West Rutland. Although a very heavy man, weighing more than two hundred and fifty pounds, yet he was very active and delighted in driving a good horse. Mr. Stearns was a man of public spirit, always interested in the welfare of the town, and always favored every enterprise that would tend to promote the public good. He was in every sense of the word a progressive man. He was a kind husband, an indulgent father, being very fond of children. His widow and son, Frederick B. Stearns, continue in the business.

##### DEACON RUFUS B. MILES.

Deacon Rufus Barzillai Miles was born in Rutland, October 23, 1809; son of Barzillai and grandson of Captain Benjamin Miles, who came from Concord, Mass., and was one of the early settlers of Rutland. It is not definitely known when Captain Miles came to Rutland, but it was many years prior to the Revolutionary War, as he was a soldier in this war and died January 28, 1776, in his fifty-second year. He settled on Joyner's Hill, one mile northwest of the centre, on land bought of his father-in-law, Ebenezer Hubbard, which was set off as house-lots Nos. 26 and 27 to Jonathan Waldo, with after-divisions added thereto. Captain Miles was an active and useful man, was chosen into many offices in the town, church and militia. His sons Barzillai and Ebenezer married and settled on these two farms above mentioned.

Deacon Miles, son of Barzillai, was educated in the public schools and at Westfield Academy. He married Judith, daughter of Captain Muzzy, of this town, December 22, 1836, by whom he had seven children, only two of whom are now living,—Lucy M., wife of D. W. Wheelock, of Worcester, and Edward B., of the firm of Whitcom & Miles, of Worcester. Mrs. Miles died in 1852.

He married for his second wife Miss Maria L. Lincoln, daughter of Justus Lincoln, of this town, December 14, 1855, by whom he had three children, two of whom are living,—Etta L., wife of George H.

*W. J. Stearns*

*Rufus B. Miles*

*Mr. R. Moulton*

Miles, and Arthur L., who is to graduate at the Amherst Agricultural College in the class of 1889. Deacon Miles settled on the old homestead, and a little more than twenty years ago bought the adjoining estate formerly owned by his uncle, Ebenezer H. Miles, and uniting it with his farm, made one of the best farms in town. Not very far from this time Mr. Miles built large, convenient and attractive farm buildings. This farm is plainly seen from the centre village, and is admired by all observers. Nor does "distance lend enchantment to the view," for the first impressions are fully realized when you reach and view the premises. It is within one-half mile of Rutland station, on the Central Mass. Railroad, one mile from post-office, church, schools and stores, and is withal one of the most attractive and desirable farms in Worcester County. Mr. Miles has been a practical and successful farmer, and a useful and respected citizen of the town; has filled many offices of trust, having been chosen selectman and assessor, and has also served upon important committees of the town. He has served as deacon of the First Congregational Church since 1850, and was for many years superintendent of the Sunday-school. He is an earnest and sincere Christian, ever ready to counsel and encourage those who are seeking the way of truth and righteousness; is a genial and obliging neighbor, a kind and indulgent husband and father, and a man who is greatly beloved and honored by a large circle of friends. He is now in his eightieth year, enjoying his mental and physical faculties to a remarkable extent.

#### MENZIES R. MOULTON.

Menzies Rayner Moulton was born in Monson, Mass., February 27, 1832; son of Asa and Abigail Moulton, who lived on the old "Moulton Homestead," handed down to them by their father, Daniel, and grandfather, Freeborn (so named because born on the passage from England about 1730), who built the old farm-house in 1763, which is still standing, although having passed out of the family name several years since. He had only the common-school privileges for an education. He spent his boyhood days attending the district school and at work on his father's farm. At the age of fifteen he was apprenticed to learn the brick-maker's trade, which he followed during the brick-making season until after he had attained his majority. In 1852 he married Miss Jane E. Chaffin, of his native town, who died in 1854. Soon after the death of his wife he went to Templeton, and there learned the carpenter's trade, which he followed about three years. Meanwhile he became acquainted with Miss Maria Read, daughter of the late Abel Read, of North Rutland, to whom he was married in 1856. A little more than a year after this marriage he moved to this town because of the illness of his wife, hoping that the careful nursing of her own family friends might restore her to health, but she

died in less than a year from the time of her coming home. In 1858 Mr. Moulton bought out a grocery store at North Rutland, and continued the business until the breaking out of the Civil War. He married, in 1861, Oella L., oldest daughter of Hon. J. W. Bigelow, by whom he had the following children,—Sarah Oella, Joseph Menzies, Augusta Alice, John Warren, Olive Louisa, Albert Chapin, Helen Hannah, Samuel Freeborn and Henry Wilson. All but two of the above-named children are now living, Alice Louisa and Henry Wilson having died in infancy.

He enlisted in 1862 in the service of his country, in Company B, Fifty-first Regiment Massachusetts Volunteer Militia, under the call of President Lincoln for three hundred thousand men, and was in the battles of Kingston, Whitehall and Goldsboro'. He was always found in his place in the ranks; being a man of great physical endurance, he could bear the long and tedious marches far beyond the average soldier. While on a long, forced march, when others would relieve themselves by throwing away their blankets, overcoats, etc., he would gather up such as he could carry and, strapping them to his own knapsack, would march along apparently with the greatest ease, to the envy of all his comrades.

He was thus enabled to add to his own comfort during those damp, chilly nights, and many less fortunate than himself were privileged to share these comforts with him.

On one occasion, during the "Goldsboro' Expedition," after turning into camp for the night, Mr. Moulton was one of only nine men in his company who responded to roll-call.

Although a man naturally slow in his movements, yet there was not to be found his match in the company for running or jumping, which was a favorite sport with the "boys" while in camp. When tested by the trying scenes and privations of war, no murmur or complaint ever came from him. When in the service and since his return he has ever been held in great esteem by his comrades.

After returning from the war he bought the old Bigelow mills at North Rutland, repaired and run the saw-mill until 1866, when he sold to Mr. Cyrus Homer and bought the saw-mill at New Boston, which he owned only about a year. He then bought what was known as the Dr. Frink farm, a little south of the centre of the town, on the Paxton road. From this time up to 1874 he carried on his farm and worked at his trade, building several barns and the school-house in New Boston. He never seemed quite satisfied without a mill, so in 1864 he bought the Captain King saw-mill. This he remodeled by taking out the "up and down" saw and replacing it with a circular saw, which he operated until 1880, when he built his present residence near the mill and sold his farm. He then took out his saw-mill machinery, built an addition to the mill-building, put in machinery for manufacturing satinets with one set of

machinery. Mr. Moulton had never worked for a day in connection with such business, but, by employing persons who were familiar with the different departments of work, he succeeded in producing a quality of goods which found a ready sale at a fair profit. He continued to run this mill until 1882, when it was destroyed by fire, involving almost a total loss. In 1884 he secured assistance to enable him to build a much larger and better mill, convenient for two sets of machinery, although he has only one set yet in operation, employing about twenty-five hands.

Mr. Moulton says that "one of his greatest regrets is that he did not supplement his common-school advantages for an education, by spending his spare moments and winter evenings in useful study." Being naturally fond of music, he became quite proficient in playing the violin, and his services were often solicited for dancing parties, where he spent many of his evenings until a late hour, when his time and mind should have been more profitably employed. He was induced to give up this practice through the influence of his second wife, Miss Reed. Mr. Moulton has held many offices of public trust in this town, having been selectman twelve years successively, most of this time its chairman, and also assessor for many years. He is a man of sound judgment, and by his enterprise and public spirit has done much to advance the welfare of the town.

## CHAPTER CLXV.

### OXFORD.

BY WILLIAM T. DAVIS.

THE TOWN of Oxford lies in the southerly part of Worcester County, only separated from the State of Connecticut by the town of Webster. The central village is built on an extensive plain, surrounded here and there by hills, and its main street is a mile long, nearly one hundred and fifty feet wide and lined by rows of thrifty trees. This avenue, perfectly straight and level, gives to the town a generous and wholesome expression—especially attractive to the stranger. The merchant or professional man, weary with work and enfeebled in constitution, could find no spot within the limits of our State where he could rest his body and brain with so much certainty of recuperation as in one of the many cheerful homesteads along this stately thoroughfare. The territory of which the town is composed was originally within the jurisdiction of the Nipmuck tribe of Indians. On the 16th of March, 1682, the Massachusetts Colony Court passed the following order:

This Court having information that some gentlemen in England are desirous to remove themselves into this colony and (if it may be) to settle themselves under the Massachusetts, for encouragement of such per-

sons, and that they may have some from among themselves according to their nature, to assist and direct them in such a design, this Court doth grant to Major Robert Thompson, William Stoughton and Joseph Dudley, Esqs., and such others as they shall associate, to them a tract of land in any free place containing eight miles square for a township, they settling in said place within four years thirty families and an able Orthodox minister, and do allow to the said township freedom from country rates for four years from the time above limited.

This grant included about sixty-five square miles of land, of which eleven thousand two hundred and fifty acres were set apart for a village. In January, 1685, no movement having been made towards a permanent settlement, the court, in response to a petition of the grantees, ordered that—

"In answer to motion and request of William Stoughton and Joseph Dudley, Esqs., on behalf of Major Thompson and themselves, desiring this Court's favor to enlarge the time of their grant of their plantation, this Court do enlarge the time for settling that plantation therein mentioned the space of three years from this day.

Soon after this extension of the grant a colony of French Huguenots, to the number of thirty families or more, settled on the territory with their minister, Daniel Bondet, and a flourishing community was the result. The conditions of the grant had been met—a ministry had been established, a meeting-house had been erected, agriculture and even small manufacturing industries had sprung up and every indication of a permanent municipality existed. Upon the appearance, however, of hostile Indians, in 1694, the French residents, unaccustomed to Indian warfare, and seeking peace and comfort, after flying from persecution in the Old World, began to retreat to places of refuge nearer the coast. The colony or town gradually faded away, until, at the close of the century, little was left besides the fort, which its people had built for their defence, to show that it had ever existed. The records of the colony disappeared, and though in 1699 a few families returned, their continuance in the territory was for the most part temporary, and it was only by an entirely fresh resettlement that the town, in 1713, breathed the breath of life. Traces, however, of the old Huguenot settlement are to be found along the whole current of the town's history, and the names of Shumway and Sigourney on the records of the town show the survival of at least a portion of the old French blood of 1686.

No formal act of incorporation of the town is to be found. The foundation of the municipality is dated by some in 1713, when the first English settlement began. It is probable, however, that the grant of May 16, 1682, and the act of 1693 authorizing the colony to send a Representative to the General Court, were the only legislative proceedings on the subject. It seems clear then that either 1682 or 1693 should be considered the date of the birth of the town.

There appears to have been no further effort made to occupy the lands until 1713, when, a few English families having entered upon them, the original proprietors of the grant, or their heirs, issued the following proclamation:

*To all persons unto whom these presents shall come :*

Joseph Dudley, of Roxbury, in the County of Suffolk and province of the Massachusetts Bay, in New England, Esq. ; William Taylor, of Dorchester, in the same county, Esq. ; Peter Sargent, of Boston, Esq., and Mehitable, his wife ; John Danforth, Esq., and Elizabeth, his wife ; John Nelson, of Boston, Esq., and Elizabeth, his wife ; and they, the said William Taylor, Peter Sargent, John Danforth and John Nelson, are the heirs and executors of the Hon. William Stoughton, late of Dorchester, deceased, send greeting :

*Whereas*, The General Court of the Colony of the Massachusetts Bay, in the year one thousand six hundred and sixty-two, granted to said Joseph Dudley, William Stoughton and their associates, a certain tract of land in the Nipmuck country eight miles square for a township, as may be seen more at large by the records of the General Court, pursuant whereunto, and for the uses aforesaid, the said Joseph Dudley, William Stoughton and their associates, in the year one thousand six hundred and eighty-six, brought over thirty families of French Protestants into this country and settled them upon the eastern part of the said tract of land, and reserved, granted and set apart 11,250 acres for a village called Oxford for the said families, and bounded it as by a plat upon record will more fully appear ; but forasmuch as the said French families have many years since wholly left and deserted their settlements in said village and the said lands, as well by their deserting the same and refusing to return upon proclamation made for that end, as by the voluntary surrender of most of them, are now reinvested in and restored to and become the estate and at the disposition of the original proprietors, their heirs and successors for the ends aforesaid.

*And Whereas*, There are sundry good families of her Majesty's subjects within the Province who offer themselves to go out and re-settle the said village, whereby they may be serviceable to the Province, and the end and design of the original grant aforesaid be answered and attained :

*Now know ye*, That the said Joseph Dudley, William Taylor, Peter Sargent and Mehitable, his wife, John Nelson and Elizabeth, his wife, and John Danforth and Elizabeth, his wife, for and in consideration and to the uses and intents above mentioned,

Have fully, freely and absolutely, and by these presents do give, grant and confirm unto Samuel Hageburn, John Town, Daniel Eliot, Abiel Lamb, Joseph Chamberlain, Benjamin Nealand, Benoni Twitchel, Joseph Rocket, Benjamin Chamberlain, Jr., Oliver Collin, Daniel Pierson, Abram Skinner, Ebenezer Learned, Thomas Leason, Ebenezer Humphrey, Jonathan Tillotson, Edmund Taylor, Ephraim Town, Israel Town, William Hudson, Daniel Eliot, Jr., Nathaniel Chamberlain, John Chandler, Jr., John Chandler and others, their associates, and as their number amount to thirty families at least, all that part of the said tract of land herein above mentioned: provided always, that if any of the persons, grantees above named, or any of their associates, shall neglect to settle upon and improve the said land with themselves and families by the space of two years next ensuing, or being settled thereon shall leave and desert the same and not return to their respective habitations in the said town upon due notice given, that then in such case it shall and may be lawful to and for the rest of the grantees and their associates, heirs or assigns respectively, or the major part of them, to seize upon and take the said estate or estates of such person or persons so deserting, excepting always and reserving to Gabriel Bemou, merchant, the whole of his right, grant or purchase, which made him one of the original proprietors, as by deed or record thereof may appear.

*In Witness whereof*, The parties above named to these presents have hereunto interchangeably set their hands and seals the eighth day of July in the 12th year of his Majesty's reign Anno Domini 1713.

[Signed]

J. DUDLEY.  
WILLIAM TAYLOR.

ELIZABETH DANFORTH.  
JOHN NELSON.  
ELIZABETH NELSON.

The mystery attending the early settlement and history of the town is in no sense cleared up by this instrument. In its text Oxford is called expressly a town, showing that there must have been some previous legislative enactment creating it. It is known that in 1693, when the French colony was at the high-tide of prosperity, an act was passed allowing

Oxford to send a Representative to the General Court. It may be fair to assume, on a full consideration of all the facts in the case, that this act was intended as a formal act of incorporation, and that the year 1693 should be adopted as the year of the birth of the town. Oxford was at that time in Suffolk County, and it is said by Peter Whitney, in his history published in 1793, that the early records of the town were kept in Boston, and burned in the State House there.

After the resettlement provided for in the above grant the first town-meeting was held on the 22d of July, 1713, under a warrant issued by John Chandler, one of the justices of the peace for Suffolk County, at which John Town, Benoni Twitchell and Joseph Chamberlain were chosen selectmen and John Town town clerk.

In 1714 the thirty families settled on the territory seem to have been represented by the persons named in the above instrument, with John Chandler excluded and with the addition of Isaac Learned, Peter Shumway, Joseph Chandler, John Collier, Joshua Whitney, Thomas Hunkins and Ebenezer Lamb. In that year the head of each family received by lot a tract of thirty acres of land.

On the 29th of July, 1714, it was voted by the town to build a meeting-house on a lot of land a short distance northwesterly of the present Congregational Church. The completion of the house was long delayed, though it was occasionally used as opportunities for preaching were afforded. The pulpit was temporarily supplied and efforts were made to settle a pastor, but without success until March 1, 1721, when Rev. John Campbell was ordained. Mr. Campbell came from the North of Scotland to New England in 1717, and was educated at the university at Edinburgh. His pastorate continued until his death, which occurred May 25, 1761, in the seventy-first year of his age and in the forty-second year of his ministry.

He married Esther Fairchild, of Boston, who died at Oxford in 1777, and his children were Mary, born February 11, 1723, who married Jacob Town ; John, born February 7, 1724 ; Isabella, born March 27, 1726 ; Duncan, born March 27, 1727, who married Elizabeth, daughter of Thomas Stearns, of Worcester ; Isabella, again, born July 26, 1728, who married Josiah Wolcott, of Salem ; Elizabeth, born August 14, 1730 ; Alexander, born February 12, 1732, who married Lydia, daughter of Thomas Stearns ; William, born April 2, 1734 ; and Archibald, born August 6, 1736.

Mr. Campbell was followed by Rev. Joseph Bowman, who was installed November 14, 1764. Mr. Bowman graduated at Harvard in 1761, and, after the short preparation for the ministry, which was common in those days, was ordained at Boston August 31, 1762. He at once began his professional work among the Mohawk Indians, and continued in Indian service until May, 1763. He remained at Ox-

ford about eighteen years, and was finally dismissed at his own request August 28, 1782. After his removal from Oxford he was settled at Bernard, in Vermont, September 22, 1784, and died in 1806.

Rev. Elias Dudley succeeded Mr. Bowman, and was ordained April 13, 1791, and dismissed March 6, 1799. He was a native of Saybrook, Conn., and graduated at Dartmouth in 1788. Rev. Josiah Moulton followed Mr. Dudley, and was ordained March 26, 1805. The ministry of Mr. Moulton continued until April 6, 1813, and with his ministry the identity of the town with the old territorial parish disappeared.

The church proper, which was organized on the 18th of January, 1721, retained all its old functions and powers, but the parish, for the support of which the town had been previously taxed, and for the erection of whose meeting-houses and the support of whose ministers it was responsible, became limited to its actual members. In fact, a severance of church and State had come about, occasioned, doubtless, at that early period, by the unusual number in Oxford of those who had departed from the faith of their fathers.

In 1737 a new meeting-house was erected, the completion of which, like that of the first, lingered for many years. It was probably owing as much to the unsubstantial character of the first structure as to its size that in twenty-five years a new one was considered necessary.

Rev. David Batcheller was installed as the successor of Mr. Moulton February 13, 1816, and remained until his death in 1822. On the 17th of December, 1823, Rev. Ebenezer Newhall was ordained, and dismissed June 19, 1832. Mr. Newhall was a graduate of Harvard in 1818, and numbered among his classmates Sidney Bartlett, the Nestor of the Massachusetts bar; Francis Brinley, now living in Newport, R. I.; Rev. Dr. Samuel Barrett, who died in 1866; Rev. Dr. Frederick Augustus Farley, still living; Rev. Dr. George Rapall Noyes, who died in 1868; and Rev. Dr. Thomas Worcester.

Rev. Loren Robbins was installed December 26, 1832, and dismissed June 8, 1836, and was succeeded by Rev. Horatio Bardwell, who was installed June 8, 1836. Mr. Bardwell continued in the pastorate until June 8, 1864, and died at Oxford May 5, 1866. He was followed by Rev. Samuel J. Austin, who was installed on the day of the formal dismissal of his predecessor, and dismissed November 9, 1868. Rev. Thomas E. Babb was installed September 20, 1871, and dismissed May 1, 1877, to be followed by Rev. Amzi B. Emmons, who was installed October 16, 1878. The present pastor is Rev. William N. T. Dean, and the present house of worship was erected in 1829, and dedicated November 3d in that year.

The next religious society in Oxford in point of age is the Universalist Society. It was organized April 27, 1785, and Rev. Adam Streeter was engaged to

supply the pulpit. Rev. Peter Whitney says, under date of 1793, "In the town of Oxford there is a society of those who are denominated Universalists (about a fifth of the inhabitants). These, with some families from several neighboring towns, make a respectable society. And they have erected a large elegant meeting-house towards the south end of Oxford Plain, where the road from Connecticut intersects the road from Worcester to Dudley. This house is constructed upon the most modern plan, with a tower and bell. This society have not as yet any settled minister."

The meeting referred to above was held in the school-house on Oxford Plain, and Daniel Fiske was chosen moderator. The following declaration was adopted:

*Whereas*, A number of professors of the Protestant religion, being principally of the inhabitants of Oxford, together with some persons of the adjacent towns, have, for a number of years past, assembled upon the Sabbath day for public worship, and have attended to the instructions of Rev. Adam Streeter and supported him by free contributions from time to time, do now resolve to form themselves into a religious society in conformity with the laws of the Commonwealth."

Ezra Conant was chosen secretary, and Samuel Davis, Jr., Collins Moore and Jonathan Davis, of Oxford, Ebenezer Davis, of Charlton, Ebenezer Rich, of Sutton, and Isaac Stone, of Ward, were chosen a committee to issue certificates of membership. Rev. Mr. Streeter died September 3, 1786, and was followed in 1788 by Rev. Elkanah Ingals, of Grafton. On the 19th of April, 1789, Rev. Thomas Barnes succeeded to the pastorate, and remained until 1793. In 1794 Rev. Michael Coffin, of New York, began to supply the pulpit, and remained three years. After 1801 Rev. Hosea Ballou and Rev. Edward Turner supplied for a few years, and were followed by Rev. Jacob Wood. Since Mr. Wood left, the following have officiated: Rev. John Nichols, Rev. Richard Carrique, Rev. Lyman Maynard, Rev. Seth Chandler, Rev. John Boyden, Rev. Gilman Noyes, Rev. Alvin Abbott, Rev. Alfred Barnes, Rev. R. M. Byram, Rev. Jacob Baker, Rev. Albert Tyler, Rev. H. Closson, Rev. O. H. Tillotson and Rev. George Proctor. At the present time the pulpit is supplied by Rev. Mr. Preble, of Webster. The meeting-house of the society was remodeled in 1845.

The Methodist Episcopal Society of Oxford was organized in 1835. In 1836 Rev. Benjamin Paine was appointed pastor by the New England Conference, and in 1840 a meeting-house was erected, which was succeeded by the present house of worship in 1868. After a long succession of pastors, who have been changed by the Conference after short terms of service, the present pastor is Rev. P. R. Stratton.

A Baptist society was organized in North Oxford on the 29th of March, 1837.

As long ago as 1793 Mr. Whitney stated in his history, "There is also a number in Oxford of the Anabaptist persuasion; they are destitute of any stated teacher."

At the meeting for organization the following persons signed the constitution:

Jennison Barton.  
William Copp.  
David Hall.  
Robert Fitts.  
Maverick Jennison.  
David Stone.  
David Holman.  
James Boomer.  
Ebenezer Cook.  
Fenner S. Hopkins.  
Flavel Leach.  
Jonathan Flagg.  
William Brown.

Amasa Eddy.  
Smith Bruce.  
Ellridge Warren.  
Waterman Warren.  
Ebenezer Newton.  
Amos P. Newton.  
William Dalrymple.  
Martin Bowen.  
Warren Bruce.  
David Jennison.  
Andrew J. Copp.  
Samuel Warren.

At a meeting held on the 1st of May, 1837, Josiah Goddard was chosen moderator and William Copp clerk. It was voted to adopt as the articles of their faith, practice and covenant those which are used in the Worcester Baptist Association. Jennison Barton and William Copp were chosen deacons.

In May the church was recognized by the ecclesiastical council as the North Oxford Baptist Church. The meeting-house of the society was erected in 1837, and among the pastors have been Rev. A. Smith Lyon, Rev. Solomon Gale, Rev. J. N. Hobart, Rev. Joseph Hodges, Rev. J. E. Wood, Rev. C. M. Herring, Rev. Thomas Chapman, Rev. Joseph Smith, Rev. W. H. Shedd, Rev. J. W. Lathrop, Rev. Oliver Ayer. At the present time the pulpit is occupied by temporary supplies.

An Episcopal Church was organized on the 10th of May, 1864, and in the same year a handsome stone edifice was erected for public worship which reflects credit on the development of taste in the town. The pulpit, now unsupplied, has been occupied among others by Rev. W. F. Floyd and Rev. Dr. W. H. Brooks.

The Catholic Church was built in 1856, and its present pastor is Rev. Charles J. Boylan.

While attending to the religious improvement of its people, the town was not neglectful of its educational interests. Schools were established at an early date—at first kept in private houses, and soon after provided with houses of their own.

In 1733 the town voted to hire a schoolmaster, and in 1736 a school-house was built. In 1740 Richard Rogers was hired to teach school, with a salary of sixty pounds. In 1751 the town voted to build a house for Mr. Rogers to occupy as long as he remained in the town as a schoolmaster.

After the Revolution, when our people began to feel the responsibilities of government resting on them, they were not long in coming to a realizing sense that the permanence and character of their government would depend largely on the education of their youth. Thus an impetus was given to the cause of public instruction which has been reinforced in these later years by the volume of the tide of illiteracy sweeping to our shores, which it has become necessary to meet and overcome. A recital of the progress of common schools in Oxford would be simply a repetition of that made in other towns of

the county and narrated many times in these volumes. It must suffice to display the present condition of the schools of the town and the measures adopted for their support.

According to the last report of the School Committee for the year ending February 29, 1888, there were ten schools in the town, one of which was a High School and another a Grammar School. The scope of the instruction sought by the committee to furnish may be learned from the curriculum of the High School, to which the other schools are avenues of approach :

*Junior Year.*

Quarters.

The financial account of the School Department for the above year is as follows :

To		Dr.
Appropriation of April, 1887.....	\$5,000.00	
Income of School Fund.....	171.06	
		\$5,171.06
By		Cr.
Teaching.....	\$4,083.70	
Service of Truant Officer.....	3.40	
Janitor Service.....	223.10	
Fuel.....	283.76	
Balance.....	575.10	
		\$5,171.06

In addition to the above items of expense the following appear, which were charged to the annual appropriation for contingent expenses :

Books.....	\$417.52	
Supplies.....	133.27	
Repairs and improvements.....	594.24	
		\$1,145.13

Thus it will be seen that the total expenses for the year were \$6,316.19.

As an auxiliary of the School Department of the town, the Public Library should be referred to in connection with the public schools. With a proper foundation of knowledge laid in these schools, a thirst for more stimulated, habits of thought developed, a substantial English education furnished instead of that thin layer of what is called an all-round cultivation of the intellect, which melts away even in the first years of practical life, a public library serves to continue what was only really begun at the school-desk and develop each year more fully the minds of those of mature years. Properly used it must serve to correct the idea into which our educators have fallen, that education is finished in the school and must, therefore, be crowded with every conceivable branch of study, giving so little time to each that none take root and grow. Give the brain the breath of life, the power of expansion and the ability to think, and no matter whether or not the rule of three, the capitals of Europe and distance of the earth from the sun are included within its attainments, the Public Library will do the rest.

In 1868 Hon. Ira M. Barton gave, by his will, the sum of one thousand dollars to establish a Public Library. The gift was accepted by the town April 6, 1868, and the library established in 1870. The number of books in the library at the date of the last report was 3535. The financial account of the library with the town was as follows:

To		Dr.
Excess of unused dog fund of 1884-85 over library expenses of 1886-87.....	\$92.23	
Dog fund of 1886-87.....	308.95	
Catalogue appropriation.....	290.00	
Appropriated by vote of April, 1887.....		\$801.18
Receipts from sale of duplicates.....	10.00	
Balance in hands of librarian.....	6.56	
		16.56
Total.....		\$617.56
By		Cr.
Books.....	\$298.40	
Periodicals.....	38.80	
Binding.....	10.00	
New catalogue, including outfit.....	192.26	
Pictures.....	4.30	
Printing, stationery and postage.....	9.99	
Expressage, freight and trucking.....	10.93	
Salary of librarian—three-quarters.....	37.50	
Balance.....	6.56	
		\$617.56

Having stated the amounts expended for the support of schools and the Public Library, it may be as well here to present a full list of the expenditures of the town for other departments for the year above referred to. The cost of repairing roads and bridges was \$2,498.09; of support of the poor, \$3,323.71; of the Fire Department, \$1,316.32; of lighting streets five months, \$199.75; abated taxes, \$43.57; cemeteries, \$56; cistern, \$366.67; hearse, \$32; insurance, \$51; interest, \$694.50; legal services, \$55; Memorial Day, \$100; Memorial Hall, \$510.15; office expenses, \$105;

school-house, \$995.95; State aid, \$1037; Thurston property, \$1,511.25; town clock, \$37.26; town officers, \$1,131.38, making a total of \$20,779. The net indebtedness of the town February 29, 1888, was \$11,165.58.

The apparatus belonging to the Fire Department includes the following: Hand-engine Colonel De Witt and hose-truck with five hundred feet of hose, all in fair order; two American hand fire annihilators, one extension ladder, thirty-two uniform shirts, twenty-eight uniform belts, eight United States Army overcoats for hosemen, two fire-hats, twelve hosemen's belts, twelve spanners, one hose-brush, three lanterns, twelve lamps.

*Huguenot Steamer, No. 1.*—Steamer and hose-truck with one thousand feet of hose, one set of double harness, one single harness, six rubber coats, six rubber caps, twelve hosemen's belts, twelve spanners, one hose-brush, three lanterns, twelve lamps, one table—a gift of the company to the town; all in good condition.

The personal property at the Town Farm, at the above date, was as follows:

Live stock.....	\$645.50
Hay and grain.....	338.60
Wood and lumber.....	216.00
Farming tools.....	553.05
Household furniture.....	399.15
Provision.....	195.30
	\$2,347.60

As in other towns, away from the seaboard, the people of Oxford in its earlier days were chiefly occupied in agriculture. As a matter of course, since manufacturing industries were started, employment in which is both more agreeable and profitable than that of the field, the agricultural products of the town have not kept pace with its growth. Notwithstanding, however, the immense manufacturing activity of Worcester County, the county still stands high in the list of counties in the United States in the products of the soil.

The following schedules, taken from the census of 1885, show the standing of the town in this respect:

#### PRODUCTS AND PROPERTY.

##### PRODUCTS.

##### Animal Products (\$7,803).

In later times manufacturing industries have been introduced into the town and at the present time their list comprises a number of flourishing establishments.

Frederick Thayer is engaged at North Oxford in the manufacture of cassimeres. At the same place S. D. Nye manufactures cotton yarn, Edwin Bartlett manufactures cotton warp and twine, N. E. Taft manufactures satinettes and John Chase & Co. manufacture cassimeres. At Oxford Centre Andrew Howarth & Son manufacture flannels and A. L. Joslin & Co. men's and women's and children's shoes. Another mill, called the Buffum Mill, is not at present in operation.

In the second French and Indian War Oxford took an active part. On the 18th of August, 1758, a company marched from the town to the relief of Fort William Henry, consisting of the following men :

Edward Davis, capt.	Hezekiah Meriam, Jr.
John Edwards, lieutenant.	Jonathan Phillips.
Jeremiah Learned, ens.	Silas Town.
Jedediah Barton, sergt.	Samuel Learned.
Joseph Edwards, sergt.	Ebenezer Gale, Jr.
John Town, sergt.	Joseph Gleason.
Phineas Ward, corp.	Samuel Eddy, Jr.
Moses Town, corp.	Elisha Gleason.
Alexander Nichols.	Moses Gleason, Jr.
Jacob Cummings.	Josiah Googins.
Ebenezer Eddy.	Josiah Walcott.
John Wiley.	Aaron Parker.
Wm. Eddy.	Edmund Town.
Joseph Phillips, Jr.	Joseph Pratt.
Israel Phillips.	Jesse Pratt.
Daniel Fairfield.	Nathan Shumway.
John Duncan.	David Pratt.

The following marched to Springfield and Sheffield January 5, 1759 :

Samuel Davis, capt.	Joseph Wilson.
John Learned, capt.	John Marvin.
Elisha Davis, sergt.	Isaac Town.
John Nichols, sergt.	Adam Streeter.
Amos Shumway, sergt.	Arthur Humphrey.
Wm. Parker, sergt.	Peter Shumway.
Jeremiah Shumway, corp.	Joseph Kingsbury.
John Davis, corp.	Jeremiah Kingsbury.
Thomas Town.	Roger Amidown.
Isaac Learned.	Abijah Harris.
Jonas Collier.	Zebulon Streeter.
John Shumway.	John Dana.
Wm. Nichols.	Samuel Manning.
John Barton.	John Watson.
Jonathan Fuller.	John Robbins.
Ichabod Town.	John Coburn.
Joseph Pratt, Jr.	John Shumway, Jr.
Stephen Jewett.	Wm. Comins.
Joseph Davis.	Wm. Learned.
Benjamin Hudson.	John Moore.

The following were engaged in the expedition against Crown Point in 1759 :

Samuel Davis, capt.	Ebenezer Davis.
John Learned, capt.	Samuel Manning.
Elisha Davis, sergt.	Solomon Smiledge.
John Nichols, sergt.	Isaac Learned, Jr.
Amos Shumway, sergt.	John Barnes.
Wm. Parker, sergt.	Wm. Simpson.
Jeremiah Shumway, corp.	George Alverson.
John Davis, corp.	Caleb Barton.
Ebenezer Learned.	Peter Shumway.
Elijah Town.	Elisha Blanden.
John Wiley, Jr.	Francis Blanden.
Hezekiah Eddy.	Jonas Blanden.
Jonathan Eddy.	Ezekiel Collier.
Stephen Shumway.	Solomon Cook.
Caleb Barton, Jr.	Ebenezer Robbins.

Joseph Phillips.  
Josiah Kingsbury.  
Joseph Bacon.

Elisha Ward.  
Arthur Doggett.  
Elijah Kingsbury.

During the complications which led to the Revolution, Oxford stood shoulder to shoulder with other towns in supporting the people of Boston in their attitude of resistance to the aggressive acts of the crown. On the 29th of September, 1774, a town-meeting was held, at which it was

"Resolved 1st. That, as by the late acts of Parliament, we are deprived of the Constitutional laws of the government of Massachusetts Bay, we will endeavor to maintain and keep peace and good order in this town; to support and uphold all civil officers in the execution of their offices, so far as they conform themselves to the charter-rights of this government, and assist them duly to punish all offenders against the same laws; to bear testimony against all riots, as well as against any number of men collecting in bodies together to hurt the person or property of any one.

"2d. That we ever have been and will be true and loyal subjects of our most gracious sovereign George III., King of Great Britain, so long as we are permitted the free execution of our charter-rights.

"3d. That, considering the present alarming and distressed circumstances of this province, it is highly necessary for the military officers of the town to resign their commissions, and therefore do advise the said officers to resign accordingly; and that the soldiery, as soon as may be, to elect the same officers to take the command of the different companies in this town if they will accept, and the major part of the soldiery shall elect them; and if any refuse to serve, then to choose others experienced in the arts of war in their stead."

At a meeting held on the 8th of July, 1776, the town voted,—

To advise our representative in the General Court that if the honorable Congress should, for the safety of the colonies, declare themselves independent of Great Britain, to concur therewith; and the inhabitants of this town do solemnly engage with their lives and fortunes to sustain the measure.

The following is as correct a list of the soldiers furnished by Oxford in the Revolution as the writer has been able to obtain from the rolls at the State-House.

The following men belonged to the company commanded by Captain William Campbell in Colonel Ebenezer Learned's regiment, and marched to Cambridge in April, 1775 :

William Campbell, capt.	Jonathan Marsh.
Thomas Fish, lieutenant.	Thomas Boyle.
John Campbell, sergt.	Frost Rockwood.
Sylvester Town, sergt.	Daniel Sabins.
James Learned, corp.	John Hudson.
Alvin Shumway, drum.	Thomas McKnight.
Abraham Mansfield.	Jason Collar.
Timothy Sparhawk.	Arthur Humphrey.
Paul Thurston.	David Dana Town.
Samuel Baker.	James Hambleton Parker.
John Fessenden.	John Conant.
Josiah Eddy.	William Boyle.
Moses Knowland.	William Foster.
Negro Hill.	Richard Ferrars.
Moses Coburn.	

The following belonged to Captain John Town's company, and marched to Cambridge April 19, 1775 :

John Town, capt.	William Foster.
Daniel Hovey, lieutenant.	Joshua Turner.
Thomas Fish, lieutenant.	Allen Hancock.
Richard Farrar, sergt.	John Hudson.
Samuel Manning, sergt.	Robert Manning.
Arthur Humphrey, corp.	Elias Pratt.
Phinebas Allen.	Ebenezer Shumway.

John Ballard.  
Samuel Baker.  
William Boyle.  
John Campbell.  
Daniel Sabin.  
Abijah Harris.

Timothy Sparhawk.  
David Dana Town.  
Jonas Pratt, Jr.  
Hans Learned.  
Abraham Merrifield.  
Amasa Allen.

It will be noticed that the two companies commanded by William Campbell and John Town contain many of the same men. The probable explanation is that the two companies were merged, and the rolls at the State-House, from which the above lists have been copied, taken at different times.

The following persons are found on the roll of Captain Craft's company, in Colonel Learned's regiment, in 1775 :

William Campbell, lieutenant.	Joseph Hurd.
Levi Davis.	Sylvanus Town.

The following are found on the roll of Captain Nathaniel Heley's company, in Colonel Learned's regiment, in April, 1775 :

William Moore, sergt.	Curtis Dixon.
-----------------------	---------------

The following served three months, in 1776, in the company commanded by Jonathan Cariel, in Colonel Josiah Whitney's regiment :

Sampson Marvin, corp.	Moses Town.
Wm. Jordan.	Elisha Town.
Jedediah Blaney.	Amos Persons.
Richard Moore.	Moses Knowland.

The following served three months at Dorchester, in 1775, in Captain Benjamin Richardson's company and Colonel Nicholas Dike's regiment :

Ebenezer Fish.	Samuel Kingsbury.
----------------	-------------------

The following served, in 1775, in Captain Samuel Curtis' company and Colonel Ebenezer Learned's regiment :

Samuel Learned, lieutenant.	Joseph Streeter.
Stephen Griffith, corp.	Moses Town.
Daniel Griffith.	Elias Town.
Phinebas Allen.	John Milton.
Isaac Pratt.	

Elisha Livermore served as a bombardier three months, in 1776, in Captain William Todd's company and Colonel Craft's artillery regiment, and Nathaniel Wyman in the same year served a little more than a month in Captain Aaron Guild's company and Colonel Whiting's regiment.

The following, in 1777, were members of Captain Jeremiah Kingsbury's company and Colonel Jonathan Holman's regiment, and marched to re-enforce General Gates :

Jeremiah Kingsbury, capt.	Joshua Meriam.
John Ballard, lieutenant.	William Nichols.
Ebenezer Coburn, sergt.	Nathan Pratt.
Hans Learned, sergt.	John Rawson.
Jonas Eddy, corp.	Ambrose Stone.
Allen Hancock, corp.	Jonas Davis.
John Learned.	David Stone.
Aaron Parker.	Abraham Fitts.
Joshua Pratt.	Amos Shumway.
Joseph Rockwood.	Anthony Sigourney.

The following served nine months, in 1778, in Captain Jeremiah Kingsbury's company and Colonel Holman's regiment :

Jeremiah Kingsbury, captain.  
Eleazer Stockwell.

David Chamberlain.  
Uriah Carpenter.

The following served at Dorchester in 1778 in Capt. March Chase's company and Col. Nathan Sparhawk's regiment.

Jeese Hill.  
Isaac Anibell.

David Smith.

The following were drafted in 1778:

Jonathan Fuller.  
John Morris Jewell.

Eleazer Stowell.

The following served six months in 1779 in Capt. Thomas Fish's company and Col. Nathan Tyler's regiment, in Rhode Island:

Thomas Fish, capt.  
Ebenezer Coburn, lieu.  
Abisha Shumway.

Jacob Weeks.  
Samuel Atwood.

The following served six months in the Continental Army in 1780:

Thomas Walcott.  
Samuel White.  
James Atwood.  
Samuel Wiley.  
Elisha Town.  
Jacob Nichols.  
Jacob Winslow.

Moses Baker.  
Joseph Atwood.  
Benjamin Turner.  
Noah Dodge.  
David Town.  
Samuel Kelly.

The following served three months in 1781 in Capt. Reuben Davis' company and Col. Luke Drury's regiment:

William Tucker, corp.  
John M. Jewell.  
James Atwood.

Ebenezer Stone.  
Phineas Jones.  
Jonas Cummings.

Lemuel Cudworth served in Rhode Island in 1781, in Capt. Joseph Elliot's company and Col. William Thomas' regiment.

The following enlisted in 1781 to serve three years in the Continental Army:

Sylvanus Learned, sergt.  
Noah Hoskins.

John Harvey.  
David Manning.

Besides the above, the following Oxford men were in the service at various times:

Ebenezer Learned, brig.-gen.  
William Moore, capt.  
John Nichols, capt.  
Benjamin Vassal, lieu.  
Ebenezer Humphrey, lieu.  
Cupp Downing.  
Wm. Lewis.  
John Quick.

Nathan Atwood.  
Elijah Shumway.  
John Bowers.  
Benjamin Rider.  
Adams Sulley.  
Wm. Stowell.  
David Lamb.  
Ebenezer Pray.

In the War of the Rebellion, according to the statement of William Schooler, who was, during the war, the adjutant-general of the Commonwealth, Oxford sent 285 privates and eight officers into the field. At the time the war broke out the population was 3034 and the valuation \$1,156,411. On the 6th of May, 1861, it was voted in town-meeting to raise the sum of \$4000 to equip a military company, and Alexander De Witt, George Hodges, Jr., Samuel C. Paine, William E. Pease, Charles A. Angell, Ira Harrison and Elisha M. Smith were constituted a committee, with the selectmen, to carry the vote into effect. On the 30th of July, 1862, it was voted to give a bounty of \$150 to those volunteering for three

years within three days, \$125 to those volunteering within a week and \$100 to those volunteering after that time. On the 27th of August it was voted to give a bounty of \$150 to all volunteering within a week, and on the 15th of June, 1864, it was voted to continue the payment of bounties to the extent of \$125 to each man for any term of service required by the Government. The whole amount of money expended by the town for war purposes was \$42,595.21, of which the sum of \$20,223.12 for State aid was paid back by the State. Of the 293 soldiers in the service, the names of the following, who lost their lives, are inscribed on tablets at the entrance of the town-hall:

James D. Adams.  
Julius N. Bellows.  
Josiah C. Brown.  
Estes E. Baker.  
James O. Bartlett.  
George Bacon.  
William Biggs.  
Nelson Bartholomew.  
Edward Booth.  
Daniel V. Childs.  
Jacob L. Childs.  
Edwin Cudworth.  
Wm. H. N. Cady.  
George W. Cross.  
John Dore.  
George P. Davis.  
James H. Davis.  
Alfred W. Davis.  
Stephen Eager.  
Edward Ennis.  
Patrick Elliott.  
Francis A. Fletcher.  
Albert Foskett.  
Herbert N. Fuller.  
Joseph E. Fellows.  
Henry C. Hayden.  
Patrick Hogan.  
Patrick Holden.  
James Hilton.  
Joseph Jennison, Jr.  
Henry Kock.

Cyrus Larned.  
Albert S. Moffit.  
Elliot F. McKinstry.  
Edwin A. Martin, corp.  
Amos P. Newton, Jr.  
Antonio Phillips.  
Francis C. Pope.  
Lyman Phipps.  
William Robbins.  
Vernon F. Rindge.  
Edwin F. Rindge.  
George O. Raymond.  
Amos H. Shumway, sergt.  
Jerome P. Southwick.  
Bernard Schmidt.  
Chester J. Smith.  
Valentine Suter.  
Samuel C. Smith.  
Felix Sherrino.  
George Shortalevee.  
Luther C. Torrey, sergt.  
John Toomey, corp.  
Samuel Thompson.  
Conrad M. Tower.  
John Tully.  
Rufus Vickers.  
Christopher Vickers.  
Charles H. Wheelock.  
George S. Williams.  
Albert S. Williams.

In order that some idea may be obtained of the representative men in the various generations, the following list of Representatives to the General Court is added:

	1857. Lament B. Corbin.

The twenty-first article of the amendments of the Constitution was adopted by the Legislatures of 1856 and 1857 and ratified by the people in 1857. Under the apportionment made in accordance with that amendment, Oxford, Sutton and Millbury constituted the Twenty-fifth Representative District of Worcester County and were represented, until the next apportionment, as follows:

Hosea Crane, of Millbury.....	1858
Samuel J. Woodbury, of Sutton.....	1858
Ira Merriam, of Oxford.....	1859
Hosea Crane, of Millbury.....	1859
Seth Daniels, of Oxford.....	1860
George Hodges, Jr., of Oxford.....	1860
Horace Armsby, of Millbury.....	1861
Wm. A. Hill, of Sutton.....	1861
Horace Armsby, of Millbury.....	1862
Moses Stone, of Oxford.....	1862
Moses S. Johnson, of Oxford.....	1863
Jason Waters, of Sutton.....	1863
Leonard Spaulding, of Millbury.....	1864
Jason Waters, of Sutton.....	1864
Archibald Campbell, of Oxford.....	1865

Horace Waters, of Millbury.....	1865
Charles A. Angell, of Oxford.....	1866
Solomon D. King, of Sutton.....	1866

Under the apportionment of 1866 the towns of Douglas, Webster, Dudley, Oxford and Millbury constituted the Sixteenth Worcester County District, and until the next apportionment were represented as follows:

Solomon D. King, of Sutton.....	1867
Benjamin A. Corbin, of Webster.....	1867
Henry E. Rockwell, of Millbury.....	1867
Lament B. Corbin, of Oxford.....	1868
Silas Duntun, of Millbury.....	1868
Wm. D. Jones, of Douglas.....	1868
George J. Sanger, of Webster.....	1869
James M. Culliff, of Sutton.....	1869
Marcus M. Luther, of Douglas.....	1869
Charles H. Page, of Webster.....	1870
John Rhodes, of Millbury.....	1870
Moses W. McIntire, of Oxford.....	1870
Wm. L. Davis, of Dudley.....	1871
Edwin H. Hutchinson, of Sutton.....	1871
Thomas H. Meek, of Douglas.....	1871
Horace I. Joslin, of Webster.....	1872
E. Harris Howland, of Oxford.....	1872
Irving B. Sayles, of Millbury.....	1872
C. D. Morse, of Millbury.....	1873
Andrew J. Waters, of Webster.....	1873
Samuel W. Heath, of Douglas.....	1873
James B. Williams, of Douglas.....	1874
George Hodges, of Oxford.....	1874
Wm. Abbott, of Sutton.....	1874
M. M. Hovey, of Sutton.....	1875
C. W. Duggan, of Millbury.....	1875
E. F. Smith, of Dudley.....	1875
Frederick T. Chase, of Webster.....	1876
Francis Bugbee, of Webster.....	1876
George F. Daniels, of Oxford.....	1876

Under the apportionment of 1876 the towns of Spencer, Charlton, Southbridge and Oxford constituted the Thirteenth Worcester District and were represented, until the next apportionment, as follows:

George F. Daniels, of Oxford.....	1877
Isaac B. Martin, of Southbridge.....	1877
Calvin D. Paige, of Southbridge.....	1878
James H. Ames, of Spencer.....	1878
Samuel C. Paine, of Oxford.....	1879
George D. Woodbury, of Charlton.....	1879
John W. Bigelow, of Spencer.....	1880
John M. Cochran, of Southbridge.....	1880
Isaac L. Prouty, of Spencer.....	1881
Samuel C. Hartwell, of Southbridge.....	1881
Isaac L. Prouty, of Spencer.....	1882
George H. Taft, of Charlton.....	1882
Benajah B. Bugbee, of Southbridge.....	1883
Albert Tyler, of Oxford.....	1883
Joseph W. Temple, of Spencer.....	1884
Francis L. Chapin, of Southbridge.....	1884
Allen L. Joslin, of Oxford.....	1885
Henry G. Lamb, of Oxford.....	1885
Joseph L. Woodbury, of Oxford.....	1886
James Holmes, of Spencer.....	1886

Under the apportionment of 1886 the towns of Webster, Oxford and Auburn constituted the Eighth Worcester District and have been represented as follows:

Henry Brandes, of Webster.....	1887
John J. Allen, of Auburn.....	1888
Lyman R. Eddy, of Webster.....	1889

Besides the above, there are some who were connected with the town in its earliest years, or who have been its native or adopted sons, of whom special mention should be made. The original grantees in 1682 were Major Robert Thompson, William Stoughton and Joseph Dudley. Major Thompson was a member of the first corporation established in England for the propagation of the Gospel among the Indians in New England. He was the third president of the corporation and thus became especially interested in New England affairs. It was through his influence that the emigration from England of the French refugees took place, and through him that the French settlement in Oxford was made. He received a grant of five hundred acres of land from the Massachusetts Province in acknowledgment of his friendship for the colony. This grant was laid out in the territory east of Woodstock, which afterward became the north part of Killingly in Connecticut, and in 1731 the General Assembly of that province granted to Joseph Thompson, the grandson of Robert Thompson, two thousand acres near the grant of his grandfather. The name of the North Parish of Killingly was first called Thompson's Parish and finally incorporated as Thompson.

William Stoughton, one of the grantees with Major Thompson, was born in England in 1631, and died in Dorchester, July 7, 1701. He graduated at Harvard in 1650, and after studying theology went to England and was a fellow of New College, Oxford, but ejected at the restoration. He returned to New England in 1662, and entered with spirit into public affairs. From 1676 to 1679 he was an agent of the Massachusetts Colony in England, and in 1692 was appointed chief justice of the Supreme Court of Judicature, a position which he held until 1701. He was also Lieutenant-Governor from 1692 to 1701, and acting Governor during the absence of Sir William Phipps in England. He was a benefactor of his *alma mater*, one of whose dormitories, named after him, was built at his expense.

Joseph Dudley, the third grantee, was a son of Gov. Thomas Dudley, and was born in Roxbury July 23, 1647. He graduated at Harvard in 1665, and after studying theology, entered on a political career. In 1686 he was appointed President of Massachusetts and New Hampshire, but when superseded by Andros, soon after went to England, and after his return, in 1690, was appointed chief justice of New York. At a later date he was appointed Lieutenant-Governor of the Isle of Wight, in England, and in 1702 Governor of Massachusetts, which office he held until November, 1715. He died in Roxbury, April 2, 1720.

The Frenchman through whom the grantees secured the immigration of the Huguenots to New England, and their settlement at Oxford, was Gabriel Bernon, from Rochelle, in France. He was born in that city April 6, 1644, and was a man of large estate.

He was imprisoned two years on account of his religious opinions, and afterwards went to Holland, from whence he came to New England. It seems to have been through his exertions that the colony at Oxford secured a foothold, and with his means that a grist-mill and saw-mill and wash-leather mill were built on the territory. Mr. Bernon lived at various times in Boston and Newport and Providence, in which last place he died February 1, 1736.

Among those of later years deserving a place in this narrative are Ira Moore Barton and Alexander De Witt.

Mr. Barton was born in Oxford, October 25, 1796, and graduated at Brown University in 1819. He studied law with General Bridgman in Providence, Hon. Levi Lincoln in Worcester, Sumner Barton in Sutton, and at the law school in Cambridge, where he received the degree of Bachelor of Laws in 1822. He was admitted to the bar in September, 1822, and represented his native town in the General Court in 1830, 1831 and 1832. In 1833 and 1834 he was a member of the Senate, and in 1836 was one of the commissioners for revising the statutes. In the last year he was appointed judge of probate, and removed to Worcester. In 1844 he resumed the practice of law, and died in Worcester, July 18, 1867.

Alexander De Witt was born in New Braintree, April 2, 1798, and bore the family name of Witt, which was changed by statute to the name by which he was known during the whole of his public life. His school education was exceedingly limited, and most of the time during the first fourteen years of his life was spent about his home and on the farm. At the age of fifteen he entered the employ of the Merino Manufacturing Co. in Dudley, and remained four years. In 1818 he went to Franklin, and entered, as clerk, the office of a cotton manufactory, and in 1819 formed a partnership with Nathaniel Miller in the manufacture of cotton thread. In 1820 he leased a mill in Foxboro', and continued in the same business, keeping at the same time a country store. In that year he married Mary, daughter of William Makepeace, of Franklin, and, in connection with his father-in-law, a third mill was built by him, and run with success until 1823. In that year he removed to Oxford, and, in connection with his three brothers, Stearns, Hollis and Archibald, built a thread-mill, and carried on the manufacture of thread for twenty years. He was afterwards engaged in both the cotton and woolen business. In 1837 he removed to Boston, where he carried on for three years a commission business in cotton and woolen goods, still holding his interest in the mill erected by himself and brothers. In 1840 he returned to Oxford, and by this time had established a reputation for ability, honesty, shrewdness and good judgment in business affairs. Originally a Democrat, he had become a Whig after the removal of the deposits by Jackson, and in 1842, 1844 and 1850 he represented

Oxford in the General Court. In 1851 and 1869 he was Senator, and in 1853 was a member of the Constitutional Convention. In 1856 and 1857, as a Republican, he represented the Worcester South District in Congress. Few men have been connected, in responsible positions, with more institutions, financial and industrial. For twenty-six years he was a director in the Merchants' and Farmers' Insurance Co. of Worcester; for twenty-seven years a director in the State Mutual Life Insurance Co.; for twenty years either president or trustee of the Mechanics' Savings Bank of Worcester; twenty-one years connected with the Oxford Bank, and five years its president; twenty-five years connected with the Worcester and Nashua Railroad Company, and three years its president; seventeen years a director of the Providence and Worcester Railroad Company, and twenty-five years director in the Norwich and Worcester Railroad Company. The writer of this sketch knew him, and remembers him well as one of the most striking personages within the range of his acquaintance. A man of large frame, somewhat portly, with a florid complexion, a good head and a freedom of dress, he resembled Colonel Thomas H. Benton in appearance, and, like him, attracted attention in every assembly of men of which he was one.

The territory of Oxford, originally containing forty-one thousand two hundred and fifty acres, has been enlarged and contracted at various times until, at the present date, it measures not far from fifteen thousand acres. In 1732 Oxford South Gore was annexed, and in 1735 a tract known by the name of the Paul Dudley farm was taken within its boundaries. The next change in the boundaries of the town was occasioned by the incorporation of the town of Charlton. The following petition was the basis of the act incorporating that town:

To His Excellency, William Shirley, Esq., Governor and Commander-in-Chief, the Honorable Council and the House of Representatives in General Court assembled at Boston, the 27th day of March, 1754.

The petition of the subscribers inhabitants of the town of Oxford in the County of Worcester, most humbly sheweth that your petitioners being in the west part of Oxford aforesaid, labor under great difficulties, by reason of the distance we live from the place of public worship; it being more than ten miles from the meeting-house to the west bounds of the town and about two miles from the east bound. Some of us attend public worship at Dudley and some at Sturbridge on Lord's day, and have no privilege from Oxford on this account, and are yet always taxed to all the charges of the town and have been for more than sixteen years past; but to encourage us in getting a town or district of the west part of the town, they voted at a town-meeting on the 17th of May, 1750, to set off the west part of Oxford within two miles of the village line, in case a number of those residing in the Gore would join with us.

We then thought, and do now think, that if the village took two miles from the west part, we should be greatly wronged.

We then applied to the Honorable Court for relief, but met with opposition from the Board; we were disheartened, and as we had got timber for a meeting-house and were much encouraged by the gentlemen owning land here, who offered to give the glass and nails, but being taxed so high for building the meeting-house and furnishing it in the best manner, equal to, if not better, than any in this country; and many of us not knowing anything of the the town-meeting when the grant was made and our paying to the support of schools in the town and having but little benefit therefrom amongst us and having

such large herds of cattle brought among us breaking into our improved lands and destroying our corn and grass and living so far from the town pound as ten miles and almost impossible to drive cattle there; all these things considered, we fear we shall be undone without the help of the Court, for we petitioned the town to vote us off last March meeting, but nothing was acted upon it.

Your petitioners therefore humbly pray your Excellency and the Honorable Court would be pleased to take our distressed circumstances under your wise consideration and erect us into a town or district, or otherwise relieve your petitioners as in your wisdom you shall think best and in duty bound shall ever pray.

Paul Rich.

The report of the committee of the General Court, to whom the petition was referred, was as follows:

The Court's Committee having considered all the circumstances, recommend a district to be made; beginning at the south line of Oxford one mile west of the village line, so called; thence northerly parallel with the line of said village to Leicester south bound; thence west with Leicester and Spencer south bounds, until it comes within one mile and a quarter of Sturbridge east bound; thence running one mile and a quarter westerly to Oxford northwest corner; thence southerly by Oxford westerly bound to Dudley northwest corner; thence with Oxford south bound to the point of beginning.

(Signed)

JOHN GREENLEAF.

The Gore referred to in the above petition was a triangular tract of land containing ten thousand acres which was finally annexed to Sturbridge, Charlton and Oxford. The village also referred to in the petition was eleven thousand two hundred and fifty acres set off from the original grant for the village of Oxford. In accordance with the above report an act of incorporation was passed November 21, 1754.

The next change was effected by the act incorporating the town of Ward, now known by the name of Auburn. A parish had already been established and the act of incorporation provided

That the said parish now to be incorporated into a town by the name of Ward shall be bounded as follows, viz.: Beginning at a heap of stones in the line between Sutton and Oxford, and from thence running north thirty-five degrees east upon the Sutton line twelve hundred and forty-four rods to a heap of stones; from thence north sixteen degrees west upon Worcester line two hundred and eighty-eight rods to a heap of stones; from thence north thirty-two degrees west upon Worcester line eighty rods to a heap of stones; from thence north eleven degrees west upon Worcester line one hundred and seventy-four rods to a heap of stones; from thence west three degrees south partly on Worcester and partly on Leicester lines, nine hundred and twenty-four rods to a heap of stones; from thence south forty-three degrees west on Leicester line three hundred and twenty rods to a gray oak tree; from thence north thirty-three degrees and thirty minutes west upon Leicester line five hundred and sixty rods to a heap of stones; from thence partly on a

gore and partly on the Oxford line five hundred and sixty-seven rods to a heap of stones; from thence east forty degrees south on Oxford line three hundred and fifty-eight rods to a white pine tree; and from thence east six degrees south upon Oxford line three hundred and seventy rods to the first mentioned heap of stones; which described plot of ground contains eight thousand three hundred and forty acres, and is hereby erected into a town by the name of Ward.

On the 5th of January 1789, it was enacted that Isaac Moffet, Elijah Learned and Ephraim Segars, of Charlton, with their polls and estates, be annexed to Oxford, and on the 18th of February, 1793, it was enacted that Jonathan Kidder, Samuel Blanchard and Arthur Dagget, of Sutton, be also annexed, with their polls and estates, to Oxford. On the 6th of March, 1832, the town of Webster was incorporated and its territory was described in the act as "in the southerly part of the county of Worcester, comprised within the following limits, that is to say beginning at the southwest corner of said territory where the line between Massachusetts and Connecticut intersects French River; thence running easterly by said line to the southwest corner of Douglas; thence northerly by the line which divides Douglas from Oxford South Gore until it intersects the line between Oxford and Douglas; thence due west two and three-fourths miles and thirty rods to a stone monument about eighty-eight rods west of French River; thence southerly in the direction of a stone monument in the line of Oxford and Dudley, near the house owned by Daniel Greenwood and Samuel Slaterly to the middle of said river; thence southerly by said river to the first-mentioned corner." The last change in the territory and boundaries of the town was made by the passage of an act March 22, 1838, annexing to Oxford "the tract of unincorporated land in the county of Worcester called Oxford North Gore, and bounded north by the town of Leicester, west by the town of Charlton, south by the town of Oxford and east by the town of Auburn."

The population of Oxford has gradually fallen off during the last fifteen years. In 1875 it was 2938, in 1880, 2604 and in 1885, 2355. This is partly accounted for by the decline in the shoe business. This decline seems to be shared by all the smaller towns, while the larger towns, in which labor is more easily obtained and the facilities for manufacturing are greater, are sensibly gaining. With good railroad communications, lying, as it does, on the Norwich & Worcester Railroad, by which markets are easily accessible, there seems to be no reason why the town should not soon regain its former business and secure a permanent career of prosperity. There must be a time when the depletion of New England communities, caused by the attractive features of the West, must cease, and a reflex tide must follow the final filling up of Western cities and towns. Everything must in the end find its level, and the draining process must cease when the places to be filled reach a point higher than their source.

Besides the Fire Department, with its apparatus and

other property of the town already mentioned, the town has a Town Hall, built in 1873 at a cost of twenty-five thousand dollars, which took the place of the older structure on the old Common, built in 1839.

Among the institutions of the town is the Oxford National Bank, with a capital of one hundred thousand dollars, organized January 2, 1865, as the successor of the old Oxford Bank, incorporated February 8, 1823. It occupies a building of its own in the central village, built in 1856. It is a well-managed, conservative institution, and affords such bank facilities as the business of the town requires.

In closing this necessarily superficial sketch the writer cannot omit saying that the interesting career of Oxford deserves a more thorough portrayal than is possible within the space allotted in these volumes. He sincerely hopes that the investigations which have been exhaustively made by Mr. George F. Daniels and the large amount of material he has collected may at no distant day be the means of giving to the citizens of the town and to the world a complete and worthy history.

#### BIOGRAPHICAL.

##### WILSON OLNEY.

Wilson Olney, son of Richard and Abigail (Wilson) Olney, was born in Providence, Rhode Island, January 10, 1802. He was the fourth child and oldest son in a family of seven sons and six daughters.

The Olneys of Rhode Island trace their descent from Thomas Olney, who, with his wife and two infant sons, in company with other emigrants from the town of St. Albans, Hertfordshire, England, came by the ship "Planter" to New England in 1635 (see Hotten List of Emigrants, 1600-1700, p. 45).

Thomas appears to have settled first at Salem, in the Massachusetts Bay Colony. But in the year 1636-37 he was excommunicated by Salem Church "for uniting in the errors with Roger Williams" (Winthrop's Hist. N. E., vol. 1, p. 43, note; Hutchinson's Hist. Mass., vol. 1, p. 371); and he accordingly followed Williams to Providence, where we find him mentioned as early as June, 1637, as one of the settlers to whom land had been allotted; and in an agreement, dated October, 1638, made between the several inhabitants of the town of Providence, he is named, with Roger Williams, as one of the thirteen persons "being now incorporated into our town of Providence;" and in 1647 he, with Williams and others, was a member of the Committee of the town of Providence, which, with committees from other towns, was to meet at Portsmouth in May, 1647, "for the purpose of organizing a Government" (see R. I. Colonial Records, vol. 1, pp. 17, 20, 27, 42).

Wilson, the subject of this sketch, received his education in the schools at Providence, which he

*John Olney*

*Niles Buffum*

attended till his sixteenth year, when his father removed with his family to Douglass, Mass., in the year 1817.

The success of Samuel Slater, in the early part of this century, in constructing and operating machinery for the manufacture of cotton goods, attracted the attention of men with capital to enterprises of that nature.

Richard Olney had accumulated a considerable fortune in the West India trade in Providence, and prior to 1817 he and other associates, citizens of Providence, had built and thereafter operated a cotton factory at Douglass, and doubtless his interest in this enterprise was the reason of his removal to that town.

Here Wilson was employed for a time in and about the mill; and one winter, when he was but seventeen years old, he taught school in one of the neighboring School Districts.

In after-life he remarked, with reference to his school-teaching experience, that some of his scholars were older and larger than their teacher.

In 1819 the family removed from Douglass to Oxford, where his father had bought the tavern property and adjoining store, situate in the centre of Oxford Plain, on the site where the hotel and brick store now are.

For the next three or four years he was employed as a clerk in his father's store at Oxford.

Soon after becoming of age he started out for himself, and, leaving home, obtained a position in a store at Providence, and afterwards was similarly employed at Hyde Park, Dutchess County, N. Y., and subsequently at Little Falls, near Paterson, N. J., where he remained till 1829, when he returned to Oxford at his father's request, to take a place in the counting-room of the Oxford Woolen Company. This company had been established in 1824, Richard Olney being one of the original stockholders, and thereafter acquiring a controlling interest in the enterprise.

Wilson remained in the counting-room of the company till 1831, when he engaged in trade, with Samuel Dowse and Benjamin F. Campbell as partners, under the firm-name of Dowse, Campbell & Olney. This firm and its successors (of which he was a member) continued in business at the store premises, next south of the present bank building, till 1836.

In 1832 he married Eliza L. Butler, third daughter of Mr. Peter Butler, a well-known and highly-respected citizen of Oxford. His marriage was in all respects most fortunate and happy. In 1836, having sold his interest in the store in Oxford, he removed with his family to Louisville, Ky., where he engaged in the dry goods business, his former partner, Dowse, having an interest in the venture. He resided in Louisville till 1842, when he returned to Oxford.

His father died at Oxford in October, 1841, and by his will Wilson was appointed one of the executors.

The estate owned a large interest in the Oxford Woolen Company and its property, and, by the terms of this will, the executors were authorized for a time to continue the business of the company; accordingly Mr. Olney, being one of the executors, took part in the management of the business, and made his residence at the company's village, in the westerly part of the town.

In 1846 the mill and other property of the company were sold to the late George Hodges, Mr. Olney, however, retaining an interest in the property, and forming a partnership with Mr. Hodges for continuing the business. This partnership lasted till 1853, when Mr. Olney sold his interest to Mr. Hodges, and, buying the premises then known as the "Barbour Place," near the northerly end of the Main Street in Oxford, he removed there with his family in 1853. In the following year he, with Charles E. Daniels as partner, was engaged in the shoe manufacturing business. In 1855 he was elected cashier of the Oxford Bank. This position he held for nearly twenty years, till obliged by ill health to relinquish it a few months prior to his death.

His discharge of his office of cashier of the bank was marked by that strict fidelity to duty which distinguished his conduct in every relation of life.

In politics he was a staunch Whig, so long as the Whig party existed, but in the latter years of his life he uniformly acted with the Democratic party.

In 1835 he and his wife became members of the Orthodox Congregational Church in Oxford.

The sincerity of his religious faith was exemplified by the purity of his daily walk and conversation, and by the consistent Christian character he ever maintained. The scrupulous honesty, strict integrity and uprightness, which marked his dealings with all, commanded at all times the respect and confidence of all who knew him.

While he was sincere and firm in his convictions, and ever faithful to the obligations of duty, yet his nature was kindly, his impulses generous, and his judgments of others most charitable. In personal appearance he was tall, erect, with a well-proportioned figure, and manly and dignified in feature and bearing. He died at his home in Oxford in February, 1874, leaving his wife, four sons and a daughter.

#### MOSES BUFFUM.

Moses Buffum was born July 10, 1800, at Smithfield, R. I., the son of Joshua and Sabra (Ballou) Buffum.

At nine years of age he was left an orphan, and thereafter made his way in the world unaided, in the face of adverse and discouraging circumstances. He was, in boyhood, employed in the mills at Slatersville, and, at fourteen years of age, was efficient as a cotton weaver. Being inclined to habits of sobriety and economy, he, at eighteen years of age, had saved sufficient

means to begin business on a small scale for himself. He had a desire to enter mercantile life; but circumstances not being favorable, his first venture was in the manufacture of felt hats for the New York market. In this he was only moderately successful; and an opportunity offering to enter the store of Mr. Esek Pitts, a manufacturer of satinets at Millville, he availed himself of it.

Here he won, by his faithfulness and efficiency, the confidence of his employer, and, after two or three years, married his daughter and was received as his partner in the store, and also in the manufacturing business. The operations of the firm continued successfully until 1834, when Mr. Pitts died. Mr. Buffum then assumed the affairs of the company, and in addition took the agency of several other small mills in the vicinity, which he managed ably, developing excellent business talents. For several years he was prospered, and began to realize something of his hopes pecuniarily, when misfortune overtook him.

His first severe reverse was the burning of his mill, in 1849. He had not fully recovered from this loss, when, through the failure of a friend, whom he had assisted financially, he met with another disaster, and saw, within a short time, the results of his earlier business life nearly all swept away.

At the age of fifty-two, with his means thus materially reduced, he, in 1852, came to Oxford, having that year purchased, of Mr. Charles L. Harding, the estate in the westerly part of the town, since known as Buffumsville, having associated with him in the transaction Mr. Edward Thayer, of Millville. Here they began the making of fine black woolen cloths, in which they were prosperous.

In 1855 the partnership expired by limitation. Mr. Buffum then bought out his partner's interest, and by his wise and cautious management carried on the business successfully—his sons, Moses H. and Charles H., being associated with him a few years later—until his decease, in 1874.

Mr. Buffum possessed not only native sagacity and tact, but a hopeful temperament, which led him to persevering and constant effort under all circumstances. Nothing changed his purpose, but quietly and untiringly he pursued his way until success rewarded his endeavors.

He had strong moral convictions and strict integrity; was considerate of the rights of all with whom he had intercourse, and possessed the esteem of the community. He was early an anti-slavery man, and a free-soil voter, and later a decided Republican.

He had no ambitions for public promotion. While living in Millville he served five years in the State militia, and, after filling the offices of lieutenant and captain, was, on June 17, 1830, commissioned as colonel of the Second Regiment, First Brigade, Sixth Division of Massachusetts Infantry, which office he held until July 20, 1832, when he was "honorably

discharged at his own request," and was thereafter known as Colonel Buffum. He was a prominent Freemason, and in social and domestic life was genial and true. Through the long and painful illness which preceded his decease he exhibited the higher virtues which marked him as a man of uncommon fortitude and strength and amiability of character. He died Nov. 20, 1874, and was buried with Masonic honors, in Rural Cemetery, at Worcester, Mass. Moses Buffum may be numbered among the most successful business men of the town of Oxford. He married, July 24, 1823, Louisa Pitts, of Millville, who died, aged seventy-nine, on Jan. 13, 1885, at Oxford. They had eleven children, six of whom survive—two sons and three daughters residing in Oxford, and a daughter who married George Mason, in Washington, D. C.

#### EDWIN BARTLETT.

The progenitor of the branch of the family to which the subject of this sketch belongs removed, according to tradition, from Salem or vicinity to Cumberland, R. I., where Zephaniah, the grandfather of Edwin, was born. He was a farmer and a blacksmith, and removed about 1795 from Cumberland to Thompson, Conn., where was born, February 9, 1810, Asa, the father of Edwin. He spent his early boyhood on the farm, and at twelve years of age began service at Slater & Howard's woolen-mill in Dudley (now Webster) entering the carding-room. Here he made good progress, and from time to time was promoted, until he was placed in charge of the department as overseer, which position he filled ably until his decease, in 1885, having been in this place for the term of sixty-three years. He was a man of character and influence, and although not professedly religious, was a constant attendant on public worship at the Baptist Church. He married Matilda, daughter of Samuel Kingsbury, who belonged to one of the staid old families of southern Oxford, and who served as a soldier in the Revolutionary War. They had three children—Edwin, Amos and Harriet. Amos was captain of Co. H, in the renowned Fifteenth Massachusetts Regiment, in the late war, and is now, 1888, superintendent of the Slater mill, in which his father spent so many years. Harriet married A. J. Bates, a well-known citizen of Webster, and died in June, 1887. Edwin was born October 25, 1833, at Webster, attended the public schools of that town and at Wilbraham Academy, and later at a commercial school at Worcester. In his boyhood he worked under his father in the mill. At about sixteen years of age he was apprenticed to learn wool sorting, and was employed after the expiration of his apprenticeship as journeyman at Slater's until he came of age, in 1854. He then went to Philadelphia, where he obtained a situation in a wool-store, and continued there for one year. In 1855 he returned to Webster, and spent the year at the old business of wool-sorting. In 1856 he accepted a situation as

*Edwin J. Bartlett*

*Andrew Howarth*

book-keeper at the mill of Russell Phelps, at West Fitchburg, where he remained for five years, until his engagement, in 1861 at North Oxford, as accountant for Messrs. Chamberlin & Burrough. After two years here at book-keeping he became superintendent, continuing during 1863 and 1864. In 1865, Chamberlin having previously sold to Burrough, Mr. Bartlett bought a half-interest in the concern, and the firm-name became Burrough & Bartlett, and continued thus until 1870. Down to 1865 their operations had been limited to the wool manufacture, at the two lower or "Huguenot" mills. That year the "Sigourney" and "Rockdale" mills, both cotton, were added by purchase. In 1870 Oscar F. Chase became a partner, and the firm-name was thereafter O. F. Chase & Co.

In 1874 Burrough sold out to Chase & Bartlett, who continued together until 1880, when the firm dissolved and a division of the estate was made, Chase taking the woolen-mills and Bartlett the two upper mills. These he has since operated successfully to the present time, 1888, on cotton-yarns, the principal product being satinnet-warps, which he supplies to many small mills in Oxford and surrounding towns.

Mr. Bartlett married, in 1859, while residing at West Fitchburg, Miss Sarah L. Eddy, of Webster. Their children were Harriet, born 1863, who married E. T. Hallowell, and resides at North Oxford; Josephine, born in 1868, and Edwin N., born in 1872, who both reside, 1888, at home.

Mr. Bartlett has been considerably in office in the town, having been for seven years and now (1888) is selectman—for six years chairman; several years school committee, and moderator at town-meetings. He is public-spirited and favors advanced methods in municipal affairs; and the appearance of thrift, which his mills and village present, gives evidence of his liberal disposition. He is one of the principal supporters of the Baptist Society at North Oxford, having, with his wife, become a member of the church in 1887.

Personally he is free and social, with a gentlemanly address and a genial temperament, and is much esteemed as a friend and citizen.

#### ANDREW HOWARTH.

Andrew Howarth is probably better entitled to the distinction of a manufacturer of textile fabrics "to the manor born" than any other man of the town, past or present, his grandfather, John, and his father, Charles, having both been flannel manufacturers at Rochdale, Lancashire, England. Andrew was six years old when his father and mother, Elizabeth (Lord), emigrated to America, and settled at Andover, Mass. There the father, in partnership with his brothers, James and Isaac—James being the eldest and the head of the firm—began the first manufacture of fine-dressed flannels in the country. Andrew

was educated in the common schools at Andover, finishing his course at Phillips Academy. In early life he entered his father's mill, going through its various departments, and by years of experience there fitted himself for the supervision of the entire manufacture of first-class goods.

In 1844, at twenty-four years of age, he went to Keeseville, N. Y., where he had charge of weaving in the mill of Arnold & Keese. He remained there two years, and in 1846 removed to Waterville, Vt., where, for a year and a half, he was overseer of weaving in the factory of John Herren. Here he was married in September, 1846. He next removed, early in 1847, to Bellingham, Mass., and was, for about six months, in the employ of Kittredge & Loring. In August of that year he had an application from the Virginia Woolen Manufacturing Company to go to Richmond, which he accepted, and began service there as overseer, and later was superintendent, remaining seven years, until 1854, when, by the burning of the mill, operations ceased at that place. Returning North, he accepted a position as overseer of the weaving-room at George Hodge's mill in Oxford. After having been there about four months, a promising situation offering at Little Falls, N. Y., in the establishment of the Saxony Woolen Company, he, in 1855, removed thither, filling the position of overseer until 1859, when he was promoted to the agency, and ably managed the affairs of the company for thirteen years.

In 1872 he terminated his services there, and having, by prudence and economy, accumulated adequate means, he bought a mill of two sets of machinery at Northfield, Vt., where he settled down and laid the foundations of his present prosperity. Ten years of successful business enabled him to become the purchaser in 1882 of the establishment at Oxford formerly owned by George Hodges. During 1882, 1883 and a part of 1884 he operated the two mills, his son, Francis A., having had charge at Oxford until the sale of the Northfield concern in 1884, when both father and son were associated here, and in 1888 still continue.

Mr. Howarth married, September 26, 1846, at Waterville, Martha Moorcroft, who died in April, 1877, at Northfield. Since her decease he has resided with his son. This son, Francis A., is the only surviving child, and was born in Richmond, Va., in 1849; was graduated in 1872 at Brown University. He married Bertha A. Husy, of Hoboken, N. J., and they have one son,—Andrew P., born in 1874 at Northfield.

As may be inferred from the foregoing, Mr. Howarth is a man of good business ability, closely observant of the minutest detail of his manufacturing, cautious and consequently successful financially. He is pleasing and social in manner, and decided in his opinions. As a citizen he has liberal ideas as to public affairs, and has the respect and confidence of

the community in general. Of his mill and village too much cannot be said in praise with reference to situation and general aspect. It will be difficult to find in Massachusetts a like establishment for which nature has done more than for this beautiful spot.

## CHAPTER CLXVI.

### DANA.

BY GEORGE W. HERR, LL.B.

DANA was incorporated February 18, 1801. It was named in honor of Judge Francis Dana, who assisted in obtaining for its citizens the distinction of belonging to an independent municipality. It was composed originally of parts of Petersham, Hardwick and Greenwich. A boundary line was established February 12, 1803, but the boundary line between Dana and Greenwich was not permanently established until June 19, 1811. Parts of Hardwick and Petersham were annexed to the town February 4, 1842.

In 1839 a petition was signed by the inhabitants of one school district in the town of Prescott, in favor of annexation to Dana. The town promptly voted to accept the proposition and extended a cordial welcome to their neighbors. The Legislature, however, refused to change the boundaries of the towns, and the line on the west side of Dana remains the same as when the town was incorporated.

It is bounded on the north and east by Petersham; on the south by Hardwick and on the west by New Salem, of Franklin County, and Greenwich and Prescott, of Hampshire County.

It has two large natural ponds—one in the southwest part of the town, containing about one hundred and sixty acres, called Pottapaug Pond, and a large sheet of water in the north part of the town, called Neeseponsett, which has been from the memory of the oldest inhabitant a resort of piscatory parties, summer and winter.

The most important river is Swift River, which affords excellent water privileges.

Dr. Hitchcock, in his scientific State survey of Massachusetts, gives the geological structure of Dana as gneiss, and stratified with hornblende slate.

In the south part of the town is located Pottapaug Hill, and in the northern part Rattlesnake Hill.

There was a settlement, probably, in the southwesterly part of Nichewaug (now Petersham) as early as 1734, which territory afterward, at the time of the incorporation, formed a part of the town of Dana.

Various reasons have been suggested why the inhabitants in this particular locality should wish to be incorporated into a township. And for lack of recorded evidence, there have been many guesses why the inhabitants yearned so ardently for a charter of incorporation. It should be remembered, however,

at this period of time all were taxed to support the preaching of the Gospel, however remote they might be from the place of worship; that the law permitted towns to build a meeting-house and assess a tax upon the citizens of the town to pay for its construction, and also levy another tax upon them to support the regular Congregationalist Church. Although this law was subsequently modified, so that if tax-payers paid to some designated religious society a sum of money, and furnished a certificate that they had complied with the statute, in such case made and provided, they were released from the "ministerial tax," so-called; yet, at the time of the movement for incorporation, no such amendment or change existed in the law. It, therefore, seems probable that these reasons, and the distance of the locality from the meetings of the towns at their centres, and the obligation resting upon the militia to attend their trainings at a distance so remote, may all have had weight in producing the firm resolution to have a town for themselves and their descendants, and to have it called Dana. We have not available records to furnish all the names of the citizens of the territory which afterward formed this township who took part in the great Revolutionary struggle, but it is safe to say, after an examination of the records of Petersham and elsewhere, that Bezaleel Amsden, Ruggles Spooner, Thomas Stimpson, Jonathan Parkhurst, John Town, Elijah Babbitt, Stephen Johnson and Stephen Witt were soldiers for liberty from the old Bay State, and from the farms and plantations afterwards embraced in this township. Most of these names are now familiar ones in the nomenclature of the numerous families of their descendants.

Most of the voters among the early settlers of Dana were believers in the Democratic political tenets of Thomas Jefferson, and opposed to the Federalists, so that the action of the citizens of this young municipality in the War of 1812 with England, coincided with a large portion of the inhabitants of Petersham, and the patriotic side was espoused by them.

Vote for Governor in 1801, the year of their incorporation, stood: Elbridge Gerry, 45; Caleb Strong, 4. Elbridge Gerry was elected Governor in 1810, and afterwards elevated to the high office of Vice-President of the United States.

The records of the town of Petersham, covering the period of the War of 1812, have been burned, so that we are not able to find the names on record of those citizens who might have been subsequently annexed with their property, to Dana. There is evidence of one commissioned officer, by the name of Elisha Foster, who commanded a company as its captain.

The first town-meeting was opened by legal warning by Daniel Bigelow, a lawyer of Petersham, and a gentleman of the old school, very much respected by the citizens of his town and county.

A large share of the inhabitants of the new township felt that Mr. Bigelow, to some extent at least, belonged to them, being so prominent a man in their

former town, and who had two sons, at that time members of the Williams College, Daniel, Jr., and Lewis, both of whom afterwards graduated in the class of 1803. Lewis was afterwards elected a member of the Seventeenth Congress.

The largest owners of land in this new township, in *fee simple*, as we learn from the records and tradition, were Seth Williams, Joseph Hendrick, Jeremiah Sibley, Elkana Haskins, Joel Amsden, Bezaleel Amsden, Jacob Amsden, Daniel Russell, Oliver Harris, John Town, Ichabod Town, Elijah Town, James Babbitt, Elijah Babbitt, William Bancroft, Dr. Jacob Whipple, Simon Whipple, Benjamin Skinner, Nathan Smith and Stephen Johnson. Mr. Johnson lived until 1855, dying at a very advanced age.

Several of the above, it is believed, owned land to the amount of five hundred acres each, or even more.

At the first town-meeting Jacob Amsden, John Town, Jr., and Joseph B. Hendrick, the latter being one of the largest land-owners in the new town, were chosen assessors, to determine the valuation of the property of the inhabitants, for the purpose of taxation.

At this meeting all necessary town officers were chosen; a Board of Selectmen, the assessors hereinbefore mentioned and a long list of minor officers.

Daniel Stone, Esq.,—who yet lives, a most respected and honored citizen, and, although upwards of eighty-two years of age, retains his mental faculties, in full vigor, and whose father, Elias Stone, a very worthy man and most enterprising citizen, and who moved to Dana in 1804 and afterwards became the owner of five hundred acres of land in Dana, whose son Daniel, carrying out his father's hopes and expectations, helped to prepare the way for the utilization of Swift River for manufacturing purposes,—says, speaking of one class of town officers, in an interesting historical sketch prepared by him many years ago, but never published: "It was the duty of the Tithingmen to keep order at Church, and, I remember when a boy, of hearing the heavy cane of the Tithingman fall with a loud rap, when the boys and girls played in meeting." And he quaintly adds: "Such officers are needed now."

It was the custom then for couples about to be married to be advertised. The town clerk, at the close of the service on Sunday, would call out the names of the intended bride and bridegroom in a loud voice, "marriage intended," etc.

The town was divided into five school districts by a committee chosen for the purpose at their first town-meeting, and money was raised for school purposes. For a short time after the incorporation only one school was kept, and that in the dwelling-house of Seth Woodward, near the centre of the town. While this state of things existed about forty dollars paid the school expenses for the year.

It is believed that there were one hundred and fourteen legal voters at this time in the town. As soon

as the five school districts were all in running order, one hundred and fifty to one hundred and seventy-five dollars per annum was about the amount raised for the next twenty-five years for school purposes. Young men who had the reputation of being good teachers could be obtained for ten dollars per month in the winter, and female teachers at as low a price as fifty cents per week in the summer.

The teachers all boarded around, and each family furnished his share of the wood—a good ox-sled load of wood—so that no money was raised by taxation for board of teachers or for wood.

There was always, especially in the winter, a very large attendance of scholars—many of the scholars, both boys and girls, being over eighteen years of age. The old-fashioned spelling-schools were held, and the scholars enjoyed themselves *hugely* during the two months of the winter term, although the discipline of the schools was enforced by strict rules, of which the *FERULE* was a very important factor.

There were not many letters written in those days, and postage was dear. It was as late as the year 1812 before the town had a post-office within its limits.

At a very early period of the settlement of this territory grist and saw-mills were constructed. The saw and grist-mills would be joined together, one mill doing both kinds of business, and with the same power and mill privilege.

Seth Johnson, Jr., after the incorporation, owned one of these double mills at the south part of the town, and Jacob Amsden, one of the first settlers, owned another similar mill, located in what is now called the Doubleday village.

The highways were merely cart tracks, and were very crooked, not better than common cart roads leading to timber lots.

The inhabitants, when they practiced any other mode of locomotion than the pedestrian, and used horses, always adopted the equestrian method.

A yeoman, who owned his acres in *fee simple*, and was entitled to the name in free America, would frequently be seen on horseback, his wife behind him and often two children in front. This practice of having a partner, both sexes being usually represented, existed with the young and old alike, whether going to church or to a dance.

Great curiosity and interest were manifested when one of the citizens, Elisha Sibley, bought a wagon, a vehicle without springs of any kind, and the first one on wheels for pleasure riding ever owned in the town. It was in very great demand, sometimes being engaged several weeks ahead; the cost was reported to have been sixty dollars.

The "One Hoss Shay," that "Hahsum Kerridge," so fashionable in its day, had not made its appearance in Dana. The older men, however, continued to wear the costume of their fathers: cocked up hats, rolled up on three sides, in the form of a triangle; breeches, knee-buckles, long stockings, etc.

I know it is a sin  
For me to sit and grin  
At him here ;  
But the old three-cornered hat,  
And the breeches, and all that  
Are so queer !

All the dwelling-houses at the time of the incorporation were one story and unpainted. Some of the chimneys were of stone, some of brick. The fire-places for the kitchens were about six feet broad, and for the square rooms or parlors about three feet. The architecture was simple in the extreme,—a long kitchen on one side, with a pantry and bed-room at the end; on the other side, two rooms,—one square, the parlor or best room, the other being made narrow, by the chimney, which was usually as large as the bed-room, at the end of the kitchen.

The soil produced large crops of rye in its virgin fertility, and the neighboring towns were accustomed to purchase rye of the farmers of Dana. This was especially the case in the year A.D. 1816. The author of this sketch has often heard his grandparents, who had relatives in Dana, describe the direful condition of this section of the State in the year 1816. There was almost a total failure of the grass crop in some localities, as well as a total loss of all the maize or Indian corn. A famine was dreaded. The only means of transportation then was by slow teams. The old inhabitants, who well remembered the dark day of 1780, felt that a more serious calamity than that was said to portend might befall them, when the glad news reached the communities that the plains of Greenwich and Dana would furnish an abundant supply of rye. The inhabitants of the neighboring towns, especially those east of Dana, were most glad to go to this "Egypt" and buy breadstuff. A kind feeling existed thereafter towards the young township, and she was immediately recognized as the equal of the older municipalities.

In the year 1818, Nathan Munroe died of the small-pox, in the precinct now known as North Dana. He, with his daughter, had just returned from a visit to the "West," and while at the house of a citizen, named Chamberlain, was suddenly taken very sick. Many of the neighbors visited him, and watched with him; but when it was discovered that he had the small-pox, consternation and alarm spread like wild-fire throughout the town. There were only two dwelling-houses then in this immediate locality, and all persons who had been "exposed" were compelled to occupy one of these houses, and submit to inoculation. The highways were fenced up in all directions and flags displayed.

Some time previous to this alarm on account of the small-pox, about 1810, a terrible epidemic visited the town, which physicians called spotted fever. Some died within twenty-four hours after being attacked, and it spread to some extent into the adjoining towns. Dr. John Flint, who was attacked while visiting a patient, died in his sleigh on his way home. A very

simple remedy was finally discovered, and the medicine used could then be obtained at a reasonable price, and in perfect purity. It was French Brandy, and when administered, in doses large enough to kill several well men, to the sufferer, it conquered the dread scourge, and all, who were thereafter attacked recovered, in case the medicine had been administered to them at the proper time, and in sufficient quantity.

In the early years of the town's history it might be truly said that there were many manufacturers actively engaged in work. There was no large manufactory or factory building especially built for the purpose, but in nearly every dwelling-house, flax and wool, raised and produced by the farmers on their own farms, were spun, woven, dressed and made into wearing apparel, by the female members of each family.

There were also fullers' or clothiers' shops, where the various cloths for the clothes of the men and boys were dressed, dyed and pressed. The tailor or tailoress would then visit the old homesteads and superintend and assist in making up a year's stock of clothing.

When any of their neat stock had been fattened and killed, they took the hides to the tannery and had them tanned for their own use.

The shoemaker went from house to house, the same as his brother craftsman, the tailor, and made boots and shoes. This was called "whipping the cat."

Many of the farmers with their own teams visited Boston in the fall of the year, carrying poultry and pork to "market," and purchasing a large stock of groceries, including molasses, fish, sugar, salt, etc., and never forgetting to buy a keg of good New England rum. Thus, the population was thrifty, and self-sustaining.

One of the earliest industries, outside of their regular avocations, was, probably, the business of preparing and making potash for sale. The huge fire-place produced a great quantity of ashes, and, as a few acres of the heavily-timbered land must be cleared each year by its owner, what was consumed in the fire-place was considered clear gain, and saved the necessity of burning it on the wood-land. Mr. Stone says: "I remember two such establishments in town, one at the brook, this side of Dana Common, where N. L. Johnson now works palm-leaf, potash has been made there since my remembrance. There was another near the spot where Henry Johnson's house now stands. I well remember its standing there, with all the leaches and apparatus necessary for making potash."

Setting card-teeth was also an industry in which the women and children, more or less, engaged. First in hand-cards, afterwards long sheets of leather and teeth for factories were furnished or "put out," the same as palm-leaf has been since.

Another industry in which the women engaged was the weaving of cotton cloth. At first only the thread

was spun by machinery, the cloth being woven in hand-loom. One man, at least, in the town made it his business, for some time, to furnish the thread to his various customers.

Wallets and pocket-books were manufactured in the town. For some seven years quite a business was done in this branch of manufacturing.

The girls learned to stitch the articles, and this work was very generally engaged in by the young women of Dana.

It is believed that straw bonnets were made in Dana as early as the year 1815. At one time it was carried on quite extensively. The very best quality of rye-straw for the bonnets was raised in this town, on newly-cleared land, being cut for braiding before the seed or grain was full. The women and children found employment in braiding the straw. These bonnets became quite the fashion. The bonnet was almost as white as snow, and, when trimmed with ribbons, it was called very comely and pretty.

There was also a tannery in the town, and the farmers could get cider brandy by the distillation of their cider in the distillery established in Dana.

There was very early manifested by the inhabitants a spirit of enterprise and earnest desire to engage in, or have introduced into their little township, industries and employments other than tilling the soil—probably more so than in any other town in all this section of the State.

Many town-meetings were held for the purpose of building a meeting-house, which was then lawful for all towns to do, and pay for the same, as well as the support of the minister, by a tax assessed upon the inhabitants.

It had been the almost universal custom in Massachusetts, after the incorporation of a town, for the citizens to select a central location for the public buildings—a meeting-house, with a school-house near its side, and town hall. Also the largest store and the principal tavern were generally found in the "centre," so-called, and most of the mechanical business might be expected to be located in the same place.

But in Dana there was an old meeting-house which had been moved from the southerly part of Petersham, and located on Dana Common, and which was used as a place of religious worship by the Baptists for more than twenty-five years after the incorporation of the town, and until the Baptist Church ceased as a distinct organization. Some of the members of this organization were afterwards found connected with the Baptist Churches in Hardwick, Petersham and Athol.

This building was finally bought, by the town, of the individual owners for a town hall and school purposes, about the time the annexation of the new school district, from Petersham and Hardwick, took place. This annexation somewhat changed the controversy as to a central location for the public

buildings. One chief reason, why Dana did not conform to the prevailing custom as to the building and location of a meeting-house and town hall, seems to have been from the fact that the inhabitants of the south and east parts of the town preferred Dana Common for the location of said buildings; while the citizens of the north and west portions were very much opposed to this arrangement, on the ground that it was not sufficiently central.

Frequent town-meetings were held upon the subject, and in 1818 we find a record that the town voted to build a town hall, and chose a committee to decide upon the site. Very soon thereafter, however, another town-meeting was held, and the former vote was rescinded. As early as 1812 it was voted to build a meeting-house. Similar votes were subsequently made, but all were reconsidered, as no agreement could be reached for the location of the church edifice as the property of the town. The result was no meeting-house was built, while the law permitting the town so to do remained upon the statute-book. And, for the same reason, of non-agreement as to the best site, no town hall was constructed. It is apparent that very little was paid in the form of a "ministerial tax," and nothing for the building of a meeting-house.

It is a fact, however, that soon after the incorporation they voted to invite neighboring ministers to give preaching eleven Sundays during the year. And sometimes, while the law permitted, small sums were raised as a salary for a minister,—two hundred and fifty dollars being raised in some years.

It was the custom of Dana, like that of other towns, to "let out" the keeping of the town's poor, by bids, in the manner of auction sales, at their annual town-meetings, to the "lowest" instead of "highest" bidders, *i. e.*, to those persons who agreed or made the lowest bids, to take care of the paupers for the least pay. But it ought to be said in this connection that Dana, earlier than some other towns, relinquished this practice, and provided a commodious and comfortable home for her unfortunate wards requiring pecuniary assistance.

There is good evidence to believe that some inhabitants lived in what is now called North Dana quite a number of years before the incorporation. In the middle of the old mill pond, a short distance above the village, there remains buried in the water the partial mole or bank of an old mill dam. It has been called the Martin Dam, but the oldest inhabitant does not recollect when the mill was in running order.

It is believed that, as early as 1812, Thomas Stimpson built a saw-mill on the west side of the river, which mill did some business for many years, and on the east side of the river he raised a large frame for a projected factory, hoping to find some moneyed manufacturer who would utilize this good water privilege and establish here an important business.

The War of 1812, and its effects upon the country in a business point of view, directly after the declaration of peace, when there was almost universal distrust of the currency—of the paper which had passed for money, and the impossibility of using gold and silver on account of its great scarcity—prevented any investment of capital for the purpose intended by Mr. Stimpson.

With the exception of what little business was done at this saw-mill, this good privilege remained useless until about the year 1830, when Daniel Stone, Esq., became interested in this valuable water privilege, and in 1836 became its sole owner. He rebuilt the saw-mill and put up a new grist-mill on the east side, thus utilizing the privilege, to some extent, on both sides of the river. He also bought three tracts of meadow and timber land to secure his right of flowage.

In 1845, Mr. Stone having in the mean time sold the property, with all the privileges and appurtenances thereto belonging, to Warren Hale; Allen Goodman and the said Warren Hale invented and obtained a patent right of a machine for making and shaping the piano-forte, melodeon and billiard-table legs.

Nelson Bosworth, of Petersham, first commenced to veneer the legs. He resided in Petersham, and for a time took them to his factory there, returning them after the veneering process had been finished. For several years all the productions of the firm of Hale & Goodman were drawn by teams to Palmer Depot to be freighted to their various customers, a distance of twenty-two miles.

In 1846 Lorenzo Hale was admitted as a partner. A post-office was established here the same year, called North Dana Post-office, and thereafter the village and post-office were called by the same name, having been called Stonesville for many years previous. Soon after Jonathan E. Stone, brother of Daniel Stone, Esq., and Hammond Doane became members of the company. In 1850 William Stimpson, Warren Stimpson and Charles N. Stimpson were joined as co-partners, and Jonathan E. Stone, Warren and Lorenzo Hale withdrew from the firm; also, about this time, Hammond Doane left the company. New factory buildings were erected, and soon after Nelson Bosworth was made a partner in the company. The manufacture of veneered piano-forte, melodeon and billiard-table legs was now greatly increased.

In 1854 Silas F. Lindsay and George T. Johnson, two young men who had been very successful in mercantile business in the village of North Dana, drawing trade from the neighboring towns, joined the company, with their business and their own partnership property, and the name of the old firm was changed to Johnson, Stimpson & Co. The business, under the new organization, was greatly enlarged and good dividends were realized. In December, 1856, their principal factory buildings were destroyed

by fire, but in the spring of 1857 more commodious and convenient buildings were erected, and equipped with new and improved machinery, invented and designed principally by Allen Goodman. In the fall of 1857 another disastrous fire occurred, destroying several buildings connected with the works and burning a large amount of material and stock.

During the rebuilding of the factory buildings Allen Goodman was called to New York City to defend some of his valuable patents, which were very essential to the success of the "Leg Company," as it was then often called.

While there, although past middle life, he commenced the study of medicine, which he pursued with very great earnestness until his death, seventeen years afterwards. He had at one time quite an extensive practice, and had gained the reputation of effecting remarkable cures in some cases of consumption, and in attacks of typhoid fever.

In 1859 Dr. Allen Goodman and Warren Hale obtained an extension of their patents for seven years on the leg machinery, and bought out the firm of Johnson, Stimpson & Co., and formed a new co-partnership under the firm-name of Warren Hale & Co., consisting of Warren and Lorenzo Hale and Dr. Allen Goodman. In January, 1861, J. Wesley Goodman, son of Dr. Goodman, was admitted as a partner. A profitable term of business followed, Jacob A. Towne having, in the mean time, joined the firm, of which he remained a member until his death, in 1872.

J. Flint Peckham, and also Nelson Bosworth again joined the company in 1867. In June, 1868, the leg factories were again burned, but were rebuilt the same season.

Mr. Bosworth had died a short time previous to the death of Mr. Towne, a man of great usefulness to the company, and who had been connected with this important manufacturing industry almost from the very commencement. In 1872 Allen W. Goodman, a son of Dr. Goodman, bought the interest of Warren Hale in the firm, and the firm-name was changed to Hale, Goodman & Co., consisting of Lorenzo Hale, J. Wesley Goodman and Allen W. Goodman. At this time another important industry was added to the business—that of the manufacture of picture frames.

In 1873 the leg and picture-frame factories and the saw-mill were all destroyed by fire. The leg factories and saw-mill were rebuilt the same year, and the company continued the business without discouragement. In January, 1876, J. Wesley Goodman bought out the good will and stock of this copartnership, and leased the factories and power and added to the former business (excepting the manufacture of picture frames) the construction of billiard-table frames and all the wood-work connected with the tables. He continued manufacturing in North Dana for four years, when he removed his business to Athol.

Lorenzo Hale and Allen W. Goodman put in suit-

able machinery, and established a satinet factory under the firm-name of A. W. Goodman, Scofield & Co., and were succeeded by Messrs. Dorr & Crawford. In April, 1886, Pitts C. Tyler, a capitalist of Athol, bought the interest of Mr. Dorr, and formed a co-partnership with W. J. Crawford, the former member of the firm of Dorr & Crawford, under the firm-name of Crawford & Tyler, in the manufacture of woolen goods. They now employ about thirty hands, and do a business of about forty thousand dollars per annum. Eddie Pitts Tyler, son of Pitts C. Tyler, is book-keeper, and the active member who resides in North Dana.

Among the industries of North Dana that are now in a flourishing condition may be mentioned the palm-leaf hat industry and straw braid business for hats of Henry W. Goodman, who does a business of about forty thousand dollars per year.

John E. Stowell is carrying on a successful business in the manufacture of boxes, in a shop that has recently been erected near the depot. Messrs. Goodman and Stowell both use steam-power.

A new and handsome hotel has also been erected near the depot, which contains a fine public hall and a store; the hotel has been leased by the veteran landlord, Captain D. L. Richards.

It might be well, here, to speak briefly of the fires which have occurred in the town of Dana, some of which have been already incidentally referred to.

First, as to the village called Stonesville and North Dana. In 1839 a shop belonging to Daniel Stone, Esq., located at the east end of the bridge, used as a carriage-house and storage of valuable material for carriage-wheels, was burned with contents—loss, one thousand dollars and no insurance. The great fire of 1856 was the next fire in the village, when all the buildings on both sides of the dam, were consumed, and also a building standing on the old site of the one burned in 1839. C. N. Doane and Mr. L. Wheeler lost heavily, without any insurance. Johnson, Stimpson & Co., who lost their principal factory buildings, were partially insured.

In August, 1857, the hotel buildings, occupied by George H. Gibbs, were entirely destroyed, with most of their contents—only partially insured. In September, of the same year the large finishing shops of Johnson, Stimpson & Co., on the south side of the highway, with a full stock of legs, veneered and ready for the market, were burned—partially insured. In 1868 there was another great fire, the big water shop, so called, was burned, the second time, with other buildings of the company, then bearing the firm-name of Warren Hale & Co. The loss was fully twenty thousand dollars.

In the fire of 1857 of the large finishing shops of the company, a dwelling-house, belonging to Franklin Blackmer, was burned. Subsequently the dwelling-house, barn and shop of Charles F. Gleason were burned, also the house of Willard Blackmer.

The goods in the store have been twice damaged by fire; once on account of removal, in the great fire of 1856, and once when the building had been struck by lightning.

In 1873 another great fire occurred in North Dana. The principal works of Hale, Goodman & Co., including the picture-frame factory and a saw-mill, were completely destroyed by fire. The loss was about fifty thousand dollars. In this year it is given in an official report that Dana ranked fourth in the amount of losses in the county of Worcester for the year 1873. About the same time the residence of Edson Oakes, with all the buildings connected therewith, was burned. In 1881 the barn of E. A. Albee, with contents, and a very valuable house were burned.

Outside of the village and immediate vicinity of North Dana the most disastrous fire which has occurred was the total destruction of the fine steam saw-mill of the brothers, J. Sullivan and Zenas W. Brown, the loss being estimated at twenty thousand dollars. This mill was not rebuilt, and was a heavy blow to the business in lumber, of the town.

During the year 1888 the dwelling-house of George W. Doane, south of the Common, was burned, with nearly all the furniture and clothing of the family, including a sum of money. Years previous an unoccupied house, owned and occupied at one time by Samuel Oakes, was burned.

In the act approved May 6, 1884, to establish the First District Court of Northern Worcester, the town of Dana was not included therein. A protest had been numerously signed by many of its citizens, and forwarded to the Legislature, against the measure, believing, with a majority of their fellow-citizens living in the proposed judicial district, that it was not advisable, under all of the then existing circumstances, to form such a court.

Dana has produced good men and true—fit representatives of the sterling qualities of New England's noble type of manhood; temperate, industrious, frugal and honest. "An help-meet for him" (Gen. ii. 18). The women of this township have fulfilled this injunction of Sacred Writ most faithfully, in times of prosperity and adversity. The social and unwritten history of the town demonstrates this fact, and the development of its agricultural and varied manufacturing interests prove the untiring industry at all times of the girls and women among its inhabitants.

Daniel Stone, Esq., is one of the old stock, born soon after the incorporation of the town; he has lived to an advanced age, a life of great usefulness; has represented the town two years in the Legislature; is one of the oldest magistrates in this section of the State; has been trial justice. The author of this sketch well remembers a case he had before him, in which he appeared as attorney, nearly a generation ago, and the decision was most just, and characterized by a keen sense of the equities involved.

There was no appeal entered to a higher court from the judgment rendered.

He has always, since the great Civil War, been a true friend of the soldier, and has assisted many widows, orphans and dependent fathers and mothers to secure their rights under the pension and other laws. He has done an extensive insurance business for many years, and is still engaged therein, having his son associated with him; is one of the oldest of the alumni of New Salem Academy, Major Warren Horr, of Athol, being his senior only by a few years; he and his noble and amiable wife, at the celebration of their golden wedding, were honored with the heartiest expressions of esteem and respect by numerous friends at home and abroad. At his eighty-first birthday in September, 1887, members of the family representing four generations were present. The author is indebted to him for many facts of interest in the town's history.

A son of Dana, who has attained wealth and honor while remaining a resident of his native town, is Hon. Nathaniel L. Johnson, who has been for many years in the palm-leaf goods trade, and has done a business, on an average, of twenty-five thousand dollars to thirty thousand dollars per annum. The palm-leaf business, in its various forms, has been a prominent industry in Dana for many years. It was, probably, first established about sixty years ago, and has been successfully and extensively prosecuted by many different individuals and firms.

Since 1882 the business has been declining, on account of the importation from Europe and Eastern Asia of straw braid, and palm-leaf hats are being supplanted by straw hats, which can be made cheaper. Mr. Johnson has almost closed this branch of his business. He was a member of the House of Representatives in the Legislature of 1857-60 and 1871, and a member of the Senate in 1873-74, and was elected president of the First National Bank in Barre in 1883, which position he now holds. His mother, Martha Johnson,—relict of Nathaniel Johnson, who represented the town in the Legislature in 1835,—a woman honored and beloved by all, died October 24, 1883, aged ninety-two years, two months and ten days, the oldest person in town at that time.

James Madison Stone is a native of Dana and son of James H. Stone and Azubah Stone, both deceased. His venerable mother died December 6, 1888, aged eighty-six years and nine months. Nine children, eighteen grandchildren and twelve great-grandchildren survived her. She was a remarkable woman, well read and possessing much information upon general topics. She viewed the last great change with perfect composure and declared her unshaken belief in "Angel Ministry."

A painting by her son, James Madison, in the exhibition of the Paint and Clay Club of Boston, a few years ago, drew out appreciative notices from the art-critics. It was a half-length seated figure of a

young girl, wearing a hat and looking out of the canvas. "The cheek is susceptible of pressure, and there is blood in the veins—trite facts, when stated of nature, much too infrequently observed in a portrait. There is something of Rembrandt's simplicity and surety of effect in this head—it at once suggests that artist's portrait of Soskia van Uhlenburg, in the gallery at Dresden, as well as those more elegantly-garmented figures of her in Cassel and St. Petersburg."

Among those who have served the town in positions of public responsibility, as town officers, may be mentioned Alpheus J. Nye. He was born in Enfield, Mass., and came to Dana, when a young man, as a teacher. His sterling character and excellent judgment were soon recognized by his fellow-townsmen, who called him repeatedly to positions of trust and honor. He was a member of the School Board for more than fifteen years, and also served on the Board of Selectmen, as assessor, overseer of the poor and as road surveyor.

He served as a faithful soldier, in Co. B, Fifteenth Regiment Mass. Vols., in the Great Civil War, and died, of disease contracted in the service, at Athol, Mass., Dec. 17, 1888.

Dec. 10th, only seven days before his death, the author received from our noble Commissioner of Pensions, General Black, notice, in prompt answer to a request, which had been made for the purpose, that Mr. Nye's claim for pension had been made special. It was immediately communicated to him, and his expressions of joy, gratitude and thanks were most sincere and emphatic. Reference is made to this fact to show one trait in this worthy man's character. Although enfeebled by disease contracted in the service, and repeatedly advised by his friends to apply for a pension, he steadily refused so to do from principle, as he regarded it, until he was no longer able to perform manual labor, requisite to provide support for himself and his wife.

Silas F. Lindsay, who died in 1887, a little over sixty years of age, was for a long time one of the most active and prominent business men of the town, and was always considered a good adviser on business matters. For a number of years he kept the store at North Dana, in connection with George T. Johnson, and was a leading business man of the town until increasing infirmities obliged him to retire from active duty.

Dr. Daniel Lindsay, who died in 1887, at the age of ninety-three years, was one of the oldest physicians in Western Massachusetts, and for many years was the doctor of the town. Dr. Lindsay and his wife enjoyed a married life of seventy-two years; she still survives in her ninety-fourth year, and is the oldest person in town.

Theodore S. Johnson, counselor-at-law, and clerk of courts for Worcester County, whose efficiency and courtesy have never been surpassed by any official, holding the responsible office of clerk of the highest

courts of Massachusetts, is the son of Theodore W. Johnson, who moved to Worcester, from Dana, not many years ago. Charles R. Johnson, another son of Theodore W. Johnson, is also a member of the Worcester County bar, in good practice.

During the last few years North Dana has lost several of its old and respected citizens by death, among whom were Solomon G. Towne, aged seventy-eight; Orson Towne, seventy-six, and Albert Amsden, the two latter having represented the town in the Legislature, and held various town offices.

Another event, not of frequent occurrence, was a golden wedding in 1886, when the fiftieth marriage anniversary of Mr. and Mrs. Clark Miller was duly celebrated by their relatives and friends at the old homestead.

The medical profession is represented in Dana by Stephen Witt, M.D., who has practiced medicine for the last ten years, and is a descendant of one of the old families of the town; and G. M. Foskett, M.D., who is a graduate of Amherst College and has had extended study and experience in the medical schools of Philadelphia, New York and Burlington.

By an act passed by the Legislature in 1886, the number of polls, the amount of property and the tax of one thousand dollars, including polls, at one-tenth of a mill each, for each city and town in the several counties of the Commonwealth, as contained in a schedule of said act, constitute a basis of apportionment for State and county taxes during the decade ending in the year 1895, or until another is made and enacted by the Legislature.

According to this schedule, the tax of Dana was 17 cents, and on the valuation of \$293,473, Dana was assessed to pay the sum of \$255 of the amount of \$1,500,000 State tax. A new apportionment made by the tax commissioner has been presented to the present Legislature.

In the county of Worcester, in the apportionment of 1886, each of the towns of Boylston, New Braintree, Paxton and Philipston, has a less number of polls than Dana, and both Paxton and Phillipston less property.

The railroad, which passes from Springfield to Athol, through North Dana, has been bought by the Boston & Albany corporation, and is now a branch of that company. Improvements are being constantly made in its rolling-stock and everything connected with it, which is of great benefit to the towns located on this route, especially those having large and increasing manufacturing interests like Dana.

Swift River Lodge of Good Templars, which was organized in October, 1873, is one of the most flourishing temperance organizations in this section of the State, and has a membership of about one hundred. The society has exerted a powerful influence in the community, and has been a prominent factor in the politics of the town, as is indicated by the fact that for several years the prohibition vote of Dana was

about one-third of the total vote of the town, the vote of 1887 for Governor giving Ames, Republican, forty-three; Lovering, Democrat, thirty, and Earle, Prohibitory, thirty-eight; the vote of 1886 gave Ames thirty-seven, Andrew thirty-one, and Lathrop, Prohibition, thirty.

The society has a fine hall near the depot, at North Dana, where the meetings of the lodge are held.

Another important and flourishing organization is that of Garfield Grange, which was organized in 1882, and is also located at North Dana, where they have recently moved into a fine new hall in Doubleday Block. This organization has done much for the agriculture of the town.

The census report of 1885 gives the value of the agricultural property at \$243,596, of which the land amounts to \$117,270, the farm buildings to \$102,095, and domestic animals to \$24,231. There are one hundred and twenty-six farm-houses; the dairy products amount to \$10,986; hay, straw and fodder to \$16,383, and wood to \$11,420. Of the 11,591½ acres of land in the town, 5632, or nearly one-half, were covered with wood in 1885; 980 acres of which were woodland of over thirty years' growth.

One of the most attractive places in the town is Richards' Grove, at North Dana. Here, within a short distance of the railroad station, is a beautiful grove, situated on the border of a line of ponds, three miles in length; these ponds teem with pickerel, perch and other fish, and during the summer are covered with most beautiful pond lilies. Cottages have been erected here, and during the hottest summer days cool and refreshing breezes play around them. A spring of the coolest and purest water flows from the hillside, while for those who desire mineral waters a spring, strongly impregnated with iron and sulphur, is near. This has become a favorite resort during the summer months for parties from Worcester, Springfield and other places. A fine pavilion has been erected by Captain D. L. Richards, the proprietor, and the grounds are in great demand for picnic parties.

During the first twenty years after the incorporation of Dana, itinerant or local Methodist preachers occasionally visited the town, and a class of Methodists was organized, consisting mostly of people living in the easterly part of the town. Among the members of this first class were: Uriah Doane, Benjamin Woods, William Tolman and Ebenezer Grosvenor. Among the preachers who visited the place and preached at different periods, were the noted Lorenzo Dow, Joshua Crowell and Jefferson Haskell. But it was not until 1830 that regular Methodist preaching commenced, when a small society, known as the Liberal Congregational Society, held meetings in a hall in the dwelling-house of Justice Woods, whose father was an earnest Methodist. These meetings were conducted by students from Wilbraham Academy, and were continued in the hall until 1833, when Erastus Otis and William Gordon were appointed by the New England

Conference to Pelham Circuit, which included the towns of Pelham, Greenwich and Prescott, in Hampshire County, and Dana.

The preaching at Dana was in a school-house near North Dana, which was at that time a small village, known by the name of Stonesville. Prayer and class-meetings were held weekly, and occasional grove-meetings were held.

As a result of this work conversions multiplied, additions were made to the church, and general prosperity and great harmony prevailed among the brethren.

Although the school-house was the only place of public worship at Stonesville until 1840, the little band had grown to a church of more than forty members.

During the year 1840 the importance of a more suitable place of worship was discussed, and Elias Stone, a farmer in the neighborhood, though not a member of any church, became interested and subscribed five hundred dollars for the construction of a church edifice. During the year the building was completed, the money all being raised by subscription, and was dedicated, free from debt, as a Union Church, and the right to use the church a share of the time was guaranteed to other denominations. The church continued to increase and prosper until about the year 1846, when Simon E. Pike, a local preacher, who had joined the new church called True Wesleyan, came into the town and formed a church of that order, which drew from the Methodist Church about one-half of its members. The division did not last many years, however, and the meeting-house, although called a Union Church, has been for the larger part of the time occupied by the preachers of the Methodist denomination.

Among those who have been pastors of this church are Thomas Marcy, Joseph W. Lewis, Amasa Taylor, Houghton S. Booth, C. E. Seaver, E. P. Gibbs, Thomas Martin, J. J. Woodbury and S. A. Bragg.

The present pastor is Rev. George Hudson, who also has charge of the Methodist Church at South Athol.

The doctrine of universal salvation was preached in Dana during the last years of the last century by one of the founders and most noted preachers of the Universalist denomination in the United States. Here was the first pastorate of the Rev. Hosea Ballou, and to the people of Dana he first proclaimed the doctrines of universal salvation as a pastor. This was his home and the scene of his labors for nearly seven years.

Another eminent divine and leading minister of the Universalist denomination, who served the Dana church as pastor in the early days of the town, was Rev. Lucius R. Paige, D.D., who is still living in Cambridge at the age of nearly ninety years. With an undimmed eye and still vigorous mind, he has devoted much of his later life to historical and literary

work, being the author of a history of Cambridge, and also of his native town of Hardwick.

Other ministers of this denomination who have been pastors in Dana are Jared Bushnell, Joshua Flagg, James Babbitt, Massena Ballou and John Willis.

Although there are a considerable number of those who believe in the doctrines taught by Father Ballou living in Dana, there is no permanent pastorate or society in existence at the present time.

An Orthodox Congregational Society was first organized about 1832 as a mission station by Dr. Storrs, of New Braintree, and continued as such until 1852, when, on the 10th of July, the Orthodox Congregational Church and Society was organized with eleven members, and in 1853 a church edifice was built near the Common. The first pastor of the newly-organized church was Rev. John Keep, who served as pastor until 1861, when he was succeeded by Rev. William Leonard, who remained three years.

Since that time the church has been supplied by various ministers, among whom are Rev. Henry M. Rogers, Rev. O. Russell, Rev. Mr. Soule, Rev. E. P. Gibbs, Rev. E. W. Merritt, who was acting pastor for six or seven years; Rev. John W. Haley served during 1885; Rev. Edwin S. Wight, D.D., in 1886; Rev. Mr. Haley again in 1887; and from July, 1887, to the present time, Rev. Josiah S. Willis has been the pastor.

The Orthodox Congregational Church and Society is united and prosperous, though not large in numbers, and reckons among its members some of the descendants of the old families and substantial citizens.

Other religious doctrines have, at different times, had their adherents, and some quite prominent citizens united with the Shakers, while the sect called "Christians" had, at one time, about one hundred members, but they were not all residents of Dana.

The cause of education has always received support by the citizens of Dana, and the schools of the town, as a whole, have ranked well with those of other towns of similar size and population. The town was quite early divided into five school districts and afterwards another district was added to the eastern part of the town by annexation of territory. There are now five schools in the town, those in North Dana being graded into primary and grammar, and for the year 1888 seven hundred dollars was raised for their support. The committee for that year were E. C. Haskins, Stephen Witt and Miss M. J. Richardson.

Those who have served the town as Representatives to the Great and General Court are: Nathaniel Williams, 1811, '12, '27, '29; Stephen Johnson, 1813; Apollos Johnson, 1823; Ephraim Whipple, 1830; Reuben Sibley, 1831; Italy Foster, 1833, '39, '41, '42; John Gleason, 1834; Nathaniel Johnson, 1835; John Towne, 1836; Nathan Stone, 1837; Benjamin Rich-

ardson, 1847; Daniel Stone, 1849, '51; Leonard Doane, 1852; Orson Towne, 1853; Albert Amsden, 1854; Nathaniel L. Johnson, 1857, '60, '71; Allen W. Goodman, 1864, '82.

Town Clerks.—Joel Amsden, 1801–04; Elkanah Haskins, 1805–06; Abial Parmenter, 1807–09; Stephen Johnson, 1810–11; Ephraim Whipple, 1812–13 and 1818–28; Justice Woods, 1814–17 and 1836; Dr. Joseph Giddings, 1829–35; Apollos Johnson, 1837; Italy Foster, 1838–40; Frank Lombard, 1841; Hiram A. Meacham, 1842–45 and 1847–50; Daniel Russell, 1846; George T. Johnson, 1851–56 and 1859–60; M. J. Hillman, 1857–58; David L. Richards, the present town clerk, has served since 1861.

The town officers for 1888 were: F. S. Grover, J. S. Stone and F. D. Stevens, selectmen; H. C. Longley, treasurer; Ira Witt, tax collector; Ira Witt and John B. Jaynes, constables.

Although small in territory and population, Dana has never lacked in patriotism, and her sturdy sons have ever been ready to battle for the cause of country and freedom.

A goodly number of names of her early settlers appear among the Revolutionary soldiers, some of whom we have mentioned, while in the War of 1812 her men rendered valiant services; and when, in later times, the summons came for defenders of our flag and the perpetuity of the government and Federal Union, that were trembling in the balance, the sons of Dana were among the foremost to march to the rescue.

Few towns can show a better record. Eighty-eight soldiers and sailors enlisted under the various calls of the government, and thirteen citizens of the town were enrolled in the Union army and credited to other places. Of the eighty-eight that were enrolled and went to the front, four were killed in battle and fourteen died of disease and wounds while in the line of duty. The town also expended eight thousand seven hundred and eighty dollars towards the expenses of the war.

The citizens of Dana, its brave men and patriotic, sympathetic women, have received most complimentary notices from many quarters, and the good record of the town, in the assistance rendered for the preservation of the Union, has been highly praised in official documents and records, State and Federal.

## CHAPTER CLXVII.

### WESTBOROUGH.

BY WILLIAM T. FORBES.

IN October, 1655, Charles Chauncy, the second president of Harvard College, "a reverend, godly and very larned man," wrote a petition to the Great and General Court, saying that he had spent a hundred pounds out of his estate in the subsistence of his

family; that his pay in Indian corn could not be changed to food and clothing without great loss, and asking for relief. He was now nearly seventy years old. According to Mather, "few had suffered for non-conformity more than he, by fines, by gaols," &c., in England. He had escaped from the persecutions of Laud to occupy the highest clerical position in the Colony of Massachusetts Bay, with the honors and poverty attending the lot of an educator in early colonial times. A few Indians entered the college; only one graduated.

Elijah Corlett taught in the "faire grammar school" which stood near by. Netus, an Indian, formerly of Grafton and later of Hopkinton, then called Magunkook, probably sent his boy to school and could not or would not pay his tuition. He owed Elijah Corlett "fower pounds and tenn shillings," and in 1661 obtained leave of the General Court to sell enough land to pay the bill. A committee was appointed to fix the amount and bounds. It was decided that three hundred and twenty acres on the southwest boundary of what is now Westborough would be the proper amount of land, and the consent of the Indians at Hassanamisco, as to the location of the grant, was obtained. Netus led the attack on the house of Thomas Eames, of Framingham, in King Philip's War, and with ten other Hopkinton Indians killed Mrs. Eames and three or four of the children. He was killed himself, at Marlborough, March 27, 1676.

It is possible that President Chauncy had heard of the beautiful lake which now bears his name, the attractive meadows in the valley of the Assabet, and the valuable "seader swamps," from the Indian pupils who came from this part of the Province.

About fifty Indians lived in each of the three towns established by Eliot in this vicinity. The Ockoocangansett plantation, of Marlborough; the Magunkooks, of Hopkinton; and the plantation of Hassanamisco, now Grafton, surrounded Westborough on three sides. Their Indians doubtless fished in our ponds and streams and camped on the shores of Lake Chauncy. At least one Indian had a wigwam and apple-orchard there.

The General Court granted the petition of President Chauncy, by giving him not the cash he so much desired, but five hundred acres of wild land. The commissioners, as was customary in such cases, doubtless allowed him to choose any land not already granted, and made the following report:

*Whereas, John Stone and Andrew Belcher were appointed to lay out a farm for Mr. Charles Chauncy, President of Harvard College, we have gone and looked on a place, and there is taken up a tract of land bounded on this manner: on the east by a little swampe, neare an Indian wigwam, with an orchard of apple-trees, belonging to the wigwam, a playne joyning to the swampe, the playne runing to a great Pond, and from thence to Assebeth River; and this line is circular on the north side; the south line runing to the south side of a piece of meadow called Jacob's Meadow, and so to continue till it reach to said Assebeth River.*

18, 8, 1659.

ANDREW BELCHER.

The following year the General Court revoked this grant, finding that it was included in the grant to the Marlborough proprietors, and gave Mr. Chauncy five hundred acres northeast of the Merrimac, with his expenses for laying out the former farm.

Although President Chauncy owned this grant only one year, he has given his name to the largest and most beautiful sheet of water in the town. The Reform School, its successor, the Lyman School for Boys, and the Insane Asylum, overlooking Lake Chauncy, prove that the Commonwealth has recognized the vicinity as one of the most desirable and attractive localities in the State.

The part of Marlborough now included in the towns of Westborough and Northborough was called Chauncy until its incorporation in 1717, and the plan now in the archives of the State is inscribed,—

A Plot of ye Westerly part of Marlborough called Chaney, as bounded and set off by ye town of Marlborough to make a Precinct, In which is contained Fay's Farm, Caleb Rice's Farm and Coram Farm. Together with some land allowed to be added to ye westerly part of Marlborough by the Hon. Committee Appointed by ye Genl. Court in a Former Session to view and make report of ye said land unto ye sd Court The Complement of the whole is 16,182 acres.

About two-thirds of the present territory of Westborough was taken from Marlborough; so it will be necessary to trace briefly the history of the parent town.

In May, 1656, the following petition was sent from Sudbury to Boston:

*To the Hon. Governor, Dep. Governor, Magistrates and Deputies of the General Court now assembled in Boston:*

The humble petition of several of the inhabitants of Sudbury, whose names are hereunder written, humbly sheweth that whereas your petitioners have lived divers years in Sudbury, and God hath bene pleased to increase our children, which are now, divers of them, grown to man's estate, and wee, many of us, grown into years, so as that wee should bee glad to see them settled before the Lord take us away from hence, as also God having given us some considerable quantity of cattle, so that wee are so straightened that wee cannot so comfortably subsist as could bee desired; and some of us having taken some pains to view the country; we have found a place, which lyeth westward, about eight miles from Sudbury, which we conceive might be comfortable for our subsistence.

It is therefore the humble request of your Petitioners to this Hon'd Court that you would be pleased to grant unto us ( ) eight miles square, or so much land as may containe to eight miles square, for to make a plantation.

If it shall please this Hon'd Court to grant our petition, it is farther than the request of your petitioners to this Hon'd Court, that you will bee pleased to appoint Mr. Thomas Danforth or Lieutenant Fisher to lay out the bounds of the Plantation; and wee shall satisfy those whom this Hon'd Court shall please to employ in it. So, apprehending this weighty occasion, wee shall no farther trouble this Hon'd Court, but shall ever pray for your happiness.

Edmond Rice.	John Bent, Sen'r.
John How.	Edward Rice.
John Woods	Peter Bent.
Richard Newton.	William Ward.
Thomas Goodenow.	John Maynard.
Thomas King.	John Ruddocke.
	Henry Rice.

That this is a true copy of the original petition presented to the General Court May, 1656, left on file and thereto compared is

Attested: per EDWARD RAWSON, Sec'y.

May 14, 1656, the petition was granted.

In answer to the Petition of the aforesaid inhabitants of Sudbury, the court judgeth it meet to grant them a proportion of land six miles, or otherwise in some convenient form equivalent thereunto, at the discretion of the Committee, in the place desired; provided it hinder no former grant; that there be a town settled with twenty or more families within three years, so as an able ministry may bee there maintained.

And it is ordered that Mr. Edward Jackson, Capt. Eleazer Lusher, Ephraim Child, with Mr. Thomas Danforth or Lieutenant Fisher, shall bee and hereby are appointed a committee to lay out the bounds thereof, and make return to the next Court of Election, or else the grant to be void.

This is a true copy taken out of the Court's Books of Records, as  
Attests: EDWARD RAWSON, Sec'y.

It was not until May, 1667, that a plan of Marlborough was made by Samuel Andrews and approved by the deputies. It is now among the State archives.

The southerly boundary of Marlborough extended in a straight line from a point in the Sudbury River, at a stone bound one half mile west of Rocklawn Mills, and passing between Piccadilly and District No. 4 School-house to the hill on which was situated the birth-place of Eli Whitney, now the home of William H. Johnson, and from there in a straight line north-westerly, passing east of the old "Fay Farm," and east of Hockomocko Pond to Lancaster line. There were a few settlers in the part of Westborough now included in Northborough before there were any in the south part of the town.

John Brigham, the doctor, surveyor, commissioner of the General Court, land speculator, and the most enterprising man in town, obtained a grant of land in 1672 on "Licor Meadow Plain," and built a saw-mill on Howard Brook, near Northborough Village. About that time Cold Harbor Meadows, Middle Meadows and Chauncy Meadows were divided into thirty-four lots—probably the number of proprietors of Marlborough.

In 1675, when King Philip's Wars brought destruction and distress to so many English settlements, Marlborough was particularly exposed to attack. In October of that year eight garrison-houses were established, to which the two hundred or more settlers might flee in case of attack. Twenty-four soldiers were distributed among these fortified houses, none of which appear to have been within the present bounds of Westborough. To thirteen soldiers were assigned the duty of defending the ammunition and supplies for defence. Many of the first settlers of Westborough spent their early years at this exposed frontier post. Except upon the east, Marlborough was surrounded by the wilderness. They were in constant fear of the torch, the tomahawk and scalping-knife of the savages, who were making a united and desperate attempt to rid the land of the aggressive foreigners.

Little children, scarce able to go alone, were hidden under tubs and baskets, or in thickets in the woods, and kept as still as little partridges hiding from the hawk, while the war-whoops echoed from the oak rafters and the blood of their parents flowed in their defense.

Dr. Allen, in his "History of Northborough," published in 1826, gives this account of a raid on Marlborough :

A second attack was made upon the English settlement of Marlborough on the 20th of the following month (March, 1676), which, though no lives were lost, was attended with disastrous consequences. It was Lord's day, and the inhabitants were assembled for public worship, when the preacher, the Rev. Mr. Brimsmead, was interrupted in the midst of his discourse by the appalling cry that the Indians were advancing upon them. The assembly instantly dispersed, and, with a single exception, succeeded in reaching the neighboring garrison-house in safety before the enemy came up. But, though they defended themselves, they could afford no protection to their property, much of which was wasted or destroyed. Their meeting-house and many of their dwelling-houses were burned to the ground, their fruit-trees hacked and killed, their cattle killed or maimed, so that marks of their ravages were visible for many years.

The alarm occasioned by this attack, and the defenseless state to which the inhabitants were reduced, led them to retire from the place, and to seek shelter in a more populous neighborhood. Shortly after the close of the war, which lasted little more than a year, they returned to their farms, and were permitted for many years to cultivate them in peace.

For many years after the death of King Philip the people of Marlborough and vicinity enjoyed the blessings of peace. The Brighams, Rices, Howes and Fays and their numerous descendants cut the meadows on the river banks, planted the uplands with Indian corn, and made shingles from the cedar trees in the swamps. The land was gradually divided up among the different proprietors, and soon nearly all the territory covered by the four borough towns was in the possession of the English.

In 1680 the people in Marlborough, in town-meeting assembled, "Voted to raise thirteen men to go out to cill rattlesnakes—eight to Cold Harbourward, and so to the other place they call boston (now at the northwesterly corner of Westborough), and five to Stony Brookward to the places thereabout. John Brigham to call out seven with him to the first and Joseph Newton four with him to the latter, and they are to have four shillings apiece per day, paid out of the town's rates."

In 1683 the town paid bounties for the killing of twenty-three wolves.

During the French and Indian Wars occasionally incursions were made from Canada by hostile Indians as far as Marlborough and the present Westborough.

The scene of one such raid was, according to tradition, a few rods east of the residence of Christopher Whitney—the hill to the southeast being covered with woods during the memory of persons now living. The records show that Thomas Rice then owned the Whitney estate. The fullest account of this incident is given in Peter Whitney's "History of Worcester County," as follows :

Towards the close of the seventeenth century several families had here seated themselves; and, among others, Messrs. Thomas and Edmund Rice had their families, and were fixed down but a little west of where the present meeting-house (the "old Arcade") in Westborough stands.

On August 8, 1704, as several persons were busy in spreading flax on a plain about eighty rods from the house of Mr. Thomas Rice (the first settler in Westborough, and several years representative of the town of

Marlborough in the General Court), and a number of boys with them, seven, some say ten, Indians suddenly rushed down a woody hill near by, and knocking the least of the boys on the head (Nahor, about five years old, son of Mr. Edmund Rice, and the first person ever buried in Westborough), they seized two, Asher and Adonijah, sons of Mr. Thomas Rice, the oldest about ten and the other about eight years of age, and two others, Silas and Timothy, sons of Mr. Edmund Rice, above-named, of about nine and seven years of age, and carried them away to Canada. The persons who were spreading flax escaped safely to the house. Asher, in about four years, returned, being redeemed by his father. This was effected by the kind mediation of the Rev. Mr. Lydius, then minister of Albany. And here, by the way, it should be noted that when the old Indian sachem, Ountassago, the chief of the Cagnawagas, at the conference with Gov. Belcher at Deerfield, made a visit to Boston, he stopped awhile in Westborough; the before-mentioned Asher Rice saw and knew him to be one of the Indians who rushed down the hill, as above stated, when he was taken by them. This Mr. Asher Rice married, had a family, and was living but a few years past in Spencer. His brother, Adonijah, grew up in Canada, and married there, first a French, and afterwards a Dutch woman, and followed the business of husbandry on some land a little way off from Montreal, on the north side of the great river St. Lawrence, and had a good farm there, as we have been certified. The Indian name whereby he was called was Assaunangooton.

As to the other two, Silas and Timothy, they mixed with the Indians; lost their mother tongue, had Indian wives and children by them, and lived at Cagnawaga. The name by which Silas was distinguished among the Indians was Tookanowras.

Timothy, the youngest, however, was much the most noticeable person. The accounts received from thence have uniformly represented him as the third of the six chiefs of the Cagnawagas. This advancement was in consequence of the death of his foster-father or master, who had adopted him for a son, instead of a son which he, the former chief, had lost. However (said the Rev. Mr. Parkman, who has the best means of information), Timothy had much recommended himself to the Indians by his own superior talents, his penetration, courage, strength and warlike spirit, for which he was much celebrated, as was evident to me from conversation with the late Sachem Hendrick and Mr. Kellogg, when they were in the Massachusetts; and his name among them the same as we had ever heard, viz.: Oughtsorangoughton.

The venerable Mr. Parkman, in a manuscript account of these persons found among his papers since his death, adds, in respect to this Timothy, in these words: "He himself, in process of time, came to see us. By the interposition of Col. Lydius, and the captive Tarbell, who was carried away from Groton, a letter was sent me, bearing date July 23, 1740, certifying that if one of their brethren here would go up to Albany, and be there at a time specified, they would meet him there, and that one of them, at least, would come hither to visit their friends in New England. This proposal was readily complied with, and it succeeded.

"The chief abovesaid came, and the said Mr. Tarbell with him, as interpreter, and companion. They arrived here September 15th. They viewed the house where Mr. Rice dwelt, and the place from whence the children were captivated, of both which he retained a clear remembrance, as he did likewise of several elderly persons who were then living, though he had forgot our language. His Excellency, Gov. Belcher, sent for them, who accordingly waited on him in Boston. They also visited Tarbell's relation at Groton, then returned to us in their way back to Albany and Canada. Col. Lydius, when at Boston, not long since, said this Rice was the chief who made the speech to General Gage, which we had in our public prints, in behalf of the Cagnawagas, soon after the reduction of Montreal."

At the time of their capture the fate of little Nahor must have seemed preferable to that of the three boys, doomed to barbarism, as well as a life-long captivity. "Blood," however, "will tell," the hardy Puritan stock gained the ascendancy over an inferior race, and these Rice boys became the principal chiefs in the most influential "Indian nation" in Canada. When the war for independence was impending and the patriots in Boston were seeking for friends in the neighboring province of Canada, their old enemies,

the Indians, were the only allies they could secure. The French Canadian gentry offered their services in raising troops for King George. The English settlers were bound by commercial ties to England and refused to join in the struggle for independence.

In March, 1775, the British government were planning the overthrow of the rebels, who were arming all over New England, and especially the punishment of the town of Boston, the chief offender. Samuel Adams and Dr. Joseph Warren were in frequent communication with agents in Canada. Open war was liable to break out at any moment.

At this critical time a letter came from J. Brown, of Montreal, to Samuel Adams and Dr. Joseph Warren, of the Committee of Correspondence in Boston, showing that the Westboro' captives, like the patriarch of Old Testament history, not only prospered in the land of their captors, but, like Joseph, remembered their brethren.

The letter is dated March 29, 1775, and shows that these white chiefs were using their great influence to prevent the Indian tribes from resuming their old raids into New England. "The messengers sent to this tribe report that they were kindly received by the Cagnawaga Indians, which were the principal of all the Canadian six nations and western tribes of Indians, with whom they tarried several days.

"The Indians say they have been repeatedly applied to and requested to join with the King's troops to fight Boston, but have peremptorily refused and still intend to refuse.

"They say if they are obliged, for their own safety, to take up arms on either side, that they shall take part on the side of *their brethren, the English in New England*. All the chiefs of the Cagnawaga tribe being of English extraction, captivated in their infancy."

Their brother and sister were living in Northboro' in 1793, and then informed Rev. Peter Whitney that they had heard from their brothers Timothy and Silas as late as 1790, when the latter must have been over ninety years old.

As late as 1711 the danger of Indian excursions was so great that the one hundred and thirty-four families in Marlborough were assigned to twenty-six garrison-houses, of which but two were within the present limits of Westborough. These were the garrisons of Thomas Rice (with John Pratt and Charles Rice) and of Edmund Rice (with David Brigham, Isaac Tomblin and David Maynard.)

Before passing to the incorporation of Westborough the history of some of the outlying grants now included within the town limits will be given.

Governor Theophilus Eaton, of Connecticut, was one of the original patentees of the Massachusetts Bay Colony. He was a prominent merchant in England, agent of King James at the court of Denmark, and Governor of the New Haven Colony from 1639 till his death.

He landed at Boston in 1637 and founded the New

Haven Colony in 1638. The following is the inscription on his monument in New Haven:

"Eaton, so meek, so famed, so just,  
The Phoenix of our world here hides his dust,  
This name forget, New England never must."

He advanced fifty pounds for the use of the Massachusetts Colony, but failed to have a grant of land located during his lifetime.

June 11, 1680, this entry appears on the court records: "In answer to the petition of Capt. Lawrence Hamond on behalfe of Willjam Jones, Esq., the Court judgeth it meet to grant to the heirs of that worthy gent<sup>a</sup>, Theophilus Eaton, Esq., five hundred acres of land in any part of our jurisdiction, free from former grants and not prejudicing plantations."

May 16, 1683. In answer to Mr. Jones' motion in behalf of the children of Theophilus Eaton, deceased, y<sup>e</sup> five hundred acres is allowed and confirmed as laid out, provided that it exceed not fifty acres more than the five hundred granted them, and that the same be reduced to a square or rhomboys, and doe not prejudice any former grants."

October 10, 1683, the plan and survey made by John Haynes were confirmed to the heirs of Mr. Eaton, although the farm was laid out neither in the form of a square nor of an oblique parallelogram. In fact, the eight-sided polygon enclosed a space not yet named by the mathematicians, but famous in later years as Eaton's, and then as Fay's farm, although the Fays at no time owned the whole of it. When annexed to that part of Marlborough now Westborough it projected into what is now Shrewsbury so far, that the district included between the farm and Sutton was known as "The Shoe," and necessitated the annexation of the people and farms there located. It included, perhaps, the best farming-lands in School District No. 6—the greater portions of the farm now owned by J. P. Vinal, the two farms of M. and J. E. Henry, part of the Whitney farm now owned by Wm. H. Johnson, the whole of the farms of Geo. E. Ferguson, J. M. Kimball, James McTaggart, and parts of several other farms. It extended one mile on the old Marlborough line, northerly from the Eli Whitney Hill. From the corner of the wall, a few rods behind the house now occupying the site of the birth-place of the great inventor, the old Sutton north line can be followed with the eye about a half-mile, running southwesterly in line with the stone wall, separating the Whitney pasture from the pasture of Geo. E. Ferguson. It also includes some of the best and most extensive meadows along the upper "Elisabeth" River, which had been kept free from brush and trees by the annual fires of the aborigines.

How "Mr. Jones, of Connecticut," succeeded in getting this grant, which appropriated the best uplands and the most desirable lowlands of the region, and which projected for more than a mile into "country land," approved as a "square or rhom-

boyd," cannot now be ascertained. Possibly he put up at the best inn of the "town of boston" and gave a dinner to the Great and General Court.

In less than two years John Brigham, with his brother Thomas, and John and Samuel Fay, the children of his sister Mary, bought the Eaton farm, paying but twenty-five pounds for it. The two former each owned one-third, and divided the farm between them and their nephews by deed.

Within the memory of persons now living, the Fays owned a large part of the farms in this section of the town. James Fay, on the Vinal place; Benjamin Fay, perhaps the wealthiest man in town in his day, in the house opposite his son James; Antipas M. Fay, in his "mansion" (now the home-stand of the Henrys); J. B. Fay and John G. Fay, on the North Grafton Road; Otis Fay, on the S. B. Ferguson place; David Fay lived in the Goodell house. His extraordinary doings and eccentric sayings have served to entertain our older residents, his contemporaries and their descendants till the present day. After indulging somewhat freely in the "rum," then dispensed in country stores, he is said to have ridden into the house now standing, and made a complete circuit of the rooms around the large chimney.

On the map of "Chauncy," prepared for the use of the General Court in connection with the petition for the formation of the town of Westborough, no hill bears any name. Near the southwest boundary of the new town are the words—"Jack Straw's Hill at Sutton." At this time there were no white settlers at that place. In 1728 Jack Straw's Hill and other farms in that vicinity were annexed to Westborough. With the exception of the Sudbury River, this was the only geographical feature now in the town which bore any name on the map. One of the most striking peculiarities of this town is the number of rounded hills, of which the highest is Fay's Mountain, seven hundred feet in height. These hills have been for many years excellent pastures.

Most of them change their name to that of each successive owner—Fay's Mountain, Boston Hill and Jack Straw's Hill seem to be exceptions to the general rule.

Jack Straw's Hill is on the east side of Ruggles Street, about a quarter of a mile beyond the house of N. M. Knowlton. An old cellar on the summit of the hill, a few rods from the street, indicates the spot where, within the memory of our oldest inhabitants, stood a small deserted house. Through the valley on the east flows Jackstraw Brook, which has been considered as a possible water supply for the town.

The history of this spot, and of the famous Indian whose name it bears, indicates the reason why this hill, so inconspicuous among the larger elevations about it, has retained its name for more than two hundred years. Nearly a half-century before white people lived there, it named the country

around, so that a grant of three hundred acres of land was said to be "in a place called Jack Straw's Hill."

It bears the name of the first Christian Indian in the English Colonies, a man for several years in the service of Sir Walter Raleigh, and baptized by his order—one of the two Indians presented by that gallant explorer to the Virgin Queen Elizabeth, together with a large pearl, as illustrations of what the newly-named Virginia could produce.

Made king of a petty domain near Roanoke, N. C., "always faithful" as scout, interpreter and guide "as an Englishman," his Indian name, Manteo, is now borne by that county-seat of Dare County, N. C., and is situated on Roanoke Island. After the abandonment of the Roanoke Colony by the English, he appears to have left his home, and served as interpreter for traders and explorers along the coast as far as Maine. The other Indian, Wanchesi, who accompanied him on his voyage to England, returned to Roanoke, and within a year joined a party of hostiles, who killed one of the settlers, named "Master Howe."

The friendly Indians were desirous of gaining English names for themselves and their children, but they did not always understand their significance.

In 1623, "not long after the overthrow of the first plantation in the Bay, Capt. Lovit came to ye contry." At the time of his being at Pascataway (near Portsmouth, N. H.), he and Mr. Tomson, who were exploring and trading along the coast, engaged two Indians. A spectator, perhaps observing the responsible duties assigned them, said: "How can you trust these Salvages. Call the name of one Watt Tyler and y<sup>e</sup> other Jack Straw after y<sup>e</sup> names of the two greatest Rebels that ever were in England." So Jack Straw received his English name, not realizing, probably, that his namesake was one of the leaders in the socialistic rebellion in the fourteenth century, whose head was affixed to a pike in the city of London, so recently in his power.

The exact time when he located here is not known. About 1650 the apostle to the Indians, Eliot, had gathered the scattered Indians of this vicinity into the villages of Marlborough, Hopkinton and Grafton. This hill was not far from the earliest Indian trail which was the only highway from Connecticut to the Massachusetts Bay, and called the "Bay Path." Some traces of it are now visible.

In 1631 a company of Connecticut Indians traveled from near Hartford to Boston, to secure the aid of the English settlers against their powerful Indian enemies, and to secure a colony on their river. An historian says they secured the services of Jack Straw and Sagamore John, as the former Indian spoke English, and the latter lived between the Charles and Mystic Rivers.

The following is Governor Winthrop's account of their visit:—

April 4, 1631, Wahginnacut, a sagamore upon the river Quonehacut, which lies west of Narraganset, came to the governor at Boston, with John Sagamore & Jack Straw (an Indian, who had lived in England and had served Sir Walter Raleigh, and was now turned Indian again) and divers of their sannops and brought a letter to the governor from Mr. Endicott to this effect: That the said Wahginnacut was very desirous to have some Englishmen to come plant in his country and offered to find them corn, and give them yearly eighty skins of beaver, and that the country was very fruitful &c. and wished that there might be two men sent with him to see the country. The governor entertained them at dinner, but would send none with him. He discovered after that the said sagamore is a very treacherous man, and at war with the Pekoath (a far greater sagamore). His country is not above five days' journey from us by land.

They subsequently went to Plymouth, and, according to Governor Bradford's account, received a more favorable reception there. In 1676 three Indians with Jackstraw for a surname were living in Hopkinton, probably descendants of the Jack Straw whose home was near that plantation. Whether they were with Netus in his attack on the Eames family, and subsequently executed, is not now known. During King Philip's War that skillful and patriotic chief aroused so much race and national spirit among the red men, that quite a number of praying Indians from the vicinity joined the war against the whites.

Plan 191 in the State archives, with the memorandum attached, and the Court Records, give much information about this Jack Straw's Hill grant. The first white owners were the relict and children of "Capt. Richard Beers, who lost his life in the country's service, by the Indians, at Deerfield, in 1677." It was later owned by Thomas Rice, and known at times as Rice's Farm. The old name of Jack Straw is now applied only to the hill, pasture and brook, and is now used as one word, "Jackstraw."

This grant of three hundred acres was located at the southwest corner of Marlborough, including the present town reservoir, and District No. 5 Schoolhouse, and farms in that vicinity. "Jack Straw's Hill" is near the centre of the map, while the course of the two brooks near the present dam is shown. At this time there were on its banks meadows, "about eight acres in all." The rest was grown up to wood. Soon after the incorporation of the town Deacon Jonathan Forbes, who lived where the present almshouse now is, deeded the saw-mill to his son, Jonathan Forbes, Jr. In fact, nearly all the available mill-sites were utilized by the early settlers for corn-mills and saw-mills, and somewhat later at Piccadilly to furnish power, in a small way, for tool-making and other small manufacturing.

The Beers' heirs sold this three hundred-acre farm for fifteen pounds to Samuel How, of Sudbury, who sold it May 24, 1698, for twenty-two pounds to Thomas Rice, of Marlborough. The Eli Whitney place is in part taken from the Jack Straw grant and in part from the Eaton or Fay Farm.

In January and February, 1715-16, several farms in the westerly part of the town were surveyed by Wm. Ward and annexed to Chauncy Village, before it was incorporated under the name of Westborough.

In 1728 John Graves, Jonathan Forbush (Forbes), Simon Taynter, Samuel Livermore, James Fay, James Miller, James Bowman, John Fay, Bariah Rice, Daniel Hardy and Samuel Harrington, inhabitants of the town of Sutton, presented a petition to the General Court, saying that they lived ten miles from the church in their own town, and not over four miles from where they usually attended church (then in Wessonville), and asking that they and their farms might be annexed to the town of Westborough.

The court ordered that their prayer be granted, and their petitioners and their estates and other lands, as shown on the plan annexed to the petition, be annexed to Westborough, according to the lines set forth in said plan. This plan cannot now be found among the State archives: The residence of some of the petitioners is known. The first three lived near Sandra Reservoir and occupied part of the Jack Straw grant. The Harrington place has been recently sold by James O'Shaughnessy to J. B. Walker. The Miller place was on high land on the opposite side of Ruggles Street from Jack Straw Hill. The Hardy place is in District No. 6, and is now owned by Francis J. Adams. In fact, the greater part of District Nos. 5 and 6 were then annexed.

It was quite important to be near church in those days, not only for the convenience of the devout, but the most indifferent church-goers stood in awe of the fines imposed for absence from divine worship without sufficient cause.

In 1762 several farms in the southwest part of the town were annexed from Shrewsbury. William Nurse, Widow Sarah Smith, Daniel Nurse and the heirs of Reuben Maynard, deceased, also the lands of Benjamin Fay and Moses Nurse, of Westborough, lying in the "Shoe," in Shrewsbury, were added to this town. The large farm of B. A. Nourse, on the North Grafton Road, was then annexed. In their petition to "His Excellency, Francis Bernard, Esq., Captain-General and Governor-in-chief in and over his majesty's Province of the Massachusetts Bay of New England, and to the Hon. his Majesty's Council and House of Representatives in General Court, assembled in Boston," they describe themselves as "lying near unto and joyning upon the Town of Westborough, which Runeth almost around us, and where we always attend the Publick worship of God."

The prayer was granted, "provided that y<sup>e</sup> above s<sup>d</sup> petitioners be at y<sup>e</sup> cost and charge of Providing themselves a Road" (the present North Grafton road), "which they shall be contented with, from their Respective dwellings down into y<sup>e</sup> great Road, which leads from Westborough to Grafton, to come to meeting in, so that y<sup>e</sup> town of Westborough shall be at no cost or charge to provide s<sup>d</sup> petitioners any such Road."

In 1762 it was voted, on the petition of Elijah Rice, Roger Bruce and Barnabas Newton, "that they and their lands which are in Upton be annexed to y<sup>e</sup>

town of Westborough, there to do duty and enjoy Privilege."

In 1793 Elijah Whitney's farm was absorbed by the town from Shrewsbury.

After strenuous exertions, at different town-meetings, John Belknap, who then lived at Rocklawn, secured the following action, May 2, 1778: "Voted to choose a committee to meet with Southboro' and Marlborough, to settle the line between Framingham and Westborough, that Mr. John Belknap has been a contending about so long." It was not until 1835, and after the "Fiddleneck" of three hundred acres had been annexed to Southboro', that the sixteen acres claimed by Belknap were added to Westborough.

Marlborough was originally too large in area for the convenient transaction of town business when settled, and a coming division was considered and provided for as early as 1688. There was not so great a desire to have a large town area for public reasons, as to secure more uplands, swamps and meadows to clear up and divide among themselves and their numerous children. The Old World land-hunger was still felt by the children and grandchildren of the first settlers, who came to this vicinity principally from the middle classes in England. "Chauncy" was well known geographically, and as an independent element in Marlborough town-meetings, before it was separated from the parent town. Farms and country-land were constantly added, by the General Court, to the possessions of the proprietors and residents of Marlborough. The surveys made in those days were not very accurate. The General Court granted the Marlborough proprietors six miles square, and they induced the committee to include in their survey ten square miles more than that area, and their report was accepted.

John Brigham and thirty others from that town were endeavoring to secure all the land between Marlboro' and Lake Quinsigamond for a new town, and others were calling for large additions, on that side, to the old town, when the movement for the incorporation of Westboro' was carried to a successful issue.

The petition for the division of the town, in 1702, had failed, probably because of an insufficient population in the new town. Since then, John and Samuel Fay, Thomas Forbush, James Bradish, and a number of other enterprising men had erected houses in Chauncy, while Thomas Rice still remained honored and influential in the new town where he was the first settler.

November 18, 1717, the town of Westborough was incorporated, with a territory extending from Lancaster, on the north, to Sutton, on the south, and from Marlborough (then including the principal part of Southborough) and Hopkinton, on the east, to Shrewsbury (a town but sixteen days old), on the west. The area was sixteen thousand one hundred and eighty-two acres; the present area of Westborough varying from

eleven thousand five hundred to twelve thousand acres, according to the views of the different assessors who consider this question from year to year. It included more than two-thirds of the present towns of Westborough and Northborough.

The act of incorporation is as follows: "A plot of the Westerly Part of Marlborough, called Chauncy, prepared by the Committee appointed by the General Court to view and make Report of the said Land unto the said Court.

"In the House of Representatives, Nov. 15, Resolved, that the Tract of Land contained and described in this Platt be erected into a Township and called by the name of Westborough. The Inhabitants to have and enjoy all Powers, Privileges and Immunities whatsoever as other Towns have and do enjoy. And that the ungranted Lands lying within the same (containing about Three Thousand Acres) be granted to the said Inhabitants, They paying for the same as the Committee appointed by the Court, this Session, for setting the lands of the new Township" (Shrewsbury) "that is contiguous shall Order, And that out of the said Lands there be reserved a suitable and convenient Lott for the first settled minister, Which Lott the said Committee shall set out. Sent up for concurrence. Read and concurred. Consented to—SAM'L SHUTE."

According to Rev. Ebenezer Parkman, the first settled minister, "the first inhabitants of Westborough were Thomas Rice, Charles Rice, John Fay, Samuel Fay, Thomas Forbush, David Maynard, Edmund Rice, David Brigham, Capt. Joseph Byles, James Bradish, John Pratt, John Pratt, Jr., Thomas Newton, Josiah Newton, Hezekiah Howe, Daniel Warren, Increase Ward, Benjamin Townsend, Nathaniel Oaks, Samuel Goodnow, Gershom Fay, Simeon Howard, Adam Holloway, Thomas Ward and Joseph Wheeler."

Young men: "John Maynard, James Maynard, Aaron Forbush, Jacob Amsden, Ebenezer Beaman and Jotham Brigham."

It was now sixty years since John How built his cabin and settled in Marlborough, yet there were but twenty-five families and six unmarried men in the part now made a separate town.

As early as 1635 the General Court passed a law that "Hereafter noe dwelling howse shalbe builde above halfe a myle from the Meeting House in any newe plantacon without leave from the Court, except myll howses and ferme (farm) howses of such as have their dwelling howses in some towne." Although soon repealed, the reason for its passage existed many years later in the town of Marlborough. Ten years after the first settlement of the town an old plan shows the houses of the first settlers all within a short distance of the meeting-house. In 1717 the whole population of Marlborough probably exceeded one thousand, and of that number perhaps one hundred and sixty were living in the new town.

They promptly called a town-meeting and set in motion the municipal machinery. It is not known where the first town-meeting was held or who presided. Captain John Fay was clerk.

WESTBOROUGH, Jan. 15th, 1717-18.

Pursuant to an order given Mr. Justice fullum, the Town met, Being dated the 15th day of December, 1717, the s<sup>d</sup> Town meet and proceed forthwith; firstly to Build a meeting-house forthwith.

2ly. Voted the meeting-house to Be fourty foot long and thirty foot wide and eighteen foot Between Joints.

3ly. Voted to chouse a committee to proceed to getting timber as may Be necessary forthwith to Be provided.

4th. John Pratt, Sener, Thomas Newton and Daniel Warren waar chosen a Committee for the work a Bove sd. and to determine the wages for men whom they See meet to employ.

5ly. Voted to chuse Committee to wait on the Rev<sup>d</sup>. Mr. Elmer and to treat to continue to Be our minister and to proceed for his Comfortable subsistence as they shall see meet.

6ly. Isaac Tomblin, Thomas Newton, John Fay are chousen a Comete for the work of the fifth vote.

7ly. John fay was chosen Town Clark.

8ly. Thomas Rice, Sener, Chose the first Secelectman, John fay and Semeion Haywald, Sener, Chosen Secelectmen: lastly, Davied Manayald (David Maynard) Chosen Constable.

The early town records give glimpses, and only glimpses, of the life of the people. They built and seated the meeting-house and yearly discussed the question of "allowing the swin to goo at large," and of supplying the minister with fire-wood. Taxes were called "rates," and were assessed separately for raising the minister's salary, the care of the highways, the support of schools, etc. Constables were required to use every means, including imprisonment, to secure the collection of the "rates" entrusted to them for collection, but cases of special hardship received the favorable attention of the inhabitants in town-meeting. Votes like the following, passed in 1756, were very common: "8<sup>ly</sup> the Town Voted and Sunk the Rats that was assessed on Samuel Fay, Jr., for his Sun's Head, that is in the King's Service, which rate is in Dea<sup>n</sup> Jonathan Forbush's, Ju<sup>r</sup>, hand." They chose "dear Reeves" and "Hogg Reeves" and tythingmen. Public officials worked hard for small pay, and often received hard hits when called to account at the annual town-meeting. March 25, 1729, "James Bradish, Edward Baker and Thomas Forbush, Jun., were voted a committee to Call all those men to an account which have not given an account of their several Betrurstments into which they have been Chosen, and then voted that the Selectmen Take Care to provide a minister untill our Revend pastor is capable of Reeding." In 1730 it was "voted that the town will have Black Slaves for the Constables."

What a picture of hopeless misery is suggested by the votes providing for the "Neutral French family" in town!

In 1756 it was considered a military necessity to transport sixteen thousand simple, peaceful Acadians from their country to New England, and distribute them among the various towns. They were taken from the homes occupied by themselves and their ancestors for more than a century, and distributed

among those who hated their religion, their country and even their language.

October 24, 1757, the town granted "Sixteen Pounds, Lawful money, for the subsistence of the Old French Man and his wife, which is now in this Town . . . for Time past for their subsistence, and for the time to come, as far as it will go." The usual amount appropriated was five pounds a year. Separated from their friends and kindred, probably too old to learn the language of their captors, without the religious services and rites of the Catholic Church, to which they were devoted, a burden on their hard-working, and probably unsympathetic neighbors, it is not strange that they disappeared from the pauper list a few years later. The people of the town became more straitened for money, even voting at one town-meeting, in 1760, not to keep a lawful school, nor support the "Neutral French family," although a few months later they appropriated twenty-six pounds for the former purpose and three pounds for the latter. The "poor widders and ainchant men" were conveyed by the constables to the town bounds or warned out of town when it was thought they might become a public charge. The burdens of long wars with French and Indians, the hardships incident to frontier life and the bad financial condition of the Provinces caused the expense of keeping the poor to exceed at times the grants for schools.

It was more common then than now to "present" towns at court for failing to perform their municipal duties, and it is not strange that this town was arraigned in 1721 at "Concord Corte" for lack of a town pound, nor in 1753, because the law requiring every town of one hundred families to support a grammar school was not observed.

The town stocks were provided by one Pratt (who owned a saw-mill), and charged eight shillings for them. Men and women were whipped at their request by the constables for stealing and some of the lesser crimes, when too poor to pay fines, in preference to suffering imprisonment.

Including its original territory and later additions, Westborough was now more than eight miles long, with an average width of less than four miles. The meeting-house at Wessonville was situated about two miles south of the geographical centre, making it necessary for many people in the north part of the town to walk four or five miles to church. The prosperity of that section was retarded, and growing discontent was the result.

In spite of the opposition of Rev. Ebenezer Parkman, who did not wish to have his parish divided, the North Precinct (now Northborough) was set off in 1744. Town-meetings were to be held alternately in the two precincts, and each had full control of church and parish matters within its own limits. At this time there were eighty-seven families in the South Precinct and thirty-eight families in the North Precinct.

In 1766 the North Precinct was made a township,

and, except in the matter of representation in the General Court, became entirely separated from the parent town.

Four years after the formation of the two precincts the old church at Wessonville was demolished, and the new meeting-house, now known as the "Old Arcade," was erected near its present site.

The union of church and State still continued for many years, but the assessors' returns show a few dissenters belonging to other than Congregational Churches, and their estates were not required to share in paying the ministerial rates. The church was frequently called upon to try charges against its members of lying, slander, drunkenness and other offenses, which now would be considered more appropriate for a criminal court. The number of such cases, however, tried by both church and justices of the peace was exceedingly few, considering the tendency of the times to let no offence go unheard and unpunished.

In the early history of the town large areas of uncleared land could be obtained at low prices. The uplands were frequently sold for less than one dollar an acre, in hard money. The meadows, now considered of comparatively little value, were worth ten times as much per acre. These first settlers obtained large tracts of land, and as the boys became of age gave them farms to clear up and build upon. The records show that these pioneers in Westborough usually followed a somewhat similar career. They were nearly all large land-owners, whether professional men, mechanics, merchants, inn-holders or farmers proper. The men usually married, between the ages of twenty and twenty-five years, wives a little younger than themselves. As death separated them, the widows and widowers married again until they reached advanced years—frequently marrying within a few months of the death of the former consort.

As the boys grew up to man's estate all but one moved from the parental roof and built houses for themselves. The favorite son or, at times, son-in-law had an addition made to the old house and took a deed of an undivided half of the farm and certain rooms and privileges in the house, cider-mill and barns.

As the patriarch of the household advanced in years he gradually gave up active duties at a time when now men would be still considered in their prime, and deeded the rest of the farm to the son, who remained at home and gave a bond to support his father and mother so long as they lived. The father retained, however, for life, certain portions of the buildings, and perhaps a small piece of land for a garden. How far this custom prevailed elsewhere I am unable to say, but in nearly every case, where examination has been made in Westborough, such was found to be the early custom.

The schoolmaster usually taught from eight to twenty

weeks in the year and received from two to three times as much pay as the school-mistress. The person boarding the teacher received about one dollar a week and the female teacher from one dollar to one dollar and a half per week. The numerous doctors in town charged according to the amount of medicines furnished and travel occasioned by their visits. One shilling was generally the minimum fee. They usually succeeded in charging one shilling and six pence for "venesection" at some point in the case, as blood-letting was considered nearly indispensable when the patient was seriously ill. The justice of the peace, who made the deeds, received from one to two shillings, according to their length, and somewhat larger fees for services as magistrate in bringing persons to justice for petty offences. Uttering profane oaths and "cusses" appear to have been the most common offences punished by one of our earlier magistrates, although Sunday violations and assaults were not infrequent. A good horse-whipping was too serious an offence for his court, and the party was bound over to the higher tribunal.

**WESTBOROUGH IN THE REVOLUTION.**—The territory of Westborough fortunately escaped the ravages of war. The coast of New England for years was in constant danger of pillage and invasion. The people of Central Massachusetts, who had suffered most severely the hardships of the French and Indian Wars, were now spared the presence of British troops burning, sacking and destroying in their midst. Worcester County, however, responded promptly when the struggle for independence began. As early as October 28, 1765, "the freeholders and other inhabitants" held an indignation meeting over the passage of the Stamp Act. They declared that "the inhabitation of this Province have a legal clame to all the Natural Inherent rights of Englishmen, notwithstanding their Great Distance from grate Britton, and that the Stamp Act is an Infringement upon these Rights, therefore we cannot be active in puting our necks under Such a Grevios Yoke." They then proceeded to instruct their representative to labor for the repeal of the act and to suppress unlawful acts of violence.

In response to a communication from the selectmen of the town of Boston, the inhabitants of this town regularly assembled in town meeting this 2d of December, 1767, "voted to promote what in us lies, Industry, Occonomy and Manufactures among ourselves, and by these means prevent the unnecessary importation of European commodities, the eccessiveness of which threatens the country with poverty and Ruin."

Westborough was tenth in population of the towns of the county at the outbreak of war, being exceeded by Brookfield, Lancaster, Sutton, Mendon, Worcester, Hardwick, Shrewsbury, Boston, Lunenburg and Sturbridge, in the above order.

In the call for troops made January 19, 1776, West-

borough was to furnish seventeen men, Worcester thirty-two, and Brookfield forty-nine.

The people had been preparing for years to resist further oppression and misrule. Volunteers went to the front immediately after the fight at Lexington.

In November, 1774, these two votes appear on the town records: "Voted to pay those men the money which they advanced for the town to purchase a cannon, £7 17s. 6d."

"Voted and granted to provide powder and ball and a carriage for the cannon, £50."

Three years before the Concord fight they answered the letter sent by the Committee of Correspondence in Boston with these vigorous words: "We are of opinion that the rights of ye Colonists and of this Province in particular, as men and as subjects, are well stated in said list, as ye same are fully supported and warranted by ye laws of God and Nature, and ye Royal Charter of this province. Under ye present critical and alarming state of our publick affairs there is a loud call to every one to awake from Security, and in Earnest strive to secure his Liberty, lest he politically perish. . . . For no Doubt ware tyranny is Exercised, Opposition becomes a duty; as our fathers could, so can we plead our loyalty; we have been and now are ready to Spill our dearest blood in Defense of our King, Religion and Constitutional Laws; we cannot but look upon it as a hard trial, yea, greater than we can bear, if we cannot be said to give full proof of our Loyalty Otherwise than by sacrificing those Rights and Liberties which we prize beyond Life itself; therefore ye Inhabitants of this town do Declare to the world that they are far from being easy under ye many Infringements and Intolerable violations of these Rights and privileges." They proceed to instruct their representative in the General Court that he should "exert himself at all times with ye other members of sd Court in such measures as may have a tendency in ye obtaining a Redress of all such Greivences as are justly complained of, and the procuring to this Loyal people ye peaceful enjoyments of their just Rights."

At a meeting held December 30, 1774, relative to the impending troubles, the town was generally in accord with the recommendations and resolves of the American Continental Congress, held at Philadelphia, and the first two resolves of the Provincial Congress at Cambridge were adopted. It was voted not to grant money "to Incourage the Minit-Men to Train and Exercise themselves," and "the Question was put to See if the Town expected anything more of the Minit-men than they did of other men," and it passed in the negative.

The means taken to provide funds for the Provinces and assist in the rising movement to preserve their liberties show they were not wanting in patriotism, but expected every man to do his duty without special compensation.

Captain Stephen Maynard was chosen representa-

tive to the next Provincial Congress at Cambridge, and also, in July, 1775, to the Congress to be held in Watertown.

February 7, 1775, a Committee of Inspection and Observation, recommended by the Continental Congress, was appointed, consisting of twelve persons,—Jonathan Bond, Captain Benjamin Fay, Daniel Forbes, Phinehas Hardy, Ebenezer Maynard, Abijah Gale, Captain Jonas Brigham, Dr. James Hawes, Lieutenant Joseph Baker, Timothy Warren, George Andrews and Phineas Haskell. Funds were raised, and a committee was appointed to collect donations for the relief of the suffering poor of the city of Boston.

Dr. James Hawes, at this time, took a very prominent part in town affairs; he was also a justice of the peace, and wrote many deeds. At the annual March meeting the town elected James Bowman and Abraham Bond constables. This office, which included that of collecting taxes, was considered a very undesirable one. Many preferred to pay fines rather than serve. Some forty years previous it had been voted that "black slaves" should be eligible for that position. The town voted repeatedly to indemnify the constables from loss on account of illegal taxes, imposed to meet the expenses of the coming rebellion against British rule, and for paying funds collected into the provincial treasury.

It appears that Dr. Hawes was equal to the emergency and ready to perform the labors of both constables. The record says that Constables Bond and Bowman "agreed with and hired Dr. James Hawes to serve as constable in their room and sted, and he swore the Constable's oath."

Orders were given for the purchase of "Twelve Fier arms and Bayonets, Sixty Cateridge Boxes, Sixty hitchits," also "two good Drums for the minit Company." The old committee to buy the cannon was "to make it fit for use and our defences," and Lieutenant Joseph Baker was to "Inlist 7 suitable, able, active men to learn to use and exercise our cannon in a warlike manner." They were to be counted a part of the "minit company," and to have the same pay.

March 10, 1775, Dr. James Hawes was chosen to attend the Provincial Congress in place of Captain Stephen Maynard.

At the annual March meeting in 1776 no action was taken relative to the war, except to choose a new committee of "Correspondence, Inspection and Safety."

At a meeting of the inhabitants of the town of Westborough on "May y<sup>e</sup> 24, 1776, and being warned on purpose to Consider of a Resolve of the House of Representatives on May ye 10, 1776, concerning Independency, Voted to advise Capt. Stephen Maynard, our representative, to conform to said Resolve, in Case that the Honourable Congress Shall Judge it most Expedient for the Safety and wellfair of the Colones."

July 17, 1776, a committee appointed to confer with those "who had done a turn or part of a turn during the war since April 19, 1775," could not agree on the compensation they should receive from the town. The soldiers were represented by a committee of three of their number, viz.: Lieutenant James Godfrey, Lieutenant Thomas Bond and Mr. Nathan Fisher.

The town's committee recommended that those "who went on their own account to the war should receive £3 for eight months' service, and in proportion for two months." A bounty of nine pounds had been offered for new enlistments for the New York army a few days previously.

July 22, 1776, when the call for every twenty-fifth man for the "Northward Department or Canada Expedition" was urgent, the town-meeting was adjourned for a half-hour, to see "who would be willing to enlist" and what sum of money they would go for. At the end of this recess the bounty was raised to ten pounds.

An offer of three pounds was made July 26, 1776, for men to enlist and go to Dorchester and stay till December 1st.

The Declaration of Independence was recorded in the town-book as a "Perpetual Memorial thereof."

The enlistment and re-enlistment of troops was frequent, and the terms of service from two months to three years, or the war. In the spring of 1775 there were but two hundred and eighteen polls in town, and the enlistments in 1775 were 49; in 1776, 97; in 1778, 71; in 1779, 35; in 1780, 14; or 365 enlistments and re-enlistments in a town of about 900 inhabitants. A few remained in the army to the end of the war. While New England was specially threatened by the British in Boston, and by the attempt of General Burgoyne to separate it from the rest of the country by his expedition from the North, probably most of the able-bodied men were in the field. When the principal theatre of war changed to the south of the Hudson, and when ultimate success was insured by the surrender at Yorktown, most of the soldiers returned to their homes. The number of men in the field at one time is not known. The news from Concord found the minute-men ready. Capt. Stephen Maynard, was in command of the militia at the beginning of the war. He and Captain Benjamin Fay were the two richest men in town, and paid nearly double the tax of any other resident of Westboro'.

The minute-men marched by way of Lexington to a point near Boston, arriving the night after the Concord and Lexington fight. The wagons, loaded with one month's provisions, provided by the selectmen, probably arrived later. Whether the "field-piece" figured with the Westboro' men who fought at Bunker Hill does not appear.

Among the officers from this town were Lieutenant-Colonel Moses Wheelock, whose headstone is in Memorial Cemetery, near Main Street, Captain Seth Morse, Lieut. James Godfrey and Lieut. Henry Marble.

There was great difficulty in procuring clothing and other supplies for the army. Cloth was spun and woven by hand, and the women were obliged to do much of the farm-work in the absence of the men. There was a great lack of blankets. The town frequently made appropriation for the purchase of beef for the army.

May 19, 1777, the town first chose representatives to the Great and General Court of the new Commonwealth. Captain Stephen Maynard and Mr. Daniel Forbes were chosen, and instructed not to assent to forming a Constitution until there was a change in the form of representation. As early as the beginning of the year 1777 the depreciation of paper-money began to cause trouble, and, February 17th, the price of nearly every article in common use and of all kinds of labor was fixed by vote of the town.

The price of "good cyder in the fall of the year was 3 shillings fourpence per Bairl, and in the spring and summer 6s.

"For a meal of vitals of the best Quality, 1s. per meal; For their common vitals, 8d. per meal; For a Mug of Flip made of W. I. (West India) Rum, 10d. per Mug; and for New England Flip, 8d.; For logging a person a Night in a good Bed, 10d."

In June of the same year "Amasa Maynard was chosen to procure evidence against any person inimical to this State or any of the United States, and lay the same before the court." If Tories existed in town they kept very quiet, and do not appear to have been so active or outspoken as in many towns in the county.

As the winter came on steps were taken to provide for the families of those in the army.

Captain Levi Warren and others from this place shared in the fight at Bennington and the campaign against General Burgoyne in the summer of 1777, and received, in 1778, eight dollars for the first month and six dollars per month thereafter from the town treasury.

January 8, 1778, a committee was appointed on the "consideration" (Constitution) sent out by Congress, and made the following report: "We are of the opinion that the Protestant religion is not duly guarded in said Constitution. Also we think it might be well to acknowledge the Superintendence of Heaven in the Stile by adding these words,—'Under God,' after the words, 'Shall be.'"

The report was unanimously adopted and sent to the General Assembly of this State.

From 1775 to 1820 the growth of population was quite slow. The whole area of the town was divided into farms, and no industry was started to give employment to the young men. One thousand persons were considered all that the town could properly support, and the surplus population settled farther west and north.

The earliest settlers were nearly all of American birth, the children and grandchildren of English and,

in a few instances, Scotch parents. So few new families moved into town that the index of births, marriages and deaths in the town archives show *seventy-seven* references during the first hundred years of the town's history to persons whose surnames begin with "R," and all but *twelve* were named Rice. During the same period, out of eighty-nine names beginning with "F," all but seventeen were Fay, Forbes or Forbush. The names How, Hardy and Harrington were more than one-half of those beginning with "H."

There were a few "Smiths" during the first century of the town's history, but they were not named "John." Barzillai Smith, son of Ezekiel and Ruth, was born in 1767, and Merodachbaladan Smith married Abigail, and was blessed with three children, born about the middle of the last century.

Prior to the year 1767 the town paupers were boarded around, like the school-teachers, and the town, in meeting assembled, decided how much to pay for their support. They were frequently widows, left without children who could provide for them in their old age, and were taken by some of the most respectable and prominent people of the town to board. In that year a work-house was built on land of Timothy Warren. It was of wood, one story high, thirty feet long and sixteen feet wide, and cost the town £26 13s. 4d., or about \$100. Finding the cost of a separate establishment for the paupers greater than that of selling them to the lowest bidder, the work-house was sold in 1790 and no other provided until 1825, when the farm of Capt. Daniel Chamberlain was purchased. This farm remained the pleasant home of the town's poor until the purchase of the Sandra farm and town reservoir in 1882, when the poor-farm on the Flanders Road was sold. A new building was then erected and the old farm-house at the reservoir annexed and remodeled for the use of the pauper department, at an expense of \$6,000.

A few years after the town was incorporated a large number of roads were laid out. The main thoroughfare was the old Connecticut road over Rock Hill, in Northboro', passing east of Lake Chauncy and then bearing to the west and finally following the present location of Main Street for the greater part of the way from Westboro' to Grafton. It is usually referred to as the "Country Road." All land not granted by the State to towns or individuals was called "Country land," or the "Wilderness."

Roads were promptly laid out to the corn-mill and saw-mill of the Pratts on the Assabet, at the two dams, near the present dams, west of the village, owned by John Johnson and J. M. Brigham. The corn-mill was at the upper dam. Long Lane was then the Upton road, passing by N. M. Knowlton's house and Jack Straw's Hill. A road was laid out to the saw-mill of the first Jonathan Forbes, situated at the present main dam at the town reservoir, about 1730. Ebenezer Chamberlain had a mill at Rocklawn soon

after. The water privileges at Piccadilly and Parker's mill were utilized at an early date.

The crooked course of the roads is principally due to the effort made either to follow the "cart-way" to somebody's house or to lay one-half of the road on the land of each of two adjoining owners, and so follow the farm line. The width varied from two to four rods. Before the town was fifty years old an effort was made to diminish the width of the roads, and too often with success.

Westborough was left at one side by the main stage routes the first hundred years of her existence. The upper Boston road to "Hartford and Connecticut" went through Sudbury, Marlborough, Northborough, to Shrewsbury. The middle road to the same localities went through Holliston and Mendon. It was not until 1810, when the turnpike was built, that Westborough became on the direct line of travel.

Very early in its history we find references to various inns and taverns in town, some of them far from any other business, and apparently carried on simply for the convenience and comfort of the neighboring farmers, who dropped in, when passing, for a glass of cider and a cracker, and more willingly for a taste of New England rum or flip. A glass of flip cost a half-day's wages at the time of the Revolution, and was an extravagance in which every one indulged. Even the ladies, at their social teas, had flip and mulled wine. The tavern, too, was the political and social centre, taking the place of the numerous organizations, clubs and societies of the present day. It was little more than an ordinary dwelling-house, with a bar, and an occasional guest. Sometimes it was used as a court-house, when more convenient for the parties at law than the justice's house.

The house now standing near the corner of the turnpike and Lyman Street, the old Forbush Tavern, seems to have been the first one which in any sense was like our ideas of a tavern. This was already built when the turnpike was run so near it that it was almost at the door, and was immediately utilized as a place to change horses, rest and feed passengers, get and deliver the mails. About seventeen years after the opening of the road a new, larger house was built at Wessonville, which immediately sprung into great popularity. Wessonville seemed on the eve of again becoming the principal village of the town.

Not far from the site of the old church and parsonage a thread factory was erected, a store built, houses were put up, the post-office was established, and the stages, with their two, four or six horses and rumbling wheels, rushed up and down the steep hills. The usual number of passengers in one of these coaches was four, and the fare from Boston to Worcester over this route about this time was two dollars. This old Wessonville tavern is still standing, and is connected now with the Lyman School. Here, in

1825, Lafayette stopped on his way down from Worcester, and lunched in the dining-room, while forty of the men and boys of Westborough waited outside to catch another glance at the great celebrity.

Another famous tavern was the one kept by Joshua Mellen in Piccadilly, in the house now occupied by John B. Fitch. This as well as the Forbush Tavern was a great place for balls, and popular among the young people. In the centre of the town was the Gregory House, still standing, after having seen many changes, on South Street, and occupied for stores. This was afterwards famous as Brigham's Tavern, the last of the old-fashioned inns which Westborough was destined to know. It has been about sixty years since Mr. Dexter Brigham bought the Gregory House. At that time it stood near the present location of the Westboro' Hotel, facing South Street. Up-stairs was the hall—used for suppers and dances, and capable of being made into three rooms by the letting down of hinged wooden partitions usually fastened to the ceiling. In 1824 the hotel was very much enlarged—the new part now forming much of the present Westborough Hotel, while the old part was moved to its present location. Part of its large number of guests it owed to the popularity of Hopkinton Springs as a summer resort—the visitors there usually stopping in Westborough, and sometimes, finding pleasant quarters and plenty of the water from the famous springs for their use in the hotel, decided to go no further, and spent their summer at Brigham's. Mrs. Brigham still living in town, was one of the famous cooks of her day, her mulled wine, mince pies and election cake being known all over this part of the country.

The question what part of Westborough should be the business centre was finally settled in 1834, when the railroad was opened. Piccadilly, Wessonville, District No. 6 were left to be country districts, not even villages. The stores, shops, factories, churches clustered around the new railroad station. The Westborough Hotel for many years was the hotel of the place, until in 1880 the Whitney House was built on land adjoining the Memorial Cemetery, and opened to the public. New doctors coming to town no longer, as did Doctor Hawes in 1763, locate near Lyman Street to be near the post-office at Forbush Tavern, but all settled within three minutes' walk from the station. The glory of the turnpike had departed.

In a report concerning the Indians of the Commonwealth, made by act of Legislature in 1859, it is stated that there were at that time one thousand six hundred and ten descendants of the Indians in the State. Ninety of these belonged to the Hassanamisco tribe, and only two, both girls, were located in Westborough. These two were descendants of old Andrew Brown, an Indian of pure blood, who served in the Revolution, and lived in a small cellarless hut, not far from the Insane Hospital. He is remembered by many of the older inhabitants of this town, and the renown of his daughter, Deb, who often

used to travel with the famous Sarah Boston, reached to all the neighboring towns.

Among the Indians living here at the beginning of the century was Jo. Aaron, who seemed to have been a leader among the Hassanamiscos, and old Gigger, who lived first in a curious hut in a swamp, beyond B. A. Nourse's present farm. This hut was built of stones, sloped to a narrow space at the top, with a hole for a chimney and a front door of wood and glass. The stones were covered with sods, and Gigger, with the two women, Betsey and Sallie Gigger, lived warm and comfortable in the coldest weather. They were part negro, and, like all the Indians, remembered by persons now living, drank often and heavily. Gigger afterwards lived in a wigwam on the Mill Road. All the Hassanamisco Indians were in the habit of coming to Westborough Swamps for material for their baskets, and as far back as the first years of Mr. Parkman's pastorate they came over to work for people here, as is shown by the entry for July 18, 1726, in his journal, where he says: "Martha Bowman, Indian, came 2 o'clock, and this morn Joshua Misco and his squa hoed my corn." They stayed three days with him, then "went away."

Probably many of these Indians, like Sarah Boston, were descended from slaves—colored men, who, by marrying a free Indian woman, insured the freedom of their children.

The earliest slave of whom we have any record is the one bought by Mr. Parkman, four years after his settlement here, named Maro. He paid £74, "which was the price of him," to his father, in Boston, then started for Westborough on horseback, Maro running on foot. A little more than a year afterwards he speaks in his journal of his various afflictions, and adds: "But especially Maro at point of death," and the next day he writes: "Dark as it has been with us, it became much darker about the sun setting. The Sun of MARO's life Sat."

In a census of slaves, taken in 1754, Westborough is reported as having six owned within its limits. One was owned by Mr. James Bowman, and three—a man, his wife and daughter—by Capt. Stephen Maynard, who were afterwards sold to go South. Capt. Maynard lived in the fine old house on the Northborough Road, now occupied by B. J. Stone. The heavy wall leading up to the house was built by one of these slaves.

A familiar sight on the streets in the beginning of the century were old colored people, who had been slaves here or in other towns, among them one once owned by Sir Harry Frankland, at his mansion in Hopkinton (now Ashland)—old Dinah. She is remembered as a short, stout old woman, carrying a cane, and in the season a bunch of wild flowers; but the greatest impression on the children was made by the three long straight marks on her face, where she was branded at the time of her capture in Africa.

WESTBOROUGH IN THE GREAT REBELLION.—At

the commencement of the War of the Rebellion, in 1861, there were six hundred and thirty-four polls in town, of whom about two-thirds were fit for duty. The population increased somewhat during the war, but the number of men furnished under the different calls for troops usually exceeded the quota for this town.

Three hundred and thirty men entered the army and eleven the navy. Twenty-four fell in battle or died from army exposure, and forty were wounded. Six died in Southern prisons.

A few days after the capture of Fort Sumter a town-meeting was held, "To see if the town will grant or appropriate any money towards raising a military company in this town."

Following the precedents of the Revolution, the citizens proceeded to raise five thousand dollars for the purchase of uniforms, swords and other military supplies, and the pay of soldiers. Although the action of the town was illegal, there was no objector present, and the resolutions of a committee recommending this course were unanimously adopted. The Westborough Rifle Company was at once formed and equipped, forty-five men being taken from adjoining towns.

One hundred and one men joined the company, which was supported two months principally at the expense of this town, and then joined the Thirteenth Regiment July 16, 1861. Their families were at once aided, when necessary, out of the town treasury. The ladies worked on uniforms and articles needed by the soldiers. In April, 1861, they organized the Soldiers' Sewing Circle, for the purpose of aiding the Sanitary Commission and in other ways assisting those in the field.

It was estimated that articles to the value of twenty-five dollars each, yearly, while the war lasted, were sent to the soldiers by their home friends.

When it was thought best to offer bounties for enlistments, in 1862, Abijah Wood, J. A. Fayerweather, A. J. Burnap and Zebina Gleason loaned the town ten thousand dollars, as the money could not be legally raised by the town for that purpose. A large number of the citizens who had property gave them a bond indemnifying them in case the town was not allowed to refund this money.

February 1, 1862, there were forty-four Westborough men in the Thirteenth Regiment, eight in the Twenty-second Regimental Band, and fourteen in other branches of the service—sixty-four in all. The calls for additional troops were frequent and were promptly responded to.

One year later Westboro' had furnished twenty-four more than its proportion. One hundred and one new enlistments had been made. Of this number twenty-two joined the Thirty-fourth, thirteen the Fiftieth, and twenty-six the Fifty-first Regiment.

Rev. Gilbert Cummings, Jr., pastor of the Unitarian Society, was elected chaplain of the Fifty-first

Regiment. War began to seem a serious matter as the wounded came home from the front. Thomas Copeland and Hollis H. Fairbanks fell at Centreville, in August, 1862, and four were wounded and one taken prisoner. By February 1, 1863, six had died and thirty-two had been discharged on account of wounds or disease. In July, 1863, of sixty-six men drafted, thirty were accepted. In the following month of October, thirty-two more men were called for and promptly enlisted without any pecuniary inducement from the town. They were generally quite young. Frank W. Bullard enlisted when sixteen years old; left Worcester April 18, 1864, was wounded and captured in the battle of the Wilderness eighteen days later, and had a leg amputated when in the hands of the enemy.

In May, 1864, the company of State militia under the command of Captain C. P. Winslow was called out and was soon after ordered to the defense of Washington. Sixty-two men from Westborough enlisted in this company and formed part of Company E, Fourth Regiment Heavy Artillery.

In December, 1864, this town had furnished a surplus of thirty-five men, and the call of that month was answered by the enlistment of thirteen more men.

Three hundred and thirty-seven men from Westborough served in the war, including four who served both in the army and navy. Of this number twenty-five died during the war. Fourteen were killed on the field of battle, eight died in rebel prisons and three others from disease. The bodies of but five were brought home, although the town made arrangements to bring home the remains of those falling in the army, when it was possible to do so. Sixty-two were wounded, some of them several times. Disease in times of war is said to kill more than the bullet; but in this case the contrary proved true. Of the twenty-five captured by the enemy, ten were confined for a considerable period of time at Andersonville or other Southern prisons, and of these all but two died while prisoners.

The following is a list of those who gave up their lives for their country during the war.

<i>Killed.</i>	<i>Died in Prison.</i>
H. W. Bond.	Minot C. Adams.
Wm. H. Blake.	Wm. H. Blake.
Thomas Copeland.	Charles S. Carter.
James Doherty.	George S. Chickering.
Timothy Driscoll.	John Copeland.
H. H. Fairbanks.	Francis E. Kemp.
John Flye.	Herbert O. Smith.
W. H. H. Greenwood.	Irving E. Walker.
Francis Hanley.	
John A. Hart.	<i>Died from Disease.</i>
Abner W. Haskell.	John S. Burnap.
J. W. Marsh.	Wm. Denny.
Daniel B. Miller.	George C. Haradan.
James H. Sullivan.	Wm. C. Loker.

At the first March meeting after the close of the war the town voted "to erect a monument in memory of our soldiers who have fallen during the late war,

to be placed in the Cemetery opposite the Town Hall."

It was dedicated three years later, in the spring of 1869.

**CHURCH AND PARISH HISTORY.**—The Marlborough proprietors, in 1710, had set out a minister's lot for the little village of Chauncy. This lot consisted of "40 acres of upland and swamp west of Chauncy Pond" and "10 acres at the west end of great Middle Meadow near Horbomoka Pond." After the incorporation of the town, one of their first acts was to appoint a committee, who, with the committee of the General Court, were "to sett out the Minister's Lott," and who approved of the one already granted.

In October, 1718, the meeting-house was raised with the usual ceremonies of the time. The town furnished to its guests that day "Six Gallons Rhum and a Barrall and a half of Syder." Three months before this date they had a fast, "in which to settle a minister," as Sewall records in his diary, and which he probably attended. If any minister was settled at that early date, it must have been Mr. Elmer, of whom Mr. Parkman writes:

Mr. Daniel Elmer, a candidate for the ministry from Connecticut River, preached here several years, and received a call from the people; but there arose dissension, and though he built upon the farm which was given for the first settled minister, and dwelt upon it, yet, by the advice of an ecclesiastical council, he desisted from preaching here, and a quit-claim being given him of the farm, he sold it, and with his family removed to Springfield in 1724. He was afterwards settled in the ministry at Cohansy, in the Jerseys, and, I suppose, died there.

Possibly the new church had their religious services in his house, near the place where the meeting-house was slowly going up. Certainly they found somewhere comfortable quarters, for they seem to have taken their own time in finishing the homely little structure, which now would be "raised" and "compleated" in a few weeks. After a great many votes on the subject, they finally, in 1723 (five years after the raising),

*Resolved*, By a voat, that the Town will proceed to complete the finishing of the meeting-house forthwith.

When completed, it was a bare wooden building, "fourty foot long, and thirty foot wid and eighteen foot between Joists." There were two doors—one at the west, the other at the east end. A double row of benches was placed in the middle of the house, leaving a passage-way between them, which separated the men from the women. All around the house, next to the walls, were the "pew-spots," which the more wealthy members bought and built their own pews. That there was no excessive demand for these pew-spots is shown by the fact that in 1730–31 (seven years after the church had been first occupied) several young men were granted "the Roume in the Long Gallery Behind the Seats to Buld them a pew." This building was near Wessonville, "upon the northeast corner of John Maynard's lot," on an acre of land which he and Edmund Rice presented to the town. This was the only meeting-house for what is now Westborough and Northborough.

After the building was finished, Mr. Elmer, the pastor then preaching, was asked "to setell with them," and, on his decision to leave, the town decided to hear Rev. Ebenezer Parkman, of Boston, and sent Mr. Shattuck to him with a horse for Mr. Parkman's use in coming to Westborough. He spent a little more than a week here, as we learn from his diary, preaching two Sundays, visiting the sick, going hunting for fawns and turkeys and returning with nothing but pigs, and once in the week at least walking to the meeting-house with a pistol in his hand, and receiving a severe fright at seeing a supposed Indian, who, on second sight, proved to be his worthy landlord. A little more than a month afterwards he returned to Westborough, and solemnly dedicated himself to a life-work among its people. He lived in a house very near the church. This house was standing within the memory of many now living, and was the childhood's home of our librarian, Miss Jane S. Beeton. She remembers it as a large, roomy house, with a hall about fourteen feet wide, and stairs mounting by easy stages and broad landings to the second story, where Mr. Parkman, in one of the back chambers, had his study. The inside finish of the house was of English oak, handsomely carved in the old country. The wall-paper, too, was imported, stiff and thick, in dark colors. The house at the entrance of the Lyman School grounds was built on the cellar of the old parsonage, and many of the old timbers were used in it.

When the new church was built in the present village, Mr. Parkman bought several tracts of land in the vicinity, and built a new residence near the present site of the Dr. William Curtis house. After Mr. Parkman's death it was the home of Hon. Elijah Brigham. Dr. Curtis moved the parsonage to its present location on High Street, just west of the school-house. Mr. Parkman did not wish to have his former home in Wessonville pass into the hands of a mechanic, and refused to sell his seventy-acre farm and buildings to a blacksmith who wished to purchase it. The records of the Registry of Deeds show, however, that Captain Stephen Maynard bought it for £333 4s. 8d., and then sold it to the village blacksmith, John Beeton, for the same price, to the chagrin of the former owner.

His salary was to be £80 a year, with a settlement of £150. He was then twenty-one years of age, a graduate of Harvard and a descendant of distinguished ancestors. He had been married a few weeks to Mary Champney, of Boston. The rest of his long life of eighty years was all spent here; here his sixteen children were born, and here his descendants are now living. His grave is in the Memorial Cemetery, marked by a large horizontal slab of slate, resting on brick foundation walls. It bears this testimony to his character: "He was formed by nature and education to be an able minister of the New Testament, and obtained grace to be pre-eminently

faithful in the work of the Lord. He was a firm friend to the faith, order and constitution of the New England churches. He was a learned, good, pious man, and full of the Holy Ghost and faith unfeigned, and answered St. Paul's description of a Scripture bishop, being blameless, vigilant, sober, of good behaviour, given to hospitality, apt to teach."

The church at Wessonville was used until 1748. Jonathan Edwards twice preached from its pulpit. The relinquishment of the church building was finally brought about by the division of the town into two precincts, when a new church was organized in the North Precinct (now Northborough), and a new building commenced in Westborough, nearer to what was then the centre of the town. This new building is still standing,—the "Old Arcade," and is occupied for stores. For ninety years it was not only meeting-house, but town-hall as well.

This church, like its predecessor, was plain. The pews were of oak, with simple carving, as were the balustrades leading to the galleries. Part of the material was taken from the church at Wessonville. It was a plain, square building, afterwards, in 1773, enlarged by the addition of fifteen feet in the middle, and three porches. The men and women were separated by a "petition," which in 1770 they proposed to remove "to ye east end of yt of ye women's seats." At the same time they voted "ye woman's front gallery for ye men to set in, except ye Frunt pew," indicating thereby that more men attended church than women a hundred years ago. They instructed a committee in 1767 in regard to seating the meeting-house as follows: "In the first place to set the for'd seat altogether by age; then, secondly, to seat by age and pay." The three deacons sat together, fronting the audience, in the pew just below the pulpit.

The steeple and belfry were added in 1801, when Mr. Samuel Parkman, of Boston, a son of the first minister, presented the church with a bell. This was cast by the famous Paul Revere, and is now in the Baptist belfry. From 1806 to 1842 the old building was adorned with a clock, which is now on the Town Hall. In 1809 Mr. Gardner Parker, who has given his name to the most park-like bit of landscape in the immediate vicinity of the village, "Parker's Folly," obtained permission to put an organ into the church. This was one of the earliest in use in New England. Only four years before this the deacons were still "lining out" the hymns.

During the early years of the Revolutionary War there were articles from time to time relative to increasing Mr. Parkman's compensation. He had then occupied the pulpit for more than forty years. They were generally passed in the negative. One petition is recorded at length as follows:

WESTBORO', Dec. ye 2, 1776.

To the town at their meeting by adjournment to-day:

GENTLEMEN,—This is to manifest my very hearty sympathy with you

in the common Distresses & grievous Burdens of the present Dark Day that I have fully performed, according to my utmost ability, all such duty as has been requested of me, in my office, agreeable to my Age & Circumstances; so that I have not knowingly given any offence to any person; and I am still ready to do and to bear, as God shall assist me, whatever may be in any Reason desired of me. I rely upon your Justice and honor to afford me subsistence in your service, as in all equity to be expected. But, my Brethren, the Article of *getting my Wood* is utterly beyond my Power, and you was Sensible of this from the beginning, and you gave me Reason to depend on you for it. It is plain I must unavoidably suffer unless you will shew me so much compassion as to help me. I don't insist at all upon the manner of doing it, so it be but just and equal & answer the End. Whatever you do about other things, There is Necessity of gitting the Wood or your own selves and Family's will suffer Loss.

I am your Affect's,

E. PARKMAN.

Read to the town and passed in the negative.

In 1777 Mr. Parkman's salary was increased on account of the depreciation of money, and they voted to give him thirty-five cords of wood. Each man could pay his share in wood delivered at Mr. Parkman's "Dore," or in money at the rate of £1 4s. per cord.

After Mr. Parkman's death, in 1782, the church for six years was without a pastor, but January 14, 1789, Mr. John Robinson was ordained. He was dismissed in 1807, after having made much trouble among his flock. He was succeeded by Mr. Elisha Rockwood, D.D., who was the last town minister.

In 1825 the first society was formed, and the minister ceased to receive his salary from the town. About 1830 the society was divided by a difference of belief, and four years later the church and society separated. The church, with a new society, left the old building in the possession of the old society and built themselves a new place of worship, still in use, on the corner of Main and Church Streets. This church since that date has been called the Evangelical Church. Its pastors have been, since Mr. Rockwood's dismissal in 1835, as follows: Barnabas Phinney, 1836-37; Charles B. Kittredge, 1837-45; Henry N. Beers, 1847-49; Daniel R. Cady, 1849-56; Luther H. Sheldon, 1856-67; Artemas Dean, 1867-69; Heman P. De Forest, 1871-80; Frederick A. Thayer, 1880-82; William Mitchell, 1883-84; Walcott Fay, 1888—.

The old society—the first Congregational Society—installed a Unitarian minister, Rev. Hosea Hildreth, in October, 1834. He remained with them until April, and with the close of his pastorate the Arcade ceased to be used as a church. It was stripped of its steeple and porches—each of the latter being made into a small house—one on Heath Street, the residence of D. W. Arnold, another on Boardman Street, the residence of Mrs. Martha Wilson, while the third was removed by Mr. Gardner Parker, when the steeple was erected, to the land just back of his house, on Main Street, now occupied by Miss Witherby, and used by him as a shop in which to manufacture clocks. It was the hope of obtaining a water-supply sufficient for this work that induced him to build the dam at Parker's Folly, which proved so expensive and useless an undertaking. The railroad which was built at that

time rendered the location undesirable, and the Unitarian Society, in 1849, dedicated their present house of worship. In the mean time they met with the Baptist Society. The ministers of this society have been: Hosea Hildreth, 1834-45; William O. Mosely, 1850; Nathaniel Gage, 1851-57; H. A. Cook, 1858; Benjamin Huntoon, 1859; Gilbert Cummings, 1860-63; George N. Richardson, 1864-68; W. G. Todd, 1869-70; J. L. Hatch, 1871; C. A. Allen, 1872-75; C. W. Emerson, 1875-76; Granville Pierce, 1877; J. P. Forbes, 1878-82; E. C. Abbott, 1884-86; E. A. Coil, 1888—.

In 1796 two men were baptized by immersion in Chauncy Pond, and a few Baptists from that time held meetings together. One of the most influential men having these sentiments was Dr. James Hawes, who had been a deacon in the Evangelical Church from 1780 till his resignation in 1813. His son, James Hawes, Jr., was largely instrumental in having a Baptist Society, and it was in his parlor, in the east end of his father's house, now standing on East Main Street, that the new society was organized and the new church held its first communion. After this they met in the unfinished upper story of Mr. John Bee-man's house, on the Flanders Road. Dr. Hawes gave them a tract of land adjoining his house, where the green-house of F. Lundberg now stands, on the condition of their using it to build a church upon. The little church, now in Woodville, was the first Baptist Church built here. When the church was moved, and the new one built in 1835, on the site of the present one, this land reverted to Dr. Hawes' heirs. The present church was erected in 1868.

The pastors have been: Thomas Conant, 1814-16; William Bowen, 1831-33; Alonzo King, 1835; Otis Converse, 1836-38; Adiel Harvey, 1839-45; Silas Bailey, 1845-47; William L. Brown, 1847-51; Nathaniel Hervey, 1851-53; William H. Walker, 1855-58; A. U. Arnold, 1858-64; J. A. Goodhue, 1864-67; C. W. Flanders, 1868-70; S. H. Stackpole, 1871-73; B. A. Greene, 1875-82; J. H. Parshley, 1883-84; N. Newton Glazier supplied the pulpit from 1884-86; George F. Babbitt, 1886.

The present membership of the church is two hundred and ninety.

The first independent Methodist Church in this town was established in 1858. For fourteen years previous it had existed as a branch of either the church in Holliston or that of Hopkinton. The first meetings after the organization of the society were held in the lower story of the high school house. In 1864 the present building on Milk Street was erected. In 1885 the parsonage on Church Street was built. The membership of the church is one hundred and eighty-five. The pastors have been: J. E. Cromack, 1858-59; W. P. Blackmer, 1860-61; S. B. Sweetser, 1862-63; J. B. Bigelow, 1864-65; W. M. Hubbard, 1866-67; W. A. Nottage, 1868-69; B. Giel, 1870-71; B. Judd, 1872-74; J. S. Day, 1875; Z. A. Mudge,

1876-78; J. H. Emerson, 1879-81; E. A. Howard, 1881-84; John R. Cushing, 1884-87; A. W. Tirrill, 1887.

About 1850 the Roman Catholic Church—St. Luke's—was formed; but it was not until twenty years after that it had resident priests, clergymen from other towns holding services here in the mean time. In 1868 it purchased the old Baptist Church and moved it to Milk Street. This building was destroyed by fire in 1886. Since then they have built a new church on the corner of Main and Ruggles Streets. The Catholic population of Westborough is one thousand five hundred. The pastors have been: R. J. Donavan, 1870-73; P. Egan, 1873-78; C. J. Cronin, 1878-82; R. S. J. Burke, 1882-87; J. J. McCoy, 1887. For eight years the priests had an assistant, M. H. Kittredge and P. E. Purcell filling that office. At present there is no assistant.

There is a small Advent Society in town, organized in 1859. They occupy a chapel on Church Street.

The first burial in town was that of Nahor Rice, the four-year old boy who was killed by the Indians at the time of the raid of 1704. He was buried in what is now called Memorial Cemetery, opposite the Town Hall. This was used for more than a hundred years, being set apart for that purpose by the proprietors of Marlborough. A powder-house at one time stood upon it; also the first school-house for District No. 1. The boundaries have been changed and the lot enlarged. Here many of the men most instrumental in forming the history of Westborough are buried. Here is the Soldiers' Monument and the cenotaph to Eli Whitney.

Part of the time this was in use, and before the division of the town there was another cemetery half-way between Westborough and Northborough, near the Northborough road, on the first road to the right after crossing the river. This is now overgrown with trees; a cart-path leading into the woods on the left, if followed a few rods, brings us to the few graves still marked by slate-stones, engraved with curious conventionalized cherubs, and the names of Holloway and Wheeler. There are five graves now plainly marked with headstones, and footstones, and the name is always inscribed on each.

In 1810 a new burying-ground was bought between School and South Streets, which is known as the Midland Cemetery. This lot was small, and in 1844 the land was purchased on South Street for the Pine Grove Cemetery.

The Roman Catholic cemetery—the St. Luke's—is on the same street, a little more than a mile from the town. This was first used in 1871. These two last-mentioned cemeteries, within the last year, have been improved by handsome gates at their entrances, both the gift of the late Dr. William Curtis.

There was no hearse in town until 1801, when the town paid twenty-five dollars for one. They

built a house for it at an expense of fifty dollars ; paid thirteen dollars for harness and two dollars for having the hearse painted. Thirty years before this they had voted to buy two "burying-cloths," which were to cost two pounds apiece. The coffins were made by the village carpenter, varying in price from \$1.25, for a child, to \$3.50, for a man. Among the papers in the town vault is an order from the selectmen of 1783 to the town treasurer to pay to Paul Lawson "thirty-three shillings, which sum is in full for his making a coffin for the Rev'd Ebenezer Parkman and one for Samuel Jones."

EDUCATION.—As early as 1708 the population of Marlborough had become so scattered that the new teacher, Abraham Coffin, was required to keep school in different parts of the town. "He was to teach all children, male and female, and such others of most growth to read and write and cast accounts." He received twenty-four pounds for teaching the first year. The school was moved to different places outside the central village, including Stony Brook (Southborough) and Chauncy.

Amid the hurry and dangers of frontier life the education of children had at times been neglected, and we find numerous instances of persons of both sexes "making their mark" when signing deeds and wills.

A town was not required to maintain a public school "until the Lord hath increased them to fifty householders," but it is not to be supposed that during the first nine years of its history the children were generally left to grow up in ignorance. The boys and girls doubtless learned at the fireside from parents and older brothers and sisters the rudiments of education—reading, writing and a little arithmetic. Spelling was not regarded of much importance, a-early records and documents clearly indicate.

The history of the Westborough public schools begins nine years after the incorporation of the town. October 3, 1726, the town voted to have a school for the next six months. A committee of two was appointed "to provide a Sewtable Schoolmaster for y<sup>e</sup> Town, to teach children to read, write and Sipher, and to provide entertainment for s<sup>d</sup> schoolmaster Dewring the s<sup>d</sup> six months, and all so to provide a place or places for the school to be kept in." Occasionally a man entered "his decent against paying to ye school," but generally the appropriation was cheerfully voted. They gave Mr. Joshua Townsend at first eighteen pounds, he "paying for his diet." He was "fetch'd" from Brookfield for the sum of ten shillings. Mr. Townsend continued for more than twelve years the town schoolmaster. He boarded a few months at a time in different families, usually the best families in the district where he was then teaching, and the town voted to pay his board bill.

In 1753 they chose a committee "to make answer at the next February Courte to a presentment now lying against this town for not having a lawfull

school," there being more than a hundred families in town and no grammar school.

In 1765 a committee was appointed for "squadddering out the schools in this town," whose report, "after sum Debate," was accepted. A few years later the town was again divided into school districts.

The following table, compiled from the "Selectmen's Book" of 1793, shows the number of families in town and their distribution :

The districts, with the exception of No. 9, were in the parts of the town now known by those numbers, although the district system of schools was abolished in 1867. District No. 9 included families on the Northboro' road and in that vicinity. There was no village of importance in town. The largest number of families was in No. 6, which was composed entirely of farms, while the three points of greatest business interest, viz.: Piccadilly, Wessonville and the present centre of the town, were as thinly settled as the other districts. The whole expense of supporting schools in nine districts was less than four hundred dollars for a year,—

In 1800 the school appropriations was \$460.66. In this year District No. 6 had still the largest number of families,—having twenty-four,—while the next largest, No. 1, had only twenty-two. About this time we find that the women teachers received a dollar a week, while the men had nearly three dollars a week. In 1803, District No. 1 had the largest number of families, having twenty-five, one more than No. 6.

In 1854 the High School was established, and two years later is the first printed report of the School Committee. In 1856 the appropriation for schools, including the amount received from the State School Fund, was \$1461.44. Of this eight hundred dollars was voted for the use of the High School, and the rest divided in proportion among the districts. They paid the teachers this year from \$2 to \$6.50 a week besides their board bills. The High School teacher received for the four terms, \$626.88, and had an

1 No. 7 paid £4 6s. 2d. rent for the use of a private house.

assistant part of the time, who was paid forty-two dollars.

In 1870 the High School was graded. Since then all the schools in town have been much improved. Better houses, with better means of heating and ventilation, are now provided. The schools are systematically graded, and the standard of scholarship and instruction compares favorably with the same grades in city schools. With less than double the number of scholars in town over thirty years ago, the appropriation for schools is seven times as large.

From 1866 to 1876 Dr. J. H. Hero kept a boarding-school for young ladies in the old Wessonville tavern. This building had been previously used for school purposes by the Westborough School Association. Before the High School was established private schools were kept in the centre of the town for those desiring more advanced instruction than that afforded in the district schools. The old Armory Building on South Street and the Town Hall were rented for this purpose.

*The State Reform School and Lyman School for Boys.*—In the year 1846 three commissioners, Judge A. D. Foster, chairman, were appointed by the State to provide a State Manual Labor School in some central and easily accessible portion of the Commonwealth, away from the temptations of city life.

The juvenile offenders of the State had been to that time confined in the jails and houses of correction, with professional criminals, to their great detriment.

Theodore Lyman, of Brookline, was so much interested in this movement for the reformation of boys, that he gave the State at once ten thousand dollars, and offered as much more on condition that the State would appropriate an equal amount. The commissioners purchased for nine thousand dollars the Lovett Peters farm, on the shores of Chauncy Pond, containing one hundred and eighty-one acres of land. The beautiful view and deep, clear waters of the adjoining pond, of equal area, made the location a desirable one. It was designed to establish neither a prison nor a penitentiary, but a school.

The opinion of a large number of persons was secured as to the advisability of limiting the age of those committed, and it was finally decided to fix sixteen as the limit in ordinary cases, but courts had power to send any under twenty-one years of age to the institution.

The school was opened November 1, 1848, with accommodations for three hundred boys, and was soon crowded. Mr. Lyman had strongly recommended limiting the age of those admitted to less than fourteen years, but his wishes were not carried out.

In 1852 the buildings were enlarged at an expense of fifty-four thousand dollars, and soon after there was an average attendance of five hundred and ninety. In 1859 one of the boys set fire to the institution, causing a loss of over fifty thousand dollars.

The average age of those committed increased, the

greater part of them being sentenced for serious crimes. The school-ship for the larger boys was then provided, and the Westboro' school relieved of its most hardened offenders until 1871, when the school-ships were sold.

In 1875 an addition was built at a cost of ninety thousand dollars, for the confinement of the most dangerous element. The separation did not prove complete enough for the best results. The system of placing the most hopeful inmates in private families was extended, and the numbers in the Reform School reduced.

The reputation which the school gained, while holding in confinement so many incorrigible young men, was such that the courts were unwilling to send there boys who were young and likely to reform.

It finally became necessary to make a complete change of system. After the large buildings and grounds had been transferred to the trustees of the Westboro' Insane Hospital in 1886, the old Reform School was succeeded by the Lyman School for Boys which bears the name and now carries out the ideas of its first private benefactor. Although while living, Mr. Lyman had been unwilling that the public should know the name of the one assisting the school, this fact was disclosed at his death, in July, 1849, as the State received from him a legacy of fifty thousand dollars, making seventy-two thousand five hundred dollars in all.

Now the school is conducted without bolts and bars, the age of admission is limited to less than fourteen and it is meeting with success under the new system.

The Lyman School buildings are situated at Wessonville, about two miles north of the railroad station, and can be easily seen from the cars passing through town. The old Wesson Hotel, late Willow Park Seminary and water cure under Dr. J. H. Hero, and the old farm, formerly the homestead of Rev. Ebenezer Parkman, are now used for the school. The present number of boys is two hundred. The old school was an improvement on the jails and houses of correction, especially in giving the boys out-door work on the farm, the opportunity to learn trades and compulsory education. A very large per cent. became respectable citizens. Others became educated in crime, and went forth unreformed, soon to occupy other penal institutions in the State. The Concord Reformatory now cares for older offenders, and the great benefit arising from the present system of educating and reforming the younger boys and girls in private families makes it improbable that the attempt to collect five or six hundred boys in one building will be repeated. The boys are now divided into large families, cared for by competent men and women on the boarding-school plan, until they are discharged reformed, placed in families or reach the limit of twenty-one years.

The Westborough Insane Hospital was chartered

in June, 1884. It was made a State homœopathic institution, subject to the same general laws as the other State lunatic hospitals, with the special provision that persons preferring homœopathic treatment during insanity should be committed by judges to Westborough, instead of the other hospitals.

By the act of incorporation the buildings and lands of the State Reform School were given to the hospital, with \$150,000 for making necessary changes. With this sum of money it was required that accommodations for three hundred and twenty-five patients should be made, and also for the necessary officers and employees.

The seven trustees composing the first board were Charles R. Codman, chairman, of Boston; Henry S. Russell, Milton; Francis A. Dewson, Newtonville; Lucius G. Pratt, West Newton; Emily Talbot, Boston; Phœbe J. Leonard, Bridgewater; Archibald H. Grimke, secretary, Hyde Park.

Plans were drawn and approved by the Governor and Council on the 31st of December, 1884; specifications were made and contracts signed; and on the 18th of May, 1885, the work of alteration began.

Dr. N. Emmons Paine was appointed agent of the board May 1, 1885, and has been superintendent of the hospital since May 1, 1886.

A further appropriation was given for accommodating eighty additional patients, or a total of four hundred and five.

Additional appropriations have been made for furnishing the hospital, for out-buildings, fire protection, etc.

The hospital was formally opened for the reception of patients December 1, 1886, by a proclamation of His Excellency George D. Robinson, Governor of the Commonwealth.

During the first few weeks about two hundred patients were received from the other State hospitals to relieve their overcrowded condition.

The number of patients in the hospital has gradually increased, until, at the present time, it is completely full, containing four hundred and forty-two patients.

The first library in town was a social organization, started by five prominent citizens. The membership fee was from \$5.50 to \$15.00, and at every meeting each member paid a tax of twenty-five cents. This society was established in 1807, and Rev. Elisha Rockwood was president for many years. They purchased many valuable books, and some were given to them. It was in existence for thirty-two years. In 1839 they made over their property to the Mechanics' Association, a new organization of forty-six members, who, in addition to the support of a library, had lectures and discussions. In 1857 this association transferred the library to the town, and one year later we find the first appropriation for the town library—one hundred dollars for maintenance and repairs.

In 1882 a reference library was added. In 1888

there were seven thousand nine hundred and sixty volumes in the library. The appropriation was five hundred dollars and the usual vote of the "dog-fund."

There have been several newspapers published in town, but most of them have had very short lives. The first one, *The Westborough Messenger*, was published a few months in 1849. Since then there have been *The Westborough Sheaf* and *The Westborough Transcript*. About 1866 the first printing-office was opened, and the *Westborough Chronotype* was published. This paper is still the principal paper, a weekly with a large circulation. *The Westborough Tribune* also has been published weekly for a few months, and is an excellent country paper.

The introduction of reservoir water has done more, directly and indirectly, to change the appearance of the village, during the last ten years, than any other cause. An abundant supply of water, at small cost, has made it possible to keep lawns green and beautiful through the summer months, and in most parts of the village great care is taken to keep private grounds neat and attractive. Few places in the State are more fortunate in their water supply. Within two miles of the square there is a reservoir of fifty-six acres in area, with a small, lower basin, supplied during the summer months with spring water, or water filtered through sandy hills from the upper reservoir, and with a head of about one hundred and thirty-five feet. The cost has been about one hundred thousand dollars. Moderate water rates yield enough revenue to pay running expenses, interest on the water bonds, and the necessary payments to the sinking fund to extinguish the principal in thirty years.

In 1872 the town first considered the question of the introduction of water for fire and other purposes, and an act was secured from the Legislature in 1873. An examination of the available sources of supply resulted in the choice of the Sandra Reservoir, then used as a mill-pond. In 1878 the necessary land and water rights were taken, and July 4, 1879, eleven hydrant streams were thrown simultaneously higher than the business blocks in the village. For several years the shallowness of the reservoir and the decaying vegetable matter discolored and injured the quality of the water in the summer season. In the year 1887 a dyke was built across the narrowest part of the pond and the level of the upper basin was raised five feet. The mud in the lower basin was removed and the margin paved.

Since then the quality of the water has been nearly perfect and the supply ample for a city of fifteen thousand inhabitants.

The militia in town were properly enrolled, and in the early part of the nineteenth century were in a good state of discipline. The old armory, on South Street, recently removed, by J. E. Day, to Cottage Street, was erected for their use and for a hall for public gatherings.

Some of the members of the Westborough Light Infantry, the militia company, which had its headquarters in this building, organized the first fire company, about seventy years ago. Captain Charles Parkman was the foreman, and provided a large part of the apparatus for extinguishing fires, which was of a very primitive character.

In the year 1838 the town voted to appropriate two hundred dollars for the purchase of a fire-engine and its apparatus, provided as much more was subscribed by individuals. Two hundred and eighty-eight dollars in addition was raised and the fire-engine purchased.

April 11, 1842, the town adopted the act of the Legislature, establishing a Fire Department in the town of Westborough. In 1850 the old Chauncy hand fire-engine was purchased at an expense of five hundred and ninety dollars.

At present there is a well-organized Fire Department with its headquarters in the new engine-house erected, in 1888, on Milk Street, at a cost of ten thousand dollars.

The department consists of a board of five engineers. Chauncy Hose, No. 1, fifteen men; Jackson Steamer, No. 2, sixteen men; William Curtis Hose Company, No. 2, eighteen men; Rescue Hook-and-Ladder Company, No. 1, thirty men; Union Hose, two men.

It is estimated that about two million dollars' worth of property is under the protection of these companies, equipped with modern apparatus and assisted by hydrants distributed through the thickly-settled portions of the town.

Rescue Hook-and-Ladder Company has stood first or among the first fire companies in the State at the public competitions, which have been so common lately in the Commonwealth.

The Westborough Agricultural Society has been in existence fifty years. The annual fairs and cattle shows, the debates on agricultural subjects and public lectures have been important educators for all the citizens as well as the farmers.

The principal farm product sold has been milk. In 1835 it was first sent to the Boston market and now it is sent daily, in large quantities, to the same place. Of the dairy products sold in 1885, amounting in all to \$69,948, milk amounted to 521,268 gallons, worth \$67,574. The total farm products were valued at \$218,508.

A new society has just been incorporated called the "Westborough Historical Society." Its object is to collect books, papers, pamphlets, maps, photographs and everything which is now, or probably will be in the future, of historical interest. They will hold meetings for the purpose of learning about local history, and probably in the near future will have a room of their own. Mr. J. A. Fayerweather was elected the first president.

For eighteen years the Westboro' Young Men's

Debating Society has been of great assistance to the boys and young men of the town. They have sustained many excellent courses of lectures and entertainments. Most of the young men of this place who have achieved prominence in the pulpit, at the bar or have taken an active part in the State and town politics, have received their early drill in extempore speaking in its halls.

One of the most active of the societies in town is called the Village Improvement Society. It was formed late in the year 1878, and has done much towards rendering the town comfortable and attractive. It has depended almost entirely upon its membership fees for money to carry on its work, and in the ten years of its existence has had erected two drinking fountains, one on the "common" near the railroad station, the other at the junction of School and Main Streets. It has concreted the walks in the Memorial Cemetery, and set out eight hundred and sixty trees. The present membership is one hundred and fifty.

In 1839 a society was organized in town called the Thief Detecting Society. For many years it was very active in capturing thieves and recovering stolen property, but after the establishment of the police the work was done by these officers of the law, and the old society—their days of usefulness over—met only on the occasion of their annual dinner. The first president of this organization was Nahum Fisher; the clerk, M. M. Fisher. During its fifty years of life it had one hundred and forty-four members. In 1888 the membership was fifty-five, and at their annual meeting it was voted that they should reorganize under the name of the Westborough Park Association, and have for their object the establishment of a park. Dr. F. E. Corey was chosen the first president of the new society.

**MANUFACTURES.**—The efforts made before the Revolution to encourage home industries and discourage importation met with considerable success. No large manufactories were established. Most of the common articles of every-day life were made by hand at the fireside and in the blacksmith's and carpenter's shop. Most of the available water-power was utilized for sawing and grinding.

Fifty years ago the people of the town were principally supported by agricultural pursuits, yet we find traces of manufacturing, on a scale large enough to furnish a surplus for other communities.

The manufacture of boots and shoes, sleighs and straw-goods began at an early date in the industrial history of the town and still furnish employment to a large number of persons. In 1837 20,092 pairs of boots and 120,656 pairs of shoes were made, worth \$148,774. Males employed, 360; females, 214. Many employes worked at home and did not give their whole time to this business.

Twelve hundred straw bonnets were made, worth \$2,800. Ten persons produced sleighs worth \$3,840.

Axes were manufactured at Piccadilly to the value of \$2,870, as well as other tools.

Before 1857 sleighs were made in small quantities by individuals, the number of persons employed averaging less than two in each establishment.

At that time a large shop was built and occupied by Burnap, Forbes & Co., who made about 500 sleighs annually. Forbes & Fisher succeeded to their business and increased the production to 800 sleighs. The business is now carried on in enlarged buildings at the same location on Summer Street by D. W. Forbes & Son, who make about 1200 sleighs each year.

The firm of Vinton & Spaulding engaged in this business about the same time as the firm of Burnap, Forbes & Co., in the shop near the stable of Andrew Guild, which has been burned. Bacon & Williams made sleighs first in the rear of Smith's Block, on East Main Street, and later in a large shop at the corner of Milk and Phillips Streets. Corning Fairbanks, at Piccadilly, Wm. H. & F. Sibley, on Parkman Street, W. F. Brown, on the north side of the railroad, opposite Boardman Street, J. O'Brien, oningham Street and Frank Brigham, in Smith's shop, have all manufactured sleighs.

Formerly the grade made was of inferior quality, but during the past few years sleighs of excellent quality have generally been produced.

The manufacture of boots and shoes on a large scale was begun by J. B. Kimball & Co., who built a shop on Main Street beyond the residence of C. Whitney. A few years later they built the brick block now standing at the corner of Main and Milk Streets. In 1859 their business was moved to the building on Brigham Street, known as the Steam Mill.

The next person to engage in this industry was Jonas Stone, who carried on a small business in a shop on Mt. Pleasant.

From 1840 to 1860 D. F. Newton manufactured in the old factory on Cross Street.

Many firms and individuals have manufactured boots and shoes, including Otis Newton, Moses Newton, Uriah Bragg and Thomas Bryant (in the "Old Arcade"), George Forbes, C. M. Holmes, John H. Pierce and others.

The principal firms are now Gould & Walker, who manufacture in the building erected by an association of citizens of the town at the corner of Milk and Phillips Streets, employ about three hundred persons and produced last year five hundred and forty thousand pairs of shoes, valued at five hundred thousand dollars.

George B. Brigham & Sons, who occupy a large factory on Cottage Street, employ one hundred and seventy persons and produced last year three hundred thousand pairs of shoes, valued at three hundred and twenty-five thousand dollars. The head of this firm has for many years been a prominent boot and shoe manufacturer. He occupied first a building

where Spaulding's Block now stands and later moved into his shop on Cottage Street. From there he went to the corner of Milk and Phillips Street, where he was burned out a few years ago and carried on business for a short time in Southville before the new building was erected.

Brooks & Wells, of Boston, manufacture in the steam mill, employ one hundred and seventy persons and produced last year one hundred and twenty thousand pairs of shoes, valued at one hundred thousand dollars.

Straw goods were first manufactured by machinery in the L of the straw-shop on South Street by Bates, Parker & Snow, in 1863. A large part of the sewing was still, for some years, done in families in this and adjoining towns. The business is now carried on by Bates, Wightman & Beeman. The straw season is usually short, when compared with other manufacturing. The number employed by this firm in winter and spring is about two hundred, with a production of seven thousand cases of hats and bonnets.

The largest straw-shop in town is that of the H. O. Bernard Company, north of the railroad station. In the busy season they employ about nine hundred persons, and have produced sixty thousand cases of hats and bonnets in one year. For many years George N. Smalley, who had begun making straw goods with Mitchell in 1865, was general manager of this company in Westboro', while H. O. Bernard conducted the New York City department. The company was incorporated under the laws of New York in 1885 with a capital of two hundred thousand dollars.

The White Cycle Company has recently erected buildings for the manufacture of bicycles and tricycles under the patents of Frederick White. The principal building is one hundred and fifty feet long. The first machines will be put on the market this year.

The following is a list of establishments engaged in manufacturing and mechanical industries in Westborough in 1885:

Artificial teeth and dental work .....	2
Boots and shoes.....	3
Boxes (paper and wooden).....	1
Brick, tile and sewer pipe.....	1
Building.....	9
Burial cases, coffins, caskets, etc.....	2
Carriages and wagons.....	6
Clothing.....	5
Drugs and medicines.....	4
Food preparations.....	7
Leather.....	2
Machines and machinery.....	1
Metals and metallic goods.....	5
Printing, publishing and book-binding.....	1
Stone.....	1
Straw and palm-leaf goods.....	2
Wooden goods.....	1

Total ..... 53

The total product was.....\$2,004,887.

The Westborough Savings Bank was incorporated in 1869, and now has deposits exceeding \$600,000.

Cyrus Fay was president until his death, in 1884, and was succeeded by Edwin Bullard.

In 1864 the First National Bank was organized with a capital of \$100,000. J. A. Fayerweather, the first president, still holds that office. S. M. Griggs was the first cashier, and for about twenty years George O. Brigham has been cashier of the national bank and treasurer of the savings bank.

Westborough has become quite a commercial centre for the adjoining towns. There are now about sixty stores in place of the two or three which supplied the farmers with the few articles they did not produce in the early part of the century.

For a busy manufacturing town, with a large part of its population young men, its temperance record is not excelled by any in the State. The absence of saloons among the numerous places of business is quite noticeable. The number of votes for license is usually less than ten, with about one thousand names on the voting-list. For many years the town has, in its by-laws, required the selectmen to enforce laws for the suppression of the liquor traffic, and has generally elected selectmen and officers who have energetically attended to this duty.

Since 1820 the population of the town has steadily increased. The growth has not been rapid, but has been more uniform than the census returns would indicate. From 1850 to 1855 the gain was nearly forty-eight per cent., as returned by the census. About one-half of this increase, however, was due to the large number of boys in the State Reform School at the latter date. In 1885 the slight falling off in population was not due to a decrease in the number of permanent residents.

In 1816, when the population was about one-fourth of the present number of inhabitants, there were but eight persons in town who paid over \$20 in taxes, and but two who paid over \$50. There were forty-eight who paid over \$10 towards the total tax-levy (including State, county, town and ministerial rates) of \$2663.62. The following were the highest tax-payers of that year:

Heirs of Hon. Elijah Brigham .....	\$87.00
Breck Parkman.....	61.32
John Fayerweather.....	47.55
Benjamin Fay.....	42.86
David Fay.....	31.58
Benjamin Fay, Jr.....	29.89
Lambert Forbush.....	28.78
John Sanborn .....	24.18
John Wadsworth.....	19.63
Moses Grout.....	19.61

Before 1864 the tax rate was generally less than one per cent., and the people did not expect or require so much from the town as a municipality then as now. Reservoir water, public library and reading-room, high school instruction, street lights, concrete and brick sidewalks, engine-houses, paid Fire Departments and night watch are all innovations of the present generation. Even common schools were

kept but a few months in the year without any attempt at systematic grading.

The character of the population has largely changed. In the early part of the century the people were nearly all descendants of the settlers who came to this country between 1630 and 1675. The first immigrants to reach Westborough in considerable numbers came from Ireland, and engaged in making boots and shoes and as laborers on farms. As early as 1855 one-sixth of the population was of foreign birth—447 out of 545 immigrants coming from Ireland. They came with but little property, and were generally illiterate. The men had been so long accustomed to consider the ownership of land a great privilege in the old country, that the majority eagerly seized the opportunity to buy homes for themselves. While the average wealth has been much less than that of the native inhabitants, the records of our overseers of the poor show very few permanent paupers among them or their descendants. Most of those who have occupied the town poor-house during the past forty years have been insane or weak-minded people of American ancestry. Probably a larger per cent. of those of foreign descent have received temporary aid in their own homes in times of business depression, as those engaged in manufacturing pursuits are less apt to be frugal and saving than the farming population.

In 1885 the foreign element had increased to 781, or about one-seventh of the people in town. About two-fifths of the whole population is now of foreign parentage,—1144 are of Irish descent, and 163 have French Canadian parents. More than 200 others have parents born in the British Provinces. About thirty per cent. of the population is Catholic.

The average size of the 1033 families in town in 1885 was 4.72. They lived in 860 different houses, or only one and one-fifth families on the average in each house. The town is remarkably free from the large and crowded tenement-houses, so common in manufacturing communities. There are 136 farmers in town, employing about 200 laborers. Most of those working in the boot and shoe-shops are men and boys, while the majority of those employed in the straw-shops are females. The large number of women and girls who come from homes in Maine and other New England States to work in the straw-shops causes an excess of females over males of 292, or about 12 per cent.

There are many of Westborough's sons who have brought honor to her, but in this short sketch there is room to mention only a few.

*Eli Whitney* was born on the farm now owned by William H. Johnson, December 8, 1765. He, like the other farmers' sons, spent his early years in assisting his father, but he found many odd moments to give to mechanical experiments, and when a boy of fourteen he had won such a reputation as a skilled mechanic that the surrounding country people brought

to him any little jobs requiring more skill and knowledge than they themselves possessed. At sixteen his father furnished him with money to begin the manufacture of nails. With the profits of his business and his salary as a school-teacher, he was able to go to college, and he entered Yale in 1789. This ended his life in Westborough. When he left college he went to Georgia, and there invented the simple piece of machinery with which his name is always associated. Lord Macaulay says: "What Peter the Great did to make Russia dominant, Eli Whitney's invention of the cotton-gin has more than equalled in its relation to the progress and power of the United States." Judge Johnson, of South Carolina, says that by the use of this machine "their lands are trebled in value." Mr. Whitney never enjoyed the benefits of his invention—the model was stolen from his workshop. But he became a wealthy man from the manufacture of fire-arms for the United States. Two miles from New Haven is a little town, which he built for his workmen, called Whitneyville. He died January 8, 1825.

*Elijah Brigham* was born July 7, 1751. He was a graduate of Dartmouth, and commenced the study of law, but finally settled in Westborough in company with Breck Parkman as a dry-goods merchant. He served Westbrook for many years as Representative to the General Court, Senator and Councilor; for sixteen years he was judge of the Court of Common Pleas, and for eight years a member of Congress. He died in Washington, February 22, 1818.

*Horace Maynard* was born in the house now occupied by Darius Warren, August 30, 1814. He graduated at Amherst College—then went to Knoxville, Tennessee, as Professor of Mathematics and Natural Philosophy. He became one of the ablest lawyers of the State. In 1857 he commenced his life in Congress, where he served for eighteen years. In 1875 he went to Constantinople as Minister Plenipotentiary. In 1880 he was appointed Postmaster-General in President Hayes' Cabinet. Doctor Washburn says of him: "He was first, last and always an American." His tall, gaunt figure, long black hair and striking features were well known in Westborough, although he identified himself with the patriotic people of East Tennessee, where he was their first citizen.

Westborough is situated on the Boston and Albany Railroad, thirty-two miles from Boston and twelve miles east of Worcester. The numerous hills are generally free from large rocks and ledges, and are often used for pastures. The highest elevation, "Fay's Mountain," rises seven hundred and seven feet above the sea-level, and is one of the principal points used in the topographical survey of the State at the present time, and is the only point in this vicinity where the copper bolt, marking one of the points used in triangulating the State about fifty years ago, now remains in place.

The large area of cedar swamps and meadows on the tributaries of the Sudbury and Assabet Rivers are a prominent feature in the landscape. The absence of outcrop from the underlying rocks interferes with an investigation of anything but the surface geology. A coarse-grained hornblendic gneiss and micaceous schist are common rocks. Some fine specimens of andalusite have been found on the "Fay Farm," near Whitney's Hill.

Everywhere can be discerned vestiges of the great ice-pack covering the country during the glacial period. The elevations of the town, with the exception of two or three, are typical drift deposits, with the prevailing lenticular or morainal forms of hills of that class. In various localities are found true moraines, with a local appellation of "hog backs." These moraines are products of the era of local ice action, following the recession of the great glacier. The boulder clay and modified drifts (both characteristic glacial deposits), with several clay beds, are found within the town limits. A large area of swamp and plain land in this and adjacent towns in post-glacial times formed the bed of a large lake, in which were deposited the washings from the adjacent hills, transported to the lake by powerful streams. The shores of this great lake can be traced by the terrace levels found on the sides of some of our hills.

The streams on the western slopes of the town run into the Assabet River, while the central and eastern brooks run into the Sudbury River. The former river is for a long distance the boundary between Westborough and Northborough, while the Sudbury separates this town from Hopkinton.

The largest pond within our limits is Chauncy, called by the Indians Naggawoomcom, the great lake. This covers one hundred and seventy-seven acres. There is a small pond in the southern part of the town called Cedar Swamp Pond, and near Boston Hill the dark and gloomy sheet of water, which still retains the name given to it by the Indians, Hocco-mocco. Mr. Parkman, in his brief sketch of Westborough, published in the Collections of the Massachusetts Historical Society, says that the name of Hobomak—their evil spirit—was given to it from some supposed infernal influence which a man was unhappily under, nigh that pond, from morning till the sun sat. Hon. Horace Maynard, while editor of the *Amherst Horæ Collegianæ*, wrote for that paper the Legend of the Pond, as related to him by one of the old Indians who used to come to his father's house for cider. A beautiful Indian maiden, who had been won by the chief of the tribe in this vicinity, on the eve of her marriage, slipped away from the assembled company in a mischievous freak, and springing into her canoe, shot across the pond, in order to conceal herself in a natural bower at the farther end. Unfortunately she was seen by a former suitor for her hand, who, in a moment of passionate revenge, threw himself into the pond, swam quickly

*John Dyer Potter*

under the water until he reached the canoe, when with one agonizing shriek the Indian maiden was dragged beneath the surface. The chief on the opposite shore had seen her disappear, apparently without human aid. In the course of a year he, too, fell a victim to the lover's revenge, but he was not permitted to find pleasure in his murderous acts. Every year, on the anniversary of the maiden's murder, he was impelled to go to the shores of Hoccomocco, there to embark in a phantom canoe, see his victim materialize from blue flame and hear again her death-shriek. The third time, knowing it would be the last, he gathered his tribe about him, confessed his sins, embarked in the fatal boat and disappeared in a vivid flash of lightning in the middle of the pond. After that, for many years, whenever an Indian passed the Hobomak, he threw in a stone on the spot where the warrior was last seen. And now at low water, the tradition says, the pile of stones may still be seen.

The writer of this sketch is indebted for much valuable information to Rev. H. P. De Forest, formerly of Westborough, who has given much time to its local history, and to Mr. Edward C. Bates, now in Harvard University. Mr. George K. Merrill has furnished facts relating to the geology of the town.

#### BIOGRAPHICAL.

REV. JOHN D. POTTER.

Rev. John Dyer Potter, the well-known evangelist, was prepared for college at Leicester Academy. He entered Yale College, where he remained three years, and instead of graduating he went to Williams College to have the benefit of the lectures of its distinguished president, the Rev. Mark Hopkins, D.D. He decided to enter the Gospel ministry, and pursued his studies in that direction with Dr. Nelson, of Leicester, and at the Theological Seminary, Andover. He was subsequently licensed to preach, and began his life-work, an evangelist, to which he felt that he was called of God. He commenced his labors at the national capital. After remaining here a few months he went to Old Hatfield, Hampshire County, Mass., where his efforts were crowned with very gratifying success. He also met with similar success at Danielsonville and Thomaston, Conn., also in Missouri, Ohio, Wisconsin, Illinois, Minnesota, Indiana, Michigan, Iowa and in New York and New England. His labors in Connecticut extended into one hundred and fifty towns. It may truthfully be said that Mr. Potter is one of the successful evangelists of the age. He is commanding in personal appearance, without any affectation of personal dignity. His address is earnest and magnetic. His mental discipline and study of men make his language clear, pointed, refined and, at times, truly eloquent. His views of the

great doctrines of the evangelical system are graphically and explicitly stated, and his searching scrutiny of character, his exposure of sin and denunciation of "all ungodliness and every worldly lust," both in private life and public affairs, are unsparing, and yet there is no personal bitterness contained therein. Mr. Potter belongs to that honored line of evangelists pre-eminently represented by Whitefield, Nettleton and Finney, the Paul of modern evangelists.

E. B. PHILLIPS.

Late in the reign of Queen Elizabeth, near the easternmost corner of England, at Rainham, St. Martin's, was born "George Phillips" (son of Christopher), who, graduating at Caius College, Cambridge (A.B. 1613, and A.M. 1617), was one of the clergymen of the Church of England whose Puritan convictions led them to join Governor Winthrop's party, which sailed from England April 12, 1630, to found the Massachusetts Bay Colony. He was "Minister" on the Governor's ship, "Arbella," which landed just two months later at Salem.

Watertown was one of the earliest settlements made by these colonists, and of the church there George Phillips was the first pastor. The thirty acres allotted to him included part of what is now Mount Auburn Cemetery, and which, rising in gentle wooded slopes above the Charles River Meadows, remains to this day probably much as it looked to its first white owner. He spent the remaining fourteen years of his life at Watertown. A man strong in his opinions, he was, perhaps, the founder of those forms of church and town government peculiar to New England. Certainly he was, in the first years of the colony, almost the only advocate of the representative assemblies that have since been the most characteristic features of her civil and ecclesiastical government.

Theophilus, the son of George, spent his life at Watertown. With the first settlers of Worcester County came Joseph, grandson of the English emigrant, and opened a farm on the summit of the high hill to the south of Worcester, now partly in Auburn, partly in Oxford. Joseph's son, Jonathan, was a farmer of Sturbridge, a soldier in the campaign of 1758 against the French and Indians and deacon of the Baptist Church.

Ebenezer Humphrey, born in 1756, the son of Jonathan, was long a physician at Charlton, and served as surgeon in the patriot army at Saratoga. His son, Ebenezer Morgan, born in Charlton in 1792, lived the last sixty years of his life at Westboro', and at the age of eighty-one resigned his position as agent of the railroad company, which he had occupied for nearly thirty years. In 1818 he married Ann Maria Brigham, daughter of the Hon. Elijah Brigham and Sarah Ward Brigham, and granddaughter of Gen. Artemas Ward, the first commander

of the Continental Army at the siege of Boston, and descended in the fifth generation from John Cotton, the contemporary and friend of George Phillips.

They had two children—Elijah Brigham and Harriet Maria. Elijah Brigham Phillips, the subject of this sketch, was born in Sutton August 20, 1819. Soon after his birth his parents removed to Westboro'. Like so many other ambitious New England boys of that time, after attending the town schools, he studied a year at the neighboring academy, Leicester, and thence, after passing a short apprenticeship in a village store (Charles B. Davis', at Old Concord), he went "down to Boston" to seek his fortune. He was destined to become the most distinguished railroad manager of Worcester County birth.

When nineteen years of age he commenced his railroad career as a receiving-clerk at the freight station of the Boston and Worcester Railroad. It is notable that young Phillips and one other man were able to do the work for the office, which handled all the railroad commerce Boston then had with the country to the west of it, while to-day the similar work requires a force of several hundred. This was indeed the infancy of the railroad. Only nine years before the first train propelled by steam-power had been run in England, and it was only during the preceding five years that the first steam roads running out of Boston had been finished to Lowell, Worcester and Providence. No one then appreciated how completely this new agency was to readjust and enlarge individual and national life. It is estimated that forty per cent. of the present wealth of Europe would have been impossible without railroads. Even more dependent upon its steam arteries has been the growth of this country. A new force was put into the service of man. Here arose the great problem of how the new power should best be applied, where it it should act and how it should be controlled. All this was to be decided each year in greater magnitude and with increasing complications. This young man starting life in the Boston freight-office, ambitious, energetic, untiring, devoted to his task, was for more than fifty years to grow with this growth, and be an active part in it, first as subordinate, later as administrator. Always anxious to be useful wherever wanted, he became thoroughly familiar with the details of the transportation of passengers and freight, and of the accounts which they occasioned. Successive promotions followed until he was given charge of the freight business of the company at Boston. In the summer of 1852 he was master of transportation when offered the superintendency of the Toledo, Norwalk and Cleveland Railroad, then building in Northern Ohio. He removed to Norwalk in October, 1852, and his office and home were removed to Cleveland in the fall of 1853.

Between Norwalk and Toledo there stretched an almost unbroken forest of heavy timber, for a large part through the Black Swamp, where, during the

first months that trains ran, the rails frequently disappeared below the black mud. All this has long been converted into a rich farming country. The road ran parallel to the shore of Lake Erie, and this, with the connecting roads, which were finished about the same time, competed with a line of fine steamer for the host of travelers then moving from the New England and Middle States to the farther West. It was one of the first instances where the railroad proved its superiority to the best water facilities, and a few years of ineffectual struggle forced the steamers to relinquish the passenger business to the railroad, and thenceforward only freight-steamers plied upon the lake. In 1858 Mr. Phillips was recalled to Massachusetts as superintendent of the Boston and Worcester Railroad. This position he filled during the years of the war, when troops and supplies were conveyed in large quantities from Boston, which was the mustering-point for eastern New England. It was upon a train of the Boston and Worcester Railroad that the advanced regiment of the great Northern hosts (the Sixth Massachusetts) first took cars and started for the seat of war. In September, 1865, Mr. Phillips assumed the presidency of the Michigan Southern and Northern Indiana Railroad, lying between Chicago, Toledo and Detroit, and having a mileage of five hundred miles, then one of the largest in the United States. This company had been in poor condition, but now it had entered upon a very prosperous era of improvement, both physical and financial.

Mr. Phillips was hardly established in his new office when he had to deal with a powerful strike, organized by the locomotive engineers. The engineers over the whole road (with the exception of one man) refused to perform their duties. Mr. Phillips thought their position indefensible, filled their places with new men and vindicated the discipline of the road. Mr. Phillips made large purchases of land in Chicago for stations and yards for the company and built the handsome passenger station, which was destroyed in the great fire of 1871 and then rebuilt. Among his staff were Charles F. Hatch, afterwards general manager of the Eastern Railroad, and of the Chicago, St. Paul and Omaha Railroad; Charles Paine, later general manager of the New York, West Shore and Buffalo Railroad; C. P. Leland, still auditor of the Lake Shore and Michigan Southern Railroad, and Henry Pratt, now treasurer of the Michigan Central Railroad. The Michigan Southern and Northern Indiana Railroad Company was consolidated, May 8, 1869, with the Lake Shore Railway to form the Lake Shore and Michigan Southern Railroad, extending from Buffalo to Chicago, with about one thousand miles of road, and with Mr. Phillips as the first president of the new corporation.

Mr. Phillips was a warden of Christ Church, Chicago, when, in 1869, the bishop of Illinois brought Charles Edward Cheney, the devoted rector of that

*C. B. Phillips*

---

church, before an ecclesiastical court for the omission of a word in the baptismal service. Mr. Phillips' conscientious love of justice led him to enter vigorously into the defense of his rector, and as senior warden he took a leading part in the subsequent appeal to the Civil Court, where the decisions of the former court were pronounced invalid. The proceedings, however, led to the formation of the Reformed Episcopal Church.

Mr. Cheney's counsel was Melville W. Fuller, now Chief Justice of the United States.

In December, 1870, Mr. Phillips entered into partnership with Charles L. Colby, of Boston, which was afterwards merged into the Phillips & Colby Construction Company, for the purpose of building the Wisconsin Central Railroad, projected to run in Wisconsin from Menasha and Portage City to Ashland, on the southwestern shore of Lake Superior. The line from Menasha to Stevens Point (sixty-five miles), and from Portage City to Stevens Point (seventy-one miles), passed through a thinly-settled farming country, but from Stevens Point to Ashland (one hundred and eighty-six miles), it traversed a forest uninhabited save by lumbermen. At that time Northern Wisconsin, comprising all that lay north of a line drawn from Green Bay to St. Paul, was a dense forest of nearly twenty million acres undisturbed by farms or railroads. The Wisconsin Central was one of those typical American railroads, not built to serve an already existing community, but destined to open an entirely new country for the use of mankind. A land grant of one million five hundred and seventy thousand acres was the incentive for its construction and experts promised rich iron lands upon its upper part. Both these promises were only partially fulfilled. Much delay was made in the delivery of land titles, and only after a dozen years of exploration was the rich ore found, and then where a branch road of thirty miles was required to reach the ore-beds. In the life of Mr. Brassey, the most famous of English railroad contractors, is no record of an undertaking of such difficulty as that which confronted the Phillips & Colby Construction Company. They projected a railroad from end to end of this great area of wilderness, in a country where the winters were long and the forest growth so thick that the soil remained a wet mire almost the whole season that work was possible. Men and supplies all had to be sent in from Stevens Point or enter from the Ashland end after a circuit of four hundred miles by lake from Chicago, and it was necessary to first prepare "tote" roads for their passage through the woods.

The great fire of 1872 in Boston and the panic of the next year crippled the capitalists, who furnished money for the enterprise, which by these losses was delayed and rendered much more difficult. The line was completed in June, 1877. From 1874 on Mr. Phillips made his home in Milwaukee. He operated the Wisconsin Central until 1878, when he removed

to Chicago, intending to rest for a year, but he was shortly after appointed by the United States District Court for Southern Illinois receiver of the Grayville and Manton Railroad (now part of the Peoria, Decatur and Evansville). This company he reorganized and improved. June 1, 1879, upon his election as president of the Eastern Railroad of Massachusetts for a second time, he removed from the West to Boston. In this office he spent three and a half years of increasing prosperity for his company. Its lease to the Boston and Maine corporation was much discussed, and in 1883 that company leased the Eastern Railroad. Mr. Phillips believed that the resources of the latter company were not then sufficiently appreciated for it to obtain the terms which were warranted by its merits. Along the north shore it commanded a very exceptional passenger business; in Boston it owned large and very valuable terminal grounds of increasing value, to the Boston and Maine as well as to itself, and it owned practical control of the Maine Central, which gave both roads connection with Maine and the provinces. In 1879-80 he served with Judge Colburn, of Dedham, and Mr. Samuel M. Felton, of Philadelphia, as a commission to arbitrate between the State and the Fitchburg Railroad Company.

During the early months of 1883 Mr. Phillips devoted himself to the management of the Toledo, Cincinnati and St. Louis Railroad. What has been called the "war of the gauges" had waged during the preceding years. Volumes had been written, the technical journals had teemed with its debates—the Prussian Government made elaborate investigations. Several of the earlier roads built with a width of six feet between the rails had been narrowed to the common gauge of about four feet and nine inches. Why should not this in turn be superseded by one of three feet? About 1875 three local roads had been started with this narrow gauge from Delphos, a small town in Northwestern Ohio. By a singular series of extensions and accretions with short pieces of similar road the Toledo, Cincinnati and St. Louis Railroad had, in 1883, gathered under one management upwards of eight hundred miles of narrow-gauge road, comprising a main line from Toledo through Delphos to St. Louis; a stem from Delphos extending south to Dayton, where it branched into two lines, one going to Cincinnati and the other to the iron and coal fields of Welleston and Ironton, in the southeastern part of the State. Mr. Phillips was not a believer in the narrow gauge, but the road had such small capitalization and commanded such valuable territory that, had sufficient capital been forthcoming, the property could have been made profitable.

In 1883 Mr. Phillips was elected president of the Fitchburg Railroad, then extending from Boston to the Connecticut River, and running its trains over the State road to North Adams. This mixed management of the Hoosac Tunnel and the forty miles of

road owned by the State, as part of the same enterprise, was very unsatisfactory, and for years many had deprecated the State ownership.

In 1886 the Fitchburg found a rival company emulous of the ownership of the property of the State. After months of negotiations, terms were finally made in January, 1887, when a contract was made with the Governor and Council of Massachusetts for a consolidation of the Fitchburg with the Troy and Greenfield Railroad and Hoosac Tunnel, extending from Greenfield to the Vermont line. The Hoosac Tunnel, with a length of four and three-quarters miles, was begun in 185—, that Boston might have a second and more favorable line to the West. In 1875 the tunnel was completed, but it was not until 1887, when it was thus put under one strong company, that the original purpose was accomplished, and one corporation operated the line from Boston to Troy and Rotterdam Junction, giving direct connection with the five great companies which cross the State of New York and also with the Erie Canal. The labor of the president was arduous in the negotiations with the State, with the Boston, Hoosac Tunnel and Western Railroad and with the Troy and Boston Railroad, and in the subsequent organization of the parts into one working whole. In 1885 the Fitchburg consolidated with the Boston, Barre and Gardner, giving access to Worcester with its population of seventy thousand.

Mr. Phillips has always been progressive and foremost in adopting new inventions favorable to increased safety and economy of working. Thus the Boston and Worcester, while he was superintendent, was the second management in the country to adopt the Creamer Brake, the best automatic brake previous to the invention of the Westinghouse Air-Brake in 1870. On the Michigan Southern and Northern Indiana and again on the Wisconsin Central he introduced the Tyler Switch, then unknown on the Western roads,—a simple device that in several notable instances prevented loss of life that would otherwise have occurred. On the Michigan Southern, too, he was the first west of the Alleghanies to adopt the Miller Platform and Coupler, one of the greatest improvements ever made in car construction. He was an early advocate of strong safety-chains upon passenger cars and of stronger decks upon bridges. In 1888 he gave the first large order in New England for the equipment of freight-cars with air-brakes. His annual reports of the Lake Shore and Michigan Southern and of Eastern Railroads were models of fullness and clearness to be imitated by neighboring roads. Mr. Phillips married, February 2, 1845, Maria Rebecca Ayling, daughter of Henry and Mehitable (Copeland) Ayling, of Boston. They have three children—1st, Henry Ayling, born August 19, 1852 (S.B., M.I.T., 1873), married October 4, 1888, Florence Elizabeth Waters, daughter of Colonel Asa H. Waters, of Millbury; 2d, Anna Maria, born December 21, 1856, married February 2, 1885, Cyrus A. Page, publisher of

the *Boston Beacon*; 3d, Walter Brigham, born April 2, 1864 (A.B. Harv., 1886).

A friend who has known Mr. Phillips intimately for nearly quarter of a century, and who holds high official rank in one of the great railroad corporations of the country, writes of Mr. Phillips that his natural love of justice has always enabled him to deal with entire fairness to all with whom he has had relations; that industry and zeal in duty he has always highly appreciated, while abhorring with the spirit of a typical New Englander anything like laziness, and has set a grand example of fidelity himself; a good disciplinarian, he expects a man to do his best; he hates shams and is very quick to detect one; he combines with a conservative prudence the radical ideas of progress in all that affects safety or economy in the details of his profession; faithful to the interests entrusted to his care, straightforward and true to all his engagements, he is an exemplar of that commercial honesty the scarcity of which is so much lamented in the railroad world of to-day.

#### NATHANIEL E. PAINE.

Nathaniel Emmons Paine was born July 14, 1853, at New Hartford, Oneida County, N. Y., the home of his grandfather, Dr. John A. Paine. His father, Horace M. Paine, M.D., was settled at the time in Albany, N. Y., engaged in the practice of his profession. His mother, Miss Charlotte Mann, the daughter of Mr. Salmon Mann, of Norfolk, Mass., was one of the early graduates of Mount Holyoke Seminary. Dr. Paine therefore inherited the advantages and influences of an educated ancestry; and, with two generations of successful physicians preceding him, a strong bias as well for the medical profession.

In August, 1855, his father removed to Clinton, Oneida County. The years spent at Clinton were of great advantage to the growing boy. The duties required of him on his father's farm made him strong and muscular, and gave him an acquaintance with practical affairs, often sadly missed by city-bred children.

In 1865, Dr. Horace M. Paine again removed his family to Albany, and directly re-established himself as one of the leading physicians of the city, a position which he continues to hold with ever-increasing honors and appreciation.

His oldest son, the subject of our sketch, was a pupil for some time at the Albany Academy, and afterwards studied with Professor Lewis Collins, until he was admitted to Hamilton College in 1870. His college course was one of great advantage to him, but it was not until he reached the studies of the senior year that he found real delight in his work. While engaged in chemistry the young student showed unusual qualities of precision, patience and unwearied application, which less congenial studies failed to bring out. The record of his college work was closed at his com-

*N. Emmons Fairbanks*

mencement by the taking of the first chemical prize, an honor which was a foregone conclusion for some months, owing to his well-known laboratory work.

On his return to his home in Albany, the young man matriculated as a student in the Albany Medical College, a department of the Union University. But his medical work by no means began at this point. During the vacations of his college course he was engaged in assisting his father in his office; while, in fact, he was daily under the influence of the profession from childhood, being early acquainted with visiting physicians and their conventions. During Dr. Paine's childhood and youth were the days of the trial and development of homeopathy in New York State. He witnessed the struggles of the early years of its State and county societies, the founding of its hospitals, and finally the establishment in 1874 of its State Asylum for the insane at Middletown, Orange County, the first institution of its kind in America.

While this pioneer work properly belongs to the recital of the lives of his grandfather and father, it exerted a wide influence on the growing boy, giving him a familiarity with organization, and many lessons in the necessity of tact, patience and discretion in the bringing about of desired measures. His medical studies were supplemented by a continuous experience with his father in his wide practice, so that he entered upon his chosen work under especially favorable circumstances. That his course in the Medical College was a successful one is attested by the fact that, on his graduation, he had the honor of being valedictorian of his class, and received also a prize in obstetrics.

Directly after his graduation he sailed for Europe, where, for over a year, he studied in Germany—the greater part of the time in Vienna. He found in special post-graduate courses, and in the opportunities offered by the large hospitals, the best means of adding to his knowledge and experience.

Returning to America in 1877, Doctor Paine expected to engage in private practice in Albany, New York, but an offer to become an assistant physician at the Middletown Homœopathic Asylum led him to that special work, in which he has since been engaged. He began his duties May 1, 1877. Doctor Paine entered upon his new field of work with much enthusiasm, and bringing to it, as he did, a keen mind, well trained by years of preparation, as well as ready sympathies, he soon became endeared to his patients, and received for his work the commendation and appreciation of the trustees and superintendent. Three years and a half were thus well spent in the daily routine of hospital work. During this period Doctor Paine invented several means of restraint for his patients, which have been proved by years of use to be of great value in the treatment of the insane, and which have been adopted by many institutions in the country.

His most noted invention in 1878 was that of the Nasal Feeding Tube, which has taken the place largely of the old stomach-pump. By its means refractory patients have been fed without violence or pain, and life, in many instances, has been sustained until the brain has had time to return to a healthy tone and condition. As it is contrary to the code of the physician to make any personal profit from a professional instrument, the tube has never been patented; but it was manufactured by Tiemann & Co., of New York, and described in their catalogue as Paine's Nasal Feeding Tube.

But the doctor had still another long course of experience and discipline to endure, entirely unlooked-for by himself or his friends. The strain of his studies and special work proved too much, and in 1880 his health failed. He resigned his position at the asylum in October, 1880, receiving every mark of appreciation from its Board of Trustees and its superintendent, Dr. Selden H. Talcott, and many evidences of affection from his patients.

The next four years were spent in endeavors to regain the lost strength and vigor. Their history consists of a sequence of experiments in treatment and travel. But while thus occupied in a weary round, they were by no means valueless to the doctor. He tested personally many courses of treatment only known to him before by theory, and his experience was greatly widened by the necessities of his own case. Above all, his sympathies were deepened, and it is largely owing to this time of suffering that he has acquired that insight into the feelings of his patients and the delicate appreciation of their troubles which is so decided a characteristic.

In December, 1884, Dr. Paine received an offer from the Board of Trustees of the Westborough Insane Hospital to become its superintendent, which resulted in his acceptance of that position. Before entering upon his duties Dr. Paine spent the winter and early spring of 1884-85 in visiting and examining the asylums of other States, with the special purpose of studying their construction. He removed to Westborough with his family in May, 1885.

The alteration of the State Reform School buildings, to fit its new necessities as a hospital for the insane, occupied a year and a half. During this time Dr. Paine was in constant consultation with the Board of Trustees and the architect, and was able, through his experience in such institutions, to make valuable suggestions in matters of construction. The history of the Westborough Hospital is to be given in another portion of this work. That history has been largely influenced by the skill and wisdom of its superintendent, and its wider future and assured success rest on the foundation of his personal character and attainments.

In the fall of 1887, Dr. Paine was appointed lecturer on insanity in the Medical Department of the Boston University. He delivers didactic lectures to

the students of the graduating class at the college, which are supplemented by clinics held at the Westborough Hospital.

It should be said, in conclusion, that on June 5, 1879, Dr. Paine married Harriet, the youngest daughter of the late William Gould, of Albany, New York, a gentleman well-known and honored in that city. The doctor's marriage has given him that best of helpful inspiration and incentives for good work, a happy home-life.

Dr. Paine stands at the beginning still of his life-work, showing ability for executive and professional success and all the qualities of mind and heart which not only endear him to those with whom he is officially connected, but also command their respect and admiration.

May he long be blessed with health and strength to carry out his many plans for the help and alleviation of his suffering patients.

## CHAPTER CLXVIII.

### DUDLEY.

BY J. J. GILLIS.

DUDLEY, located in the south central section of the county, between the French River upon the east and the Quinebaug upon the west, comprising about thirteen thousand acres, was named in honor of the Dudley family, first English proprietors of this territory, descendants of Governor Thomas Dudley, one of the patentees of the Massachusetts Colony. This township is part of the land west of the Kuttatuck (now Blackstone) River, conveyed by deed February 10, 1681, from the Nipmuck Indians to William Stoughton, of Dorchester, and Joseph Dudley, of Roxbury, agents of the Province of Massachusetts Bay, in consideration of the payment of fifty pounds, current money of New England. This deed contained the following reservation: "Reserving always unto ourselves, our heirs and assigns out of the above said grant a certain tract of land five miles square, at two such places as we shall choose, to be wholly at our own use and disposal."

This reservation was selected and surveyed in October, 1684, to "Black James" and others. One section extended from Lake Chaubunagnugamaug (now in Webster) to the west of Dudley Hill or the Centre Village, and nearly all subsequently became the property of Hon. Joseph Dudley, which, together with other grants from the province, he retained title to until his decease, April 2, 1720, when they became the property of his sons, Chief Justice Paul and the Hon. William Dudley, and were soon offered for sale by them. These sales, beginning in 1721, are recorded in the records of Suffolk County, in

which they were located previous to the erection of Worcester County in 1731. The earliest purchasers and settlers of these lands were John Healy, Jonas Clark, Philip Newell, William Ward, Benjamin Newell, Nathaniel Ramsdell, Samuel Newell, Joseph Putney, Clement Corbin, Benjamin Sabin, Daniel Williams, Joseph and Ebenezer Edmonds.

In 1731 a petition was presented to the General Court for a grant for a township, the motive being apparently a religious one; for in the act of incorporation we find the following: "WHEREAS there are many inhabitants in a tract of land lying between the towns of Woodstock and Oxford, in the county of Worcester, who, together with others, lately settled in the southwest part of Oxford and very remote from any place of public worship of God, . . . Be it enacted," etc.

That these early settlers were exceedingly fervent in religious sentiment may be inferred from the fact that upon the records of the town may be found a vote unanimously passed, "to hold a day of fasting and prayer to God for direction in the great and mighty affair of calling and settling a minister."

By authority of the General Court, Joseph Edmonds issued a warrant calling the inhabitants qualified to vote to meet at the house of William Carter (now the property of Deacon Daniel Dwight), June 20, 1732, to vote for all the necessary officers for organizing the town as by law is required.

The officers elected were as follows: Moderator, Joseph Edmonds; Selectmen, Joseph Edmonds, Ebenezer Edmonds, James Corbin, Geo. Robinson, John Lilly; Town Clerk, John Lilly; Constable, Joseph Putney; Fence-Viewers, John Healy, Clement Corbin; Tythingmen, Jonathan Newell, Benjamin Conant; Hog-Reeves, David Southwick, Joseph Wakefield; Treasurer, Jonathan Newell.

The meeting was then adjourned to the 29th instant following, when the following business was transacted (Moderator, James Corbin): "Voted, to have a minister, and to raise the money for his support by a tax upon improved lands and stock, and that William Carter's house be the place to meet to hear the gospel preached."

The selectmen were authorized to procure a minister. Jonathan Newell was appointed to set the psalms in the public worship and Joseph Payson to read them.

It was also decided to build a meeting-house upon the end of William Carter's land.

A vote was passed to give Rev. Isaac Richardson, the minister, one hundred and fifty pounds, together with one hundred acres of land donated for this purpose by the Hon. William Dudley, and a further salary of eighty pounds the first year, with an increase of five pounds per year until it reached one hundred pounds, which was to be the maximum, and the day of ordination appointed; but it is the popular belief that the ordination did not take place.

A vote was passed valuing all the land in town at twenty shillings per acre and to remain at that value seven years. Also, a committee was chosen to apply to the Legislature to permit a tax on all lands as here voted. At this time none but improved lands could be taxed, unless so authorized by the General Court.

The preliminary acts of the British Government, which excited the colonists and produced the War of the Revolution, did not have much effect upon the people of this town until the closing of the port of Boston.

At a town-meeting, held on Sept. 20, 1773, it was voted not to act upon the letter received from the Boston Committee. This letter set forth the unconstitutional character of all acts of the English Parliament in framing laws for taxing the Colonies, on the ground of non-representation. But the port of Boston closed, the people lost all indifference, realized that war was inevitable and prepared for the contest.

A Committee of Correspondence and Safety was chosen June 30, 1774, consisting of Capt. John Courtis, Lieut. Timothy Foster, Joseph Vinton, Archibald Jewell and Elisha Corbin.

Sept. 19th the town voted to add to its stock of ammunition, and chose Col. Thomas Cheney to represent the town in the Provincial Congress at Concord. Nine days later the town instructed its constable to collect and keep the province money in his hands till further orders, the town to hold him harmless; and chose a committee "to settle and establish minute-men."

Dec. 17th it was voted to appropriate the province money in the hands of the collector to buy guns and bayonets; to adhere to the doings of the General Congress in all matters whatsoever, and to conform to the non-importation agreement.

Jan. 2, 1775, Col. Thomas Cheney was again chosen Representative to the Provincial Congress, this time to be holden at Cambridge. Col. Thomas Cheney was then in his sixty-eighth year; he died two years later, April 30, 1777, and lies buried in Sturbridge. He was a great-grandson of William Cheney, who emigrated from England, with his wife, two sons and two daughters, in 1635, and settled in Roxbury. Col. Thomas was born in Cambridge, 1708; held a commission in the Colonial Army; was present at the taking of Louisbourg, 1745. ("April 21, 1746, Gov. Shirley issued orders to Capt. Thos. Cheney, of Dudley, to march with his Company of 60 troopers to Northfield. Indians were lurking in the neighborhood, and men had been murdered a short time before."—Temple and Sheldon's "History of Northfield.") He came to Dudley about 1735, and settled near the present village of West Dudley. The home which he here established has ever since remained in the possession of direct descendants.

The next meeting of the Provincial Congress was held at Watertown, May 31st, in which Wm. Learned was the representative.

News of the battle of Lexington, April 19, 1775, spread like wild-fire and before the close of the next day the following minute-men were on their way to Boston under the command of Capt. Craft: Jonathan Day, John Blood, Eben Amadon, Nat. Clark, Elisha Corbin, Lemuel Corbin, Benj. Edmonds, Jonas Fairbanks, Wm. Learned, Stephen Sly, Eben White, Jr.

The following were minute-men in Capt. Nathaniel Healy's company in Col. Ebenezer Learned's regiment, who, immediately after the battle of Lexington, with his regiment, reported for service at Cambridge, and with Colonels Prescott and Warren ordered to join General Thomas at Roxbury: Capt. Nat. Healy, Lieut. David Keith, Ensign Saml. Healy, Sergeants Timothy Foster, John Bacon, Eleazer Jackson, Asa Curtis, Corporals Mark Dodge, Jacob Chamberlain, John Vinton, Joseph Marcy, Drummer John Edmonds, Privates William Jordan, Jeremiah Haskell, Ephraim Corbin, Nathan Inman, Benj. Upham, Ebenezer Griggs, Timothy Vinton, Asa Robinson, Jesse Sabin, Moses Jewell, Joseph Healy, David Haskell, John White, Benj. Kidder, Ira Green, Amasa Marshall, Ebenezer Jewell, Geo. Robinson, Ebenezer Edmonds, John Mason, Ezekiel Hovey, Ichabod Kocks, William Carter, Jonathan Foster, Benj. Inman, Shadrach Smith, Stephen Edmonds, Stephen Healy.

From a muster-roll of a subsequent date we take the following names, members of the same company, omitting such as have been already given: Sergeant William Corbin, Corporal Amos Hooker, Fifer Stephen Healy, Privates John Phipps, Ebenezer Dodge, James Brown, Elijah Convers, Jonathan Willard, Lemuel Edmonds, Richard F. Hunt, Aaron Wakefield, John Dodge, Joseph Cody, Asa Edmonds, Nathan Fletcher, Samuel Hibbard, Samuel Kidder, Amos Commins, Amos Wakefield.

Upon a roster of Capt. Courtis' company, same regiment, are found the following names of men from this town: Nathaniel Corbin, Benjamin Havens, Joseph Peagon, Gideon Sabin, Thomas Carroll, Samuel Peagon, Caleb Kidder; also in Captain Lemuel Corbin's company from Dudley, detached for Rhode Island on alarm of July 13, 1780: Lieut. Joseph Keith, Sergeant William Wasson, Corporals William Smith, John Heath and Wm. Foster, Privates Aaron Albee, Ichabod Chamberlain, Hosea Howard, Jesse Jewell, Thomas Morris, Russel Smith, Simeon Upham, Solomon Wakefield, John Comstock, Wm. Westcott, William Brown, Ebenezer Hibbard, Lemuel Healy, Joel Lee, Nathan Sly, Nathan Fitts, Stephen Wood, Obed Warren, Joseph Foster.

Among the records on file in the office of the Secretary of State is:

A return of the male inhabitants from 16 years old and upwards and also the men engaged in the Continental service in the county of Worcester, with the number and deficiency of each town, in obedience to an order of the Great and General Court passed the 3d Feb., 1778.

## DUDLEY.

Number of male inhabitants.....	232
One-seventh part.....	33
Number of men in service .....	33

The thirty-three men who served in the above quota were:

*First Company.*

Wm. Butler.	Luke Morris.
Elkins Moore.	Joseph Cody.
Wm. Jordan.	John Dodge.
Samuel Peagon.	Joseph O'Brien, of Machias.
John Fivash.	John Keating, of Machias.
James Thomas.	John Ray, of Boston.
Samuel Putney.	— McNeil, of Boston.
Ebenezer Peagon.	— Willis, of Boston.

Attest, WILLIAM CARTER, captain, Dudley, Jan. 13, 1778.

*Second Company.*

Ezekiel Chase.	Tim. Drummond, of Machias.
Paul Brown.	Chas. Frank Otto,
Joshua Ephraims.	John Otto,
Ephraim Bowers.	James Rainer,
Jesse Sabin.	John Dunn,
John Allen.	James Barnard,
James Newton.	William Brown,
Joseph Peagon.	Matthew Fullsom,
Thomas Carroll.	

Attest, NATHANIEL HEALY, captain, Dudley, Jan. 13, 1778.

## Subsequent enlistments:

## 1778—for nine months.

	Age.	Height.	Complexion.
John Morris.....	41	5-5	light
John Edmunds.....	29	5-10	dark
Elisha Corbin.....	32	5-10	light
David Burrill.....	44	5-7	dark
Benj. Edmunds.....	26	5-10	dark
Josiah Barnes.....	26	5-6	dark

## 1779—for nine months.

William Wasson.....	28	5-9	dark
Amos Commins.....	38	5-6	dark
Nathan Dodge.....	20	5-5	light
Andrew Webster.....	20	5-5	dark
Stephen Wood.....	18	5-9	light
Ebenezer Allen.....	17	5-9	light

## 1780—for six months.

Nathan Waldron.....	19	5-6	ruddy
Phineas Kimball.....	18	5-5	ruddy
Simeon Howard.....	28	5-5	light
Samuel Healy.....	19	5-5	dark
Nathaniel May.....	17	5-4	dark
Thomas Learned.....	18	6-1	light
Jeremiah Shumway.....	17	5-4	light
Peter Grove.....	17	5-5	light
Benjamin Jewell.....	21	5-5	light
John Fenner.....	19	5-8	light
Benjamin Morris.....	18	5-3	light
Ebenezer Allen.....	18	5-10	light
Andrew Webster.....	21	5-4	light

## 1781—for three years.

John Foster.....	37	5-5	dark
William Wasson.....	30	5-9	dark
Elijah Humphrey.....	30	5-9	light
Ebenezer Allen.....	18	5-10	light
Silas Hayden.....	21	5-10	light
Jeremiah Shumway.....	18	5-5	dark
Nathaniel May.....	18	5-5	dark
Stephen Corbin.....	20	5-7	light
Joseph Healy.....	26	5-7	light
Hosea Howard.....	21	5-8	light
Lemuel Healy.....	21	5-6	light
Benj. Jewell.....	21	5-5	light

DUDLEY, April 18, 1781.

We, the subscribers, having recd., each of us, One Hundred Pounds in money and sureties of silver money at the rate of six shillings and eight pence per ounce for our engaging in the Continental service for three years, We say received each of us.<sup>1</sup>

Besides the above, three did service for the town of Leicester, as the following certifies:

LEICESTER, May 25, 1778.

SIR:—Agreeable to your direction, I have raised three men for the 9 months' service in the Continental Army. Their names are as follows: Zarana Smith, of Dudley, in Col. Holman's Regiment and Capt. Healy's Company—5 feet 7 in., well set; age, 24 years; light complexion.

Joseph Vinton, age 20 years; 6 ft., light complexion and well set.

John Edmonds, 5 ft., 10½; age, 20 years; light complexion, well set and to do a turn in Col. Denny's Regiment, in Capt. Green's Company.

SAML. GREEN, *Capt.*

TO SAMUEL DANAY, *Col.*

Thus we observe this town sent at least fifty-three *bona fide* citizens into the Continental army, a number equal to one-fourth its total male population above sixteen years of age; and when we consider the heavy burdens endured in furnishing bounties and supplies for the army we may gain an idea of what it cost to plant the tree of American liberty and independence; for the history of this town during that unprecedented struggle is but the history of others.

The spirit which animated our patriots of '76 found a ready response in '61, and that early cry echoed back with one hundred and seventy-three enlistments, besides the incurring of a debt of twenty thousand dollars. Upon memorial tablets in Academy Hall are inscribed the names of twenty-seven Dudley heroes who sacrificed their lives upon fields of battle, in prisons and impaired health, in defense of that heritage of right, freedom and unity established and handed down to them by their fathers.

The early settlers experienced no very great annoyances at the hands of their aboriginal neighbors. These had been visited in 1673 by the Rev. John Eliot, and again the following year; the object, as stated by Gookin, was to travel amongst them, confirm their souls in the Christian religion, to settle teachers, and establish civil government among them, as in other praying towns. During this visit a warrant or order was published empowering the constable, "Black James," "to suppress drunkenness, Sabbath-breaking, especially pow-wow and idolatry." Their first teacher was one Sampson, who strove diligently to civilize and elevate his native brethren, and half a century later the swarthy descendants of his charges donate the land upon which is built the first meeting-house erected in the town of Dudley, conditioned with a right for them to occupy convenient seats in the same.

The soil in the valleys of the French and Quinebaug Rivers is generally of a porous nature, and requires frequent tillage and a liberal application of fertilizers to produce good crops; but as the centre of

<sup>1</sup> This receipt was signed by the last six.

the town is approached the subsoil becomes more and more of an argillaceous nature, yielding finer crops with much less labor. As a whole, this township is regarded as a region charmingly interspersed with handsome hills, verdant valleys, rivulets, fine forests and beautiful ponds. A ridge of gneiss of excellent quality, commencing at a point a short distance from the French River, extends in a northwesterly direction in an almost unbroken line, and enters the town of Charlton on its southern boundary, and is quarried for building and street-curbng purposes.

Owing to the uniformly good yields of grass, grain and vegetables which this locality afforded, population increased rapidly until the beginning of the Revolution, when it remained about stationary until the establishment of manufacturing industries in 1812.

During this decade—1810 to 1820—population increased thirty-two per cent., notwithstanding that a considerable portion of its western border was set off to form the town of Southbridge, 1816. During the next decade the increase equaled thirty-four per cent., its inhabitants numbering 2155. During the next decade, in the year 1832, all its territory east of the French River was incorporated as part of the town of Webster. By this act of the Legislature the town of Dudley lost thirty-seven per cent. of its population and the most valuable part of its productive resources, and received a check from which it did not recover till 1870. Its population, according to the census of 1885, is 2742. Its agricultural productions aggregate a value of \$155,395. Among the three hundred and forty-eight cities and towns in this Commonwealth, it ranks 130 in point of population, and 115 for agriculture, while for textile productions its rank is 22. In all manufacturing industries 82.

Though a majority of the people are engaged in mechanical pursuits, agriculture has not been neglected, and as a consequence Dudley contains many beautiful farm homesteads. An active Farmers' Club was established several years ago, which during its existence afforded its members many social and pecuniary advantages. Its principal feature consisted in the reading of original essays upon agricultural and allied topics, following by general discussions supplemented by music, readings, etc. This organization the past year (1888) merged into a subordinate grange of the Patrons of Husbandry, and is in a very prosperous condition, with a membership of seventy-five.

Dudley ruralists are readers, and upon the tables of many a farm home may be found the leading periodicals of the day. Lyceums and district libraries have been established, and in all directions efforts are made to keep step with the march of civilization.

Dudley Hill, before the introduction of railroads, was the centre of trade for all surrounding villages, and before the building of the Norwich and Worces-

ter line a large business was developed here. This line located its depot on the east side of the river in Webster, which side possessed topographical advantages superior to those of the west side. With an increase of population, brought about by the introduction of the shoe manufacturing industry and the enlargement of the mills in that section, the centre of trade has changed.

Owing to this fact, and that there has always existed the closest harmony and feelings of good fellowship between the citizens of Dudley and Webster in this direction, Dudley has developed nothing above the village store. Indeed, outside their corporate affairs, both towns may be regarded as one community. Many of their citizens worship before the same altar; citizens of one town are owners of real estate in the other; church and bank officers are chosen without regard as to residence; members of the Grand Army, Sons of Veterans, literary, benevolent, temperance, Masonic and Odd-Fellow confraternities meet and labor in perfect concord, unbiased even in thought by territorial considerations. The owner of the largest woolen manufacturing establishment in town resides across the river, and one corporation—the Slater Woolen Co.—has gone so far as to span the river; and, under cover of its roof, one may enter upon the Dudley side, and, passing along amid the hum of busy machinery, leave it to step upon Webster soil.

Ample provision is annually made for the support of public schools, four-tenths or nearly one-half the annual appropriations being devoted to this purpose and various means adopted to secure to them the most advanced methods of public school instruction. By a wise provision, at a cost of twelve thousand dollars, and an annual payment of one thousand dollars to the trustees of Nichols Academy, this town is entitled to all the advantages this, the best equipped institution of its kind in the country, affords as a preparatory school. Amasa Nichols was its founder. He erected the first structure in 1815 entirely at his own expense at a cost of ten thousand dollars. Unfortunately, his first building was burned when nearly completed, April 11, 1816. With a perseverance worthy of much praise he proceeded with the work of rebuilding and in the latter part of the year 1818 opened the school. Soon after it was incorporated as a regular academy, managed by a board of fifteen trustees, viz.: Esquires Amasa Nichols, Jonathan Davis, John Spurr, Isaiah Rider, John Kettell, Rev. Thos. Jones, Rev. Paul Dean, Dr. Daniel Lamb, Benj. Russell, John Brown, Luther Ammidown, Benj. Gleason, Rev. Hosea Ballou, Rev. Edward Turner, Dr. Abraham R. Thompson.

In 1825 the Legislature donated to the academy half a township of Maine wild lands, which the trustees sold for two thousand five hundred dollars and received by individual subscriptions one thousand seven hundred and fifty dollars more.

Mr. Nichols founded this school with the view of making it a college for the use of the Universalists, and when, in 1823, the Hon. Geo. H. Tufts and Col. William Hancock, Trinitarian Congregationalists, were elected to the board of trustees, Mr. Nichols immediately resigned.

The school now became non-sectarian. Col. Hancock later in life gave to the institution six thousand dollars, known as the Hancock Fund, and in a letter to a friend expressed the "hope that others hereafter may do better." Joseph Congdon, at his decease, in 1883 bequeathed two thousand dollars.

But Hezekiah Conant, of the Conant Thread Company, Pawtucket, R. I., born in Dudley, July 28th, 1827, an alumnus of Nichols Academy, has been its most munificent benefactor, surpassing in his gifts the most sanguine expectations of its past or present friends. The three brick buildings and their equipments now occupied by the school, with the extensive improvements of the grounds, have all been completed at his expense since 1880.

The Academy School building of Gothic architecture is believed to be unsurpassed in convenience, and contains the large and pleasant recitation rooms, rooms for apparatus, and Academy Hall, capable of seating five hundred persons.

The "Conant Library and Observatory" contains the library of over two thousand volumes, the reading-room, the instruments of the United States Signal Service—made by Casella, of London, and Draper Company, of New York—the telegraph office and the tower for the telescope. The six and a half inch aperture reflecting telescope, equatorially mounted, was imported expressly for this institution.

James Coates, of Paisley, Scotland, has presented a celestial and terrestrial telescope of four and a half inch aperture, made by A. Clark & Son, of Cambridge, Mass.

A right ascension clock, designed by Mr. Conant and constructed by E. Howard & Co., of Boston, furnishes the standard and the sidereal time, as well as the exact right ascension of the sun for any instant. It has attracted much attention from experts, and one who has mastered its uses may be considered a practical astronomer. It is a duplex, differential instrument—duplex, because it is composed of two separate independent clock movements, each of which will run of itself, as it has a weight and pendulum of its own, whether its fellow is in motion or not; it is differential, because the two movements are so connected to a third train, that a difference in their rates of speed induces motion in this third which records said difference second by second as fast as any is established.

The transit instrument and the chronographer, both made by Fauth & Co., of Washington, D. C., were placed in position July 4, 1888. The former is well adapted for extra meridian observations, and is located in latitude north  $42^{\circ} 02' 40.84''$ , longitude

west  $71^{\circ} 55' 53.78''$ . The observatory is the best equipped of any in New England outside of the colleges, and affords the fullest opportunity for practical work.

The boarding-house was first occupied in September, 1885, and contains rooms for the principal, assistants and forty students, and is fitted and furnished throughout in the best manner.

By the provision of Mr. Conant the number of instructors was increased in 1886 and the courses of study extended, so as to thoroughly prepare students for the best colleges and technical schools, and instruction is successfully given in mechanical and free-hand drawing, practical surveying, astronomy and experimental chemistry.

The alumni hold annual meetings of great interest to the public, having a special address, poem, dinner and graduating-class exercises, with tree-planting and distribution of diplomas.

Since the act of incorporation the trustees have elected the following: *Presidents*—Gen. Jonathan Davis, Rev. Abiel Williams, Rev. Joshua Bates, D.D., Col. John Eddy, Rev. Henry Pratt, O. F. Chase, Esq., James J. Robinson, Esq., Judge Clark Jillson; *Secretaries*—Amasa Nichols, Esq., Rev. Abiel Williams, Hon. Geo. A. Tufts, Col. Wm. Hancock, Lemuel Healy, Esq., Daniel Dwight, Esq.; *Preceptors*—Solomon L. Wilds, 1819-22; Isaac Webb, 1822-24; Wm. H. Rockwell, 1824-26; H. L. Street, 1826-28; Wm. G. Learned, 1828-29; Sanford Lawton, 1829-32; Wm. S. Potter, 1832-33; Darius Ayres, 1833-34; Benj. Diefendorf, 1834-36; John Bowers, 1836-37; Oscar Fisher, 1837-39; Henry C. Morse, 1839-40; Elisha W. Cook, 1840-42; Henry C. Morse, 1842-44; Sam'l W. Bates, 1844-46; Alden Southworth, 1846-49; Alvin H. Washburn, 1849-51; Wm. W. Birchard, 1851-52; Alvin H. Washburn, 1852; J. H. Almy, 1852-53; James A. Clark, 1853-54; Alden Southworth, 1854-56; Ogden Hall, 1856-57; Monroe Nichols, 1857-62; John T. Clark, 1862-66; Wm. H. Putnam, 1866-67; Francis C. Burnett, 1867-68; Isaiah Trufant, 1868-69 (A. L. Blane, W. G. E. Pope and H. F. Burt, 1869; Harold Wilder and A. H. Livermore, 1870); Leonard Morse, 1871-72; Marcellus Coggan, 1872-79; E. P. Barker, 1879-81; T. H. Dawson, 1881-83; Fred. Corbin, 1883-86; E. G. Clark, 1886-89.

The Congregational Church was organized in 1732, and in the first town-meeting held after the organization of the town provision was made for its support, and William Carter's house, now the residence of Deacon Daniel Dwight, appointed as the place to meet to hear the Gospel preached. The frame of the first meeting-house was raised October 23, 1734, upon land donated by the Indians for this and other public purposes.

The first settled minister was Rev. Perley Howe, of Killingly, Conn., ordained June 12, 1735; graduated at Harvard University, 1731. Charles Gleason was

ordained in 1744, and died here in May, 1790; he was from Brookline, Mass., and graduated at Harvard, 1738. Joshua Johnson installed December, 1790, was dismissed May, 1796. He came from Woodstock, Conn., and graduated at Yale, 1775. Abiel Williams, of Raynham, Mass., was ordained June 12, 1799, and dismissed March 16, 1831; graduated at Brown University, 1795. James H. Francis was his successor, and was ordained August 24, 1831, a graduate from Yale, 1827, and was from Wethersfield, Conn. Walter Follet was installed November 2, 1837, came from Williston, Vt.; graduated from Middlebury, 1825. Joshua Bates, D.D., installed March 22, 1843; died here January, 1854; a native of Cohasset, born March 20, 1776; admitted to the sophomore class in Harvard College, 1797, aged twenty-one; graduated in the autumn of 1800, and became assistant teacher in Phillips Academy, and commenced at the same time his theological studies under Rev. Jonathan French, where he continued two years. He was licensed to preach by the Andover Association in April, 1802, was invited soon after to preach at Dedham, and was installed there March 16, 1803. Hon. Fisher Ames was a parishioner in his society. He resigned this charge in 1818, and in March the same year became president of Middlebury College, Vt., and the same year was honored with the degree of D.D. from Yale College. After twenty-two years at the head of this college he resigned in 1840, aged sixty-four, and the following year held the office of chaplain in the United States Congress. Soon after he preached a short time at Portland, Me., and for two years at Northboro', Mass., and from thence came to Dudley. Dr. Bates' labors for the church in Dudley were attended with marked success. Through his efforts its debts were canceled and the society reorganized on a sure basis, and the renewed activity he aroused in the church endeared him to those seeking its best interests. While on a pastoral visit in December, 1853, he met with an accident to his carriage, and by his exertions took a severe cold, which brought on the disease that terminated his life January 14, 1854. The funeral sermon was preached by Rev. William B. Sprague, D.D., of Albany, from the text Isaiah liii. 1-2, which has since been published by the request of the church.

Rev. Dr. Bates was succeeded by Rev. Henry Pratt, who graduated at Williams College 1850 and East Windsor Seminary 1853, and continued in the pastoral charge till October, 1869, fifteen years. Since that time there has been no one settled. The following preachers have been engaged temporarily: Rev. F. E. M. Bacheller, one year; Rev. William H. Wolcott, from 1873 to 1880 (he was from Shoreham, Vt.); Rev. Edwin S. Tingley, 1882 to 1887; Rev. S. C. Kendall, 1887, and still remains.

The Baptist denomination formed an organization at an early period in the history of this town and labored under many difficulties through the power

granted by law to the "standing order," but as there are no records that services were ever held by this denomination within the present limits of the town we omit further mention.

After the organization of the Universalist Society at Oxford, in the year 1785, several persons from Dudley joined in attending and supporting that organization for many years. Not until the year 1829 was there a distinct organized society of this denomination within the limits of this town. Amasa Nichols, founder of Nichols Academy, was a zealous adherent to the tenets of Universalism, and when he erected the first academy structure had specially in view a place to hold meetings, and made in it a neat auditorium for this purpose. Mr. Nichols had hoped to make his church and school one, and insisted that none but Universalists should be elected as trustees of the academy, and when, in 1823, his wishes were disregarded he immediately resigned from the board and as secretary, and never afterwards seemed to take any interest in either church or school. The first step towards organization was by a petition signed by Samuel C. Butler, Tyler Simpson, Rowland Perry and thirty-seven others, directed to one of the justices of Dudley, who issued his warrant calling the meeting at the house of John Congdon, Jr., May 9, 1829, when the petitioners were legally organized as the "First Universalist Society of Dudley." Meetings were held mainly in Academy Hall till 1833, when the society joined with the Methodists and erected a Union Meeting-house, which was dedicated April 30, 1834. The condition of the union was that each party should hold services upon alternate Sundays. This mode of conducting religious affairs did not prove satisfactory to either party, and the following year the Universalists bought out the interest of their Methodist friends and held continuous services till near the time the house was sold to the trustees of Nichols Academy.

The preachers were: Rev. Gilman Noyes (1829), four years; Rev. John Boyden, Jr., five years; Rev. Joshua Britton, two years; Rev. William H. Griswold, died here March 8, 1844, two years; Rev. Joseph O. Skinner, one year; Rev. Samuel Brimblecome, one year; Rev. Albert Tyler, one year; Rev. Cyrus Bradley, three years; Rev. James H. Burnham, one year; Rev. Phineas Hersey, one year; Rev. William Bell, one year; Rev. Joseph Barbour, six years, who was the last settled preacher for this society. For a time alternate services with the Webster Society were had, and in 1867 the meeting-house was sold.

In the year 1823 Samuel Henderson, John McCausland and several others organized a Methodist Episcopal Society, and in June, 1829, their first church edifice was dedicated, located in the east part of the town (now Webster). In 1833, one year after the incorporation of Webster, a second building was erected about a mile farther east. The Methodists here then withdrew from the society and for a time

united with the Universalists, but in 1845 built a meeting-house and established preaching on Dudley Hill. Their preachers since 1843 have been: Nathaniel J. Merrill, one year; William B. Olds, two years; J. L. Hanaford, two years; David K. Merrill, one year; David Kilburn, two years; William B. Olds, one year; William R. Stone, two years; Nathan A. Soule, one year; Jonathan L. Estey, one year; Erastus B. Morgan, six months; Daniel Dorchester, one year and six months; Daniel Atkins, two years; Thomas J. Abbott, two years; M. Emory Waight, two years; Moses P. Webster, one year; Thomas B. Treadwell, two years; Thomas Powers, six months; Samuel F. Cushman, four months; William B. Lacount, two years; John Noon, two years; C. Deming, one year; F. M. Miller, two years; William B. Lacount, one year; G. W. H. Clark, one year; Lewis Dwight, one year; John Lewis, one year; Charles E. Davis, one year.

For a few years past regular preaching has not been sustained. Prayer-meetings are held tri-weekly, in which much interest is manifested. Rev. Mr. Stratton, of the Oxford Church, has occupied the pulpit occasionally.

Roman Catholics, though quite numerous in the eastern section of the town, have not to the present time built a church of their own within the limits of Dudley. In 1853 they joined with the Catholics of Webster, and built a church in that town with a seating capacity of eight hundred, since which time this denomination has made steady growth, and now owns three churches, with a seating capacity of twenty-seven hundred, in charge of three parish priests, with the aid of two assistants.

The most important and extensive manufacturing establishments are the Stevens Linen Works, which occupy the site of the Merino Wool Factory, incorporated February 13, 1812. The incorporators of the original company were Learned Corbin, Jephtha Bacon, Aaron Tufts, Phineas Bemis and William Learned. In 1817 it was purchased by Messrs. Joseph Schofield, Nathaniel Lyon, Chester Mann and John Mallalieu. During the time from 1825 to 1837, Major John Brown and Samuel H. Babcock, of Boston, were interested, the latter as principal capitalist. In 1846 Mr. Henry H. Stevens, of North Andover, Mass., bought the property. The first lot of flax machinery was received in May, 1846, and Mr. Stevens began the manufacture of crash and burlaps from American-grown flax. In 1855 he commenced a general improvement of the property, building dams, new water-wheels, etc., and in 1862-65 erected the fine building which now constitutes the main mill. It is built of blocks of stone, five stories high, with an attic, each story being sixteen feet high. It is 207 feet long, by 70 wide, with an eastern extension 83 feet by 70, and an east wing 210 by 40; a west one, 80 by 24 feet, containing consultation and other rooms for specific purposes, besides counting-room. By much

native energy and perseverance Mr. Stevens built up a large business in a hitherto unoccupied field, and the concern is to-day much the largest in the country devoted exclusively to the manufacture of crash. The act of incorporation was passed in 1867, and Mr. David Nevins, Sr., was the first president and largest stockholder. In January, 1877, Mr. Stevens retired. The present organization is Mr. M. T. Stevens, of North Andover, president; Henry S. Shaw, treasurer, and E. P. Morton, agent. Capital stock, \$350,000. Three hundred and fifty looms, with a capacity of six million yards of crash per year.

A short distance below, upon the French River, are the mills of Messrs. John Chase & Sons, near the site originally occupied by the Dudley Cotton Manufacturing Company, incorporated February 8, 1816. This plant was destroyed by fire June 11, 1855. John Chase, Esq., of Burrillville, R. I., bought the privilege in 1857, and in 1860, with his sons, Oscar F. and Frederic T., as associates, laid the foundation of the present extensive works, and commenced the manufacture of cassimeres. The business has continued with marked success, and is now conducted by the youngest son, Frederic T., as chief proprietor, who has greatly increased its capacity, and built up a neat and pretty village, which bears his name. Additions to the mill were made in 1870, '78 and '82. Sixteen sets of cards are now in operation, consuming three thousand pounds of scoured wool per day, and, with one hundred and six looms, about seventeen thousand yards light and heavy-weight goods are produced per week.

On the same stream in the southeast part of the town is Perryville, named in honor of the Perry family, which has held its possessions upwards of a century. Mr. Josiah Perry purchased land and settled here in 1775. In the year 1825 his sons, Joseph H. and Richard Perry, and two associates, built a log dam, erected suitable buildings and machinery and commenced the manufacture of satinets. In 1832 Richard withdrew and built a carding and spinning-mill upon a side privilege a short distance away, ever since known as the Perry Stocking-Yarn Factory, and is now used for the manufacture of yarns for rubber-shoe linings. The business is carried on by a grandson, Lemuel Perry, and the present year the plant was increased to double its former capacity. Both of these establishments are now owned by Josiah, a son of Joseph H. During the past few years the business has been considerably extended, and modern and improved machinery for making a higher class of goods has been introduced. The works since they were established have been developed eight-fold.

In the year 1816 Hon. Aaron Tufts, with John R. Jewett, Mayo Pratt, Harvey Conant and William Robinson, joint proprietors, erected a mill for the manufacture of woollens in the north part of the town, upon a privilege supplied from Gore and Baker

*Joseph H. Perry*

Ponds. Some person fond of a joke affixed the horns of a ram in a conspicuous place upon the building, and, though the horns soon disappeared, this part of the town has ever since borne the name of Ram's Horn. In 1843, upon the death of Mr. Tufts, Mr. Jewett succeeded to the proprietorship, running the mill till 1864, when it was sold to a Mr. Pond, of Worcester, and subsequently to Lovell Baker, of the same city. In 1868 it was destroyed by fire, and to the present time has not been rebuilt.

In 1887 the West Dudley Co-operative Creamery was established, with a capacity for making two thousand pounds of butter per week. It has proved a great help to the dairymen of this vicinity, and its product in half-pound prints is nearly all sent to first-class hotels in the city of Boston.

West Dudley is on the Quinebaug River, and is a station on the Southbridge Branch of the New York and New England Railroad; has a post-office and express-office. In 1833 Charles Vinton built a grist and saw-mill here. Six years later, Mr. Vinton having deceased, the property was sold to Allen Brown, who erected additional buildings and manufactured Kentucky jeans until burned out in 1850. In 1864 the privilege was bought by Messrs. Gleason and Weld, who built a saw and grist-mill, and the following year a paper-mill, and continued the manufacture until the time of Mr. Gleason's death, in 1878, when his interest was bought by his partner, C. W. Weld. The grist-mill was burned in 1880, and rebuilt the same year. In 1881 Mr. Weld built a new paper-mill, and soon after sold the same, with half the water-power, to William J. Warren, of Norfolk, Mass. August 21, 1885, this mill was burnt down and rebuilt the following winter. The varieties manufactured are manilla wrapping, mill wrappers, carpet lining and building papers. Average amount of business done, \$35,000 per year.

Below on this river is another privilege, developed in 1872 by Mr. Eben S. Stevens, son of Mr. H. H. Stevens, who built the large linen-mill in the east part of the town. Mr. Stevens is engaged in the manufacture of jute goods, and under his personal supervision his business has made steady growth and now gives employment to about one hundred hands. It is near the station of Quinebaug, on the same railroad as West Dudley.

BIOGRAPHICAL.

JOSEPH H. PERRY.

Joseph H. Perry, the founder of the manufacturing interest in Perryville, Dudley, Mass., was born September 12, 1789, in Thompson, Ct., on the farm of his father, which lay partly in Thompson and partly in Dudley. He was the youngest son of Josiah Perry, a native of Watertown, Mass., who removed thence in early manhood to Foxboro', Mass., and removed about the year 1775 to the farm just mentioned.

Joseph H. remained in Dudley engaged in farm labor till his twenty-seventh year. At that time, having decided to change his occupation, he went to Uxbridge, Mass., and invested a part of his savings in the stock of the Rivulet Manufacturing Company. He continued to work in the mill until the closing up of its operations, losing his investment, but gaining a knowledge of the details of the woolen manufacture. While at Uxbridge, on the 17th of February, 1820, Mr. Perry married Mary, daughter of Samuel Taft, for many years a prominent resident of the town. Seven children were born to them, four of whom are now living, one dying in infancy. The eldest son, George W., died in the late War of the Rebellion, and Charles H. was thrown from a sleigh and fatally injured. On the closing of the Rivulet Mill, Mr. Perry went to Woonsocket, R. I., where he was employed for about one year in one of the mills there.

In the fall of 1825 he returned to his native place, and, in partnership with Danford Upham, Abner Wyman and Richard Perry, purchased from his older brother, Eliphaz (who now owned the original home-farm), a few acres of land, including a water privilege. He then built a dam and erected a mill and com-

<sup>3</sup> The present town clerk.

menced the manufacture of satinets, under the name of Joseph H. Perry & Co. In a few years the other partners had sold their interest to him and Charles Carpenter, he owning two-thirds and Charles Carpenter one-third. There was, at the outset, only one set of machinery; it was eventually increased to four sets. The mill was burned in 1857, and rebuilt the same year. Joseph H. Perry died September 5, 1864; he then lacked only seven days of being seventy-four years of age, but had maintained remarkably his physical and mental vigor, continuing his active interest in and personal management of the business, being at the mill on the day of his death, which was caused by a sudden attack of apoplexy. He was a man of much business ability, of sound judgment, deliberate and careful in the consideration of his plans, but persistent in carrying them out. Of few words, when they were spoken it was well understood that he meant just what he said. He took a kindly interest in his employes and in the people of the vicinity, being known familiarly among them as Uncle Hartshorn, and his death was deeply mourned by them and by the business community in which he had been so long and favorably known. His wife survived him twenty-one years, reaching the advanced age of ninety-one years. On his death his two sons, Charles H. and Josiah, bought out the other heirs and the junior partner, Charles Carpenter, continuing the business under the name of Joseph H. Perry's Sons. In a short time they changed the style of goods from satinets to cassimeres and suitings, which continued till the death of Charles, which occurred suddenly, January 31, 1868. Josiah then became sole proprietor by purchasing the interest of his brother's heirs. The business has since been conducted under the name of Josiah Perry. He has increased its capacity till, at the present time, he is running eight sets of cassimere machinery.

#### H. CONANT.

The subject of this sketch was born in Dudley, Mass., on the 28th of July, 1827. He was the second son of Harvey and Dolly (Healy) Conant. His ancestors were among the earliest settlers of that town, his great-grandfather on both sides being residents of the town as early as 1737. His paternal ancestors were farmers and millers located in the north part of the town, near the Charlton line. Hervey Conant, his father, was one of the incorporators and partners of the "Tufts Woolen Manufacturing Company," and at one time was the owner of the village grocery, which stood at the junction of the Dudley and Charlton and Oxford and Southbridge roads. This being before the days of railroads, it was quite a commercial point, and did at times a thriving business. But in these latter days that village has become a neglected locality, and the factory, with dye-house and adjacent buildings, only show some straggling ruins which indicate that a large busy factory ever had existence

there. What few buildings are still standing are decayed beyond the power of being ever repaired to make habitable again. The house where Hezekiah was born was entirely demolished some years ago, and the foundation and cellar walls only are the silent witnesses that the house had an existence. But at the time he was some six years of age he attended school at the old stone school-house, which occupied a place about a mile towards the south, on the road to Dudley Centre, the old foundations still being visible. Being blessed with a quick and retentive memory, he mastered the elements of reading and geography and arithmetic so quickly that he was the pet of the teachers, and his mother thought he might become a minister if he lived. Among other encouragements, they noticed that the peculiar curl of the hair at the top of his head showed them he had three crowns, which was a sure sign that he would eat his bread in three different kingdoms.

His father, having sold out his interests at the Tufts village, removed to Webster, Mass., where he resided four years, from 1835 to 1839, but in the latter year removed to Dudley again and occupied the farm formerly owned by Major Lemuel Healy, his maternal grandfather. Young Conant, having arrived at an age when he began to be able to do light work about the farm, was trained to be of use, and worked in the field at such occupations as suited his strength, and in the winter months he attended the common school, and later had the advantage of several terms at the Nichols Academy.

In the month of May, 1845, he, by much importunity, persuaded his father to let him accept a position in a Worcester printing-office as a roller-boy in reply to an advertisement. His mother had died some years previous, and he disliked the monotonous life of agriculture, and wanted to get into some trade where he could use his thought and skill, which he believed to be superior to his not very strong muscular system. He served as apprentice for about two years in the office of the *Worcester County Gazette*, published by Estey & Evans, when the concern failed, and he then obtained employment at the office of the *National Aegis*, which was owned at the time by T. W. & J. Butterfield, but soon passed into the hands of Mr. S. V. Hicox, of New York, with Edward Winslow Lincoln as editor-in-chief. While with Estey & Evans the *Daily Transcript* was started by Julius L. Clarke, and Hezekiah had the honor of rolling off at the backside of the old Washington hand-press the first edition of this first daily of the city of Worcester. He remembers that the old Quaker, Hon. John Milton Earle, was the editor of the *Massachusetts Spy*; Mr. John S. C. Knowlton edited the *Palladium*; Mr. Goodrich run the *Worcester County Cataract*; Thomas Drew was a young man just fledging as a reporter in the *Spy* office; and Mr. Spooner owned and run a power-press, turned sometimes by horse-power and sometimes an Irishman

*H. Conant.*

took the crank. Henry J. Howland carried on the business of book and job printing, and old Mr. Carlisle run a press (hand) that had a patent roller-boy. It was believed at that time that if the very best press-work was wanted, there was nothing that could exceed the work turned off the hand-press.

Some time during the year 1848 he left the printing-office and entered the employ of Woodburn Light & Co., to learn the machinist's business. This was much more to his taste and made the hours of his work much more regular, and the calculations of gears and screws had a fascination for him. In the year 1850 he had saved enough of his earnings to give himself a year's schooling at Nichols Academy, and in 1851 he went into the shop again, this time at the locomotive-shop of the Union Works at South Boston, which were owned then by Mr. Seth Wilmarth, afterwards chief at the Charlestown Navy Yard. In the fall of 1852 he had drifted to Hartford, Conn., where he found employment at Lincoln's Machine Shop, and he worked at Roberts & Son's a short time, where he became acquainted with Christian Sharps, Esq., the inventor of the Sharps rifle. He was employed by him to make some drawings for machinery for making projectiles, etc. Sharps leaving Hartford and going to Philadelphia, left him unemployed again, when he entered Colt's establishment as a tool-maker and was employed in constructing special tools to make the iron-work for the large armory that was afterwards built down on Colt's meadows, its present site. The following year he left the shop and applied himself to the business of drawing and constructing special machinery as parties in need applied to him. He contrived and constructed some very useful apparatus for Williams Brothers, at South Glastonbury, the celebrated soap manufacturers, invented and patented an improvement in the Sharps rifle known as the "gas check." About this time he met with severe affliction in the death of his wife, and the breaking up of his home. In the year 1856 he was at Slater's establishment at Webster, Mass., where he contrived and built a sewing-machine for sewing the selvages on the pieces of goods made in the woolen mills, and which was in operation at last accounts. Next he was employed by Mr. Slater to construct some thread-dressing machines which dressed the goods in the skein; but although the machines were all right, the later style of dressing it from the bobbin in a single web superseded the skein process. About the year 1857 he commenced the construction of a machine to automatically wind sewing thread of two hundred yards length upon spools, and was very successful. He sold one-half of it to the Willimantic Linen Co., and entered the service of that company for a term of three years under a written contract. He commenced this new arrangement on February 1, 1859, and remained with them nine years.

During this time he made several new inventions, the most important of which was the "ticketing

machine," which is now used to affix the small labels on each end of the spools of thread, which it accomplishes at the rate of one hundred spools per minute. He superintended the establishment for three years, when he resigned, terminating his connection on February 1, 1868. In the year 1864 he visited Europe and examined many of the factories in the Lancashire district and in Scotland in the cities of Paisley and Glasgow. His expenses were borne by the Willimantic Linen Company, and he believes that a substantial benefit accrued to that company from information obtained on this trip.

Immediately on the termination of his connection at Willimantic he went to Pawtucket, and attached himself to the shop of Messrs. Fales & Jenks, and proceeded to apply himself to making improvements in machinery for spinning cotton. In the fall of the same year, however, it was proposed to start another thread-making concern, and enough capital was immediately subscribed to make up the sum of thirty thousand dollars, and a charter was asked and obtained of the State Legislature. A small factory was built of wood, one hundred feet long by forty feet wide, and two stories high. This was the No. 1 Mill of the Conant Thread Company. Mr. Conant's acquaintance with Lancashire spinners enabled him to buy cotton yarns readily, and twisting and winding were started; but the way being opened to consolidate with Messrs. J. & P. Coates, of Paisley, Scotland, the capital stock of the company was gradually raised to a large amount, and one building after another of colossal size was erected till the plant consists of four enormous brick structures, fitted with the best machinery and operated by Corliss engines amounting to nearly four thousand horse-power, and representing an outlay of nearly four millions of dollars, and giving direct employment to nearly three thousand workers. Mr. Conant's time and attention is devoted at present to the management of these works, and he has prospered both for himself and his associates; and yet he considers himself a working-man, and feels a satisfaction in doing what he can to help others in life, and believes in doing good. In accordance with this impulse he has rebuilt and built additional buildings for the Nichols Academy in his native town, and enlarged the Common and regraded it, and laid walks and assisted the people in fixing up the town in various ways. He has a large number of friends, and no man thinks of friends or values them more highly than he. He declines political office, but he has accepted the position of president of the Pawtucket Institution for Savings, and sits as a director at the several banks of that city. He is a member of the Congregational Church of Pawtucket, and practices what he believes. He advocates that condition of political economy that rewards the worker with good wages, as he believes that working people are the largest class in this country, and they have the first claim on the attention of the legislators in

Congress. He believes that their interests should be protected, not only as consumers, but as producers. He has visited Europe several times, and on his last trip he took his family with him and made the tour of the Continent, and he has seen the condition of factory life in Mulhouse, in the district of Alsace-Lorraine, and in the Lancashire district of England. He thinks the accident of the war tariff and the resumption of specie payments had as much to do with the permanent establishment of good wages in the United States as any other circumstance, and recommends the voters who have any regard to the present elevated conditions of working people to not imperil this advantage with experimental legislation.

## CHAPTER CLXIX.

### ROYALSTON.

BY WILLIAM T. DAVIS.

ROYALSTON, until its incorporation, was called Royalshire. The lands composing it were obtained partly by grants from the Provincial Court, and partly by purchase at sales held under the court's authority. Before the year 1652 four grants, comprising in all twenty-three hundred acres, had been made—one to Joseph Priest, one to Thomas Hapgood, one to Pierpont and others, and a fourth to Benoni Moore, Joseph Pattey and Robert Cooper. The grants to Priest and Pierpont were probably made without any special reason. That to Hapgood was made in 1742, "in consideration of services in the war with the eastern Indians, and his sufferings by reason of wounds received from them, whereby in his advanced age he was disabled from labor for the support of himself and family." The fourth grant was made December 15, 1737, and included a territory about four hundred and eighty rods long, and two hundred rods wide. It is stated in the Royalston memorial that Mr. Benoni Peck satisfied himself that this grant was made in consideration of services rendered by the grantees, Benoni Moore, Joseph Pattey and Robert Cooper, "in burying the bleached bones of certain soldiers who, led by Capt. Beers, were marching from the river below to the assistance of Northfield, but fell into an ambuscade and were slaughtered by the Indians." The Pierpont grant was in the northeasterly part of the town, the Priest grant next to it on the east, the Hapgood grant still farther east, next to the Winchendon line, and the fourth grant on the easterly line of what is now the town of Warwick.

The purchased lands comprised twenty-eight thousand three hundred and fifty-seven acres, and were sold by order of the General Court, December 21, 1752, under the direction of a committee composed of John Chandler and James Minor, of the Council, and

Thomas Hubbard, the Speaker, and John Tyng and William Lawrence, of the House of Representatives. The total number of acres constituting Royalshire was thirty thousand six hundred and fifty-seven, and this was the number at the time of the incorporation of the town. Subsequent changes in the boundary lines of the town have reduced the territory of Royalston to about two thousand six hundred acres.

The names of the purchasers were Samuel Watts, Thomas Hubbard, Isaac Freeman, Joseph Richards, Isaac Royal, Caleb Dana, James Otis, Joseph Wilder, Jr., and John Chandler, Jr. Most of these were prominent men. Thomas Hubbard was the Speaker of the House of Representatives. Isaac Royal gave his name to the town. James Otis, it is enough to say, was the James Otis of the Revolution, and John Chandler, Jr., was judge of Probate of Worcester County. Isaac Freeman and Joseph Richards seem to have disposed of their interest to Thomas Hancock and John Erving, the former of whom died in 1764, leaving his heir, John Hancock, one of the proprietors, and the latter of whom is remembered by the Massachusetts town bearing his name.

Isaac Royal was born in Medford, and, besides giving his name to the town and twenty-five pounds sterling towards building its meeting-house, also gave two thousand acres of land, most of which was in Royalston, to Harvard College, to found the law professorship which bears his name. He was a member of the General Court of the Province, and twenty-two years a member of the Council. In 1774 he was appointed one of the mandamus councilors, but was one of the twenty-six not sworn in. He adhered to the King at the breaking out of the Revolution, and went to England in 1776. In 1778 he was proscribed and banished, and died in England in October, 1781.

John Chandler, Jr., another of the proprietors, was a loyalist. He was born in New London, in 1720, and at the age of eleven removed with his father to Worcester. He was a colonel in the militia, a soldier in the French War, and afterwards sheriff, judge and treasurer of the county. In 1774 he was compelled to retire to Boston, and in 1776 went with the British army to Halifax. In 1778 he was proscribed and banished, and his estate, valued at £36,190 1s., was confiscated. He died in London in 1800, and was buried at Islington. His son, Rufus Chandler, also a loyalist, died in London, in 1823, and was buried by the side of his father. Four other sons, Clark, Gardner, Nathaniel and William, an uncle Thomas and a brother Gardner were more or less committed also to the loyal cause.

The proprietors held their meetings in Boston, at the Bunch of Grapes Tavern, at the corner of State and Kilby Streets, a part of whose sign, a gilded bunch of grapes, is or has recently been in the temporary possession of the Bostonian Society, in Boston. At the first meeting, in 1753, it was decided to name the territory Royal-shire, and at that time Isaac Royal

promised the gift for a meeting-house, to which reference has been made. At this meeting the land was laid out into sixty lots for settlers, and three others for the minister, for the support of public worship and for the support of a school. In 1765, however, three hundred and thirty-one acres were set apart for the first minister, four hundred and twenty-four acres for the ministry, and four hundred and twenty acres for the school. The proprietors' meetings were held until 1787, at which date it is presumed that the lands had all been disposed of and become the property of individual holders. The sixty settlers each received from the proprietors the free gift of one hundred acres, with the condition that a clergyman should be settled, six acres of ground be cleared and a house built. In 1764 a meeting-house was built, and in 1765 such conditions existed as rendered the formation of a town desirable. In response to a petition presented to the General Court the following act of incorporation was passed February 19, 1765:

WHEREAS, the proprietors of the land lying north of Athol, within the county of Worcester, known by the name of Royalshire, have petitioned this Court that, for the reasons mentioned, said land may be incorporated into a town and vested with the powers and authority belonging to other towns, for the encouragement of said settlement.

Be it enacted by the Governor, Council and House of Representatives—

SECT. 1. That said tract of land bounded and described as follows, viz., beginning at a pillar of stones on the province line, the northwest corner, and from thence running south by the east line of Warwick five miles and two hundred and ninety-three rods to a pillar of stones the southwest corner; and from thence running east with the north line of Athol five miles and two hundred and sixty-five rods to a red oak and heap of stones, the northeast corner of Athol; and from thence south by the east line of Athol one mile and one hundred and ninety rods to a stake and stones, a corner of Templeton; and from thence east three degrees south one mile and eighty-six rods by said Templeton to the southwest corner; and from thence north twelve degrees east five miles and eighty rods on the west line of Winchendon to a heap of stones, the northwest corner of said Winchendon; and thence east twelve degrees south six miles and sixty rods by the north line of said Winchendon to the northeast corner thereof; and from thence north twelve degrees east by the west line of Dorchester Canada two hundred and ninety-five rods to the province north bounds; and from thence by the province line fourteen miles and two hundred and eighty-five rods to the corner first-mentioned, be and hereby is erected into a town by the name of Royalston; and the inhabitants thereof shall have and enjoy all such immunities and privileges as other towns in this province have and do by law enjoy.

And be it further enacted—

SECT. 2. That Joshua Willard, Esq., be, and hereby is, empowered to issue his warrant to some principal inhabitant of said town of Royalston, requiring him, in his majesty's name, to warn and notify the said inhabitants qualified to vote in town affairs, to meet together at such time and place in said town as shall be appointed in said warrant to choose such officers as the law directs, and may be necessary to manage the affairs of said town; and the inhabitants so met shall be, and are hereby, empowered to choose officers accordingly.

And be it further enacted—

SECT. 3. That all those persons that have already agreed for to settle in said township, and have given bonds to perform the same, shall be accounted as part and parcel of said inhabitants, and be allowed to vote in their town-meetings in all town affairs, as fully as those who actually live upon their settlements in said town, and shall be accordingly taxed for the purposes aforesaid.

The first change in the boundary lines of Royalston occurred in 1780. At the time of the incorporation of the town of Winchendon, in 1764, the north-

ern boundary of that town was fixed at the province line; but it was subsequently discovered that the province line was one mile farther north than was supposed. A readjustment of the line consequently left a strip of territory one mile wide, extending along the whole length of the Winchendon line, unincorporated. The act incorporating the town of Royalston gave this territory to that town, and it received the name of the Royalston Leg. The inhabitants of this territory were not long satisfied with their allotment in the town of Royalston, and petitioned the General Court to be annexed to Winchendon. In compliance with their petition the following act was passed, June 17, 1780:

Whereas it appears that the inhabitants living in a strip of land belonging to Royalston in the county of Worcester, called Royalston Leg, about one mile wide, lying the whole length of the town of Winchendon, would be much accommodated by being set off from Royalston and annexed to the town of Winchendon,—

Be it therefore enacted by the Council and House of Representatives in General Court assembled and by the authority of the same;—

SECT. 1. That all that part of Royalston called Royalston Leg, containing by estimation about two thousand acres, beginning at the northwest corner of Winchendon, then running northwardly a parallel line with Winchendon west line about one mile to the province line so called; then eastwardly by the province line the length of the town of Winchendon, be and hereby is set off from Royalston and annexed to Winchendon; and the town of Winchendon is hereby extended so far north as the State line of New Hampshire and said land with the inhabitants living therein shall forever hereafter be considered as belonging to the town of Winchendon.

Provided nevertheless,—

SECT. 2. That the said inhabitants and non-residents shall pay all taxes which are already assessed and levied on the town of Royalston, anything in this act to the contrary notwithstanding.

Provided also,—

And be it further enacted by the authority aforesaid,

SECT. 3. That the amount of the estates contained on and in said tract of land and the polls thereon returned by the assessors of the town of Royalston in the valuation last taken as belonging to Royalston be deducted from the return of said assessors and added to the return made by the assessors of the town of Winchendon.

This act reduced the territory of Royalston about two thousand acres. Several thousand acres more were taken by the incorporation of the town of Orange, in 1783. Small additions were made in 1799, 1803 and 1837, so that, at the present time, the territory of Royalston contains about twenty-six thousand eight hundred and eighty-two acres.

The first meeting of the town was held May 7, 1765, at which John Fry was chosen clerk, Peter Woodbury, treasurer, and John Fry, Timothy Richardson and Benjamin Woodbury were chosen selectmen. Though a meeting-house had been built in 1764, the year before the incorporation of the town, no formal church had been organized and no minister had been settled. On the 13th of October, 1766, a church was gathered consisting of sixteen persons, and the pulpit continued to be supplied by occasional preachers, until October 19, 1768, when Rev. Joseph Lee was ordained. He was to receive, in addition to three hundred and thirty-one acres of land granted by the proprietors, four hundred pounds, old tenor, for a settlement, and forty-six pounds, thir-

teen shillings and four pence of lawful money per annum for three years, fifty-three pounds, six shillings and eight pence for the next three years, and sixty pounds annually afterwards. He was also to have thirty cords of wood drawn annually from his own land, without charge. Mr. Lee was born in Concord, May 12, 1752, and graduated at Harvard in 1765. His pastorate continued until his death, February 16, 1819. During his pastorate, in 1797, a new meeting-house was built to meet the increasing demands of the society.

On the day after the death of Mr. Lee, and while his remains lay waiting their burial, Rev. Ebenezer Perkins was ordained as his successor. Mr. Perkins was born in Topsfield, Essex County, July 4, 1794, and graduated at Dartmouth College. His pastorate terminated in 1847, but he continued a resident in Royalston until his death, which occurred November 28, 1861. Rev. Norman Hazen succeeded Mr. Perkins and was settled in June, 1847. In feeble health when settled, Mr. Hazen struggled against the inroads of disease in vain and died, after a five years' pastorate, in 1852. In 1851, during Mr. Hazen's pastorate, the meeting-house, erected in 1797, was burned, and was replaced by the present one. Rev. Ebenezer Bullard was installed September 2, 1852, and dismissed November 9, 1868. Rev. John P. Cushman followed November 30, 1870, and Rev. Wilbur Johnson May 16, 1874. The present pastor, Rev. Judson W. Shaw, was ordained June 1, 1887. His predecessor was Rev. Milton G. Pond.

When Rev. Mr. Lee was settled, in 1768, ten of the forty-two families in the town were Baptists, and organized a church in the year of his settlement. On or before 1770 it is presumed that they had built a house of worship, for in that year they settled their first pastor, Rev. Whitman Jacobs. His ministry continued until about the year 1788, and soon afterwards a new meeting-house was erected near the Warwick line. In 1847 the new building was removed about a mile to the eastward.

A second Congregational Church was organized in South Royalston, February 22, 1837, and in the same year a house of worship was erected. The first pastor of this church, Rev. Samuel H. Peckham, was installed December 13, 1838. The present pastor is Rev. E. J. Beach. A Methodist Society was also organized at South Royalston in 1842, and Rev. Pliny Wood was the first preacher. In 1847 a house of worship was built, and the society has enjoyed a career of satisfactory prosperity. At present the church has no settled pastor.

As in other New England towns, the establishment of educational privileges stood in Royalston next in order to those of a religious character. Though Massachusetts was a Province loyal to British rule, the seeds of popular education had been planted and were far advanced in growth, while in the mother country they had not yet found their way beneath the soil.

The growth of popular education, which in the early days of the Plymouth and Massachusetts Colonies had become the object of their people's most assiduous care, illustrates the fact that no particular era in American history, not even the days of the Revolution, can be fixed as the period of American Independence. From the original settlement of New England a new individuality existed on this side of the ocean, as distinct in habits of thought, in methods of living and in ideas of government, from the communities of the Old World, as the son is distinct from the father, and only needs to become of age to assert his freedom.

In the sale by the General Court of Royalston lands one-sixty-third part of the purchased territory was reserved for public schools. In addition to 420 acres of land thus reserved, Isaac Royal gave to the town 200 acres for school purposes. These lands have been sold from time to time, and the proceeds of sales have formed what is called the "Old School Fund," the income of which is annually credited to the School Department. Another school fund, called the "Bullock Fund," will be referred to hereafter in some statements concerning Hon. Rufus Bullock, its founder.

The first action on the part of the town concerning schools was taken in 1767, when it was voted to lease out the school land. In 1769 it was voted "to sell the school land for as much as it will sell for; the principal to be a fund for schools and the interest to be applied yearly to pay for schooling." In the same year the sum of three pounds in addition to the interest of the fund was raised "to hire schooling the present year." In 1769 Simeon Chamberlain was employed as teacher at nine shillings a week, and in 1770 Capt. John Fry taught five weeks for ten shillings a week. John Crawford, Hannah Richardson and Dr. Stephen Bacheller followed, and all before 1777. In those early days of the town the schools were kept in dwelling-houses and sometimes in barns, but in 1777 the town, while declining to build a school-house, gave liberty to a number of the inhabitants to build one near the meeting-house on land presumably belonging to the town. The first three teachers in this house were a Mr. Wood and Ammi Falkner and Ebenezer Pierce. In 1781 the town was divided into six school districts, which number, after the incorporation of the town of Orange, was reduced to five. In 1795 nine districts were formed, which, with slight variations, continued until 1820. In 1797 it was voted "to build school-houses in the several school districts; and, that equal justice may be rendered to individuals as near as possible, that the school-houses shall be built as near the centre of the districts as the situation of the inhabitants and the roads will admit, and that each district may agree on the spot." A committee was appointed to report the expense of building these houses, and to ascertain whether there were not buildings already erected in any of the districts which could be hired

for school uses. The committee, consisting of Jonathan Sibley, Benjamin Hutchinson and Peter Woodbury, reported February 2, 1797, recommending the erection of houses in the various districts at an estimated cost of two thousand and eighteen dollars. Most of these houses were to be "twenty-four feet by twenty and nine and a half feet stud, with square roof, six windows each, with fifteen seven by nine glass, the inside wall ceiled; overhead crowning and plastered, the seats round the walls on three sides and raised eight inches, and eighteen inches from the walls, with a good writing-table before them and a shelf for books beneath; seats before the tables; an entrance way at one end of the house six feet wide; two doors to enter the room, and the whole to be finished up in workman-like manner and the outside painted." On the 7th of May, 1798, the report was accepted and the sum of fifteen hundred dollars was appropriated for the work. This amount was found afterwards to be insufficient and a further sum of four hundred and fifty dollars was raised to meet the deficiency. At a later day three new districts were added, making twelve in all, and at that number they continued until the district system was abolished by law. There is no high school in the town, but the grammar and other schools are well supported and well managed.

Of these there are ten for the support of which, in the year ending February 24, 1888, the sum of \$2,409.54 was expended. In addition to this the sum of \$200 was expended for books and supplies. The income of the two School Funds amounted in the same year to \$432.70, all of which was applied to the support of schools. The old Fund, derived from the sales of land, amounts to \$1500, from which the income was \$90, and the Bullock Fund to \$5000, from which the income was \$342.70.

According to the report of the trustees of the Public Library, the number of volumes in February, 1888, was 1138. An annual appropriation is made by the town for its support.

In the War of the Revolution, which followed closely upon the incorporation of the town, the same patriotic spirit prevailed in Royalston which characterized the great majority of towns in the Province. In 1773 the people of the town were in communication with the people of Boston, and rendered them at least moral aid in their attitude of resistance to the aggressions of the Crown. When, in 1774, the General Court met in Salem, in violation of the orders of General Gage, and resolved itself into a Provincial Congress, Henry Bond was a member of that Congress from Royalston. When the Second Congress met at Cambridge and adjourned to Concord, Nahum Green represented the town in that memorable assembly. In 1776 a step was taken in Massachusetts towards the formation of a State Constitution. The people of Royalston voted in favor of making it one of the duties of the General Court of 1776 to frame such a Constitution. When the Constitution

as framed was submitted to the town in April, 1778, it was voted not to approve it. The Constitution as presented was then submitted to a committee for alteration and amendment, and, as reported back by the committee, was unanimously approved. The Constitution having failed, the people of Royalston, on the new question, whether a convention should be called for the purpose of framing one, voted in the affirmative, and Sylvanus Hemenway was chosen delegate, with John Fry as his substitute. The Constitution finally proposed by the convention was laid before the town May 25, 1780, but what action was taken the town records do not state. In 1779 a town-meeting was held "to hear the proceedings of the convention at Concord on account of settling prices of commodities bought and sold (within the State), and act on said affair as the town may think proper." At this meeting, held on the 16th of August, Henry Bond was chosen to attend the next session of the convention at Concord, and when the result of its deliberations was promulgated, John Fry, William Town, Lieutenant Chase, Henry Bond, Nathan Wheeler, Deacon Woodbury and Peletiah Metcalf were chosen a committee "to set prices on the sundry commodities bought and sold in town, agreeable to the instructions of the Convention."

Among the citizens of Royalston who rendered military service during the war, the following may be mentioned:

Nahum Green.	David Cook.
Col. Ebenezer Newel.	William Clement.
Major John Norton.	John Davis, Jr.
Capt. Jonathan Sibley.	Squier Davis.
Capt. Enoch Whitmore.	Sylvester Davis.
Lieut. Edward Holman.	John Ellis.
Lieut. Nathan Wheeler.	Joseph Emerson.
Lieut. Jonas Allen.	Ammi Falkner.
Lieut. James Work.	Jonathan Gale.
Lieut. Micah French.	Nathaniel Jacobs.
Timothy Armstrong.	Samuel Lewis.
Bezaleel Barton.	Benjamin Leathe.
Samuel Barton.	Isaac Nichols.
David Bullock.	Nathan B. Newton.
Nathan Bliss.	— Perham.
Ebenezer Burbank.	Eliphalet Richardson.
Samuel W. Bowker.	Abijah Richardson.
David Copeland.	Joel Stockwell.
Silas Cutting.	Benajah Woodbury.
Benjamin Clark.	Jonathan Wellington.
Rogers Chase.	Josiah Waite.
William Clement (2d).	Moses Walker.

Though the population of the town at the time of the war was only about seven hundred and fifty, it is known that many others were engaged in the service whose names would doubtless be found in the muster and pay-rolls in the archives of the State.

In Shays' Rebellion, which followed closely after the termination of the war, the sympathies of the people of Royalston were enlisted on the side of the insurgents, though they had too much respect for law and good order to afford them substantial aid in their efforts. The acts of violence and disorder which characterized the movement were soon condoned,

and in the distribution of political honors, after its suppression, even its most active supporters were not overlooked.

In the war with Great Britain, in 1812, no special interest was felt, and no patriotic enthusiasm excited. Its preliminary step—the embargo—was condemned by the people, and a committee, consisting of Joseph Esterbrook, Stephen Bacheller, Jr., John Norton, Isaac Metcalf and Rufus Bullock, were chosen to draft a petition to the General Court to take measures to redress the grievances arising from the policy of the National Government. The report of the committee, which was adopted by the town, declared that “the inhabitants of the Town of Royalston legally assembled in Town-meeting for the purpose of taking into consideration the present unprecedented and very alarming situation of our public affairs, hereby represent that when there is a dereliction from the first principles; when there is a practical departure from what is warranted by the constitution in those that lead in government, then there is a call to vigilance and exertion to prevent the progress of the evil. Notwithstanding it has been intimated from high authority that the people in town-meeting, etc., are not capable of judging of the propriety or impropriety of the measures of government, and that there are stages when an end must be put to debate, yet so long as we consider our National and State Constitution the supreme law of our land, we shall, agreeably to the rights therein secured to us (which rights we are determined never to relinquish), take the liberty on all important and portentous (issues), particularly when those rights are invaded and trampled upon, to assemble in an orderly and peaceable manner to make our grievances known, and to use all proper and constitutional means to have them redressed.

“We have seen with anxiety a system of measures pursued which has paralyzed industry and enterprise, discouraged our farmers and embarrassed our merchants, brought distress upon all classes of our citizens, and produced the greatest temptation for an illicit trade perhaps ever known. We are firmly attached to our National and State Constitutions, and cheerfully pledge our lives and everything we hold dear to support them. We are also firmly attached to a Union of the States, and should view with horror and detestation any attempts to sever them or to discountenance that friendship and harmony that ought to subsist between them.”

This bold language illustrates the character of the protests made everywhere in Massachusetts against a policy which, with the embargo as one of its measures, spread havoc among the ship-owners on the sea-board and excited universal sympathy among those who were connected with them either by social or business ties. As the war approached, a town-meeting was held “to see what measures to adopt relative to the distressing situation of our country, and act in concert with millions of American citi-

zens to take all peaceable and constitutional means, if possible, to avert the horrors of war.”

But when war was actually declared, the time for discussion and criticism ceased, and patriotism alone, with the duties it inculcated, filled the minds of the community. For the most part, the town saw little of the usual accompaniments of hostile strife. The war was a naval war; but occasionally the threatened attacks of the enemy on the weak points of the coast created alarms which reached the interior towns. On one of these occasions the Grenadiers, a military company of Royalston, was summoned to Boston, and continued thirty-four days in the service. The roll of this company was as follows:

Benjamin Brown, capt.	Elias Emerson.
Benoni Peck, lieu.	John Eaton.
W. Newton, ens.	Chauncy Forbush.
Isaac Gale, sergt.	Moses Garfield.
Elmer Newton, sergt.	John Hill.
Alanson White, sergt.	Hiram Lewis.
Jonah Walker, sergt.	Benjamin Leathe, Jr.
Thomas Norton, corp.	Russell Morse.
Josiah Wheeler, corp.	Chauncy Peck.
Moses Tyler, corp.	John Prescott.
David Thurston, corp.	Chandler Peabody.
Joseph Peirce, mus.	Thomas Rogers.
Silas Peirce, mus.	Stephen Richardson.
Edson Clark, mus.	Reuben Stockwell.
Silas Metcalf, mus.	Isaac Stockwell.
James Peirce, mus.	Simeon Stockwell.
Luke Bemis.	Joseph Stockwell.
Nathan Bemis.	Jonathan Stockwell.
Jonas Bremen, Jr.	Tarrant Stockwell.
Wm. Chase, Jr.	John B. Walker.
John Chamberlain, Jr.	Asa Walker.
John Dexter.	Nathaniel Wilson, Jr.

In the War of the Rebellion Royalston performed a creditable part. At its commencement the population of the town was one thousand four hundred and eighty-six, and its valuation \$823,257. The Board of Selectmen during the first two years of the war consisted of William W. Clement, Richard Baker and Cyrus B. Reed, and during its remaining years, of William W. Clement, Jeremiah A. Rich and Hiram Harrington. At a town-meeting held on the 30th of April, 1861, it was voted to raise fifteen hundred dollars to fit out volunteers and to pay them ten dollars a month above the pay of the Government. A committee of three was also raised to procure recruits. On the 14th of October it was voted to raise a sum not exceeding one thousand dollars for soldiers' families. On the 7th of April, 1862, it was voted to borrow one thousand dollars for aid to families of volunteers, and on the 24th of July to pay a bounty of one hundred dollars to volunteers for three years' service.

On the 25th of August it was voted to pay the same bounty to volunteers for nine months' service. On the 20th of April, 1864, it was voted to raise fifteen hundred dollars for bounties, and on the 14th of June to raise enough money to pay each volunteer one hundred and twenty-five dollars. In 1865 it was voted to raise four thousand nine hundred and sixty-

five dollars to refund those who had subscribed money for the purpose of filling the various quotas of the town. The whole amount expended by the town for war purposes was \$25,268.91, of which the sum of \$9,268.91, expended for State aid, was refunded by the State.

The following list includes those who enlisted in various regiments for various terms of service :

*Fifteenth Regiment of Infantry.*

Wm. Walsh.

*Twenty-first Regiment of Infantry.*

John Barrus,  
Marshall Barrus,  
Addison S. Bradish,  
C. A. Clark,  
Nathan S. Day,  
Franklin A. Eddy,  
Benjamin F. Flagg,  
Joseph Gamen,  
Jonas Greeley,  
Henry H. Higgins,  
Sidney S. Heywood,  
Henry E. Knight,  
Patrick Manning,  
Chauncy Norcross,  
Charles Pope,  
Wm. H. Sprague,  
Edwin Vose.

*Twenty-fifth Regiment of Infantry.*

George W. Barrett,  
Joel S. Bosworth,  
George Brown,  
Martin Burgess,  
Hosea A. Bosworth,  
Wm. H. Chase,  
John S. Chase,  
Arthur E. Clement,  
Jay Davis,  
Byron Doane,  
David W. Day,  
Aaron A. Grant,  
Wm. H. Howard,  
Stephen W. Martin,  
Wesley D. Goddard,  
J. B. Mellen,  
Hasan P. Metcalf,  
Stephen W. Martin,  
Joseph T. Nichols,  
Nelson F. Peck,  
H. K. Sampson,  
Alexander Stewart,  
James B. Smith,  
Henry S. Wood,  
Lyman Wheeler,  
George N. Wheeler,  
Warren L. Wheeler,  
Marcus Walker.

*Twenty-seventh Regiment of Infantry.*

George A. Flagg,  
Prescott Metcalf,  
Levi Bosworth,  
W. H. Sprague.

*Thirty-second Regiment of Infantry.*

Ambrose Clark,  
Allen F. Fish,  
Elkanah Paine,  
James Townsend.

*Thirty-sixth Regiment of Infantry.*

Adolphus Bussemius,  
Wm. J. Barrus,

Harrison C. Blake,  
George W. Bowkers,  
George L. Chase,  
Wm. C. Doane,  
Benjamin A. Fry,  
Lucius F. French,  
Sandford Giles,  
Wm. H. Howard,  
Salem T. Hill,  
Charles S. Knight,  
Frank A. Osborn,  
Clarence E. King,  
Henry Russell,  
George W. Raymond,  
John Shepardson,  
Nathan S. Tardy,  
Otis K. Upham,  
Arthur Peirce,  
Benjamin Patton,  
Asaph M. White,  
Rollin N. White,  
Stephen P. White,  
Joseph Walker,  
Eugene C. King,  
Samuel B. Hall.

*Fifty-third Regiment of Infantry.*

Benjamin H. Brown,  
Emerson E. Bissell,  
Willis H. Barton,  
Amos B. Bosworth,  
Joseph W. Bosworth,  
Edward W. Cross,  
Uri C. Day,  
Bernard Doane,  
Martin Fallon,  
George E. Fry,  
Alonzo French,  
W. D. Goddard,  
Milton C. Handy,  
James N. Hunt,  
George L. Hancock,  
George W. Knight,  
John S. Moore,  
Henry C. Moore,  
Andrew J. Norcross,  
Herman N. Partridge,  
Asa L. Palmer,  
George W. Russell,  
George O. Richardson,  
Jefferson Richardson,  
W. H. Sprague,  
Quincy A. Shepardson,  
W. W. Sherwin,  
Warren Thatcher,  
Charles E. Tenney,  
Edwin O. Vose,  
John M. Wood,  
George W. Wood,  
Adriel C. White.

*Sixth Battery.*

Henry L. Bennett.

*Second New Hampshire Regiment.*

John Nash,  
Danvas Miles,  
George Miles.

*Sixth New Hampshire Regiment.*

Mirick Burgess,  
Aaron Rice.

*Drafted.*

Franklin Brown.

*Furnished Substitute.*

Phineas S. Newton.

*Committed on payment of \$300.*

Andrew J. Bliss,  
Philip H. Bliss,  
Chilson Bosworth, Jr.,  
Wilson Carroll.

Brazia French.

— Gun.

Lysander Howard,  
Charles A. King,  
John W. Leathe,  
Reuben Pratt,  
A. D. Raymond,  
George S. Raymond,  
Joseph Shepardson,  
Caleb Stockwell,  
John B. Walker,  
Silas Wyman,  
Abijah Whitmore.

The following were either killed or died in the service:

Henry E. Knight.....killed in the Wilderness May 6, 1864  
Chauncy Norcross...died of w'ds at Roanoke Island Feb. 21, 1862  
Joel S. Bosworth.....died at Andersonville  
George Brown.....died of wounds in North Carolina in 1862  
Hosea A. Bosworth.....died of wounds July 10, 1864  
John S. Chase.....died at Andersonville  
Stephen W. Martin.....died at Newbern May 16, 1862  
Wesley D. Goddard.....killed in battle  
George L. Chase.....died of wounds in June, 1864  
Sanford Giles.....died of wounds May 12, 1864  
Clarence E. King.....died at Nicholasville, Ky., Aug. 23, 1863  
Henry Russell.....died of wounds Aug. 10, 1864  
George W. Raymond.....died of wounds Jan. 4, 1864  
John Shepardson.....killed June 17, 1864  
Arthur F. Peirce.....died at Hartwood, Va., Nov. 19, 1862  
Rollin N. White.....died of wounds in Washington June 25, 1864  
Stephen P. White.....died of wounds at Annapolis May 5, 1864  
Uri C. Day.....died at Baton Rouge  
George L. Hancock.....died at Carrolton, La., March 8, 1863  
George W. Knight.....died at New Orleans April 10, 1863  
Henry C. Moore.....died at New Orleans April 29, 1863  
Charles E. Tenney.....died at New Orleans April 26, 1863  
John M. Wood.....died at Baton Rouge May 15, 1863  
James Townsend.....died at Harrison's Landing Aug. 2, 1862  
George Miles.....killed in battle June 15, 1862  
Marcus Walker.....died in North Carolina Jan. 29, 1863  
Eugene C. King.....died in Kentucky Aug. 23, 1863  
Samuel B. Hale.....killed at Spottsylvania May 12, 1864  
Joseph W. Bosworth.....died July 24, 1863  
Quincy A. Shepardson.....died at Baton Rouge July 27, 1863  
Milton C. Handy.....died Feb. 17, 1862  
W. H. Sprague.....died May 10, 1862  
Jefferson Richardson.....died Jan. 24, 1863  
Edwin O. Vose.....died June 25, 1862  
George E. Fry.....killed in battle May 2, 1863  
W. D. Goddard.....killed in battle Aug. 10, 1864

In order that some idea of the prominent men in Royalston may be obtained, the following list is here inserted of those who represented the town in the General Court. The first representative was chosen May 27, 1766, and at the last town-meeting warned in the name of His Majesty. The next meeting was called "in the name of the government and people of the State of Massachusetts Bay in New England." After 1776 no representative was chosen until 1780.

1776.	Timothy Richardson.	1791.	None.
1777.	None.	1792.	Oliver Work.
1778.	None.	1793.	None.
1779.	None.	1794-95.	Isaac Gregory.
1780.	John Fry.	1796.	None.
1781.	None.	1797.	None.
1782.	None.	1798.	Philip Sweetser.
1783-85.	John Fry.	1799.	None.
1786.	Jonathan Sibley.	1800.	John Norton.
1787.	John Fry.	1801.	Isaac Gregory.
1788-89.	Peter Woodbury.	1802.	None.
1790.	None.	1803.	Isaac Gregory.

1804.	None.	1837.	Arba Sherwin.
1805.	None.		Benoni Peck.
1806-08.	Isaac Gregory.	1838.	Benjamin Fry.
1809-12.	Joseph Estabrook.		Salmon Goddard.
1813-14.	John Norton.	1839.	Arba Sherwin.
1815-17.	Joseph Estabrook.		Russell Morse.
1818.	None.	1840.	Benjamin Fry.
1819.	None.		Cyrus Davis.
1820-21.	Rufus Bullock.	1841.	None.
1822.	None.	1842.	None.
1823.	Squier Davis.	1843.	Hiram W. Albee.
1824.	None.	1844.	Barnet Bullock.
1825.	Joseph Estabrook.	1845.	Benjamin Brown.
1826.	Stephen Bacheller, Jr.	1846.	Hiram W. Albee.
1827-29.	Rufus Bullock.	1847.	None.
1830.	Stephen Bacheller, Jr.	1848.	Silas Kenney.
1831.	Franklin Gregory.	1849.	Elmer Newton.
1832.	Benjamin Brown.	1850-51.	Joseph Raymond.
1833.	Franklin Gregory.	1852-53.	Hiram W. Albee.
1834.	None.	1854.	Benjamin Fry.
1835.	Arba Sherwin.	1855.	Tarrant Cutler.
	Russell Morse.	1856.	Jarvis Davis.
1836.	Russell Morse.	1857.	Joseph Estabrook.
	Benoni Peck.		

The twenty-first article of the amendments to the Constitution was adopted by the Legislatures of 1856 and '57, and ratified by the people in 1857. Under the provisions of the amendment the towns of Royalston and Athol constituted the Second Representative District of Worcester County, and were represented until the next apportionment as follows:

Isaac Stevens, of Athol.....	1858
George Whitney, of Royalston.....	1859
Nathaniel Richardson, of Athol.....	1860
Elisha F. Brown, of Royalston.....	1861
Farwell F. Fay, of Athol.....	1862
Alpheus Harding, Jr., of Athol.....	1863
Ebenezer W. Bullard, of Royalston.....	1864
Calvin Kelton, of Athol.....	1865
Wm. W. Clement, of Royalston.....	1866

Under the apportionment of 1866, based on the census of 1865, the same towns constituted the same district, and were represented until the next apportionment as follows:

Alpheus Harding, Jr., of Athol.....	1867
Jeremiah A. Rich, of Royalston.....	1868
Thomas H. Goodspeed, of Athol.....	1869
Benjamin H. Brown, of Royalston.....	1870
Ozi Kendall, of Athol.....	1871
George H. Hoyt, of Athol.....	1872
George H. Hoyt, of Athol.....	1873
Jeremiah A. Rich, of Royalston.....	1874
Edwin Willis, of Athol.....	1875
Wm. W. Fish, of Athol.....	1876

Under the apportionment of 1876, based on the census of 1875, the same towns constituted the Eighth Worcester District, and were represented until the next apportionment as follows:

Joseph Walker, of Royalston.....	1877
J. Sumner Parmenter, of Athol.....	1878
Leander B. Morse, of Athol.....	1879
Russell S. Horton, of Athol.....	1880
Ira Y. Kendall, of Athol.....	1881
Henry M. Humphrey, of Athol.....	1882
Frank W. Adams, of Royalston.....	1883
C. Frederick Richardson, of Athol.....	1884
Washington H. Amsden, of Athol.....	1885
Benjamin W. Rich, of Royalston.....	1886

Under the apportionment of 1886, based on the

census of 1885, the towns of Athol, Royalston and Phillipston constituted the First Representative District of Worcester, and have been represented as follows:

Sidney P. Smith, of Athol.....	1887
Sidney P. Smith, of Athol.....	1888
John D. Holbrook, of Athol.....	1889

Among those, however, who have been representative men in the town, there are those who deserve more than a passing notice. Dr. Stephen Bacheller, was a native of the town, and the son of Dr. Stephen Bacheller, who was born in Grafton, and through a long life practiced his profession in Royalston. The younger Stephen was educated at the Academies of Chesterfield, New Hampshire, and New Salem, and studied medicine with his father and Dr. Henry Wells, of Montague. He began practice in the town of Truro, on Cape Cod, but in 1803, at the age of twenty-five, returned to his native town, where he assumed the business of his father, and jointly with him finally completed a career of eighty years in the medical practice. He was highly esteemed both in his profession and out of it. He was for many years one of the counselors of the Massachusetts Medical Society, two years its vice-president and was also one of the founders of the Worcester County Medical Association, of which he was for some years its president. In 1826 and 1830 he represented Royalston in the Legislature, and in many other ways was the recipient of the confidence of the community in which he lived. His death, which was sudden and unexpected, occurred on election day in November, 1848.

Rufus Bullock, son of Hugh and Rebecca Bullock, was born in Royalston, September 23, 1779. After leaving school he was employed for several years as a teacher, and among the places in which he was engaged in this employment was Truro, where he must have been during the residence there of his fellow-townsmen, Dr. Bacheller. On the 4th of May, 1808, he married Sarah Davis, of Rindge, New Hampshire, and from school-teaching turned his attention to trade. First as a clerk, he soon began business on his own account, gradually extending it as opportunities developed and his means increased. In 1825 he became a manufacturer, and with unremitting industry and restraining prudence he went on from year to year increasing his store. In 1820, '21, '27, '28 and '29 he represented Royalston in the Legislature, and in 1831 and '32 occupied a seat in the State Senate. In 1820 and '53 he was a delegate to the State Constitutional Conventions, and was once a Presidential elector. He was town clerk in 1812 and '13, town treasurer from 1825 to '37 inclusive, and assessor six years between 1807 and '26. He died in Royalston, January 10, 1858, leaving, as a memorial of his affection for his native town, bequests described in the following clauses of his will:

Thirteenth. I give and bequeath to the First Congregational Society

in the centre of the town of Royalston, being the same with which I now worship, the sum of five thousand dollars, to be held and applied as follows. the interest of said five thousand dollars shall be forever paid and applied annually or semi-annually for the support of preaching in said society; and it is my will that a committee chosen by said society for said purpose shall act in concurrence with my executors in investing said sum, provided that whenever, if ever, said society shall fail to support the preaching of the gospel and a regularly settled minister of the Congregational denomination for any unreasonable length of time and provide annually by tax or in some other way a sum not less than five hundred dollars for the support of preaching and the other necessary expenses of public worship in said society, then the sum of five thousand dollars shall revert to and be paid over to my children or to their heirs by right of representation.

Fourteenth. I give and bequeath to the Baptist Religious Society in the west part of the town of Royalston the sum of twenty-five hundred dollars, to be kept and applied as a fund the income of which shall be appropriated annually or semi-annually to the support of gospel preaching and public worship in said Society, and it is my will that a Committee to be chosen by said Society for such purpose shall act in concurrence with my executors in investing said sum, provided that whenever said Society shall neglect to raise by subscription or otherwise a sum not less than one hundred and fifty dollars per annum for the support of preaching and public worship, the said sum of twenty-five hundred dollars shall revert to and be paid over to my children or to their heirs by right of representation.

Fifteenth. I give and bequeath to the Second Congregational Society of Royalston at South Royalston, so called, the sum of twenty-five hundred dollars, to be held as a fund, the income of which shall be appropriated annually or semi-annually to the support of Gospel preaching in said Society; and it is my will that a Committee to be chosen by said Society for such purpose shall act in concurrence with my executors in the investing of said sum, provided that whenever, if ever, said Society shall fail to support preaching or to maintain a regularly organized Society at South Royalston or whenever, if ever, that part of Royalston now known as South Royalston shall be set off from said town of Royalston, then this sum of twenty-five hundred dollars shall revert to and be paid over to my children or their heirs by right of representation.

Sixteenth. I give and bequeath to the town of Royalston the sum of five thousand dollars, to be held and applied as a fund, the income of which shall be appropriated and paid over for the benefit and use of Common Schools in said town, the said income to be divided among the several school districts in like manner as the school money raised by the town shall be divided; and it is my will that a committee to be chosen by the town for such purpose shall act in concurrence with my executors in investing said sum, and that every year a committee shall be chosen by the town at a legally called town-meeting who shall have the charge and oversight of such investment and shall report annually to the town the condition and income of the same, provided, however, that whenever the said town of Royalston shall neglect to keep or cause to be kept in a good state of repair the new Cemetery now being established on the ground recently purchased of C. H. Maxham, that is to say shall neglect to maintain in good order and condition the said ground, fence, gate and necessary tomb therein, then this sum of five thousand dollars shall revert to and be paid over to my children and their heirs by right of representation.

Nor must Joseph Estabrook, in 1828 a Senator, be omitted; nor Franklin Gregory, Representative two years, town clerk fourteen years, and major-general in the militia; nor Isaac Gregory, Representative seven years, town clerk five years, and selectman eight years; nor Peter Woodbury, Representative two years, town clerk ten years, and selectman sixteen years; nor Benjamin Woodbury, nor John Fry and Timothy Richardson and Sylvanus Hemenway, nor Geo. C. Richardson, the eminent Boston merchant, and the writer will be pardoned for speaking with marked respect of another with whom he was personally acquainted and to whose memory he wishes to pay an affectionate tribute. Samuel Barrett was born in Royalston, August 16, 1795, and graduated at Harvard in the

class of 1818. He was the son of Benjamin and Betsey (Gerrish) Barrett, and through his long and faithful ministerial labors reflected honor on his native town. He was settled many years as pastor of the Twelfth Congregational Unitarian Society of Boston, and received, in 1847, the degree of Doctor of Divinity from his *alma mater*. He married, September 11, 1832, Mary Susan, daughter of the eminent Dr. Greenwood, of Boston, and died in Roxbury, June 24, 1866.

The career of the most distinguished son of Royalston will be found portrayed in the chapter in these volumes on the bench and bar, but the writer cannot permit this sketch to pass from his hands without a tribute to the memory of one whom he honored and loved. Alexander Hamilton Bullock, son of Rufus and Sarah (Davis) Bullock, was born in Royalston, March 2, 1816. He graduated at Amherst College in 1836, and for three years taught school in Princeton, New Jersey. After studying law with Emory Washam and at the Dane Law School at Cambridge, he was admitted to the bar in 1841. He began the practice of law in Worcester, and ever after resided in that town. The popular traits of his character, as well as his natural proclivities, led him into political life and drew him, step by step, to the acquisition of the highest honors of the State. In 1845, 1847 and 1848 he represented Worcester in the General Court; in 1849 had a seat in the Senate, from 1853 to 1856 was commissioner of insolvency, from 1856 to 1858 was judge of insolvency and in 1859 was mayor of his adopted city. From 1848 to 1850 he was the editor of the Worcester *Ægis*, and in 1852 was made a trustee of Amherst College. From 1861 to 1865, inclusive, he was again a member of the House of Representatives and its Speaker during the last four years, and from 1866 to 1868, inclusive, was Governor of the Commonwealth. In 1866 he received the degree of LL.D. from Harvard, and was for many years a member of the Massachusetts Historical Society. He died in Worcester January 17, 1883, and at the next meeting of the Historical Society Hon. Robert C. Winthrop, its president, in announcing his death, used the following language: "A graduate of Amherst College, and afterwards of our Harvard Law School, with large natural gifts, and with not a little various acquirement, he entered early on a career of usefulness and distinction. As mayor of the city in which he resided, as a member successively of both branches of our State Legislature, and Speaker of one of them, and finally as Governor of Massachusetts for three years after the retirement of Governor Andrew, he rendered copious and valuable service to his native Commonwealth.

"Of late years his taste for public employment seemed to have been satiated. It may be that some forebodings of the shock which has now suddenly prostrated him had warned him of the danger of encountering longer the responsibilities and excitements

of political life. At all events he avoided them, declining all candidacies, and even refusing, as is well known, the highest diplomatic appointment abroad.

"Such a withdrawal by a man of public spirit, of independent circumstances and of eminently patriotic impulses, as he certainly was, could plainly have resulted from no caprice, fastidiousness or apathy, but must have been dictated by considerations of which he alone was conscious, and of which he was the only rightful judge. Meanwhile he traveled extensively in foreign lands. He delivered occasional addresses at the call of his *alma mater* and of others, and he was always recognized as one of our most accomplished and impressive orators. His address before the Massachusetts Mechanics' Association, and his eulogy of President Lincoln at Worcester, in 1865, were especially notable. His more recent effort at New York, at the unveiling of the statue of the great statesman whose name he was proud to bear, was forcible and brilliant. And the paper which he prepared and read before the American Antiquarian Society last year on the centennial anniversary of the Constitution of Massachusetts was exhaustive and admirable."

Mr. Winthrop might have added that which is more pertinent to this narrative,—that he delivered in Royalston, on the 22d of August, 1865, an eloquent historical address commemorative of the hundredth anniversary of the incorporation of that town.

The anniversary celebration was conducted under the management of a committee of fifteen, chosen by the town, consisting of Rev. E. W. Bullard, Joseph Raymond, Benjamin H. Brown, Jarvis Davis, John N. Bartlett, Russell Morse, Jr., Cyrus B. Reed, Wellington White, Cyrus Davis, Arba Sherwin, John M. Upham, Edward Stockwell, Timothy Clark, Joseph L. Perkins and Maynard Partridge. A historical committee was also chosen, consisting of Barnett Bullock, Daniel Davis, John N. Bartlett, Joseph R. Eaton, Charles H. Newton, Luther Harrington and Horace Pierce to make researches in reference to the history of the town, with a view to their preservation and possible publication. The sum of fifteen hundred dollars was appropriated to defray the expenses of the occasion. Rev. E. W. Bullard was chosen president of the day; Rev. A. E. P. Perkins, of Ware, chaplain; George Whitney, of Royalston, chief marshal; and Benjamin E. Perkins, of South Danvers, toastmaster. The exercises were held in a large tent, and the following gentlemen were announced by the president as vice-presidents: Samuel Lee, of Templeton; Rev. Ammi Nichols, of Braintree, N. H.; Hon. George C. Richardson, of Cambridge; Benoni Peck, of Fitzwilliam, N. H.; Harrison Bliss, of Worcester; Chauncy Peck, of Boston; Rev. Henry Cummings, of Newport, N. H.; Rev. Sidney Holman, of Goshen; Rev. Daniel Shepardson, of Cincinnati; Rev. Ebenezer Cutler, of Worcester; Thomas Norton, of Portland; James Raymond, of Brooklyn; and Hon.

Davis Goddard, of Orange. John P. Gregory, of Cambridge, and Joseph E. Raymond, of Boston, were appointed secretaries.

After a reading of Scriptures and a prayer by the chaplain the president delivered an introductory address, which was followed by the singing of a hymn, written for the occasion by Mrs. George Woodbury, of Royalston. After the delivery of Mr. Bullock's commemorative address a poem was read by Albert Bryant, and the exercises of the day closed in another tent, in which about eight hundred persons were seated at dinner. The speakers at the dinner were Edwin Pierce, of New York; George C. Richardson, of Cambridge; Artemas Lee, of Templeton; Rev. Mr. Marvin, of Winchendon; Mr. Gregory, of Chicago; Rev. Mr. Perkins, of Ware; Rev. Sidney Holman, and Rev. Mr. Woodworth.

In the early years of the town the people depended almost exclusively on farming for support. Grist-mills and saw-mills and fulling-mills were located here and there, but these were rather incidental to the general occupation of the people, and were intended chiefly to furnish local supplies. Many of these saw-mills are still in active operation. In later years manufacturing has been introduced, and at South Royalston Colonel George Whitney is extensively engaged.

Col. Whitney is the son of Amos Whitney and was born in Royalston. He is emphatically a self-made man. At the time of the death of Hon. Rufus Bullock he was the station agent at Royalston and also engaged in some operations with lumber. Mr. Bullock, at the time of his death, owned and operated the woolen-mill at South Royalston. The property connected with this mill originally belonged to the "Royalston Cotton and Wool Manufacturing Company," which was incorporated in 1813. This property came into the hands of Silas Coffin and Rufus Bullock, whose mill was burned in 1833. At that time Mr. Bullock became the sole proprietor, and in 1834 built the stone mill now standing. At the death of Mr. Bullock, George Whitney, with Daniel Day, of Royalston, bought the mill, and for a few years Mr. Whitney and Mr. Day carried on the manufacture of cassimeres. After Mr. Day went out of the business Rufus S. Frost, of Boston, was associated with Mr. Whitney for a time, and after him, James Phillips, Jr., of Fitchburg. For the last three years Mr. Whitney has been alone, and with his son, George E. Whitney, has the sole ownership and management of the establishment. Contiguous to the mill was a chair factory, owned and operated by Whittemore & Bruce, and next above was a brush wood factory, owned at various times by Vose & Bartlett, Stockwell & Piper, Jonas Turner and R. Safford. These two factories are now the property of Col. Whitney, the former being still employed in the manufacture of chairs and the latter in spinning for the cassimere mill. Col. Whitney employs in the three mills about one hun-

*Franklin E. Gregory*

dred and seventy-five hands. He is well known, not only as an enterprising manufacturer, but as a public man. He was a member of the House of Representatives in 1859, and of the Senate in 1863 and '64. He was also a member of the Executive Council from 1873 to 1877 inclusive, and at his last election received the unusual honor of a unanimous vote.

Until four years ago Caleb W. Day was employed at South Royalston in the manufacture of brush woods,—that is to say, handles and backs and other wooden material used in the manufacture of brushes. In 1884 Mr. Day's mill was burned, and though still a resident of South Royalston, he carries on the same business on a more extensive scale in a mill hired by him in Winchendon, near the New Hampshire line. Mr. Day is not a native of Royalston. He was born in Richmond, New Hampshire, and about the year 1843 came to Royalston and entered Mr. Bullock's mill. He afterwards was employed for a time in Winchester, New Hampshire and Northfield, Massachusetts, but finally returned to Royalston. Bemis & Jones, who had been carrying on the manufacture of shoe-pegs, dissolved partnership, and Mr. Day joined Mr. Jones in the business. He afterwards bought out Mr. Jones and began the manufacture of brush woods, which he continued until he was burned out, about four years ago.

The only other manufacturing establishment at South Royalston is that of Nelson S. Farrar, who is engaged in the manufacture of barrel covers, wooden measures and other kindred articles.

Aside from the saw-mills the establishment of Herman M. Partridge at the central village, engaged in the manufacture of crutches and kindergarten materials, completes the list of industries in the town.

South Royalston is quite an active village, lying on Miller's River, and with the establishment of Colonel Whitney and others furnishes a large share of the employment enjoyed by the people of the town.

Royalston contains a Town Hall, built in 1867, in which is located the public library, and in which also are a large hall and commodious rooms for town officers. The town is admirably situated, surrounded with inspiring scenery, and attractive not only to its returning sons, but also to the stranger entering within its borders. In the language of Governor Bullock, "it is symmetrical and compact, large enough and small enough, and bears a just proportion to the prescriptive idea of a Massachusetts township of six miles square. I would not diminish it nor enlarge it. Let other municipalities nibble around your borders, but let them nibble in vain, and you will hold fast to that which is good and which is none too much."

## BIOGRAPHICAL.

### FRANKLIN E. GREGORY.

The grandfather of the subject of this sketch was Isaac Gregory, who lived in Royalston. His children were Jonathan, Isaac, Tilly and Franklin. The last-named child, Franklin, was born in Royalston and there educated. He went at an early age into a store in Boston, and having there laid the foundation for a business life, returned to Royalston and engaged in mercantile pursuits. He was a man whose honorable career won for him the love and esteem of his fellow-citizens, and whose unblemished reputation was a rich legacy to his children. He was for many years connected with the State military service, holding the rank of general, and the regiment under his command, was selected to escort General Lafayette from Worcester to Royalston. He married Martha Porter Edwards, and their children were Martha P., who died young; Sarah, who married O. W. Watress, a partner of the late Thomas Douse, of Cambridgeport; Franklin Edwards, Martha (died in infancy), John P., Isaac H., Martha Ann, wife of W. H. Ladd, now principal of the Chauncy Hall High School, of Boston; George H., Charles A. and Frederick W. The memory of Mrs. Watress is cherished with affection, not limited to her immediate family, but shared by a large circle of neighbors and friends in Cambridge, who felt the influence of her noble character, and learned from her lessons of self-sacrifice, of Christian charity and the most thorough fidelity in the performance of every duty. To the Unitarian Society, of which Rev. Dr. George W. Briggs is the pastor, her death inflicted an almost irreparable loss, and no one knew better and more deeply appreciated and more generously acknowledged her influence and power than the pastor himself, with whom, hand in hand, she had devotedly worked. Her untimely death prevented the consummation of a cherished plan, which was gradually maturing in her mind, to establish in Cambridge an old ladies' home. She was the first president of the associated charities, and an active member of it until her death.

Franklin E. Gregory, the subject of this sketch, was born in Royalston May 7, 1822. At the age of sixteen, after an education acquired in the public schools of his native town, he took the first step in what has proved a busy life as a boy in the dry-goods store of Mr. Austin, of Royalston. After a few months he went to Keene, New Hampshire, and entered the dry-goods store of Wales Kimball. In 1840 he went to Cambridgeport and became clerk in the dry-goods store of Edward Hydes. Three years afterwards, in 1843, he became a salesman in the well-established house of Dutton, Richardson & Co., in Boston. At that time the store of that firm was at No. 53 Water Street, and it there remained until about 1845, when the firm removed to the store next north of the Fed-

eral Street Theatre, on Federal Street, which, during their occupancy, fell to the ground. In 1847 Mr. Gregory became a partner in the house, which continued to be known as Dutton, Richardson & Co. until 1855, when Mr. Richardson left to join James M. Beebe in business, and the old firm became Gregory, Tilton & Co.

In 1861 Mr. Gregory retired from the dry-goods business, and soon after became a partner in the firm of Spear, Burke & Gregory, on Central Wharf, whose business was chiefly confined to dealings in oils and starch. Three years after he abandoned this new line of business and, with Mr. Richardson, his old partner, formed the well-known, eminent house of George C. Richardson & Co. He retained his connection with Mr. Richardson until 1880—a connection which, with few interruptions, had extended through a period of thirty-seven years. Since 1880 his time has been chiefly occupied in the management of trusts and trust estates, and in the performance of duties resting upon him as director or manager of financial and other enterprises. He has been thirteen years a director in the Revere National Bank of Boston, is vice-president of the Framingham Savings Bank and Framingham National Bank, and trustee of the Washington and Potomac Railroad. He made Cambridge his place of residence from 1840, when he first removed there, until 1883, when he removed to Framingham, his present home.

On the 26th of May, 1847, Mr. Gregory married Sarah F., daughter of William Bird, of Boston, and has had the following children: William F., who was brought up in the house of Wm. Claffin & Co., in the shoe trade, and is now a partner in that prosperous firm, and who married Martha J. Bent, of Cambridge; Anna Edwards, unmarried; and Charles F., who lives at home with his parents.

The mere statement of the career of Mr. Gregory is perhaps a sufficient eulogy. No man could have advanced with the sure and steady step which marked his progress, from boyhood in a retail store to a manhood bearing a full share of the burdens and responsibilities of a leading commission house in Boston, without the possession of a sound judgment, a comprehensive intelligence, a wise foresight and a keen sense of honor, all of which are essential to the life and prosperity of business enterprise. It is unfortunately too common for such men, while loving business methods themselves, to condemn the careless and unthrifty; and conscious of their own moral strength to be harsh in their judgments of others. But no man can say that Mr. Gregory's heart has been hardened by the competitions and conflicts of trade, or that his charity has ever failed where a helping hand could relieve distress, or the display of a kind, forgiving spirit could guide anew a fallen brother-man in the walks of an honorable and useful life.

#### JOSEPH RAYMOND.

Joseph Raymond, son of Stephen and Rhoda Estabrook Raymond, was born in Royalston June 3, 1801. He spent his youth in his native town, enjoying the advantages of our common schools, which are the pride of Massachusetts, and at seventeen years of age entered the store of Gen. Franklin Gregory, and remained with him to the close of 1823, acquitting himself with such credit that within a few months he was offered a partnership by Col. Artemas Lee in his business at Baldwinville, a village in Templeton. The offer was accepted, and the firm of Lee & Raymond carried on a very large and lucrative business from April 1, 1824, to April 1, 1838—a period of fourteen years. Upon the dissolution of the firm at the latter date Mr. Raymond returned to Royalston and formed a copartnership with Joseph Estabrook, which continued till the spring or summer of 1844, when Mr. Raymond retired from active business life with a generous competency. He continued prominent, however, in town affairs, and was regarded as a faithful and sagacious leader in all matters affecting the interests of the community in which he lived. He filled for many years the various offices of trust in town government, as chairman of the Boards of Selectmen, Assessors, Overseers of the Poor, etc., and brought to the discharge of his duties faithful service, sound judgment and wise foresight,—shunning no labor, shrinking from no responsibility and exercising the same care and diligence that he did in his own business,—and won and retained the full confidence of his townsmen.

In 1851 he represented Royalston in the Legislature, and in the protracted and spirited contest that session for United States Senator he was a consistent and earnest supporter of Charles Sumner, whose dawning greatness even then gave promise of large fulfillment, so fully realized in after-years.

Upon the establishment of Miller's River Bank, in Athol, in 1854, Mr. Raymond was chosen one of its first directors, and gave his valuable experience to the management of that exceptionally successful institution. Of late years, however, he has given little attention to any business outside of his private affairs, and in his modest and beautiful home in the heart of the historic town of his birth he is passing the golden decline of life in the calm and bright serenity befitting an active, useful and honorable career.

Mr. Raymond married, November 21, 1830, Elizabeth Kendall, daughter of Samuel Kendall, who was born in Enfield in 1801,—a woman of rare gifts, a very mother in Israel, respected and loved by all who knew her. It was a happy marriage in the truest sense, made happier by the birth of four children, three of whom are still living,—a daughter, Mrs. I. L. Choate, and two sons, J. E. and H. D. Raymond. After a married life of over fifty-six years Mrs. Raymond died in 1887, mourned by all, and especially in the family home, brightened by her presence, and

*Joseph Raymond*

around which still linger so many tender associations connected with her name and memory.

Mr. Raymond contributed the first money to found a public library in his native town, which bears the name of the "Raymond Public Library of Royalston," in honor of the donor, who has shown by his living example, more eloquent than words, the rich fruits of good citizenship, the value of character, based upon intelligence, integrity and love of justice, in the building up of manhood and communities, of which New England is the type and expression.

In this brief and imperfect sketch it is only necessary to add that Mr. Raymond is a man of marked individuality, which he carries with him into all the relations of life; careful in forming an opinion, firm in his convictions, patient in investigation, seeking always the truth—and it is seldom that he is mistaken in his judgments. In these qualities, largely, lies the secret of his success; to these he owes the honors that have crowned his life.

## CHAPTER CLXX.

### HOLDEN.

*Location—Original Grant—Indian Deed—Division of Lots—Settlement—The "Lime Lot"—First Survey—Incorporation—Petition—Act of Incorporation—Names.*

HOLDEN is located near the centre of the county, and is bounded as follows: North by Princeton; east by Sterling, West Boylston and Worcester; south by Worcester and Paxton, and west by Paxton, Rutland and Princeton.

This town originally formed a portion of Worcester and was known as the North Half. It was granted by the General Court in 1668 to Daniel Gookin, Edward Johnson and others, who received a deed from the Indians of this tract under date of July 13, 1674. The following is the deed:

#### INDIAN DEED.

Bee it known to all men by this present writing, that Wee, John alias Horrawannont, or Quiquonassett, Sagamore of Pakachoge, and Solomon, alias Woonaskochu, Sagamore of Tataessit, together with the consent of our kindred and people, and for and in consideration of twelve pounds of lawful money of New England, or the full value thereof, in other specie, to our content, within three months after the date hereof, well and truly to be paid, and satisfied, and pt. whereof, viz. two coats and four yards of trading cloth, valeded at twenty-six shill. wee do acknowledge to have received in hand, as earnest, of Daniel Gookin senr. of Cambr. Esqr. and of Daniel Hinchman, of Boston, Brewer, in behalf of themselves and Capt. Thomas Prentice, and Lt. Richard Beers, and the rest of the Genll. Court's Committee, appointed for the management of a new plantation granted by the said Court, conteyning eight miles square, or the contents thereof, being to the westward of Marlborough, near Quansiquamond Ponds, and on each side of the Roadway leading towards Connecticut; Now know yee, yt wee, ye sd. Jno. and Solomon, Sagamores aforesaid, and upon the terms aforesaid, have bargained, sold, aliened, enfeoffed, and confirmed, unto ye sd Daniel Gookin, Thomas Prentice, Daniel Hinchman, Richard Beers, and ye rest of the people admitted, or to be admitted, by ye sd

comittee to be inhabitants of yt new plantation, and to their heirs, ex ecutors, admsrs, and assigns for ever, in fee simple, all and every pt of our civil or naturall right, in all and singular the broken up land and woodlands, woods, trees, rivers, brooks, ponds, swamps, meadows, minerals, or any other thing, or things whatsoever, lying and being with in that tract of land, conteyning eight miles square or the contents thereof, to be layd out by ye sd persons or their order in time convenient. To have and to hold the premises, and every pt thereof, unto them the sd Daniel Gookin, Thomas Prentice, Daniel Hinchman, and Richard Beers, and all ye rest of ye sd Inhabitants admitted or to be admitted planters there, and unto ym and yr heirs forever, freely and absolutely, without any left, molestation, or disturbance, of us, or any of our kindred or people, or any claiming by, from, or under us, for evermore, as our heysr or assigns; and wee do promise, upon the finishing ye payment to make full and ample deeds and writings for the same, according to law. In witness of the truth hereof, wee ye sd John and Solomon, alias Horrawannont and Woonaskochu, have hereunto set our hands and seals, this thirteenth day of July, 1674.

Solomon, alias Woonnasakochu,

Signed, Sealed, and } seal and mark.

delivered in the } John, alias Horrawannwit, mark and seal

presence of us,

Onnamog, his mark, Sagamore of Oconomesett.

Namphow, his mark, sagamore of Wamesett.

Joseph Thatcher, of Chabanakonchoie, his mark.

Nosannowitt, his mark. Noah Wiswall, present.

Full payment rec'd August 20, 1676. D. Gookin.

This deed acknowledged by the Sagamores, before Daniel Gookin, Sen Assist. July 13.

Entered, 9. 2. 83 by Thomas Danforth, R.

This deed embraced the present towns of Holden, Worcester and portions of Auburn, Paxton and West Boylston. A second Indian deed was granted to Daniel Gookin and others February 12, 1677.

DIVISION OF LOTS.—At a proprietors' meeting, held April 24, 1682, it was voted to divide the whole township into lots, and the following is an account of them:

Lotts Drawn for *pitches* in the North half part of Worcester, as they were taken out the Hatt by the Moderator according to vote as aforesd to each proprietor is as follows—viz:—

**SETTLEMENT.**—The first settlement in Holden was made in 1723, in the easterly part of the town, on what is now known as the Ballard farm, and in the early records as the "Lime lot," this lot having received its name from a discovery of limestone therein in the spring of 1723, by James Rice, of Worcester. This discovery was of such importance to the new settlement that at a meeting of the proprietors, in March, 1723, a vote was passed, granting "encouragement to the first finder of limestones and undertaker of the burning lime for the supplying the town." A committee was appointed to agree with Mr. Rice to burn lime upon the following conditions, viz.:

1. The undertaker, Mr. Rice, to have a patent for 50 acres of land to be allotted him, for seven years; and that he have liberty to cut wood on any common land of the proprietors, and that everybody else be forbid digging limestones, or cutting wood, until the end of said term.
2. That the town be allowed 2d. per bushel for all merchantable lime.
3. That all the inhabitants, that may have occasion, for their own use in building to be used in town, shall give 12d. per bushel for it, and no more.
4. \* \* \* \*
6. That the undertaker be obliged to go upon the business with all speed, and also to supply the inhabitants with lime for their own use when they want it, as soon as may be with any convenience and that they be preferred before any other persons belonging to other towns.

The tract was first surveyed in 1723, and again in 1724, and later four thousand acres were transferred to private individuals, and the settlement of the town was begun.

**INCORPORATION.**—The petition for the incorporation of the town was signed by twenty-five persons, and was as follows:

WORCESTER, May ye 13th A.D. 1740.

These may saity, to yr Honorable General Court that we ye subscribers hereof, Inhabitants of ye North part of Worcester have met together choosen and appointed Mr. John Biglo for us and in our behalf to caray a Petition to ye Honorable Grate and General Court at their Sessions in May Instant praying that we may be set off a distinct and separate Township according to ye vote which we have already obtained in ye Town of Worcester.

To his Excellency Jonathan Belcher Esqr. Captain General & Governor in chief in and over His Majesties Province of the Massachusetts Bay in New England. To the Honourable His Majesty's Council & the Honourable House of Representatives, Novr. 21, 1740. The memorial of John Bigelo & Cyprian Stevens for themselves and in behalf of the other inhabitants of the North half of the Town of Worcester humbly sheweth, That the Town of Worcester at their meeting in March last having by a vote then passed, signified their free consent, to dismiss the Inhabitants of the North part of sd Town in order to their being erected into a distinct Township if this Honourable Court should think fit, and your memorialists made application accordingly at the Sessions in May last, and their Petition was not at that time Granted by the whole Court, but only by a part. Our Circumstances as we humbly apprehend being not fully known. We therefore beg leave to Inform this Honourable Court, That since that time, Several persons have been added to our Number & divers others would have purchased land & settled with us, in case our petition had been then granted. Now in as much as our increase & flourishing have been much retarded for want thereof, and would be much promoted by our being made a Town, and the settlement of a Minister with us, in the meeting-house which we have erected, much facilitated, and for want whereof we undergo great difficulties, We humbly entreat your Excellency and Honours will now take our Necessitous case into your wise consideration & be pleased to erect us into a distinct Township; and your humble memorialists as in duty bound, shall ever pray, &c.

JOHN BIGLO.  
CYPRIAN STEVENS.

Anno Regni Regis Georgii Secundi decimo quarto.

An Act for erecting the Northerly part of the town of Worcester, in the County of Worcester, into a distinct and separate Township by the name of Holden.

Whereas the inhabitants of the Northerly part of the town of Worcester, commonly called North Worcester, by reason of the great difficulties they labour under, have addressed this Court to be set off a separate and distinct Township, whereby the inhabitants of said Town have manifested their consent.

Be it enacted by his Excellency the Governor, Council and Representatives in General Court assembled, and by the authority of the same— That the Northerly part of the Town of Worcester, within the following bounds, viz. :—bounding South-easterly on the lines dividing the North and South Proprieties of said Town, and is known as the dividing line; westerly partly on the Town of Leicester, and partly on the Town of Rutland; and easterly on the Town of Shrewsbury, be and hereby is set off, from the Town of Worcester, and erected into a separate and distinct Township by the name of Holden, and that the inhabitants thereof be and hereby are vested with all the Powers, Privileges and Immunities which the inhabitants of other Towns within this Province do and by right ought to enjoy.

Provided nevertheless that the said new Town shall pay their proportionable part of all such Province and County taxes as are already assessed upon the Town of Worcester, in like manner as tho' this act had never been made.

January 2, 1740. This bill having been read three several times in the House of Representatives, Passed to be enacted.

J. QUINCY, Sp.

January 2, 1740. This bill having been read three several times in the House of Representatives, Passed to be enacted.

J. WILLARD, Sec'y.

January 9, 1740. By his Excellency the Governor, I consent to the enacting of this bill.

J. BELCHER.

In the House of Rep'ives, March 26, 1741.

Ordered that Mr. John Bigelow, a Principal Inhabitant of a New Town lately erected out of the Northerly part of the Town of Worcester, in the County of Worcester, be and hereby is authorised and Impowred to assemble the Freeholders and other Qualified Voters there on the first Monday of May next in some convenient publick place in said Town, in order to their chusing a Town Clerk and other Town officers for the Year next Ensuing.

Sent up for concurrence.

J. QUINCY, Sp'kr.

In Council, March 27, 1741, Read & Concur'd.

J. WILLARD, Sec'y.

Consent'd to.

J. BELCHER.

The town was named in honor of Samuel Holden, a merchant of London.

## CHAPTER CLXXI.

HOLDEN—(Continued.)

## MILITARY HISTORY.

*French and Indian War—The Revolution—Shays' Rebellion—The Civil War.*

HOLDEN furnished a number of soldiers for the French and Indian War, among whom were William Fisher, Richard Flagg, Samuel Boyd and Peter Nutten, who enlisted into the company of Captain Benj. Flagg, of Worcester, to strengthen the forces stationed at Lake George. Henry Rice, Job Harris, Samuel Estabrook, John Murphey, Jedediah Estabrook, Samuel Hubbard, Jr., Samuel Bigelow, John Woodward, Samuel Thompson and Ebenezer Fletcher enlisted into the company of Captain John Chandler, for the invasion of Canada. In an expedition to Crown Point the following persons served under Captain Fletcher, of Rutland, viz., Ebenezer Fletcher (1st lieut.), Ebenezer Fletcher, Jr. (2d lieut.), Samuel Estabrook and son, Job Harris, Samuel Hubbard and John Murphey, privates.

THE REVOLUTION.—The first reference on the town records to the War of the Revolution appears in 1772, when the town sent the following reply in response to the circular from Boston :

1. *Resolved*, That Liberty, both Religious and civil, is a most precious and inestimable gift of the great and glorious Creator of all things, granted to all rational creatures; neither can any person or persons innocently give or sell it away from himself any more than he can take it from another.

2. If any have been so unhappy as to surrender their Liberty, such act of theirs cannot induce any moral obligation of servitude on them personally; especially if they were enslaved by irresistible power; surely then it cannot reasonably bind their successors in every future generation.

3. That it is to us equally manifest that no one nation, State or political society has any right to rule or command another, especially without the consent of the latter.

4. The people of New England have never given the people of Britain any right of jurisdiction over us, consequently we deem it to be the most unwarrantable usurpation, and view it as an insufferable insult in the British Parliament, that they assume a LEGISLATIVE AUTHORITY over the American colonies.

5. We cheerfully profess the most perfect LOYALTY to the King, as having an essential voice in our charter government.

6. We are assured that no political community on earth can truly enjoy Liberty without civil government; Therefore, civil government is an invaluable divine blessing; and Anarchy is the greatest of public evils—one only excepted, that is a state of complete and confirmed Tyranny.

7. And such Tyranny is evidently the object of some very recent measures of the British administration and government; particularly those mentioned to us in a letter from our worthy friends, the citizens of Boston; and the project of despotism and arbitrary government appears to be nearly accomplished and settled, so that nothing but the vigilance and combined efforts of this people, under the auspicious Providence of Heaven, can save us, from abject Slavery and Total Ruin.

8. Therefore, we are compelled to speak and divulge our sober and

very grievous apprehensions, and are willing all mankind should know that we are far from acquiescing in the many gross violations of our just rights, too conspicuous and palpable now to require a particular enumeration, and truly we should be chargeable with very criminal silence, if we did not remonstrate against every glaring attempt of any persons, of what Rank or Denomination so ever, to bereave us of our Liberty.

9. *Resolved*, That the right of Kings (whether it be a human or divine right) is founded on the same principles of public Liberty, which we assert; and the right of our present Sovereign, George III., to the British throne was explicitly by compact derived from the same principle.

10. And therefore we must behold them as guilty of treason against his sacred Majesty and his illustrious House, who are making attempts to subvert the liberties of his faithful subjects, as nothing can be more repugnant to the Constitution of England and of this province, than that George should be King of slaves; so if the antiquated doctrine of passive obedience and non-resistance should now revive and move abroad, and half the nation were so blind and infatuated as to embrace such a deformed Monster, the throne must shake and tremble to its base! The Lord Almighty avert the horrid catastrophe; to prevent it our prayers and endeavors shall not be wanting!

11. In publishing our sentiments and resolutions we are moved by natural and Christian benevolence to the good people of Britain, whose prosperity is dear to us as our own. It is therefore our hearty prayer that God would preserve them from the depth of political lethargy and mercifully defend them from the iron FANG of tyranny, as slavery has ever been abhorrant to the Genius of Britain; it must be peculiarly shameful and painful to Englishmen, till we shall have lost the spirit of our truly worthy ancestors, and forfeited the English name. As we are far from suspecting the people of Britain (our old Ally) of being inimical to us, our ardent brotherly love to them is an additional incitement to assert our own freedom; it being very certain that if liberty expires here, it will not long survive there; we are therefore ambitious of transmitting our names to all posterity, as favored instruments in the hands of God, of having preserved Britain from destruction, therefore, we supplicate the Throne of Mercy, that God would excite his people in Britain and America to a reformation of morals, because, as sin is the reproach and ruin of any people, so righteousness exalteth a nation to the summit of happiness and glory.

12. Therefore, *Resolved*, That there is an intimate connection between the Liberty and Virtue of any people; if Liberty be gone, Religion will infallibly languish to extinction.

13. We plead for Liberty, because it is the respectable patroness of the liberal arts and sciences. This was doubtless the judgment of our pious and worthy ancestors, who chose a wild desert with Liberty, rather than the fruitful fields and beautiful gardens of their native land with slavery; and who were in their first settlement, very zealous to erect a seminary of learning as well as to build and multiply Christian Churches. We desire to follow their noble example, to promote in our measure learning and liberty, in delightful and harmonious union, and would now recommend it to our children and their successors, forever, to be imitators of us, and of our truly wise, and virtuous and venerable progenitors.

14. We think it our duty, on this occasion, on behalf of ourselves and our dear country, to express our sincere gratitude to the respectable gentlemen of Boston for the light and counsel, they have presented to us in the circular letter, and their many generous efforts in the cause of liberty, and it is our earnest prayer to Almighty God, that they may be animated, still to proceed, and that they may prosper according to the desire of their hearts, and receive the most ample and durable reward.

And, That the above resolves be recorded on the town books of records, and that the Town Clerk give an attested copy to said Committee of Correspondence at Boston.

The above being put to vote and passed in the affirmative.

JOHN CHILDS,	} Committee.
JONA WHEELER,	
ANDREW SMITH,	
JAMES DAVIS,	

JOHN CHILDS, Moderator.

The late Samuel C. Damon, in his "History of Holden," says :

"The population of the town at that time numbered about seven hundred and fifty. Nearly one-

tenth of the entire population was prepared to engage in actual service. During the progress of the war drafts were made for soldiers from Holden to serve at various military stations in the Northern States. Wherever troubles existed, or dangers were apprehended, thither marched the soldiers from this town. Some went to Rhode Island, others to New York, New Jersey, Pennsylvania and Virginia. The terms of service of individual soldiers in the common militia, when added, amount to seventy-four years, supposing it to have been performed by one man, at an expense to the town of £1961 0s. 11d. No reference is made in this calculation to the soldiers in the regular Continental army, under the immediate command of Washington. In this army twenty-five soldiers enlisted from Holden for the term of three years, or during the war. Each one of these men received £20 or more as bounty money at the time of their enlistment, so that during the year 1777 £763 0s. 12d. were paid from the town treasury to discharge the liabilities which had been incurred to enlist soldiers.

"Thomas Heard was the only person killed in actual service. He fell near Saratoga, N. Y., and his dead body was borne away by William Ebet. Moses Wheeler and Jeremiah Fuller died at Valley Forge, Penna., having suffered most intensely from cold and hunger. David Potter deserted to the enemy, having previously been saved from the ignominy of a public execution by the timely interposition of Lady Washington. The conduct of his brother (James) was far different. He was among the foremost to o'erleap the heights at Yorktown, causing thousands of the British soldiers to surrender, whilst their General, Lord Cornwallis, surrenders his sword into the hand of Washington.

"Capt. George Webb was the only commissioned officer in the Continental service from Holden. At the time of his enlistment he was not an inhabitant of the town. He came with his family to this place during the war. Captain Webb was a fearless soldier and a high-spirited officer. Whenever an enterprise requiring bravery and skill was to be undertaken, Washington and Lafayette knew Captain Webb to be a man to their minds. I hold in my hand the original copy of a letter addressed by General Lafayette to Captain Webb. I will read the first sentence: '*Dear Sir* : Your successful skirmish had afforded me the most greatest pleasure, and I request you will receive yourself and present to your company my best thanks on the occasion.' It was in the company of Captain Webb that Deborah Sampson, an American young lady, served as a Continental soldier for nearly three years. She performed the duties of every station assigned to her with punctual exactness, fidelity and honor.

"The citizens of Holden entered into a solemn covenant to sustain the committee chosen to watch for the public safety, and voted that such persons as refused to unite with them should have their names

published in the *Boston Gazette*, as enemies of their country. The town, also, 'voted that every blacksmith, shoemaker, miller and housewright, do not directly or indirectly do or cause to be done any sort of business, in their respective occupations for any of those persons' who would not sign the covenant, which was 'to be lodged at John Abbots, one month for the inhabitants of Holden to sign.' Tradition reports that a Mr. Goulding, living in the south part, was so offended with this measure of the town, that he immediately commenced building the grist-mill and saw-mill now owned by Mr. Bennett.

"This decided movement was not regarded as sufficient for the general good. To prevent monopoly upon such articles as were considered the necessities of life, the selectman and Committee of Safety were empowered by an act of the Provincial Congress, to establish ultimum prices.

Farming labor from the 20th of June, not to exceed 3 shillings per day ; wheat, 6s. 0d. per bushel ; Indian corn, 3s. 0d. per bushel ; Spanish potatoes, 1s. 1d. per bushel in the fall ; ditto, 6s. 6d. per bushel in the spring ; beans, 6s. 0d. per bushel ; clean flax seed, 6s. 0d. per bushel ; turnips, 0s. 8d. per bushel ; apples, 0s. 8d. per bushel ; horse keeping overnight, 1s. 4d. ; oats, 0s. 3d. per mess ; lodging, 0s. 3d. 1f. per night ; potluck, 0s. 8d. per meal ; New England flip, 0s. 9d. per mug ; West India flip, 0s. 11d. per mug ; good grass-fed beef, 0s. 2d. 2f. per lb. ; new milk, 0s. 2d. per quart ; tobacco, 0s. 7d. per lb. ; a glass of New England rum, 2 coppers ; doctor's travel, 6d. per mile—out ; shop joiner to have 3s. per piece for common colored chairs with bottoms ; the rest of their work in the same proportion.

"The most abundant evidence might be adduced to show that the people of Holden unitedly, cordially and manfully, engaged with their fellow-countrymen in the War of the Revolution.

"The immediate and lasting effects of the Revolutionary War upon the interests of this town deserve a few passing remarks. The unwise policy of England was first felt along our sea-coast. Numerous families, hitherto obtaining their livelihood from the seas, were driven to other pursuits. For this cause not less than ten families removed from Harwich and vicinity (upon the Cape) to Holden. Such were the Rogers' settling two miles south. All lands belonging to persons supporting the cause of the mother country were confiscated. Many hundreds of acres within this township were thus transferred to the State. The history of one tract, containing about six hundred acres, deserves notice. This tract of woodland belonged to William Brattle, Esq., of Cambridge. Under an act of the Legislature, passed 1781, it was sold to pay State debts. Monsieur Pierre Matthieu Andre, captain of the ship '*Jonathan*,' belonging to Jean Francis Billou, of Marseilles, in the south of France, purchased this tract of land, for one thousand one hundred and twenty-four pounds, or about six dollars per acre. The ship '*Jonathan*,' having been condemned as unseaworthy, was sold, and a part of the avails was invested in the purchase of this land. For many years it was under the care of Ebenezer Estabrook, Sr., and subsequently under the care of his son. Sufficient wood was, from time to

time, cut off to pay the taxes. After much negotiation it was sold, in the year 1826, for about eleven dollars per acre. The proceeds were transmitted to the heirs of the original owner in France; a sufficient amount having been deducted to defray expenses attending the sale. The origin of the name—*French land*, will have been apparent."

The following were in the service from Holden:

Jeremiah Fuller.	Benjamin Mead, Jr.
Peter Partridge.	Attai Hubbard.
Ezra Rice.	Timothy Marshall.
David Potter.	Solomon C. Cheney.
Moses Wheeler.	Constant Webb.
Nathan Wheeler.	Asa Greenwood.
Thomas Heard.	Jonathan Flagg.
William Flagg.	Francis Winch.
Increase Stearns.	Jabez Metcalf.
Andrew Allard.	Jonathan Howe.
Thomas Stevens.	Joseph Howe.
John Griffin.	Solomon Parmenter.
David Brown.	James Davis, Jr.
Thomas Kimball.	Edmund Davis.
John Williams.	Jacob Black.
Samuel Roe.	Nathaniel Shephard.
John Bayley.	Francis Wilson.
Jonathan Bartlett.	Samuel Thompson.
Jonathan Flagg.	John Obens.
Simon Peter.	Samuel Hubbard.
Barzilla Stickney.	Isaac Chenery.
William Ebet.	Sparrow Crosby.
Daniel Perry.	Jonathan Moore.
Philip Boston.	George Webb.
John Abbott.	Bezaleel Turner.
John Potter.	Jonathan Nichols.
Artemas Dryden.	Tilla Chaffin.
Increase Stearns, Jr.	Solomon Davis.
William Heard.	Daniel Grout.
John Dodd.	James Potter.
Micah Harrington.	Thomas Davis.
Lemuel Harrington.	Samuel Grant.
Nathan Harrington.	Thomas Wheeler.
Lemuel Heywood.	Aaron Wheeler.
Samuel Heywood.	Daniel Hinds.
Ephraim Holt.	Joshua Gale.
John Black.	Simon Stickney.

Zillas Stickney.

The following is an account of what cost the Town of Holden has been at during the present war *in part*:

	£	s.
70 men the first alarm at Cambridge, April 19, 1776.....	40	0
27 men 8 months at Winter Hill, May, 1775.....	238	0
12 men 6 weeks at Dotchester, December, 1775.....	26	17
18 men 2 months at Dotchester, February, 1776.....	30	0
18 men 5 months at New York, July, 1776.....	180	5
3 men 1 year at the Northward, 1776.....	108	0
4 men 5 months at Ticonderoga, July, 1776.....	52	0
4 men 5 months at Boston, July, 1776.....	30	0
15 men 2 months at New York, September, 1776.....	63	0
15 men 3 months at the Jerseys, December, 1776.....	150	0
8 men 8 months at Rhodisland, upon a Request of the General Court, April 12, 1777.....	64	0
11 men 6 weeks at Bennington, July, 1777.....	70	0
15 men 3 months at Stillwater, September, 1777.....	90	0
7 men 2 months at Providence, May, 1777.....	28	0
20 men 1 month at Fort Edward, October, 1777.....	38	0
1 man 6 months to Guard Stores at Brookfield, June, 1777.....	8	0
2 men 6 months to Guard Stores at Brookfield, Dec., 1777.....	12	0

5 men 9 months at West Point, July 5, 1776.....	187	10
6 men 2 months at Rhodisland, September 20, 1779.....	10	10
8 men 3 months to Claverick, October 9, 1779.....	58	16
19 men upon an alarm to Hadley, August, 1777.....	26	0
2 men at Rutland, April, 1780.....	16	0

SHAYS' REBELLION.—The insurrection known as Shays' Rebellion will not be treated in detail here. It may be found elsewhere in this work.

THE CIVIL WAR.—In the late Civil War Holden responded promptly to the President's call for troops, and her record is one in which her citizens may justly feel a patriotic pride. The town furnished two hundred and four men for the war, eleven of whom were commissioned officers. Amount of money expended, exclusive of State aid, was \$7,963.38, and a large amount was probably secured by private contribution. The first town-meeting relative to the war was held under date of April 20, 1861, when one thousand five hundred dollars were appropriated "for the benefit of the members of the Holden Rifle Company and their families."

The Holden Rifle Company formed a portion of the second regiment that went from Massachusetts (three months' men), and left for the South April 18, 1861.

In 1876 the town-hall was remodeled and memorial tablets were placed in the interior bearing the names of thirty men who lost their lives in the service, as follows: Captain Ira J. Kelton, George T. Bigelow, Albert Creed, John Fearing, Edward Clark, Charles Gibbs, James W. Goodnow, James W. Haley, Lyman E. Keyes, George W. Newell, Michael Riley, John B. Savage, Amasa A. Howe, George T. Johnson, John K. Houghton, William C. Perrey, Levi Chamberlain, Frank Lumazetta, Uriah Bassett, Henry M. Fales, George Thurston, Calvin Hubbard, Sergeant Harlem P. Moore, Winslow B. Rogers, Alfred S. Tucker, Henry M. Holt, H. Erskine Black, Elisha C. Davenport, John Handley and Horace L. Truesdell.

## CHAPTER CLXXII.

### HOLDEN—(Continued.)

#### ECCLIESIASTICAL HISTORY.

First Congregational—First Baptist—Roman Catholic.

It has been mentioned on a previous page that one of the first acts of the town was to provide for religious worship. One year later, in 1742, it was voted to call Rev. Joseph Davis to the gospel ministry, and he was ordained Dec. 22, 1742, upon which date the church was organized with fourteen members. "The connection," says Rev. Mr. Damon, "of the Rev. Mr.

Davis, as pastor of the church in Holden, continued until January, 1773, when he was dismissed at his own request. From a printed sermon of Mr. Davis I have gathered some statistics relating to the history of this town, worthy of preservation, as they were collected by one so intimately acquainted with the first settlers of Holden. I would remark that Mr. Davis preached this sermon January 2, 1793, fifty years having passed since his introduction to the work of the gospel ministry. 'At first,' writes Mr. Davis, 'your increase was slow; little alteration for the term of five years; but afterwards the increase was more; for, at the end of ten years, your number of families was fifty-five. For the second ten years the increase in families was small—only ten. The last ten years of my ministry the increase was fifty-one. The whole number at my dismissal, about one hundred and six families. There had been 642 births; about 330 were males and about 310 were females. There have died 214 persons; about 80 under the age of two years and more than half under the age of five. The number baptized by me, about 520. At the end of twenty years the church consisted of about 75 members, and when I was dismissed of 86: 38 males, 48 females. There was a remarkable sickness about seven years after my settlement; 22 persons died. And about six years after, the year after the *great Earthquake*, a raging distemper carried off about 45 persons in a short time, mostly younger persons and children.'

Mr. Davis remained until 1773. Dec. 21, 1774, Rev. Joseph Avery was ordained pastor, and remained with the church until his death, March 5, 1824. "During Mr. Avery's pastorate an unpleasant controversy, relating to church music, disturbed the peace of society in town, near the close of the 18th century. Some of the regular attendants upon public worship refused to occupy their seats in the meeting-house, unless the psalms and hymns could be sung without the aid of the unconsecrated viol and the unhallowed pitch-pipe. The venerable pastor exerted most strenuously his peace-making talents. An uncommon share he was acknowledged to possess. A reconciliation between the parties was effected by the counsel and advice of so wise a mediator."

One member, in a communication to Mr. Avery, in relation to this matter, says:

"The mode of singing is so much offensive to me, that I cannot Glorify God, nor be Edified myself: and further the Church have gon Contrary to the Covenant owned be Every Brother of the Church: in the Covenant are these words promising Carefully to avoid all sinful stumbling Blocks and Contentions to metion no more on the Covenant: the mere musick as you Call it, is the Block in my way, as your Self and the Church are Sensable of: this mere Music has No melody at all in it: and further I would wish to se the Carrecter Discribed in the Letter subscribed to Mr — and my self truly and faithfully observed,

and Not Lord it over any ones Conscience: I answer for my Self and No other."

Horatio Bardwell, who had served a short time as joint pastor under Mr. Avery, remained until the ordination of Rev. William P. Paine, October 24, 1833. Mr. Paine remained pastor until his death, November 28, 1876,—a period of over forty-three years. His successors have been as follows: Revs. William A. Lamb, H. M. Rogers and Melven J. Allen, present pastor.

The first house of worship, which was erected in 1789, was remodeled in 1827–28. It was further improved and beautified in 1874, and in December of that year was rededicated.

**THE BAPTIST CHURCH.**—The recorded history of the Baptist Church in Holden begins June 4, 1804, when Ephraim Mirrick was chosen moderator; John Hubbard, clerk; Asa Howe, collector, and Ephraim Mirrick, associate deacon, when no deacon was present from Templeton. The Rev. Elisha Andrews, pastor of the Baptist Church in Templeton, preached in town for some years before a church was organized. Baptist Church members here were regarded as a branch church of the Baptist Church in Templeton.

Rev. Mr. Damon says: "Tradition reports that Mr. John Perry, living upon the farm known as the Perry Farm, was the first person of this denomination belonging to the town. The records of the town partially confirm the voice of tradition. An article was inserted in the warrant for the town-meeting, to be held May 5, 1788, 'To see if the town will answer the petition of Mr. John Perry and others of the *Baptis* belonging to said Holden.' The vote of the town in reference to this article reads as follows: 'Voted not to allow the petition of Mr. John Perry and others of the *Baptis* belonging to Holden.' From other records upon the town-books it appears that this petition related to the abatement of taxes to be raised for the support of the Established Church."

The church was organized December 31, 1807, with the following members: Aaron Perry, Ephraim Mirrick, Hezekiah Walker, Abraham Gates, John Hubbard, Solomon Parminter, Asa Howe, Silas Walker, Charles Brooks, Eli Hubbard, Benjamin Hubbard, Jotham Howe, Thomas Howe, Samuel Abbott, John Walker, Paul Colburn, Thomas Marshall, Daniel Shepard, Pelatiah Allen, John Brown, William Everett, Polly Sargent, Lydia Parminter, Lydia Hubbard, Mehitabel Colburn, Hannah Howe, Sally Howe, Polly Walker, Lydia Parminter, Jr., Polly Hubbard, Elenor Howe, Polly Henry, Lucretia Howe, Nancy Brooks, Polly Buck, Patty Caldwell, Sarah Pratt, Sarah Mason, Rachel Walker, Dorothy Howe, Tabitha Perry, Thankful Mason, Lucy Walker, Eunice Metcalf, Judith Gates, Persis Walker and Nabby Shepard.

The council which organized this church convened at the house of Abraham Gates, and the following

were present: From Harvard, Elder George Robinson, Deacon Ephraim Emerson, Charles Chase and Jeremiah Dyer; from Leverett, Elder Elijah Montague and Peter Ripley; from Sutton, Elder Samuel Waters, Deacon Moses Putnam, Solomon Marble and Jonah Golding.

The following is a list of pastors: Elisha Andrews, Thomas Marshall, John Walker, Appleton Belknap, George Waters, Samuel Everett, Andrew Pollard, Woodman H. Watson, J. H. Tilton, T. C. Tingley, J. H. Tilton (second pastorate), Lester Williams, John S. Harridon, George W. Kinney, John Rounds, John K. Chace, I. S. Hamblin and D. F. Ester, present pastor.

The first meeting-house was erected in 1820, and has twice since been remodeled and improved.

The additions by baptism the last two decades have been one hundred and ninety-seven, and since its organization, in 1807, six hundred and sixty-eight. The present membership is one hundred and seventy-nine.

**Deacons.**—Silas Walker,<sup>1</sup> chosen 1811; Winsor Newton,<sup>1</sup> chosen 1811; John Woodbury,<sup>1</sup> chosen 1820; Jonas Warren, chosen 1836; James S. Moore,<sup>1</sup> chosen October 4, 1839; Willard Allen,<sup>1</sup> chosen November 27, 1840; George S. Goddard, chosen May 15, 1857; William Howe, chosen December 4, 1873. William C. Metcalf, church clerk.

**CATHOLIC CHURCH.**—The history of the Catholic Church of Holden dates back to 1850, when a handful of Catholics applied for a priest to administer to them the rites of their holy religion. Instrumental in this cause were the old pioneers of Catholicity in Holden, the late Mr. Michael McLaughlin and Mr. James Prendergast; and divine services were held for the first time, and for a number of years, at Mr. McLaughlin's house by Rev. Father Gibson, then parish priest of St. John's Church, Worcester.

Later on, in 1860, the hall at Eagleville was used for church purposes; then the town-hall. In the year 1869 Rev. Thomas Griffin purchased land in Holden Centre, and by his untiring zeal a church was erected. Shortly after it was placed in charge of Rev. A. J. Derbuel as a mission of West Boylston parish, and later on as a mission of the parish of the Immaculate Conception, Worcester, Rev. Robert Walshe, pastor. During Father Walshe's charge the church was twice enlarged.

In 1884 Rev. James McCloskey was stationed as first parish priest of Holden. He remained until the fall of 1886, when he resigned. During his administration the present parochial residence was purchased.

Rev. Thomas F. Joyce was next installed as parish priest, and in the month of January, 1888, he died; his remains were interred in the church-yard near the church. He was succeeded by the present pastor, Rev. John D. McGann, who has done much to

strengthen not only the spiritual, but also the financial condition of the parish, and preparations are now in progress for the erection of a new church, as the present one is fast becoming too small to accommodate the increasing congregation.

The Catholic population now numbers over one thousand souls.

Among the prominent clergymen who have administered the spiritual wants of the parish are Rt. Rev. P. T. O'Reilly, D.D., bishop of Springfield; Rev. John J. Power, D.D., V.G.; Rev. P. J. Garrigan, D.D., vice-rector of the Catholic University at Washington.

## CHAPTER CLXXIII.

### HOLDEN—(Continued.)

#### EDUCATIONAL.

*Early Schools—Statistics of 1840—The Schools of 1888—School Committee—The Damon Memorial—Manufactures.*

**SCHOOLS.**—The citizens of Holden early manifested an interest in educational matters, and at the second town meeting, held May 19, 1741, it was "voted to have a writing and reading school."

"During the early history of the town frequent mention is made that public schools were kept at houses of private persons. In 1752 a school was kept 3 months at Mr. Joseph Hubbard's house: another school, the same year, at Lieut. Cyprian Stevens' house. During the following year schools were kept in other parts of the town,—3 months at the centre; 3 months at Jonathan Lovell's house; and 3 months at Lieut. Richard Flagg's house. In 1754 it was voted, in town-meeting, that £14-6s.-8d. be appropriated for the erection of a school-house at the centre of the town. I have not been able to learn that this vote was carried into execution. Tradition reports that the first school-house was erected in the east part of the town, in the neighborhood of the Bullard place. The sum annually appropriated for schools gradually increased from year to year. In 1752 the sum of £11-12s. was raised for 6 months' schooling; and in 1762 the sum had increased to £30, including the interest upon the *lime lot*."—(Damon).

The following are school statistics for 1840:

No.	Part of the town.	No. of scholars between 3 and 21 years.	Appropriations.
1,	Centre.....	110	\$176.00
" 2,	Unionville.....	125	150.00
" 3,	East Part.....	65	94.00
" 4,	Flagg District.....	48	79.00
" 5,	Eagleville.....	109	162.00
" 6,	Chaffin District.....	55	76.00
" 7,	Walker District.....	31	55.00
" 8,	West Part.....	20	40.00
" 9,	Near John Estabrook's.....	48	40.00
" 10,	Near Samuel Brook's.....	32	45.70
" 11,	Near Widow Allen's.....	35	53.04
" 12,	French Woods' District.....	65	67.57
			733
			\$1062.67

<sup>1</sup> Deceased.

Average attendance—Summer, 387; winter, 414.

Number of scholars between four years and sixteen years, 485.

Number of teachers—Summer, 12 females, 0 males.

Number of teachers—Winter, 5 females, 9 males.

Average wages per month, including board, \$11.61, females; \$26.87, males.

Average value board per month, \$6.06, females; \$8, males.

Private schools and schools kept to prolong common schools, 5.

Aggregate number of months, 9.

Aggregate number of scholars, 45.

At an expense to individuals, \$135.

The following is a statement of schools, teachers employed and number of scholars, for 1887 and 1888:

*High School.*—Alonzo K. Learned, principal; assistant, Miss Lizbeth M. Larned; pupils, 48.

*Centre District.* (Grammar.)—Teachers, Miss Addie M. Black, Miss Nellie M. Bascom; pupils, 43.

(Primary.)—Teacher, Miss Maggie Rice; pupils, 47.

*Unionville School.* (Mixed.)—Teacher, Miss Belle M. Rice; pupils, 18.

*Chaffinville School.* (Mixed.)—Teachers, Miss Eldridge, Miss M. E. Newcomb; pupils, 35.

*Number Four.* (Mixed.)—Teacher, Miss N. D. Chamberlain; pupils, 15.

*Jeffersonville Schools.* (Grammar.)—Teachers, R. D. Hubbard, C. W. Chace; pupils, 33.

(Secondary.)—Teachers, Miss N. M. Bascom, Miss S. L. Austin; pupils, 49.

(Intermediate.)—Teacher, Miss L. J. Andrews; pupils, 44.

(Primary.)—Teacher, Mrs. S. A. E. Thompson; pupils, 45.

*Dawsonville School.* (Mixed.)—Teacher, Miss Maud E. Davis; pupils, 28.

*Northwood School.* (Mixed.)—Teacher, Miss Irene A. Lord; pupils, 34.

*New State School.* (Mixed.)—Teachers, Miss Mary E. Murphy, Miss Bertha M. Drury; pupils, 31.

*South School.* (Mixed.)—Teacher, Miss Sadie I. Packard; pupils, 21.

*Quinapoxet Schools.* (Grammar Department.)—Teachers, Mary L. Corey, Miss Miriam W. Newcomb, Miss Grace C. Whiting; pupils, 25.

(Primary Department.)—Teachers, Miss Etta M. Greene, Miss A. E. Butterfield, Miss N. D. Chamberlain; pupils, 35.

*Statistics.*—Number of persons between five and fifteen according to the annual school census, taken in May, 1887, 492; number between eight and fourteen years of age, 341; number enrolled on our school records, including High School, 551.

Salaries of teachers: High School principal, \$1000; assistant, \$432. Total, \$1432.

Centre Grammar, \$300; Centre Primary, \$220; Unionville, twenty-four weeks, \$168; Chaffinville, \$220; No. 4, twenty-four weeks, \$168; Jeffersonville Grammar, \$360; Jeffersonville Secondary, \$240; Jeffersonville Intermediate, \$240; Jeffersonville Primary, \$236; Dawsonville, \$210; North Woods, \$210; New State, \$210; South School, \$210; Quinapoxet

Grammar, \$250; Quinapoxet Primary, \$210. Total, \$4,884.

The School Committee for 1887 and 1888 was as follows: W. E. Austin, chairman, term expires 1890; Mrs. M. E. Warren, secretary, term expires 1889; Charles E. Parker, term expires 1889; E. P. Thompson, resigned November, 1887; Mrs. I. M. Ball, term expires 1890; Mrs. Allen G. Davis, term expires 1888; Thomas Hennessey, truant officer.

*LIBRARIES—The Damon Memorial.*—The citizens of Holden may well congratulate themselves in having one of the finest library buildings in the county. This building is known as the Damon Memorial, and was the gift of Mr. Samuel C. Gale, of Minneapolis, Minn. It contains the Gale Free Public Library and the High School. It was dedicated August 29, 1880, with appropriate ceremonies. It was presented to the town of Holden by Mr. Samuel C. Gale, and accepted by Mr. Charles E. Parker, chairman of the Board of Selectmen. An address was delivered upon the occasion by Colonel Thomas Wentworth Higginson, the distinguished *litterateur* of Cambridge.

The committee of arrangements at the dedication consisted of Alonzo K. Learned, Henry W. Warren, Waldo E. Austin, Charles E. Parker and Stillman F. Morse.

*The Holden Library Association* was organized October 4, 1876. The first officers were: Trustees—Colonel I. N. Ross, William Howe, Mrs. C. P. Phelps (three years), William C. Metcalf, Gates Chapman, Mrs. I. M. Ball (two years), H. B. Morse, J. T. Abbott, Mrs. W. H. Fairbanks (one year); President, I. N. Ross; Vice-President, H. B. Morse; Secretary and Treasurer, William D. Cheney.

At the annual meeting in 1880 the librarian reported 668 books as belonging to the library; in 1881, 755; in 1883, 1030.

Colonel I. N. Ross served as president until his death, in 1881, when William C. Metcalf was elected president. In 1883 H. W. Warren presided; W. E. Austin has been president since 1883.

In July, 1888, a special meeting was called to take action with reference to presenting the library to the town, which, with the books presented by the Hon. S. C. Gale, were to form a "Free Public Library," and it was voted that trustees of the Holden Library Association be authorized and directed to transfer the books and other property connected with this library to the proper authorities of the town of Holden whenever the said town shall vote to accept the same in accordance with the constitutional provisions of this association. In accordance with which vote fourteen hundred volumes were turned over to the "Gale Free Public Library of Holden."

## CHAPTER CLXXIV.

## HOLDEN—(Continued.)

*Physicians—Masonic—The Centennial Celebration—Town House—Distinguished—Natives—Population—Valuation.*

**PHYSICIANS.**—The first physician in Holden was Isaac Chenery. He was a surgeon in the Revolution, and was one of the town's most esteemed citizens. He was born in Medfield in 1742, and died October 20, 1822. Other physicians have been as follows: Thaddeus Chenery, son of Isaac; Moses Wheeler, Aaron Holbrook, John Smith and son, John M. Smith, George Estabrook, David Davis, Aaron E. Babcock, Warren Partridge, A. G. Skinner, Augustus Robbins, J. O. West, A. D. Smith, J. S. Ames, A. B. Robinson, J. S. Rood and C. W. Stickney. Drs. Ames and Stickney are the present physicians. The former has practiced here since 1858, and the latter since 1882.

A commandery of Knights Templar and appendant orders was established here June 24, 1825, with the following members: Jonas L. Sibley, James Estabrook, Lewis Thayer, Samuel Stratton, Orin Dalrimple, Elisha Andrews, Jacob Frieze, Daniel Tenney, George Estabrook, David Davis, Jacob Wood, Joel Nurse, Manasseh Willard and Adin Ballou.

**THE CENTENNIAL CELEBRATION** of the organization of the town was held May 4, 1841. The committee of arrangements consisted of Samuel Damon, Charles Chaffin, Silas Flagg, Lemuel Fiske, Paul Davis, John Davis, William Metcalf, Samuel Foster, Silas M. Hubbard, James Winch, Jason Mann, Jonathan Rice, Judah Wright. The marshals were Chenery Abbott, Le Baron Putnam, Joab S. Holt, Charles L. Knowlton, Ethan Davis, Nathan Howe, William Howe, Sparrow Crosby, James S. Moore. The historical address was delivered by Rev. Samuel C. Damon, and was a faithful review of the history of the town. Other addresses were delivered by William Lincoln, S. F. Haven, Colonel Isaac Davis, Colonel James Estabrook and others.

The town-house was erected in 1837, at a cost of \$3,869.58. In 1876 it was remodeled at a cost of \$4,292.42. Previous to the erection of the town-house the town-meetings were held in the Congregational Church.

Holden has sent many bright and capable men and women into missionary fields; among these may be mentioned Deacon Isaac Fisk, to the Choctaw Indians, in 1819; Miss Abigail P. Davis, wife of Rev. William Goodall, to Beyroot, in 1822; Miss Hannah Davis, wife of Rev. Alden Grout, to the Zulus, in 1834; Edward Bailey and wife, Caroline Hubbard, to the Sandwich Islands, in 1836; Miss Myra Fairbanks, wife of Rev. Cushing Eells, to the Flathead Indians, in 1838; Mrs. Goddard, daughter of Asa Abbott, to China; Miss Isabel Davis, wife of James F. Clarke, to Turkey.

A worthy son of Holden was the Rev. Samuel C. Damon, who was born February 15, 1815. He was a clergyman, ordained September 15, 1841, and on the 15th of the following February he sailed for Honolulu, under the auspices of the Seaman's Friend Society, as chaplain. He remained in Honolulu until his death, in 1888. Mr. Damon was largely interested in the history of his native town, and, as before mentioned, delivered an historical address at the centennial celebration of the organization of Holden, May 4, 1851. He subsequently wrote the "History of Holden," which was published in 1841. Within a few years he had revised this work, and in about 1882 a proposition to publish the book was submitted to the town. The committee appointed to consider the matter reported favorably, but no further action was taken. (The writer is indebted to Mr. Damon's "History of Holden" for valuable material used in the preparation of this history.)

**POPULATION.**—The earliest census of the town was taken in 1765.

Number of families, 75; males under sixteen years, 161, above sixteen years, 109; females, under sixteen years, 116, above sixteen years, 107; negroes, 2. Total, 495.

The following is the census of 1773:

David Winch .....	5	James Dods.....	3
Elijah Rice.....	6	Rd Flagg .....	5
Masten Holt.....	5	Daniel Black.....	6

Dea David Fiske.....	8	Jesse Allen.....	5
Samuel Heywood.....	9		

In 1790, 1077; in 1800, 1142; in 1820, 1402; in

1830, 1718; in 1840, 1351; in 1853, 1945; 1870, 2000; 1875, 2180; in 1880, 2499; in 1885, 2471.

The valuation of the town in 1781 was \$89,604.15; in 1840, \$576,622; in 1888, \$1,616,783.

**MANUFACTURING.**—The nucleus of the large business now conducted by Messrs. Howe & Jefferson, at Jeffersonville (formerly known as Drydenville), was made in 1825, when a small factory of eight looms was built by a Mr. Morse. It was soon after purchased by John Jephardson and run as a satinete-mill. At about this period Colonel Artemas Dryden also built a mill which contained eight looms. In 1858 Deacon William Howe and Major Theron E. Hall began the woolen manufacture here in a small one-set mill. In 1860 Major Hall's interest passed into the hands of M. V. B. Jefferson, and the business was conducted under the firm-name of Howe & Jefferson until 1880, when Mr. Jefferson purchased his partner's interest, and the mill has since been run by him under the name of the Jeffersonville Manufacturing Company, making woolen goods. Jeffersonville is a station on the Fitchburg and Central Massachusetts Railroads. The post-office was established in 1874, with M. V. B. Jefferson as postmaster, who was succeeded under President Cleveland's administration by the present incumbent, William J. Prendergast.

The mill at Damonville came into the possession of Charles P. Dawson in 1869. Mr. Dawson has enlarged the capacity of the mills, and greatly improved the village. He manufactures satinets.

Spring Dale Mill was built in 1875-76 by its present proprietor, L. J. Smith, of West Boylston, for the manufacture of fancy cassimeres.

In 1821 the saw and grist-mills at Eagleville, owned by Caleb Kendall, were purchased by Samuel Clark, and a small factory erected. This mill was destroyed by fire in 1834, and in the following year was rebuilt, and has since been enlarged. In 1840 the establishment was called the "Eagleville Manufacturing Company." It had, at this time, sixteen hundred spindles, and the annual product amounted to two hundred and seventy-five thousand yards of sheeting. It is now run by S. F. Morse.

The factory at Unionville is claimed to have been the first factory in Worcester County erected for the purpose of spinning cotton yarn. This business was commenced here in 1809, by Eleazer Rider & Son. The weaving by power-looms commenced in 1822, and cotton cloth was manufactured. John Lees was the owner. These mills were burned in 1884.

The North Woods factory was built by B. T. Southgate for the manufacture of woolen goods. It was changed to cotton goods by William Buffum in 1827. Its capacity in 1840 was two hundred and fifty thousand yards of sheeting annually. It had, at that time, fourteen hundred and eighty spindles and forty looms. It is now owned by the West Boylston Manufacturing Company, and run by A. H. Turner.

The mill at Quinnepoxet Village was built by S.

Damon in 1831. It was burned in 1869, and rebuilt soon after. It is now owned by Cyrus G. Woods, and satinete is manufactured. The post-office was established here in 1884, with Mr. Woods as postmaster, and is located in the fine business block erected by him. He has also purchased the Lovellville property, which he has greatly improved, practically uniting the two villages.

The mills at Chaffinville were built about 1820. They were burned a few years since. Waldo E. Austin's saw-mill was rebuilt in 1881, and steam-power added in the following year.

The tanning industry at Eagleville dates back to 1825, when John Maynard built a tannery at this place, then called "Brick City." In 1840 Waterman G. Warren and his brother Samuel commenced tanning here. This partnership lasted until 1850. In that year Mr. W. G. Warren purchased the Edward Richardson tannery, which was built prior to 1789. The present tannery at Eagleville is a fine structure, and its facilities for producing card-leather are unsurpassed by any in the State.

This firm has been successively known as B. & H. W. Warren & Co., W. G. Warren & Sons., and W. G. Warrens' Sons. (See biography of W. G. Warren, on page 1393 of this work.)

## CHAPTER CLXXV.

HOLDEN—(Continued.)

### CIVIL HISTORY.

*The First Town-Meeting—Officers Elected—List of Town Clerks from 1741 to 1889—Selectmen—Assessors—Treasurers—Representatives—Delegates to Provincial Congress.*

**CIVIL HISTORY.**—The first town-meeting was held May 4, 1741, and among the officers chosen were Cyprian Stevens, town clerk; Simon Davis, John Biglo and Cyprian Stevens, selectmen; and Samuel Clark, Samuel Pierce and Samuel Heywood, assessors. Two weeks later the second town-meeting was held and the first vote was "to have the gospel preached in town." It was also voted, at this meeting, "to have a writing and reading school."

The following is a list of town officers from 1741 to 1889:

*Clerks.*—Cyprian Stevens, 1741-46; Samuel Heywood, 1747-51; Samuel Pierce, 1752, '54-57; Joseph Greenwood, 1753; Israel Davis, 1758-74, '78-81; John Childs, Jr., 1775-82; David Fiske, 1783-86, '88, '89; Noah Haven, 1787; John Dodd, 1790-1801; William Dodd, 1802; Paul Davis, 1803-20; Paul Davis, Jr., 1821-57.

*Selectmen.*—Simon Davis, 1741-43; John Biglo, 1741-46, '48-51, '55, '56, '61; Cyprian Stevens, 1741, '44-46; Samuel Thompson, 1742, '54; Samuel Pierce, 1743, '46, '48-52, '56-58; Samuel Heywood, 1744, '48

-51, '59, '60, '64, '66; David Brown, 1745; Samuel Hubbard, 1747, '53-55, '57, '62, '64; Jonathan Lovell, 1747, '52, '59, '60; William Nichols, 1747; Richard Flagg, 1752-58, '60, '63, '79, '80; Israel Davis, 1753-55, '58-60, '63-71; Joseph Hubbard, 1753-55, '61, '62, '64-67, '72, '73; Joseph Greenwood, 1753, '61; James Boyd, 1756-58; Amos Heywood, 1756, '57, '62, '63, '80; John Child, 1758, '62-67, '70-76; Benjamin Howard, 1759; Bezaleel Fiske, 1759, '60; Jonathan Rice, 1761, '67-71, '74-76; David Fiske, 1761, '62, '69-71, '77, '78, '83; Jonathan Wheeler, 1763, '72; Isaac Smith, 1765; Benjamin Mead, 1765-71, '73-75, '79; Paul Raymond, 1768, '69, '73-77; Ignatius Goulding, 1768; Andrew Smith, 1772; James Davis, 1772-79, '84; Moses Smith, 1776-78, '80; John Child, Jr., 1777; Jason Gleason, 1778, '79, '88; John Perry, 1778-81; Samuel Thompson, 1780, '82, '83; Elisha Hubbard, 1781-83, '86, '87; Noah Haven, 1781, '83; Francis Wilson, 1781, '87; John Child, 1782, '83; William Nichols, 1782; Josiah Stratton, 1782, '88-91; Ebenezer Estabrook, 1784-86, '88, '90, '91, '94, '98-1803; Henry Taft, 1784, '89-91; Israel Davis, Jr., 1784-87; Elisha Myrick, 1784, '85; Nathan Harrington, 1785; Isaac Chenery, 1785, '86, '88, '89; John Dodd, 1786, '94-97; Samuel Hubbard, 1787, '92-95, '98-1801; Isaiah Brown, 1787; John Davis, 1789, '90-97; David Smith, 1789-97; George Webb, 1792, '93; Samuel Damon, 1792-97; William Drury, 1795-97, 1801, '05; Peter Hubbard, 1798-1800; Lemuel Abbott, 1798-1806; Elnathan Davis, 1798, 1802-04; James Dodd, 1799, 1800; Joseph Daniels, 1801, '03; Tilla Chaffin, 1804-08; Asa Wheeler, 1804-09; Ethan Davis, 1805-17; Heman Richardson, 1806-11; Samuel Heywood, 1807-11; Asa Greenwood, 1809-18; Lemuel Davis, 1810-14; John Chaffin, 1812-16; Abner Perry, 1812-15, '20-26; Silas Flagg, 1815, '17-26; Paul Davis, Jr., 1816-19; Samuel Damon, 1816-21, '27-31, '36; James Bailey, 1818, '19; Daniel Knowlton, 1819, '20; John Davis, 1820, '21; James Estabrook, 1821-24; William Metcalf, 1822-26, '30; Samuel Foster, 1822-25; William Flagg, 1825-28; Thomas I. Davis, 1826, '34-39, '40, '41; Thomas Howe, 1827-29, '31, '32, '34, '35; Samuel W. Hubbard, 1827-29; Farnum White, 1822-31; Charles Chaffin, 1829-35, '41; George Flagg, 1830-33, '40, '41; Tilla Chaffin, Jr., 1831, '33; John Lovell, 1832, '34; John F. Smith, 1832; Dennis Davis, 1833; Barney Howe, 1833, '37; Stillman Estabrook, 1834-36; John M. Goodale, 1835, '36; Joel Walker, 1836, '37; Paul Davis, 1837, '38; Willis Smith, 1837-39; Jacob Howard, 1837; Samuel D. Greenwood, 1837-40; Jonathan Chaffin, 1837-39; John Jepherson, 1838; Lyman Bryant, 1839, '40; James Winch, 1839, '40; James S. Moore, 1841; John Richardson, 1841.

*Assessors.*—Samuel Clark, 1741; Samuel Pierce, 1741, '43, '46, '48-52, '56-58; Samuel Heywood, 1741, '44, '48-51, '59; Simon Davis, 1742; John Biglo, 1742, '44-46, '48-51, '55, '56; Samuel Thompson,

1742, '54; William Nichols, 1743, '47; Cyprian Stevens, 1743-46; David Brown, 1745; Samuel Hubbard, 1747, '53-55; Jonathan Lovell, 1747, '52; Richard Flagg, 1752-58, '60, '61-64; Israel Davis, 1753-55, '59, '60, '63; Joseph Hubbard, 1753-55; Joseph Greenwood, 1753, '61, '62, '65, '66; James Boyd, 1756, '58; Amos Heywood, 1756, '57, '61, '62, '64-67, '69-71, '80; Bezaleel Fiske, 1759, '60; Isaac Bellows, 1762, '64, '68; Jonathan Wheeler, 1763; Benjamin Mead, 1765, '68; John Child, Jr., 1766-69, '75-77, '82; David Fiske, 1767, '69-71, '77, '78, '83-85, '87, '88; Jonathan Rice, 1770, '71; James Davis, 1772-76, '79, '82, '84, 1806; Ignatius Goulding, 1772, '73; Andrew Smith, 1772-74; Elisha Hubbard, 1774-78, '81-83, '86, '87, '89, '90, 1801-05; Isaac Chenery, 1778; Noah Haven, 1779, '81, '83, '84, '91, '92; Francis Wilson, 1779; Ebenezer Estabrook, 1780; Paul Goodell, 1780, '81, '87; Isaiah Brown, 1785, '86; John Dodd, 1785-1800; Paul Davis, 1788-1800; Elijah Rice, Jr., 1788; John Davis, 1789; George Webb, 1783; William Drury, 1794-1805, '07-17, '23, '34; James Dodd, 1801-03; David Smith, 1804, '05; Jonathan Flagg, 1806-10; Asa Greenwood, 1806-17; Lemuel Davis, 1811-14; Ebenezer Estabrook, 1815, '22-25-27; Paul Davis, Jr., 1818, '22-33, '35-41; Samuel Damon, 1818, '22-24, '35, '36; Ethan Davis, 1819-21; Abner Perry, 1819-21; Silas Flagg, 1825-33; William Metcalf, 1828, '29; Dennis Davis, 1830-33; William Flagg, 1834; Seth White, 1834; Willis Smith, 1834-36; Thomas J. Davis, 1837, '40; David Boyden, 1837, '38; Ira Broad, 1838, '41; Joel Walker, 1839, '40; John Richardson, 1839; Samuel D. Greenwood, 1841.

*Town Treasurers.*—William Nichols, 1741, '43, '45; John Biglo, 1742, '50; Samuel Thompson, 1744; Samuel Heywood, 1746-49; Israel Davis, 1751, '56-58; Joseph Hubbard, 1752-55; Jonathan Lovell, 1759; Bezaleel Fiske, 1760, '61; Samuel Hubbard, 1762-72; Nathan Harrington, 1773-83; James Davis, 1784-91; Elisha Hubbard, 1792-1803; Elnathan Davis, 1804; Ethan Davis, 1805, '06, '08-26; Samuel Damon, 1827-39; Paul Davis, 1840-51.

*Representatives since 1780.*—John Child, Jr., 1780, '82, '83, '90; Rev. Joseph Davis, 1781; Israel Davis, Jr., 1786; Josiah Stratton, 1787; John Dodd, 1792, '93, '95, '96, '98, 1800, '01; William Drury, 1802, '05-18, '20; Elnathan Davis, 1803, '04; Ebenezer Estabrook, 1814-16, '19; Ethan Davis, 1817, '21, '26; Samuel Damon, 1823, '24, '31-33; Silas Flagg, 1828, '29, '35, '38, '39; Asa Broad, 1830, '31; Charles Chaffin, 1832-34; Paul Davis, 1834-36; John Chaffin, 1831; Willis Smith, 1837; Tilla Chaffin, 1838, '39; John Richardson, 1840.

*TOWN OFFICERS (chosen March 7, 1842).*—Selectmen, Charles Chaffin, Thomas J. Davis, James S. Moore, John Richardson, John Watson; Assessors, Samuel D. Greenwood, Paul Davis, Ira Broad; Representative, William Flagg.

1843.—Selectmen, Samuel D. Greenwood, James S. Moore, John Watson, Willis Smith, Ethan Davis;

Assessors, Paul Davis, Samuel D. Greenwood, Ira Broad; Representative, Ira Broad.

1844.—Selectmen, Samuel D. Greenwood, David Davis, Lyman Bryant, Willis Smith, Ethan Davis; Assessors, Paul Davis, Samuel D. Greenwood, Ira Broad; Representative, David Davis.

1845.—Selectmen, Samuel D. Greenwood, David Lyman Davis, Bryant, George W. Bascom, Asa Broad; Assessors, Paul Davis, Samuel D. Greenwood, Ira Broad; no representative chosen.

1846.—Selectmen, Samuel D. Greenwood, Lyman Bryant, George W. Bascom, Asa Broad, Stillman Hubbard; Assessors, same as 1845; Representative, Samuel D. Greenwood.

1847.—Selectmen, Samuel D. Greenwood, Lyman Bryant, George W. Bascom, Asa Broad, Elisha Chaffin; Assessors, same as 1846; Representative, Samuel D. Greenwood.

1848.—Selectmen, Asa Broad, Elisha Chaffin, L. B. Putnam, Isaac Damon, Willard Allen; Assessors, David Davis, Jeremiah Parker, Paul Davis; Representative, James E. Cheney.

1849.—Selectmen, Charles Chaffin, Asa Broad, Willard Allen, Nathan Howe, Stillman Hubbard; Assessors, Paul Davis, Dennis Davis, Tilla Chaffin; Representative, Ira Broad.

1850.—Selectmen, Samuel D. Greenwood, Ira Broad, Willard Allen, Nathan Howe, William Howe; Assessors, Dennis Davis, Tilla Chaffin, William C. Metcalf; Representative, George W. Bascom.

1851.—Selectmen, Willard Allen, Nathan Howe, Ira Broad, William Howe, John Richardson; Assessors, Dennis Davis, William C. Metcalf, Charles L. Knowlton; Representative, George W. Bascom.

1852.—Selectmen, John Richardson, Alfred Sawyer, Charles Bryant, Samuel D. Greenwood, Dexter Broad; Assessors, Willard Allen, Tilla Chaffin, Dennis Davis; Treasurer, Charles L. Knowlton; Representative, Charles L. Knowlton.

1853.—Selectmen, Samuel D. Greenwood, John Richardson, Charles Bryant, Alfred Sawyer, Danford Hall; Assessors, Willard Allen, Dexter Broad, Isaac Damon; Treasurer, Charles L. Knowlton; Representative, Charles Burnett.

1854.—Selectmen, Charles Bryant, Joseph Davis, Silas Flagg, Jr., Joab S. Holt, John W. Howe; Assessors, Isaac Damon, Francis Davis, Samuel D. Greenwood; Treasurer, Charles L. Knowlton; Representative, William C. Metcalf.

1855.—Selectmen, Joseph Davis, Samuel D. Hubbard, Timothy Parker, Newell Moore, William C. Metcalf; Assessors, Samuel D. Greenwood, William C. Metcalf, Isaac Damon; Treasurer, Charles L. Knowlton; Representative, Silas Flagg, Jr.

1856.—Selectmen, William C. Metcalf, Timothy Parker, Jonathan M. Ladd, Simon Hubbard, Newell Moore; Assessors, William C. Metcalf, Joseph H. Gleason, Tilla Chaffin; Treasurer, Joseph Davis; Representative, Jonathan M. Ladd.

1857.—Selectmen, Joseph Davis, Ira Broad, William Howe, Sumner Chamberlin, Augustus F. Damon; Assessors, Isaac Damon, Silas Flagg, Jr., Charles Bryant; Treasurer, Joseph Davis; Representative, James E. Cheney.

1858.—Selectmen, Ira Broad, Sumner Chamberlin, Augustus F. Damon, George S. Goddard, Alfred Chaffin; Assessors, Isaac Damon, Silas Flagg, Jr., Charles Bryant; Town Clerk, John E. Chaffin; Treasurer, Charles Knowlton. Vote of thanks was given to Major Paul Davis for his thirty-seven years' services as town clerk, he declining further service.

1859.—Selectmen, Ira Broad, Sumner Chamberlin, George S. Goddard, Alfred Chaffin, John E. Chaffin; Assessors, Isaac Damon, Charles Bryant, Charles W. Gleason; Clerk, John E. Chaffin; Treasurer, Charles Knowlton.

1860.—Selectmen, Isaac Damon, Sumner Chamberlin, George S. Goddard, John E. Chaffin, James E. Cheney; Assessors, Isaac Damon, Charles W. Gleason, Theron E. Hall; Clerk, John E. Chaffin; Treasurer, Charles Knowlton; Representative (14th Dist.), Isaac Damon.

1861.—Selectmen, Sumner Chamberlin, John E. Chaffin, James E. Cheney, Charles Turner, William H. Walker; Assessors, T. E. Hall, Ethan Davis, Austin Flagg; Clerk, John E. Chaffin; Treasurer, Chas. Knowlton.

1862.—Selectmen, John E. Chaffin, Charles Turner, William H. Walker, George Bascom, M. V. B. Jefferson; Assessors, Isaac Damon, Ethan Davis, Austin Flagg; Clerk, John E. Chaffin; Treasurer, Charles Knowlton.

1863.—Selectmen, Ira Broad, Sumner Chamberlin, M. V. B. Jefferson, J. W. Rogers, William H. Drury; Assessors, Ethan Davis, Austin Flagg, Nathan Howe; Clerk, John E. Chaffin; Treasurer, Charles Knowlton; Representative, Nathan Howe.

1864.—Selectmen same as 1863; Assessors, Isaac Damon, Nathan Howe, J. H. Wright; Clerk, Isaac Damon; Treasurer, C. Knowlton; John Wadsworth, clerk *pro tem*.

1865.—Selectmen, Ira Broad, Sumner Chamberlin, J. W. Rogers, Church Howe, Alfred Sawyer; Assessors, Isaac Damon, Nathan Howe, Austin Flagg; Clerk, Isaac Davis; Treasurer, Charles Knowlton; Representative (14th Wor. Dist.), Theron E. Hall.

1866.—Selectmen, Ira Broad, Sumner Chamberlin, J. W. Rogers, Church Howe, M. V. B. Jefferson; Assessors same as 1865; Clerk, Isaac Damon; Treasurer, Charles Knowlton; Representative, Samuel Warren.

1867.—Selectmen, Ira Broad, M. V. B. Jefferson, J. W. Rogers, Austin Flagg, George Howe; Clerk, Isaac Damon; Treasurer, Charles Knowlton.

1868.—Selectmen, Ira Broad, M. V. B. Jefferson, J. W. Rogers, George Howe, Charles Flagg; Assessors, Nathan Howe, S. Flagg, Jr., Samuel Warren; Clerk, S. W. Armington; Treasurer, Charles Knowlton.

*N. G. Warren*

1869.—Selectmen, M. V. B. Jefferson, George Howe, Charles Flagg, S. D. Hubbard, J. H. Wright; Assessors same as 1868; Clerk, S. W. Armington; Treasurer, Charles Knowlton. Town voted to abolish district system of schools.

1870.—Selectman, M. V. B. Jefferson, George Howe, Charles Flagg, Samuel D. Hubbard, J. H. Wright; Assessors, Nathan Howe, Jeremiah Parker, Silas Flagg; Clerk, George F. Rogers; Treasurer, Charles Knowlton; Representative to General Court, Isaac N. Ross. Voted to instruct the School Committee to choose a superintendent of school. William C. Metcalf chosen.

1871.—Selectman, Charles Flagg, Austin W. Ward, S. D. Hubbard; Assessors, Nathan Howe, J. H. Gleason, Ethan Davis; Clerk, George F. Rogers; Treasurer, Charles Flagg; Superintendent of Schools, William C. Metcalf; Representative to General Court, I. N. Ross.

1872.—Selectman, Charles Flagg, A. W. Ward, John Adams, James H. Wright, Samuel Warren; Assessors, Ethan Davis, Willard Allen, F. M. Stowell; Clerk, George F. Rogers; Treasurer, Charles Flagg; Superintendent of Schools, William C. Metcalf.

1873.—Selectmen, A. W. Ward, Samuel Warren, J. H. Wright; Assessors, Willard Allen, Isaac Damon, Silas Howe; Clerk, George F. Rogers; Treasurer, S. W. Armington; Superintendent of Schools, Dr. J. T. Rood.

1874.—Selectmen, J. H. Wright, Wm. Howe, W. H. Fairbanks; Assessors, I. Damon, Silas Howe, Silas Flagg; Clerk, Isaac Damon; Treasurer, S. W. Armington; Superintendent of Schools, J. T. Rood.

1875.—Selectmen, M. V. B. Jefferson, W. H. Fairbanks, E. W. Mirrick, Geo. Howe, J. T. Rood; Assessors, Isaac Damon, Silas Flagg, Wm. C. Metcalf; Clerk, Isaac Damon; Treasurer, S. W. Armington.

1876.—Selectmen, Wm. C. Metcalf, Chas. Flagg, W. H. Drury; Assessors, same as 1875; Clerk, Isaac Damon; Treasurer, Samuel W. Armington; Auditor, Ethan Davis.

1877.—Selectmen, Wm. C. Metcalf, W. H. Drury, H. W. Warren; Assessors, same as 1875-76; Clerk, Isaac Damon; Treasurer, L. B. Brigham; Representative, Wm. Howe.

1878.—Selectmen, same as 1877; Assessors, Wm. C. Metcalf, Chas. Dawson, J. C. Spaulding; Clerk, Isaac Damon; Treasurer, L. B. Brigham.

1879.—Selectmen, H. W. Warren, Chas. Dawson, Gates Chapman; Assessors, Isaac Damon, Chas. E. Parker, E. W. Mirrick; Clerk, Isaac Damon; Treasurer, L. B. Brigham.

1880.—Selectmen, Gates Chapman, Chas. Dawson, Fred. T. Holt; Assessors, same as 1879; Clerk, Isaac Damon; Treasurer, L. B. Brigham. Voted to establish a "High School."

1881.—Selectmen, Chas. Dawson, S. W. Armington, W. E. Austin; Assessors, same as 1880; Clerk, Isaac

Damon; Treasurer, L. B. Brigham; Representative, H. W. Warren.

1882.—Selectmen, W. E. Austin, Isaac Damon, F. T. Holt; Assessors, Isaac Damon, E. W. Mirrick, Gates Chapman; Clerk, Isaac Damon; Treasurer, L. B. Brigham.

1883.—Selectmen, same as 1882; Assessors, Isaac Damon, E. W. Mirrick, Ervin S. Hubbard; Town Clerk, Isaac Damon; Treasurer, Frederick H. Fales; Superintendent of Schools, C. W. Stickney.

1884.—Selectmen, H. W. Warren, F. T. Holt; A. A. Metcalf; Assessors, E. W. Mirrick, Ervin S. Hubbard, W. E. Austin; Town Clerk, Isaac Damon; Treasurer, F. H. Fales; Superintendent of Schools, C. W. Stickney.

1885.—Selectmen, Isaac Damon, C. E. Parker, A. D. Bascom; Assessors, Isaac Damon, C. E. Parker, E. S. Hubbard; Clerk, Isaac Damon; Treasurer, F. H. Fales; Superintendent of Schools, C. W. Stickney.

1886.—Selectmen, same as 1885; Assessors, Isaac Damon, H. C. Cheney, Silas Flagg; Clerk, Isaac Damon; Treasurer, L. B. Brigham; Representative, Samuel W. Armington.

1887.—Selectmen, William H. Drury, William J. Prendegast, A. A. Metcalf; Assessors, W. E. Austin, Samuel Warren, George Bascom; Clerk, Isaac Damon; Treasurer, L. B. Brigham.

1888.—Selectmen, Isaac Damon, C. E. Parker, W. J. Prendegast; Assessors, same as 1887; Clerk, Isaac Damon; Treasurer, H. W. Warren.

Delegates to Provincial Congress: John Child, in 1775; James Davis, in 1776; and Richard Flagg, 1777; the latter in convention at Cambridge to form a Constitution.

## BIOGRAPHICAL.

### W. G. WARREN.

Waterman G. Warren was born at Ward (subsequently changed to Auburn), Mass., on the old Warren homestead, in that part of the town known as West Auburn, May 16, 1807. He was the oldest of six sons and a daughter born to Deacon Samuel and Sally (Goulding) Warren.

Samuel Warren was born at Leicester, September 10, 1779, and was the son of Jonathan Warren of that town, whose father, Jonathan Warren, had also resided there.

Sally (Goulding) Warren was born at Auburn, February 1, 1790. She was the daughter of Captain Jonah Goulding, a conspicuous rebel in the Shays' Rebellion. In this insurrection of 1787, Captain Goulding, afterwards a colonel in the State militia, led his company to Worcester and prevented Judge Artemas Ward from opening court. For this he was imprisoned, according to his own account, "forty days and forty nights" and in addition was threatened

with hanging. The daughter partook of the sterling character of her paternal ancestor.

Mr. Warren, the subject of this sketch, belonged to a family of tanners. His ancestors back four generations, upon both sides of the line, were tanners. All of his brothers, except one, the late Dr. Jonah G. Warren, of Newton Centre, a distinguished Baptist preacher and scholar, were at some time in their lives engaged in that industry; and the same is true of not less than thirteen of the children of the next generation.

His opportunities for obtaining an education were limited in the extreme. He worked upon his father's farm and in the tannery summers, and attended the district school winters, here acquiring the merest rudiments of an education.

On the 22d of April, 1830, he was married to Mary Eddy, of Auburn, his wedding present from his father being two dollars in cash to fee the minister, and the loan of his old horse and shay with which to bring home his bride.

His father's death occurring two years later, he inherited the ancestral tannery, which Jonah Goulding, when he moved from Grafton to Auburn, had purchased of Nathaniel Southworth. Mr. Warren conducted the tanning business here with varying success till 1840, when he loaded his household goods, consisting of a wife and five children, into a covered wagon and moved to Holden, where for ten years he continued the tanning business in partnership with his brother, Samuel Warren, in the tannery built at Eagleville (then Brick City), about 1825, by John P. Maynard.

This partnership was dissolved by mutual consent, and Mr. Warren, in the spring of 1850, purchased the Edward Richardson tannery, located one-half mile west of Holden Centre. According to the record, this tannery, with seventeen acres of land adjoining, was sold by John Watson to Heman Richardson, December 23, 1789, for one hundred and twenty pounds sterling, and its earlier history is not of record.

The old tannery was enlarged and greatly improved and the business successfully continued, a part of the time with his son Samuel as his partner, for more than a quarter of a century.

In 1874, while continuing the business with his oldest son at the old tannery, he formed a partnership with his other two sons, under the firm-name of B. & H. W. Warren & Co., and this company erected the brick tannery nearer Holden Centre. This tannery, in its character and equipment, its facilities for producing the kind of leather which is its specialty, card leather, probably is not surpassed by any other in the State.

In 1882, business at the Richardson tannery having been discontinued, Samuel Warren became a partner, the style of the firm being changed to W. G. Warren & Sons, and the father and three sons continued the business with a good degree of success till 1886.

During these years there had been a gradual growth of the business from the tanning of perhaps fifteen hundred sides of leather in 1845 to twenty thousand sides in 1886.

Mr. Warren died August 7, 1886, at the age of seventy-nine, leaving a wife, who survived him but one year, his three sons, who still continue the business under the firm-name of W. G. Warren's Sons, and two daughters, one the widow of the late Rev. Lester Williams, formerly pastor of the Baptist Church in Holden, and the other Susan E. Warren.

He was a devoted husband and father, kind-hearted and charitable. A man of good common sense, sound judgment and strictest integrity, and enjoyed the fullest confidence of all in his business and other relations. He had marked peculiarities and his strong personality impressed itself upon all with whom he came in contact.

He was the relentless foe of the liquor traffic and the cause of temperance and all the moral reforms of his day received from him a liberal and hearty support.

In his early life, in the palmy days of slavery, he was an abolitionist, a follower of Gerrit Smith, Garrison and Phillips. He boldly proclaimed his sentiments in favor of liberty for the oppressed, when such action meant hardship, scorn and persecution. After the enactment of the Fugitive Slave Law he was zealous and active in all movements in behalf of the fugitive, and made his home a place of refuge for the bondman, a station on the underground railroad to freedom—thus earning the honor due to those who have the courage of their convictions, and the daring of their duty.

Like leaves on trees the race of man is found,  
Now green in youth, now withering on the ground;  
Another race the following spring supplies,  
They fall successive and successive rise:  
So generations in their course decay,  
So flourish these when those have passed away.

#### DEACON WILLIAM HOWE.

Deacon William Howe was born in Holden (in which town he has all his life resided), June 1, 1814. He was the son of Thomas Howe, born August 19, 1785. The parents of Thomas Howe were Jotham and Dorothy Howe. Mr. Howe's mother was Sally, daughter of Hezekiah and Lucy (Raymond) Walker. She was born May 30, 1787.

The subject of our sketch was the fourth child and fourth son in a family of thirteen children, of whom ten lived to maturity and eight still survive.

He lived at home, attending district school both summer and winter till eleven years old. After that he attended school only in winter, working on the farm with his father and brothers during summer.

In 1839 he settled on a farm of his own in the northern part of Holden, which he carried on with marked industry, energy and success till 1858. In

*William Howe*

that year he formed a copartnership with Major Theron E. Hall, and engaged in the manufacture of woolen goods in the village of Jeffersonville, where he has since resided. This partnership continued two years, when Mr. M. V. B. Jefferson purchased the interest of Major Hall, and the business was continued under the firm-name of Howe & Jefferson for twenty-six years. The skill and success of this firm in the manufacture of woolen goods is sufficiently shown by the facts that when they commenced manufacturing they ran one set of woolen machinery, and that when the partnership was dissolved they were running twelve sets, with a corresponding growth of the village of Jeffersonville, which has come to be one of the most attractive and flourishing manufacturing villages in Central Massachusetts.

On January 1, 1886, Mr. Howe disposed of his interest in the business to his partner.

Mr. Howe married, in December, 1839, Mary Ann, daughter of Mr. John Jefferson. Mrs. Howe died June 10, 1880. His family consists of three daughters: Augusta F., wife of M. V. B. Jefferson, of Worcester; Anna M., who married Addison N. Putnam (now deceased); and Dora L., wife of Henry W. Warren, of Holden.

Mr. Howe has been repeatedly chosen by his fellow-citizens to responsible positions in town affairs. He has been eleven times a member of the Board of Selectmen for the town of Holden, holding the office, when first chosen, for six years in succession. He was also chosen to represent his district in the Legislature of 1887, serving upon the Committee on Commerce and Manufactures.

Mr. Howe was converted at the age of fifteen years—was baptized in December, 1830, and has maintained an active and honored connection with the Baptist Church for more than fifty-eight years. In 1873 he was chosen deacon of the church, the duties of which office he still efficiently discharges. His parents were constituent members of the Holden Baptist Church, and not less than thirty members of their family, near and remote, have been connected with it during its history, covering now fourscore years.

Mr. Howe's many excellencies—his good judgment of men, his wisdom and tact, his gentle firmness and unwearied patience, and his spotless honor—have endeared him to all who may claim his friendship, as well as to his family, and have made him highly respected and esteemed in still wider circles, as well as in church and town, where best known.

## CHAPTER CLXXVI.

### DOUGLAS.

BY A. F. BROWN.

*Territorial—Early Grants—Boundaries—Topography—Geology.*

THE true province of the historian is to collect and truly record such facts and events as he attempts to

describe, without prevarication or subterfuge; and the value of a history is enhanced in proportion as the writer adheres strictly to this rule. Very little has been known or correctly written in regard to the early history of the town of Douglas. Prior to the year 1708 the territory now embraced within the limits of the town of Douglas was an unbroken forest inhabited by a few Indian stragglers from the Narragansett or Nipmuck tribes. One small band occupied the extreme easterly part of the town, another the southern part and still another band were located northerly of the centre. In all these localities Indian implements and tools are frequently found, showing that they inhabited and cultivated in their rude way land in these several sections.

There was also living within this territory at that time two, and perhaps three, white families, whose farms were reserved and confirmed to them when the several grants and purchases were made from the General Court. One, a Mr. Simon Chamberlin, owned and lived on a farm of one hundred and sixty acres located southwesterly of what is known as the Ministerial or Minister's Lot, and nearly in the centre of what is now known as the "Douglas Woods," and south of the Thompson Road. The location is well known from the fact that it embraced within its limits what is now known as "Chamberlin Pond." In the three thousand seven hundred acre grant was the Aldrich farm of two hundred acres. This farm was located in the extreme south part of the town, and is now owned by Retus Walling and Jesse Chase; is westerly of the "Providence Turnpike Road," and southerly from the Mowry K. Thayer place, and was owned by a Mr. Edwin Aldrich, who was the father of Jacob Aldrich, who was the father of Amariah Aldrich, who was born here. The place is now covered with a heavy growth of wood and timber. Many of the present residents of Douglas well remember Amariah Aldrich, some of whose descendants are still with us. The "Streeter Farm," situated on the Webster Road, is another farm occupied by the father of Asa Streeter when the first grant was made of four thousand acres.

The town of Sherborn, in Middlesex County, was incorporated in 1674, a small agricultural town with few inhabitants, who lived chiefly within their own resources. In 1700 the Legislature incorporated the town of Framingham, taking from the town of Sherborn seventy-seven families with their estates to make up a portion of Framingham. This so exasperated the remaining inhabitants of Sherborn that they besought the General Court for redress. Finally, after several years' petitioning and importuning, the General Court granted to the inhabitants of Sherborn four thousand acres of land "Lying westwardly of Mendon" (now Uxbridge). This was called Sherborn Grant. Before this tract of land was located and divided, another grant of land of three thousand acres was obtained by the people of Sherborn, and the next

year, 1815, thirty-seven hundred acres of land were obtained by the people of Sherborn by purchase; these were called Sherborn New Grant, and very soon after these three tracts of land, with other adjoining tracts, were called New Sherborn. These several grants were finally located and divided by a rule adopted by the inhabitants of the town of Sherborn, so as to give each family or householder one or more lots. These tracts were divided by what they termed range-lines, running east and west, and said to be two hundred rods apart, and were designated first, second, third and fourth range-lines. Surveyors, now living, have been able to locate and follow these lines in many places in town. Every person's right extended from one range line to another, or, in other words, were two hundred rods in length from north to south; and the size of the lots depended much upon the standing and condition of the parties, and allotted according to the rule adopted in the division of the four thousand acre grant.

These several grants were located as follows: The 4000 acre grant embraced within its limits Douglas Centre and what is called the west part of the town. The southwest corner of this tract is at what is known as "Bear Corner," a large heap of stones, about sixty rods south of the Cold Spring on the Thompson Road. This Bear Corner is one of the oldest landmarks in town. It marks the southwest corner of the 4000 acre grant, the southeast corner of the lot of the twenty proprietors of Douglas, the southeast corner of the minister's lot, which was included in the twenty proprietors, the northeast corner of the "Boston Men's Farms" and the northwest corner of a part of the 3000 acre grant. From this point the line runs northwest 800 rods, passing a little west of Badluck Cedar Swamp to a point near the old Bailey place; thence easterly to a point in Sutton south line on the north line of land formerly of Micah Hill; thence southerly to a point in the south line of land formerly of Dr. Wm. Douglas; thence westerly to first bound. The 3700 acre purchase grant was located in the southeast part of the territory granted (now the southeast part of the town), bounded south on the province line and east on Mendon line (now Uxbridge), and contained 3603 acres besides the 200 acre Aldrich farm.

The 3000 acre grant was located in two tracts—one of 1101 acres was located on the north side of the 3700 acre tract, and between that and the 1000 acre tract bought by Dr. William Douglas and others, described further on; and 1900 acres, the remainder of the 3000 acre grant, was located west of the 3700 acre grant, was bounded on the province line, and included the north end of Wallum Pond within its limits and extended north to Bear Corner.

Gov. Simon Bradstreet, who was Governor of the Province of Massachusetts before 1700, left by will to his grandchildren—John, Annie and Simon—children of his son, Doctor Samuel Bradstreet, among

other things, "what was due to him for salary as late Gov."

Annie married a Mr. Nathaniel Williams, of Boston, a schoolmaster. The other two heirs having died, Mr. Williams and his wife petitioned the General Court, in 1702, to have the claim adjusted and settled. In 1714 there was granted to them on their petition 1000 acres of "Province land, provided it could be located by a competent surveyor without infringing on any other grant."

In 1715 it was surveyed and platted by Mr. Thomas White, surveyor, and located in the northeast corner of New Sherborn, and on June 7, 1715, it was ordered by the General Court "That the land so platted be confirmed to the said Annie Williams, the other children having died."

Most of this tract of land of 1000 acres was soon after this sold by Mr. Williams and his wife to Jonathan Draper and Nathaniel Brewer.

Nathaniel Brewer soon after sold his interest in the tract to Capt. Benjamin Murdock. In 1728 Draper and Murdock divided their land, Draper taking the north and Murdock the south part; and on their petition, about this time, they, with their estates, were set to the town of Uxbridge.

Nathan Brewer also bought of the General Court, about 1716, eight hundred acres lying west of the Bradstreet grant. This tract was known for many years as the "Brewer farm."

In 1721 Dr. William Douglas, Habijah Savage, John Bining, William Tyler, Andrew Tyler and Benjamin Brousdon bought of the General Court one thousand acres south of the Brewer farm and the Murdock farm. This was called the Dr. Douglas grant, and in 1727 was divided between the owners—the Tylers settling on their rights.

About 1740 there was granted to what was called the twenty proprietors of New Sherborn, afterwards Douglas, 4524 acres in the westerly and northwesterly part of Douglas; a portion of this tract, however, a few hundred acres, was west of the Douglas town line, and in what was then Oxford South Gore. Included within the grant was the Simon Chamberlin farm of 150 and 400 acres, granted to the ministers, and the ministerial lot of the parish. This tract, with two or three additional grants, one of 1245 acres, one of 360 acres and one of 162 acres, extended the entire length of the west part of Douglas, from Nipmuck corner on Oxford line to Rhode Island corner. From Connecticut northeast corner to Rhode Island corner, which is just one mile, their land was only about two hundred and ten rods wide. At the extreme northwest corner of this tract, at Nipmuck corner, was located the Douglas School farm, so called, of 200 acres, which was sold many years ago for the benefit of schooling.

About this time, 1730, there was granted to Boston parties, a tract of land called the "Boston Men's Farm," bounded north and west by land of the twenty

proprietors, east by the three thousand acre grant and Wallum Pond and south by the province line, comprising about eighteen hundred acres. This tract was immediately settled by a few thrifty and intelligent families, who cultivated some very good farms on the hill west of Wallum Pond. The old town road leading from the north end of Wallum Pond to the Coffee house passed through this tract and for many years was a principal thoroughfare. This, with about six hundred acres in the northeast corner of the town (about three hundred acres of which came from the Bradstreet grant) and about three hundred acres back of the four thousand acres called "fragmentary lots," comprises the now entire territory of Douglas, making, with the overplus, about twenty-one thousand acres.

Douglas is bounded on the north by Oxford, Sutton and Uxbridge, on the east by Uxbridge, (formerly Mendon), on the south by Rhode Island, on the west by Connecticut and Webster (formerly Oxford South Gore). There are four large ponds of water, mostly within the limits of the town—Wallum Pond, in the southwest part of the town and partly in Burrillville, R. I., covers one hundred and forty acres in Douglas. Badluck Pond, a little west of the centre, covers one hundred and ten acres—these are both natural ponds. Reservoir Pond is an artificial pond of four hundred acres on the stream leading out of Badluck Pond. Manchaug Pond, in the north part of the town, and partly in Sutton, covers ninety-three acres in Douglas. This was originally a natural pond, but has been enlarged and deepened by the erection of a substantial dam at its outlet.

Mumford River has its rise in Badluck Pond, runs in a northeast direction until it unites with the Wallis Brook, forming the waters of Reservoir Pond, thence continuing in a northeasterly course about one mile, where it was diverted from its natural bed, and carried by an artificial channel in a northerly direction into the town of Sutton, where, uniting with the Manchaug River, it forms the upper pond at Manchaug Village. After doing effectual service for the wonderfully progressive and thriving village of Manchaug it re-enters again the town of Douglas, and, passing through the east village, enters the town of Uxbridge by such a circuitous route that one peculiar bend in the river so nearly resembled an old instrument our fathers used in making sausage that it was called the Fillbow, from which came the name, with a little variation of the high hills in the vicinity of "Gilboa."

The face of the country is uneven, beautifully diversified by hills and valleys, and contains some of the most lovely scenery in the county. None of the hills can hardly aspire to the name of mountain. Ball Hill is 711 feet high; Wallum Pond Hill is 778 feet; Mount Daniel, about 750 feet, and Bald Hill, about 700 feet.

The westerly part of the town, comprising more than six thousand acres, extending the entire length

of the town from north to south, is rocky and very uneven, covered with a growth of wood and timber, over its whole extent, with now but three families living therein. The buildings are in a dilapidated condition, surrounded with only a very few acres of arable land, and this under poor cultivation. The remainder of the town is dotted over with farms of about one hundred acres or less, some of which are under a high state of cultivation; many of them are held in the name or by the descendants of the original settlers. Fruit is raised in great abundance and of excellent quality. Vegetables, corn and other grain are now raised in paying quantities, and quite an amount thereof is annually carried to adjoining towns to market.

The geological formation is chiefly granite, large quantities of which are used for building purposes not only in this town, but for shipment to other parts of the country. Gold, silver and lead are said to be found in some parts of the town, but not in paying quantities. Boulders are found in all parts of the town, some of large size, and so numerous as to be a great detriment and inconvenience for the use of machinery in farming. Yet many of the farmers, by the free use of powder and dynamite, have so far cleared many of their lots as to successfully use machinery in the cultivation of their land and in harvesting their crops.

White oak, chestnut and white pine have been the predominating kinds of lumber grown, especially in the easterly part of the town; hemlock, black and red oak in the west, with small groves of hickory.

Many farms in different sections of the town that were once under a fair state of cultivation, where large stocks of cattle were kept, and barns well filled with hay, have been entirely abandoned for farming purposes,—the buildings torn down or gone to decay, and the best farming-lots covered, some of them, with heavy growths of wood and timber. More than forty such farms can be counted by persons now living, that within their remembrance were occupied by successful and intelligent farmers, many of whom reared large families of children.

From 1720 people began to settle on the new territory sparsely to begin with, for a few years, but in 1740 the inhabitants had become quite numerous, so much so that they began to agitate the question of separate town government. Up to this time, and until 1746, when the town assumed an independent town government by act of the General Court under the name of Douglas, all the municipal affairs were managed by the town of Sherborn.

In 1721 the town of Sherborn, in town-meeting, voted to give Mr. Ephraim Hill twenty acres of land in the fourth range of the four thousand acre grant in consideration of his being the first white man to settle in the new territory. This tract was at or near what was, for many years, known as the old Tiffany place, now owned by Chandler Titus.

In 1725 and 1726 the town of Sherborn voted to make an allotment of the last two grants of three thousand seven hundred acres and three thousand acres, according to the same rule by which the four thousand acres were divided.

In the division and allotment of these several tracts of land quite a good number of the people of Sherborn, to whom this land came by lot and assignment, settled on their several rights, but more of the settlers acquired their land by purchase, many of them from Holliston, Natick, Framingham and other surrounding towns.

The grant to the twenty proprietors of New Sherborn, afterward Douglas, was by deed, from a committee of the General Court of which Samuel Watts, Esq., was chairman, and was dated 1742, and recorded in the Registry of Deeds three years later.

The first meeting of the proprietors was held at the house of Ensign Joseph Marsh, April, 1744, at which a committee was chosen to survey their land and divide it among the proprietors. The first meeting was called by John Harwood, Esq., a justice of the peace, and David White was chosen moderator, and Jeremiah Whiting, clerk, who was duly sworn, and their proceedings were conducted with all the formality of a regular town-meeting. These meetings of the proprietors were kept up with a good deal of regularity until 1767, when the record of their meetings ceases. Captain Benjamin Taft, of Uxbridge, who was the ancestor of the fifth generation of Doctor Bridgam A. Taft, through whose generosity the ancient plan and book of records came into my possession, although not one of the original twenty proprietors, yet by purchase soon became the largest owner of the purchases, and until the close of the record maintained a controlling interest in its affairs.

The meetings of the proprietors were not always harmonious; many times ill-feeling and jealousy, crimination and recrimination were indulged in to such an extent that, while they did not come to blows, yet their meetings were frequently dissolved without accomplishing anything.

Quite a number of men and families, besides those already mentioned, have been more or less prominent in the settlement of the town and in town affairs that might be worthy of mention, but those already named make the list sufficiently extended to give a fair knowledge of the early settlers of the town.

## CHAPTER CLXXVII.

DOUGLAS—(Continued.)

### EARLY SETTLEMENTS.

THE early settlers of Douglas were a hardy and vigorous class of men and women, well fitted to endure

the hardships of pioneer life, and to brave the rigor and privations of a New England winter. Located as they were in the wilderness, with a hard and sterile soil, without roads, and at no inconsiderable distances apart, a long way from their base of supplies, it is no wonder that they became self-reliant and jealous of their individual rights, and looked well to the character of all new-comers. Any person attempting to settle among them whose character was not above reproach, was immediately warned out of the district, and was obliged to leave forthwith.

Without going into a genealogical history of the early settlers of the town, a brief mention of some of them and their descendants, where they lived, and other incidents connected with their lives, will here follow. We will begin with the road in the northeast part of the town, leading from South Sutton to East Douglas, now known as North Street. As a fair sample of accuracy and distinctive points adopted by the early settlers in laying out roads in town, I here give the laying out of this road. The report of the selectmen is dated February 19, 1765, and is found in the Town Records, Book 1, page 64½:

Then laid out a road as follows: Beginning at Sutton line, at two white oak trees, with two chops on the south side, then running southwardly 40 rods on land of Isaac Martin to a white oak tree marked, then turning a little more to the west on land of Mathew Martin about 40 rods to said Martin's house, to trees standing on the east side of the road, then running about south on said Martin's land about 30 rods to ye land of widow Sarah Brown, then on land of widow Sarah Brown to her dwelling-house standing on the west side of the road, thence from widow Brown's house southwardly by points 42 rods to a stake and heap of stones, then turning more to the east and bounding east on land of Edmond Rawson about 40 rods on said Widow Brown's land by trees marked with two chops on the south side, thence on land of Isaac Martin, Jr., 12 rods to his house, thence from his house a southwardly course to the river by points, and across the river on land of Jonathan Foster a westerly course by said river about 50 rods, then turning southwardly by points, and running on land of Samuel Foster to his barn on the east side of the road, thence from said barn southwardly to the county road.

CALER HILL, }  
JOSEPH BALCOMBE, } Selectmen.  
ROBERT SMITH, }

The first house on this road south of Sutton line was built by Isaac Martin from 1730 to 1746. In 1770 it was owned by his son, Jacob Martin; by him sold to William Batchellor, to Warren Batchellor, to Henry Howell, to Charles Fairfield and to E. Smith Johnson.

The house known as the Orison Hewett house was built for a wheelwright shop by Ellis Burt, about 1845. The house owned by Timothy Hewett was built by Ellis Burt in 1825, on land bought of Captain John Brown; sold by him to Joseph Swasey, and by him to its present owner.

The Archelaus Stone place on the hill in 1745 was owned by Mathew Martin, who built and lived in a small one-story house between the present house and the road. It was afterwards owned by Abel Morse, and by him sold to Archelaus Stone for two thousand dollars. Mr. Stone was a skilled mechanic, and built the present house. He was master mechanic for the Congdon Company when the first factory at Man-

chaug village was built. He was afterwards for many years master mechanic for P. Whitin & Sons. After his death his large farm was divided among his large family of children, and within a few years passed entirely out of the family name. The house and part of the farm is now owned by Robert Brown.

The house now owned by the Draper sisters was owned and occupied in 1760 by John Thayer; whether it was built by him or not I am unable to say. It was afterwards owned and occupied for many years by Elisha Thayer, his son, whose second wife was Molly Keith.

Elisha Thayer was a noted shoemaker and nail-maker, which business he followed until by age and infirmity he was unable to labor. He was also a famous skunk hunter, the oil of which was the only means of supply for his evening lamp. This shop was a place of general resort for boys and young men of the neighborhood, to be entertained by Uncle "Lisha's" stories. The next two houses in the street are both comparatively new houses, built about 1860, one by Mr. Alvin Hall and the other by Mr. Asel Fitts, both built on a part of the old Brown farm.

The next place is the Brown farm, originally containing about four hundred and fifty acres. A part of it came to the wife of John Brown, Sr., and a part purchased of the twenty proprietors, being some of their "fragmentary lands," and a part purchased of John Harwood, Esq., and being north of the Brewer farm and west of the Draper farm. John Brown, the first who settled on this farm, came from Leicester between 1730 and 1740, lived a few years in North Uxbridge, and came to this place in 1740 or a year or two earlier.

He married Sarah Freeman in 1742. She was a daughter of Edmond Freeman, Esq., of Boston; her mother was Eunice Williams, a daughter of Nathaniel Williams, a schoolmaster of Boston, and his wife, Annie, who was a daughter of Doctor Samuel Bradstreet, of the island of Jamaica, who was the oldest son of Governor Simon Bradstreet, Governor of the Province of Massachusetts. A part of this land was given by will of Governor Bradstreet to his granddaughter, Annie Williams.

John Brown, Sr., died in 1764, leaving a widow, Sarah, and seven children,—Mary, born in 1744; John, born in 1747; Oliver, born in 1752; Samuel, born in 1753; Robert, born in 1754; Thankful, born in 1755; and Elihu, born in 1757. In 1766 his large farm was divided between his widow and seven children. The oldest son, John, by inheritance and acquisition, soon came into possession of the larger part of the original farm. He, the second John Brown, died in 1813, leaving a widow, Abigail (Reed), formerly of Rehoboth, and six children,—John, Hannah, Abigail, Eunice, Freeman and Eleanor. John Brown (3d), by inheritance and purchase, soon came into possession of most of his father's home farm. He

died in 1855, leaving a widow, Rebecca (Draper), and four children,—Eunice F., Emily F., Adolphus F. and Harriet N. The son now owns a good share of the old homestead.

In the first division of the Brown farm the widow's right was set on the west side of the road, with the buildings—the right to John Brown on the east side of the road, extending from the Thayer place, on the north, to the present road, opposite the house of Erwin F. Brown—the right to Mary south of the widow's thirds, now known as the Hale place—the right to Hannah, who married David Draper, was north of John's right—the right to Robert Brown was east of the north end of John's right—the right to Samuel was east of the south end of John's right, and was afterwards known as the Drake place—the right to Elihu was south of John's right; and the right to Oliver east of Robert and Samuel's rights; each right contained about sixty acres.

The farm known as the Hall farm, a part of which is now owned by Hammond Metcalf, was a part of the original Brown farm, being the right set to Samuel Brown. His daughter, Abigail, married Stephen Drake, who built the first house and settled on this place. Two of his sons, William and Albee, built the house now owned by Henry Gould. It was originally two stories high, with a flat roof, and was built and used for a paint-shop. From its peculiar shape it was called the "Salt Box," by which name it has always been designated. William and Albee Drake were among the most skilled and artistic painters of their time. Among other specimens of their work, the older people will well remember the inside decorations of the old Baptist Church in South Sutton.

The old Hale house, as it is called, now standing on land of Levi Darling, was built by Robert Hale, who married Mary Brown, and was built on land set to her out of her father's estate. His son, Robert, built the house now owned by Hugh Johnson. The houses of Levi Darling, John Collar, Mary B. Williams and Alvin H. Brown are all standing on the old Hale farm, and only date back a few years.

The children of Robert Hale and Mary, his wife, were Sarah, who married Charles Rawson, of Uxbridge; Mary, who married Amos Morse, of Douglas; Robert, who died in the Hugh Johnson house, leaving a widow and two children, Philander and Hannah (his widow married Benjamin Wilson, who lived for some time at the Hugh Johnson house); Elisha Hale, who died in Sutton a few years ago; and Mason and Alpheus, who were both drowned when young men.

The Knap place, as it is called, was owned in 1765 by Isaac Martin, Jr., who lived in a small house on the west side of the road, which is now standing, but very much gone to decay. The farm was originally a part of the Brewer farm, and bought by Isaac Martin, Jr., who built the house and lived there until about 1775, when the place was sold to Captain Job

Knap, who was for many years a prominent man in town affairs.

Captain Job Knap married Ruth Wilson, who lived many years after his death. Their children were,—Job, Jr., Benjamin, Sally, Moses and Nancy. Benjamin died young, Sally was never married, Nancy married Ellis Burt, Job and Moses both married Balcomes.

Captain Knap built the house now standing about 1790 to 1800. Moses inherited the home-place, and married Olla Balcome, who is still living. His children were,—William, Fanny (who married David Stern), Benjamin, Mary Ann (who married A. J. Thayer), Elmira (who married Kendall Whittemore, M.D.), Edward B., Moses M. and Henry.

Job, Jr., the oldest son of Captain Job Knap, married Sarah Balcome, and left three daughters,—Betsy, Laura and Sarah Ann. He lived on the farm now owned by Mowrey Prentice, who married Laura Knap. The house was occupied for several years by his father, Captain Job Knap. The house was built by Ebenezer Claflin about 1770, on land bought of Edmund Rawson, which was a part of the original Brewer farm. This place was occupied by him and his son Oliver, who lived here until the place was sold to Captain Job Knap. Oliver Claflin married, for his first wife, Rebecca Reed, of Taunton, sister of Abigail, wife of Captain John Brown. His children were,—Comfort, Harry, Lyman and Content. His second wife was Lydia Reed, half-sister of his first wife. The land across the river from the Knap farm was owned in 1740 by John Foster, and was reached by a ford a little below the present road.

In 1765 the land where the Lower Village now stands was owned by Jonathan Foster, and where the woolen-mill of W. B. Haywood & Co. now stands, and the Frank Taft house, now owned by Mrs. Isaac King, was owned by Samuel Foster.

About the year 1800 Jonathan and Samuel Foster sold their property to a company composed of Ezekiel Preston, Welcome Whipple, Richard Olney, Benjamin Wallis and others, afterwards known as the Douglas Company and the Douglas Manufacturing Company. They first built the dam across the river, afterwards built the Old Green factory, the four tenement houses, the Old Green store, the machine-shop, and afterwards the boarding-house, all of which were completed in 1808 or 1810. The wheel in the Old Green mill or factory was built by a Mr. Reed, of Northbridge. Building water-wheels is said to be very nice work, and it is proverbial of millwrights "that they make haste slowly." The work on this wheel dragged along at such a dilatory pace that Colonel Preston, the agent of the company, who was a very energetic man, and wanted to see business move at a rapid pace, became so disgusted with the delay that one morning there was found the following lines posted on the bridge, said to be in the familiar handwriting of Colonel Preston :

Old Mr. Reed, he works with speed,  
His head is made of cotton,  
Before he gets the wheel half done,  
The Dam will be all rotten.

This indirect reprimand doubtless had its desired effect, for the wheel was finished in due time.

Col. Preston withdrew from the company in 1812, the company retaining the factory, privilege and tenements and about ten acres of land, and Col. Preston taking the rest of the real estate for his share in the company's property. He, with his wife's brother, Mr. Adolphus Taft, soon after built the grist and saw-mill, that was for many years known as the Preston Mill, afterwards known as the Taft and Eagle Mill. It was afterwards sold by Willard Taft to Deacon Warren Wait, and afterwards destroyed by fire. The privilege and property are now owned by W. E. Haywood & Co.

Adolphus Taft built the small house owned by W. E. Haywood & Co., now occupied by W. Schuster, and lived there until he died. Col. Preston built the large house on the opposite side of the road, now used for a tenement house, where he lived until he went West and died. He left his property to his three nephews, the sons of Adolphus Taft,—Dorris, Willard and Frank, in the proportion of five, three and two.

This tract of land of the Factory Company and Col. Preston, bought of the Fosters, was a part of a tract of one thousand acres sold by the General Court, in 1721, to William Douglas and others, being south of the Brewer farm. This one thousand acre tract was divided by William Douglas and his associates in 1727, and this tract, being a triangular piece of one hundred and fifty-two acres, was set to John Binning for his share. It was bounded easterly by the Brewer and Brown farm. Starting from a point on the road to Killingly, between the towns of Uxbridge and Douglas, thence north twenty-nine degrees west three hundred and sixty rods to a heap of stones on the four thousand acre grant, thence bounded west by the four thousand acre grant, south six degrees east three hundred and five rods to the Killingly road, thence bounded south by the Killingly or county road one hundred and sixty-six rods to the place of beginning. The old Forge School-house, now the Long School-house, stood on the southwest corner of this tract, and the old Noah Taft place, now owned by Mrs. Fanny Thayer, stands near the southeast corner of this tract. The old house that many years ago stood where the Frank Taft house stands, was built and occupied by Mr. Samuel Foster—was built as early as 1740. It was a large house, two stories in front and one back, and is remembered by many people now living as the old Preston house.

A house that stood near where the brick house now owned by Mr. Collins Keith stands, was built and occupied by John Harwood, Esq., who was a very prominent man in the early history of the town. The place was afterwards owned by the Spragues, and

Parley Brown, Noah Taft and the present owner. John Harwood's widow lived there many years after his death. The house owned by Charles A. Whipple was built by his father, Justin B. Whipple.

The Whipple family was a very remarkable family, and prominent in the early history of the town. For inventive genius, the Whipple family, sons of Welcome Whipple, Esq., who was agent of and clerk for the Douglas Manufacturing Company for many years, were very remarkable. Milton D., Virgil, Cullen, Justin B. and Homer B. were all possessed of remarkable mechanical genius. Some of the most important inventions of the last fifty years were the product of their inventive brain.

Welcome Whipple was born 1772, and was a son of Deacon John Whipple, who lived in South Sutton and died in 1845, aged ninety-seven years.

John Whipple, son of John and brother of Welcome, was born 1783 and was the father of Amanda, Rachel, Dexter and McDonough. The Noah Taft place now owned by Mrs. Thayer, being at the foot of the hill, and on the north side of the road to Killingly, as it was called, and the northeast corner of this Binning tract, was one of the first settled places in town. A partition of the one thousand acre grant, called the Doctor William Douglas grant, was made in 1727. This tract falling to John Binning, a merchant of Boston, he soon after built the house burned a few years ago on the Whipple place. He sold to the Spragues, who built a blacksmith shop near the brook. The place was afterwards sold to Mr. Paul White, Sr., father of Paul, Silas and Chloe. Paul White, Sr., died in 1794 or '95, leaving a widow whose name was Chloe, who was his second wife, and a daughter and son of the last wife. The widow lived many years after the death of her husband, and dying, left the old homestead to her daughter Chloe, who married Joseph Whipple and lived there until her death, a few years ago. The west part of the Paul White farm was sold by his administrator at auction after his death to Benjamin Cragin, Esq., and was by him sold to Mr. Sprague and by him to Noah Taft.

That part of the Doctor William Douglas grant which is on the south side of the road from the Binning farm was set to William Tyler, Andrew Tyler and Doctor William Douglas. The Tylers both settled on their rights; William on the old place now occupied by Mr. Wellington Young, and must have built the old house that stood there a few years ago. Joseph and Jeremiah Batcheller lived there for many years before Mr. Young bought it.

Andrew Tyler's farm was west of William's, and extended as far west as the land of the old Methodist Church. The Mannahan house, as it is called, stands on the Andrew Tyler farm. The original Andrew Tyler house stood near the brook south of the S. S. Davis place. It was afterwards owned by Micah Stearns and by his son, Nathan Stearns; afterwards by Job

Bartlet, whose wife was a Stearns, and by Amos C. Gould ("Old Knot-head," as he called himself). In 1770 Aaron Hill, who married a Tyler, lived in the Mannahan house, and lived there for many years after. He or his heirs afterwards sold the place to Theodore Stone, he to Leaver, Leaver to Jasper Rawson, and Rawson to Mannahan.

The Dr. William Douglas farm was west of Andrew Tyler's, and extended from the east side of the old Methodist meeting-house lot to the east side of the four thousand acre grant, which was a little west of the Heath store. It was bounded west on the four thousand acre grant, and extended south from the road three hundred rods to the three thousand acre grant, and was bounded south on the three thousand acre grant, and contained one hundred and fifty acres. Dr. Douglas sold this farm in about 1770. It was afterwards sold to the Sprague family, and by them sold to Mr. Samuel Legg, father of Nahum Legg and grandfather of Mr. E. H. Leaver.

The house belonging to the farm is the old Legg house, standing on the north side of the road.

Two houses that stood just back of the Axe Company's office, one of which was demolished and the other removed a few years ago, known as the Gale and Farwell houses, were standing there a hundred years ago, and belonged to the old Forge Company.

The brick house belonging to the estates of Joseph and Jeremiah Batcheller is one of the old land-marks in the village. The original house was owned by Mr. Jesse Balcom and sold by him to the Batchellers.

The brick house owned now by Minor Chase was built about 1828 or 1830 by Cullen Whipple. It was afterwards owned by Dr. Pierce, Lovel Southwick, Luke S. Keith, Mrs. Kendall, N. S. Caswell and the present owner.

The brick house opposite the common of the Congregational Church was built by Mr. Joseph Lee about seventy years ago. It has always been kept in the Lee family until within a few years.

The Deacon Warren Hunt estate is one of the older estates in the village. This was originally the Sprague place, and owned by Samuel Legg. The present house was built by Deacon Warren Hunt about 1825.

Among the oldest places in the village of East Douglas are the Old Cragin and Caleb Hill places.

The genealogy of the Hill family dates back to 1632, to John Hill, who was a resident of Plymouth Colony, and afterwards of the town of Dorchester. Ephraim Hill, who was a descendant in the fourth generation (great-grandson) of John Hill, was born in 1688, and was reputed to be the first settler in Douglas. He built and lived in a small house a little north of the present residence of Caleb Hill. He had three children—Caleb, Elizabeth and Hannah. Caleb built the house, the present residence of Caleb of the eighth generation. He was a very prominent man in town affairs, kept a hotel-tavern, as it was then called, until the time of his death, was deacon of the Congre-

gational Church at the Centre for thirty years and was respected by the entire community.

Caleb Hill left eight children, one of whom was Moses, born in 1757, who inherited the homestead of his father and kept it as a hotel until his death. He early entered public business—was very efficient and popular—was lieutenant of the military company, was a soldier in the Continental Army and held most of the offices of trust and honor in town. He died in 1800, aged forty-three years, mourned and respected by all. His children were: Azubah, who married Benj. Cragin; Caleb, who married Lydia Marsh; Lucinda, who married Silas Cummings; Micah, who married Sally Marsh; Submit, who married John Dudley; James, who married Sally Burdon; Benjamin, who married Doratha Dudley; and Paris, who married Sarah Chapin.

Caleb Hill, who was born in 1783 and married Lydia Marsh, succeeded to the inheritance of his father, and lived and died on the old homestead. He was captain of the military company, and succeeded in accumulating considerable property, which he left to his children, who were: Azubah, who married Colonel Emerson; Charlotte, married Fenner Batcheller; Mary, married Jeremiah Batcheller; Submit, who married Thos. Warren; and Caleb, who succeeded to the old homestead, thus keeping it in the Hill name for nearly two hundred years.

Micah Hill, brother of Caleb and son of Moses, built the house now owned and occupied by N. S. Caswell, and lived there until his death. He was a very exemplary man, deacon of the Congregational Church for many years and died in 1836. He bought his farm of Mr. John Brown, familiarly called "yellow-headed John Brown." His house and buildings were on the north side of his farm. After the death of Micah his large farm was divided among his six sons,—Moses, Aaron M., William R., Paris H., Luther and Calvin B. Hill—which all in a few years passed into other hands.

Benjamin Cragin, who married Azubah Hill, built the house near the old Hill place, now known as the Southwick place, where he lived for many years. The place was formerly owned by a Mr. Holbrook. Cragin was a prominent man in town affairs—was town clerk for many years—kept a store in the old store building, near the road, when it was a one-story building—was concerned in the manufacture of woolen goods, and assisted in the settlement of estates of deceased persons, and was justice of the peace and had jurisdiction in the trial of civil and criminal causes.

The house now occupied by Caleb Cummings was built for Silas Cummings, who married Lucinda Hill. The house was owned for many years by Mr. Benjamin Wilson, who was a tailor by trade, and carried on the business in a small shop near his house. The house owned by the Catholic priest was built by Dr. Ezekiel Wood about 1830, and the church was origin-

ally designed for a barn and built by Deacon Warren Hunt. The house now owned by Jesse B. Sweet, formerly owned by Charles Fairfield, Artemas Knowlton and Amory Thayer, is one of the oldest houses in this part of the town and was built by a Mr. David White, who for many years took an active and prominent in part town affairs. The house was called the "White House" for many years after his death. The house now owned by Charles W. Potter was owned for many years by Ellis and Sumner Balcome. This is one of the oldest estates in town; the original house was built in about 1750 by Mr. Jeremiah Whitney.

The place now known as the Obadiah Morse place formerly belonged to Fuller Marsh. Fuller Marsh was father of Deacon Judson Marsh. Fuller Marsh's mother was a Fuller, and she inherited the estate from her father, Thomas Fuller, who built the house, and was a man of considerable means and influence.

The Nelson Potter place was owned for many years by Mr. Jesse Williams. He sold the place in 1838 or '40 to Nelson Potter, and bought a farm in Belchertown. He was a son of Samuel Williams and one of a large family of influential men in their time. They were Wheeler, Jesse, Willard, Samuel, Thaddeus and Alpheus. Samuel built the old house on the Seth Howland place, moved away by him and sold to Jeremiah Luther. The Nelson Potter place was the original Marsh farm. Joseph Marsh, who came from Sturbridge about 1730 or '40, bought the place and built the original house. John Balcome once lived there. The first meeting of the twenty proprietors of Douglas was held at the house of Joseph Marsh. He was a very prominent man in his day, and his son after him, Aaron Marsh, Esq., had as much to do with town and public affairs as any man of his time. In the controversies in town affairs I notice that he was usually successful. He represented the town in the General Court several times. A large brick-yard on his farm was successfully operated for many years.

The place now owned by Judson Marsh, west of the school-house, was the old Obadiah Morse place, built by Obadiah Morse, Sr. The first house was built by John Morse, on the right set to him in the first tier of lots in the four thousand acre grant. It was at or near where now stands the house owned by Judson Marsh. The Baxter Morse place was first owned by a Mr. Chase, who sold it to Obadiah Morse, Sr., and went to New Hampshire. The first house south of the school-house now owned by Reuben Place, was built by Luther Morse, and is on the old Richmond White place. Richmond was a son of David, a prominent man in early town affairs, and a brother of Alvah and Martin White.

The house now owned by Thomas Kelley was built by Mr. David Balcome, and owned for many years by Timothy Wallis, who married a daughter of David Balcome. The house owned by Joel Taft is the old Fairbank place, owned for many years by

Amos Fairbank, Jr., who was a son of Amos, who was a very prominent and influential citizen, and in the controversies that arose in town-meetings he usually carried his point. Aaron Marsh's family were Aaron Fuller; Lydia, who married Caleb Hill; Sally, who married Michael Hill, and ——— who married Timothy Taft, and their descendants are now quite numerous in town.

The place now owned by Joseph Howland is the old Seth Howland place; the house was built by him. The place was formerly owned by Samuel Williams. The house west of the school-house, now owned by Judson Marsh, is the old Obadiah Morse place. Obadiah Morse, Sr., the grandfather of Augustus, lived here, and his father, John Morse, was the original settler here; this was on a lot of thirty acres in the first range of lots in the four thousand acre grant.

The first house south of the school-house in District No. 7, now owned by Reuben Place, was built by Luther Morse, who sold soon after building and removed to the West. It was known as the Richmond White place. The old house that stood there when Luther Morse bought the place was built by Richmond White's father,—David White.

The house at the corner of the road, now owned by Thomas Kelley, was built and owned for many years by David Balcome.

The house now owned by Joel Taft is the old Fairbank place, owned for many years by Amos Fairbank, Jr., who inherited it from his father, Amos, brother of the elder Joshua and son of Jonathan Fairbank, Jr., who was a son of Dr. Jonathan Fairbank, both of whom had land assigned to them out of the four thousand acre grant. This farm was given to Joel Taft and his wife, who was a daughter of Joshua Fairbank, for taking care of Amos Fairbank and wife, who were aged and infirm and who had no children of their own.

The Rufus Johnson place, standing on the end of the road north of the Joel Taft farm, was the old George Benson farm, which he inherited from his father. He sold his farm to Amos Morse, Jr., when he moved to the West.

At the Morse place the brick house now owned by John McGrath was built by Amos Morse. Amos married Mary Hale, daughter of Robert Hale and granddaughter of John Brown. His children were: Adolphus, Amos, Luther, Elisha H., Andrew J., Ophelia (who married Seth Howland) and Henrietta (who married Lawton Johnson). Amos Morse had the reputation of catching more woodchucks and making more whip-lashes out of their skins than any other man who ever lived in Douglas.

Ezra Morse, who built and lived in the next house west of the Amos Morse place, was a brother of Amos, and they were sons of Jacob Morse, who built and lived in the old house that formerly stood about eighteen or twenty rods north of the Amos Morse place. Jacob Morse owned a large farm, under a fair

state of cultivation, which he divided between his two sons, each of whom kept large stocks of cattle.

Ezra Morse's family were John, Brigham, Ezra, Samuel and Henry, Sally (who married E. B. Tuttle), Hannah and Submit (who married Nelson Potter). Ezra Morse's wife was Zilpha Wallis, the oldest daughter of Samuel Wallis and one of twelve children. Jacob Morse was brother of Simeon Morse, who lived in Sutton, and Levi Morse, a resident of Douglas, and was son of Lieut. Jonathan Morse, who drew lot No. 20 in the first range of lots of the four thousand acre grant.

West of the Ezra Morse place, at the foot of the hill east of the Reservoir Pond, forty years ago stood an old dilapidated house, long since gone to decay. This was right 23 of the four thousand acre grant, of thirty acres, set out to Ebenezer Hill. Ebenezer Hill had a son (Job), who lived at this place for many years, and dying left a daughter (Ann), who was deranged, and left his place to the town to take care of his daughter. The town employed Mr. Jonathan Jenney, who lived there many years and had the use of the place for taking care of the daughter. After her death, which occurred at Abel Parker's, the town sold the place at auction to Ezra Morse. Many people now living, remember Crazy Ann Hill, as she was called.

Near the outlet of the Reservoir Pond stood, many years ago, a two-story wood-colored house, and about twenty rods east of the house, on the north side of the river, stood a grist-mill, two stories high, the upper story used for a wool-carding mill, and on the opposite side of the river was a saw-mill. This property, for many years, belonged to Mr. David Walker, who ran it for the accommodation of the community; but it was generally remarked that the miller always had fat hogs. The place was built by his father, Mr. Benjamin Walker, who was one of the first settlers of Douglas. David Walker, who lived to be an old man, was a remarkable and peculiar man in many respects. Independent and liberal in his religious belief, temperate in all his habits and upright in all his dealings, eccentric in his practices, with very strong likes and dislikes, which he sometimes carried to excess. He had unbounded confidence in Brandreth's pills, and frequently would say, "If a person would take enough of Brandreth's pills, he would live forever."

South of the Walker place, on the other side of the river, is the Humes place. The ancestors of the Humes family were among the early settlers of Douglas, and originally settled in the south part of the town.

Josiah Humes, who appears to be the first of the Humes family who lived in Douglas, married Lydia Wallis, the oldest daughter of Capt. Benjamin Wallis. She was born in 1748, and they settled at the old Humes place, now owned by Frank Kenyon. He was the father of Robert Humes, who was the father of

Amos and David Humes. James Wallis, who was son of Capt. Benjamin and brother of Lydia (who married Josiah Humes), married Chloe Humes, who was sister of Josiah Humes. He built the house where Amos Humes lived. Amos bought the place of him. Capt. Amos Humes was one of the leading men in town affairs—a man of excellent judgment, whose opinions were sought on all important questions in dispute between his neighbors. He was a man of temperate habits, honest and upright in all his dealings, very decided in his convictions of right and wrong, and never could be induced to swerve a particle from what he believed to be right. He served the town as Representative to the General Court, and in many other offices of trust and responsibility.

His children were Warren, Submit (who married Aaron A. Wallis) and Harriet (who married Levens Sibley).

Warren Humes, son of Amos, was born 1802, married Phebe Rich and built the square-roof house on the east side of the road from his father's house. His early educational advantages were limited to the district schools of his native town, and consisted of the simplest rudiments of the English language.

He was an expert in mathematics, and acquired a decided taste for geometry and surveying. His natural love for figures made him an expert in his chosen occupation, that of land surveyor. His reputation for accuracy as a surveyor soon gained for him a reputation that made his services in great demand in most of the towns in Southern Worcester County.

He was a very great reader, especially of history and international law and court decisions, and his memory was so good that he could, at any time, refer to any decisions he had read with great accuracy. His business of conveyancing, in connection with his surveying, was very accurate and extensive. His opinions were frequently sought in regard to the validity of legal documents, and his knowledge of law was such that his opinions were almost invariably sustained.

He wrote a great many wills, and did a large amount of probate business, with accuracy and fidelity. He was a Jeffersonian Democrat in politics, and had a controlling interest in town affairs for many years. He represented the town in the General Court, served as moderator, chairman of the Board of Assessors and Selectmen for many years. His children were John R., Amos A., George, Milton, Maria L. (who married Brigham Morse) and Juliette (who married Lewis Taft, of Uxbridge).

The Wallis family was one of the first families who settled in Douglas, and at one time, with their connections, were the most numerous family who ever lived in Douglas, and they owned almost the entire northwest part of the town, what is now known as Old School District No. 2, and was first known as Squadron No. 3. Captain Benjamin Wallis, who was

the first of the name who lived in Douglas, was born in 1723 in Sutton, and married Lydia Dudley, daughter of Samuel Dudley, of Sutton, about 1746, which was about the time the town of Douglas was incorporated. The branch of the Dudley family who lived in the westerly part of Douglas, and frequently intermarried with the Wallis family, came from Sutton. Captain Benjamin Wallis owned a very large tract of land, which was divided among his children, giving them each a large farm. He lived in an old house that stood near where now stands the Aaron A. Wallis house, now owned by Elbridge G. Wallace. His children were: Lydia, born 1748; married Josiah Humes, who settled in the south part of the town, on the farm now owned by Frank Kenyon, at what is now called the Old Humes place. Benjamin, Jr., born 1751; married Sarah Thayer; he built the house and settled near the school-house in District No. 2; was a man of large wealth and great influence in the church and in town affairs; was one of the original owners of the cotton-factory built in East Douglas in 1808; was justice of the peace, and represented his town in the General Court. His children were: Lydia, who married Mackintire, Peter, who settled in Charlton; Benjamin, who settled in Webster; Sarah, who married Samuel Dudley; Joseph, who married Prudence Wallis, a daughter of Aaron Wallis (he was father of Joseph T., Ira and Andrew J., and several other children); Moses, who willed a part of his property to the town, called the Wallis Devise, was never married; and Rufus, who married Molly Paine. His children were Stephen P., Benjamin G., Elmira and Mary A. Rufus Wallis was chairman of the Board of Overseers of the Poor for many years, and was a man well-fitted for that position.

David Wallis, second son of Captain Benjamin, born 1753, who married Bial Albee, built the house and barn that fifty years ago was known as the Jonathan Wallis place, which was a part of the Captain Benjamin Wallis farm. His children were: David, who married Sybil Balcome; Olive, married Ebenezer Cragin; Jonathan, who married Polly Balcome; Willard, who married Joanna Wallis; and Prudence, who married David Balcome, (her children were: Fanny J., Prudence, Willard W. and Wellington).

Samuel Wallis, third son of Captain Benjamin, born 1758, married Hannah Dudley, and built the house and settled at the place recently known as the Salem Wallis place, now owned by William L. Church, whose wife is granddaughter of Samuel, and daughter of Salem. Samuel Wallis, who lived to be ninety years old, was an honest and upright man, of a strong physical frame, a strong mind, and of temperate habits; by industry and frugality he had acquired, at the time of his death, a large farm which was divided among his children. His children were: William, the father of Frederick and Lydia (who married William J. Wellman); Zylpha, who married Ezra Morse; Samuel, who never married; Timothy, who married

Charlotte Balcome; Hannah, who married Fuller Marsh, father of Judson and Thomas Marsh; Nancy, who married Alvah White; Polly, who never married; John, who married Mary A. Logee (whose children are Laura, George M. and Henry D.); Dudley, who married Mary A. Wallis (left no children); Salem, who married Cynthia A. Hazleton and Maria L. Flagg (he had one daughter by his last wife); Cynthia, who married William L. Church. Two other children of Samuel—Lorinda and Julia—were never married.

James Wallis, fourth son of Capt. Benjamin and Lydia, born 1761, married Chloe Humes, and settled on the farm recently owned by Capt. Amos Humes. He afterwards sold the farm to Capt. Humes, and moved to Webster, where he owned a mill. He afterwards moved to Southbridge, and subsequently to West Brookfield, where he died in 1840. None of his children ever lived in Douglas.

Jonathan, the fifth son of Benjamin, died when young.

Aaron, the sixth son, born 1768, married Prudence Aldrich, a daughter of Aaron Aldrich, settled on the homestead of his father, and was a prominent man in town affairs for many years. He held the offices of selectman and assessor for nearly twenty years in succession. His children were Prudence, who married Joseph Wallis; Joanna, who married Willard Wallis; Aaron A., who married Submit Humes, daughter of Capt. Amos Humes. Aaron A. Wallis inherited to a great degree the mind and characteristics of his father. He seemed to step into his father's shoes in the management of town affairs, and for many years, with his brother-in-law, Warren Humes, was looked up to as one of the "fathers of the town." Of his children, one, Marcus M., lives in Iowa, and two daughters in Webster.

Mercy Wallis, daughter of Capt. Benjamin, born 1756, married Capt. Benjamin Dudley, and settled at the place now owned by Nelson G. Dudley. She was mother of Samuel Dudley and Benjamin Dudley, who settled on the Capt. Benj. Dudley farm.

From 1780 to 1830 the Wallis family and their connections by marriage occupied almost the entire territory of old School District No. 2. Now, 1889, there is scarcely one of the name of Wallis or their connections that live on the farms originally owned by the Wallis family. Five or six of the grandchildren of Samuel Wallis and one of the grandchildren of Samuel Dudley are still living on the territory. I know of no other.

The farm now owned by Elijah Biglow, in the Wallis neighborhood, was never owned by the Wallis family. It was settled by Elijah's great-grandfather, Jedediah Biglow, who built and lived in the old house that formerly stood a little north of where Elijah now lives. His son was Thomas; Thomas' sons were Jedediah (whose son was Freeman) and Elijah (whose children were Julia, who married a Perry; Sarah, who married Stephen A. Paine; and Elijah, who

lives on the old homestead). A little way north of the house of N. G. Dudley, between his house and Manchaug Pond, off from the road, once stood a house and barn, and quite a farm was connected with it, where lived Mr. Pelatiah Parker, the father of Sumner, John, George, Pelatiah and Lucinda, who married C. W. Potter.

The buildings have long since been demolished and the farm grown up to wood and timber. Pelatiah was a son of Isaac Parker, who settled on the Sally Tuttle farm, as now called. Benjamin Gould owned a farm and building that was on the east side of the road that leads to what is called Coopertown. The buildings were long since taken down or gone to decay, and the farm mostly covered with water, when the Reservoir Pond was filled. He was the father of Aaron, who married a daughter of Peter Thompson, and Jedson, who never married. The house now owned by Perry Briant was owned by Deacon Bailey; it stands near the old Gould place. About one and a half miles up the Coopertown road there was once a good farm and buildings, and a saw-mill, where a large amount of business was done; it was owned by Peter Cooper. The saw-mill and buildings have long since gone to decay and the entire farm, with the exception of an acre or two, is grown up to wood.

On the Oxford road, through the woods, near the Sutton line, is the old Marvel Morse place. Marvel Morse's father was a brother of Jacob Morse, and Marvel married Betsey Morse, sister of Amos and Ezra Morse. His children were Jacob, Marvel, Rebecca, who married Nahum Legg; Betsey, who married a Gleason; and Maria, who married a Southwick. The family are all gone and the farm is now owned by the Sheldon brothers. The house on the other side of the road was built and owned by Chandler Stockwell, Jr.

Fifty years ago there was a farm and old buildings about half a mile from the road east of the Marvel Morse farm, that was then owned by Briant Curtis. His father was one of the first settlers of Douglas. The buildings have long since gone to decay and the farm grown to wood and timber.

East of the house of William J. Wellman, that was formerly the William Wallis place, and near the corner of the road that used to be called the Oxford road, that ran across the meadow now the Reservoir Pond, was a small wood-colored house, that was built and occupied for many years by Jonah Titus, who was father of Preston and Russel Titus. The house was occupied for many years by Bradford Arnold, who was a famous stonecutter.

The next house on the road to the centre of the town, now owned by Wellington Balcome, was built by Minor Morse, and was afterwards occupied by Martin Van Buren Barnabas Davis, who married a Morse. The next house east of this, now owned by Thomas Manning, was built by Chester Morse, who was a

brother of Minor and son of Levi Morse. The house of James Dailey was built by Jonathan Jenney.

The buildings at the outlet of Badluck Pond, recently owned by John Wallis, were bought by him of Silas Briggs, Sr., who was one of the first settlers. The mill and the old house that stood where George M. Wallis' house now stands were owned by Philo and Aaron Fisher for many years, who bought of the Uxbridge Woolen Company, which, at one time, owned a large tract of land in Douglas Woods. It was used at one time for the manufacture of yarn; was originally built for a saw and shingle-mill, and, being near the Badluck Cedar Swamp, where large quantities of cedar were cut, and pine and oak timber were abundant, the business of manufacturing lumber and shingles was very profitable, although for many years after the first settlements the process of manufacturing shingles was by hand; the Badluck shaved shingles were considered the best in the market.

On the road leading south from the Wallis Mill, about one-half mile from the Webster road, stands the old house and other buildings which for many years was the homestead of William Dudley, called by everybody "Daddy Bill," to distinguish him from the William Dudley who was a son of Mr. Paul Dudley. He was a brother of Reuben Dudley and son of Lemuel Dudley, who was a son of the elder Paul. The other house on this road was formerly and for many years the home of George Starr. His wife was — Ides, daughter of Reuben Ides, who once lived here and owned this place.

About one mile west of the Wallis Mill on the Webster Road, is the old Streeter Place (so called). This farm, of about two hundred acres, is within the grant of four thousand five hundred and forty-two acres originally granted to the twenty proprietors of Douglas. The farm was first settled before the grant to the twenty proprietors by Mr. Asa Streeter, who lived here many years, and left the farm to his children, who afterwards sold most of it to the Uxbridge Woolen Co. The buildings have long since gone to decay and the cultivated lots are covered with wood and timber.

Still farther on the Webster Road, about half-way through the woods, stood another house and barn, built by John S. Chapin, about 1815.

John S. Chapin came from Uxbridge, and was extensively engaged in the wood and lumber business in this part of the town. He only cultivated a small tract of land near his buildings. The house was moved to East Douglas many years ago by Mr. W. D. Jones and was afterwards sold to Lucius Simpson, and now stands at what is known as "Bull Run." Another farm was situated within the limits of the grant to the twenty proprietors, called the "Chamberlin Farm," of one hundred and sixty acres; it was southwesterly of and adjoining the ministerial lot. The location of this farm is well known, but

the buildings were abandoned more than one hundred years ago, and no one would now mistrust that any portion of the land was ever under cultivation.

In this immediate vicinity, and within the limits of the twenty proprietors' grant is the ministerial lot, so called, originally consisting of four hundred acres,—two hundred acres granted to the First Congregational Society and two hundred acres to the first settled minister.

These lots were designated for many years as the "ministry" and the "minister's lot." The minister's lot was early sold to Colonel George Sanger, and was known for more than sixty years as the Colonel Sanger lot. It is now owned by William Knowlton & Sons, of Upton, Mass. The lot called the ministry lot—afterwards called the ministerial lot—was owned by the society for many years, but about the year 1830 was sold at auction. Benjamin Buffum bought forty acres on the west end of the lot, built him a log house and barn, and lived there many years, working at the wood and lumber business. The lot has ever since been known as the Buffum shanty lot. The next one hundred acres east of Buffum was bought by Deacon Hunt and owned by him at the time of his death. It is now owned by the heirs of J. M. Aldrich. The next lot east of this, of eighteen acres, was owned by Nahum Legg, afterwards by Gardner Chase, and is now owned by Elias T. Balcome, of Worcester. The remainder of the ministerial lot is owned by the heirs of Dr. David P. White.

Captain Benjamin Taft, who was early one of the principal owners among the twenty proprietors, owning at one time more than one thousand acres of their grant, had four hundred acres of his right set out at the extreme southwest part of their grant. It extended from the Connecticut corner to the Rhode Island line, and was two hundred and forty rods wide. About three hundred acres of this tract was sold by his son, Sweeting Taft, to Mr. John Tilley, of Boston. A road leading from Oxford Gore, as it was then called, passing by the house of Elder Harvey Wakefield, and crossing the county-road about one-half mile east of Connecticut east line, passed on south through this tract. About one-half mile south of the county-road this road became two roads—one, running in a southeasterly direction, led to the north end of Wallum Pond; the other, running in a southwesterly direction, terminated in Buck Hill woods. On the last road, near the corner of Rhode Island and Massachusetts, there was once an old house that was built by the father of Gideon Isaiah Wyman Thayer, and Gideon also lived there. East of this place is the Starr place, built and owned by Ebenezer Starr. Another house, and the only one now standing on this road, is the Buxton place. The house, from its appearance, is one of the first built in the town. Still farther north, on this road, is the Mason place, owned by Richard and Abraham Mason—once a large farm with good buildings. It is now a wilderness.

John Tilley, who came from Boston, bought of Sweeting Taft, who was a son of Captain Benjamin Taft, three hundred acres of the Benjamin Taft land. He sold two hundred acres to the Masons, and on the one hundred acres that he kept he built quite a respectable house and barn, a little south of the county-road, and for many years kept a hotel under the name of "coffee-house." This road has since that time always been known as the coffee-house road,—the whole of this tract of four hundred acres belonging to the Taft estate. Some of it, once under a good state of cultivation, is now entirely grown to wood, with the exception of two or three acres.

Near the easterly edge of Douglas Woods, on the county road, there is a famous and never-failing spring called the "Cold Spring," which has been so designated and known for more than one hundred years. Long before this, and before the first settlers located in Douglas, travellers, with their teams, used to stop at this place when passing through the country, pitch their tents near the spring, and take their midday meal or pass the night there; it was for very many years known as the White Oak tavern, although no buildings were ever erected there.

The farm at the south end of Badluck Pond, known as the Chase Place, recently owned by Silas and David Chase, was owned by their father, Asa Chase, who lived in a small house on the south side of the road from the Silas Chase house. Asa Chase bought the place from a Mr. Cooms or Cozzens, who was the first settler there.

The next house east of the Chase farm, now owned by C. W. Brown, was owned for many years by his father, Enoch Brown. Enoch was a prominent man in town affairs, very accurate and precise in all his ways and expressions, extremely sensitive to criticism, and an honest and honorable man. He served for many years on the Board of School Committee; was selectman and assessor many times, and in his younger days was a successful school-teacher. Enoch Brown bought the place of Henry Howell, who bought of his father, Philip Howell, who, in turn bought of Mr. Oliver Emerson. They lived in an old house standing a little north of the present house, and successfully operated for many years a hatter's shop, that stood on the south side of the road, east of the barn.

The next house on this road, recently owned by Joseph Morse, was owned by his father, Paris Morse, and was built by his grandfather, Levi Morse, and has always been kept in the Morse family.

The next house east, now owned by Joseph Briggs, was built by Levi Morse for his son, Minor. The house was unoccupied for many years under the superstitious prejudice that it was haunted; but for many years it has secured occupants without much trouble.

The house near the camp-meeting grounds, owned and occupied for many years by Deacon Levi M.

Stoddard, was built by Levi Morse for his daughter, who married a Stoddard, the father of Levi M.

On the road leading from the county road, south, over Wallum Pond Hill, there was once a house, quite a little way west of the present road, known as the old Watkins house, built and owned by the father of George Watkins. The hill on which it stood is now known as the Watkins Hill. The house was afterwards owned by John Alger, and a little west of this house was the Billings place. Both houses were long ago abandoned, and the farms are entirely covered with wood and timber. The house near the railroad near the Summit, known as the Flynn house, was owned for many years by Mr. Levi Brown. Levi was brother of Enoch and Simeon, who were sons of Jonah Brown, who lived at the south part of the town. The next house on this road, now owned by Peter Jarvis, was owned by Orrin Chase, some twenty years, and was formerly owned by Mr. John M. Whiting.

The old Asahel Aldrich place, now owned by Alfred Reynolds, is one of the early settled places in the town, and was owned by the father of Asahel Aldrich. Asahel Aldrich owned a large tract of wood and timber land west of his house, built a saw-mill and a shingle-mill and manufactured large quantities of lumber and shingles for market. The New York and New England Railroad went directly through his mill-ponds and demolished his dams, and he, about this time, sold out his farm and property and moved to the State of Illinois.

At the old cellar, where Daniel S. Buxton's house stood, was the old place of Timothy Aldrich. Lovell Parker's old place and Olney Angel's, the last house in Douglas, were on this road. On the road running east, past the school-house, the first is the Joseph Bowdish place, which was owned by his father, Nathaniel Bowdish. The buildings are rapidly going to decay. On the road running south from this road, between the Bowdish and Olney Arnold places, there was, one hundred years ago, three or four good farms. The Simon Fairfield place, the David Harrington place and the Jonah Brown were all on this road and were well-cultivated farms. Now not an acre of the land is under cultivation.

The Olney Arnold farm, now rapidly running down, was once a good farm and under a good state of cultivation. The Zara Parker farm is one of the early settled farms in town, and was owned for many years by Zara's father, Mr. Prince Parker. The house of Harley Brown was owned by Mrs. Mary Fairfield, Abel Parker and a Mr. Prince.

North of this house, on the south side of Frog Pond, fifty years ago, stood the last log house in Douglas. It was owned and occupied by Mr. Jonathan Marsey or Massey. His daughter Ruth married Emer Esten, and recently died at the old Esten place.

The old house still standing near the Mormon

Chapel is the old Simon Harrington house, one of the early built houses in town.

The house of Potter M. Bates is one of the early built houses in town. It was the home of his wife's mother, Mrs. — Mowry.

An old cellar on the road between Potter M. Bates and Retus Walling shows where once stood the house of Joseph Emerson. The buildings have all been down many years. Joseph Emerson was the father of Caleb and Darling Emerson, and his father's name was Joseph. He built the house and was the first settler here.

Retus Walling, now living, bought his farm of John M. Whitney and built the house where he now lives. The place was formerly owned for many years by Elder Pliny Britt. Elder Britt organized the Reformed Methodist Church of South Douglas about 1806, assisted in building the meeting-house and preached there for several years. Elder Amos Yates was his successor, who preached there until by the infirmities of age he was unable to preach longer. There have been no meetings there for many years.

The William Jefferson place, next east of Retus Walling's, now owned by Mr. Walling, is one of the earliest settled farms in town, originally including nearly all of what is now known as "Tassletop." William Jefferson was brother of Aaron, and their father, Aaron, lives in an old house near the church. He had a brother Seth, who was father of Waterman Jefferson, who lived in an old house near the Caswell place. The farm now owned by Lovel Parker is the old Caswell farm, owned originally by Mr. Nathan Caswell, who left it to his son Nathan, who left it to his children, some of whom live in the West. N. S., David, and Mary (who married John Fairfield) are still living in Douglas.

Jared Benson once owned what is now the Town Farm. He sold to David Richardson and he to the town of Douglas. The house now occupied by Darius Heath was the homestead of Captain Moses Balcome, who was brother of Amos Balcome, who owned the farm at the end of the road west of the Captain Moses Balcome farm. Amos and Moses Balcome were sons of Bezaleel Balcome.

Aaron Balcome was one of the early settlers of Douglas. He was the progenitor of the Balcome family that at one time was a numerous and influential family in town. He was the father of John Balcome, who had eighteen children. His sons were: Ellis, Samuel, John, Jesse, David, Warren, Aaron, with several daughters. Aaron and John Balcome owned the farm now owned by Dennis Quinn. Aaron, brother of Ellis, at one time owned and lived at what was many years ago known as the Ridell place.

John Balcome settled on the old homestead. Samuel married the daughter of Priest Stone, the second settled minister of Douglas, and settled on the farm belonging to his wife's father, in the centre of the town. Ellis married Eunice Hunt and settled on

the farm now occupied by C. W. Potter. Jesse at one time owned the brick house now belonging to the heirs of Joseph and Jeremiah Batcheller. David owned the place now owned by Thomas Kelley, and Warren built a small house now standing unoccupied at Centerville.

The farm recently owned by John Robins is one of the first settled farms in town; it was first settled by Dr. William Jennison, afterwards owned by his son, Samuel Jennison, Esq., and by Dr. Taylor, who lived there many years. The farm afterwards passed through the hands of Paul Dudley and William Dudley (who built the large house east of the church), Paris Hill and Caleb Hill (by whom it was sold to John Robins. The Holman house was built by Rev. David Holman), on land bought of —. The hotel of J. H. Dudley was built by his grandfather, Paul Dudley. It has always been occupied as a hotel. The house of A. J. Dudley and A. M. Hill was built by John Dudley. The house now owned by Joseph A. Richardson, and occupied by himself and his father, David Richardson, was built by Doctor Aaron Batcheller, and occupied by him until his death. Dr. Batcheller was one of the most skillful physicians who ever lived in the south part of Worcester County. His practice was extensive in all the adjoining towns.

The following stanza, composed by him, to be inscribed on his tombstone, shows that he not only entered heartily into his work, but that he also thought of the future:

"Thousands of journeys, night and day,  
I've rode weary on my way  
To heal the sick, but now I've gone  
A journey never to return."

The house now owned by Chandler Titus, known as the old Jo Albee place, was the homestead of the elder Lemuel Tiffany, and was the place of twenty acres originally granted to Ephraim Hill for being the first settler after the grant of four thousand acres. This was in the fourth range of lots. The old Whiting farm, at the Benjamin Whiting place, is one of the oldest settled farms in town. Benjamin Whiting was son of Abner Whiting, who built the present Whiting house. Abner was brother of David Whiting; they were sons of Caleb Whiting, who lived at the Dennis Quin place, where David lived after the death of his father. Abner and Fred Whiting were sons of David. Cypron and Benjamin were sons of the elder Abner. The farm owned by Jesse B. Sherman is the old Daniel Aldrich farm, by whom it was first settled; it was afterwards sold to Fred. Whiting and to the present owner. The Jesse Chase farm, known as the Daniel Logee farm, was originally owned by Sylvanus Holbrook.

The William Chase farm is one of the early settled farms in town. It was owned by his father, whose name was William, who lived in a house near the present one. William Chase, Sr., was brother of

Joseph Chase, who lived in the Sewell Chase house, known as the Rufus Young farm.

On the old Providence turnpike, near the south part of the town, fifty years ago stood a large two-story house and a large barn, known as the Thad. Thayer place. Thaddeus Thayer was the fifth son of Joseph Thayer, who was son of Isaac Thayer. Thaddeus was one of a family of twelve children, born about 1753, kept a hotel and owned a large farm, and was a distant relative of the Thayers now living in Douglas. West of the Thaddeus Thayer place sixty years ago, on a small road that ran by the two hundred acre farm reserved out of the three thousand seven hundred acre grant to the Aldrich family, and south of the Aldrich farm, there was a good-sized farm with fair buildings, owned by Israel Thayer. Israel Thayer had borrowed some money of a peddler, and one night, about sixty-five years ago, the peddler went to the house either to collect his pay or the interest on his money, and he accepted an invitation to stay all night. During the evening Israel's three sons—Nelson, Israel and Isaac—conceived the idea of putting the peddler out of the way, and thus settle his claim against their father, thinking, no doubt, that, as they had been killing hogs that day, it would be a favorable excuse to account for any blood they might shed in killing the peddler. They therefore loaded their father's gun and went out into the yard and shot the peddler through the window. Not killing him by the shot, they took an axe and beat his brains out. They were subsequently arrested and tried for the crime, were convicted and executed in Buffalo, in the State of New York. This farm and the Aldrich farm are now grown to wood and timber.

The Aldrich family probably all sprung from this Aldrich—Edwin, who was the first settler. His son was Jacob Aldrich, and his sons Aaron, Jacob and Amariah. Seth Aldrich, Sr., once lived at the Joshua Fairbank place. Aaron Aldrich settled on a large tract of land at or near the Simon Rawson place. His sons were Aaron, Ezra, John, Joseph and Seth. Their descendants still living in town are quite numerous.

The Southwick farm, in the neighborhood of the Aaron Aldrich farm, is also one of the early settled farms in town. This was originally the Lovell Pulsifer farm. He was a blacksmith and wore a leather apron wherever he went, was elected Representative to the General Court, and wore his apron and homespun clothes. Some of the Representatives undertook to tease him in regard to his appearance by asking him if there were no smarter and better men in Douglas to represent the town. His reply was, "Yes, I suppose there are some smarter men in Douglas, but they haven't got any clothes." Moses Southwick married the daughter of Lovell Pulsifer and succeeded to the farm. Moses was the father of Lovell, Moses, Luke and seven daughters, of which Chandler Walker

married one. Moses' father's name was Joseph, who lived in Smithfield, R. I. The numerous Thayer family that have lived in Douglas and Uxbridge for the last one hundred and fifty years all sprung from a Mr. Thomas Thayer, who came from England. Captain Marvel Thayer and his brother John, formerly living in the south part of the town, were sons of John Thayer, who was brother of Thaddeus and Joseph Thayer, Esq., formerly of Uxbridge; these three were sons of Joseph and grandsons of Isaac Thayer, who was the son of Ferdinand Thayer.

Mr. Asa Thayer, who is now living, was born in 1799; was one of twelve children—seven sons and five daughters—children of Mr. Asa Thayer, who lived in Uxbridge, and married Mary Murdock, daughter of Captain Benjamin Murdock, who bought Nathaniel Brewer's right in the one thousand acre grant, called the Draper and Brewer grant. Captain Murdock lived in the small house on the opposite side of the road from the house of Jacob Williams. Asa Thayer, Sr., built the house and barn now owned by Jerre Dunlavy and kept a hotel there for many years, and after his death the present Asa Thayer kept it for a hotel for many years. This is on a part of the Murdock farm—the original Brewer farm. Two of Asa Thayer's brothers—Emory and Turner—and two of his sisters—Olive, who married Ezekiel Taft, and Nancy, who married Arnold Taft—lived in Douglas.

Asa Thayer, Sr., was son of Samuel Thayer and grandson of Captain Thomas Thayer, who was a son of Ferdinand Thayer, one of the early settlers in the State.

The road leading from the village of East Douglas South, has for many years been called "the Martin road." About one mile south of the village and a little east of the four corners is the old Martin farm, which has been kept in the Martin family since the town was first settled. Harrison, who is still living, Aaron and Eliza Martin were children of Major Comfort Martin. Eliza married Robert Hannant, and her children still own the farm.

Comfort Martin was a large, portly man, who stood more than six feet in his stockings and was son of Comfort Martin, who raised a large family, mostly daughters; was one of the early settlers of Douglas.

The Gould family was one of the early families of Douglas. Mr. Ebenezer Gould settled on the place recently owned by Parley Gould. His sons were Benjamin, Daniel and Jason. Benjamin's sons were Aaron and Judson; Daniel's sons were George, Otis and Eliezer, and Jason's sons were Sylvester and Parley. The farm now owned by Hartford Thompson was the old Cummings farm, owned for many years by Ithael Cummings, and was also owned by his father.

The Stephen A. Paine place, east of the school-house, was the old David Mowry farm, and was settled by his father.

The house where Joseph Thompson now lives is on the old Peter Reed farm. Peter Reed was a promi-

nent man in his day; he raised a large family of children, among whom were Joseph and Josiah. He once kept a store in the old house that stood near the present house.<sup>1</sup>

## CHAPTER CLXXVIII.

### DOUGLAS—(Continued.)

*First Congregational Church—Second Congregational Church—Reformed Methodist—Methodist Episcopal—Catholic—Manufactures—Eliacatonal—The Willis Fund—Masonic—G. A. R.—The Press—The Revolution—The Rebellion.*

THE FIRST CONGREGATIONAL CHURCH was organized November 11, 1747, with twenty-three members. The first pastor was Rev. William Phipps, ordained December 16, 1747, and remained until July 10, 1765. He was succeeded by Rev. Isaac Stone, who was ordained October 30, 1771, and served this church thirty-four years. His successors have been as follows: Revs. David Holman, for thirty-five years; John W. Salter, Gilbert D. Richardson, John D. Smith, Francis Dyer, Amos Holbrook, J. W. C. Pike, W. W. Dow and James Wells, the present pastor. The first house of worship was dedicated in 1748, and the present house in 1834.

THE SECOND CONGREGATIONAL CHURCH was organized June 12, 1834, with twenty-nine members. The first pastor was Rev. John Boardman, installed February 25, 1835, and remained until his death, November 8, 1841. His successors in the pastorate have been as follows: Revs. Chauncy D. Rice, Joshua L. Maynard, S. M. Plympton, William T. Briggs and Rev. Stephen Smith, the present stated supply. The first church edifice was erected in 1834, and remodeled in 1872.

REFORMED METHODIST CHURCH, South Douglas, was formed in 1808, and its first pastor was Pliny Brett. No meetings have been held here for about twenty years and the house is going to decay.

THE METHODIST EPISCOPAL CHURCH in East Douglas was organized November 5, 1866, with Rev. W. Wilkie as pastor. The present house of worship was erected in 1872. The pastors since Mr. Wilkie have been as follows: Revs. William P. Blackmer, William Silverthorn, Daniel P. Atkins, William M. Hubbard, William D. Bridge, J. J. Woodbury, W. H. Cook, I. C. Smith, Jonathan Neal and John Capen, present pastor.

ROMAN CATHOLIC.—Catholic services were held in this town prior to 1850 by Father Sheridan. A church was formed in 1865. Among those who have served as spiritual guides to the Catholics of Douglas may be mentioned: Fathers Sheridan, O'Keefe, Moran, Gegnier, Coullard, Delphos the present pastor.

THE REFORMED METHODIST CHURCH of East Douglas was organized in or about 1844, and the

house of worship was erected the following year. Solomon P. Snow was first pastor. No services have been held here for about ten years, and only three members of this church are now living.

MANUFACTURES.—The manufacture of axes in Douglas dates back to about the year 1790, when Joseph and Oliver Hunt began making them in a small way at East Douglas. A shop was subsequently started at the Centre. After a number of years, of varying success, the business came into the hands of Oliver Hunt, who, with his sons Warren and Otis, succeeded in bringing the business to a prosperous condition. Benjamin Cragin was a prominent factor at this time, he acting as selling agent. Warren Hunt subsequently took charge of the business and had associated with him for three or four years Alexander Scudder. The Douglas Axe Manufacturing Company was organized in 1835, with William T. Eustis as president, and the corporation has continued to the present time, and the Douglas axe has a world-wide reputation. Various prize medals have been awarded this axe, among them those from the Massachusetts Mechanics' Association, Philadelphia Centennial, Paris Exposition, London World's Fair, the Vienna Exposition, etc. The works are now in successful operation.

The woolen-mill now run by W. E. Hayward & Co. was built by Warren Hunt, in 1863, for a cotton-mill. It has subsequently been in the possession of Nelson Williams, C. P. Whitin, Moses Taft and Lee & Murdock. Among other manufactories may be mentioned Thayer's grist and saw-mill, Logee's carriage manufactory, Wellman's grist-mill and Eagle Grist-Mill. Manufactories of a former period were the Cragin satinet-mill, Wallis's planing-mill, Samuel Legg's fulling-mill, Adams' cassimere factory, Burt plow factory, Preston cotton factory, the Lovett mill, Southworth's grist-mill and Carpenter's tannery and shoe factory.

EDUCATIONAL.—The first reference to schools, found on the town records is under date of 1748, when it was "voted that a schoole be kept three months in ye summer seasons." The early records show that the town manifested a lively interest in schools, and in 1757 it was voted that "schools be set up in five parts of the town." The cost of schools from 1747 to 1770 ranged from £2 to £20 annually, and occasionally a year passed with no appropriation. The schools of the town at present are in a fairly prosperous condition.

The present members of the School Committee are Levi White, M.D., E. C. Esten, Stillman Russell, Rev. James Wells, James Wixted, Francisco Bowen, C. S. Caswell, E. B. Knapp and W. W. Brown.

The present Board of Selectmen, who are also overseers of poor, are E. N. Jenckes, Orin Chase, J. M. Parker, W. P. Wight and N. G. Dudley.

The present Board of Assessors: S. W. Potter, Caleb Hill and Thomas E. Wixted.

<sup>1</sup> A more extended history of Douglas is now in course of preparation by Mr. A. F. Brown, and will be issued in due time. Mr. Brown is well qualified for the work, and the history will be a valuable addition to the historic literature of New England.—[EDITOR.]

The present postmaster at Douglas Centre is A. J. Dudley, and at East Douglas, A. F. Brown.

The fund known as the "Wallis Devise" was originated by the will of Moses Wallis, wherein he bequeathed a certain sum of money to be kept on interest until November 16, 1901, when both principal and interest should form a new principal to be "forever thereafter kept on interest, the annual interest" of this new principal, when it reaches twelve thousand dollars, to be applied to the building of a Town Hall, &c. The present agent of the fund is C. W. Potter.

**SOCIETIES.**—The Masonic Lodge is in a prosperous condition, with John M. Rawson as present Master.

*Samuel Sibley Post, Grand Army Republic*, No. 137, was organized about eight years ago, with George H. Walker, Commander, who was succeeded by Henry Hutchins, and he by J. Q. Bigelow, the present Commander. The members of the post are harmonious and united, and have done and are now doing a noble work in the distribution of charities and looking after the wants of the needy and destitute. The town has given them from one hundred to two hundred dollars annually, which they have judiciously expended.

**THE PRESS.**—*The Douglas Herald* was established March 7, 1868, by G. B. Quinby and George W. Spencer. Soon after Mr. Quinby retired and for a short time Mr. Henry F. Dudley was associated with Mr. Spencer. In 1872 Charles A. W. Spencer, a brother of George W., became interested in the paper, and it was published by George W. Spencer & Co.

January 25, 1873, the *Douglas Herald* and *Whitinsville Compendium* were consolidated under the name of the *Worcester South Compendium*, and was published here until October 4, 1873, when it was removed to Uxbridge.

Other sheets have been as follows: *The Advertiser*, by C. J. Batcheller; *Our Home Journal*, by W. D. Bridge & Co.; *The Engraver's Proof Sheet*, by William A. Emerson; and *Practical Instructions in the Art of Wood Engraving*, by William A. Emerson.

During the War of the Rebellion Douglas aided the Colonial cause nobly, both in men and money. It is impossible to ascertain the number of her citizens who served in the war, but it is safe to say that the number reached from seventy-five to one hundred, and this in a probable population of not exceeding three hundred souls. In April, 1775, Lieut. Ezra Whiting represented the town in the Provincial Congress at Concord, and in the following May Jeremiah Whitney was member of the General Court. Among others who were active in aiding the cause were William Johnson, Ezra Whiting, Robert Humes, Caleb Bill, William Dudley, Nathaniel Snow, Daniel Aldrich, Stephen Streeter, John Herendren, Joseph Emerson, Samuel Parker, Daniel Hunt, Abner Perry, John Taylor, Aaron Benson, Caleb Whiting, Jonah Martin, David Thompson and Job Knapp.

**WAR OF THE REBELLION.**—At the breaking out

of the Rebellion the town responded promptly to the President's call for troops, and its record during the struggle is one in which its citizens may justly feel a patriotic pride.

The town furnished about two hundred and fifty men, and appropriated for war purposes, exclusive of State aid, the sum of \$30,734.36. The following is a list of soldiers:

*Second Massachusetts Volunteers.*—Lebright Brown, John B. Johnson, John Richards, Thomas Take, Thomas Wolf.

*Fourth Massachusetts Volunteers.*—John Schriver.

*Eleventh Massachusetts Volunteers.*—Horace Belding, Lorin B. Chase, Philip Gannon, J. Francis, W. Thompson.

*Fifteenth Massachusetts Volunteers.*—Edwin F. Andrews, Rufus Belden (corporal), Kennedy Bronock, Franklin Bullard (corporal), Benjamin R. Elliott, Harlan Fairbanks (corporal), Sylvester Oakes, Nathaniel Putnam, Adoniram J. Rawson, Samuel Sibley, Harvey Sibley, Thomas Snow, Jr., Thomas A. Southwick, Hiram Ward.

*Eighteenth Massachusetts Volunteers.*—Alexander Thompson.

*Twenty-second Massachusetts Volunteers.*—Alfred H. Marsh.

*Twenty-fourth Massachusetts Volunteers.*—John Blake.

*Twenty-fifth Massachusetts Volunteers.*—Joseph Albee, Orrin J. Aldrich, John Allen, William Deforest Balcome (musician), Benjamin Bartlett, James O. Bartlett, Nathan S. Bartlett, Elbridge Buxton, Glory Busch, Orlando Carpenter, Samuel Cragin, Joshua Dubuque, Cornelius Emmons (band), George A. Gleason, Stephen Hall, George Hall, Samuel Hall, John Hall, Reusselaer G. Hamilton, Benajah Hodge, Allen R. Hough, Henry C. Lampson, George Leach, Joseph Lemay, Jeremiah E. Luther (corporal), Thomas Magee, Timothy Megary, Aaron Metcalf, Marshall Purinton, Nathaniel Putnam, Lambert B. Simmons, Hiram Staples, Amos Steere (band), Francis A. Stockwell, Joseph Teabault, Charles C. Wall, William Wood.

*Twenty-seventh Massachusetts Volunteers.*—Dr. Franklin Hunt (assistant surgeon), William Mayer, Lewis Satro.

*Twenty-eighth Massachusetts Volunteers.*—Thomas J. Calden (band), Euoch Converse (band), Noah H. Jones (band), Edward L. Thayer (band), Bennett W. Thomas (band).

*Thirtieth Massachusetts Volunteers.*—John Perry.

*Thirty-third Massachusetts Volunteers.*—James Ward.

*Thirty-sixth Massachusetts Volunteers.*—Daniel A. Burton (sergeant), Patrick Callahan, Leonard A. Chapman, Elias H. Freeman, Matthew Hudson, William Mowry.

*Fifty-first Massachusetts Volunteers.*—Leander Andrews, Nelson Angell, Joseph T. Arnold, Charles T. Balcome, Elmer H. Balcome, Wellington Balcome, Solomon V. R. Barnes, Lemuel C. Belding, John Bird, Philetus Buffum, Loami B. Carr, John Collar, John Donaldson, George E. Dunn, John N. Gaskell, Gilbert L. Gillson, Leonard G. Higgins (corporal), Moses W. Hollis, Joseph Hough, Josiah Hough, Jr., Loren M. Howell, William Hunt (captain), George F. Hutchins (band), William N. Jones, Oscar Keith, Benjamin Knapp (corporal), Alphonzo Luther (sergeant), Francis A. Maynard (corporal), Charles W. Moore (second lieutenant), Francis L. Moore, Lewis T. Moore (sergeant), Nahum Morse, Ezekiel Packard (first lieutenant), Peter Roberts, Charles F. Russell, Jeremiah F. Russell, Alfred Snow, Ira Southwick, Willis W. Sherman, Simeon H. Staples, Lucius M. Thayer (captain), Elijah Thompson, David L. Thomas, Chandler Titus, Hiram Ward, Charles Whitney, Lucius S. Whipple, Charles A. Whipple, William A. Wilcox, William H. Wilcox, James Woodard, Dorris B. Young.

*Fifty-seventh Massachusetts Volunteers.*—David B. Curtis, John N. Gaskell, Henry Glover, Abner A. Lealand, Lewis Mountain.

*Fifty-eighth Massachusetts Volunteers.*—George A. Stone.

*First Massachusetts Cavalry.*—John D. Darling, Noah M. Knight, William N. Sprague, Charles C. Walls, John Kelley.

*Third Massachusetts Cavalry.*—Herbert R. Bragg.

*Fourth Massachusetts Cavalry.*—William Brown, James Clark, John McGrath, Noah M. Knight (transferred from First Massachusetts Cavalry).

*First Massachusetts Heavy Artillery.*—Stephen Martyr, Alexander Miken, Andrew Peter.

[For balance of list see Appendix, page 1748].

# WORCESTER.

THE following history of the town and city of Worcester was prepared under the supervision of a committee, which consisted of Samuel Swett Green, A.M., librarian of the Free Public Library, Worcester; Charles Augustus Chase, A.M., treasurer of the Worcester County Institution for Savings; and Mr. Nathaniel Paine, cashier of the City National Bank, Worcester. This committee selected the writers of the different chapters, and secured their services; it also made suggestions to them regarding the performance of their work, and has read the chapters in manuscript and rendered aid as occasion required. The gentlemen who form the committee are well known to have an extensive knowledge of local history, and are, all of them, members of the Council of the American Antiquarian Society. Special thanks are due to the chairman of the committee for the fertility of resource, energy, courtesy and executive ability which he has shown, and to all its members for the good judgment and aptness for the work undertaken by them, which they have displayed, and for the readiness with which they have given counsel, and out of their large stores of information have offered aid to writers and publishers. The editor and publishers wish to state emphatically that the services of the committee have been in the highest degree valuable.—EDITOR.

## CHAPTER CLXXX.

BY P. EMORY ALDRICH, LL.D.

§1. An outline of the history of Worcester, from the earliest attempts at settlement to the close of the Revolutionary War, is all that will be undertaken in this initial chapter; a fuller narrative of the events of that period will be given by other writers, to whom that duty has been assigned. The origin of New England towns has occupied the attention of many students of our early institutions, and much has been written and published on the subject within the last few years. These writings disclose a very considerable divergence in the views held by different writers as to the true origin of towns, and the formative influences by which their development has been controlled.

As this chapter is devoted to an account of the origin and early annals of Worcester, it has seemed to the writer that some discussion of the general subject of the origin and growth of towns in the Plymouth and Massachusetts Colonies would not be out of place in this connection.

The origin of these towns was not the same in all cases. The mode of acquiring title to the soil and the means of effecting settlements were not the same in all towns. But, although the methods of acquiring title to land might vary in different cases, yet the

primary sources from which all land titles in these colonies were derived were the same. At the time of the discovery and settlement of this country it had become a fixed principle of international law, among the European nations, that prior discovery by any of them gave to them the prior and better title, and grants from them passed an absolute title to the grantee, subject to the Indian occupancy. And it became a rule of law, also, in all English colonies that the Crown had the sole and absolute right to acquire or extinguish the Indian title. This statement does not agree with the very common opinion as to what was the real nature of the Indian's title to the land over which they roamed, but upon which they could hardly be said to dwell, or of the manner in which that title or right could be acquired, and yet the statement is strictly true. Chief Justice Marshall, in giving the opinion of the United States Supreme Court, in a case in which the question arose, says, "The power now possessed by the government of the United States to grand lands resided, while we were colonies, in the Crown or its grantees. The validity of the titles given by either has never been questioned in our courts. It has been exercised uniformly over territories in the possession of the Indians.

"The existence of this power must negative the existence of any right which may conflict with and control it. An absolute title to lands cannot exist at

the same time in different persons, or in different governments. An absolute, must be an exclusive title, or at least a title which excludes all others not compatible with it. All our institutions recognize the absolute title of the Crown, subject only to the Indian right of occupancy, and recognize the absolute title of the crown to extinguish the right."<sup>1</sup> It would not be difficult to demonstrate, if this were the proper place to do so, that what is called the absolute right of the Crown was, in reality, the right of the people of England, which, by their free choice, they had vested in the Crown.<sup>2</sup>

The Crown, in the exercise of that sovereign right, granted certain lands, lying within defined limits, to the Massachusetts Colony; subsequently the colony, through its constituted authorities, granted specific parcels of these lands to companies or proprietors, and the latter, sooner or later, became the founders of towns; and these proprietors, either before or after their organization into townships, conveyed, in smaller parcels, the lands they held in common to individuals who held the same in severalty.

In this way Worcester had its origin, as will hereinafter be more fully set forth, with the conditions upon which the original grant was made and the struggles and hardships through which the early settlers passed before they finally succeeded in laying the foundations on which this goodly city of eighty thousand inhabitants now, after the lapse of more than two centuries, securely rests.

Worcester furnishes a good illustration of the manner in which many of the Massachusetts towns originated, and it will hardly be necessary to seek among the primitive Teutonic institutions on the continent or look to the Anglo-Saxon or Norman institutions in England for models on which these towns were built. "In that land," says De Tocqueville, speaking of America, "the great experiment was to be made by civilized man of the attempt to construct society upon a new basis; and it was there, for the first time, that theories hitherto unknown, or deemed impracticable, were to exhibit a spectacle for which the world had not been prepared by the history of the past."

It is true that local self-government, in a modified form, had been known both in Germany and England before the earliest colonization of America. But long before that colonization commenced the Crown had, by repeated encroachments, deprived the people of their ancient right of self-control, and that right or power had been vested in municipal councils or other local boards, and which were self-perpetuating bodies.<sup>3</sup> But when removed from the presence of that dominating power of the few over the many, the colonists at once returned to what has been called the natural order of society in the establishment of government.

Writing upon "The American System," a writer already quoted says: "The village or township is the only association which is so perfectly natural that whenever a number of men are collected it seems to constitute itself. The tithing or town exists in all nations, whatever their laws and customs may be; it is man who makes monarchies and establishes republics, but the township seems to come directly from the hand of God."

This may be regarded as an ideal or speculative, rather than an historical statement of the origin of towns, yet it contains the announcement of a fundamental truth connected with the subject, and that is, when men come to live together in society, they find it necessary, when left to regulate their own affairs, to establish, within comparatively narrow territorial limits, some form of local self-government; and this they do, not because some more or less remote ancestors may have done the same thing, but rather in obedience to a necessary law of social existence.

And every generation or community of men, when left free to act, will establish such local institutions as will best subserve the necessities and wants growing out of their environments; and this they will do without any servile imitation of those who have gone before them. The late Professor Parker, of the Dane Law School, a learned writer on legal and historical subjects, said, in a paper on "The Origin, Organization and Influence of the Towns of New England," that "a careful examination of the history of New England towns will show that they were not founded or modeled on precedent; . . . they were not contrived in the closet, nor in the hall of a legislative assembly, and brought into existence, with the powers and duties which we find attached to them, by the enactment of a law for that purpose. They did not burst into mature life by any previous contrivance. But, like most other useful machinery, they had their origin in the wants of the time, and came into existence by a gradual progress from imperfect beginnings." The learned author of a memoir of Plymouth County declares that "the origin of town government in New England is involved in some obscurity. The system does not prevail in England. Nothing analogous to it is known in the Southern States; and, although the system of internal government in the Middle States bears a partial resemblance to that of New England, it is, in many respects, dissimilar."

In another part of the same memoir the author says: "To the independent churches we may trace the original notion of independent communities, which afterwards assumed the name of towns, and which, having passed through an ecclesiastical state, and after the proprietaries became extinct from the special appropriations of all the lands within the bounds of their charter, assumed the shape of political corporations, with municipal and in part legislative powers within their limits." This will hereafter

<sup>1</sup> 8 Wheaton's Rep., p. 588.

<sup>3</sup> Frothingham's "Rise of the Republic," pp. 14-15.

be shown by the undisputed facts of history to be an imaginary and not the true genesis of towns.

Another late writer on this subject, and quoting the opinion of an earlier author, says, "New England towns are models after the plan of King Alfred's hundreds."

To show the fallacy of this theory of the origin of our towns, it may suffice to state that it is but a tradition that Alfred devised the arrangement into hundreds and tithings; and, besides, the tradition itself is inconsistent with the facts of authentic history.<sup>1</sup> And, moreover, the English hundred had very little in common with the New England townships or towns.<sup>2</sup>

In his "History of Charlestown" Mr. Frothingham affirms that "the nearest precedent for New England towns were those little independent nations, the free cities of the twelfth century, or the towns of the Anglo-Saxons, when every officer was elective." In another connection the same writer says, that "the German and Anglo-Saxon principle of local government was early asserted in all the colonies, and that whether the organization was called parish, borough, hundred, town or county, the principle was carried out that the inhabitants should manage their local affairs through officers legally elected. Municipality in New England was the simplest of all municipal forms, and the best adapted to develop the republican idea."

An inquiry respecting the origin and constitution of the free cities of mediæval Europe would show that they differ very widely from the towns of New England. Most of these cities had existed before the fall of the Roman Empire in the West; they had suffered from invasions and civil wars, and "upon the fall of the Empire had still been repressed by the feudal polity." Their inhabitants had been despoiled and their commerce and industry destroyed. "But the municipal traditions of Rome had survived, and were confirmed by the free customs of the Teutons. The towns gradually obtained from the crown, and from feudal superiors, charters of enfranchisement, which secured to them the rights of maintaining fortified walls, of raising troops and maintaining self-government."

In Italy and other parts of Europe some of the principal towns grew into sovereign municipal republics and formed alliances among themselves more or less permanent; hence arose the Hanseatic League and the other great confederation called the Rhenish League, and the confederation of towns and cantons in Switzerland. And, above all, the Roman law, the greatest monument of legislative wisdom the world has ever seen, survived the fall of the empire, and became the law of the nations that overran and destroyed the empire, and exerted a

controlling influence in the formation of all their institutions.

From these brief statements the great dissimilarity between the so-called free cities of the twelfth century and New England towns is apparent. The former had existed as component parts of pre-existing nationalities, and had been over-run by barbarians, and their liberty destroyed by feudalism, and after centuries of struggle they succeeded in throwing off the oppressions of feudalism, and regained, in a measure, their franchises as independent municipalities; whereas, the New England towns were original creations, on a virgin soil, and far removed from the scenes of older civilizations, and instead of being separate and independent municipalities, these towns were component parts of the State, forming together one body politic.

"In their origin our boroughs," says the author of the "History of the English People," "were utterly unlike those of the western world. The cities of Italy and Provence had preserved the municipal institutions of the Roman past; the German towns had been founded by Henry the Fowler with the purpose of sheltering industry from the feudal oppressions around them; the Communes of Northern France sprang into existence in revolt against feudal outrages within their walls. But in England the tradition of Rome passed utterly away, while feudal oppression was held fairly in check by the Crown. The English town, therefore, was in its beginning simply a piece of the general country, organized and governed precisely in the same manner as townships around it. Its existence witnessed, indeed, to the need which men felt in those early times of mutual help and protection. The borough was probably a more defensible place than the common village. But in itself it was simply a township, or group of townships, where men clustered, whether for trade or defense, more thickly than elsewhere.

"*The towns were different in the circumstances of their rise.* Some grew up in the fortified camps of the English invaders. Some dated from a later occupation of sacked and desolate Roman towns. Some were the direct result of trade. There was the same variety in the mode in which the various town communities were formed." This passage has been quoted partly for the purpose of testing the soundness of those theories which attempt to trace the beginning of New England towns to a definite German or Anglo-Saxon origin. Neither English towns nor towns on the continent of Europe had a common origin, and they differed essentially in the elements of their organization and powers. The historian Stubbs, who seems to have explored the beginning of English institutions more thoroughly than any of his predecessors, says: "The historical township is the body of allodial owners who have advanced beyond the stage of land community, retaining many vestiges of that organization; or the body of tenants of a lord who regulates them, or allows them to regulate themselves, on prin-

<sup>1</sup> Stubbs' "Constitutional History," 1 vol., ch. 5, p. 99.

<sup>2</sup> *Ibid.* pp. 96-108.

ciples derived from the same. In a further stage, the township appears in its ecclesiastical form as the parish, or portion of a parish, the district assigned to a parish." The same writer clearly shows that in different parts of England these primary divisions of territory or people assumed different forms, and passed under different names.

The description of an English town, by the distinguished historian of the Norman Conquest, exhibits a most marked contrast, rather than similarity, between an English and a New England town. "An English town," says that writer, "was a collection of every class of inhabitants, of every kind of authority, which could be found in the whole land, all brought close together. Lords with their *sac* and *soc*; churches with their property and privileges; guilds—that is, artificial families, with their property, their usages, their religious rites; thanes and churls in the language of one age, barons and villains in the language of another, merchants, churchmen, monks, all the elements of English society, were to be seen side by side in a small compass. The various classes thus brought together were united by neighborhood, by common interests, by common property and privileges."<sup>1</sup> There is very little in all this to remind one of the simple and homogeneous character of a New England town, either of the earliest or latest type. The statement of Maine, in his interesting work on "Village-Communities in the East and West," "that the earliest English emigrants to North America organized themselves at first in Village-Communities for purposes of cultivation," is too broad and unqualified for the facts upon which it is based. It is true the Pilgrims at Plymouth held and cultivated their lands in common for a short time, but they soon made a division of the common property and each person held his own in severalty. As early as 1625 every man at Plymouth planted for himself, and all the products of his labor were to be his own individual property. The fact that the Colonial Legislatures made grants of lands to companies, who undertook to establish towns, were made with no expectation or design that the members of the company should continue to hold the lands as tenants in common, but rather that they should make allotment of portions of the lands to the several members of the company, and convey the remaining portions to other persons whom they could induce to join them in the organization of a new town. One ingenious writer on the origin of our early political institutions declares "that here (in New England) the fathers laid deep and broad the foundations of American freedom, and that here was developed the township, with its local self-government, the basis and central element of our political system—upon the township was formed the county, composed of several towns similarly organized; the State, composed of several counties, and

finally the United States, composed of several States." But this remarkable genesis of town, county, State and nation is wholly imaginary, resting on no basis of fact. In any consideration of this subject an essential fact to be remembered is that both the Plymouth and Massachusetts Colonies were settled under charters, which incorporated the grantees and empowered them "to make, ordain and establish all manner of orders and laws for and concerning the government of the colonies and plantations which should be necessary and not contrary to the laws of England." So that in both colonies, before the organization of any towns, a government in fact, though not in name—equivalent to the State government—existed, with ample powers of legislation and administration in all matters, both civil and criminal. And the right to establish towns and the title to all lands within the territorial limits of the colony were to be derived from and through the colonial government. It is therefore manifest that so far from its being true that the State, by some imaginary process of evolution, is derived from the town, towns are in every instance dependent on the State government for their very existence. And the origin, organization and functions of towns can be shown in no better way than by the following statement which has been condensed from judicial decisions and legislative acts: *The towns of Massachusetts have been established by the Legislature for public purposes and the administration of local affairs, and they embrace all persons living within their territorial limits. At the first settlement of the colony, towns consisted of clusters of inhabitants dwelling near each other, and by means of legislative acts designating them by name, and conferring upon them powers of managing their own prudential affairs, electing representatives and town officers, making by-laws and disposing—subject to the paramount control of the Legislature—of unoccupied land within their territory; they became, in effect, municipal or quasi corporations, without any formal act of incorporation. Indeed, it is not known that any formal act, similar to modern acts of incorporation of towns, was passed until near the close of the colonial government and the establishment of a new government under the Province charter. And not until after the adoption of the Constitution of this Commonwealth was it for the first time expressly enacted that "the inhabitants of every town within the government were declared to be a body politic and corporate."*

In some cases the General Court granted land to proprietors, who maintained an organization separate from that of the town, having the same territorial limits, and divided the land among the settlers who participated in the grant, or sold them to others for the common profit of all the original grantees. The records of the proprietors were kept in books commonly called "proprietors' books," many of which are still in existence, and are often referred to for evidence in controversies in the courts respecting land-titles.

<sup>1</sup> Vol. v, Freeman's "Norman Conquest."

In other cases of the settlement of towns, there was no grant of land to a separate body of proprietors, but the town itself became the owner of all the land within its assigned limits. Sometimes the land granted was called a district or outlying portion of an existing town; again, in other cases, the grant was called a plantation, which in process of time became a town as population and wealth increased.

Grants were sometimes made to a considerable number of settlers, who were afterwards recognized as a plantation, settlement or town by a proper name, vested by general laws with certain powers, and had their bounds declared; or at a much later period, grants of a tract of land were made to a company of individuals named, with a view of constituting a town afterwards. In either case, their rights and powers, both of soil and jurisdiction, were derived from the existing government. And in all cases, and from the earliest period, the Legislature of the colony exercised the unquestioned authority of deciding what rights should be possessed by towns and what public duties they should perform.

The town of Groton, which dates its origin back to 1665, furnishes a good illustration of the manner in which many towns came into existence. A number of individuals who seemed to be in want of "fresh woods and pastures new," petitioned the General Court for a grant of land, and the answer to them was, "The Court judgeth it meet to grant the petitioners eight miles square in the place desired to make a comfortable plantation, which henceforth shall be called Groton." A certain number of persons named in the act were at the same time appointed by the court to act as selectmen for two years, at the end of which time other selectmen were chosen by the inhabitants of the town. It appears from the earliest records of the Massachusetts Colony that, before the arrival of Winthrop and a majority of the assistants with the charter of 1630, a great number of private grants of land had been made by Governor Endicott and his special council, and as these grantees would naturally desire to take their grants in proximity to each other for mutual defence, convenience and comfort, they formed themselves into settlements or villages; and the first step towards forming these settlements into corporations was to give them a name. But as they had no fixed limits or boundaries, and it became necessary to fix such limits, in order to ascertain what proprietors should be rated in any assessment, and who should be subject to the duties and entitled to the immunities of each village or settlement, these settlements, first named and then bounded, must have assessors to apportion and collect their taxes. They were also, by general acts of the Legislature, vested with authority to choose other necessary officers and to manage their own prudential affairs and thus they grew to be "*quasi* corporations;" and afterwards, either with or without formal acts of incorporation, these settlements

or villages became towns. It is true that many of the powers now possessed by towns in this State are the product of comparatively recent legislative grants; but in all its essential features as a corporation vested with the right of local self-government, the town has undergone no material change from the first settlement of the colony to the present time. These towns, as has been said, grew out of the wants, the dangers and necessities pressing upon the early settlers of the Pilgrim and Puritan Colonies, and they were from time to time clothed with such powers and privileges, as were best adapted to meet those wants and ward off those dangers. And as advancing civilization has created new local wants, the Legislature has granted corresponding municipal powers and privileges to provide for them.

The Pilgrim and the Puritan came to these shores for certain definite purposes—purposes which could never have been accomplished except through and by means of just such institutions as they founded. They were not living among the ruins of ancient empires, nor were they surrounded by hostile feudal barons, by whom they might at any unguarded moment be plundered. They were confronted only by the unbroken forest and the untamed savage, and they built their houses, organized their towns, adopted means of self-defense and common safety against the actual dangers by which they were surrounded; they cultivated their fields either in common or severally as they chose; they erected churches and school-houses, enacted laws and provided for the administration of justice, and in all things else acted with reference to the exact situation in which they found themselves. They built according to no archaic or mediæval patterns, but established institutions as original in their character, as their own situation was novel.

§ 2. Having presented these general considerations respecting the origin and organizations of towns, the remaining portion of this chapter will be occupied with the narration of some of the principal facts relating to the settlement of Worcester and an outline of its history for the first century of its existence.

May 6, 1657, a grant of three thousand two hundred acres of land was made to Mr. Increase Nowell, of Charlestown. May 6, 1662, one thousand acres were conveyed to the church in Malden, to be forever appropriated to the use of the ministry. October 19, 1664, two hundred and fifty acres were given to Ensign Thomas Noyes, of Sudbury, who had served under Capt. Hugh Mason in the military service of the Colony. The above statement of a grant of land to Mr. Nowell, and which will be found in existing sketches of the "History of Worcester," is not entirely accurate, as will appear from the following entry in the Colony Records under date of October 14, 1656: "The court, being sensible of the true condition of the late honored Mr. Nowell's family, and remembering his long service to this Commonwealth in the place not only of a magistrate, but also secre-

tary, for which he had but little and slender recompense, and the county's debts being such as out of the country rate they cannot comfortably make such an honorable recompense to his family as otherwise they would judge meet, therefore do give and grant to Mrs. Nowell and his son Samuel two thousand acres of land, to be laid out by Mr. Thomas Danforth and Robert Hale." Under date of May 6, 1657, there is this additional entry:

"Mr. Thomas Danforth, of Cambridge, and Mr. Robert Hale, of Charlestown, are appointed as commissioners to lay out the land, being three thousand two hundred acres of land granted by the General Court, 22d 3d mo., 1650, to the executors of the last will of Mr. Isaac Johnson, to Mr. Increase Nowell's executors, according to the grant, provided the ten pounds due to the county from the executors of the said Mr. Nowell be first paid to the county's treasurer or security given for the same."

These extracts from the record are interesting as showing who Mr. Nowell was and why lands were granted, not to him, but to his family; and also as showing the extreme poverty of the country in everything but land, and that this grant of land was only made upon the express provision that the last pound of the indebtedness of Mr. Nowell's estate to the Colony should be paid into the public treasury.<sup>1</sup>

The grant of 1,000 acres to the church in Malden was made upon the petition of that church, and was made to be forever appropriated to the use and benefit of the ministry of the place, and not to be aliened or otherwise disposed of, "and all this on condition that they cause it to be bounded out and put on improvement for the ends professed within three years next ensuing." The grant of the land to Ensign Noyes was accompanied with this recital: "Whereas, Ensign Thomas Noyes, of Sudbury, was chosen to be a lieutenant under Capt. Hugh Mason, for his Majesty's service, and he having expended some time and money about that design, there being a considerable sum due him upon that account, the court judgeth it meet to grant the said Lieut. Noyes two hundred and fifty acres of land, for and in consideration of the premises, and in answer to a former petition, he being willing to take it as full consideration for what is justly due to him." As these were the first grants of land within the present limits of Worcester, it has been deemed proper to show upon what considerations and conditions they were made.

John and Josiah Haynes, of Sudbury, Nathaniel Treadaway, of Watertown, and Thomas Noyes having purchased the Nowell grant, they became proprietors of a large tract of land, extending along the west shore of Quinsigamond, including two of its islands near the "outgoing of Nipnapp" (now Blackstone) "River;" they petitioned the Great and General Court for the appointment of a committee to view the

country. Upon this petition Capt. Daniel Gookin, Capt. Edward Johnson, Lieut. Joshua Fisher and Lieut. Thomas Noyes were appointed a committee, Oct. 11, 1665, to make survey to determine if there be a "meet place for a plantation, that it may be improved for that end, and not spoiled by granting of farms," and directed to report to the next Court of Elections. The death of Lieut. Noyes and the unsettled state of the country prevented the execution of the order to this committee.

The attention of the Legislature was again called to the subject of effecting a settlement in this locality, and May 15, 1667, Captain Daniel Gookin, Captain Edward Johnson, Mr. Samuel Andrews and Andrew Belcher were appointed a committee and directed "to take an exact view as soon as conveniently they can, to make true report whether the place be capable to make a village, and what number of families, they conceive, may be there accommodated. And if they find it fit for a plantation, then to offer some meet expedient how the same may be settled and improved for the public good." The first two and the last-named members of that committee performed the duty assigned them and made their report to the Legislature October 20, 1668, which is a document of sufficient importance and interest to be copied in full in this place. The committee in their report say: "We have, according to the Court's order, bearing date 15th May, 1667, viewed the place therein mentioned, and find it to be about twelve miles westward from Marlborough, near the road to Springfield, and that it contains a tract of very good chestnut tree land—a large quantity; but the meadow we find not so much, because a very considerable quantity of meadow and upland, about five thousand acres, is laid out unto particular persons, and confirmed by this Court, as we are informed, which falls within this tract of land; viz., to Ensign Noyes, deceased and his brethren three thousand two hundred acres; unto the Church of Malden one thousand acres; unto others, five hundred acres, bought of Ensign Noyes; but all this, notwithstanding, we conceive, there may be enough meadow for a small plantation or town of about thirty families; and if those farms be annexed to it, it may supply about sixty families

"Therefore, we conceive it expedient that the honored Court will be pleased to reserve it for a town, being conveniently situated, and well watered with ponds and brooks, and lying near midway between Boston and Springfield, about one day's journey from either; and for the settling thereof we do offer unto the court that which follows: viz., That there be a meet proportion of land granted and laid out for a town, in the best form the place will bear about the contents of eight miles square. That a prudent and able committee be appointed and empowered to lay it out; to admit inhabitants, and order the affairs of the place, in forming the town,

<sup>1</sup> Colony Records, vol. 4, pp. 7, 8, 295.

granting lots, and directing and ordering all matters of a prudential nature, until the place be settled with a sufficient number of inhabitants and persons of discretion, able to order the affairs thereof, in the judgment of the Court.

"That due care be taken by said committee that a good minister of God's word be placed there as soon as may be; that such people as may be there planted may not live like lambs in a *large* place; that there be two or three hundred acres of land, with a proportion of meadow, in some convenient place, at the discretion of the committee, reserved and laid out for the commonwealth; and the committee to have power and liberty to settle inhabitants thereupon for lives or times, upon a small rent to be paid after the first seven years."

This report was accepted by the Legislature and its recommendations adopted, and Captain Daniel Gookin, Captain Thomas Prentice, Mr. Daniel Hinchman and Lieutenant Richard Beers were appointed a committee to carry them into execution.

The suggestion in this report that the eight miles square of territory, on which a thriving population of from 80,000 to 100,000 inhabitants now dwell, in the enjoyment of all the necessities and many of the luxuries and elegancies of civilized life, might possibly support thirty or sixty families,—that is, from 150, to 300 persons,—was made without any anticipation or thought of that magnificent development of mechanical and manufacturing industries so characteristic of the present age.

The committee, in making their report, were only thinking of the capability of the territory for agricultural purposes. And when we contrast the toilsome journey of a whole day between Worcester and Boston with the fact that that journey can now be made in little more than an hour, and with a degree of comfort which our ancestors in their forest homes never dreamed of, we gain some just conception of the great changes in the conditions of human life that have been wrought here during the lapse of two centuries.

Notwithstanding the Legislature had, by its order of May 15, 1667, prohibited the laying out of lands within the new plantation, yet the committee, in the execution of their powers, were embarrassed by the selection of lots made by claimants under the earlier grants hereinbefore mentioned. And to relieve themselves from these difficulties they asked for the intervention of the Legislature in the following petition, May 27, 1669:

We, the committee of the General Court, being empowered to lay out, settle and manage a plantation, at or about Quinsigamond Pond, twelve miles beyond Marlborough, in the roadway to Springfield and Hadley, which place is very commodious for the situation of a town, the better to unite and strengthen the inland plantations, and in all probability will be advantageous for travelers, it falling near midway between Boston and Springfield, and about a day's journey from either; we having lately been upon the place to make an exact discovery and survey thereof, accompanied with sundry, honest and able persons that are willing forthwith to settle themselves there; but finding

some obstruction in the work, which, unless this Court please to remove, and, we conceive, they may justly do it, the proceeding will be utterly hindered; and, therefore, we shall humbly offer them unto the honored Court, desiring their help.

1. We find that, though the place contains a tract of good land, yet it is much straitened for meadow. We cannot find above three hundred acres of meadow belonging to it within several miles; but there are swamps and other moist lands that, in time, with labor and industry may make meadow.

2. We find there is a grant of one thousand acres to the ministry of Malden, May 7, 1662, which grant is laid out in this place. This farm contains a choice tract of land, and swallows up about one hundred acres of the aforesaid meadow; but the condition of the grant, as the record will declare, is that it be improved, within three years after the grant, for the end wherefore it was granted; but that being not done, for it is now about six years since, and no improvement made, we apprehend the grant is void; but yet, if the Court pleases to renew it in any other place, we speak not to oppose it, but if it be continued and confirmed in this place, it will utterly hinder the settling a plantation here.

3. There is another grant of land, unto Ensign Noyes, deceased, laid out in this place, containing two hundred and fifty acres of choice land, with a considerable quantity of meadow, lying in the heart of this place, and by him was sold to one Ephraim Carter, a young man living in Sudbury. We desire that the Court will please to make void this grant; being not laid out regularly for quantity or quality, as we conceive, and it will very much prejudice this town. The person concerned may have his land in another place, bordering upon this town, where there is sufficient to accommodate it, and also may have a lot in this town, if he desire it.

4. *Whereas*, the Court, in their grant of this town, hath reserved two or three hundred acres of land, with a proportion of meadow, to be laid out for the Commonwealth, if it please the Court, because of the straitness for meadow, to abate that reservation, so far as concerns meadow, it will greatly encourage the work. If the honored Court please to remove these obstructions, we hope it will not be long before this place be settled in a good way, for the honor of God and the public good.

The Committee, in their journey, having discovered two other places beyond this to the westward, that will make two or three towns, the one called Pamaquasset, lying upon the head of Chaquabee River, the place called Swquakeag, upon Connecticut River, nearer to Boston than Hadley, we desire the Court will please to order that these places be reserved to make towns, the better to strengthen these inland ports, and the laying out of particular grants prohibited in the said places.

In response to this petition, the reservation to the public in the meadow was released; but the General Court did not undertake to recall or declare void the grants to Malden and to Noyes. At the first meeting of the committee, held July 6, 1669, in Cambridge, it was proposed "that the territory, including Worcester and which is now Holden, and a large part of Ward (now Auburn), should be first divided into ninety twenty-five-acre house-lots, and in the apportionment of these to the settlers, respect should be had to the quality, estate, usefulness and other considerations of the person and family to whom they were granted; that the most convenient place, nearest the middle of the town, should be set apart and improved for placing the meeting-house for the worship of God; a convenient lot of fifty acres for the first minister should be laid out as near to it as might be; another lot, in the next convenient place, not far from them, for the ministry that should succeed in all future times; that twenty acres should be reserved, near the centre, for a training-field, and to build a school-house upon; that a lot of twenty-five acres should be appropriated for the maintenance of a school

<sup>1</sup> Northfield.

and schoolmaster, to remain for that use forever, and that two hundred and fifty acres should be for the use of the country."

Provision was made for the equal apportionment of common charges upon the proprietors of lots, for erecting mills, opening and repairing ways, and for the equitable division of the remaining lands.

§ 3. The efforts of the committee to effect a permanent settlement proved unavailing for several years, but finally, in the year 1673, a company of thirty families were induced to commence the plantation, and in the spring of 1674 thirty house-lots were laid out and the settlers began to build houses and cultivate their lands. But the adverse claims of Mr. Curtis, who, it is believed, had taken possession of a tract of land near the centre of the town, continued to embarrass the committee to such an extent that the following petition for relief was presented to the Legislature by those who proposed to become inhabitants of the new town :

The humble petition of Daniel Gookin, Senior, Thomas Printice, Richard Beers and Daniel Henchman, a committee, appointed and authorized by the General Court to order and manage a new plantation granted by this Court, lying and being on the road to Springfield, about twelve miles westward of Marlborough, together with divers other persons hereunto subscribed, who have lots granted and laid out there, humbly sheweth :

That, whereas, your petitioners have been at very considerable expense, both of time and estate, in order to settle a plantation there, which they conceive, when it is effected, will more conduce to the public good of the country than their particular advantage, and have so far advanced in that work as to lay out about thirty house-lots and engage the people to settle them speedily ; also have begun to build, plant and cut hay there ; but now, meeting with an obstruction and hindrance, by a young man called Ephraim Curtis, of Sudbury, who does lay claim unto two tracts of land, containing about five hundred acres, lying in the centre of this plantation, especially one of the parcels, being about 250 acres, in which place the committee have laid out a minister's lot, a place for a meeting-house, a mill and ten other particular men's house-lots, so that if this place be taken from us, this town is not like to proceed, to the damage of the public and your petitioners ; now, although we cannot grant that the said Curtis hath any legal right to debar our proceeding, yet, for peace sake, we have offered him a double share in the plantation, viz. : two house-lots and accommodations to them, which will, in the end, amount to much more land than he pretends unto ; but all offers he declines :

Therefore, our humble request unto the Court is that you will be pleased to order that the said Curtis may be sent for, and that both him and your Committee may be examined either before some Committee of the Court, thereunto to report the matter, or by the whole Court ; for the substance of the case will, as we conceive, turn upon this hinge ; whether an order of the General Court, dated in May, 1667, prohibiting the laying out any particular grants in this place, in order to reserve it for a village, shall be of force and efficacy to nullify the acceptance of a particular grant laid out in this place, as is pretended, a year after : namely, at a Court held *Anno* 1668 ; the untying of this knot, which none can do but the General Court, will resolve the matter of controversy one way or other ; so that this town will proceed or cease, and that your committee, and others concerned, may not be wrapt up in trouble and contention about this matter, whose scope and aim is the public good, and that the good of many may be preferred before one, wherein we have no cause to doubt of this honored Court's favor and encouragement.

This petition was signed by the aforesaid committee and twenty-nine other persons. Having heard the parties upon this petition, the deputies adjudged, the magistrates consenting, that said Curtis "shall have fifty acres of the land that is already laid out to

him, where he hath built, so it be in one place, with all manner of accommodation appertaining thereto as other inhabitants have." And also that he shall have liberty to take up two hundred and fifty acres of land without the bounds of the town, but near and adjoining thereto.

This closed the controversy between Mr. Curtis and the other settlers, a controversy which ought not and could not have arisen if the Colonial Legislature had exercised more care in making grants of land. The grant which Curtis had acquired by purchase was to Noyes, of two hundred and fifty acres, with the right to locate upon any lands not already granted. This was earlier than the grant of the eight miles square for the Worcester plantation, and yet the latter grant was made without excepting the tract of land which had then been located under the grant to Noyes within the limits of the eight miles square. But it was not an infrequent occurrence in those early times, when land was of comparatively little value, for successive grants to overlap each other, and thus endless confusion in land titles ensued ; and even to this day it is well-nigh impossible to fix with any certainty the exact boundaries of some estates in this county, especially estates which have never been under cultivation or enclosed, and consisting of forest or swamp lands.

§ 4. Having adjusted their controversies with all other claimants and established rules for conducting the affairs of the settlement, the committee proceeded to obtain a release of title from the Indians to the lands embraced within the limits of their grant from the Legislature, and for the sum of twelve pounds in lawful money of New England, or the full value thereof in other specie, the Indians relinquished their title (whatever that was) by a deed, executed by several of their Sagamores with great formality, July 13, 1674. The receipt of part payment, viz., two coats and four yards of trucking cloth, valued at twenty-six shillings, as earnest in hand, was acknowledged. The conveyance was to the committee in fee, and to the rest of the people admitted, or to be admitted, to be inhabitants—a most indefinite designation of the grantees. Another peculiarity about this deed was the fact that the acknowledgment was taken by Gookin, one of the grantees. But in reality it mattered little what was the form of deed executed by these untutored and nomadic savages, for, according to the law as interpreted by the highest courts in this country and in England, the Indians had no fee in the land, but only a right of temporary occupation, and the Crown, only, had the power to extinguish that right. But, nevertheless, as a means of promoting friendly relations with their uncivilized neighbors, it was good policy for the settlers of the town to go through the form of purchasing their lands from them ; yet the worthlessness of the covenant contained in that deed, that the grantees, their heirs and assigns, should forever peacefully enjoy the granted

premises, was made painfully manifest not many months after the giving of the deed, when the Nipmucks and other neighboring tribes joined Philip in his war of attempted extermination of the English settlements throughout the colony. But Gookin and Eliot, who had the amplest means of knowledge on the subject, earnestly asserted that the praying Indians of the Nipmuck and other tribes remained faithful and true to the English.

We have now reached a stage in the history of the settlement of Worcester when, as appears from the foregoing brief narrative, a grant of a territory eight miles square had been made by the Colonial Legislature to a committee, representing in reality the future inhabitants of the place, and that committee had procured from the Indians whatever right or title they might have had in or to the territory. Provision had been made for the public worship of God and popular education; a training-field had been laid out, and a block-house or fort erected for purposes of defence in case of need; public highways had been provided for, and other appropriate measures adopted for establishing a civilized and Christian community.

And in the spring of 1674 as many as thirty house-lots were laid out and houses began to be erected. But "most of those who had expressed an intention to become planters, and who joined in the petition of the Committee in May, 1674, discouraged by difficulties or delay, had abandoned their purpose." Still, notwithstanding this desertion of many who had promised to give aid to the new enterprise, the work of settlement was pushed forward with vigor by those who were willing to encounter the inevitable hardship and dangers connected with the planting civilization in regions inhabited only by wild beasts and nomadic tribes of savage men. In the spring of 1675, and in the early summer of that year, the settlement had so far advanced that, in the language of an annalist of the period, the inhabitants "had built after the manner of a town." This was the hopeful state of affairs when, in midsummer of 1675, King Philip's War broke out in Plymouth Colony, and soon carried devastation and terror into every part of that and the Massachusetts Colony.

The commencement of hostilities in that desolating war, in what is now Worcester County, furnished an illustration of a trait in the Indian character which education and Christianity combined seem powerless to eradicate. Matoonus, a Christianized Indian, had a son who was executed in 1671 for the murder of an Englishman. Matoonus, described as a grave and sober Indian, and who had been specially befriended by Gookin, and appointed by him as one of the police officers of the neighborhood, still cherishing the vindictive spirit so characteristic of his race, visited Mendon, with others of his tribe, July 10, 1675, and there avenged, according to his notion of retributive justice, the death of his son by the murder of five of the unoffending inhabitants of that town.

"This," says Lincoln in his admirable "History of Worcester," "was the signal for the commencement of a desperate contest. Common dangers produced that efficient union of the Northern Colonies, cemented by the necessity of self-preservation. The war was not of long duration. Energetic and rapid excursions laid waste the resources of the hostile tribes; the allies enticed to their support, foreseeing their fate, grew cold towards ancient friendships; their supplies were destroyed; their wigwams were consumed, and Philip and his forces, hunted from post to post, deserted homes, and took refuge among the Nipmuck villages, where they received shelter and reinforcements. Unable to maintain open fight, they continued an unsparing predatory warfare upon the exposed homes and garrisons. Alarm prevailed throughout New England. None knew when to expect the visitation of the foe, lurking unseen in the solitude of the forest, until the blow fell, as sudden as the lightning, and left the effects traced with fire and blood. The husbandmen went forth to cultivate the field, armed as if for battle; the musket and the sword rested by the pillow, whose slumber was often broken, as the war-whoop rose on the watches of the night. The planters of Worcester, placed hard by the seat of the enemy, remote from friendly aid, with no dwelling of civilized man nearer than Marlborough on the east, Lancaster towards the north, and Quabaug (now Brookfield) westward, to afford assistance and support, were compelled to desert their possessions, and dispersed among the larger towns. The silence of desolation succeeded to the cheerful sounds of industry, and the village was abandoned to the wild beast and fiercer foe." And so ended the first act of the heroic struggle to plant a new town on this then perilous frontier.

§ 5. Before proceeding to any account of the second unsuccessful attempt to establish a permanent settlement here, it may be well to call the reader's attention to the absolutely original plan upon which the settlement was to be effected, and how every step in the progress of the enterprise was directed and controlled by the character of the planters and the peculiar circumstances under which they were compelled to act; to the original constitution of the committee; their petition to the colonial government for a grant of territory; the grant and its conditions; to the meetings of the committee and the measures devised by them; to the principles announced by them upon which they proposed to act and to the objects to be attained by the planting of a new town in this unsettled part of the colony; to their early and embarrassing controversies respecting the title to land within the limits of the territory assigned to them and to the constant dangers by which they were menaced from the surrounding tribes of hostile Indians; to their early and careful provision for popular education and to that supreme purpose of theirs, the establishment, in its purity, of the worship of

God; to their sublime faith in the unseen and eternal, which inspired them with a courage adequate for every temporary peril and with an invincible fortitude for every trial and disappointment. It was these peculiar qualities in the character of the founders, combined with their lofty and well-defined purposes and the wholly novel circumstances under which they were called to act, that distinguished the origin and organization of towns during the first decades of the Massachusetts and Plymouth Colonies from those of any other municipalities of any other age or country.

And the writer has set forth in the foregoing pages, in more of detail than may seem necessary, the principles, resolutions and plans adopted by the first settlers of Worcester, for the purpose of showing how broad and deep and abiding were the foundations upon which they proposed to build. For although the first attempt and the second failed, yet the principles and objects of the subsequent and successful founders of the town remained the same as those of their predecessors. In this connection brief notices of the members of the committee, by whom the affairs of the plantation were managed during the first twenty-five or thirty years, may not be deemed inappropriate; especially as every great enterprise, like the founding of a new community, derives its characteristics from those who control it in its origin and early developments. The most distinguished and influential member of that committee was Daniel Gookin, sometimes spoken of in our annals as Captain and at other times as General Gookin, for he was promoted in the military service from the office of captain to that of major-general of the colony. He was also appointed by the General Court in 1656 as superintendent of all the Indians who submitted to the government of the colony. He was the associate and fellow-laborer with John Eliot in the work of civilizing and Christianizing the Indians; he was one of the best and firmest friends the Indians ever found among the colonists, and for more than twenty years preceding his death, in March, 1687, his devotion to the interests of the Worcester settlement was constant and unabated. He was a native of the county of Kent, England, and the son of Daniel Gookin, who became one of the patentees of Virginia, and in 1621 planted a colony at Newport News, in that colony. Major-General Gookin, then a youth of nine or ten years only, accompanied his father in this attempt to plant a colony, and after his father left the colony, as is supposed, young Gookin remained, and subsequently secured large grants of land in different parts of Virginia. In 1642 missionaries were sent from Massachusetts to Virginia to convert the people from the error of their Episcopalian ways. These missionaries were not well received, and the year following their advent the Assembly passed an act forbidding them from preaching or teaching in public or private, and they were finally expelled from the colony; but not

until Captain Gookin, as he was then called, had become one of the converts, and in 1644 he left Virginia and removed with his family to Massachusetts; by which removal Virginia lost and Massachusetts gained one of the noblest of men. A few days after his arrival in Boston he became a member of the First Church; was made a freeman of the colony; resided in successive years in Roxbury, Boston and Cambridge; he was a Representative in the General Court from Cambridge in 1648 and 1651 and Speaker of the House in 1651. In 1652 he was elected an assistant and re-elected thirty-four successive years. He revisited England in 1654, and while there was appointed by Cromwell a commissioner to induce New Englanders to emigrate to the island of Jamaica. On his return to this country he endeavored to promote Cromwell's colonization scheme, but without success, and in 1657 he resigned and asked to be relieved from any further duty under his commission, which request was granted. Gookin was at that time living in Cambridge, and was appointed one of the first two licensers of the printing-press at that place.

Upon the outbreak of King Philip's War the Indians who had been gathered into villages by Gookin and Eliot, and there taught some of the arts of civilized life, became objects of suspicion and dread to the people, notwithstanding Gookin and Eliot's assurances that they would remain faithful to their vows of friendship for the English. And so great did the excitement become among the people that Gookin, for the safety of his wards—the praying Indians—removed three thousand of them to Deer Island and provided for them there and in Cambridge until the close of the war, when they were sent back to their villages. By these acts of fidelity to the Indians Gookin became excessively unpopular, for a time, with the colonists, and his life was repeatedly threatened, but he continued the undaunted friend of the Indians, and never lost faith in their loyalty. Many of these Indians enlisted in the war against Philip, in many memorable instances rendering signal services as soldiers and spies. In 1674 Gookin published "Historical Collection of the Indians in New England; of the Several Nations, Customs and Manners, Religions and Government before the English planted there." He also wrote an account of the doings and sufferings of the Christian Indians in New England in 1675, '76 and '77. His manuscript "History of New England," in eight volumes, was lost. In 1657 the General Court granted to him five hundred acres of land for services in behalf of the colony. His services to the colony were constant and of the highest value, both in the civil and military line of public duty. General Gookin descended from an ancient and honorable family in England, and his descendants in New England became distinguished in various departments of public service, and by intermarriage they became connected with several of the leading families of the colony. Captain Daniel Henchman,

another member of the committee, and second to General Gookin only in the value of his services to the early settlers of Worcester, made his first appearance in the colony as a teacher of a grammar school in Boston in 1666.

He was admitted freeman in 1672, a member of the Ancient and Honorable Artillery Company in 1674, and appointed captain of Fifth Boston Company of Colonial Militia. In May, 1675, he was sent with his company of one hundred men to the assistance of Plymouth Colony against the Indians. In July of the same year, the day after the attack by the Indians on the whites at Swansea, he again marched with his company and was present and took part in the attack upon Philip and his men at Pocasset Swamp, when the conflict only ended with the darkness, which rendered its further continuance impossible. All the other troops having been withdrawn, Captain HENCHMAN was left with his men to watch the movements of the wily Philip, whom, having made his escape, HENCHMAN, with only a few of his men, pursued as far as Mendon and Brookfield, in this county. He continued in active military service during that fearful and final struggle of the ruthless savage to regain possession of New England. He was regarded as one of the bravest and most skillful Indian fighters. Captain HENCHMAN was a cousin of Judge Samuel Sewall, and allied by family ties to the Hulls, Gookins, Quineys and Eliots.

At the close of Philip's War Captain HENCHMAN again became active as a member of the committee having charge of the "Plantation at Quinsigamond." He erected a house here in 1683, which was the home of his family till his death, in 1685. Before his death, although he had shown himself for years as a staunch friend of the plantation, he had become very unpopular, in consequence of his action respecting a controversy between Captain Wing, a favorite of the people, and Mr. Danson, about the title to a small tract of land, which both of the contestants claimed; and although, as it subsequently appeared upon full inquiry, Capt. HENCHMAN was entirely right in his view of the case. But this vindication of his conduct was not until after his death and burial, the latter of which was attended by the immediate members of his family, two servants (one white and one black), and one or two other friends, presenting a striking illustration of the fickleness of popular favor and of the gross injustice that may be committed by what is sometimes called public opinion.

Captain Richard Beeres, an original proprietor of Watertown—admitted freeman March, 1637—was selectman more than thirty years, and represented his town many years in the General Court. He was also actively employed in the military service of the Colony. In 1675 he marched with his company to the relief of Brookfield, thence to Hadley, thence to Hatfield and Deerfield; in the months of August and September was present in several engagements with

the Indians, in which he exhibited the qualities of a brave and skillful leader. September 3, 1675, he started with only thirty-six men to bring off the men from the garrison at Northfield. The next day, while pushing on towards the fort with a part of his men, they fell into an ambuscade, and were driven back by the deadly fire of the Indians to a place called Beeres' Hill, and there the conflict was continued until the brave leader and most of his men were slain.

Captain Thomas Prentice, born in England 1620, came to this country 1649 and settled at first in Cambridge. He was a farmer. He became a member of the church in Cambridge and freeman in 1653. He was elected lieutenant of a company of troopers in 1656. In 1662 was captain, and represented Cambridge in the General Court in 1672, '73 and '74; was chairman of the Board of Selectmen of New Cambridge many years. He was an extensive landowner in Massachusetts, Connecticut and New York. He was noted for his courage, self-possession and keen sense of justice. He was a terror to the Indians in war and a firm and judicious friend of theirs in times of peace. He was ever ready to answer the call of the country and served with marked distinction during the war with King Philip. He commanded the troops sent to escort Sir Edmund Andros, who had escaped to Rhode Island, back to Boston. Upon the death of General Gookin, Captain Prentice was appointed superintendent of the Christian Indians as his successor upon the petition of the Indians. He was in command of the troops that escorted them to Deer Island by order of General Gookin in 1675. His death, at the age of eighty-nine, was caused by a fall from his horse, July 7, 1709.

Adam Winthrop, grandson of John Winthrop, born 1647 and graduated at Harvard in 1668; was made freeman in 1683; was one of the commissioners for the town of Boston 1684, 1685 and 1690; selectman, 1688-89; Representative in the General Court, 1689, 1691 and 1692. He was appointed a member of the Governor's Council under the provincial charter, but failed to be elected by the people in the following year (1693). At his death, in 1700, he left one son, graduate of Harvard 1694, and one daughter,

Captain John Wing, of Boston, acquired his title, it is believed, by his service as a mariner; was appointed constable in Boston in 1671-72. In 1676 was chosen to "look after too much drinking in private houses." This was probably done more to secure the excise duties on liquors than for the purpose of promoting moderate drinking. He was for many years the popular landlord of the Castle Tavern, which stood on the corner of Elm Street and Dock Square. He was elected a member of the Ancient and Honorable Artillery in 1694. He became interested in the plantation near "Quinsigamond Pond," and undertook, as early as 1684, to supply the town

with a grist-mill and saw-mill, two indispensable things for a new frontier town. In October, 1684, he was made a member of the committee for the plantation. He gave much of his time for the next six years after his appointment to the business of the committee. He was the first town clerk elected by the inhabitants. He died in Boston, February 22, 1703.

Captain William Bond, of Watertown, son of Thomas Bond, of Bury St. Edmund's, Suffolk County, England, was a man of large and varied capacity for affairs, and filled many public offices, the duties of which he never failed to perform acceptably. He was successively selectman, town clerk, justice of the peace (not an unimportant office in his day), member of the Council of Safety, Representative and first speaker of the General Court, under the Provincial charter; and he was one of the committee for rebuilding the town of Lancaster, after its destruction by the Indians.

Captain Joseph Lynd, of Charlestown, was a wealthy merchant and large land-owner, Representative in the General Court, member of the Committee of Safety in 1689, and one of the Council under the new charter.

Penn Townsend, born in Boston, 1651, made freeman in 1674, and the same year was elected member of the Ancient and Honorable Artillery Company. He was promoted in the military line until he reached the rank of colonel. In civil life he was, in succession, selectman, Representative, commissioner and judge.

Captain Ephraim Hunt, of Weymouth, was of English origin. He accompanied the expedition to Canada in 1690. This was the expedition devised by the congress of the Colonies which met in New York in May, 1690. The conquest of Canada was to be attempted by marching a land force by way of Lake Champlain against Montreal, while Massachusetts should, with a fleet, attack Quebec. It was the latter that Captain Hunt accompanied. He afterwards served as colonel on an expedition against the Indians at Groton, in 1706-7. He was a Representative and Councilor.

Deacon John Haynes, at one time a member of the committee, resided in Sudbury, and was a Representative of that town in the General Court, and was a person to whom his neighbors frequently resorted for the adjustment of their controversies. Such is a brief record of the men who were conspicuous actors in the settlement of Worcester; and any community may deem itself fortunate, which can find names of such men upon the roll of its founders.<sup>1</sup>

§ 6. The war, which had desolated many parts of New England, ended with the death of Philip, its chief instigator; and upon the return of peace the committee renewed their efforts for a permanent settlement

of the town, for which they had so long and earnestly labored.

One of their first acts in this new attempt was to acquire any right Pannasumet, a Sagamore, who did not sign the first deed from the Indians, might have had in the territory upon which the town was to be built. This second deed, bearing date of December, 1677, was executed by the widow of Pannasumet and his heirs. It contains covenants that the grantors had "good and just title, and *natural* right and interest in the territory, and that they would warrant its enjoyment" by the grantees. The committee, in 1678, directed the planters to return before the year 1680; but this direction was disregarded—no one of all the former settlers returned.

At a meeting in Cambridge March 3, 1678, attended by Gookin, Henchman and Prentice of the committee and by sixteen other persons, it was agreed "that, God willing, they intend, if God spare life and peace continue, to endeavor, either in person or by other persons and means, to settle said plantation sometime next summer." They proposed to build a town according to a model furnished by "Major Gookin and Major Henchman."

The objects sought to be attained by this new endeavor show how firmly the planters adhered to their original purposes. They were, "1st, security from their enemies; 2d, for the better *convenience* of attending God's worship; 3d, for the better education of their children in society; 4th, for the better accommodation of trades people; 5th, for better helps to civility; 6th, for more convenient help in case of sickness, fire or calamity."

But these good resolutions were not then carried into execution; and no effectual measures had been adopted for a re-settlement when, in October, 1682, the General Court gave notice to the committee, that the grant to them would be considered forfeited unless some decisive measures were soon taken to form a plantation.

This led to renewed efforts on the part of the committee, and such arrangements were made as induced a small number (not exceeding five or seven) of the former settlers to return; and they, with other new associates, undertook to rebuild, on foundations that had once been laid and abandoned, a citadel as a refuge for all in times of alarm and danger. "Care was to be taken to provide a minister with all convenient speed, and a school master in due season." Until a minister could be provided, the people were to assemble on the Sabbath and conduct religious services as well as they could. The land was divided into lots of ten and twenty-five acres. The north part of the territory, called at one time North Worcester, but is now the town of Holden, was divided into two hundred lots.

On the 10th of September, 1684, according to Lincoln, the General Court passed an act, at the request of Gookin, Prentice and Henchman, that their planta-

<sup>1</sup> Many of the facts contained in these notices are derived from the historical notes published with the doings of the two hundred and fiftieth anniversary of the naming of Worcester.

tion at Quinsigamond should be called Worcester. Honorable George F. Hoar, in his instructive and eloquent address on the occasion of the celebration of the two hundredth anniversary of the naming of Worcester, says this act of the General Court granting the request of Gookin and his associates, was passed October 15, 1684. Captain HENCHMAN, one of the most active and efficient members of the Committee, died in 1685 or '86—both dates are given by different writers. At that time the public affairs of the Colony were conducted by a President and Council appointed by the Crown, after the Crown had most unjustly procured the abrogation of the Colony charter.

Upon application to that President and Council—for there was then no other competent authority to appeal to by the proprietors of Worcester—General Gookin and Captain Prentice, of the old committee, were reappointed, and Mr. William Bond, of Watertown, Captain Joseph Lynde and Deacon John Haynes, of Sudbury, were appointed new members. This committee was entrusted with the general powers to order and regulate all matters relating to the settlement. From this date, 1686, till 1713 authentic information respecting the transactions and progress of the new settlement is meagre and fragmentary. The Proprietors' Book of Records contains no entries of transactions during that interval of twenty-seven years. It is known that appointments were made to fill vacancies in the committee as late as 1691, from which it is safe to infer that the number of settlers was too small, or that other reasons existed to render them unable to manage their own community affairs. It is also known that at this time an unfortunate controversy arose between Captain Wing, a man of great popularity among the planters, and Mr. Dawson, a Quaker and resident in Boston, respecting the title to a tract of land. This controversy, although a private one, seriously disturbed the harmony of the little settlement and retarded its growth.

Another cause which still further disturbed the peace and harmony of the settlement was the building, or attempting to build, a second citadel in the southerly part of the plantation, the first being in the northerly part; this was in 1692.

In consequence of the dissensions growing out of these causes, some of the planters were induced to remove to other and older towns in the colony, and some into the adjoining colony of Connecticut. In 1699 still another event occurred which depressed the fortunes of the struggling settlement. Application had been made to the Governor and Council for aid, but instead of granting the desired assistance, the General Court, on March 20, 1699, passed an act striking Worcester from the list of frontier towns, and left it to its own resources, without much hope of further aid from the government. After this the plantation ceased to flourish, and finally there was only one family remaining on the whole territory of eight miles square,

and that was the family of the brave Digby Serjent, who at last, while heroically defending his lonely dwelling on Sagatobscot Hill, fell a victim to the ferocity of his savage foes, and his wife and five children were carried off into captivity. The wife and mother, however, being unable to endure the hardships of a hurried journey through the trackless forests, was slain by her captors, and the children alone held captive, from which some of them never returned, and, it is said, two of them having become enamored of the wild freedom of savage life, did not desire to return to the pleasures and restraints of civilized society. This final avenging blow fell upon the new settlement, according to differing accounts, in 1702, '03 or '04. And from that time silence and desolation reigned over the "Plantation at Quinsigamond," until the last attempt to give permanency to this plantation was made in 1713.

§7. In the year 1709 Joseph Sawyer and fifteen other persons presented a petition "To his Excellency Joseph Dudley, Esq., Capt. General and Governor in Chief in and over his Majesty's Province of the Massachusetts Bay in New England, and to the Honourable the Council and Representatives in General Court assembled," etc., saying they were willing to undertake the settlement of Worcester, if they could have a firm foundation of settlement laid and a fort built and needful protection. Upon this petition the Council ordered that Elisha Hutchinson, Samuel Sewall and Nathaniel Paine should be a committee to consider the expediency of granting the request and the course to be adopted. But the House of Deputies refused to concur, as the disturbed condition of the times rendered the enterprise too dangerous to be sustained by legislative approbation.

The dangers here adverted to were not those alone which the colonists had reason to apprehend from their Indian neighbors. During the thirty years from 1683 to 1713, many events, with which the Indians had no connection, occurred to disturb the public tranquillity and to hinder the peaceful settlement of country and seriously to retard its growth; such as the unjust, if not absolutely illegal, abrogation of the colony charter in the reign of Charles II.; the subsequent establishment of a new and arbitrary government here under Andros. The commission of James II. to Andros contained a suggestion that the King claimed title to all "lands, tenements and hereditaments" in the colony, and that they were to be granted to such persons and upon such conditions as the monarch might see fit to select and impose. And the charter having been annulled, the people were told that "their land was the King's, that the grants from the General Court had not been made under the seal of the colony," and were therefore worthless, and that all who would perfect their titles must take out new patents upon such terms as the King in his pleasure might be disposed to grant. This alone was sufficient to check, for a time, all attempts to estab-

lish new settlements. But, fortunately for the cause of human liberty and good government, the infatuated James was soon driven from the throne, and the tyrannical rule of his minion, Andros, over the colony was speedily brought to an end. But the unsettled state of public affairs during and following the Revolution of 1788, the struggle on the part of the colonists to regain their ancient charter, of which they had been most unjustly deprived, and the change from that to the less liberal provincial charter, produced a condition of things in the colony wholly unfavorable to the building up of new towns. And during the first years of the eighteenth century Massachusetts, with the other New England colonies, was almost continually exposed to the hostile incursions of the French from Canada and their Indian allies, and was only relieved from that menace at the close of the war between England and France, which was terminated by the treaty of Utrecht, April 11, 1713. It will be remembered that as long as Canada remained under the dominion of France, the colonies of necessity became involved in any general war between that country and England.

Six months after the last-named date, that is, on October 13, 1713, Colonel Adam Winthrop, Gershom Rice and Jonas Rice, of Marlborough, presented a petition to the General Court, on behalf of themselves and others, setting forth that they desired to enter upon a new settlement of the place from which they had been driven by the war. Their petition was received with favor, and Hon. William Taylor, Colonel Adam Winthrop, Hon. William Dudley, Lieutenant-Colonel John Ballantine and Captain Thomas Howe were appointed a committee "to direct in ordering the prudentials of the plantation till they come to a full settlement."

This committee made their first report June 14, 1714. They had allowed thirty-one rights of former inhabitants, and twenty-eight new settlers were allowed to take lands upon the payment of twelve pence per acre for their planting or building-lots only, and upon the further condition that they would build and dwell "on each right, whether acquired by purchase, grant or representation." Provision was made for the support of the ministry and schools. The report was accepted and approved by the proper authorities. The first of the former planters to return and begin the re-settlement was Jonas Rice; and the permanent settlement of Worcester takes its date from the day of his return, October 21, 1713. He, like the unfortunate Serjent, built on Sagatobscot Hill, and with his family he remained for eighteen months sole inhabitant of the place, till he was joined by his brother Gershom, in the spring of 1715. The daring and fortitude of the pioneer builders of these pleasant and now peaceful towns cannot be too much admired or too highly honored. Twice had the attempt been made to settle Worcester, and twice had the infant settlement been left in ruins

and every inhabitant driven from his possessions by a savage foe, as unreasoning as he was vindictive and relentless.

And now the third attempt is to be made in the midst of lurking dangers and well-known hardships, which would have daunted a less sturdy and heroic race of men. They made provision for guarding against the dangers by which they were surrounded by building garrison-houses and fortresses, and even their own dwellings were built for defence as well as for shelter. Mills were early constructed for the manufacture of lumber and the grinding of grain, roads were built, and soon a tavern—that species of a temporary home so much admired by Dr. Johnson and Shenstone—was opened by a Mr. Rice on the site of the present Walker building.

A building was erected on Green Street in which the people assembled for worship from Sabbath to Sabbath, until a meeting-house was erected in 1719, on the site recently occupied by the "Old South."

From evidence furnished by the proprietary records, and derived from other sources, it is probable that the inhabitants of Worcester had increased to two hundred in 1718-19. About that time a company of Scotch immigrants attempted to settle in Worcester; they were a portion of a larger emigration from the north of Ireland, where they had formed a plantation in the time of James I. They were Presbyterians, and although under William they were permitted to retain their form of worship, yet they were required to aid in the support of the Established Church. They, therefore, like the Pilgrim Fathers, not being satisfied with the new home, for which they had left their native country, again embarked for a country where they supposed they would be allowed to enjoy both religious and civil liberty. But they soon learned that the spirit of intolerance had crossed the ocean with those who came to these shores to escape the intolerance to which they were subjected in the land from which they came.

These "frugal, industrious and peaceful" people formed a religious society here, and began to erect a meeting-house in which to "worship God according to the dictates of their consciences," following the Presbyterian formularies. But while the building was in process of construction, a mob of citizens assembled at night and completely demolished the structure. These people were otherwise persecuted and annoyed to such an extent that many of them left the town and settled in the town of Pelham, in Hampshire County. And thus Worcester, by intolerance and bigotry, drove from her borders many who would have been among the most valuable of her early inhabitants. But this unjust treatment of Presbyterian emigrants was not peculiar to Worcester. Wherever they settled they were subject to outrage and persecution. It is said that this was, in part, at least, due to the fact that these people came from Ireland, and were represented as Irish, who, at that

time, were "generally, but undeservedly, obnoxious" to the English colonists.

This prejudice against both Irish and Presbyterians admits of a ready explanation, if this were the time and place for it, but it cannot be justified.

All of these emigrants from Scotland through Ireland did not leave Worcester, but some of them became permanently settled here, and their names are still borne by their descendants, who are among the more honored and respected citizens of Worcester of the present generation.

The population of the place had become so great by the year 1721 as to have outgrown the government and management of its affairs by a committee, and the freeholders and proprietors, therefore, petitioned the General Court for an act of incorporation.

And on the 14th of June, 1722, the following resolve was passed:

*Resolved*, That the inhabitants of Worcester be vested with the powers and privileges of other towns within this Province, and that it be earnestly recommended to that Council only of the seven churches which did meet at Worcester in September, 1721, to whom the contending parties submitted their differences relating to the Rev. Mr. Andrew Gardner, that the said Council proceed and go to Worcester on or before the first Wednesday in September next, to finish what is further necessary to be done for the procuring and establishing of peace in said town, according to the submission of the parties; and that the Freeholders and inhabitants of Worcester be assembled on the last Wednesday in September next, at ten o'clock in the forenoon, to choose all town officers as by law accustomed for towns to do at their annual meeting in March; and that, at the opening of the meeting, they first proceed to the choice of a moderator by written votes.

This is commonly cited as the charter or act incorporating Worcester as a town. It is in form a resolve, and not an act, and confers only such powers and privileges as were possessed by other towns in the province. And it was long after the date of this resolve—in fact, not until after the adoption of the State Constitution, in 1780, that the first act was passed (St. 1785 ch. 75) declaring towns within this government to be bodies politic and corporate. No town was formally incorporated in the colony, province or State until the passage of that act; but by that act all towns that had been previously erected by resolve or otherwise were made bodies corporate. It is true that "the earlier statutes of the colony and province concur with those under the present constitution investing towns with the power to agree upon and make rules, orders and by-laws for managing and ordering the prudential affairs of the town."<sup>1</sup> But they were not thereby made municipal corporations, as that term is now understood.

The same learned judge (Chief Justice Shaw), from whose opinion in the case cited the above quotation is made, says, in another part of the same opinion, that "townships were originally local divisions of the territory, made with a view to a settlement and disposition of the property in the soil.

But the proprietors or inhabitants of such territorial divisions were not at first invested with political or municipal rights and powers." It was in this way that Worcester originated, and it was nearly or quite fifty years after the first settlement before the plantation passed from the control of a committee, and the inhabitants and proprietors began to exercise municipal powers and rights in the choice of their own officers and the management of their own affairs.

The first town-meeting called under the foregoing resolve was held September 28, 1722. The necessary town officers were chosen, who entered at once upon the discharge of their duties; and Worcester then, released from its fifty years of pupilage and discipline, asserted its individuality as a corporate power, and has since performed no inconspicuous part in the history of the Commonwealth and nation in times both of peace and war.

§ 8. Having now briefly sketched the various stages through which Worcester passed, from the first heroic struggles of its founders till it assumed its equal place among the other organized communities of the Province, the main purpose of this chapter has been accomplished.

And as the writing of its military, ecclesiastical, educational and industrial history, during the sixty years that intervened between 1722 and the close of the Revolutionary War, has been assigned to other hands, a few only of the more strictly municipal events of that period will be touched upon in the remaining pages of this chapter. Although the town had become firmly established, and was no longer menaced by hostile tribes of Indians in its immediate vicinity, yet for many years its growth and prosperity were retarded by the actual or apprehended hostility of what was called the Eastern Indians, then inhabiting portions of what is now the State of Maine and the adjoining Provinces of Canada and Nova Scotia. This state of insecurity made it necessary that considerable numbers of the able-bodied men of the town should be employed to guard the outposts and to give warning of approaching danger. And it may with historic truth be affirmed, that the inhabitants of Worcester and other frontier towns were never permitted to dwell in safety and free from the apprehension of hostile invasion from the French or Indians, or both together, until after the crowning victory of Wolfe at Quebec and the treaty of 1763, by which France lost her North American possessions forever, and the Indians, left without civilized allies, became less formidable and obstructive to the planters of frontier settlements.

In 1731 an event occurred which produced a beneficial and lasting influence on the fortunes of Worcester.

At the date of the resolve conferring municipal powers upon Worcester, the town formed a part of Middlesex County, and was situated on the western

<sup>1</sup> 23 Pickering's Rep., p. 77.

border of that county. On April 2, 1731, an act was passed by the Provincial Legislature establishing the county of Worcester, and Worcester was made the shire-town of the new county, not because of its relative importance so much as by reason of its central location.

There was a proposition, says Mr. Lincoln in his history, "to make Lancaster and Worcester half-shires, having the sessions of Court held alternately in each, and it would have prevailed, except for the opposition of Joseph Willard, Esq., who remonstrated against the administration of justice in Lancaster, lest the morals of the people should be corrupted."

There can be no reason to doubt the correctness of the historian's statements that such a proposition was made and that Mr. Willard opposed it; but the assignment of the reason for his opposition can hardly be accepted without material qualifications. The real reason influencing the careful Mr. Willard may probably be found in another passage from the same historian, in which he records the fact that "the terms of Court were the great holidays of the county, and its population assembled in Worcester, as a general exchange, for the transaction of business, or pursuit of amusement in the rude sports of the period. The judicial proceedings, now forsaken, except by parties, witnesses and officers, were generally attended by a multitude that thronged the streets. Wrestling, fighting and horse-racing were common exercises, and frequent exhibitions of discipline in the stocks and pillory and at the whipping-post attracted crowds of spectators."

Horse-racing in Main Street during the terms of courts was at length forbidden under a penalty of twenty shillings lawful money. This was in 1745. But the prohibition was, by the terms of the vote, to continue for the space of three years only. This was a very common method of legislation during the Colonial period and even later. And the statutes whose duration was fixed by definite limitation were called "temporary laws" in contradistinction from other laws which were termed "perpetual." The establishment of the courts in Worcester at that early period was an event far more important to its prosperity as a municipality than any similar transaction would be at the present day, when our great mechanical and manufacturing industries, extensive trade and unsurpassed railroad facilities render the presence of the courts here relatively an insignificant factor, in the aggregate of influences, which are carrying Worcester forward in its marvelous career of increasing population and wealth. It is indeed true now, as it always has been, that the existence of the courts here makes Worcester the residence of a large proportion of the members of the county bar, who constitute a very influential body of citizens, and whose influence in the main is beneficial to, and confers honor and strength upon, the place of their residence.

In 1722 the owners and tenants in common of the two hundred lots forming the north part of the township held a meeting duly convened for the purpose, and organized a distinct proprietary, called North Worcester, which, however, continued to be a part of Worcester until 1740. In 1730 the planters in the north part were exempted from town rates in the south part for seven years, on condition of making and maintaining their own highways. In 1740 the town voted to consent to the incorporation of North Worcester as a separate town, "if it be the pleasure of the Great and General Court, in consideration of the great distance from the place of public worship." And on the 9th of January, 1740, an act was passed whereby the northerly part of Worcester was set off and "erected into a distinct and separate township, by the name of Holden." The date of this act is given in Lincoln's "History of Worcester" as November 2, 1740—upon what authority does not appear. The above date of January 9, 1740, is taken from vol. ii., pp. 1043-1044 of the "Acts and Resolves of the Province of Massachusetts Bay," recently printed by authority of the Legislature.

The new town was called Holden in honor of Mr. Samuel Holden, who died in London the same year the town was incorporated. He was a man of wealth and a leader among the Dissenters in England. He was a friend and benefactor of the Province, and was distinguished for his general benevolence and many charities.

After his death his heirs, to whom he left an ample fortune for those times, followed his worthy example in deeds of charity, and it was to them and the widow of Mr. Holden that Harvard University is indebted for Holden Chapel.

In 1733 the proprietors of the township of Worcester passed the following vote, viz.: "Voted, that 100 acres of the poorest land on Mill Stone hill be left common for the use of the town for building stones." This vote, nearly one hundred years after its passage, became the cause of an interesting lawsuit, in which the inhabitants of Worcester were the plaintiffs and William E. Green the defendant. They claimed that the vote conveyed to them the one hundred acres in fee simple; the defendant, who derived his title from the same proprietors by mesne conveyances, claimed that the fee was his; and the Supreme Judicial Court so held, saying, "It was no doubt the intention of the proprietors to secure to the town or its inhabitants a valuable and perpetual interest in the land described in the grant, but that the land itself did not pass." This suit was in 1824.<sup>1</sup>

Again, in 1851, the owner of the fee brought suit against an inhabitant of the town who had entered upon the one hundred acres, and taken stones from the quarry thereon for building purposes. In this case the court decided that the terms of the grant by

the aforesaid vote included the right to get stone for the use of the inhabitants, not merely for buildings, in the narrow and restricted sense of that word, but for all those structures and purposes for which such material, in the progress of time and the arts, may be made useful. In this sense it would not be a violation of the right to appropriate the stone to the building of fences, bridges, arches, culverts, drains, curb-stones, monuments in cemeteries, and to the various ornamental uses to which it is usually applied. The erection of public buildings by the town in its corporate capacity, or of houses and stores by persons not resident in Worcester, to be occupied and improved by the inhabitants, would be for the use of the inhabitants, and so within the fair intent of the grant. But the use of the stone for building purposes, without the limits of Worcester, by inhabitants of other towns, is clearly a violation of the right. The court adds, that the grant of the right to the stone carries with it, as a necessary incident, the right to enter and work the quarry, and to do all that is necessary and usual for the full enjoyment of the right, such as hewing the stone and preparing it for use.<sup>1</sup>

The right secured by that vote, passed more than one hundred and fifty years ago, was of comparatively little value for many years, but the extraordinary growth of Worcester in population and wealth, and the consequent increase in the demand for building material, has rendered the quarries on Mill Stone Hill a mine of wealth to the city and its inhabitants.

From 1740 the town increased slowly but steadily in population and wealth until 1763. But few events, however, occurred during that period, the record of which comes properly within the scope of this chapter.

Worcester, in common with other New England towns, was more or less involved in and affected by the wars between England and other European countries, as has already been stated, and especially in and by those which prevailed, with intervals of peace that were little more than truces, between England and France, from the treaty of Utrecht, in 1713, to that of Paris, in 1763, a period of fifty years. During what was known in this country as the French and Indian War, extending from 1754 to 1763, Worcester furnished soldiers every year for the English armies of defence or conquest, and in all four hundred and fifty-three men, besides those who enlisted in the regular army.

In 1754 the voters of the town were called upon to vote on a question relating to the sale and consumption of intoxicating liquors: not, indeed, upon the question whether licenses for selling such liquors should or should not be granted, but whether the consumers of liquors, sold by unlicensed sellers, should pay the duty thereon.

A bill was passed by the General Court requiring every householder, when called on by a collector, to render an account, under oath, of the quantity of such liquors used in his family, not purchased of a licensed person, and to pay the duty thereon. Governor Shirley refused to give his assent to the bill but instead of vetoing it outright, he had it printed and submitted to the consideration of the people. The voters of Worcester gave a unanimous vote against the bill "relating to the excise on the private consumption of spirituous liquors being passed into a law," and instructed their Representative, John Chandler, "to use his utmost endeavor to prevent the same." To understand this peculiar transaction, it should be remembered that the Provincial Legislature used, from time to time, to pass "acts for granting unto His Majesty an excise upon spirits distilled, wines," etc., the act providing that the excise should be paid by taverners and other persons licensed to sell the same. Such an act, for instance, was passed December 19, 1754, and the money collected under the act was to be used in lessening the debt of the province and for no other purpose. One section of the act provided that every person consuming or using in his or her house, family, apartment or business any distilled spirits or wine, "except they purchased the same of a taverner, inn-holder or retailer in this province and in a less quantity than thirty gallons, shall pay the duties" prescribed by the act. As the negative vote of Worcester above referred to was given September 2, 1754, and this act was passed December following, it is evident the voice of Worcester did not prevail to prevent the passage of the act. There is another fact connected with that vote of the town worthy of notice, as showing the custom of the people, at that early day, of giving their Representative instruction as to his legislative duties. The last section of the act above referred to would hardly be adopted at the present day as a part of a prohibitory or license law. It was as follows: "That none of the clauses in this act, respecting persons being obliged to render an account of the spirituous liquors aforesaid, shall extend, or be deemed or construed to extend, to his excellency, the governor, lieutenant-governor, president, fellows, professors, tutors and students of Harvard College, settled ministers and grammar school masters in this province."

In the fall of 1755 eleven persons came to Worcester, or rather were sent here, to be provided for by the town authorities. They were strangers, and spoke a foreign language. Some were old and some young—they were of both sexes. They were apparently an inoffensive folk, willing and able to work for their own support, except one aged pair, who were past labor, and were taken care of by a young girl of seventeen.

These eleven persons were a small detachment of many thousand involuntary exiles from their native land. They were, in short, a small part of the thou-

<sup>1</sup> 8 Cushing, pp. 28, 29.

sand Acadian exiles who had been forced by the military power of England to leave their pleasant homes "on the shores of the Basin of Minas," and had recently been landed in Boston, and distributed thence among the several towns of the Province by a committee appointed for that purpose. Why this forcible removal of the inhabitants from Acadia, by direct command of the British Government, should be characterized, as it is, by one of our local historians, as the darkest blot on *our* history is not very clear, unless he means that this Province, being then a part of the British Dominions, was a participant in the guilt of an act of cruelty which it had no power to prevent. It is true that the forces employed to drive these unoffending people from the homes they had built, and which they passionately loved, were commanded by Gen. John Winslow, a relative of Gov. Winslow, of Plymouth; but he was an officer in the British army, and acted upon orders emanating from the head of that army, and not upon any orders from the Provincial Government. It is also true that in the army commanded on that occasion by General Winslow there were many soldiers from Massachusetts, and among them were seventeen from Worcester. But all these things combined are not sufficient to render Massachusetts or New England responsible for an act which admits of no justification; for it was an act quite beyond their control. And while we may agree with the historian, as he declares that "I know not if the annals of the human race keep the record of sorrows so wantonly inflicted, so bitter and so perennial, as fell upon the French inhabitants of Acadia, or have our sympathies deepened and intensified for the sufferers in reading the enchanting lines of Longfellow's 'Evangeline,' yet there are explanations which can be made that would, perhaps, mitigate the severity of the judgment which the reader, without the explanations, is ready to pronounce upon the actors in a transaction which drove a whole people into exile, and from which they were never permitted to return." But all that remains that is pertinent to be said in this connection is that the small number of these exiles who were sent to Worcester were treated by the inhabitants with great kindness, and that they, while dwelling here, continued to pursue "their industrious and frugal habits and mild and simple manners." And some of the oldest among them having died, as it is said, broken-hearted, the remnant, after the lapse of twelve years from their first coming to Worcester, returned to their countrymen in Canada."

During the years 1764, '65 and '66 several attempts were made in the Legislature for the formation of a new county from the northern part of Worcester County and the western part of Middlesex. These projects were vigorously and successfully opposed by Worcester and other towns in both counties. At the same time a petition from Lancaster was presented to the Legislature asking to have that town

made a half-shire; but this attempt, like those for a new county, failed. In relation to the removal of some terms of the court to Lancaster, the people of Worcester again exercised the right of instructing their Representative and directed him "to use his utmost endeavor to prevent the removal;" also to procure another term of the Superior Court in Worcester. The courts were not removed, nor was any additional term established in Worcester at that time.

§ 9. A brief sketch of the history of Worcester from 1763 to 1783, a period of twenty years, will complete this chapter. It will be recollected that the last war between France and England, ending with the treaty of Paris in 1763, left England mistress of all the northern and Atlantic portions of North America; and the colonies were relieved from that state of almost incessant hostility by which they had been harassed so long as the French remained in possession of Canada. To the ordinary observer of coming events, this condition of affairs would seem to promise a long period of peace and prosperity. But, on the contrary, the colonies were engaged in actual war, or in preparation for it, most of the time during the twenty eventful years from 1763 to 1783. And there was a signal fulfillment of the prediction of the sagacious French statesman, who, when he heard of the entire cession of Canada to England, said: "England will ere long repent of having removed the only check that could keep her colonies in awe. They stand no longer in need of her protection; she will call on them to contribute toward supporting the burdens they have helped to bring on her, and they will answer by striking off all dependence." The then late war in which England had been engaged doubled her national debt, and upon the return of peace, Parliament entered upon a series of unjust measures for taxing the colonies, which were at once met on the part of the colonies with vigorous resistance, and which finally issued in the war of independence. Worcester, although having within its borders a large and influential body of loyalists, was yet one of the earliest and most persistent of all the towns in the colony in its opposition to the oppressive acts of Parliament, and in the prosecution of the war when the appeal was taken from the discussion of principles to the arbitrament of the sword.

The instruction of the town to its Representative in the General Court in May, 1767, are significant of the state of feeling among the citizens at that time, and of their clever apprehension of the rights of man in general, and of their own particular rights.

In addressing these instructions to their Representative, they say:

1. That you use your influence to maintain and continue that harmony and good will between Great Britain and this province which may be most conducive to the prosperity of each by a steady and firm attachment to English liberty and the charter rights of this province, and that you willingly suffer no in-

vasions, either through pretext of precedency or any other way whatever; and if you find any encroachments on our charter rights, that you use your utmost ability to obtain constitutional redress.

2. That you use your influence to obtain a law to put an end to that unchristian and impolitic practice of making slaves of the human species in this province, and that you give your vote for none to serve in his majesty's council who, you may have reason to think, will use their influence against such a law, or that sustain any office incompatible with such, and in such choice prefer such gentlemen, and such only, who have distinguished themselves in the defence of our liberty.

The fourth instruction is upon quite a different subject and yet it had reference to the means of preserving liberty—it reads as follows: That you use your endeavor to relieve the people of this province from the great burden of supporting so many Latin grammar schools, whereby they are prevented from attaining such a degree of *English learning as is necessary* to retain the freedom of any State.

6. Take care of the liberty of the press.

The town records furnish plenary evidence that Worcester, during the ten or twelve years preceding the commencement of hostilities, in 1775, constantly and resolutely resisted the enforcement of all acts of Parliament passed in violation of the great principle for which the Colonies so steadily contended, that there should be no taxation without representation.

In the spring of 1774 an event occurred which exhibited in a striking manner the strength of popular feeling against any and all measures which the people believed tended to destroy or impair the safeguards of their rights. Parliament had passed an act the object of which was to make the judges of the Superior Court (the highest court in the Colony) dependent on the crown and independent of the Colonial Legislature. Whereupon, after ineffectual negotiations with Governor Hutchinson, the Legislature resolved "that any of the judges who, while they held their offices during pleasure, shall accept support from the crown independent of the grants of the General Court, will discover that he is an enemy to the Constitution, and has it in his heart to promote the establishment of arbitrary government." Chief Justice Oliver, of that court, was the only one of the judges who chose to defy popular sentiment by declaring that he had accepted His Majesty's bounty, and could not refuse it without royal permission. After this declaration was made public, it was reported that the chief justice would be present and hold the April term of the Superior Court in Worcester (1774); whereupon the grand jurors summoned for that term, with Joshua Bigelow, of Worcester, at their head, addressed a communication to the justices of the court, in which they say: "We, the subscribers, being returned by our respective towns to serve as jurors of inquest for this court, beg leave humbly to inform

your honors that it is agreeable to the sense of those we represent, that we should not empanel, or be sworn into this important office, provided Peter Oliver, Esqr., sits as chief justice of this court; and we would further add, that our own sentiments coincide perfectly with those of our constituents respecting this matter; so to whatever inconvenience we expose ourselves, we are firmly resolved not to empanel, we are first assured that the above gentleman will not sit as a judge in this court." They then give the reasons for their conduct, all having relation to the unfitness of the chief justice to sit as a judge in consequence of his disloyalty to the Colony and his subserviency to the crown. The result was the jurors were not impaneled until they received assurances that the obnoxious judge would not preside over them.

This action by the grand jurors was taken under the advice of the American Political Society, as it was called, and which during the two years of its existence from December, 1773, exercised a controlling influence in the town and county. It was, in fact, a self-constituted vigilance committee. At the annual March meeting, 1774, a committee, appointed to take into consideration the acts of the British Parliament for raising revenues from the Colonies, presented a report, which was adopted by the town. That report, which is quite too long to be copied here, goes over the whole ground of controversy between the Colony and the mother country, and points out the measures that should be adopted to preserve the rights of the Colonies against the encroachments of Parliament and the crown.

The royalists of the town, with Colonel Putnam as their leader, opposed the adoption of the report and accompanying resolutions, and being defeated, forty-three of their number presented a petition for another meeting to be held on the 20th of June following, hoping to rally their associates in sufficient numbers to rescind the patriotic resolutions of the March meeting. But they were again defeated, and the very able report which had been prepared by the distinguished and eloquent counselor, Colonel Putnam, was rejected or refused all consideration. But the Tory town clerk nevertheless entered the report on the town records, and which he was shortly thereafter compelled by a vote of the town to expunge so effectually that the blackened pages of the record are to this day illegible.

The signers of the petition for the June meeting were glad of an opportunity to express their penitence for having signed a petition so at variance with the popular will. Timothy Paine, of Worcester, and Colonel Murray, of Rutland, were compelled by the demands of the people to resign what were known as the mandamus commissions which they had accepted from the crown. The courts acting under royal authority were suspended in Worcester in September, 1774, in obedience to popular sentiment, and

were opened again in 1776, under the new government which had taken the place of the old.

A convention of all the Committees of Correspondence was held in Worcester September 21, 1774; it assumed legislative powers, and during the interregnum between the suspension of the royal authority and the establishment of constitutional government the orders of that convention were obeyed as laws. In a convention of the blacksmiths of the county, held in Worcester November 8, 1774, among other resolutions one was adopted which would be quite appropriate to a convention of modern boycotters, "and in particular," say the patriotic blacksmiths, "we will do no work for *Tim. Ruggles*, of Hardwick, *John Murray*, of Rutland, and *James Putnam*, of Worcester, Esqrs.; nor for any person cultivating, tilling, improving, dressing, hiring or occupying any of their lands or tenements."

But, notwithstanding the bold and apparently uncompromising spirit of the people, yet it is perfectly apparent, upon a careful study of their whole course of conduct, that they acted entirely on the defensive until the actual commencement of hostilities by the British troops, sent here to overawe the people, and, finding that that could not be done, resort was had to the force of arms.

In March, 1775, a company of minute-men was formed in Worcester, and were trained under that veteran soldier, Captain Bigelow, so that when the call "To arms to arms! the war is begun!" was heard in the streets of Worcester on the 19th of April, this company was in "a short time paraded on the green, under Capt. Timothy Bigelow; and after fervent prayer by Rev. Mr. Macarty they took up their line of march" to the seat of war. The history of Worcester during the eight years from 1775 to 1783 is largely of a military character, and does not fall within the purview of this chapter.

Soon after April 19, 1775, some of the royalists of Worcester left their homes here and took refuge in Boston. Those who remained were summoned before the Revolutionary tribunal and made to give assurances that they would not leave the town without the consent of the selectmen. Some having violated their parole, two were arrested and sent, under guard, to the Congress at Watertown; the remaining royalists were disarmed, having refused to vindicate the sincerity of their pledges by joining the American troops.

The Declaration of Independence was received in Worcester July 14, 1776, and was read by Isaiah Thomas, the patriotic editor of the *Spy* of that day, from the porch of the Old South meeting-house, to an enthusiastic assembly of his fellow-citizens. The first anniversary of the Declaration was celebrated in Worcester July 8, 1777, by the ringing of bells, the firing of cannons and illuminations at night.

On the proposition to ratify the Constitution, which was reported by a committee of the General Court,

the vote of Worcester was largely in the negative. Great distress prevailed among the people in 1779-80 in consequence of the depreciation of the currency and the high prices of all the necessities of life. At a town-meeting in August, 1779, resolutions were passed severely denouncing "regraters in the public markets, forestallers and engrossers of the produce of the country." One of the resolutions declared "that whoever refuses to sell the surplus of the produce of his farm, and retains the same to procure a higher price by means of an artificial scarcity, is very criminally accessory to the calamities of the country, and ought to be subjected to those penalties and disabilities which are due to an inveterate enemy." Is not that doctrine equally applicable to the heartless speculators, "regraters, forestallers and engrossers" of the necessities of life in our own times? In May, 1780, the Constitution prepared by a convention of the people was submitted to them for ratification and was accepted. Worcester disapproved of the third article of the Bill of Rights relating to the support of religious worship, on the ground that it would interfere with the rights of conscience. It is singular that the same people at the same time should object to the twentieth article, conferring upon the Legislature only the power of suspending the execution of the laws, and this objection was placed on the ground that the article placed too great a restriction on the executive department.

Upon the question as to the manner in which royalist refugees should be treated, the judgment of Worcester was emphatic and stern. It was "voted" May 19, 1783, "That, in the opinion of this town, it would be extremely dangerous to the peace, happiness, liberty and safety of these States to suffer persons of the above description (refugees) to become the subjects of and reside in this government; that it would be not only dangerous, but inconsistent with justice, policy, our past laws, the public faith and the principles of a free and independent State, to admit them ourselves or have them forced upon us without our consent."

But not withstanding this severe condemnation of the forgiveness of enemies, some of the refugees, who had been banished for life and threatened with death if they returned, were allowed to come back and live in peace in their former homes during the first generation after the close of the war.

And long since the healing influences of time have done their perfect work, and the descendants of loyalists and patriots are living in the towns of their ancestors, side by side, on terms of amity and perfect equality.

## CHAPTER CLXXX.

WORCESTER—(*Continued.*)

## CIVIC AND POLITICAL HISTORY.

BY FRANCIS A. GASKILL, A.B.

*From the Close of the Revolution to the Present Time.*

## WORCESTER AT THE CLOSE OF THE REVOLUTION.

—In 1783 the town of Worcester had a population of about 2000, devoted mainly to agriculture and slightly to trade. Its municipal expenses were almost solely for the repair of its roads and the maintenance of its schools. The appropriation in the following year for the former purpose was £200, and for the latter, £100. Its means of communication with the seaboard were restricted, although in that very year, on the 20th of October, the first regular stage from Boston arrived in Worcester, and thus began an enlargement of facilities for travel. There was no necessity to divide the town into precincts to accommodate the voters, for the total vote cast in that year for Governor was only 57, of which John Hancock had 49 and James Bowdoin 8. The right of way in its streets was contested by pedestrians, cattle and swine; the only restriction on the swine being embodied in a vote of the town in that year that they "being yoked and ringed shall go at large."

The mornings and evenings were not melodious with the cry of the newsboy.

But one newspaper was published here, the *Massachusetts Spy*, and its issue was weekly. Flax was spun on the spinning-wheel at almost every home. Wood was the only material used in building. The open fire-place was the only medium of warmth, and wood alone was burned. Stoves were unknown inventions and coal an unknown agent. Fires were lighted with the spark from the flint, and not with the then unimagined match.

The floors were in most instances carpeted with the bright sand, and not with warmer materials.

County conventions were not accommodated in any public hall, but were held at some house, that in 1784 being called at "the house of Sam Brown."

The town illustrated from time to time its paternal character, as in the case of Cato Walker, in 1784, to whom it voted an anvil, "he being unable to buy one,"—a wiser method, perhaps, of dealing with its poor than later years have developed, though the gift of a stock in trade to every pauper would be attended with rather grave embarrassments.

But the capacity of the people for self-government, and their ability to deal with questions of State and federal policy, had been attained by years of practice and thought. The Representative to the General Court was in fact, as well as in theory, their

servant, and his entrance upon his labors was through the passport of their instructions.

A stern sense of duty seems to have dominated them and made the expression of their views, solemnly recorded in their records, a joy and a delight. No more instructive revelation of the customs then prevalent can be had than is contained in some of the reasons adopted January 25, 1782, why the town disapproved of a late act of the Legislature laying an excise on wine, rum, wheel carriages, &c.:

3d. That if it is necessary to lay duties for the support of Government and suppression of luxury and extravagance, said duties ought to be laid on such articles only as are merely luxuries, and not on some of those mentioned in said act, spirituous liquors being absolutely necessary for our seafaring brethren coasting along our shores in Boats and Lighters at all seasons of the year to supply the market with wood, Lumber and Fish; also for the Farmer, whose Fatigue is almost insupportable in hay time and harvest and other seasons of the year, and for the New Beginners in bringing forward new Townships when they have nothing to drink but water, and perhaps are exposed to more Hardships than any other persons; nor on Bohea Tea, which, in populous places, and in many places in the country is substituted by many Poor People for their support and sustenance in the Room of milk, which is not to be had, and they find it to be a Cheap Diet.

5th. That all Consumers of Spirituous Liquors at Taverns will pay about eight times as much as the Duties amount to, for it is well known that the Tavern-keeper sells his mixt Liquors for two pence more in a mug than before the Excise was laid, when, in fact, the duties on each mug does not amount to more than a farthing, and so in proportion on other Liquors.

6th. That all Persons living upon the Borders of this Government will purchase Liquors for their own consumption of the neighboring Governments, and thereby avoid paying any of said Duties.

7th. The act exempts all persons from paying Duty who buys at one time 50 lbs. of bohea or 25 of other India Tea, which appears to be calculated to lay a Tax upon the Poor and exempt the Rich.

Delightful surprises, such as this, often appear in the records of the town, and the page is luminous with the light of forgotten views of life, or aflame with controversies long since buried. We get clearer notions of the shrewdness of our fathers and the plain honesty with which they announce their views. We see, too, at times specious reasoning applied to vexing problems, but also grave, earnest, scholarly and powerful presentation of thoughts which the experience of later generations has proved to be profound.

The history of Worcester since the close of the Revolution seems appropriately to be divided into four periods, each having a distinctive feature and each illustrated by a progress peculiarly its own.

*First.* Covering the time to the opening of the Blackstone Canal in 1828, being the preparatory and formative period.

*Second.* From the beginning of traffic over the canal and covering the vast accession of trade incident to the opening of railroad communication with Boston, Springfield, Providence and Nashua, to its incorporation as a city—being the transition period.

*Third.* From the organization under its charter as a city to the introduction of water and the building of sewers and covering the great material advance occasioned by the variety of its industries and the

opportunity for their development through the demands caused by the war.

*Fourth.* To the present time, including the introduction of multiplied agencies for growth, comfort, elegance and education, being the period of its assured and vigorous manhood.

Within the limits of this article it is not proposed to give with any exhaustive fullness the details of the yearly progress or growth or to cover in any degree the history of the city's industries or deal with its military events, but to confine the treatment to civic matters and important political occurrences.

#### FIRST PERIOD.

The rejoicing over the final and assured separation from the mother country had hardly ceased, the veterans of the Continental army had scarcely changed the privations of war for the more peaceful scenes and employments of home, than new anxieties and new privations awaited them. The blessings of liberty seemed less prized when liberty apparently had resulted in poverty and almost in starvation.

As soon as the war closed English agents and factors came in large numbers to this country and gradually controlled trade. Importations of foreign goods became frequent and numerous. The coin of the country was exported in payment, and thus money became scarce. English creditors, too, pressed with urgency their claims, and suits were brought with alarming frequency.

Massachusetts suffered in an exceptional degree from these and other causes. It had no tobacco and no rice to export; its fisheries had decreased to an alarming degree; it had nothing with which to pay for its imported articles, except coin, and that was speedily exhausted. The private debts in the State amounted, it is estimated, to £1,300,000. In addition to this £250,000 were due its soldiers, besides £1,500,000 as the State's proportion of the Federal debt. One-third of the latter was required to be raised on the ratable polls, numbering less than 90,000. Taxes at least must be paid in coin; so must debts, when the creditor insists. Without commerce, without manufactured articles, without exportable products and without money, the people of Massachusetts were largely forced to the rude expedient of barter and exchange; but that, indeed, afforded no relief; the coveted money was not obtained by such methods. Hence creditors did insist, collection was enforced by wit and satisfaction by levy and sale. Property and homes were sacrificed, discontent became general and relief was vainly sought. Courts were crowded with actions and suitors; lawyers alone were prosperous.

Such was the condition of Massachusetts in 1786, when the General Court met. The alluring remedies proposed in that body were to make real and personal estate legal tender; to emit paper money which should be irredeemable, and to permit free trade, so far as lawyers were concerned, admitting any person

of good character to practice in the courts, but regulating the fees. These measures failed at that time.

Redress must be sought in other ways, therefore. Conventions were called in which to discuss grievances and formulate remedies.

In May, 1786, the town of Sutton invited the towns to send delegates to a general meeting.

**WORCESTER'S ATTITUDE TOWARD SHAYS' REBELLION.**—It would be a source of greater satisfaction for every citizen of Worcester if the part which that town took in the only serious revolt against the supremacy of law in Massachusetts had been one of absolute and uninterrupted vindication of the rights of the Government. But, considering the force of opinion in almost every town in the county, the easy acquiescence with which most of the towns sent delegates to the County Convention of 1786, the corporate action of the town of Worcester, in the main, deserves our approbation and compels our admiration.

The contest came solely upon the question of sending delegates to the convention of 1786. In and of itself the mere approval of a convention to consider grievances and suggest legitimate remedies would not at any time merit censure. But when armed revolt against the peace of the Commonwealth was a possible issue, or later when it was an established fact, true patriotism was best shown by a determined refusal to have any part or lot in bodies or measures whose tendency was even remotely towards revolution. Worcester showed a sturdy and persistent opposition for many months, and even though a small majority was obtained once or twice in favor of participating in the convention, the results were disapproved.

The only petition to the General Court which Worcester adopted was in 1784, before public passion was excited. It recited as the grievances which should be remedied:

1st. "The giving into the hand of the honorable the Continental Congress the Impost to be under their sole controule," and that the act to that effect ought to be repealed, "not but that we are free and willing that an Impost on all Imported Articles ought and should immediately take place, but the Revenue thereof ought to be paid into our State Treasury, and in a Constitutional way drawn out by a warrant from the Governor, and, if appropriated to Congress, it ought to be set to our credit, so that we may receive the benefit of the same, which we conceive no State in the Union have any just right to."

2d. "Wee conceive that the expence of Days of Publick Rejoicing ought not to be paid out of the Publick Treasury."

3d. "Making large grants to officers of the Continental Army, &c."

4th. "That the people of this State are greatly oppressed and distressed for the want of a ballance of a Circulating Medium, and that the credit of the State greatly suffers from no other motive than the necessity of the people and by reason of the State's holding the property of Individuals binds one part of the people so that the other part makes necessity their opportunity, which much grieves the good people of this State, and we pray that ways and measures may be found out for Relief."

The foregoing, adopted two years before Shays' Rebellion, was the only petition on the subject of grievances sent or adopted by Worcester.

At a town-meeting, held June 8, 1782, the list of grievances, which the town supposed it had, was for-

mulated for the information of its Representative to the General Court as follows :

"We instruct you Relative to some *malers of grevance* which we think we labour under :

1st. "That the Receiver-General of this extensive Commonwealth should be a Justice of the pleas in the County of Middlesex, by which he is rendered unable to attend his office as Treasurer of the Commonwealth during the Time he attends the Courts in said County, by which many persons have been, and others no doubt will be, put to considerable Expence, besides loss of time and Disappointment, who have business with him as Treasurer."

2d. "As there is a Recommendation of Congress that such officers as have been Deranged and not in actual service have half pay during life, if said recommendation has or should take Place, we look upon it as a great greivance."

3d. "That the Members of the General Court, when acting as Committees of the same, have large wages over and above their pay as Representatives, is a greivance which we think we justly complain of."

4th. "That Representatives having nine shillings per day, Considering the scarcity of money and the difficulty of obtaining thereof, being almost double what they formerly had when money was much plentier and easier to be had, we think a greivance."

5th. "It is a great greivance that there has not been a general Settlement with the Treasurer of this Commonwealth, and with all others who have been entrusted with the expenditure of publick monies and have not accounted for the same."

6th. "That the State of the Treasury is not known to the Inhabitants," &c.

7th. "As the Siting of the General Court in the Town of Boston is attended with many inconveniences, we think said Courts siting in said Town a greivance."

8th. "That the siting of the Court of Common Pleas and General Sessions of the Peice at the same time much interfere with each other, by which means the County is put to the coast of paying many Justices many days, when much less time would answer the purpose as well."

9th. Large grants of land to "Alexander Shepherd and others laying in the old Provence of main," &c.

Thus in 1782, by instructions to its Representative in the General Court, and in 1784 by petition to the Senate and House of Representatives, Worcester announced its grievances. No undue popular excitement existed at either of these times; but in 1786 the case was different. The supposed grievances had not been remedied by legislation or by changed conditions. Many of the people believed their burdens insupportable and saw no relief by constitutional means. Excitement ran high; demagogues caught the public eye; unprincipled men sought to lead, and danger began to threaten. In such condition of things, Worcester sought to allay the impending storm.

In May, 1786, Sutton sent an invitation to the towns of the county to send delegates to a convention. It was not considered by Worcester.

The convention, with delegates from a portion of the towns, met at Leicester, but adjourned to August 15th, and another attempt was made to obtain the presence of delegates from the remaining towns. A letter from the convention was received by Worcester, asking that it and Douglass and Northbridge might send delegates "to take under their consideration such matters as shall appear to them to be grievances, and for the towns to instruct their delegates concerning a circulating medium or such means of redress as they shall think proper."

A town-meeting was held in Worcester, August 10, 1786, to consider the invitation. Upon the proposi-

tion to send delegates, the record states that "it was passed in the negative."

Thus far through the increasing excitement Worcester had remained firm against becoming identified with the growing opposition to the government. But the movement, gaining force from the presence of delegates from nearly every town in the county and from the armed resistance at Worcester on September 5th, when the Court of Common Pleas was compelled to adjourn without transacting business, became too strong for successful opposition by the town of Worcester.

A petition for another town-meeting was presented, and in accordance with its prayer a meeting was held on September 25, 1786, at which, by a vote of 47 to 29, it was decided to send two delegates to the convention at its adjourned meeting at Paxton on the last Tuesday of September; but the town still retained the power to disapprove the action of the convention, for it voted that its delegates should report their doings at a later meeting.

The convention adopted a petition to the General Court. It was presented at a meeting of the inhabitants of Worcester, held October 2, 1786, and was read, paragraph by paragraph, and it was voted not to adopt it. But another trial of strength was demanded by the defeated party, and a petition, signed by Dr. Dix and others, was presented for another town-meeting. October 16, 1786, it was voted, by 62 affirmative to 53 negative, to choose a delegate to "meet in Convention at the house of Nathan Patch on the 2<sup>d</sup> Tuesday of November next." Again, however, the town proposed to be careful of its good name, and it voted that the "Delegate lay the doings of the Convention before the town for their approbation or disapprobation at the next town-meeting after the meeting of the Convention." At the same meeting it chose a committee, consisting of Dr. Dix and others, to prepare instructions for its Representative to the General Court.

Town-meetings were frequent in those days. At the next one, held October 23d, the party of order were in the majority, and the instructions prepared by Dr. Dix and others were refused adoption by a vote of 59 in favor of adoption to 67 against. Other instructions were then adopted, but it is a pleasure to read that a proposition to instruct the Representative to use his endeavor to have the law repealed which obliged each town to keep a grammar school was voted down.

Thus far the town, whenever it came to pass upon the acts of the convention, was uniformly found to disapprove. Its last action relative thereto was taken at the meeting held January 15, 1787, when the report of the delegates was made, and it was voted to dismiss the delegates.

On the very next day, January 16, 1787, the town voted to pay a bounty of twelve shillings and forty shillings per month compensation to each man who

should enlist for the support of the government. It also chose a committee to give security to the soldiers for their wages.

The Rebellion was soon to be overcome. General Lincoln, with his troops, arrived in Worcester on the 22d of January, where he was joined by the soldiers from this county, including many from Worcester, and by the 3d of February the opposition to the established order had vanished. Only two or three from this town were included among the soldiers of the insurgent forces.

It has not been our purpose to treat of the military events which happened in Worcester in connection with and as a part of Shays' Rebellion, but simply in a brief way to cover the corporate action of the town with reference to it.

The temper of such a loyal and law-abiding citizen as Isaiah Thomas, with reference to the Excise Act in its operation upon him, may be judged by an entry made by him in an old receipt-book, following the copy of a receipt, dated December 16, 1785, of three pounds from him in full for duty on advertisements, from the 1st of August to November 24th. It is as follows:

"N. B.—This is the first duty I ever paid Government for Liberty of Printing a news-paper—the first shackle laid on the Press since Independence, and laid on by the Legislature of Massachusetts only !!!"

The original of the above is now in the possession of Charles A. Chase, Esq., treasurer of the Worcester County Institution for Savings. In consequence of the determination of Mr. Thomas not to be subject to an act so painfully suggestive to him of the Stamp Act, the publication of the *Spy* was suspended for the years 1787–88.

MEANS OF COMMUNICATION.—At the outset of the trips of the regular stage from Boston, through Worcester to Hartford, in 1783, one left Boston on Monday morning at six, remained in Northborough at night, reaching Worcester on Tuesday and arriving at Hartford on Thursday. Another left Hartford at the same hour on Monday and arrived in Boston in four days. Beginning in January, 1786, coaches left Boston in winter every Monday and Thursday mornings at five o'clock, arrived at Worcester the same day, and reached New York in five days more. The summer arrangement provided for coaches three times a week, in which the journey from Boston to New York was made in four days, which was claimed to be the most expeditious way of traveling that could be had in America. In July, 1788, the carriages were hung upon springs, and the trips made with greater comfort. Increasing speed was constantly made, till the running time from Boston to Worcester was reduced to six hours at the close of this period. Increasing trips were made till stages run daily to Boston, Hartford and New York, and five different lines, three times a week to Boston. There were also lines to Oxford, to Providence, to Northampton, to Keene, to Southbridge, to Dudley,

to Athol, and to many other places. New roads and new turnpikes began to be built, connecting Worcester with other places by shorter routes and better roads.

By chapter 67, of the Acts of 1806, Aaron Davis and others were incorporated under the name of the Worcester Turnpike Corporation, to make, lay out and keep in repair a turnpike road from Roxbury to Worcester, "passing over Shrewsbury Pond, and to the north of Bladder Pond, to the street in Worcester near the Court House," and with authority to establish four toll-gates. The turnpike crossed Lake Quinsigamond upon a floating bridge, which, on September 19, 1817, sank, but was soon after replaced by a more substantial structure. Other turnpike corporations were established, intended to afford Worcester more ample means of travel and traffic.

POPULATION AND LOCAL CONDITIONS.—The population of Worcester increased at a slow rate from decade to decade during this period. By the first census in 1790 it had 2,095; in 1800, 2,411; in 1810, 2,577; in 1820, 2,962; in 1825, 3,650.

Its ratable polls were for the several years as follows: 1790, about 450; 1800, 530; 1805, 540; 1810, 518; 1815, 641; 1820, 626; 1825, 881.

The vote for Representative to the First Congress under the Constitution, in 1788, was as follows:

Timothy Paine.....	46
Jona Grout.....	25
Abel Wilson.....	3
A. Ward.....	1
Total.....	75

It is exceedingly interesting, in connection with the subsequent history of the towns of the county, to compare their condition so far as polls are concerned, in 1786. They follow in order:

Brookfield.....	666	Douglas.....	231
Sutton.....	640	Oxford.....	228
Shrewsbury.....	421	Grafton.....	225
Charlton.....	392	Westboro'.....	222
Barre.....	373	Dudley.....	220
Leominster.....	359	Bolton.....	216
Worcester.....	357	Fitchburg.....	207
Petersham.....	349	New Braintree.....	203
Sturbridge.....	347	Princeton.....	198
Hardwick.....	340	Ashburnham.....	197
Sterling.....	339	Royalston.....	196
Mendon.....	310	Milford.....	195
Spencer.....	308	Athol.....	193
Harvard.....	306	Weston.....	192
Lancaster.....	304	Southboro'.....	186
Lunenburg.....	297	Upton.....	184
Westminster.....	291	Hubbardston.....	163
Uxbridge.....	281	Oakham.....	161
Templeton.....	274	Northboro'.....	156
Rutland.....	268	Paxton.....	145
Leicester.....	240	Berlin.....	118
Holden.....	223	Ward.....	108
Winchendon.....	231	Northbridge.....	95

Thus it is seen that in number of polls Worcester was, in 1786, the seventh town in the county. It may well be a subject of thoughtful consideration as to the operative causes which have secured for it the position of the second city in the Commonwealth.

Within the period of present consideration the conditions were favorable, not for rapid development, but for careful, thoughtful action. Its foundations were not laid in mortar and cement only, but in education, intelligence, taste, a due degree of political wisdom, business sagacity and prudent foresight. It possessed natural advantages in location. As the shire-town of the county it attracted attention, immigration and business. Its area was ample; its adaptability for trade and manufactures was noticeable. The wealth of the town was in excess of its proportion, according to population; its income in 1786 was third among the towns of the county. Its inhabitants did not secure foreign capital and foreign corporations for business ventures. Its wealth was localized, its capital was a *home* capital and every inhabitant had a local pride and local interest. The profits of its trade went into the pockets of its own citizens and not to non-resident stockholders.

It is believed that in an exceptional degree the families of early Worcester have remained and been represented here during a large part of its existence. This fact alone is of no inconsiderable importance. A harmonious union of effort develops strength. An intensified interest and added pride in the home of generations of ancestors come to the loyal descendant. In a population of a few thousand its effect upon the whole is more potent and visible than when distributed among greatly increased numbers.

During this period, with its population never above 4,000, Worcester had among its active and prominent men representatives of the following early families: Chandler, Paine, Curtis, Rice, Bigelow, Lincoln, Green, Goulding, Stowell, Allen, Salisbury, Jennison, Upham, Flagg, Grout, Perry, Thomas, Lovell, Goddard, Mower and others. A brief glance at some of the strong men of this period will enable us to appreciate the power they must have exerted in shaping events and counseling measures. The services of many were not confined to Worcester, but the nation and the State called them to positions of honor and usefulness.

LEVI LINCOLN, SR., graduated at Harvard in 1772, came to Worcester in 1775, began the practice of law, and became the leader in his profession. Successively judge of Probate, Representative to the General Court, State Senator, member of Congress, Attorney-General of the United States in the Cabinet of President Jefferson, Councilor, Lieutenant-Governor and Governor of the Commonwealth, and finally, associate justice of the Supreme Court of the United States, which latter position was declined, were the fitting reward for his ability and capacity for useful and distinguished service. He was a great advocate and learned jurist, and his portrait, together with that of his eminent son Levi, finds fitting place in the Worcester Law Library.

His interest was not confined to legal and political duties only. He was one of the original members of the American Academy of Arts and Sciences.

EDWARD BANGS graduated at Harvard in 1777, came to Worcester in 1780, and pursued his profession of the law with success. He entered with spirit and energy into service for the best interests of the town; was for many years selectman, and served with fidelity in other local capacities. He was a staunch and bold advocate of the supremacy of the law at the time of Shays' Rebellion, and was a volunteer in General Lincoln's army. He was Representative, for ten consecutive years, to the General Court; was attorney for the Commonwealth for Worcester County from 1807 till his appointment as associate justice of the Court of Common Pleas in 1811, which position he retained till his death in 1818.

ISAIAH THOMAS, was known as widely, perhaps, as any citizen of Worcester during this period, and honored throughout the land. His service to the home of his adoption from 1778, when he came here for permanent residence, till his death, in 1831, was varied and marked. He not only devoted himself to the extension of his business,—to establishing a book-bindery (the first in the country); to the building and operation of a mill on the Blackstone River for the manufacture of paper (the second of the kind in the United States); to the employment of a large number of presses in connection with the business of book publisher; to the attainment of greater accuracy and elegance in the printing of books, by which the reputation of his work extended through the country, and attracted to Worcester attention and trade,—but also, by labor, advice and munificence, aided in the extension of the means of education, improvement and culture for his fellow-townsmen. Material advantages were also furnished by him to his town. Lincoln, in his valuable "History of Worcester," refers to them as follows: "The site of the County Court-House was bestowed by him, and the building and avenues on the front constructed under his uncompensated direction. No inconsiderable share of the cost of enlarging the square at the north end of the Main Street, and erecting the stone bridge, was given by him. The street bearing his own name, and the spot where the brick school-house has been built were his benefaction to the municipal corporation. In the location and execution of the Boston and Worcester turnpike he assisted by personal exertion and pecuniary contribution, and few local works for the common good were accomplished without the aid of his purse or efforts."

His zeal in the foundation and endowment of the American Antiquarian Society is gratefully remembered by every thoughtful student in the land. Reference to his efforts in that respect will be made at greater length in another place.

NATHANIEL PAINE, graduated at Harvard in 1775, and after engaging in the practice of law at Groton, returned to Worcester, in 1785; became county attorney in 1789 and remained such till his appointment as judge of Probate, in 1801, which lat-

ter office he held till 1836. In 1798, 1799 and 1800 he represented the town in the Legislature.

FRANCIS BLAKE, a graduate of Harvard in the class of 1789, removed to Worcester in 1802 and remained here till his death, in 1817. He was a man of brilliant parts, a distinguished advocate and an orator of great force. In 1810 and 1811 he represented the Worcester District in the State Senate. In 1816 he was appointed clerk of the courts.

DR. JOHN GREEN, SR., a physician of large practice and great reputation, was deeply interested in the political movements of the time and actively engaged in local affairs. He died in 1799.

DR. WILLIAM PAINE, a graduate of Harvard, in the class of 1768, returned to Worcester in 1793 and remained here till his death, in 1833. He was a man of intellectual tastes and of large culture. He was "fellow of the American Academy of Arts and Sciences, member of the Medical, Agricultural, Linnæan, Essex Historical and American Antiquarian Societies."

DR. JOHN GREEN, the second, born in Worcester in 1763, made that his home during life. "He attained to a pre-eminent rank among the physicians and surgeons of our country."

LEVI LINCOLN, son of Levi Lincoln, Sr., graduated at Harvard in 1802 and began the practice of law here in 1805. He was elected State Senator in 1812. From 1814 to 1822, with the exception of three years, he represented Worcester in the Massachusetts House of Representatives. In 1820 he was one of Worcester's representatives to the Constitutional Convention. In 1822 was Speaker of the House of Representatives; in 1823 Lieutenant-Governor; in 1824 associate justice of the Supreme Judicial Court; Governor of the Commonwealth in 1825 upon nomination of both parties, and held the office for nine successive terms, till January, 1834.

JOHN DAVIS, a graduate of Yale College in the class of 1812, was admitted to the bar in 1815; began practice here in May, 1816, and soon rose to distinction in his profession and to the merited confidence of the public. In 1824 he was elected a Representative in Congress, and by successive re-elections till 1834, when he was elected Governor of the Commonwealth.

JOSEPH ALLEN was clerk of courts for thirty-three years, till 1810; was chosen Representative to the Eleventh Congress and was of the Governor's Council from 1815 to 1818. He was a man of scholarly attainments, of great probity and force of character.

DANIEL WALDO, STEPHEN SALISBURY, SAMUEL M. BURNSIDE and BENJAMIN HEYWOOD were men of large affairs. The latter was an original member of the Society of the Cincinnati, and his grandson, John G. Heywood, is to-day the only member of the society from Worcester.

DR. OLIVER FISKE was a noted physician and actively interested in public questions.

DR. ABRAHAM LINCOLN and EDWARD D. BANGS were, together with Levi Lincoln, delegates from Worcester to the convention in 1820 to revise the Constitution of the Commonwealth.

REV. DR. JONATHAN GOING, pastor of the First Baptist Church, was earnestly interested in all educational questions and movements.

REV. DR. SAMUEL AUSTIN, minister of the First Parish from 1790 for twenty-five years, was a man of great influence.

REV. DR. AARON BANCROFT was minister of the Second Parish from 1789 for more than half a century. He was earnestly and actively interested in all measures for the advancement of learning and for the promotion of education. A man of great power and beauty of character, beloved and revered.

Within the limits of this article it is not feasible to mention others and it is not possible to do the remotest justice to those already referred to. In fact, it has not been the purpose of the writer to give any adequate account of those mentioned or to attempt a biography of each: that is done elsewhere by other writers; but the sole aim has been to indicate, by the briefest mention, some of those who gave to Worcester, during this period, their service and their thought. Combined, their power can be better imagined and more clearly conceived than separated under the heads of lawyers, doctors, clergymen, business men, benefactors, etc.

It may be doubted if in any town in Massachusetts of from two thousand to four thousand inhabitants, during a similar period of its history, a greater combination of intellectual force, business sagacity, eminent public service and devoted loyalty can be found.

With such men and such purpose the growth of a town may be expected to be symmetrical, its foundations ample and secure.

BROADENING ACTIVITY.—The town soon began to have a more active care for the general well-being of its inhabitants, and for its own good name; to foster an increasing degree of pride in its citizens, and to contribute more largely to the comforts of life and the ease with which business might be transacted.

In 1786 a petition was presented to the town to purchase a fire-engine, which resulted in the town voting, January 4, 1793, to "grant a sum of money to procure a *good* fire-engine for the use of the town," and shortly after, that an engine-house be built. This action was accompanied by the organization, on January 21, 1793, of the Worcester Fire Society, both, doubtless, largely in consequence of the destruction, on January 4, 1793, of the weaver-shop of Cornelius & Peter Stowell. This society was formed in consequence of "a sense of social duty, for the more effectual assistance of each other and of their townsmen in times of danger from fire." Its membership was limited to thirty. Its character may be inferred from the names of its original twenty-two members: Joseph Allen, John Nazro, Leonard Worcester,

Nathaniel Paine, Samuel Chandler, Ezra Waldo Weld, Dr. John Green, Samuel Brazier, Thomas Payson, Edward Bangs, Dr. Elijah Dix, William Sever, Theophilus Wheeler, Dr. Oliver Fiske, John Paine, Samuel Allen, Stephen Salisbury, Charles Chandler, John Stanton, Dr. Abraham Lincoln, Daniel Waldo, Jr., and Isaiah Thomas. It is in existence at the present time and its history is honorable and unique.

Swine were soon doomed to wander in less conspicuous places than the Main Street of the increasingly tidy town, and in 1792 it was voted that they should not be permitted to go at large on Main Street. The neater and more aristocratic horse and mule still had their privileges unimpaired till 1800, when it was voted that they should not be permitted to go at large, and at the same time all neat cattle, except cows, were relegated to a more private manner of life, while they were given the freedom of the town between April 1st and November 1st. The principal streets of the town in 1783 were Main, what is now Front, part of Summer, Lincoln, Salisbury, Pleasant, Green and Grafton Streets. New streets followed slowly. Mechanic Street was laid out in 1787, and in 1806 Isaiah Thomas constructed and gave to the town the street known by his name. After the swine and cattle were cared for and banished from the streets, the next most dangerous class, apparently, were provided for, and the children and youth were solemnly warned by vote, in 1811, not to engage in the frivolities of rolling hoops, playing ball, etc., in the streets.

The last liberties accorded to the brute creation, it is believed, were in 1815, when the town voted to allow new milch cows to go at large in the day-time, but not at night, "the owners thereof having their names branded on the horns of the cows or a strap around the neck with the name marked thereon, that the owner may be found in case of damage." The lines were somewhat tightly drawn, for it was further provided that "no person shall turn his cow into the highway without first having the written consent of the selectmen, and no person shall have the benefit of turning more than one cow to feed in the highway the present season."

Worcester apparently believed in protection to home products, and the rights of the farmer were not to be sacrificed. As late as 1814 the town voted to "pay the sum of one shilling bounty on crows heads, killed within the town, provided the heads are covered with feathers."

Having thus prepared the way for its new dignity, the town voted in 1814 to name the streets. A general movement was everywhere manifest.

President Dwight in 1812 gave the following description of the town: "The houses are generally well built, frequently handsome, and very rarely small, old or unrepared. Few towns in New England exhibit so uniform an appearance of neatness and taste or contain so great a proportion of good

buildings and so small a proportion of those which are indifferent as Worcester."

The introduction of water for domestic and public purposes was authorized by the following act of the Legislature, and for the purposes of interesting comparison with later acts it is given almost entire:

An Act authorizing Daniel Goulding to Conduct Water in subterraneous Pipes from a Certain Spring in his own Land, within the Town of Worcester, for the accommodation of himself and some other Inhabitants of the said Town.

*Be it enacted, &c.*

SECT. 1. That Daniel Goulding of Worcester in the County of Worcester and his heirs and assigns, be and they are hereby authorized and empowered to sink, place, renew, alter and repair from time to time, as may become necessary, such pipes or conduits of water from the said Spring to such of the inhabitants of the said town as the same may Convene, for the purpose of supplying them with water; and the said Goulding and his heirs or assigns are hereby authorized to place the said pipes in the land of such Proprietors as may, by some proper instrument in writing grant him or them the privilege thereof, as also on and under such public highways, roads or land as may become necessary for the purposes aforesaid and with the least inconvenience to the public.

*Provided* nevertheless that the Selectmen of the said town for the time being may, as they shall judge it expedient, for the purposes of extinguishing fire, or as a precaution or a security against the calamitous effects thereof and under such regulations as they may think reasonable, from time to time make and place Conductors to any part of the said pipes or conduits, for the purpose of supplying water when necessary for the extinguishment of fires as aforesaid.

SECT. 2. Provides remedy for destroying or interfering with said pipes or water works.

SECT. 3. That nothing in this Act shall be considered as an excuse for any unnecessary exposure, damage, delay, disturbance or inconvenience to passengers, carriages or cattle, passing or re-passing over any of said highways or public land, but the same shall be considered as a nuisance or trespass in the same manner as if this Act had never been made.

Passed March 2, 1798.

The town in its corporate capacity and individuals forming a joint stock company, aided by the town, combined to maintain suitable schools. In 1784 Dr. Elijah Dix, Hon. Joseph Allen, Hon. Levi Lincoln, Sr., Nathan Patch, Dr. John Green, John Nazro, Palmer Goulding and others procured a lease of land on the west side of Main Street and erected a building known as the Centre School-house, and opened two schools—one for instruction in the elementary studies and the other for the higher branches of academic instruction. The latter had as instructors many who became distinguished as educators, theologians, lawyers, etc.

The town appropriated in 1799 the sum of one thousand dollars for the maintenance of schools and twenty-five hundred dollars for school-houses, which, by the way, was the first time that the annual appropriation was made in dollars—having been in pounds prior to that time, except in a special appropriation of October 8, 1798. In 1800 ten school-houses were built in various parts of the town. In 1823 a revision of the educational system was made under the thoughtful judgment of Rev. Dr. Bancroft, Rev. Jonathan Going, Hon. Samuel M. Burnside, Levi Lincoln, Otis Corbett and Samuel Jennison.

In 1806 two thousand dollars were appropriated for the construction of a poor-house.

In 1816 a new fire-engine, at an expense of five hundred and fifty dollars, was procured.

A Town Hall was provided for the growing needs of the town, which was dedicated May 2, 1825, with an address by Hon. John Davis. In other ways than by corporate action the town gradually became prepared to enter upon its future career.

In 1804, March 7th, an act was passed by the Legislature incorporating Daniel Waldo, Isaiah Thomas, Daniel Waldo, Jr., Benjamin Heywood, William Paine, Stephen Salisbury, Nathan Patch, William Henshaw, Francis Blake, Nathaniel Paine, Elijah Burbank and others as the president, directors and company of the Worcester Bank, with an authorized capital of one hundred and fifty thousand dollars, which at once began business and was the only bank incorporated in the State at the time west of Boston, except one at Northampton, incorporated a few days previous.

More, perhaps, than any other agency which contributed to the highest culture of the town and fostered a spirit of scholarly research and attainment was the American Antiquarian Society, which owed its existence and largely its maintenance to Isaiah Thomas. In consequence of the petition of Isaiah Thomas, Nathaniel Paine, William Paine, Levi Lincoln, Aaron Bancroft and Edward Bangs to the Legislature, representing that they, "influenced by a desire to contribute to the advancement of the arts and sciences and to aid by their individual and united efforts in collecting and preserving such materials as may be useful in marking their progress not only in the United States, but in other parts of the globe; and wishing also to assist the researches of the future historians of our country, in their opinion the establishment of an antiquarian society within this Commonwealth would conduce essentially to the attainment of these objects," the society was incorporated October 24, 1812. Its library and treasures have always been open to the public, and its influence from the first upon the people of the town must have been potent.

The laudable spirit of the citizens and the foresight with which the bases of business were laid is seen also in the application for the incorporation of the Worcester Mutual Fire Insurance Company. It was incorporated February 11, 1823. Manufactures were slowly increasing and seeking firm foothold. The town only needed closer relations of traffic and intercourse with larger centres of population and business to begin a rapid ascent in wealth and influence. The opening opportunity came with the construction of the Blackstone Canal.

**POLITICAL SENTIMENT AND SERVICE.**—The constant and earnest interest which the town manifested in national political movements, the bitter animosities caused by party struggles, are not peculiar to Worcester, and an entrance upon them is perhaps unnecessary and undesirable. A brief mention of one

or two important events, typical in their nature, must suffice.

*First: the decision of the court that declared slavery abolished in Massachusetts*, was made at Worcester in the case of *Nathaniel Jennison vs. John and Seth Caldwell*, in which the elder Levi Lincoln was counsel with Caleb Strong for the defendants, and presented the argument that was sustained by the court. The suit was brought for enticing away the plaintiff's slave "Quock" Walker, was tried in the Court of Common Pleas and judgment rendered for the plaintiff for twenty-five pounds; appealed to the Supreme Court and tried at the September term, 1781, and judgment for defendants on the ground that since the adoption of the Constitution in 1780 slavery did not exist in Massachusetts. The judges who presided at this trial were Justices Sarjeant, Sewall and Sullivan. An indictment was found at Worcester against the above-named Jennison for assault on Walker, which was tried at the April term, 1783, of the Supreme Court before all the justices, including Chief Justice Cushing, and the view adopted by the court in the first-named case was confirmed by the whole court and forever set at rest the question of the existence of slavery in Massachusetts. The census of 1790 contains no return of slaves in this State.

*Second: The protest against the War of 1812.*—A convention, consisting of delegates from forty-one towns, was held at Worcester on the 12th and 13th of August, 1812, to protest against the continuance of the war.

Worcester was represented by Hon. Benjamin Heywood, Hon. Francis Blake and Mr. Elijah Burbank. Hon. Benjamin Heywood was chosen chairman. A committee was appointed to "consider and report what measures the Convention ought to adopt, in the present perilous situation of our Country, to mitigate the calamities of the present War with Great Britain, to avert the further evils with which we are threatened, to accomplish a speedy and honourable Peace and to arrest the course of that disastrous policy, which, if persisted in, cannot fail to terminate in the destruction of the rights and liberties of the people."

The committee consisted of Andrew Peters, Esq., Hon. Francis Blake, Rev. John Crane, Hon. Solomon Strong, Aaron Tufts, Esq., Benjamin Adams, Esq., General James Humphrey, Rev. Jonathan Osgood, Nathaniel Chandler, Esq., John W. Stiles, Esq., and Colonel Seth Banister.

This committee made a report on the 13th, which, after dealing at great length with the causes which led to the war, the measures undertaken to continue it, the state of commerce resulting from it, continued as follows:

We earnestly embrace the present occasion to express for ourselves and in behalf of our constituents a strong and ardent attachment to the Union of the States, and indiguantly to disclaim every imputed design to aid in any project which may tend to procure a separation.

To shorten the duration of the present most impolitical and destructive War, we earnestly exhort the friends of Peace to withhold from the Government all *voluntary* aid and to render no other assistance than is required of them by the laws and the Constitution.

They proceed to say, that if double duties or direct taxes are laid, "we do not, like some men, now in high authority, advise our Constituents to refuse the payment of them and to rise in opposition to the authority by which they are imposed. But if our rulers, afraid to hazard their popularity by the imposition of taxes, request of the citizens to enable them to prosecute this unrighteous War by loaning money to replenish the treasury, we entreat them, as they value the Peace and welfare of their Country, to remember that we have as yet no French emperor among us to force a loan at the point of the bayonet and to refuse the smallest contribution for this unwarrantable purpose."

*Third: The opposition to the extension of Slavery.*—Missouri applied for admission to the Union, and in December, 1818, the Missouri question formally appeared in Congress. In the House of Representatives a motion was made to amend the act by providing that "the further introduction of slavery be prohibited in said State of Missouri and that all children born in the State after its admission to the Union shall be free at the age of twenty-five years." The House adopted the amendment, but the Senate rejected it, and the House refusing to recede, the bill was not passed at that session.

A strong sentiment against the extension of slavery was aroused in the free States, and Worcester and Worcester County were determined to be heard. A convention of the opponents of slavery extension was held in Worcester December 9, 1819.

The following account of the Anti-Slavery Extension Convention appeared in the *Massachusetts Spy* of December 15, 1819:

#### VOICE OF THE PEOPLE!

On Thursday, the 9th of December inst., agreeably to previous notice, a large number of respectable citizens of the County of Worcester assembled in the Court House in this town, for the purpose of expressing their opinion upon the propriety of preventing the further introduction of slavery into such States as may hereafter be admitted into the Federal Union.

The meeting was organized by the choice of Hon. Solomon Strong as chairman and Levi Lincoln, Jr., as secretary. The Rev. Dr. Bancroft addressed the meeting, and expressed his deep sense of the importance of the subject to the character and interests of our country, and its connexion with the cause of religion.

Mr. Burnside moved that a committee be appointed to prepare resolutions expressive of the sense of this Convention upon the subject of the toleration of slavery in the country west of the Mississippi.

Hon. Oliver Fiske, Isaac Goodwin, Esq., Edward D. Bangs, Esq., Bezaleel Taft, Jr., Esq., and Samuel M. Burnside, Esq., were appointed on the committee. The meeting was then adjourned till the next evening to receive the report of the committee.

On Friday evening the meeting was opened according to adjournment. The Hon. Oliver Fiske, chairman of the committee, presented a report, consisting of the following Preamble and Resolutions, which (after a very impressive and eloquent address from the Hon. E. H. Mills, of Northampton, a member of the last Congress, and some pertinent observations from John W. Hubbard, Esq., of this town) were, on motion of Hon. Seth Hastings, unanimously adopted.

"WHEREAS, In the opinion of this meeting, by the unequivocal spirit

and language of the Federal Constitution (exemplified by the adoption of the Ordinance of 1787, and by subsequent acts and provisions), Congress possess the power of prescribing the terms on which new States to be created from a territory, not a party to the original compact, may be admitted into the Union; and

"WHEREAS, The voluntary admission of slavery, as a condition, would be a departure from the wise and liberal system of our National Government, and abhorrent to that spirit of freedom so illustrious in our institutions; and

"WHEREAS, The extension of slavery would be dangerous, in common, to those States who, in their compact, acted under an implied security, that the moral and political evil of slavery, though not abolished, would never be extended; and who, by the act of admission of new States, are solicitous to transfuse the spirit and blessings of independence which they possess and are bound to guarantee the rights they enjoy—the first of which being a *republican form of government*; and

"WHEREAS, More especially it would be inconsistent, if not *unjust*, to extend a privilege to new States, formed from a territory acquired by *purchase*, which has been withheld from those created within the original limits of the United States by an express article in the ordinance of 1787, which ordinance has since been sanctioned by Congress and has become a permanent law. Therefore

"Resolved, That those members of the last Congress who with zeal and perseverance opposed the *extension of slavery* are entitled to the gratitude of the friends of morality, of religion and the republican character of the United States, and that we deeply regret that any members, especially from those States whose Constitution and laws prohibit slavery, and whose constituents deprecate its practice, should have felt it their duty to give it countenance and support.

"Resolved, That this Meeting most earnestly request their Representatives in Congress to use their unremitting exertions to prevent the sanction of that honorable body to any further *extension of slavery* within the extending limits of the United States—more particularly in giving a precedent in the case of the admission of Missouri—a precedent which in future may be the means of depopulating the vast wilds of Africa and rendering our boasted Land of Liberty pre-eminent only as a *Mart for Human Flesh*!

"Resolved, That the foregoing Preamble and Resolves, subscribed by the Chairman and Secretary, be transmitted to the Hon. Messrs. Adams and Kendall as expressing the sentiments of this meeting."

MISCELLANEOUS.—*Washington's Second Visit to Worcester.*—In the autumn of 1789 President Washington made a tour through New England, and passed through Worcester on his way to Boston, coming from Springfield through Palmer, Warren, Brookfield, Spencer and Leicester. Of his visit here the following account is taken from Wall's "Reminiscences of Worcester." "Information being received in Worcester during Thursday evening that Washington would be here the next morning (October 23, 1789), a company of respectable citizens, about forty in number, paraded before sunrise, on horse-back, and went out as far as Leicester line to welcome him into the town. The Worcester Company of Artillery, commanded by Major William Treadwell, were already assembled, on notice being given that Washington was approaching, and before he reached here five cannon were fired for the New England States, 'three cannon for the three States in the Union,—one for Vermont, which will be speedily admitted, and one as a call to Rhode Island before it is too late.' When the 'President General' had arrived in sight of the meeting-house (the Old South Church), eleven more cannon were fired. Washington viewed with great interest and attention the Artillery Company as he passed and expressed to the inhabitants his sense of the honor done him. He stopped at the 'United States Arms'

(now Exchange Hotel), where he took breakfast, and then proceeded on his journey. To gratify the inhabitants, he politely passed through the town on horse-back. He was dressed in a brown suit, and pleasure glowed in every countenance as he came along. Eleven more cannon were fired as he departed. The party of forty citizens before-mentioned escorted him a few miles from the village, where they took their leave. The route travelled was up Lincoln Street, across the upper end of Long Pond, by the old road, through Shrewsbury," etc.

*Funeral Honors to Washington.*—In common with so many towns, not only in the State, but throughout the country, Worcester paid its deep homage to the memory of Washington, and put in the hands of every family, in enduring form, the record of its appreciation.

The *Massachusetts Spy* of February 26, 1800, gives the following account of the funeral honors paid to Washington by the citizens of Worcester: "On Saturday the inhabitants of this town joined in the national honors paid to the memory of our illustrious Washington. At eleven o'clock the procession formed at the Court-house agreeably to the order published in our last paper. The male youth from eight to eighteen amounted to two hundred and fifty—an impressive sight. The whole number was not less than seven hundred. With solemn music they moved to the South Meeting-house, the pulpit of which was covered with black broadcloth. After a grave and pathetic piece of music the Rev. Mr. Austin addressed the Throne of Deity in a devout and appropriate prayer; this was succeeded by music, when the Rev. Mr. Bancroft pronounced an eulogy on the character of the deceased Hero and patriot of America, which we think, at least, one of the best we have seen or heard on the subject. The solemnities closed with music. The serious attention, the solemn appearance of the audience through every part of the exercise, witnessed that every heart felt the loss his country had sustained and gave an *amen* to the truth of the virtues which the eulogist portrayed.

"The town returned their thanks to the orator, requested the oration for the press and voted that every family should be furnished with a copy at the town's expense."

*Lafayette's Visit.*—On September 4, 1824, Lafayette visited Worcester, breakfasted with the Hon. Judge Lincoln, from whom he received an address of welcome, and to which he replied in earnest words. A full account of the interesting occasion may be found in "Reminiscences of Worcester."

#### SECOND PERIOD.

From the opening of the Blackstone Canal to the incorporation of Worcester as a city.

**THE BLACKSTONE CANAL.**—The first attempt at procuring water communication between Worcester

and Providence originated with citizens of the latter place, notably John Brown, about 1796; surveys were made and acts of incorporation for a canal company sought from Rhode Island and Massachusetts. The former State soon passed the act required.

A petition from citizens of this county to the Legislature of Massachusetts, praying that incorporation might be granted for the opening of "inland navigation from the navigable waters near Providence to the interior parts of Worcester County, and, if feasible, to Connecticut river," was presented at the May session, 1796. A project was at the same time started, "which had the effect, if not the intent, of defeating the former," of constructing a canal from Boston to the Connecticut River. Incorporation was refused for the canal to Providence.

The project was revived, however, in 1822, and meetings were held early in that year here and in Providence with a view to speedy action. Committees were appointed, funds for survey were obtained. Benjamin Wright, chief engineer upon the middle section of the Erie Canal, was secured to make a survey and an estimate of cost of construction. These were completed in September of that year, and report thereof made.

January 14, 1823, our Legislature passed an act incorporating "John Davis, Wm. E. Green, John W. Lincoln, Lemuel Davis, Edward D. Bangs, John Warren, John M. Earle, Dan'l Waldo, Isaiah Thomas, Rejoice Newton, Reuben Sikes, Oliver Fiske, Theophilus Wheeler, John Green, Asa Hamilton, Benj. F. Heywood," their associates, &c., under the name of the Blackstone Canal Company, with authority to "locate, construct and fully complete a navigable canal commencing in or near the village of Worcester." . . . "to the boundary line between Massachusetts and Rhode Island." A similar act was passed by Rhode Island, authorizing the construction from tide-water to the boundary between the two States. These corporations were subsequently united, the Massachusetts act authorizing it being passed February 20, 1827.

In 1824 the work of excavation was begun in Rhode Island, and in 1826 in Massachusetts near Thomas Street, in this town.

The first boat arrived in Worcester October 6, 1828. Freight-boats came as far as Uxbridge October 18th, and soon thereafter to Worcester. The cost was about seven hundred and fifty thousand dollars.

The sanguine expectations which were here entertained of the effect of the construction of the canal upon Worcester are illustrated by the following extract from the address of the Hon. John Davis at the dedication of our Town Hall in 1825:

The town, unaided by any particular advantage except that of being the Centre of a thrifty and enterprising population, has risen in wealth and numbers to a degree almost unequalled in the interior of New England. It is now in its youth, and its growth is vigorous and healthy. What will be its future destinies remains to be disclosed by time. Should it become the head of inland navigation, hence to the waters of the

Narragansett, it is safe, without the gift of prophecy, to predict that this valley will be covered with population, and the exhilarating hurry and bustle of trade will pervade places that are now under the peaceful dominion of the farmer; the spires of new temples, dedicated to the worship of God, will rise up to greet the eye of the beholder; the mechanic arts, under new combinations of capital and skill, will take deeper and stronger root; the fine arts will find an abode among us; and our hills, under a better cultivation, will put on a gay and more beautiful attire. This auspicious event, we have great reason to believe, is near at hand. The scruples of the most incredulous seem now to be removed, and if we pursue it steadily there is little doubt of its being accomplished.

It is doubtful if the results so confidently looked for would have come in their fulness as the sole effect of the canal, but unquestionably great results did follow. The whole Blackstone Valley was stimulated, new villages sprung up, new industries were started, the water-power was utilized, a new outlet for Worcester products was created, closer business relations were maintained between Worcester and Providence and the seaboard, on the one hand, and between Worcester and the surrounding country on the other. But, more important still, Worcester was made more emphatically a distributing centre for imports over the canal.

A comparison between the number of tons transported each year by means of the canal to and from Worcester is exceedingly instructive: To Worcester, in 1831, 4300 tons; 1832, 4400 tons; 1833, 4663 tons; 1834, 5336 tons; 1835, 4694 tons.

From Worcester in 1831, 808 tons; 1832, 890 tons; 1833, 848 tons; 1834, 826 tons; 1835, 739 tons. The amount of tolls collected increased from \$1000, in 1828, to \$16,464.45 in 1834, which was the highest reached in any year. It gradually declined from the latter year until the last toll was collected in 1848. Between 1825 and 1835, when the Boston and Worcester Railroad was opened, the population of Worcester had increased from 3650, in the former year, to 6624 in the latter—a much greater increase in those ten years than in the previous sixty years.

In valuation the town had increased from \$2,437,550, in 1825, to \$3,667,250 in 1835.

OPENING OF RAILROAD COMMUNICATION.—Previous to the opening of the canal the trade of Worcester had been largely with Boston. The effect of easier freight communication with Providence had since then tended to divert its trade from Boston. But it was not only Worcester's trade that was diverted, but, practically, Worcester County's trade. Unquestionably this fact had its influence in hastening the construction of the Boston and Worcester Railroad.

That railroad was incorporated June 23, 1831, and was the first of any length in the State. It was completed and opened for public travel July 4, 1835. A grand celebration took place here on July 6th. A train of twelve cars arriving here at one o'clock brought the directors and a large number of stockholders. The arrangements for the celebration were under the direction of a committee of which Hon. Charles Allen was chairman. The visitors were escorted to the Town Hall, where ex-Governor Levi Lincoln presided,

and speeches were made by Governor John Davis, Governor Everett, Chief Justice Artemas Ward, Hon. A. H. Everett, Hon. Julius Rockwell and others. The terminus of the road was on Foster Street, near Main. Passenger cars ran three times daily each way, occupying about three hours for the trip. The fare was \$1.50 at first, but was raised the next year to \$2.00.

The Western Railroad was completed from Worcester to Springfield in 1839, and trains began running on October 1st of that year. The road was completed to Albany in 1841.

The Norwich and Worcester Railroad was opened for the running of through trains April 1, 1840.

The Providence and Worcester Railroad was finished and trains began running October 25, 1847, and on November 4th of that year the event was celebrated here. Ex-Gov. Davis welcomed the visitors; after which a banquet was served in Brinley Hall, at which Governor Lincoln presided, with Governor Davis, Judges Charles Allen, Emory Washburn and Thomas Kinnicutt and Hon. Stephen Salisbury as vice-presidents. Speeches were made by John Barstow, president of the road; United States Senator Simmons, of Rhode Island; Mayor Burgess, of Providence; President Wayland and Professor Gammell, of Brown University; President Nathan Hale, of the Boston and Worcester Railroad; Hon. George Bliss, of Springfield, for the Western Railroad; Judges Allen, Washburn and Kinnicutt, Governor Davis, Hon. Stephen Salisbury, and others.

Worcester thus rapidly became a great railroad centre and appropriately the "heart of the Commonwealth."

Population and wealth increased with extreme rapidity. Population in 1840, 7497; 1845, 11,556; 1848, 15,000 about. Valuation in 1840, \$4,288,950; 1845, \$6,004,050; 1848, \$8,721,100.

GENERAL PROGRESS.—It was probably in this period that Worcester began to be known as the "Heart of the Commonwealth." That designation was undoubtedly first applied to Worcester County. The first mention of it in print which I have been able to find, as applied to the county, is in the *Spy* of October 12, 1831, in which the county is referred to as being "as justly entitled to the appellation of the 'Head of the Commonwealth' in agricultural improvement, as it is to that of the 'Heart of the Commonwealth' from its local situation."

Warwickshire, the central county of England, was thus denominated by the poet Drayton in 1613: "That shire which we the 'Heart of England' call." And perhaps some scholarly son of Worcester County appropriated it from Drayton to his own beloved county. But clearly the town soon began to covet the title, and with such success that the county was forced, either in love or from necessity, to resign all claim to it.

I have been unable to find any earlier documentary title for the town to it than in a quaint book, entitled

"Pictorial Views of Massachusetts for the Young," published at Worcester in 1847 by Warren Lazell, where the town is referred to as follows: "Being in the centre of the interior county of the State, and containing a fertile soil and a population noted for industry, intelligence and wealth, this town has long been denominated the 'Heart of the Commonwealth.'" The adoption of that emblem by the city in its seal, confirmed its title to it by *adverse user* against all claimants.

The first "Village Directory" was published in 1829 by Clarendon Harris, whom we, of this generation, remember with great respect and affection. It purported to contain "the names of the inhabitants, their dwelling-houses and places of business arranged according to streets and squares." It contains two hundred and ninety-seven entries or numbers, divided as follows among the only streets given: Lincoln Square and Main Street, 106; Summer Street, 20; School Street, 20; Thomas Street, 12; Central Street, 4; Mechanic Street, 25; Pleasant Street, 7; Front Street, 25; South Street, 15; Green Street, 27; Washington Square, 8; Grafton Street, 16; Middle Street, 7; Prospect Street, 5.

The next directory was published in 1843, and the issue has continued successively each year since.

The town began to move with quick step along the various paths that led to the city of Worcester. With the rapid increase in wealth and population came the necessity for ampler expenditure on the part of the municipality. Methods adequate for the little country village were not sufficient for the now important town. The modest requirements of the former generation were insufficient to properly satisfy the growing needs of the great central town. Municipal comforts and even elegancies must be provided. First of all, the darkness of the streets at night must be relieved. A lamp association was formed, and in 1833 the town voted an appropriation for the purpose of lighting the lamps of the association. In 1834 the town voted that the selectmen be requested to petition the Legislature for authority to establish a Fire Department, and on February 25, 1835, necessary authority having been obtained, the Worcester Fire Department was established.

In 1832 a commodious brick school-house was built on Thomas Street, and in 1837 there were twelve districts and an appropriation of seven thousand dollars for schools, which included two thousand five hundred dollars for the Centre District.

The Worcester Manual Labor High School was incorporated in 1834 and dedicated June 4th of the same year. Its organization was largely due to the efforts and munificence of the Hon. Isaac Davis.

Mount St. James Seminary (now Holy Cross College) was also established. The State Lunatic Hospital was located here and portions of its building constructed respectively in 1831, 1835 and 1836.

The only means, prior to 1845, for supplying water

were through the Daniel Goulding Aqueduct, but in that year the Legislature, by Chapter 90, provided that

The Inhabitants of the Centre School District in the town of Worcester, as the limits of said district are now defined, are hereby made a corporation by the name of the Worcester Aqueduct Company, for the purpose of constructing and maintaining an aqueduct to conduct water from Bladder pond, in said town, to said district, for the extinguishment of fires and for other uses; and also that the corporation might vote to raise money, the amount to be assessed upon the polls and estates of the inhabitants of said district and collected by the town.

A board of managers, consisting of Stephen Salisbury, Isaac Davis, Wm. A. Wheeler, Henry W. Miller and Samuel Davis, was appointed. Pipes were laid through Prospect, Thomas, Main, Park, Salem, part of Mechanic, Pleasant and Elm Streets, in all about two miles, with fifty-six hydrants. The town paid to the corporation five hundred dollars yearly. In 1847 the pipes were extended about two miles.

The town, in anticipation, perhaps, of its future patronage of music, sought its inspiring and educating influence, and in 1846 voted to give the Worcester Brass Band permission to erect a stand upon the Common and play once a week after July 1st.

One unique fact should be referred to. In 1837 the surplus revenue of the United States was divided among the States and towns, and Worcester received its proportion.

The town voted May 1, 1837, to receive from the treasurer of the Commonwealth its proportion of the surplus in deposit, with the agreement to pay it back when demanded. The receipt of the same is thus recorded: "Tuesday, May 2, 1837. The town received from the treasurer of the Commonwealth \$6084.39, being the two first instalments of this town's proportion of the surplus revenue of the United States."

On July 20th of the same year the town received the additional sum of \$4526.52, being the third instalment.

Worcester was no longer dependent upon one bank. Before incorporation as a city it had, in addition, the Worcester County Institution for Savings (established 1828); the Central Bank (1829); the Quinsigamond (1833); the Citizens' (1836); the Mechanics' (1848). Insurance companies were multiplied: the Manufacturers' Mutual Fire (1834); State Mutual Life (1844); Merchants' and Farmers' (1846); and People's Mutual Fire (1847).

Manufactures became established, inventive genius was stimulated, water-power was increased, steam-power was introduced, industries were multiplied, all without the aid of foreign capital. In the "Directory" of 1848 the unique fact is stated in these words: "All the business is done by private capital; there is not a single corporation concerned in the management of labor of this town."

Worcester was no longer compelled to resort to Boston newspapers for the daily news. The *Worcester Daily Transcript* was issued June 9, 1845, by Julius L. Clarke, editor and proprietor.

The *Spy* followed quickly, and issued its first daily July 1, 1845. John Milton Earle was its editor and proprietor.

WORCESTER INFLUENCE.—Worcester furnished, during ten years of this period, from its citizens two Governors for the Commonwealth—Levi Lincoln (from 1828 to 1833 inclusive), and John Davis (in 1834 and 1835, and again in 1841 and 1842). Indeed, it is an exceptional fact not only that the Governor of the State from 1825 to 1835 inclusive should have come from this town, but more significant that one should have immediately succeeded the other. The claims of "locality" must have had less influence then than in some years.

The interchange of offices, by the will of the people, between these two notable men was equally striking. Levi Lincoln was elected to Congress to fill the vacancy caused by the election of John Davis as the successor of the former as Governor. Lincoln remained a member of Congress until he resigned in 1841, when he was appointed collector of the port of Boston by President Harrison. In 1844 and 1845 he was in the State Senate (the latter year as president), and in 1848 was elected Worcester's first mayor.

Governor Davis also remained in public life, serving as United States Senator from 1838 to 1841; again as Governor for two years (1841 and 1842); and again from 1845 to 1853 as United States Senator.

PLINY MERRICK was district attorney for the Middle District from 1832 until 1843, having previously been county attorney from 1824. From 1843 to 1848 he was judge of the Court of Common Pleas, in which latter year he resigned, and accepted the position of president of the Worcester and Nashua Railroad.

Worcester had during a portion of this period another distinguished citizen upon the bench of the Court of Common Pleas. EMORY WASHBURN was appointed judge in 1844, and remained till December, 1847, when he resigned. He had, prior thereto (in 1841 and 1842), been a member of the Massachusetts Senate.

CHARLES ALLEN was also one of the judges of the Court of Common Pleas from 1842 to 1844, when he resigned. In 1847 he was nominated judge of the Supreme Judicial Court of the Commonwealth, but declined the honor.

Worcester furnished judges of Probate for the county during this entire period, in the persons of Nathaniel Paine till 1836; Ira M. Barton, from 1836 to 1844, and Benjamin F. Thomas, from 1844 to 1848.

In 1834 GEORGE BANCROFT, a native of Worcester, son of Rev. Dr. Aaron Bancroft, published the first volume of his masterly "History of the United States." Though at that time he had ceased to be a resident of Worcester, still Worcester would not surrender a qualified proprietorship in him, and viewed with paternal satisfaction the fame of her son.

These are not names only: they were intellectual and political forces. However true it may be that

the real forces in the progress of a free people lie deeper than the surface, that the abiding principles of justice, sobriety, independence and morality must permeate the whole body and constitute an elevating and propelling power, yet, at least, it must find its expression. Its "Amen" follows the declaration of its faith, and does not precede it. There must be the "unity of spirit," and thus the words of the faithful leader are the embodiment of the thought and aspirations of the mass.

In this interesting period of the nation's history the people of Worcester were not idle spectators; her strong men were not apathetic listeners; they were fearless and determined actors.

The continued attempt of the slave States to enlarge the slave-holding territory of the Union was met at the North by a sentiment of vigorous opposition, moving, however, upon somewhat different lines. The American Anti-Slavery Society was organized at Philadelphia in 1833. It had for its object the entire abolition of slavery. Local societies were formed in the free States. The Worcester County South Division Anti-Slavery Society held its first meeting at Worcester, February 15, 1838. Among its first officers from Worcester were Lewis Chapin, vice-president; Edward Earle, secretary; Ichabod Washburn, one of its counselors; Samuel H. Colton, treasurer; and Geo. M. Rice, one of the committee to establish other anti-slavery societies.

Meetings began to be held by it with considerable frequency, at which addresses were made and resolutions adopted, which had a powerful effect in shaping public opinion; but, nevertheless, they and those sympathizing with them to the full extent of their views were in the minority.

The great majority of the people regarded slavery as a blight and a curse, but directed their efforts mainly to prevent the acquisition of any more slave territory or the admission of more slave States.

The proposed annexation of Texas, with its vast area, was stoutly opposed by well-nigh the whole population of Worcester and Worcester County.

A convention was held at Worcester May 6, 1844, of those opposed to the annexation. It was called to order by Hon. John W. Lincoln, of Worcester. Hon. Isaac Davis was one of the vice-presidents. Worcester was largely and strongly represented among the speakers. Charles Allen, Gov. Lincoln, Emory Washburn, Samuel M. Burnside, John Milton Earle and others expressed Worcester's attitude in no uncertain way.

Indeed, a considerable time prior to this, on December 5, 1837, a convention of the ministers of the Gospel of the county was held in Worcester to take action with reference to slavery. It was adjourned to January 16, 1838, when resolutions in earnest condemnation of slavery were adopted. Their spirit may be judged by the following expression of purpose: "In order to arrest attention, awaken interest, arouse

the public conscience at the North and the South, and thus, as far as in us lies, bring into action a train of holy influences which, with the blessing of Almighty God, shall result in the total removal of this evil from our land."

No more secure stronghold of liberty existed in Massachusetts, or at the North, indeed, than Worcester and Worcester County. It was not surprising, then, that from Worcester should come the voice that summoned to the Free-Soil party the earnest friends of freedom, no matter what their former party affiliations had been. Charles Allen was the natural product of Worcester's free soil and free ideas.

An exceedingly interesting case was tried at Worcester at the January term, 1840, of the Court of Common Pleas, relating in some remote measure to the slavery agitation. Dickenson Shearer and Elias M. Turner, both of Palmer, were indicted here for kidnapping a colored boy by the name of Sidney O. Francis, with intent to transport him out of the Commonwealth, and to sell him as a slave. Pliny Merrick, for the Government, is said to have managed the case with great ability. Ira M. Barton, of Worcester; Mr. Chapman, of Springfield, and Hon. Isaac C. Bates (soon thereafter United States Senator), of Northampton, appeared for the defendants. Worcester was an exceedingly poor place to attempt such an act as these defendants committed. A Worcester County jury convicted both. Shearer was sentenced to the State Prison for seven years and Turner (a boy) was sentenced for eighteen months.

The last Board of Selectmen consisted of F. W. Paine, Horatio N. Tower, Ebenezer H. Bowen, Jonas Bartlett and Albert Tolman. The days of the township were nearly passed. Its varied and multiplied municipal interests could better be regulated through the instrumentality of city government.

November 8, 1847, on motion of J. Milton Earle, it was voted that a committee of ten be appointed to draw up and present to the Legislature a petition for a city charter. The committee was composed of the following: Levi Lincoln, Stephen Salisbury, Ira M. Barton, Isaac Davis, Benjamin F. Thomas, Edward Earle, James Estabrook, Alfred D. Foster, Thomas Kinnicutt and Ebenezer L. Barnard. This committee was successful in securing the desired act, which was approved by Governor Briggs February 29, 1848. The act was accepted by vote of the inhabitants on March 18, 1848, and the first city government was inaugurated April 17, 1848.

### THIRD PERIOD.

The same sagacity and political wisdom which Worcester as a town had so often and so invariably shown continued to direct and dominate her as a city in the selection of her municipal officers. The same sacrifice which her citizens had so often shown in relinquishing personal preferences and abating

private interests continued to animate them. The organization of the various departments of a new city, the proper adaptation of suitable methods to new conditions, the introduction of orderly and accurate systems all require earnest thought, active vigilance and laborious devotion.

With rare wisdom the choice was first made. Levi Lincoln, with the education and tastes of a scholar, with the experience and statesmanship resulting from long service in Congress and as Governor of the Commonwealth, with the judgment and prudence derived from connection with large business interests, was selected as Worcester's first mayor.

In her first Board of Aldermen were Benjamin F. Thomas, judge of Probate; Isaac Davis, with his legal and financial ability; Stephen Salisbury, eminent in learning and skilled in finance; John W. Lincoln, for many years chairman of the Board of Selectmen, a man of sound judgment and held in great respect; Parley Goddard, James S. Woodworth, James Estabrook and William B. Fox, all men of tried capacity, and held in high esteem. With mature judgment the various departments were organized, and with conservative and watchful care the finances were regulated. To the mayor and aldermen of that first year Worcester is greatly indebted. They labored with intelligent and untiring zeal. Eighty-four meetings of that board were held during the year, and the greater portion of the measures and ordinances adopted had their initiative with them. Isaac Davis was chairman of the Committee on Finance, and with such watchfulness did he and his associates upon that committee regulate the financial affairs of the new city, that the expenditures were but \$65,389, the tax but \$5.34 on \$1000 and the debt reduced.

With no boastfulness it can be said that few cities, if any, in the Commonwealth, have during any period of their existence been favored with mayors of greater ability than was Worcester in its early years. When among them may be named Levi Lincoln, Henry Chapin, Peter C. Bacon, Isaac Davis, Alexander H. Bullock, W. W. Kice, P. Emory Aldrich and D. Waldo Lincoln, we doubt if any citizen of the Commonwealth will question it. Most certainly no educated citizen of the State need ask as to any one of them, Who was *he*? What did *he* ever do?

Distinguished and honored service in the gubernatorial chair, upon the bench, in Congress, at the bar and in the management of one of the great railroads of the country have made their names known at least through the Commonwealth.

The city was equally fortunate during the same time in its choice of legal advisers. Among its solicitors were lawyers of great eminence,—Henry Chapin, Peter C. Bacon, Charles Devens, Jr., Dwight Foster and George F. Hoar. Its other important officers were, in the main, as wisely chosen.

Shortly after the new government was organized the Worcester and Nashua Railroad was completed.

Its first train ran December 18, 1848. The Fitchburg and Worcester Railroad was opened in February, 1850. Thus in the mid year of the century Worcester was the radiating centre of six railroads.

Its population in 1850 was 17,049. Its valuation in the same year was \$11,082,501. The ratio of increase in population during the decade from 1840 was 128 per cent., and in valuation during the same period 158 per cent.

No wonder that Mayor Chapin, in his inaugural address in 1850, should say, "What is to be the extent of our population no one can foresee. We have come to our growth so many times that the prophets have lost their reputation, and we stand where nature and art both combine to make us a great inland city. Year by year the hum of industry grows louder and the footsteps of an increasing population are more distinctly heard."

No wonder that the philosophic mind of the great lawyer, Hon. Peter C. Bacon, should seek to trace its cause. In his inaugural address as mayor in 1851, among other causes to which he attributes the surprising growth, he says, "not inconsiderably are we indebted for this increase to the superior excellence of our admirably organized and efficiently conducted school system and to our educational advantages, which have attracted vast numbers to a residence amongst us. . . . But the proximate and most efficient cause in the production of these grand results is to be sought in the introduction of railroads, which has made Worcester the centre and focus of no less than six converging railroads, thus affording to us facilities of communication not, perhaps, possessed or enjoyed by any other inland city in the world of no greater extent or population."

Although, perhaps, a diversion, I cannot permit this opportunity to pass without calling more special attention to this admirable address of Mayor Bacon. It evinces profound thought, it covers a wide range of topics, many of them rarely discussed at such a time; it announces with fearlessness the result of his deep moral convictions and his intended action as a consequence thereof, and I have no hesitation in pronouncing it the most able address ever made by a mayor of Worcester to its City Council.

The decade from 1850 to 1860 was marked in Worcester by a steady and symmetrical growth. The population increased to 24,973, and the valuation to \$16,406,900. Municipal taxes had increased from the modest \$65,000 of 1848 to \$119,067 in 1860. The rate of taxation was still low, it being only \$8 on \$1000 in the latter year.

The year 1868 marks the close of this period. In 1865 the population was 30,058; valuation, \$18,937,800; rate of taxation, \$17 on \$1,000; municipal taxes, \$222,047.51. In 1868: population, 36,687; valuation, \$26,220,260; municipal expenditures, \$297,069.

The city in 1848, when the Town Hall had become the City Hall, evidently did not propose to have the

same liberties taken with the exterior of the structure, now that it was thus ennobled, as had formerly been the case. The City Council, accordingly, in 1848 by vote directed the city messenger to place upon the exterior walls of the building the following notice: "Stick no bills on this Building."

No political flag could flaunt itself over any of the streets without due permission. October 13, 1851, the Council voted to permit a flag to be suspended over Main Street from the Whig headquarters at the corner of Main and Central Streets, and within a few days, upon petition of the Democratic Committee, a similar favor was granted it.

The hall in the City Hall was the principal one in the city till Mechanics' Hall was completed, in 1857, which is one of the most beautiful and spacious halls in the State.

In 1855 an attempt was made to procure a lot of land on which to erect a new City Hall. The lot on the corner of Main and Pleasant Street was sought, but upon report of the committee that the price asked was \$52,000, the subject was dropped and the Town Hall of 1825 remains the City Hall of 1889.

Telegraph wires were first strung in the city in 1849.

The works of the Gas-Light Company on Lincoln Street were completed in 1849, and gas furnished in November of that year.

Buildings were numbered in accordance with the vote of the City Council in 1848.

In 1862 the floating bridge over Lake Quinsigamond was supplanted by the construction of a solid causeway at an expense of \$25,997.

The first recommendation for the establishment of a Public Library was made by Mayor Bacon in 1851. It was established through the munificence of Doctor John Green in 1859.

In 1856, in compliance with the recommendation of Mayor Isaac Davis, a superintendent of public schools was first elected. In the same year the "New Common" or "Elm Park" was improved and a new street built from Elm to Highland Streets, adjacent to the park. Prior to this time the only park in the city was the "Old Common" or "Central Park," which had been such from time immemorial.

In 1863, Ex-Mayor Isaac Davis offered to the city a deed of fourteen acres on the shores of Lake Quinsigamond for a park, but the City Council rejected it. It was reserved for his son, ex-Mayor Edward L. Davis, to renew the offer many years after, which was gratefully accepted.

The first horse railroad was opened for the carriage of passengers from Lincoln Square to New Worcester, August 31, 1863.

The mayors during this period were as follows: 1848, Levi Lincoln; 1849-50, Henry Chapin; 1851-52; Peter C. Bacon; 1853-54, J. S. C. Knowlton; 1855, George W. Richardson; 1856, Isaac Davis; 1857, George W. Richardson; 1858, Isaac Davis;

1859, Alexander H. Bullock; 1860, W. W. Rice; 1861, Isaac Davis; 1862, P. Emory Aldrich; 1863-64, D. Waldo Lincoln; 1865, Phinehas Ball; 1866-68, James B. Blake.

During this time the city had lost none of its influence possessed in former years, but furnished men of eminence for important positions in the State and nation. Emory Washburn was Governor of the Commonwealth in 1854, John Davis was United States Senator from 1845 to 1853, Alexander H. Bullock was Speaker of the House of Representatives from 1862 to 1865, inclusive, and Governor from 1866 to 1869, Dwight Foster was Attorney-General of the State from 1861 to 1864, inclusive, and judge of the Supreme Court from 1866 to 1869, Chas. Allen was a member of Congress from 1849 to 1853, Eli Thayer from 1857 to 1861, John D. Baldwin from 1863 to 1869. Pliny Merrick was justice of the Court of Common Pleas from 1850 to 1854, Charles Allen Chief Justice of the Superior Court from 1859 to 1867, Benjamin F. Thomas judge of the Supreme Judicial Court from 1853 to 1859, Pliny Merrick judge of the same court from 1853 to 1864, Charles Devens, Jr., was justice of the Superior Court from 1867. During this entire time, as in the previous period, citizens of Worcester filled the position of judge of Probate for the county. Thomas Kinnicutt from 1848 to 1857, Dwight Foster to July 1, 1858, Henry Chapin from July 1, 1858, for many years beyond the close of this period. Worcester furnished district attorneys for the Middle District during the greater portion of this time: Benjamin F. Newton from 1851 to 1853, P. Emory Aldrich from 1853 to 1855, John H. Matthews to 1856, E. B. Stoddard to 1857, P. Emory Aldrich from 1857 to 1866, Hartley Williams to 1868.

Worcester sent as its Representatives to the Constitutional Convention of 1853: Charles Allen, Isaac Davis, John S. C. Knowlton, J. Milton Earle and Henry Chapin.

The great material advance which the city experienced, stimulated by its easy connection with the seaboard, the interior and the West, as well as by the demands of the war, is so fully covered by Mr. Washburn in his carefully prepared article, that the mere reference to it here is alone permissible.

**INTRODUCTION OF WATER.**—The capacity of Bladder Pond, now Bell Pond, which the Worcester Aqueduct Company used as its source of supply, was soon inadequate for the demands of the city. The property of the Aqueduct Company had come under the control of the city by purchase in 1848. The aqueduct pipes were extended each year, but individual takers were often deprived of a supply, because of its insufficiency for the double purpose of extinguishing fires and for domestic purposes. Expedients were resorted to in order to increase the body of water available in the pond, principally by pumping from a spring in Gates' lumber-yard.

Ethan Allen presented a petition to the City Coun-

cil, April 24, 1848, for leave to lay pipes under a portion of Lincoln and Main Streets, "to bring into his grounds from the north part of Worcester the water from some springs in the grounds of Capt. Lewis Barnard, and to such other places as may be necessary to conduct the water from said petitioner's premises." Permission was granted on said petition May 6, 1848, for him to lay pipes as far south as the house of Charles Thurber, Esquire. July 23, 1849, he was granted leave to extend his aqueduct pipe "through and over Front Street, as far as Salem Street, for the purpose of supplying families with water."

Hon. Phinehas Ball, in a report made to the City Council, February 9, 1863, states that this aqueduct was then supplying "some thirty-seven different parties, almost wholly on Main Street" This same aqueduct is still in use at this day, supplying a few families during a portion of the year. The house of the writer, on Lincoln Street, is among those thus supplied.

The Paine Spring aqueduct was also in use, furnishing in 1863 "at least a hundred and twenty-five families and shops, on School, Union, Main, Thomas and Summer Streets."

The third private aqueduct was the Rice Aqueduct, "supplying parties in the neighborhood of Grafton and Franklin Streets, to the number of sixty-one families, and two steam-engines which are estimated equal to twenty-four families."

From 1852 to 1864 the subject of an additional water supply was from time to time referred to by successive mayors, and spasmodic action was occasionally taken by the City Council. The first expert examination of available sources was made in 1854 by Mr. M. B. Inches, a competent engineer, of Boston. Again in 1856 a further examination was made by Mr. Inches and a report made recommending Henshaw Pond and Kettle Brook as the most available source for further supply. At the municipal election in that year the question was submitted to the inhabitants for a yea and nay vote upon the recommendation aforesaid. After the exclusion of the vote in Ward 1, on account of informality, the vote stood, Yeas, 939; Nays, 940. If the vote of Ward 1 had been included the yeas would have had a majority of 87. The debt of the city was at that time not quite \$104,000, and the inhabitants were by no means unanimous in their desire to increase it four or five-fold by an expenditure for one particular purpose. Thus the matter rested till 1860, when, upon further surveys, it was recommended to obtain legislative authority to take Lynde Brook, which was obtained by act of the Legislature in 1861, but quiet brooded over the waters till 1864. In 1863 Hon. Phinehas Ball made an elaborate report. The citizens felt the urgent need of definite action, and on January 18, 1864, the question was submitted to the voters whether water should be introduced into the city from Lynde Brook

in the town of Leicester in substantial accordance with the report of Mr. Ball. It was decided in the affirmative by a vote of 864 yeas to 282 nays.

Work was soon commenced upon reservoir and conduit pipes, and on November 14, 1864, water was let on for the first time. The city now had a reservoir on Lynde Brook of the capacity of 228,000,000 gallons, the height of the dam being at first twenty-seven feet from the bed of the brook. The debt of the city by reason of the extraordinary expenses of the war and introduction of water, was in 1865 nearly \$425,000. Mayor Blake suggested and encouraged the necessary measures and expenditures required by the growth of the city and demands of the future. With the introduction of water came the necessity for the adoption of a system of sewerage. Mayor Blake recommended it in 1866, regarding it "the foremost and most important of any matter which can come before us." Legislation was obtained, and in 1867 work began on a portion of the great central sewer in Mill Brook and some lateral sewers, which was prosecuted in subsequent years.

**POLITICAL ACTIVITY AND INFLUENCE.**—No period in the history of our nation since the Revolution has approached in the magnitude of the issues to be determined the years from 1848 to 1865. Political questions were dignified into the loftiest moral issues. The grandest fearlessness of political action was the result of the deepest convictions of the human soul. "Deep answered unto deep," and heart to heart. Men held freedom dearer than life and partisans became patriots. The stain of political dishonor was cleansed with blood and a nation's life was dearer than one's own.

Worcester had no humble part in this grand awakening, this beneficent fusion of the political with the moral forces. She led; she did not with cautious and hesitating step follow. The first majestic movement was in the Whig National Convention at Philadelphia, in June, 1848, when Worcester, by the lips of Hon. Charles Allen, made the momentous declaration: "You have put one ounce too much on the strong back of Northern endurance, you have even presumed that the State which led on the first revolution for liberty will now desert that cause for the miserable boon of the Vice-Presidency. Sir, Massachusetts will spurn the bribe. We declare the Whig party of the Union this day dissolved."

These words met with an emphatic response in Worcester, and when, on June 21st, after the return of Mr. Allen from the convention, a meeting was held to receive him, presided over by our honored Albert Tolman, its members, its enthusiasm and its earnestness left no doubt as to Worcester's endorsement of his action. One of the resolutions adopted at that meeting defined with a clearness of expression and an intensity of spirit rarely equalled the lofty attitude of Worcester's loyalty: "Resolved, That Massachusetts wears no chains and spurns all bribes; that Massa-

chusetts goes now and will ever go for free soil and free men, for free lips and a free press, for a free land and a free world."

Worcester was fitly chosen as the place for holding the People's Convention of Massachusetts on June 28, 1848, of which Samuel Hoar, of Concord, a name ever honored, was president, and at which Charles Allen, Charles Sumner, Henry Wilson, Joshua R. Giddings and others made addresses, and who were received by the five thousand freemen there gathered with unbounded enthusiasm.

The *Worcester Spy*, then under the management of John Milton Earle, was an unmistakable factor of great power in the grand advance that stopped only with Appomattox. On July 5, 1848, in referring to the convention, it said: "They have spoken a voice not to be mistaken and taken a stand never to be receded from till the last battle is fought and the victory won for Liberty and Right." In another article, by a different writer, Worcester's connection with the origin of the Free Soil party is fully considered. It is my purpose simply to refer to it. But I content myself with quoting the words of Senator Hoar in his profound and eloquent address at the celebration of the two hundredth anniversary of the naming of Worcester with reference to this subject. He says: "But as surely as Faneuil Hall was the cradle of American Independence so surely was Worcester the cradle of the later revolution."

The liberty-loving and determined people of Worcester and Worcester County elected Charles Allen to the National House of Representatives, that there his words and their words might be heard in the imperative demand that slavery should not invade another foot of the nation's soil.

The attempt to enforce the Fugitive Slave Law, the repeal of the Missouri Compromise and the aggression of the slave power caused intense excitement at the North. Worcester's position in relation to the Fugitive Slave Law was pronounced and emphatic. We do not need to resort to the memory of men, to the daily talk of Worcester's earnest men, to the files of unofficial publications, though these all confirm the fact of the city's deep feeling. I suppose that very few, of the present generation at least, know that in one of the official publications of the city is a declaration of purpose by the mayor of the city, that at once lifts the author of it to a place of unending honor, and puts his city and our city where no hand can rob it of its glory.

Again, it is a pleasure to refer to the inaugural address of Mayor Bacon in 1851.

In referring to the Fugitive Slave Law, he says: "If it be asked whether it is intended that the police of the city shall, in its official capacity, aid in its enforcement, I answer, No." He then considers the effect of a decision of the United States Supreme Court in the case of *Priggs vs. Pennsylvania*, 16 Peters 608, in its operation upon a law of

Massachusetts, Acts of 1843, ch. 69, which provided that no sheriff, constable or other officer of this Commonwealth should arrest or detain, or aid in the arrest or detention, of any person for the reason that he was claimed as a fugitive slave, and closes as follows: "And it is necessary for me only to add that should any officer of the city, embraced within the provisions of that Act of 1843, be found violating its provisions, I *should deem it my duty to recommend his IMMEDIATE REMOVAL FROM OFFICE.*"

Only three years after these noble words were spoken, Worcester had an opportunity of showing by *action* that the words of its mayor expressed their own deep and abiding convictions. The arrest, in Boston, of Anthony Burns, as a fugitive slave, for the purpose of restoring him to his owner (?), which took place in May, 1854, roused Worcester to an exceptional degree. A contemporary account of the great meetings here, consequent upon it, will best illustrate the spirit of the occasion. The following account is taken from the *Spy* of May 31, 1854:

GREAT MEETING IN WORCESTER.

*Rally at the City Hall!*

Without the issuing of a single handbill or any previous notice, more than a thousand citizens of Worcester were assembled in the City Hall on Saturday evening at the ringing of the bell.

Speeches were made by W. W. Rice, Dr. O. Martin, Thomas Drew, T. W. Higginson and S. S. Foster, all of which were received with the most enthusiastic applause. The most intense excitement prevails in regard to the disgraceful proceedings of the U. S. Government in backing up the Kidnappers of men upon the soil of Massachusetts. But one feeling pervades this entire community,—Whigs, Democrats and all seem to be animated by one common sentiment of earnest opposition to the infamous invasion of our soil by the desperadoes of the Southern States under the protection of the Army of the United States.

It was voted unanimously to lay aside business on Monday and proceed to Boston *en masse*, there to meet the friends of Freedom and humanity from other sections of the State and to take counsel together upon the emergencies of the times.

Not less than nine hundred people from this section went to Boston by the special and other trains on Saturday and a much larger number will be there to-day. The people of the country towns are aroused to a pitch of excitement hitherto never seen in Massachusetts since the days of the Revolution. What the result may be Heaven only knows, but one thing is certain: the administration and the South have raised a storm which can only be quelled when the manacles fall from the limbs of the last slave.

On Sunday evening the City Hall was crammed to its utmost capacity, with an earnest and true-hearted audience brought together by the demonstrations now being made by the slave power of its authority in and over Massachusetts. Dr. Martin was called to the Chair and made some stirring remarks on the occasion. Other able and eloquent addresses were made by D. F. Parker, Rev. Mr. Marrs, S. S. Foster, Thomas Drew and others, all breathing the most determined feeling to fight the battle of Freedom and to use all proper means to prevent the return of any fugitive from bondage.

In the course of Mr. Parker's remarks he renounced his former party allegiance and expressed his determination hereafter to go for freedom to all mankind, everywhere—... The meeting then adjourned to Court Square in Boston, at 11 o'clock yesterday.

Among those who went to Boston were: Adin Thayer, W. W. Rice, T. W. Higginson and Martin Stowell.

Two citizens of Worcester were arrested for acts alleged to have been done by them in opposing the United States officers at Boston. They were T. W.

Higginson and Martin Stowell. Neither was convicted.

The rendition of Burns produced a profound impression in this city. The bells of all the churches were tolled during the day; the stores were closed and draped in black; the flag of the United States, reversed, furled, draped with black and raised half-mast high, was hoisted on the liberty pole on the Common.

On Sunday morning the effigies of four men, prominently connected with the Burns case, were found suspended on the Common. Large labels were attached.

No. 1.

PONTIUS PILATE LORING,  
THE UNJUST JUDGE.

No. 2.

BEN. HALLETT,  
THE KIDNAPPER.

No. 3.

CALEB CUSHING,  
THE BLOODHOUND.

No. 4.

FRANK PIERCE,  
SATAN'S JOURNEYMAN.

Scarcely had Burns been remanded to slavery, when the slave-hunters sought Worcester for the supposed purpose of securing the person of William H. Jenkins, an escaped slave. On Sunday October 29, 1854, information was received that Asa O. Butman, a deputy United States marshal, who had arrested Burns, was here. At once the *Spy* issued the following notice:—

LOOK OUT FOR KIDNAPPERS!

BUTMAN, THE KIDNAPPER OF THOMAS SIMS AND ANTHONY BURNS, IS IN TOWN, ACCOMPANIED BY ANOTHER OFFICER!! THEY ARE BOOKED AT THE AMERICAN TEMPERANCE HOUSE! LOOK OUT FOR THEM!!

A public meeting was held in the evening, and the vigilance committee previously appointed watched the hotel and the movements of Butman. They were assisted by a large number of volunteers, who surrounded the hotel. The crowd increased and became somewhat demonstrative in language. A pistol was seen in the hands of Butman, a complaint was at once made against him for carrying dangerous weapons, he was arrested and came before the court the next morning and gave bail for his appearance at a later day. The Commonwealth was represented by W. W. Rice and Adin Thayer.

Upon his release, the excitement was such, the attendance so large, and the outlook so ominous, that he sought the protection of the officers of the law, which was granted, and he was taken to the marshal's office. But with that respect for law which Worcester has signally displayed, and with the most earnest purpose to prevent violence, those whose love for freedom could never be questioned, attempted to repress the ardor of the crowd. George F. Hoar addressed the throng and earnestly besought that no violence should be inflicted on Butman, and courageously announced that he had offered to accompany

Butman to the depot. Rev. T. W. Higginson, Martin Stowell, S. S. Foster and others volunteered to form a body-guard for Butman's safety. A more instructive scene has rarely been witnessed in Worcester than the protection afforded by these ardent friends of liberty to the *person* of this cringing coward, whose supposed business they bitterly loathed. These, with a few police, escorted Butman to the depot. There were obstacles to a rapid journey, and upon arrival at the station, it was found that the train upon which they proposed to send Butman to Boston, had left. Mr. Foster stated to the crowd that Butman had promised never again to visit Worcester, if he could safely depart; that this was a victory for freedom, and he hoped that no violence would mar the triumph. At last Butman was started for Boston in a hack, accompanied by Mr. Higginson. It is believed that he kept his promise!

There was no occasion to "recommend for immediate removal" any of the Worcester police; their only assistance rendered Butman was to get him safely out of the city *without* his prize. It may be very doubtful if Mr. Butman's visit here was for the purpose of procuring Mr. Jenkins, for the reason that more than three years prior to his visit, Mr. Jenkins, through the instrumentality of Emory Washburn, had been manumitted by his owner (?), W. E. Taylor, of Norfolk, and for the further reason that the instrument of manumission had been recorded in Norfolk in 1851, and in the city clerk's office at Worcester on June 9, 1854.

As it is believed that it is the only document of that character recorded here since 1777, at which time one of similar import is of record, I have thought it deserving of insertion here. It is as follows.

Know all men by these presents, that I, William E. Taylor, of the City of Norfolk and State of Virginia, have manumitted, Emancipated and set free, and by these presents do manumit, emancipate and set free a mulatto man slave named Henry Jenkins, and sometimes called William Henry Jenkins, who was purchased by me in the year 1837 of the late John N. Walke, of the said City of Norfolk, and I hereby declare him, the said Henry, to be entirely liberated from slavery and entitled to all the rights and privileges of a free person, with which it is in my power to invest him. The said Henry hereby emancipated is a man of light complexion, about five feet eight or nine inches high, and about thirty-five years of age.

In testimony whereof I have hereunto set my hand and affixed my seal at the City of Norfolk, aforesaid, this 20th day of March, A.D. 1851.

W. E. TAYLOR. [LS.]

In the Clerk's office of the Court of the Corporation of the City of Norfolk, on the 20th day of March, 1851, this deed of emancipation was acknowledged by William E. Taylor, party thereto, and admitted to record.

Teste JNO. WILLIAMS, CL.

1851, March 20 Ack'd in off by Wm. E. Taylor and A. R.

Teste JNO. WILLIAMS, CL.

Recorded and examined,  
(State tax paid.) JNO. WILLIAMS, CL.

The righteous indignation of Worcester over the dastardly assault upon Senator Sumner found immediate expression at a meeting held in May, 1856. The officers of the meeting were; President, Hon. J. S. C. Knowlton; Vice Presidents, Rejoice Newton, Ira

M. Barton, W. A. Wheeler, George W. Richardson, Henry Chapin, Charles Thurber, Lee Sprague, P. Emory Aldrich, George M. Rice, William T. Merrifield, Edward Earle, Joseph Mason and Thomas Kinncutt; Secretary, P. L. Moen. Speeches were made by P. Emory Aldrich, Charles Allen, Dwight Foster, D. F. Parker, J. B. D. Coggs well and Rev. Horace James. For participation in this service, if for no other reason, Worcester ought to hold these honored men in enduring remembrance.

During all this period the activity of Worcester in the anti-slavery cause was conspicuous, not simply in the ranks of the Anti-Slavery Society, but in the great body of the more practical and constitutional Free Soilers and Whigs. The records of the Worcester County South Division Anti-Slavery Society, now in the possession of the Worcester Society of Antiquity, show that as early as 1847 the society began to adopt resolutions that it was the "duty of the non-slave-holding States to immediately secede from the Union." In 1851, while it rejoiced in the election of Charles Sumner, it resolved that he, Giddings, Hale, Mann, etc., occupy an utterly indefensible position, because they have taken an oath to defend the Constitution of the United States. Again, in 1854, after the formation of the Republican party, it resolved that the support of the new party is practical treason to the anti-slavery cause.

Its members were animated by a deep and abiding spirit of abhorrence of the institution of slavery and could see no possible issue out of participation in its crime, except by withdrawal from a government whose Constitution, they argued, sustained it. Events have shown that, by the very opposite course of insistence that no State should or could legally withdraw from the Union, the grand consummation which they so earnestly desired—the utter annihilation of slavery—has been accomplished. The great majority of Worcester's freedom-loving population, while detesting slavery, were not disunionists. The Anti-Slavery Society resolved that no true abolitionist could consistently hold office, but Worcester agreed with Dr. Oramel Martin, who in one of the public meetings of the society, in 1854, argued that it was wisest for the cause to vote for the best anti-slavery candidates they could get.

But, however much certain details of action were disapproved, without doubt the work of that society served a most beneficent purpose and was a grand educator of the people. Stephen S. Foster and Abby Kelly Foster were the best known members of the Anti-Slavery Society, and their assiduous and fearless labor, day and night, in season and out of season, was a contribution of great power to the general cause.

A greater privilege yet awaited Worcester. It became the birth-place of the Republican party. This is not intended in a partisan sense or with a partisan bias, but simply in a historical view.

On July 20, 1854, the "People's Convention" was

held in Worcester, participated in by many of Worcester's strong men as well as from all sections of the State. Upon that day the party took the name of "Republican."

P. Emory Aldrich and P. W. Taft, of Worcester, were upon the Committee on Resolutions, which reported, among other resolutions, the following:

*Resolved*, That the unquestionable existence of a settled purpose on the part of the slave power to convert the Republic which our fathers founded on principles of justice and liberty into a slave-holding despotism, whose vital and animating spirit shall be the preservation, propagation and perpetuation of slavery, calls for the immediate union of all true men into a party which shall make the question of freedom paramount to all other political questions.

*Resolved*, That in co-operation with the friends of freedom in other States we hereby form ourselves into the REPUBLICAN PARTY of Massachusetts, pledged to the accomplishment of the following purposes:—

among which were the repeal of the Fugitive Slave Law, the restoration of liberty to Kansas and Nebraska, prohibition of slavery in all the Territories, refusal of admission of any more slave States into the Union, etc.

The activity of Worcester in the formation of the Republican party and in the great struggle for freedom in Kansas are considered so fully by another writer that I forego further mention of it. So, too, the energy and the sacrifice of Worcester in the Civil War receive treatment in another article. All, however, combine to form the magnificent total of Worcester's achievement in behalf of Liberty and Union.

Worcester's contribution to the great temperance movement was not equalled by any town in the State.

The consecration to a life of sobriety and moral effort made by John B. Gough, when, at the Worcester Town Hall on October 31, 1842, he took the pledge of total abstinence, had doubtless a more beneficent effect upon the whole land in the grand efforts for the reclamation of those addicted to the excessive use of liquor and in the elevation of the moral sentiment of the country, than any other agency. In the suppression of the sale of liquor, the suggestion made by Mayor Bacon, in his inaugural address of 1852, has proved more potent than any other legal means. He says: "We cannot rely upon living witnesses to give the testimony sufficient to put down this traffic. Why should we not then, as in other cases, appeal to the tools—the implements, and, if necessary, to the very liquor itself and get their response? Why not produce and interrogate them?"

#### CLOSING PERIOD.

The space allowed for this article has already been exceeded; the reference to this period must, therefore, be exceedingly brief. The materials for its history are so accessible that any one may readily examine for himself.

The causes which contributed to the growth and prominence of Worcester have continued to exist and operate, so that now it is estimated that the city has

a population of about 82,000. It has a valuation of \$64,514,536 and 23,122 polls. Its Lynde Brook Reservoir has been increased so that its storage capacity is now 680,000,000 gallons. In 1883 the city took the waters of Tatnuck Brook as an additional water supply, and the distributing reservoir upon that stream has a storage capacity of 370,000,000 gallons, so that, with Bell Pond, of 30,000,000 gallons, its present actual supply is 1,080,000,000 gallons. The daily consumption is somewhat over 4,000,000 gallons. It has now 110 miles of main pipe and 76 miles of service pipe. Its water-works system has cost about \$2,350,000.

Work upon the construction of sewers has been continued until now the city has sixty-eight miles of sewers, all constructed within the last twenty-one years. It has now a duty imposed upon it of purifying its sewage before pouring it into the Blackstone River. The total cost of its sewers has exceeded \$2,400,000.

The act which authorized the city's sewer system provided that assessments might be made for a portion of the cost upon those whose estates were benefited thereby.

Each city government till 1872 hesitated and delayed to take the action authorized. It was necessarily attended with great embarrassments and difficulties, but Hon. George F. Verry, in his inaugural of 1872, took strong and fearless ground as to the necessity of meeting the question and dealing with it without further delay. Accordingly, in 1872, an assessment, aggregating \$450,000, was laid. Naturally it met with opposition, but its legality was established by the Supreme Court and it was collected.

The mayors during this period have been as follows: 1869–71, James B. Blake; 1871, Henry Chapin, *ad interim*, for a few weeks after Mayor Blake's death, Edward Earle the balance of the year; 1872, George F. Verry; 1873, Clark Jillson; 1874, Edward L. Davis; 1875–76, Clark Jillson; 1877–79, Charles B. Pratt; 1880–81, Frank H. Kelley; 1882, Elijah B. Stoddard; 1883, Samuel E. Hildreth; 1884–85, Chas. G. Reed; 1886–89, Samuel Winslow.

In 1871 the city took decisive action towards removing the railroad tracks from the old Common and some of the adjacent and most frequented streets, which resulted in their removal and the construction of the Union Station. In 1885 steps were taken to secure the removal of the Old South meeting-house, and under legislative authority it was accomplished in 1887, at an expense of \$115,000. The Common is now free from all structures not belonging to the city. The City Hall, the monument to Col. Timothy Bigelow, erected in 1861, and the beautiful soldiers' monument, dedicated July 15, 1874, alone remain upon it.

The wisdom of providing ample parks by the city was stimulated by the gifts of Horace H. Bigelow and later of Edward L. Davis, of Lake Park, on the shores of Quinsigamond, and of Stephen Salisbury, of Insti-

tute Park, on the shores of Salisbury Pond, so that in 1888 the city government appropriated two hundred and fifty thousand dollars for the purchase of several tracts in various sections of the city for use as parks.

Worcester's benefactors have been largely those whose gifts have been their loyal service to her, but she is not without those who added to such service more material means. The largest pecuniary gift which Worcester ever received was from George Jaques, who by deed and will gave to the city in 1872 over two hundred thousand dollars for a city hospital. Mrs. Helen C. Knowles, wife of Lucius J. Knowles, gave to the city in 1886, by her will, twenty-five thousand dollars for a maternity ward in connection with the hospital. George Bancroft, in 1882, presented to his native city the sum of five thousand dollars for the foundation of a scholarship in memory of his parents, the income to be devoted towards the liberal education of some young native of Worcester who, in the schools of the city, may prove his ability.

Still another railroad leading to Worcester has been added—the Boston, Barre and Gardner—to which the city liberally contributed two hundred and sixty-two thousand dollars in subscription to the capital stock. The Worcester and Shrewsbury Railroad to the lake affords abundant facilities for access to that attractive resort.

The street railroad has extended its location, so that now it has seventeen miles of track, and carried the past year 3,794,169 passengers.

The city's streets have increased in number and length, so that now it has one hundred and forty-two miles of public streets, and fifty miles of private ways.

Its schools have been fostered with a generous hand, the appropriation the past year for that purpose being \$266,554.00. Its great educational institutions have been supplemented by the Polytechnic Institute and Clark University.

Though the net debt of the city was, on November 30, 1888, \$2,061,183.00, yet its credit stands as high, and its bonds sell at as much premium, as those of any town or city in the country.

Although Worcester has, at no time, been represented upon the successful State ticket since 1869, yet her influence has not sensibly diminished. Her leading men have rendered service in other capacities.

GEORGE F. HOAR represented this district in the National House of Representatives from 1869 to 1877, and has been greatly distinguished as United States Senator from Massachusetts since 1877.

CHARLES DEVENS, JR., remained upon the Superior Court bench till 1873, when he was appointed one of the justices of the Supreme Judicial Court, and remained such till 1877, when he became Attorney-General of the United States in the Cabinet of President Hayes. Upon his retirement from that position in 1881, he was again appointed one of the justices of our Supreme Court, which position he now occupies.

FRANCIS H. DEWEY was one of the justices of the Superior Court from 1869 to 1881, when he resigned.

P. EMORY ALDRICH has been a member of the Superior Court bench since 1873, and HAMILTON B. STAPLES since 1881.

W. W. RICE succeeded Geo. F. Hoar in the House of Representatives and remained till 1887.

JOSEPH H. WALKER has just been elected a member of the next House.

A merited and distinguished honor was conferred upon EX-GOV. BULLOCK, in the offer by President Hayes of the nomination of his name for minister to England, which was declined by Mr. Bullock.

HENRY CHAPIN remained judge of Probate till his death, in 1878, when he was succeeded by another citizen of Worcester, ADIN THAYER, who held the office till his death, in 1888.

THOMAS L. NELSON was appointed judge of the United States District Court for the Massachusetts District in 1879, and still occupies the position.

Worcester has furnished district attorneys for the Middle District during the entire time, viz.: W. W. Rice, H. B. Staples, Francis T. Blackmer, W. S. B. Hopkins, and the present incumbent.

Worcester has had the service of distinguished members of the bar as city solicitors, including T. L. Nelson, F. T. Blackmer and Frank P. Goulding.

CONCLUSION.—If, from the foregoing sketch, it can be seen that Worcester, during the past century of her existence, has been true to the highest demands of civic existence; has been active and usually foremost in the great movements of political thought; that her people have been inspired with a true conception of duty; that her leaders have been fearless and actuated by noble impulses; that material prosperity has been attained by promoting intellectual and moral growth, as well as by sagacious judgment and varied industries; that her true progress has not been retarded by alien indifference, but promoted by the filial affection of her children, its purpose will have been accomplished.

The fountains of her political action have remained pure. Her affairs have been, in the main, committed to men of education and capacity. She has ordinarily chosen as her servants those who, from culture, intelligence, honesty and maturity of judgment, were qualified to represent her worthily. The demagogue has found here no place for the sole of his foot; the unworthy self-seeker for office has been doomed to disappointment.

Adherence to these principles and continuance of present intellectual and economic conditions assure Worcester's future.

A more apt embodiment of one of the most important phases of Worcester's history and life can hardly be found than in the following extract, from that admirable inaugural of Mayor Bacon, so often referred to:

The fact that absenteeism, the bane of cities, as it is of States, is

here almost wholly unknown, a very minute and quite inconsiderable proportion only of the property of Worcester being owned by non-residents, the capital here, particularly that devoted to and invested in manufactures, in trade, in mechanic arts being almost entirely owned, supervised and managed not by the agent of some distant capitalist, but by the resident proprietor, whose personal supervision of his own affairs and his own capital insures thrift and profit in his own business, and whose personal residence amongst us is a sure guarantee of his sympathy and generous co-operation in every enterprise calculated to benefit the city of his residence; the circumstance . . . that our capital, manufacturing and mechanical, is quite minutely subdivided and owned in moderate and comparatively inconsiderable amounts, by a great number of thrifty and independent proprietors, the fortunate peculiarity in our industrial organization, that the prosperity of our city is not dependent, as is the case not unfrequently elsewhere upon the prosperity of any one particularly dominant and controlling mechanical or manufacturing interest, which now flourishing, and now depressed, exhibits the place of its location, now a town or city, full of life and activity, and now embarrassed in its business and the abode of idleness and a place of stagnation and distress; the stability of our prosperity, on the contrary, reposing upon the great number and variety of interests and trades, manufacturing, mechanical and commercial, carried on here, where, though one branch or interest may be at any given time depressed, the greater number will be found prosperous and productive; these, and all these, have conduced to our prosperity, and now let me ask which of these causes has exhausted itself, or which is likely to cease its operation? Not one; in my opinion not one.

As true to-day as in 1851, and of all the causes which have contributed to Worcester's *honor* and her prosperity, not one has exhausted itself.

## CHAPTER CLXXXI.

### WORCESTER—(Continued.)

#### ECCLESIASTICAL HISTORY.

BY CHARLES EMERY STEVENS.

A HISTORY of any New England town without an ecclesiastical chapter would surely be like the play of Hamlet with the part of Hamlet left out. For a city of eighty thousand inhabitants, with fifty churches and fifteen denominations, and a history covering two centuries, such a chapter ought of right to occupy a large space. But this the plan of the present work altogether forbids. Only a very condensed outline of what might well fill a volume can here be given. It must needs be a somewhat bald narration. Outline sketches admit of neither shading nor color. Under such limitations this writing must proceed.

At the outset two methods of treatment presented themselves. One was the chronological method; the other was the topical. By the latter method all that is to be said of one denomination would be presented by itself; the topic would be exhausted before another was touched. Beginning with the Trinitarian Congregationalists, for example, we should treat of all the churches of that order before proceeding with the next. And although the other method may have its advantages, and, indeed, has been adopted by some writers, this, on the whole, seemed to be the preferable method. It has this im-

portant advantage, that the origin and growth of each denomination can be viewed consecutively and apart from others. Accordingly, this method will be pursued in the present history. Without further preface, I begin with the

TRINITARIAN CONGREGATIONALISTS—*First or Old South Church*.—The first permanent settlement in Worcester began on the 21st of October, 1713. Nearly fifty years before, steps had been taken towards this end and temporary settlements had been begun; but before foot was set upon the soil a provision was made "that a good minister of God's word be placed there." This provision was first realized in the year 1719, when the Rev. Andrew Gardner was ordained as the first minister of the Gospel settled in Worcester. Before this, however, the people had been wont to assemble regularly for public worship in their dwelling-houses, and notably in that of Gershom Rice, who was the first to open his house for the purpose. Soon the dwelling-house became too strait, and in 1717 a small meeting-house of logs was built. It stood at the corner of Franklin and Green Streets, just southeast of the Common. This served its purpose until 1719, when a more spacious edifice was erected on the site thenceforward occupied by the Old South for one hundred and sixty-eight years. Meanwhile a church had been constituted—perhaps self-constituted—with Daniel Heywood and Nathaniel Moore for its first deacons. This occurred soon after the permanent settlement. The precise date of this important beginning is not known, but Whitney ("History of Worcester County") thinks that all probabilities point to the year 1719. This, then, seems to have been the year when the church was organized, the meeting-house built and the first minister settled.

The ministry of Mr. Gardner was not a happy one. He was addicted to deer-hunting and practical jokes, and, naturally, was accused of remissness in the discharge of his duties. His people on their part neglected to pay his small stipend of perhaps £40, and also the "gratuity" of £60, which they had voted to give him. Dissatisfaction increased; some left his preaching. The General Court having been appealed to in vain, an ecclesiastical council was at length convened, in September, 1721, to take the matter in hand. After long delay by the council, on the 31st of October, 1722, Mr. Gardner was dismissed from his charge. It is said his errors were more of the head than of the heart. He was generous, sometimes without regard to consequences. This instance has been preserved: "A poor parishioner having solicited aid in circumstances of distress, Mr. Gardner gave away his only pair of shoes for his relief; and, as this was done on Saturday, appeared the next day in his stockings at the desk to perform the morning service, and in the evening officiated in borrowed slippers a world too wide for his slender members." Mr. Gardner was a native of Brookline and a gradu-

ate of Harvard in the class of 1712. It was thought worthy of mention that, in conformity with the custom of the time, his name was placed last in the roll of his class, as indicating the relative social position of his parents. For the same reason Abraham Lincoln's name would have stood at the foot of his class had he been college bred. The subsequent history of Mr. Gardner did not improve his reputation. Installed as the first minister of Lunenburg in 1728, and dismissed in 1731 "because he was unworthy," he retired to a town in the Connecticut Valley, and there died at an advanced age. After a period of preaching without settlement by the Rev. Shearjashub Bourne, the Rev. Thomas White and others, on the 10th of February, 1725, a call was given to the Rev. Isaac Burr, and on the 13th of October following he was ordained as the second minister. A long and quiet ministry followed. His relations with the people were cordial, and the latter were forward and generous in his support. When the paper money of the period became depreciated they took care that his salary should not suffer. During his ministry a memorable event was the arrival in Worcester, October 14, 1740, of George Whitefield, accompanied by Gov. Belcher. On the next day the famous evangelist "preached on the Common to some thousands," as he wrote in his diary. Nothing appears to show that this visit was otherwise than welcome to Mr. Burr. And yet, the forces then set in motion had their ultimate issue in his dismissal. It seems the Rev. David Hall, of Sutton, "a follower of Whitefield," found Mr. Burr too backward in the new Whitefield movement. Though he preached repeatedly "in private houses" in Worcester with Mr. Burr's consent, yet he was moved to write down in his diary that the latter "seemed not well pleased." At length Mr. Burr refused his consent to further preaching by his Sutton brother, whereupon the latter was led to express the fear that the Worcester minister was "too much a stranger to the power of godliness." In truth, a Whitefield party had been formed in Worcester, and Mr. Burr was found not to be of the number. Alienation naturally arose, and the growing trouble impaired his health. So, in about four years after Whitefield's advent, a mutual council was convened, and under its advice Mr. Burr was dismissed in March, 1745. Lincoln ("History of Worcester," p. 146) says that he was the son of the Hon. Peter Burr, the father of President Burr, of Princeton College, and consequently grandfather of Aaron Burr, Vice-President of the United States. But this is an error. It appears from evidence in the probate office at Hartford, Conn., that he was the son of Thomas Burr, of that city, and therefore not of the Aaron Burr lineage. He was born in 1698, and graduated at Yale in 1717. His death occurred at Windsor, about 1751. No portraiture of his person or mind survives; no characteristic anecdote is of record, and nothing testifies of his ministry save its

continuance for a fifth of a century in a generally peaceful way. The town next made choice of Nathaniel Gardner, a graduate of Harvard in 1739; he, however, declined the call. Nearly two years elapsed before the settlement of the next minister. In this interval a covenant<sup>1</sup> was adopted and subscribed by fifty members of the church. Doubtless there was a covenant of some sort when the church was first organized, but what it was, and how it compared with this new one, we have no means of knowing. If it was a "half-way covenant" after the fashion of that day, it must have differed materially from this one of 1746.

After Mr. Gardner many candidates were heard; but at last the choice lay between the Rev. Thaddeus Maccarty, of Boston, and the Rev. Jonathan Mayhew, of Martha's Vineyard. Each was to preach four Sabbaths in succession, and on the Sabbath before the day of election both were to preach. After this competitive trial the choice by a very large majority fell on Mr. Maccarty, and Worcester missed the chance of having the famous divine of the Revolution among the number of its ministers. Mr. Maccarty was installed on the 10th of June, 1747. The sermon on the occasion was preached by himself, for which unusual step he offered ingenious reasons in the introduction. Besides the pecuniary provision for his support, a house with about two acres of land on the Common southeast from the meeting-house was purchased for a parsonage. In 1765 this property was conveyed in fee to Mr. Maccarty by the town. Nearly fifty years after, in a suit by the Rev. Samuel Austin, D.D., in behalf of the parish, the property was recovered back from the tenant claiming under a conveyance by the executors of the deceased minister. The estate, however, was afterwards relinquished by the parish. The ministry of Mr. Maccarty was of nearly forty years' duration. In the course of it occurred the Revolutionary War, bringing severe trials; and at the close protracted sickness kept him out of the pulpit. He lived greatly respected and died deeply lamented on the 20th of July, 1784, at the age of sixty-three years. His ministry was the longest of all which the First Church enjoyed during the first one hundred and seventy years. Mr. Maccarty was tall, slender and thin, with a black, penetrating eye, which added to his effectiveness in speaking.<sup>2</sup>

<sup>1</sup> To be found in Lincoln's "History of Worcester."

<sup>2</sup> A faint likeness of him survives on a poorly-painted canvas in the possession of Mrs. Mary P. Dunn, one of his lineal descendants. His remains were buried in the cemetery then on the Common, at a spot just south of and very near the Soldiers' Monument. In 1848 all the gravestones in the cemetery were laid flat, each over its respective grave, and buried beneath the turf, and Mr. Maccarty's among the rest. A description of the emblems on his headstone, together with its inscriptions, is given in Barton's "Epitaphs." The inscriptions were copied upon a mural tablet erected in the Old South by Dwight Foster (brother of Mrs. Dunn), late a justice of the Supreme Court of Massachusetts. The tablet will have an appropriate place upon the wall of the New Old South.

"As a preacher he was solemn, loud, searching and rousing," said a contemporary clerical brother. President John Adams, in his early years a resident of Worcester, wrote to Dr. Bancroft that "Mr. Macarty, though a Calvinist, was no bigot." In the course of his ministry, Mr. Macarty published eight occasional sermons; several others may be found in Doctor Smalley's "Worcester Pulpit." From these posterity may judge something of his doctrine, which was sound, and something of his style, which was not classical. During his sickness and after his decease a young man appeared in his pulpit whose preaching was destined to be the occasion, if not the cause, of a lasting division in the First Parish. Of this an account will be given under another head. During the controversy which arose, no minister was called; then, in 1786, the Rev. Daniel Story was called, accepted the call and went on preaching, without being ordained, for about two years, when the call was re-called. It had been discovered, that he, too, entertained Arminian sentiments. Having thus received his *cong  * in Worcester, Mr. Story went into Ohio as chaplain of the company which founded Marietta, the centennial of which was celebrated in 1888, a distinguished citizen of Worcester (Senator Hoar) having a leading part therein. Mr. Story was an uncle of Joseph Story, the eminent justice of the Supreme Court of the United States. He was born in Boston on the 29th of July, 1756, was a graduate of Dartmouth in the class of 1780 and died at Marietta in 1804.

The settlement of the next minister, Dr. Austin, in the last decade of the century, was the beginning of a new order of things. Before proceeding with its history let us look at the way of public worship in the First Church during the period then closing. As elsewhere, the principal parts of the service were praying and preaching; singing and reading the Scripture lesson were subordinate; and, indeed, this last did not become a part of the service until near the middle of the century. Under date of September 3, 1749, the church record recites that the "laudable custom was very unanimously come into by the church at one of their meetings some time before." In this matter the Worcester church was not behind others, since the custom "was not introduced into New England" until that period. Singing had been a part of the service from the beginning. At first it was congregational, primitive and rude. The minister read the first line of a psalm and the congregation sang it. Then the eldest deacon "lined" the rest, and "singing and reading went on alternately." There was neither chorister nor choir nor set tune, but each one sang to please himself. This was the "usual way," so-called. In 1726 an attempt was made to substitute the "ruleable way." A vote of the town was passed to that effect, but the deacons resisted, and the "usual way" still prevailed. The unmelodious custom was too strongly entrenched.

Forty-three years went by and a generation had died off before another attempt to change it was made. Then, in May, 1769, came a modest proposition to invite "a qualified individual" to lead. A bolder stroke followed in March, 1770, when three men were designated by name "to sit in the elders' seat and lead," and by a unanimous vote a fourth was chosen to "assist." Here was our modern quartette, so far as the old-time sense of propriety would allow. The next step was taken in 1773 by providing seats exclusively for the singers. Six years after, on the 5th of August, 1779, the town struck the final blow by adopting these votes: That the singers sit in the front seats of the front gallery; that they be requested to take said seats and carry on the singing; and that the psalm be not "lined." Nevertheless, on the next Sabbath the venerable eldest deacon rose and began to "line" the psalm. The singers, from their new "coign of vantage," began to sing; the deacon raised his voice, the singers raised theirs; it was an unequal strife, and the deacon "retired from the meeting-house in tears." This was the end of the "usual way" of singing in Worcester. From that time onward the ruleable way prevailed without opposition.

The first book in use was the "Bay Psalm Book,"<sup>1</sup> as improved by President Dunster, of Harvard College. This held the ground until 1761, and was then displaced by the version of Tate and Brady, "with an Appendix of Scriptural Hymns by Dr. Watts." The exact date when this book came into use was on the 29th of November in that year. It continued in use until the settlement of Dr. Austin, and then, on the 20th of January, 1790, gave way to "Watts' Psalms and Hymns and Spiritual Songs." The version of Sternhold and Hopkins was never used in the church in this town," says Lincoln.<sup>2</sup> This version was the one in use under royal authority by the Church of England, and was bound up with its "Book of Common Prayer." Perhaps it was because of this that the New England churches chose to have a "Psalm Book" of their own—a book free from all complicity with an established church.

<sup>1</sup> This most famous and rarest of books was the first one ever printed in America. Its true, whole and only title was "The whole booke of psalmes faithfully translated into English Metre, Whereunto is prefixed a discourse declaring not only the lawfulness, but also the necessity of the heavenly Ordinances of singing Scripture Psalms in the Churches of God. Imprinted 1640." In 1636 there were, says Dr. Thomas Prince, "near thirty ministers" in New England who had been educated in the English universities. These divines selected out of their number "the Rev. Mr. Richard Mather, the Rev. Mr. Thomas Weld and the Rev. Mr. John Eliot," to prepare a new version of the Psalms for the use of the New England churches. The printing of the work was begun in 1639 and completed in 1640. This was the "Bay Psalm-Book." A single copy, bearing the imprint of the last-named year, is treasured in the iron safe of the American Antiquarian Society, in Worcester. It is sometimes said of a very rare book that it is worth its weight in gold. In 1876 a copy of this book belonging to the estate of the late Dr. Nathaniel B. Shurtleff, was sold by auction in Boston for about one thousand and fifty dollars. The Worcester copy weighs nine ounces. The price paid for the Boston copy, therefore, was more than six times its weight in gold.

<sup>2</sup> MS. Notes in Lib. of Antiq. Soc.

To illustrate the several versions and furnish a means of comparison the first verse of the first psalm from each is subjoined.

FROM THE BAY PSALM-BOOK OF 1640.

O Blessed man that in th' advice  
of wicked doth not walk :  
nor stand in sinners way, nor sit  
in chayre of scornfull folk.

FROM DUNSTER'S IMPROVED BAY PSALM-BOOK OF 1650.

O Blessed man that walks not in  
th' advice of wicked men,  
Nor standeth in the sinners way  
nor scorners seat sits in.

FROM TATE AND BRADY, ORIGINAL EDITION, ANNO 1700.

Happy the Man whom ill Advice  
From Virtue ne'er withdrew,  
Who ne'er with Sinners stood nor sat  
Amongst the scoffing Crew.

FROM TATE AND BRADY, WITH APPENDIX BY WATTS, ANNO 1754.

How blest is he who ne'er consents  
by ill Advice to walk  
Nor stands in Sinners Ways; nor sits  
where Men profanely talk!

FROM STERNHOLD AND HOPKINS, LONDON, 1648.

The man is blest that hath not bent  
to wicked read his eare :  
Nor led his life as sinners do,  
nor sate in scorners chaire.

After six years of waiting the First Parish at length secured the most distinguished among all its ministers. On the 29th of September, 1790, the Rev. Samuel Austin, D.D., of New Haven, was duly installed in the vacant pulpit. His first considerable step was to clear up and reinvestigate the doctrinal basis of the church. A new creed and covenant were adopted, whereby its orthodoxy was conformed to the strictest type. All the subsequent activities of Dr. Austin had this type for their basis. He devoted himself to the investigation of theological questions. He prepared and published the first complete edition of the works of the elder Jonathan Edwards. He was one of the founders of the General Association of Massachusetts, and also of the Massachusetts Home Missionary Society. He was often called to sit in councils on difficult cases. He was a man of strong convictions and plain speech. On public affairs he preached with great freedom. His fast-day sermons were notable. Several were published. The one preached on the 23d of July, 1812, during the war, caused much agitation. He therefore published it, with this upon its title-page: "Published from the press by the desire of some who heard it and liked it; by the desire of some who heard it and did not like it; and by the desire of others who did not hear it, but imagine they should not have liked it if they had."

At the end of twenty-five years he became president of the University of Vermont, but, because of the suit already mentioned, remained nominal pastor of the First Parish till 1818. Resigning the college

presidency in 1821, he became pastor of a small church in Newport, R. I., once the charge of the famous divine, Dr. Samuel Hopkins. This, too, he resigned in 1825, and then returned to Worcester, preaching occasionally in Millbury. By and by the death of an adopted son, physical disease and pecuniary losses brought on mental disturbance. Like the poet Cowper, he became a religious monomaniac. The darkness of despair settled down upon him. For some four years he remained in this state of gloom. Near the end, light at intervals broke through the cloud. He died on the 4th of December, 1830, in the seventy-first year of his age. He was a man of commanding stature, of dignified carriage, austere yet affable on near approach, and "with a smile like a sunbeam breaking through the clouds." As a preacher he was remarkable for power and pathos, and of eminent gifts in devotional exercises. The impress of his character was deep and abiding. Of his publications, Lincoln ("History") gives a list of thirty-three, with their titles.

The successor of Dr. Austin was the Rev. Charles A. Goodrich. He was ordained as colleague pastor on the 9th of October, 1816, and became sole pastor by the formal dismission of Dr. Austin in 1818. His ministry was short but fruitful of a spiritual harvest, about eighty new confessors, being added to the church in one year. But it was a ministry full of trouble also. Beginning as a young man of twenty-six years, he found himself confronted at the outset with the opposition of a leading person both in the parish and in the town. Though this person was not himself of the church, yet some of his family were; and the combined influence of all caused the diaffection to spread. Attempts at reconciliation were made and failed. It became evident that either the minister or the disaffected must leave. The former was too strongly entrenched to be ousted, and the latter perforce accepted the alternative. For a time they resorted to other communions while retaining connection with their own church. Presently, they sought release from this bond. Some asked for dismission and recommendation. Several were dismissed but not recommended. Councils were resorted to and counter-councils were held, with the usual results of *ex parte* proceedings. Each party in turn was sustained. At last a council constituted the disaffected, with others, into a new church, the history of which, under the name of the Calvinist or Central Church, will be given in its proper place. A war of pamphlets followed, able and exhaustive on both sides; and to them the reader must be remitted for further and fuller details of the unhappy controversy. This church quarrel was the most serious that ever afflicted any church of any communion in the town. Ill health compelled Mr. Goodrich to lay down his charge on the 14th of November, 1820, and the same cause prevented him from resuming the pastoral office. For the rest of his life he devoted himself to literary pursuits. He

became a maker of books; his school histories were in their day greatly in vogue, and of one more than one hundred thousand copies were printed. A list of his principal works is to be found in the "Worcester Pulpit."

The sixth pastor of the Old South and the next after Mr. Goodrich was the Rev. Arætius Bevil Hull. Born at Woodbridge, Conn., in 1788, graduated in 1807 at Yale, where he was a tutor for six years, he was ordained and settled at Worcester on the 22d of May, 1821. He came to his new calling with a high reputation both as a scholar and as a teacher. Ill health, however, kept him down, and after a protracted sickness he died in office on the 17th of May, 1826. His virtues as a man and a minister were celebrated by his contemporary neighbor, Dr. Nelson, in a funeral sermon. He was eminently social, simple, refined, charming in conversation and "a welcome friend to the poor." A quarter of a century after his death men often spoke of him "with kindling emotion." His church attested their affection by erecting to his memory a monument inscribed all over with elaborate encomium. In 1827 the church and parish united in a call to the Rev. Rodney A. Miller. The call was accepted and he was ordained on the 7th of June in that year. For nearly seventeen years he remained pastor of the church. During this period more than four hundred were added to its communion. At length differences arose between Mr. Miller and members of the church and parish; in consequence, a mutual council was called and the result of its advice was the dismissal of Mr. Miller. For many years after, he continued to reside in Worcester, but in the end returned to Troy, N. Y., his native place, where he died at an advanced age. Mr. Miller was the first president of the first Temperance Association ever formed in Worcester. For some years he was one of the overseers of Harvard University and had a zeal for the rectification of its theological standards.

A series of seven pastorates followed that of Mr. Miller. The first was that of the Rev. George Phillips Smith, a graduate of Amherst in 1835. He was installed on the 19th of March, 1845, and died at Salem, while in office, on the 3d of September, 1852. His ministry was a happy and successful one. Following him came the Rev. Horace James, a graduate of Yale in 1840, who was installed on the 3d of February, 1853. Mr. James was full of devotion to his charge, but when the Civil War broke out, devotion to his country overbore the former and issued in his appointment as chaplain of the Twenty-fifth Regiment of Massachusetts Volunteers, and his consequent dismissal from his pastoral charge. This event occurred on the 8th of January, 1863, and his death on the 9th of June, 1875. Rev. Edward Ashley Walker, who had been ordained chaplain of the First Connecticut Heavy Artillery in June, 1861, was installed as Mr. James' successor on the 2d of July, 1863. Like some of his predecessors, he was compelled by ill health to

retire altogether from the ministry. His death occurred on the 10th of April, 1866. During his ministry, September 22, 1863, the one hundredth anniversary of the building of the Old South meeting-house was elaborately commemorated. At the meeting-house the Hon. Ira M. Barton made an introductory address, and Leonard Bacon, D.D., of New Haven, gave a historical discourse; while at Mechanics Hall, in the after part of the day, much reminiscent discoursing was had. The old meeting-house, a typical specimen of New England church architecture of the last century, with its elegant slender spire and faithful weathercock, was suffered to remain for nearly a quarter of a century longer before its demolition in August, 1887, under a municipal decree.

After Mr. Walker's dismissal the Rev. Royal B. Stratton was installed on the 2d of January, 1867. Serious disability, more or less impairing his usefulness, led to his dismissal on the 25th of April, 1872. His death occurred in this city on the 24th of January, 1875. On the 21st of May following Rev. William M. Parry, of Nottingham, England, received a unanimous call to the pastorate. He practically accepted the call and performed his duties as acting pastor, but was never installed. On November 3, 1873, he "resigned," but the resignation, taking the church by "surprise," was not accepted. On the 11th of December it was withdrawn, but on the 4th of January following he preached his farewell sermon. His preaching had been both dramatic and eccentric and consequently had drawn crowded houses. Leaving the Old South, he drew after him nearly one hundred and fifty of its communicants, and together they at once proceeded to organize a new church in Mechanics Hall by the name of the Tabernacle Church. Without loss of time a Congregational Council was convened for the purpose of recognizing the church and installing Mr. Parry as its pastor. The council received the church into fellowship but refused to install Mr. Parry. The church then proceeded to violate the principle of the fellowship, to which it had just been admitted, by an autocratic installation. The services on the occasion were performed by lay members of the church; and in that fashion Mr. Parry became the first and, as it proved, the only pastor of the Tabernacle Church in Worcester. Church and pastor both came to a speedy end. Mr. Parry suddenly died in his chair while making a call upon two of his female parishioners, and the church, already grown disgusted and disintegrated by his gross and increasing eccentricities, vanished into the inane.

To return to the Old South: The Rev. Nathaniel Mighill, a graduate of Amherst in 1860, was installed as Mr. Stratton's successor, September 25, 1875. The fate of so many of his predecessors overtook him also, and because of ill health he was dismissed on the 15th of June, 1877. Then followed the Rev. Louis Bevier Voorhees a graduate of Princeton in

1867. After occupying the pulpit for six months, a nearly unanimous call led to his installation on the same day on which his predecessor was dismissed. But neither in this instance did a change of ministers secure the church against the fate which so inveterately pursued its chosen pastors. After preaching for a time Mr. Voorhees was compelled to relinquish his charge, but his formal dismissal did not take place till the 5th of May, 1880, when his successor, the Rev. Joseph F. Lovering, was installed as the fourth pastor of the church and so remained.

A question had long been in issue between the city and the First Parish touching their respective estates in the land occupied by the Old South. The city claimed the land and wished to remove the building, and the parish resisted the claim and wished to preserve the building. Things remained in this condition until 1885, when the city obtained from the legislature authority to take all the title and interest of the parish. In May, 1886, the city council voted to take under the act. Thereupon the parish made an overture to the city towards an agreement upon the amount of damages. The city having declined to entertain the overture, the parish then proceeded, under the provisions of the act, to ask the Superior Court for the appointment of commissioners to award damages; and this was done. The case came on to be heard in July, 1887, when the city solicitor, Frank P. Goulding, appeared for the city, and Senator George F. Hoar for the parish. An exhaustive preparation and all the legal learning and skill of the respective advocates went into the case. After weeks of deliberation the commissioners brought in an award of \$148,400. The city refused to pay the award, and under the act claimed a trial by jury. A compromise followed resulting in the payment of \$115,395.25. With this money the parish purchased a lot on the corner of Main and Wellington Streets, and proceeded to erect thereon a church worthy of its history and rank as the First Parish in the city of Worcester. The corner-stone was laid on the 4th of July, 1888, and the exterior walls, of red sandstone throughout, were substantially completed by the end of the year. It is, without doubt, the most imposing church edifice in the city. A massive central tower, forty feet square and rising on four square marble pillars to the height of one hundred and thirty-six feet above the pavement, is the dominating feature. Another feature, appealing to a different sentiment, is the low belfry at the northeast corner, of architecture curious and fine, in which is suspended, as the sole relic connecting new and old, the bell (cast in 1802) that swung for eighty-five years in the old belfry on the Common. A parish-house at the rear, adding to the mass and architectural completeness of the whole structure, contains a variety and abundance of spacious apartments suited to all the multiplied and multiplying requirements of modern church life. The cost of this New Old South

at its completion is reckoned at one hundred and forty thousand dollars.

*The Calvinist or Central Church.*—The second church of this order was first named the Calvinist Church. It was an outcome, but not an outgrowth, of the First Church. As we have already seen, the settlement of Mr. Goodrich resulted in a serious disaffection towards his ministry. Among the disaffected and aggrieved were Deacon David Richards, his wife and eight others. In their extremity these persons summoned a council (the third) to advise them in the premises. This council was convened on the 16th of August, 1820, and having heard the case and approved a Confession of Faith and a Covenant which had been presented, proceeded on the 17th to constitute the applicants into a separate church under the name of the Calvinist Church in Worcester. It is worthy of note that the moderator of this council was the Rev. Nathaniel Emmons, D.D. For a certain length of time the new church maintained public worship in private places. The house of its first deacon, David Richards, seems to have been the first and principal place of worship. This house stood near the site recently purchased by the United States for the new post-office building. In this private way, without any pastor or parish, the church held itself together until 1822. In that year "articles of association" looking towards a parish organization were drawn up and signed. The first signature was that of Daniel Waldo, under date of April 3d; others of the same date followed, and within the next nine years more than two hundred and sixty others were added. On the first Sunday following, April 3, 1822, regular public worship was commenced in the court-house. This continued until October 13, 1823, when the society took possession of its meeting-house, which had been erected by Mr. Waldo at a cost of fourteen thousand dollars. The sermon at the dedication of this house was preached by Dr. Austin, who was in sympathy with the new church. In the next year the property was conveyed to trustees for the use of the church and society. Early in 1825 the organization was perfected by the incorporation of the Calvinist Society. Meanwhile, on the 15th of April, 1823, the Rev. Loammi Ives Hoadly, who had supplied preaching for the previous year, was ordained as the first pastor. His ministry was embarrassed by the unhappy relations which continued between this church and the Old South, but still went on with increasing success until a severe sickness brought it to a close. His dismissal, on a vote of the church, took place on the 19th of May, 1829. Recovering in a measure, he engaged in various activities,—as pastor again for a brief period, editor of *The Spirit of the Pilgrims*, assistant editor of the "Comprehensive Commentary," teacher and farmer. His last residence was in Northfield, Conn., his native place, and there he died quite recently at the great age of ninety-one, having outlived

all his successors in the pulpit of the Calvinist Church but the last two.

During Mr. Hoadly's ministry Mr. Waldo made a further addition of five thousand dollars to the resources of the society. Its growth continued unchecked, and in 1830, and again in 1832, the church edifice was variously enlarged and improved. This prosperity was due, in no small degree, to the popular ministry of the Rev. John S. C. Abbot, who became the successor of Mr. Hoadly on the 28th of January, 1830. During five years Mr. Abbot continued to go in and out among his people with great acceptance. While discharging his pastoral duties, he found time to write and publish two books which made his name known in both hemispheres. These were "The Mother at Home" and "The Child at Home," the former of which has been translated and published in nearly all the languages of modern Europe. In 1835 Mr. Abbot asked and obtained a dismission on account of ill health. After recuperation by a year of travel in Europe, he spent the remainder of his very active life in various pursuits, but became known to the wide world chiefly as the author of many popular books. Mr. Abbot was born in Brunswick, Me., and graduated at Bowdoin in 1825. He died at Fair Haven, Conn., on the 17th of June, 1877. His successor was the Rev. David Peabody, who was installed in 1835 within six months after the pulpit had become vacant. His ministry was short and much interrupted by ill health. In the year following his settlement, under the advice of his physicians, he sailed for the South, where he spent the winter. A temporary improvement enabled him to resume his pastoral duties in Worcester. But the attack on his lungs—for that was his malady—again enforced cessation from pulpit labor. He improved the time in travel. Arriving in Hanover the day after commencement, he learned to his surprise that he had been appointed Professor of Rhetoric in Dartmouth College, his *alma mater*. This, taken with the state of his health, determined his course. He obtained a dismission from his pastoral charge and in October, 1838, entered upon the duties of his new office. His tenure of this, however, was brief. His death occurred on the 17th of October, 1839, after one year of college service much interrupted by illness. The career of Professor Peabody was as brilliant as it was brief. His intellectual powers were of a high order. His mental discipline was thorough, his scholarship fine. His character was "a rare combination of strength and loveliness." With a figure and face of manly beauty and a rich and mellow voice, he stood before his people in the pulpit a preacher of singular attractions. His ministry long continued to be fragrant in Worcester.

The next pastor of the Central Church was the Rev. Seth Sweetser. His pastorate covered a period of forty years. It began on the 19th of December,

1838, and ended with his decease, in 1878. During this period, in 1845, occurred the death of Daniel Waldo, in a large sense the founder of the society. In his will he continued to remember it for good by devising to it, in connection with the church, a valuable real estate upon which stood the chapel of the society and a dwelling-house. In 1858 occurred the first interruption to the prevailing harmony. Until then the expenses had been defrayed by a tax on the polls and estates of the members. Under a new statute the expenses were raised by an assessment on the pews. This change caused the withdrawal of a considerable number of rich and influential members. But the vital forces of the body soon healed the breach and supplied new strength. Forty additional pews were provided to help bear the burden of the new tax. Dr. Sweetser was not a magnetic preacher; he had not the gift oratorical, but his compositions for the pulpit were of rare finish. He published occasional sermons which amply repaid perusal. On the death of President Lincoln he gave a discourse which had no superior, whether of pulpit or platform, in the whole range of productions called forth by that event. It was sought for from distant cities and the edition was exhausted before the demand was supplied. In his last years Dr. Sweetser's health declined until he was at length compelled to surrender the pulpit. But church and parish were unwilling to sunder the tie which had bound them so long together, and though his service ceased, his support (not his salary) was measurably continued until his death. Dr. Sweetser was born at Newburyport in 1807 and graduated at Harvard in 1827. For a time he was a tutor in the university, and in after years a member of the Board of Overseers. He sustained the same relation to Andover Seminary. Of the Polytechnic Institute in Worcester he was an original corporator and trustee, and to it he gave his best thought and work. Of the city he was an unobtrusive leading citizen, and among the clergy of the State he was a power. The bases of his influence were wisdom and reserve.

On the 19th of November, 1874, the Rev. Henry E. Barnes, a graduate of Yale in 1860, was installed as junior pastor. On the 3d of May, 1876, after a year and a half of service, he was dismissed, and soon settled in Haverhill, Mass., where a large measure of success rewarded his labors. For nearly two years the pulpit was supplied by candidates and quasi-candidates. Many were called, but few chosen. Then the Rev. Daniel Merriman, a graduate of Williams College, united all voices in calling him to the vacant place. The call was accepted, and in February, 1878, he was installed, the Rev. Dr. Richard S. Storrs, of Brooklyn, N. Y., preaching the sermon. Within a month came the death of Dr. Sweetser. In no long time after, the subject of building a new church began to be agitated, and foremost in the agitation was the new pastor. A conditional subscription was set on foot and the required amount was provided for; but the

enterprise developed antagonisms, which, in the interest of peace, made it necessary and certain that one party or the other should and would withdraw. Accordingly, four-fifths of the trustees, all but one of the deacons, the men whose money had been chiefly relied on, and a large body of others, old and young, quietly left their church home of a generation, voluntarily surrendered all the property and dispersed themselves among the other churches. But Providence, "from seeming evil still educing good," inspired the crippled church with courage to arise and build, and the result was one of the most beautiful churches in the city or elsewhere. It stands as a conspicuous monument of the recuperative power of a Christian democracy under adverse conditions. At its completion no root of bitterness remained to bear evil fruit, and those who withdrew and those who remained sat amicably side by side at the dedication of the new house. Its beauties were afterwards celebrated by the graceful pen of Prof. Churchill in the *Andover Review*.

*The Union Church.*—In the autumn of 1834 a few young men, chiefly from the Old South Church, conspicuous among whom was Ichabod Washburn, laid their plans for a new church. The need of it had been felt for several years, and it seemed to them that the time to act had fully come. Accordingly, the preliminary steps were taken, and on the 11th of March, 1835, they were duly incorporated under the name and style of the "Proprietors of the Union Meeting-house." At a meeting held in December of the same year it was voted that the name of the new church should be "The Union Church." In January, 1836, Articles of Faith and a Covenant were unanimously adopted, and on the 3d of February following a council constituted the new church with the customary formalities. On the 5th of March the society held its first meeting, and on the 6th of July its new house of worship was dedicated. It was a plain brick structure of 90 feet by 54, situated on Front Street, opposite the historic Common. Made more commodious in 1845-46, it was superseded in 1880 by a more beautiful but not more spacious edifice erected on the same site. The first pastor of the Union Church was the Rev. Jonathan E. Woodbridge. His installation took place on the 24th of November, 1836. His ministry began when the anti-slavery movement was burning its way through the churches. Union Church did not escape. Mr. Woodbridge took one side and the society took the other on the question of opening the church to anti-slavery lectures. On the 19th of January, 1838, the society, by a vote of forty-five to twelve, decided to open the house to the famous anti-slavery agitators, James G. Birney and Henry B. Stanton. Mr. Woodbridge thereupon promptly tendered his resignation, and on the 2d of February the society as promptly accepted it, and called a council to dissolve the relation between them. The first call to this pastorate, though unanimous on

the part of church and parish, had been declined by Mr. Woodbridge. Upon a second and more urgent call he had consented to come, only to discover in one short year that he and his people could never agree on the great divisive question of the day. His dismissal took place on the 14th of February. After leaving Worcester he became more widely known to the churches as editor of the *New England Puritan*, afterwards made one with the *Boston Recorder* under the name of the *Puritan Recorder*. The second pastor of the Union Church was the Rev. Elam Smalley, who was installed on the 19th of September, 1838. For nine years previous he had been associate pastor with the Rev. Nathaniel Emmons, D.D., of Franklin. Doubtless he had profited by such a long association with that remarkable divine, but no two persons could be more unlike in their mental characteristics. Reasoning, so eminently characteristic of the Franklin doctor, was not Dr. Smalley's forte or aspiration. He sought rather to edify by pleasing. If he did not prophesy smooth things, he yet prophesied in a smooth way. What he aimed at he accomplished. The church was built up, and his ministry of fifteen years was a success. The society testified its appreciation by repeated additions to his salary. In due time he was decorated with the doctorate of divinity. After seven years the meeting-house was altered so as to secure one hundred additional sittings while Deacon Ichabod Washburn at his own cost provided a vestry and Sunday-school room in the basement. In 1844 the society accepted from the "Proprietors of the Union Meeting-house" a deed of all their corporate property and assumed all their corporate liabilities. On the 8th of May, 1854, Dr. Smalley asked a dismissal, in order "to enter another field of labor." The request was granted, and he shortly after became the pastor of the Third Street Presbyterian Church in Troy, N. Y., and there, on the 30th of July, 1858, he died. In 1851 he published "The Worcester Pulpit, with Notices Biographical and Historical." The plan of the work included a sketch of each church and pastor in each denomination, with specimen sermons. It is a valuable source of information touching the churches of Worcester. The Rev. J. W. Wellman, a graduate and afterwards a trustee of Dartmouth, was the next choice of Union Church. He justified their choice by declining the call from a sense of duty to the obscurer church of which he was then the pastor. Dr. Wellman at a later day became conspicuous as the only trustee of Andover Theological Seminary who resisted the "new departure." Failing to secure him, the church next extended a call to the Rev. Ebenezer Cutler, of St. Albans, Vt. The call was accepted and the pastorelect was installed on the 6th of September, 1855. At the same time a subscription for a pastor's library was set on foot which resulted in a substantial sum for that essential but much-neglected furnishing of a church. In 1859 began a series of efforts, continuing

through several years, for either the enlargement of the old or the building of a new house of worship. Votes were passed to mortgage, to sell the old house, to examine sites, to build a new house, to raise money by subscription. An abiding feeling that the church was not well housed for doing its most effective work lay at the bottom of these spasmodic efforts. But out of it all the chief thing realized at the time was only a small addition to the rear for the organ and choir. The new church was still in the future. Dr. Cutler continued his ministry with growing reputation until 1865, when he was elected president of Vermont University. This called forth an urgent appeal from his people not to leave them, and he consequently declined the flattering offer. Shortly after, he received a tender of the Professorship of Ecclesiastical History in Hartford Theological Seminary, but this also he promptly put aside without waiting for it to take formal shape. In the autumn of 1874 he initiated the proceedings which resulted in the organization of the Worcester Congregational Club, of which he became the first president. The subsequent history of the club amply vindicated itself and him. In the winter of 1877 a bronchial trouble compelled him to seek relief in other climates. First going to Florida, and in the summer to Europe, he was absent from his pulpit until the following October, when he resumed preaching, though not fully recovered. Early in 1878, under stress of circumstances, he finally resigned his pulpit, retaining, however, his office. The pastoral relation was not dissolved until the 11th of October, 1880, just before the installation of his successor. The council, in dismissing him, made mention of his "wide usefulness" and "profound scholarship," and gave him the name of "a Christian man without fear and without reproach." He continued to worship with the Union Church which subsequently testified its affection and esteem by honoring him with the title of *pastor emeritus*.

For nearly two years the Rev. George H. Gould, D.D., supplied the pulpit in connection with the testing of candidates by preaching. During this period the new church, so long desired and so long delayed, was erected on the old site. As already remarked, it was a more beautiful though less capacious edifice than the old one. The cost was thirty-seven thousand five hundred dollars. A new organ of fine quality and appearance added to the attractions. The dedication of the house took place on Sunday, the 10th day of October, 1880, on which occasion the sermon was preached by the Rev. Henry A. Stimson, the pastor-elect. On the 14th, Mr. Stimson was duly installed. He was a graduate of Yale, and came to his new charge from a highly successful ministry in Minneapolis. His ministry in Worcester was distinguished by remarkably energetic parochial work. The young were especially soon made to feel of how much church work they, too, were capable. The printing-press was brought into play, and a Sunday bulletin

was issued every week. The service of song was extended and enriched. And by the plan of free seats on Sunday evenings the poor had the gospel preached to them. Large congregations rewarded these efforts, large additions to the church followed. In the midst of, perhaps because of, this marked success Dr. Stimson received a call from the church in St. Louis of which the lamented Dr. Constans L. Goodell had been pastor, and he decided it to be his duty to accept the call. His dismission, much to the sorrow of his people, took place in June, 1886. The present pastor, Rev. William V. W. Davis, was installed as his successor on the 15th of April, 1887. He was a graduate of Amherst in the class of 1873, had his first settlement in Manchester, N. H., and was called to Worcester from the Euclid Avenue Presbyterian Church in Cleveland, Ohio. Within the first year of his ministry one hundred members were added to the church. The present membership is five hundred and thirty-four.

*Salem Street Church.*—This church was the result of a joint contribution of men and means from the Old South the Calvinist and the Union Churches. The rapid growth of the city from 1840 to 1848 had impressed the pastors and brethren of those churches with a conviction that the time had come for the organization of a fourth church of their way. Measures were accordingly taken in 1847 for the erection of a church edifice. Meanwhile the persons enlisted in the new enterprise held preliminary meetings, adopted a creed and covenant, and on the 14th of June, 1848, were recognized as a church in a formal manner. Of the one hundred and thirty-three who constituted the membership, eighty went out from the Union Church, thirty from the Calvinist Church and the rest mostly from the Old South. The new church had its place of worship in the city hall until the 12th of December, 1848, when the new house, which had been erected on Salem Street, was dedicated. The cost was somewhat less than twenty-eight thousand dollars; the money was collected out of the three sponsorial churches. On the day following the dedication occurred the ordination of the Rev. George Bushnell, and his installation as the first pastor of the church. The sermon on this occasion was preached by his brother, the Rev. Horace Bushnell, D.D. Mr. Bushnell was a graduate of Yale in 1842, and had his theological education at Auburn and New Haven. He prosecuted his ministry with great satisfaction to his parishioners for nine years, and then found it prudent, because of impaired health, to withdraw from pastoral labor. By accepting the position of superintendent of public schools in Worcester he hoped to regain his health. However, after nearly a year of this labor it seemed expedient to lay down his pastoral charge, and he was accordingly dismissed on the 27th of January, 1858. Prior to this date the church had taken action at sundry times to provide a new pastor. On the 23d

of June, 1857, a vote was passed by a small majority to call the Rev. Merrill Richardson, of Terryville, Ct.; then at the same meeting the matter was indefinitely postponed. On the 9th of November, by a nearly unanimous vote, a call was extended to the Rev. Eli Thurston, of Fall River, which, however, was declined by him. On the 21st of December the church again voted to call Mr. Richardson, and the society concurred in the call. To this action, however, there was serious opposition, which found expression before the council convened to install him. The council, nevertheless, while giving respectful heed to the remonstrants, of whom there were forty-eight, proceeded with the business before them, and on the 27th of January, 1858, Mr. Richardson was installed as pastor of the Salem Street Church. After this untoward beginning he went forward with his ministry for twelve years. Then, on the 27th of September, 1870, he was dismissed at his own request, because his eyes had failed him for purposes of study. "When he came there was a storm, but when he went away there was a clear sky." In two months after, he was settled over the New England Congregational Church in the city of New York; and in two years after that he became pastor of the church in Milford, Mass. His death occurred in December, 1876. It was said: "He gave the church uniting power, and a certain healthiness of spiritual life." It was said again: "He was a warrior and a child; he was rough and gentle." And again it was said: "He sought to produce everywhere the peace of God in Jesus Christ." But it was also said by the late Judge Chapin, a leader of the Unitarians and at one time president of the American Unitarian Convention: "Mr. Richardson is a good enough Unitarian for me." These testimonies are all to be considered in forming an estimate of the minister who won the Salem Street pulpit with so much difficulty, but who, having won it, kept it undisturbed till he chose to give it up.

On the 8th of March, 1871, the Rev. Charles M. Lamson, of North Bridgewater, received a unanimous call from both church and parish. In his letter of acceptance he said that he viewed it as "a call to a work rather than to a place," and in this spirit he prosecuted his ministry. His installation took place on the 3d of May. In June he was appointed chairman of a committee to revise the church standards and to prepare a new manual. On May 1, 1872, the creed as re-written by the committee was reported and unanimously adopted. It would be a just description to say that it was the old creed liberated from the old straitness, and some might think from the old straightness, even. Entire harmony and deepening affection between Mr. Lamson and his people, increasing influence within the city and widening reputation without, marked his ministry from the beginning to the end. After more than fourteen years of service he felt admonished by the state of his health to ask a dismission. Very sorrowfully his people yielded to

his wish, and on the 28th of September, 1885, his dismission was declared in a result of council, which expressed in tones of rare encomium the appreciation of his clerical brethren. After a year and more the Rev. Isaac J. Lansing, of Brooklyn, N. Y., was called to the vacant pulpit. The call was unanimous, save for a single vote. Mr. Lansing was a minister of the Methodist Episcopal Church. He was content with its doctrines, but dissatisfied with its polity. He disliked its three years' limitation of ministerial labor. He preferred the Congregational permanency. The call to Salem Street was opportune and he at once signified his acceptance. The installation took place on the 11th of November, 1886. The loss of Mr. Lamson, and the loss of members because of that loss and also because of their nearness to other churches had greatly reduced the prosperity of the Salem Street Church. To the work of its recovery and enlargement Mr. Lansing brought all his methodist energy and forth-putting. He devised liberal things, all of which, however, he could not at once bring to pass. But a debt of five thousand dollars was paid off, and the meeting-house was renovated and re-seated at an expense of about eight thousand dollars more. Once more it was filled with an old-time congregation. In August, 1888, a unique departure was initiated. At its own motion and its own cost, without aid from the parish treasury, the church determined to provide an assistant minister for service over and above and outside of the pastor's proper work. This plan was carried into effect on the 18th of October, by the engagement of the Rev. William W. Sleeper. Several definite lines of activity were contemplated. The new minister, a thoroughly educated musician, was to take in hand the musical training of the congregation. He was to have a large Bible-class of the young men. He was to act as a missionary in the highways and hedges. And he was to do service at funerals and minister consolation to such as had no pastor to call upon. At the opening of the year 1889 this new and varied work was in successful progress; while, as an important reinforcement for its more pronounced success, the church had in that year secured the services of Prof. Benjamin D. Allen, who for thirty-four years had been the organist of Union Church.

*Summer Street Mission Chapel.*—This church had its origin in the benevolent heart of Ichabod Washburn. To provide "the benefits of moral and religious instruction and restraint for a pretty numerous class of persons, living in Worcester," was his aim. Accordingly he had erected, at his own expense, and caused to be dedicated in the spring of 1855, a Mission Chapel on Summer Street in that city. At the same time he made provision for the free ministry of the gospel to all who should resort to the chapel for such a privilege. The first minister employed in this service was the Rev. William T. Sleeper, then the city missionary. His term of service closed with the close

of the year 1856. Rev. Samuel Souther, a graduate of Dartmouth in 1842, followed him and remained until 1863, when he enlisted as a private in the army of the Union and gave up his life on the battle-field. Under his ministry an Industrial School was organized in December, 1857. In 1864 the Rev. Henry T. Cheever, a graduate of Bowdoin in 1834, succeeded to the ministry of the Mission Chapel. Through his inspiration a movement was begun for the formation of a church, and on December 23, 1864, eighteen persons constituted themselves the "Church of the Summer Street Mission Chapel," by the adoption of a Confession of Faith and a Covenant and the election of deacons and a clerk. On the 22d of January, 1865, the church was received into the fellowship of the churches by public "services of recognition held by a council in Union Church. On the 3d of April the church "constituted itself a religious society" or parish, "according to the statutes of the Commonwealth, under the name of "The Society of the Summer Street Mission Chapel." In March, 1866, Deacon Washburn executed his will and made ample provision therein for the perpetual maintenance of this charitable foundation. The Mission Chapel estate was devised to the Union Society, in trust, "for the purposes and trusts declared in the will, and no other." In addition, the sum of twenty thousand dollars was given for defraying the expenses of maintaining a minister and public worship, and a further sum of five thousand dollars to maintain the Industrial School connected therewith. By the decease of Deacon Washburn on the 30th of December, 1868, these gifts became operative. Mr. Cheever continued to be the minister of the Mission Chapel until the 1st of April, 1873, when Mr. Sleeper was appointed to his place by the joint action of two deacons of the Union Church and two of the Mission Chapel Church, in accordance with the provisions of the will. On the 26th of January, 1886, the trustees voted that it was expedient to sell the Summer Street property and locate the church elsewhere. This action was in harmony with the views and wishes of the Mission Church and its minister. But it was strenuously resisted by the former minister, Mr. Cheever, and by the widow of Deacon Washburn, on the ground that it was in violation of the letter and intent of his will and in defeasance of the object which he had at heart. The question went up to the Supreme Court by petition of the trustees for leave to sell and was decided in their favor.<sup>1</sup> The founder of this important charity began his life in Worcester as a workman for daily wages. At the close of his life he left an estate of more than half a million of dollars accumulated by his own industry and rare sagacity. The bulk of this great wealth he devoted

to the good of his fellow-men. All along the pathway of his life he was setting up monuments of his munificence, while his testamentary gifts for school and church and hospital far exceeded those of his life-time or those of any previous benefactor of the city.

*Plymouth Church.*—The beginning of this church was in 1869. More than twenty years had passed since the last church of this faith and order had been organized. In that time the city had grown from sixteen thousand to forty thousand inhabitants. The churches were crowded; it had become difficult to obtain seats; some, even, through failure to do so, had gone into the Methodist fold. Under these circumstances, fifteen young men met together in a private room to confer respecting a new church. They had acted together in the Young Men's Christian Association, had thus become acquainted with each other, and said it would be a good thing if they could have a Young Men's Christian Association church. They formed a nucleus around which other young men gathered. Soon the circle of interested persons widened and came to include older men and men of substance. Then the enterprise rapidly gathered headway. The first meeting was held on the 15th of April, 1869. On the 29th it was announced that Mechanics Hall had been secured for public worship during one year. Forthwith a subscription of three thousand three hundred and forty dollars was made by sixty-three persons to defray the current expenses; and within a week or two the sum was raised to about three thousand eight hundred dollars. A Sunday school embracing more than three hundred was at once begun, and on the second Sunday in May public worship was held in Mechanics Hall with preaching by Rev. Dr. E. B. Webb of Boston. On the same evening a meeting was held to take measures for organizing a church. A committee was charged with the duty of preparing and presenting a creed and covenant. When the time came for action thereon difficulties were encountered. Among others, the Rev. George Allen, who had proposed to become a member of the church, rose and gave his voice against the adoption of any creed whatever. Failing to convince the meeting he recalled his letter of recommendation and withdrew from any further connection with the enterprise. At a subsequent meeting the articles of the creed as reported were largely changed and then adopted. The question of a name came up. Edward A. Goodnow, the largest giver, and many others were in favor of making it a free church.\* Mr. Goodnow, therefore, moved that the name be the "Free Congregational Church," and to make it free he subsequently subscribed one thousand five hundred dollars a year to pay for the hall. His associates, however, were not yet prepared for the measure, and instead of that name voted that the name be "Sixth Congregational Church." Meanwhile, a society had been organized by the name of the Plymouth Society, and the church afterwards made its

<sup>1</sup> The writer is authentically informed that it is the purpose of Mrs. Washburn to contest the sale at the proper time on the ground that such sale would destroy "the testamentary lien of the Industrial School on the Mission Chapel."

own name conform to that. On the 7th of July a council assembled in the Old South meeting-house to assist in organizing and recognizing the new church. With a recommendation to amend the 4th article of the creed they proceeded to the performance of their functions. Of the one hundred and ninety-four persons proposing to be of the church, one hundred and twenty-seven were then present and were duly constituted the Sixth Congregational Church. A week later fifty-one of the remainder were received into the membership. Four deacons having been elected, and a communion and baptismal service having been presented by Mr. Goodnow and his wife, Catherine B. Goodnow, on the 5th of September the church celebrated its first communion. From that time onward a great variety of preachers occupied the pulpit until April, 1870, when the Rev. Nelson Millard, of Brooklyn, N. Y., received a call to become the pastor. The call was declined on the ground that continuous preaching in so large a hall would cause too serious a strain on the physical powers of the preacher. On the 26th of October a unanimous call was declined by the Rev. William J. Tucker, now the distinguished professor at Andover, perhaps for the same reason. A practically unanimous call of the Rev. B. F. Hamilton met with the same fate. Meanwhile the future pastor of Plymouth Church, the Rev. George W. Phillips, of Columbus, Ohio, had been heard in its pulpit for the first time at Christmas in 1870. After this experience had been repeated at intervals through the following year, he accepted a call and was installed on the 28th of December, 1871. A condition of his acceptance was that the society should build a church edifice. Accordingly funds and a site were the next things in order. In April, 1872, the site was fixed by a vote to build on the ground where the church now stands. This action split church and parish in two. The soreness of the wound however, was soon assuaged, and both halves continued to live as two wholes with a two-fold prosperity and usefulness. Fifty-six members received a peaceable dismission and straightway with others proceeded to organize a church in the more southern part of the city. The load became heavier on Plymouth Church but the sturdy shoulders under it did not succumb. On the 26th of April, 1873, the corner-stone was laid; on the 19th of April, 1874, the chapel was dedicated for use; and on the 29th of April, 1875, the entire edifice was done and dedicated. It is a structure of granite, with perhaps a larger seating capacity than that of any other church in the city, having seats for the comfortable accommodation of fourteen hundred persons. Its cost, including recent decorative improvements, has somewhat exceeded one hundred and fifty thousand dollars. In 1881 sixty-six thousand dollars of this cost still rested as a debt upon the Plymouth property and people. It was determined to obtain relief from the incubus by effecting, if possible, a large reduction of this debt. Suddenly, in the month

of April, Edward Kimball, of Chicago, the good genius of debt-burdened churches, appeared before the congregation to assist. While the matter was thus in hand, Edward A. Goodnow sent in a written proposition that if the debt were not merely reduced but extinguished he would make a gift to Plymouth of an organ and a chime, each to cost five thousand dollars. Under this incentive, coupled with Mr. Kimball's inspiration, the effort was redoubled, the debt was extinguished, and chime and organ were put in place, at a cost to the giver of nearly eleven thousand dollars. The chime was made a memorial of his deceased wife, for whom the church had before held a special commemorative service, by the inscription on the principal bell—*In Memoriam Catherine B. Goodnow*. After a successful pastorate of more than fourteen years Dr. Phillips, at his own request, was dismissed on the 10th day of May, 1886, and immediately settled as pastor of the important church in Rutland, Vt. On the 30th of June, in the same year, Plymouth Church and Society extended a unanimous call to the Rev. Arthur Little, D.D., of Chicago. The call was declined, and the church remained without a pastor until April 7, 1887, when the Rev. Charles Wadsworth, Jr., of Philadelphia, was installed. In May of the next year he resigned his office on the ground that he had accepted a call to a Presbyterian Church in San Francisco. The church was quite unreconciled to this sudden bereavement, but yielded to it under protest. However, the council called to dissolve the tie advised against it. This led to a reconsideration which resulted in a cordial re-establishment of the old relation. As the year 1888 wore on, however, the church was admonished by the failing health of its reinstated pastor that if it would keep him something must be done for his relief. Accordingly, in January, 1889, the parish voted to have, and provide for, a pastor's assistant. In this matter the Ladies' Benevolent Society had taken the initiative by assuming an obligation to pay one-half of whatever salary the parish should fix upon. By way of further relief, the pastor's annual vacation was doubled and a large addition made to his salary. In making these anxious and liberal provisions Plymouth Church felt justified by the magnitude of the work upon its hands. With the costliest church edifice of its order in the city and the largest church membership and no church debt and a constituency "rich and increased in goods," it was in a position both to devise and to execute liberal things.

*Piedmont Congregational Church.*—In the sketch of Plymouth Church it was stated that fifty-six members of that body were dismissed for the purpose of forming a church in the southern part of the city. This was the origin of Piedmont Church. The first steps were taken at an informal meeting held on the 3d of May, 1872. On the 10th of the same month it was resolved to organize a parish and purchase a lot on the corner of Main and Piedmont Streets. On the

16th the lot had been purchased and fifty-nine persons had signed an agreement to become a religious society. On the 23d the associates assembled under a warrant and organized the society according to law. On the 30th the name of "Piedmont Congregational Church" was adopted. The corporate name, however, continued to be the "Seventh Congregational Church in Worcester." On the 6th of June by-laws were adopted whereby "any person" proposed and elected by the major vote might become a member of the society. On the 14th the first subscription was made among those present at the meeting, and a sum of fifteen thousand dollars was pledged. Plans were adopted August 23d, and by September 20th the subscription had increased to twenty-four thousand dollars. Meantime, on the 2d of June, the first public religious service had been held in the Main Street Baptist Church. In the same place a council was organized, on the 18th of September following, for the purpose of constituting the church. The confession of faith, covenant and all preliminaries being found satisfactory, the church was duly constituted by the council. The sermon was preached by the Rev. George H. Gould, D.D., who remained as acting pastor from that date until 1877. In October ground was broken for the church foundation, which, by contract, was to be finished by the 1st of June, 1873. In due time the basement was completed and occupied for public worship during the period in which the superstructure was being finished. On the 1st of February, 1877, the auditorium was ready for occupation. It has a seating capacity of one thousand one hundred and twenty. The building is one of the largest church edifices in the city, and through improvements, chiefly of a decorative character made in 1888 at a cost of ten thousand dollars, is one of the most attractive. The original cost of land and construction has been set at one hundred and thirty thousand dollars. A fine organ, the gift of Clinton M. Dyer and wife, was placed in the organ-loft in 1884, at a cost, including a complete apparatus for blowing it by water-power, of about six thousand five hundred dollars. With the completion of the building came the first and only pastor, Rev. David O. Mears, D.D., who was installed on the 3d of July, 1877. Under his ministry church and parish kept pace with the most progressive. His reputation went abroad beyond Worcester, so that several doors were opened to him elsewhere. In 1885 he was invited to take the presidency of Iowa College. This, after careful consideration, he declined as he did also the pastorates of several important churches to which he had been invited.

*Park Congregational Church.*—The beginning of this church was a Sabbath-school gathered by a woman. To Lydia A. Giddings the praise is due. Along with and reinforcing her activity came that of the city missionary, the Rev. Albert Bryant. This was in the autumn of 1884. Presently a council ad-

vised the establishment of a church and measures were taken accordingly. In May, 1885, the first sermon was preached in Agricultural Hall by the Rev. J. F. Lovering, pastor of the Old South. The laboring oar was now placed in the hands of the Rev. Dr. A. E. P. Perkins, a resident minister without charge. Through his efficient labors, with those of his coadjutors, such progress was made that in the summer of 1886 a commodious chapel had been erected, and on the 26th of September was dedicated. The land for the site, on the corner of Elm and Russell Streets, was the gift of David Whitcomb. Including this, the whole cost was about nine thousand dollars. The title of the property is in the City Missionary Society. On the 24th of February, 1887, the church was constituted and at the same time the Rev. George S. Pelton, formerly of Omaha, was installed as its first pastor. At first a Society was organized on the old double-headed plan; but after nearly one year of church life passed in this way Park Church took advantage of the general law for the incorporation of churches enacted in 1887, and on the 17th of January, 1888, took on corporate powers and became itself a parish. Both men and women were named among the incorporators, and both were made responsible for the "government of the body" so far as they were "legal voters." The aim was to make impossible the old-time antagonism of church and parish. This the scheme assured. But just as under the old Congregational way, so now, there still remained two bodies in Park Church—a spiritual body independent of law and an artificial body subject to law.

*Pilgrim Congregational Church.*—The origin of this church was in marked contrast with that of the Plymouth and Piedmont Churches. While they sprang into existence as it were full-grown and displayed masculine vigor from the first, Pilgrim Church had a childhood. It was, in a sense, the child of the City Missionary Society. That society explored the ground and prepared the way and supplied the first preaching. Because of that society it came to exist when and where it did. It first became visible in the form of a diminutive Sunday-school, at No. 6 Hancock Street, on the 13th of May, 1883. Mrs. Fannie M. Bond, a city missionary, had gathered a little flock, and Mrs. Fannie H. Mighill, whose warm co-operation had been secured, opened her doors for its reception. At this first meeting exactly ten scholars were present, of whom five had never before been in a Sunday school. By the 8th of July the ten had become a crowd and Woodland street school-house was secured for its accommodation. In five years it had grown to nearly six hundred members. On the 1st of July, 1884, the school received the gift of a lot of land from Mr. F. B. Knowles, of Piedmont Church, and Mrs. Helen C. Knowles, of Union Church. The same persons, with others, contributed money for the building of a chapel which was finished and occupied on the 25th of January, 1885.

When completed it was the first of six houses of worship now (1888) standing between Piedmont Street and New Worcester. On the 16th of November, 1884, the Rev. Charles M. Southgate began pastoral work. He was a graduate of Yale in the class of 1866, and came to Worcester from a pastorate of nine years with the Congregational Church in Dedham. Under the fresh impulse imparted by him the enterprise went rapidly forward in the way of its enlargement and consummation. On the 19th of March, 1885, the church, embracing eighty-eight members, was organized, and at the same time the pastor was installed. On the 19th of August, 1887, ground was broken for the new church edifice, and on the 1st of July, 1888, it was dedicated. It stands on the corner of Main and Gardner Streets, is one of the most attractive churches in the city, and, with the other property, is valued at one hundred and ten thousand dollars. The auditorium has more than one thousand and fifty sittings, while the rooms devoted to the Sunday school accommodate more than six hundred persons. The society connected with this church was incorporated on the 13th of April, 1885. The by-laws provide that all male adult members of the church shall, and "any" adult members may, become members of the society.

Three things distinguish this from other Congregational Churches, and probably from all other churches in the city. The first is, the church and parish status. By requiring adult male members of the church to become members of the parish and members of the parish to be members of the church, it was designed, as in Park Church, among other things, to make antagonism between the two bodies impossible. One further thing seems essential to the complete success of this plan, and that is, to require all female, as well as male, adult members of the church to become members also of the parish. Without this, antagonism, however improbable, is nevertheless possible. The second distinguishing thing is the unique and admirable provision for the accommodation of the Sunday school. A spacious primary room, parlor and ten separate class-rooms have been so arranged that each can be shut off from the rest during the study of the lesson and then all thrown into one again for the general exercises. The third thing is the provision for the secular side of this church organization. The first chapel was moved to one side, named Pilgrim Hall, and fitted up with rooms for a gymnasium, carpenter's shop, boys' reading room, hall for social purposes and a kitchen. In this Hall the healthful secular life of Pilgrim Church goes on through all the secular days of the week. The membership of this church at the close of the year (1888) was two hundred and fifty.

*Church of the Covenant.*—This church is an anomaly of Congregationalism. At present it is tripartite, but it may become quadrapartite and indefinitely more. Under one church organization there are thus

far three "sections," each in a different part of the city. The names of these are, the Houghton Street Section, South Worcester Section and Lake View Section. Each section is an inchoate church, having some, but not all the powers of a Congregational Church. The peculiar organization grew out of the needs of the chapel congregations in charge of the City Missionary Society. Upon the incorporation of this society, in 1883, the congregations at South Worcester and Lake View came under its care. On the 19th of October, 1884, it organized a Sunday school in the neighborhood of Houghton Street, and on the 15th of October, 1885, dedicated the Houghton Street Chapel. In the chapel a council assembled on the 10th of December following to organize the church. At an adjourned meeting of the council held in the vestry of Plymouth Church, on the 22d of December, the business in hand was completed by the public recognition of the Church of the Covenant. In January, 1886, there were forty communicants in all the sections, of whom more than one half were in the Houghton Street Section.

Due provision was made for the practical working of this anomalous church. It was placed under the "pastoral care" of the City Missionary Society, with the city missionary, Rev. Albert Bryant, for its pastor. Each section was to manage its own sectional affairs. The pastor of the church was to be the pastor of the section and preside at all its meetings. He was to perform all pastoral, pulpit and sacramental duties for each separately. There was to be a secretary of the section and a clerk of the church, the former of whom was to transmit his record of sectional doings to the latter for permanent record. Each section was to elect one deacon or more, and the sectional deacons were collectively to be the deacons of the church. Any section might admit and dismiss members of its own body, but the duty of issuing letters of dismission and recommendation was laid upon the clerk. The discipline of its own members was placed exclusively in the hands of the section, as though it were an independent church. Matters of interest common to all the sections were referred to a general advisory board. This was to consist of the pastor, standing committees of the sections and two representatives of the City Missionary Society chosen annually. By this board the clerk of the church was to be annually elected. If the church was to be represented in any ecclesiastical body, each section was to take its turn in appointing the representative. Finally, the whole church and each section were to hold separate annual meetings. The title to all the property was vested in the City Missionary Society. After a trial of several years the working of the plan fully met the expectation of its authors. At the close of the year 1888 the membership had increased to sixty, more than half of which still belonged to the Houghton Street Section.

*PRESBYTERIANS.*—In the year 1718 about one hun-

dred families of Scotch descent and Presbyterian principles emigrated to this country from the north of Ireland. Landing at Boston, they dispersed to various points in Massachusetts and New Hampshire. A part came to Worcester, and in the next year gathered a church after the Presbyterian way. A minister, Rev. Edward Fitzgerald, accompanied them and preached to them for some months. Their place of worship was at first in the garrison-house, then recently built, near the junction of the Boston and Lancaster roads. Very soon they began to build a house of worship for themselves; but while it was in the process of erection "a body of the inhabitants assembled by night and demolished the structure." Discouraged by this unwarrantable opposition, they made no further attempt to build a sanctuary. But the church continued to hold on its way for some years. For awhile they worshipped with the Congregational church, nearly equalling them in numbers; but, failing in this way to secure any preaching of their own kind, they withdrew and again became separate with the Rev. William Johnson as their minister. While supporting him, however, they were also compelled by law to contribute their share to the support of the church of the "standing order." From this burden they, in 1736, asked but failed to be relieved. In the end, by successive removals and otherwise, this first Presbyterian Church in Worcester gradually vanished out of existence, and for nearly one hundred and fifty years no further attempt was made in that direction. Conspicuous among this early company of Scotch Presbyterians was William Caldwell, who very soon went from Worcester with his family and became the founder of the town of Barre. He lived to be one hundred years old, lacking one year. His grandson, William Caldwell, became the sheriff of Worcester County—"the model sheriff," as Governor Lincoln styled him. An ancestor of General George B. McClellan was also among these early Presbyterians of Worcester.

After the long interval already mentioned a second Presbyterian church was constituted. The first meeting for this purpose was held on the 21st of February, 1886, and on the first Sunday in April following public worship was inaugurated. The church was formally organized by the Presbytery of Boston on the first Sunday in September, 1886, with forty-eight members and the Rev. J. H. Ralston as acting pastor. Mr. Ralston was a graduate of Alleghany Seminary, afterwards was in Kansas for seven years as a home missionary, and was called to Worcester from that distant field of labor. The place of worship for this church is a hall in the building of the Young Men's Christian Association.

UNITARIAN CONGREGATIONALISTS—*First Unitarian Church*.—For about three-quarters of a century one church and one parish sufficed for the inhabitants of Worcester. Then the "Second Parish in the town of Worcester" was organized. That was and still

remains its corporate name, although the organization is commonly known as the First Unitarian Church. The genesis of the new body came about on this wise: The Rev. Mr. Maccarty, after a long and peaceful ministry with the First Church, had grown old, fallen sick and become unable to preach. A young man about thirty years old, Mr. Aaron Bancroft, was found to take his place in the pulpit. After he had preached for eight Sundays, Mr. Maccarty had so far recovered as to be able to resume his pulpit, and Mr. Bancroft went away. In the next year the aged minister died and Mr. Bancroft was again called in. This time his preaching caused commotion. Differences of opinion sprang up; the parish became divided, the peace of the town was disturbed and social intercourse interrupted. A second time Mr. Bancroft went away. Then the town—not the church—improved the opportunity to vote in town-meeting "that there be a day set apart for fasting and prayer in this town for calling on the Divine assistance for the re-establishment of the gospel ministry in this place." The town adjourned its meeting for one week, and then, four days before the one appointed for the fast, voted to have "Mr. Haven" preach four Sundays and after him Mr. Bancroft four. This arrangement brought Mr. Bancroft's first Sunday on the 10th of January, 1785. The date is significant. Three days later, without waiting to hear him on the remaining three Sundays, his admirers to the number of fifty-four signed and presented a petition for the town—not the church—to take action looking towards his settlement as Mr. Maccarty's successor. In the town-meeting held in response to this petition on the 1st of March, they moved this remarkable proposition: "That the town agree to settle Mr. Bancroft in the work of the gospel ministry, and such other person as may be agreeable to and chosen solely by those who are desirous of hearing further, and the settlement and salaries of both to be at the expense of the Town at large." The record says that "there was some debate." It adds that it passed in the negative. Defeated on this point, the petitioners then moved for leave to form a religious society over which Mr. Bancroft might be settled. This, too, passed in the negative. They then proceeded to take what the town had refused, with all its financial consequences. A voluntary association was formed, a covenant adopted and a church organized. Of the sixty-seven associates, only two men and four women had been communicants. But these, even, not having been dismissed from any other church for the purpose, were not competent, according to usage, to form the new one. A novel expedient was devised to meet this novel situation. A public "lecture" was appointed, at which the covenant was read and explained and then signed by all who chose to. In this way the church connected with the Second Parish was constituted. Public worship began on the third Sunday of March in the court-house, with preach-

ing by Mr. Bancroft. On the 7th of June he consented to become the minister of the new society, and on the 1st day of February, 1786, he was ordained. Only two ministers of the vicinage could be found to assist, the rest coming from Boston, Salem and Cambridge. After much difficulty and delay the new parish was duly incorporated on the 13th of November, 1787. It was a poll and not a territorial parish, and was the first of the kind in Massachusetts outside of Boston. Here some notice may fitly be taken of what seems not to have arrested the attention of any previous writer. By the ancient law of Massachusetts the method of choosing and settling a minister was after this manner: the church first made choice; then the parish—*i.e.*, town—concurred or non-concurred. Unless there had been church action there was no place for parish action. This law, originating in 1692, continued down through the last century and was in force when the Constitution of the Commonwealth was adopted. That instrument contained two provisions bearing on the matter in hand: first, parishes were given the *exclusive* right of electing their public teachers; and second, all the laws theretofore in force were declared to "remain and be in full force until altered or repealed by the legislature; such parts only excepted as are repugnant to the rights and liberties contained in this Constitution." Now, on the one hand, the law of 1692 giving to the church first and the parish afterwards the right of election never was repealed; but, on the other hand, that law was repugnant to the "*exclusive* right" of election given to parishes. And this appears to have been the legal status at the date of Mr. Bancroft's candidacy in 1785. The right of the church to any voice in the election of its minister had been simply annihilated. Whether this was known and fully understood at that time may well be doubted. Nevertheless, the business about Mr. Bancroft went forward precisely as though it was understood. The first and only resort was to the parish. The parish alone took action; the church took none. So far as its records show, Mr. Bancroft was not a candidate before that body. His name, even, does not appear on its records. The scheme to make him the minister of the First Parish manifestly originated outside the church and was carried on outside. And however much it turmoiled the town, it neither rent nor hardly ruffled the church. This view is supported by the fact, already stated, that only six communicants were found in the new movement. After the Bancroft party had withdrawn the First Church and Parish resumed their ancient relations and proceeded to elect Mr. Story as their minister by the rule of 1692; the church choosing and the parish concurring. The same course was pursued in the subsequent election of Dr. Austin. And this would seem to show that the procedure in Mr. Bancroft's case was accidental and exceptional, and not in the way of using the new power conferred on parishes by the new Constitution.

A house of worship for the Second Parish was the next essential thing. With much self-denial on the part of both parish and pastor—the latter relinquishing one-third of his salary—a building was erected, and on the 1st day of January, 1792, was dedicated. The modest edifice, shorn of its bell-tower and converted into a school-house, still stands on the spot where it was first placed, at the north end of Summer Street. Once installed in its pulpit, Dr. Bancroft for many years pursued the even tenor of his way, making many friends and no enemies, and by his virtues and writings building up a great and solid reputation. After forty-one years a colleague was provided, and on the 28th of March, 1827, the Rev. Alonzo Hill was ordained to that office. In 1829 the old meeting-house was deserted for a new and more spacious one built of brick on the site occupied by the present edifice. On the 19th of August, 1839, Dr. Bancroft departed this life at the age of nearly eighty-four. He began his preaching in Worcester as an avowed Arminian. He was also from the first, as he said, an Arian, but not an avowed one. At first he forebore to preach the Arian or Unitarian doctrine "because," in his own words, "the people were not able to bear it." When, thirty-six years after, he preached a course of controversial sermons in advocacy of that doctrine, he found they were able to bear it, as they evinced by asking for their publication. Curiously enough, one of these old sermons, on the "Annihilation of the Incorrigibly Wicked," places the Unitarian divine squarely by the side of the late rector of orthodox "All Saints."<sup>1</sup> The volume called forth a high encomium from President John Adams. "Your twenty-nine sermons," he wrote, "have expressed the result of all my reading, experience and reflections in a manner more satisfactory to me than I could have done in the best days of my strength." Besides this volume and the best "Life of Washington" in the day of it, Dr. Bancroft was the author of thirty-four other publications, chiefly sermons. In the "Worcester Pulpit" his character was drawn by the "orthodox" author of that work, with fit expansions and illustrations, as that of a benevolent, candid, brave, discreet, much-enduring and conscientious minister and man. His face, which art has made familiar in many places, has all the attractions of the ideal saintly pastor.

On the death of Dr. Bancroft, his colleague, Dr. Hill, became sole pastor, and so remained for more than thirty-one years. On the 29th of August, 1849, the church was destroyed by fire. Three days after the society began to build anew, and on the 26th of March, 1851, dedicated the present church edifice. While the body of the building is in the plain rectangular style of that day, the spire is a model of architectural beauty. In the pulpit of this church

<sup>1</sup> Compare Dr. Bancroft's twenty-seventh sermon with Dr. Huntingdon's "Conditional Immortality," published more than half a century after.

Dr. Hill completed his ministry of more than forty-three years. At the end of forty years from his ordination he preached a historical discourse, wherein may be found much interesting information touching the Second Parish and his own ministry. His death occurred February 1, 1871. Dr. Hill was a man of rare benignity; his face was a benediction. As a colleague he lived in entire harmony with his senior, and as sole pastor he perpetuated all amiable traditions. For nearly a century the Second Parish flourished under the two pastorates in an atmosphere of peace, diffused by the personal influence of the two pastors. The third minister of the parish was the Rev. Edward H. Hall. He had been installed as the colleague of Dr. Hill on the 10th of February, 1869, and succeeded as sole pastor at the decease of the latter in 1871. Mr. Hall closed his ministry of thirteen years to accept the charge of the Unitarian Church in Cambridge. He had so endeared himself to his parishioners that with unfeigned regret they yielded to the separation. He had continued and re-enforced the traditional amenities of the Second Parish ministry. He had approved himself "a scholar, and a ripe and good one." As a thinker he had pushed his way among the deep problems of thought, beyond what was commonly known of him. In the literature of art he was so much at home that many outside, as well as within his own parish, gladly came for instruction to the art lectures which he gave on several occasions. A broad and fine culture, coupled with a liberal faith, appeared to express the ideal towards which he continually aspired. And so, his transfer to the university town was a fit recognition of his aspirations and growth in that direction.

A vacancy of about three years was terminated by the installation of the Rev. Austin S. Garver, in 1885.

*Church of the Unity.*—Sixty years after the formation of the First Unitarian Church proceedings for a second were initiated. At the close of service in the afternoon of June 23, 1844, some persons, at the request of eleven members of the Second Parish, tarried to hold a conference on the subject. In August a committee reported in favor of a new Unitarian society. On the 25th of that month a meeting was held at which it was voted "to procure funds to pay for preaching, to hire a preacher, and to procure a place in which to hold religious worship, also to procure subscriptions of funds to build a church." Forthwith subscriptions were opened, a building fund inaugurated, the present lot on Elm Street purchased, and early in the spring of 1845 the erection of a church edifice begun. On the 26th of January in the same year the first religious service was conducted by the Rev. Dr. James Thompson, of Barre, in a hall over the Clarendon Harris book-store. On the 27th of November, after the necessary preliminaries, the "Second Unitarian Society in Worcester" became a body corporate under that name and style. The

number of corporators was forty-one, among whom were Pliny Merrick and Benjamin F. Thomas, afterwards justices of the Supreme Court of Massachusetts. On the 7th of February, 1846, the parish adopted the following, which is its only by-law: "Any person signing his name to a certificate in a book kept by the clerk for that purpose, signifying his intention to do so, shall thereby become a member of this parish." At the same meeting, by regular action on an article which had been put into the warrant, the parish voted that its name should be the "Church of the Unity." But it does not appear that anything was ever done to legalize this change of name. On the 10th of February, 1846, the Rev. Edward Everett Hale was unanimously invited to become the minister of the parish. On the 25th of April occurred the dedication of the church, and on the 26th the installation of the minister. The dedicatory sermon—a remarkable one—was preached by the Rev. Orville Dewey, D.D., and that of the installation by the Rev. Samuel Lothrop, D.D. No church was ever formed in connection with this parish, no creed or covenant ever adopted, no deacons elected. But, in semblance of church order, on the 25th of May, 1846, the parish, at a meeting duly warned, adopted these resolutions: "That a committee be directed to make the necessary arrangements for the administration of the ordinances of religion: That this church has united for all means and purposes of Christian fellowship: Therefore, that an invitation be given to all persons present to partake with us of the Lord's Supper." This action marked the striking departure from the First Unitarian Church, which from the beginning had a church organization with a covenant, diaconate and solemn admission to membership. The ministry of Dr. Hale continued for ten years. He then, June 30, 1856, resigned his office, not because of any dissatisfaction, but because he had received a call to Boston, where he would have leisure for study which the constant draft for sermon-writing in Worcester would not allow. His parishioners were dismayed at this threatened calamity and earnestly sought, but were unable to avert it. The brilliant career of Dr. Hale since he sundered this tie is known to all the world. Nine months went by before action was taken to provide his successor. On the 19th of April, 1857, from among several who had been nominated in the parish meeting, the parish by a major vote invited the Rev. George M. Bartol, of Lancaster to accept the vacant place. Mr. Bartol declined the call and the parish went on without a minister for a year and eight months longer, when, December 22, 1858, the Rev. Rush R. Shippen was installed. In July, 1871, Mr. Shippen resigned to take office as secretary of the American Unitarian Association. In a printed discourse Mr. Shippen said: "We observe the Communion as a Memorial Service only." Under his ministry, in 1865, the church edifice was enlarged by the addition of forty-six pews at a cost of five thousand

dollars. After nearly two years the Rev. Henry Blanchard was installed on the 4th of May, 1873. Mr. Blanchard came into the parish from among the Universalists, and when he left returned into that fold. But while with the Church of the Unity, he sought, in a printed letter addressed to his parishioners, to define more exactly their dogmatic position by this utterance: "We stand for liberty of thought and Christianity. We define this latter, in the words of Noah Webster, to be 'the system of precepts and doctrines taught by Jesus Christ.' We learn these from the words of the teacher as they are taught in the New Testament." Mr. Blanchard's resignation was dated March 4, 1880, and was accepted to take effect on the 1st of April following. The Rev. Roland A. Wood, by birth an Englishman, was installed as his successor on the 1st of June, 1881. On the 14th of September, 1884, he resigned his office, and on the 1st of January, 1885, the resignation took effect. A year elapsed before another minister was settled; during this interval extensive improvements were made upon the church edifice by the construction of parish rooms and a general application of decorative art. The cost of this outlay was fifteen thousand dollars. In this renovated and attractive edifice the Rev. Calvin Stebbins was installed as the fifth minister of the Church of the Unity in January, 1886.

In the autumn of 1888 Mr. Stebbins and other Unitarians began a mission of that order near New Worcester. By the 27th of January, 1889, the enterprise had made such progress that measures were then adopted for the organization of the third Unitarian Society in Worcester. At that date every prospect favored the consummation of the plan.

**BAPTISTS—First Baptist Church.**—James Wilson was the founder of the Baptist Societies in Worcester. He was a layman who came here from England, bringing his Baptist principles with him. On his arrival he found no one in Worcester like minded with himself save two old persons and Dr. John Green, who soon disappeared, leaving him alone. Trinitarian Congregationalism and Unitarian Congregationalism were in complete possession of the ground, with two doughty doctors of divinity to maintain it against all comers. But Mr. Wilson was neither dismayed, nor converted, nor driven away. He had a great staying quality, and because of it the Baptist idea at last took root and flourished. From 1795, the year of his coming, until the constitution of the First Baptist Church, in 1812, he kept the faith, occasionally had meetings for religious worship in his dwelling-house, and did what he could to nourish the seed he had planted. In time an association was formed, occasional preaching was had and the Centre School-house was rented for Sunday service. "Opposition applied the spice." On the 28th of September, 1812, the Rev. William Bentley was employed on a salary; on the 9th of December "the Baptist Church in Worcester" was constituted. It

was composed of twenty-eight members, equally divided between the sexes. The first pastor was installed on the same day. Mr. Wilson became one of the deacons, and probably the first. He had long before won the respect and confidence of his fellow-townsmen, so that, in 1801, he had been made the postmaster of Worcester, and he so continued until his removal to Ohio, in 1833. The creed of the church is given at length in Lincoln's "History." In the year 1813 the first meeting-house was begun and completed, and on the 23d of December was dedicated. It stood on the site of the present building. Mr. Bentley remained in charge until the 31st of June, 1813, when he asked and obtained a dismission. On the 3d of November, in the same year, the Rev. Jonathan Going accepted a call to the vacant pulpit. He remained till January, 1832, when, at his own request, he, too, was dismissed. The reason which he assigned for this step was, "that he might devote himself to the interests of home missions, especially in the valley of the Mississippi." He had visited the West the year before, and had come back greatly pressed in spirit to go to its help. Dr. Going was a remarkable man. He had been educated beyond many of his Baptist brethren, while his natural powers were of a superior order. In advance of his contemporaries he had a vision of the wonderful future of the great Western valley, and determined to do his part in giving it a set towards the right. Without loss of time the Rev. Frederic A. Willard stepped into the pulpit left vacant by Dr. Going. He was a graduate of Amherst in the class of 1826. The year before coming to Worcester he had received, but declined, an appointment to the professorship of chemistry in Waterville College. Having remained with the Worcester church till July 30, 1835, he then resigned, to become later the pastor of the First Baptist Church in Newton. He was succeeded, on the 27th of October, by the Rev. Jonathan Aldrich, who, after seeing the church enlarged, by the addition of two hundred and eighteen members, took his dismission in May, 1838. In April of the following year the Rev. Samuel B. Swaim became the pastor, and so remained for more than fifteen years. He was a graduate of Brown University in the class of 1830; in 1835 he had accepted a professorship of theology in Granville College, which the poverty of the college had not allowed him to retain. His ministry was one of great power. Under it the church "attained its highest numerical, social and financial condition." His death, at the age of fifty-five years, was felt to be nothing less than a calamity. In 1855 the Rev. J. D. E. Jones became the next pastor. After holding his office during four years he resigned it, in 1859, to become superintendent of public schools. He was succeeded by the Rev. Lemuel Moss, on the 14th of August, 1860. Remaining until the 25th of July, 1864, he then resigned his pulpit. Dr. Moss subsequently

became president of Indiana State University. On the first Sabbath in April, 1865, the Rev. H. K. Pervear entered upon his duties as the next pastor of this church. On the last day of the year 1872 his pastorate came to an end, and on the 1st day of April, 1873, the Rev. B. D. Marshall began his labors as the ninth pastor of the First Baptist Church. After a service of fourteen years Dr. Marshall resigned his office on the last Sabbath in March, 1887. His successor, the Rev. George C. Craft, was inducted into office in January, 1888.

The present church was erected in the time of Mr. Aldrich, on the site of the original building, which had been destroyed by fire. It was a larger and finer building than the first, and from time to time underwent important improvements, the latest of which, in 1888, involved an expenditure of nine thousand dollars.

*Second Baptist Church.*—This was a colony from the First Church. It was constituted on the 28th day of December, 1841, with ninety-eight members, of whom eighty-nine were from the parent church. In one year one hundred more were added. The first preacher was the Rev. John Jennings, and the first place of worship was the Town Hall, where religious services continued to be held till the close of 1843. On the 4th of January, 1844, the new house of worship on Pleasant Street was dedicated. No society was organized; the business of the body was transacted by the church, which was the owner of the property. The Rev. Mr. Jennings had become the pastor early in 1842, and he resigned his charge on the 27th of November, 1849, after nearly eight years of successful service. His successor was the Rev. Charles K. Colver who accepted a call to the pastorate on the 14th of April, 1850. After four years of service failure of health obliged him to resign his place. The next pastor was the Rev. Daniel W. Faunce, who entered upon his duties on the 1st of September, 1854.

In the year 1856 the house of worship was repaired and remodeled "at a large expense." The front was rebuilt because of the change in the street grade; the style of architecture was altered and a tower added. In 1860 Dr. Faunce tendered his resignation, to take effect on the 30th of April. On the 11th of June following the Rev. J. J. Tucker accepted a call to the pastorate, but after a service of fifteen months felt compelled, by the force of circumstances, to resign his place on the 30th of September, 1861. For nearly a year the church was without a pastor; then it was fortunate in securing the services of the Rev. David Weston. Having accepted a call some weeks before, he was duly ordained in August, 1862, as the fifth pastor of the Pleasant Street Church. Dr. Weston fulfilled his office with great satisfaction to the people of his charge for more than eight years, and then, on the 25th of November, 1870, laid it down "to engage in another sphere of labor." The

church, in a series of tender resolutions, bore its testimony to him as "a ripe scholar, skillful sermonizer and sound theologian."

Two ministers in succession were now called, but both declined the call. On the 7th of June, 1872, the Rev. I. R. Wheelock received a call, accepted it on the 10th of July, and was ordained on the 1st of August. After nearly three years his resignation was accepted on the 28th of March, 1875. He was followed by the Rev. Sullivan S. Holman, who was installed on the 10th of June of the same year. Having accepted a call to another field of labor, Mr. Holman offered his resignation, which was accepted on the 10th of March, 1882, "with feelings of sorrow." Six months after Rev. J. S. James, of Allentown, Pa., received and declined a call. On the 7th of December following the Rev. Henry F. Lane accepted a unanimous call, and on the first Sunday in January, 1883, entered upon his new ministry. On the 1st day of March, 1888, his term of service was terminated, by the joint action of pastor and people, after five years of uninterrupted harmony. On the 27th of June the Rev. H. J. White accepted a call which had been given on the 6th of that month.

*Main Street Baptist Church.*—This was a second colony from the First Baptist Church. In June, 1852, a petition by Eli Thayer and fifteen others was presented to that church, expressing a desire to form a third Baptist Church. They declared their readiness to begin at once, and dutifully asked for the support and approval of the mother church. The maternal sanction was promptly and cordially granted; the City Hall was at once engaged, and there, in July, the Rev. Dr. Sharp, of Boston, preached the first sermon for the new colony. Public worship was maintained in the same place until November, when the place of meeting was transferred to Brinley Hall. There a Sunday school was organized, and there preaching by the Rev. S. S. Cutting was continued through the winter. In the evening of February 26, 1853, a parish organization was duly perfected under the name of the "Third Baptist Society in Worcester." The business was done in the law-office of Francis Wayland, Jr., under a warrant issued by Isaac Davis. On Sunday, the next day, a committee was appointed to prepare Articles of Faith and a Covenant with a view to a church organization. On the 6th of March what were known as the "New Hampshire Articles of Faith" and "Covenant" were adopted, a clerk was chosen, and the church constituted with thirty-three members. At the same time the Rev. William H. F. Hansel was chosen to be the pastor; but the call he declined.

On the 18th of May the society voted to build a chapel at the corner of Leicester (now Hermon) and Main Streets. On the 23d of June the recognition of the new church took place with a sermon by the Rev. Dr. Ide, of Springfield. In the course of the year the chapel was completed at a cost, including

that of land and furnishing, of \$6461.17. On the first Sunday in January, 1854, it was occupied for the first time for public worship. On the 18th of September following Mr. H. L. Wayland was unanimously called to the pastorate. In accepting the call he relinquished two hundred dollars of the moderate salary which had been voted to him, as a contribution to the expenses of the society. On the 1st of November occurred his ordination, President Wayland preaching the sermon. On the 12th of February, 1855, plans for a church edifice were adopted and a building committee chosen. Early in May ground was broken; in the course of the year the house was finished, and on the second Sunday in January, 1856, was occupied for public worship. The whole property, including church, chapel, land and furnishing, had cost \$25,174.01.

After a highly successful ministry of seven years the resignation of Mr. Wayland was accepted, with much regret, on the 4th of October, 1861. A week before he had left his home to enter the service of the Republic as chaplain of the Seventh Connecticut Volunteers. For twenty-eight months he continued in that service; then became successively a home missionary in Tennessee, a teacher in two Western colleges, an editor in Philadelphia. On the first Sunday in May, 1862, his successor, Rev. Joseph Banvard entered upon the duties of his office. On the 15th of February, 1864, the parish voted to change its name, and take the name of the "Main Street Baptist Society," and at the same time took measures to obtain the legislative sanction thereto. Dr. Banvard having resigned after a ministry of nearly four years, adhered to his purpose against the earnest wishes of the church expressed in its vote of March 9, 1866. The church then elected as his successor the Rev. George B. Gow, in recognition of whom public services were had on the 18th of April, 1867.

In the next year an attempt was made to introduce the system of free seats; but, though the church adopted a vote affirming it to be "unscriptural and unchristian to rent seats," and offering to sustain the society in abolishing rentals, the latter body was found to be not then prepared for the innovation. In 1872 Mr. Gow's resignation was accepted, to take effect on the last Sunday in October. His successor was the Rev. F. W. Bakeman, who, after a pastorate of about three years and three months, terminated the same on the 1st of July, 1876. After an interval of sixteen months the Rev. George E. Horr became the fifth pastor of the church. He entered upon the duties of his office on the 4th of November, 1877, with services of recognition on the 20th. Before the close of this year the chapel was enlarged and improved at a cost of \$4829.40.

On the 2d of November, 1879, the twenty-fifth anniversary of the ordination of the first pastor, Rev. Dr. H. L. Wayland, was appropriately observed. A

discourse full of interesting reminiscences was delivered by Dr. Wayland, and afterwards printed by request. In honor of him it was voted, about this time, "that the bell to be placed on the tower bear the inscription, *Wayland Memorial*." By a change in the by-laws on the 10th of February, 1881, no person was thereafter to be admitted to membership in the parish who was not already a member of the church. On the 24th of October in the same year the resignation of Mr. Horr was accepted; and on the 3d of October in the next year, by a vote of thirty-nine to three, the Rev. Henry A. Rogers, of Montpelier, Vt., was called to the pastorate.

In 1883 an act was consummated by the parish that was, perhaps, without precedent. Acting upon the written opinion of the Hon. Peter C. Bacon, LL.D., the Nestor of the Worcester bar, the parish, at a meeting held on the 24th of April and 8th of May, under a warrant drawn by Mr. Bacon, transferred, in the way of gift, its meeting-house and all its other property, real and personal, to the deacons, "for the use of the church." In the warrant was an article "to see if the society would take any action in regard to dissolving the society." No formal action was taken under this article. After provision had been made for transferring the property it was "voted to adjourn without day." No meeting of the parish was ever held after that, and evidently it was assumed that the parish was "dissolved." But to all appearance the "Main Street Baptist Society" still lives and has a name to live.

Mr. Rogers continued his ministry with the Main Street Church until 1886, when a growing disagreement between him and certain of the membership, and also within the membership itself, culminated in the summary dismission of himself and fifty-six others on the 27th of October, "for the purpose of forming a Baptist church in the south part of the city." At the same time the pastor gave in his resignation, to take effect on the 31st. On the next day it was unanimously accepted. On the 19th of December the Main Street Church proposed a mutual council to the "South Baptist Church," but the overture was declined. On the 31st of January, 1887, Professor C. R. Newton was employed to supply the pulpit as acting pastor. This continued until the 23d of September, when the Rev. Charles H. Pendleton was duly installed.

*Dewey Street Baptist Church.*—As in many other cases, a Sunday-school was the beginning of this church. It was organized in the Mason Street school-house on the first Sunday in August, 1867. Mr. L. M. Sargent and other laymen from the First Baptist Church were the original movers in the enterprise. For several years Joseph H. Walker, member of Congress elect, was its superintendent. Under his efficient administration the school prospered so greatly that more ample accommodations were speedily called for. This led to the building of the

chapel on Dewey Street. The lot on which it was erected was the joint gift of the late Judge Francis H. Dewey and Joseph Mason, Esq. Including this land, valued at \$750, the cost of the property was \$4,570. Of this sum, \$1000 was the gift of Mr. Walker. The dedication of the chapel took place on the 8th of February, 1872, and from that date it was occupied for the Sunday school and religious services. The church was organized on the 8th of July in the same year with a membership of twenty-eight. Its first pastor was Mr. Sargent, the layman to whose zeal and efficiency the church had owed its origin. During five years of devoted service he had approved himself in that and other ways, worthy of recognition as one among the clerical brethren. Accordingly, on the 2d of May, 1872, he was called to the ministry of the Dewey Street congregation. This was two months before the church had been formed. On the 5th of September it was recognized by a council convened in the chapel, and at the same time Mr. Sargent was ordained to the work of the ministry and installed as pastor of the church. His ministry was brief. On account of ill health he resigned on the 2d of May, 1873. At the close of his term of service the membership of the church had increased to forty-four persons. The next pastor was the Rev. D. F. Lamson. Coming on the 1st of July, 1873, and remaining nine and a half years, he left, on the 1st of January, 1882, a church embracing ninety-five members. His successor, Rev. B. H. Lane, entered on his office on the 1st of June, 1882, and vacated it on the 15th of October, 1884. On the 19th of the same month the Rev. D. H. Stoddard assumed the office. Growing congregations and consequent prosperity soon made apparent the inadequacy of the chapel accommodations. Mr. Stoddard therefore took in hand the business of building a church edifice; and the Baptist City Mission Board, seeing the importance of the field and its manifest needs, cordially co-operated with Mr. Stoddard in his scheme of church-building. With the aid of \$7,000 from this source, more land was bought and a commodious edifice, with "perfect ventilation," was erected at a cost of \$14,844. The value of the enlarged lot was reckoned at \$2,000 additional. On Thanksgiving day in 1886 the vestry was first occupied, and on the 13th of January, 1887, the completed building was dedicated. The property is held by trustees, there being no parish organization. The seats are free and the current expenses are paid by weekly contributions. At the close of the year 1888 the membership of the church was one hundred and forty-seven.

*Lincoln Square Baptist Church.*—This church grew from very feeble beginnings. Sunday schools had been begun and discontinued; only occasional preaching had been had. Material resources were limited and lack of courage prevailed. Many years elapsed before the decisive step of forming a church was taken. There came a time, at last, when some of the

waiting ones "heard a call from God to go forward," and on the 4th of April, 1881, the church was organized. The original membership consisted of thirty-one persons, largely from the Pleasant Street Church. Public services of recognition were held on the next day in accordance with the vote of council. Through the summer following preaching was supplied by the Rev. D. F. Lamson, of the Dewey Street Church. In October the Rev. J. J. Miller entered upon his work as the first pastor. Till then public worship had been conducted in a hall; but the new pastor made it his first business to provide a church edifice. To his unwearied endeavors and personal influence it was owing that the enterprise was successful. In May, 1882, a building-lot on Highland Street near Lincoln Square was purchased and a substantial edifice of brick and stone of excellent architectural design was erected. The lower part of the house was occupied for religious services on the 8th of July, 1883. On the 10th of June, 1884, the dedication of the complete building took place. The cost of land, building and furniture was about thirty thousand dollars. Of this amount Joseph H. Walker, of the Main Street Baptist Church, was the largest contributor. Gifts also were made by friends outside the Baptist fold. "The property is held and controlled by the church through its appointed officers." The seats are free and current expenses are met by weekly offerings. In 1888 the membership was three hundred and seventy.

*South Baptist Church.*—The inception of this youngest of the Baptist Churches was as early as 1883, and was due to the Rev. Henry A. Rogers, then recently installed as pastor of the Main Street Baptist Church. Mr. Rogers believed in "missions," and had passed much of his life in setting them on foot. Immediately on beginning work in Worcester he took note of the fact that the whole section lying south of the Main Street Church was without any kind of Baptist organization. He therefore proposed to his own church the establishment of a mission in that quarter. The proposal met with little encouragement. Then he began a mission at his own charge. One day in June, 1883, he was casually introduced to a young Frenchman named Isaac B. Le Claire. This man had led an abandoned life, had been a Roman Catholic, and not very long before had been converted to the Baptist faith and was now living a sober life. A brief interview ended in his being employed by Mr. Rogers as a colporteur. He at once went to work holding meetings in school-houses and private houses. The results of his work proved him to be the right man in the right place; and, indeed, his subsequent career in a far wider field showed that he had a remarkable fitness for his work. His immediate success in South Worcester was such that by August the Main Street Church felt constrained to assume the charge of the mission. By the winter of 1884, every available place of meeting had become so crowded that Le Claire was moved to ask for the build-

ing of a chapel; his request was promptly heeded, and the chapel at Jamesville was the result. All this was preparatory for the South Church scheme. The first suggestion for a chapel on the site which it afterwards occupied was made in January, 1884, at a prayer-meeting in the house of William A. Norton. In February Mr. Rogers urged the new chapel upon his people, expressing with much detail the reasons for the enterprise. After a time the Baptist City Mission Board became possessed, as not before, with the mission idea and adopted a comprehensive plan for the city, including the South Worcester Mission. On the 14th of September, 1886, the Board took measures to secure the lot already mentioned, on the corner of Main and Gates Streets. On the 1st of October the Main Street Church, at a very large meeting of eighty-one members, unanimously voted in favor of the South Church enterprise. In view of this action, the board on the 19th made over all claim to the lot in favor of the South Church. On the 21st a large number of the Main Street Church agreed together to ask letters of dismission for the purpose of organizing the South Church. On the 27th, at a covenant and business meeting of the Main Street Church, where one hundred and thirty persons were present, of whom not less than one hundred and twenty were, by estimation, of the membership, fifty-seven were dismissed by a large majority vote. But of the fifty-seven only forty were present at the meeting. On the next day, October 28th, the fifty-seven members, including Mr. Rogers, assembled in the chapel on Canterbury Street and were constituted a church by the adoption of Articles of Faith and the election of deacons and clerk. At the same meeting was consummated the settlement of Mr. Rogers as pastor of the new church. On the 27th of February, 1887, the church was publicly recognized by a council duly convened. The Baptist Mission Board, having acquired possession of the old Dewey Street Chapel, conveyed the same to the new organization and it was removed to the lot already described, and there, fronting Clark University, on the 30th of December, 1887, it became the church home of the South Baptist Church. No parish was organized, but the deacons were made trustees, to hold the property for the use of the church, after the method advised by Mr. Bacon in the case of the Main Street Church. Land, chapel and other property cost the South Church \$5,000. The membership was one hundred and fifty-seven at the close of the year 1888.

**METHODISTS.**—Methodism made its first approaches for the capture of Worcester after a somewhat straggling fashion. In 1790, the Rev. Freeborn Garrettson, "that princely class-leader," as Dr. Dorchester styles him, came to Worcester, looked about town, fell in with Dr. Bancroft, by him was invited to tea, "drew back" because the Unitarian doctor did not think it worth while to say grace over the evening cup, and went on his way. Mr. Garrettson tells the story in

his private diary. The urbane Unitarian doctor was, perhaps, no less devout than his demonstrative Methodist brother, but in the seclusion of his own home he chose to order his devotions in his own way. Next after Mr. Garrettson came Bishop Asbury, in 1798, in 1805, 1807, 1812 and 1815. But neither he nor any other itinerant found any foothold in Worcester until 1823. Then the Rev. John E. Risley came and preached the first Methodist sermon heard in the town. Mr. Risley was travelling the Milford Circuit, embracing eighteen towns. In these he preached two hundred and thirty-five times in one year, but only five of them were in Worcester. These preachings were in a school-house at New Worcester, where were the only Methodists in town, and of these only a family or two. Other preachers came in subsequent years, but not until 1831 was any permanent society organized, forty-one years after Garrettson's advent. In June, 1830, the Rev. Dexter S. King had been appointed to this vacant field "to break up new ground." He began at New Worcester where he organized a class. This class was "kept alive" with preaching in the school-house once in two weeks. In 1833, Solomon Parsons joined the class and then began a movement for a society in the centre of the town. The way had been prepared by a young lad named Jonathan L. Estey, who came to town early in 1832 full of zeal to hunt up and consort with Methodists. He at last found and became a member of the class at New Worcester, and by his zeal so infected his associates that in the end Methodist preaching was established in the Centre. Early in 1833, a room was hired at the corner of Mechanic and Union streets for the use of a Class. There the Rev. William Routledge preached at times; at other times he preached in the Central Church vestry and in the Baptist Church. In the autumn what was considered a bold step was taken. Eighteen persons, at the head of whom was Solomon Parsons, presented to the town authorities a petition for leave to use the Town Hall for Methodist meetings. Leave was formally granted, and the first Methodist sermon was preached there by the Rev. Ira M. Bidwell. Then the work went on "in the old Methodist style." "The hall was crowded, and," says Bidwell, "we had a time of power. After this we did not want for a congregation in Worcester." Early in 1834 the Rev. Joseph A. Merrill was appointed by the bishop to this, the Worcester Mission. On the 8th of February thirteen persons were duly organized as the "Methodist Episcopal Religious Society in the town of Worcester." This was a parish organization, and Dr. Dorchester says the step was taken to obtain relief from taxation in other parishes. But this is a mistake. Prior to 1834 the law which would have made this step necessary had been changed. The further history of this organization is now to be pursued as that of the

*First Methodist or Trinity Church.*—In June, 1834, the Rev. George Pickering was appointed preacher to

this church, but was also charged with duties that carried him into several of the surrounding towns. Meantime, a board of trustees was appointed and a lot of land purchased for a church site. In the first year the membership had grown to one hundred and nine. In 1835 the Rev. John T. Burrill was sent to this charge. At this time the anti-slavery fever was at its height, and an incident occurred which imperilled the infant church. On the 10th of August Rev. Orange Scott, then the presiding elder, undertook to deliver an anti-slavery lecture in the Methodist place of worship at the Town Hall. In the midst of his discourse Levi Lincoln, Jr., eldest son of the Governor, entered the hall with an Irish accomplice, advanced to the desk, seized the speaker's manuscript and tore it in pieces. At the same time the Irishman laid violent hands on the speaker himself. This was done in the presence of an audience "embracing many persons who held the highest offices in the county and the state." The contemporary account of the affair in the *Worcester Spy* styled it a "Breach of the Peace." But the notice taken of it by the authorities seemed to indicate that the assailed and not the assailants were regarded as the peace-breakers; for directly after, the selectmen, at the head of whom was the late Judge Merrick, notified the Methodist society that if the Town Hall were ever opened again for an anti-slavery meeting their use of it for preaching would be forfeited. The society, in its weakness, was intimidated and did not again offend. But it marks the temper of the time that, later on, the courageous Scott was, by his own brethren, deposed from, or not re-appointed to, the presiding eldership because he would not promise to refrain from anti-slavery lecturing.

In the autumn of 1836 the erection of a church was begun on the southeast corner of Exchange and Union Streets, completed in March, 1837, and then dedicated. This was the first Methodist meeting-house in Worcester. The building was in the centre of population, but also in the centre of a mudhole. It stood on piles, and was approached by hopping from tuft to tuft of grass across puddles and ooze. The *Spy* of that day took pay for advertising the dedication of this lowly church, but took no notice whatever of the dedication itself, although it said in every issue that "its office was to noise abroad." The church survived all neglect, and, waxing stronger and stronger, in the end erected one of the finest church edifices in the city, compelling the homage of the public and the press.

In 1837 the Rev. James Porter came, and remained one year. Although a year of general bankruptcy, it was one of great enlargement for the church. About one hundred and seventy-five probationers were added to the membership during his year. Mr. Porter was succeeded by the Rev. Jotham Horton, whose term of service was equally brief. In May, 1839, the church property was legally transferred to a board

of trustees, in accordance with the Discipline of the Methodist Episcopal Church. The Rev. Moses L. Scudder succeeded to the pastorate in this year, to be followed by the Rev. Miner Raymond in 1841. Mr. Raymond remained two years, showed himself eminent as a preacher, and "made many friends beyond the limits of his own society." This year was made memorable for Worcester Methodism by the meeting of the New England Annual Conference in the town for the first time. In 1843 the Rev. Charles K. True, D.D. was assigned to the charge of this church. He was a graduate of Harvard and a Methodist minister of mark. Under him the project for removing the church to a site near the Common was "renewed." But while they still delayed, it was burned to the ground. Then a site was speedily purchased and the Park Street Church erected. The Rev. Amos Binney had become the pastor in 1844, and under him the new church was dedicated on the 16th of August, 1845. It was noted that Mr. Binney's term of service was very "profitable" financially, since he had carried his people through many embarrassments growing out of the church-building. After him came in succession the Rev. Jonathan D. Bridge, Rev. Loranus Crowell, Rev. Nelson E. Cobleigh, Rev. Z. A. Mudge, Rev. Daniel E. Chapin (a favorite, sent a second time), Rev. Fales H. Newhall, Rev. Chester Field, Rev. John H. Twombly, Rev. John W. Dadmun, Rev. John H. Mansfield (whose ministry of three years was very prosperous), and Rev. Charles N. Smith in 1868.

By this time the Park Street church had become too strait for the congregation. The society, therefore, now grown strong in numbers in courage and in resources, determined upon building a new church adequate to its new demands. Accordingly, a site was procured on the corner of Main and Chandler Streets, in the close neighborhood of the new United States Post-Office building, and there they erected Trinity Church at a cost, including the land, of one hundred thousand dollars. This crowning church of Methodism in Worcester was dedicated on the 25th of April, 1871. The Rev. F. W. Mallalieu, D.D. (afterwards bishop), was the first preacher appointed for Trinity after the occupation of the new house. He came in April, 1871, and remained one year. Rev. Ira G. Bidwell, appointed in 1872, remained three years. He was followed by Rev. V. A. Cooper, who was appointed to help the church financially as well as spiritually. In that respect there was no disappointment, as through his agency the debt was reduced by thirty-five thousand dollars in one year. The Rev. A. P. Kendig followed him in 1877, after whom came in succession Rev. J. A. Cass, in 1879; Rev. C. S. Rogers, D.D., in 1882; Rev. W. T. Perrin, in 1885, and Rev. W. H. Thomas, D.D., in 1888.

*Laurel Street Church.*—The selection of Park street for the new site of the First Church had not been satisfactory to all the members. Some thought it

carried the church too far from the centre of population; it was too far south. Out of this dissatisfaction grew the Laurel Street Church. This was as far to the north. For a time, however, the new colony had its place of worship on Thomas Street, which was more central. The church was duly organized on the 20th of July, 1845; but it was not until the 27th of February, 1849, that the new house on Laurel Street was dedicated. The first pastor was the Rev. Richard S. Rust. He was soon elected principal of the New Hampshire Conference Seminary, and after a pastorate of seven months was released from his engagement. The Rev. J. W. Mowry followed, after whom came the Rev. George Dunbar. This pastor was indefatigable in his efforts to secure the erection of the new house of worship. In April, 1849, he was succeeded by the Rev. Francis A. Griswold, after whom came in succession the Rev. Cyrus S. Eastman, Rev. William M. Mann in 1850, Rev. David H. Higgins, Rev. Joseph W. Lewis in 1853, Mr. Mowry again in 1854, Rev. Henry W. Warren in 1855 (afterwards bishop), Rev. Ichabod Marcy in 1857, Rev. Samuel Kelly in 1858, and Rev. Jefferson Hascall, who had long been favorably known as a presiding elder and was with the Laurel Street Church in the latter part of 1861 to fill out the term of Rev. Joseph C. Cromack, who had been appointed in 1860, but had left in August, 1861, to become chaplain of the Nineteenth Regiment of Massachusetts Volunteers. In 1862, Rev. T. W. Lewis was appointed to the charge but left in 1863 to become Superintendent of Methodist Missions in South Carolina, Rev. James Dean completing his term. After him came Rev. M. M. Parkhurst in 1864, Rev. Samuel Kelly again in 1865, under whom the church reached its highest prosperity; Rev. Angelo Carroll in 1867, under whom the sum of two thousand dollars was expended in church improvements; Rev. William Pentecost in 1869, Rev. H. D. Weston in 1872, Rev. William Pentecost again in 1875, Rev. Fayette Nichols in 1878, Rev. Garrett Beekman in 1880, under whose ministry "the congregation doubled;" Rev. G. M. Smiley in 1883, continuing three years, in the last of which the fortieth anniversary of the church was celebrated; Rev. Ira G. Ross in 1886, and the Rev. Alonzo Sanderson in 1887. Besides his spiritual work, Mr. Sanderson devoted himself energetically to the improvement of the financial condition of the society, and among other measures established a monthly paper called the *Worcester Methodist*, from which about fifty dollars a month come into the parish treasury. The value of the church property, aside from the parsonage, is set at twelve thousand dollars. The membership in 1888 was about one hundred and thirty-two.

*Third M. E. (Webster Square) Church.*—This church was organized in 1860. Two thirds of its first members came from Park Street Church. Its first pastor was the Rev. Daniel Dorchester who had also been the chief agent in its organization. In 1855 he had

become a member of the Connecticut Senate where he acted a prominent part in various directions. But in later years Dr. Dorchester became greatly more distinguished as the learned historian and statistician of the Methodist Connection. The first religious services of this church were held in Union Hall. The membership, at first small, increased more than tenfold during the first year. Members of other denominations in the vicinity took a lively interest in the enterprise and contributed to its maintenance. In 1863 the Rev. William Gordon became the pastor. To him succeeded, in due order, Rev. William A. Braman in 1864, Rev. William Pentecost in 1866, Rev. Edward W. Virgin in 1867, and Rev. Benjamin F. Chase in 1869. This last pastor was in the midst of a work of great spiritual power, when he was suddenly prostrated by a hemorrhage which, after prolonged illness, terminated his life. His memory long remained fragrant in the church. After him came the Rev. Charles H. Hanaford, in 1870. Under him the long-agitated subject of church-building assumed definite shape; contributions came in from members and from others outside, notably from Albert Curtis and the Messrs. Coes, and the house was erected on a fine site purchased long before, and on the 27th of April was duly dedicated. The cost was about \$20,000. In 1872 the Rev. Pliny Wood was appointed to the charge. After him came the Rev. Mr. Parsons in 1873, Rev. E. A. Titus in 1875, Rev. V. M. Simmons in 1878, Rev. Daniel Richardson in 1879, Rev. J. W. Finn in 1880, Rev. N. Fellows in 1882, Rev. J. O. Knowles in 1883, and Rev. L. W. Staples in 1886, completing his term of three years in 1889.

*Grace Church.*—The growth of the city and the influx of Methodist families led up to this enterprise. To save these families from wandering into other folds, as well as to help on the religious life of the city, was the burden laid on pious and sagacious Methodists. The decisive push, however, was given by the presiding elder, Dr. Dorchester, in a sermon on the moral condition of our cities preached in February, 1867. This was reinforced by the approval of the Annual Conference in April following. By this body the Rev. J. Oramel Peck, a graduate of Amherst in 1862, was appointed to the pastoral charge of the society, which had already been organized under the name of the "Main Street Methodist Episcopal Church." Washburn Hall was secured for Sunday services and Lincoln House Hall for other meetings. Pluck and push ruled from the first. Said Dr. Dorchester: "A more spirited and liberal company of Christians have seldom been united in church fellowship." The hall was filled to overflowing; the Sunday school quickly became one of the largest in the city; in the first two years the society raised about twenty thousand dollars. Dr. Peck, afterwards distinguished in a wider sphere, was a man of great power, physical endurance, untiring activity and worthy ambition. To him was ascribed in a large de-

gree the instant success of this church enterprise. The edifice was not completed till 1872, under the ministry of his successor, the Rev. Andrew McKeown. The site finally chosen was on Walnut Street instead of Main Street, and the name of Grace Church was substituted for the one first adopted. The cost of the land was ten thousand dollars. In July, 1871, the vestry was completed and occupied for religious services. The church was dedicated in January, 1872, with a sermon by the Rev. Dr. Eddy, of Baltimore. The successor of Mr. McKeown was the Rev. J. O. Knowles. He came in 1872 and remained one year, and was then succeeded by the Rev. C. D. Hills, who remained three years. In 1876 the Rev. George S. Chadbourne, afterward presiding elder of the Boston District, was appointed to Grace Church. He occupied his term of three years largely in pushing the church through a period of financial embarrassment. That serious business, however, was relieved by the observance, in May, 1877, of the tenth anniversary of the church, when an eloquent sermon was preached by Bishop Foster. In 1880 the Rev. J. W. Johnson, an Englishman, was appointed to the charge. His pastorate of two years resulted in securing the warm attachment of his people. The Rev. D. H. Ela, D.D., followed him, and continued in charge till 1885. He was eminent alike in preaching and in providing for the payment of the church debt. His successor, the Rev. George Whittaker, will long be remembered with gratitude for his powerful and successful advocacy of the no-license cause in the city. In September, 1887, he was called to the presidency of Wiley University, a Southern college, and the church was left to the strange experience of hearing till the next Conference a succession of preachers not appointed by that authority. But in April, 1888, Grace Church resumed its normal condition under the Rev. John Galbraith, who was then appointed the minister in charge.

*Coral Street Church.*—In olden time a gentle eminence to the southeast of the "little village of Worcester" bore the Indian name of *Sagatabscot*. There, in 1679, the first white man, Digory Serjent, built his house, and there, in spite of warnings against the red savages, he persisted in living until 1702, when a rescuing party arrived only to find him lying slain in his dwelling and his family carried into captivity. *Sagatabscot* remained bare and open till 1869, when the city began to creep over its slopes and it was christened Union Hill. The houses soon multiplied to such an extent as to attract the attention of the Methodists to the locality. The Rev. Mr. McKeown, of Grace Church, was the first to move, and by him well-known laymen of that and other Methodist churches were enlisted for work there. On the 15th of September, 1871, a church lot was purchased on the corner of Coral and Waverly Streets for the sum of seventy-two hundred dollars. In the same month open-air Sunday services were held on the lot

at five o'clock in the afternoon by the Methodist ministers of the city. Subscriptions toward the enterprise of about nine hundred dollars were there obtained; through the personal solicitations of Mr. McKeown the amount was increased to about eighteen hundred dollars. In January, 1872, a Sunday school with one hundred and fifty members was organized in Scofield's block at the foot of Coral Street. Teachers from other denominations were enlisted, and among the scholars were twenty boys of Roman Catholic parentage. Presently, the presiding elder appeared on the field, conferred with the committee in charge and decided that the mission should be erected into a regular appointment at the next meeting of the Conference. This body assembled in Worcester on the 27th of March, when the Rev. S. E. Chase was appointed the first pastor in charge. From that time a regular preaching service was held in the third story of Scofield's block. The first congregation consisted of twenty persons. On the 23d of April various plans and estimates for a church edifice were presented to the committee, and the result was that a contract was closed for a partial completion of the building at a cost of eighty-eight hundred dollars. On the 8th of May following the church was organized with eighteen members by Rev. L. Crowell, the presiding elder. Hard work and dark hours because of limited means followed this beginning. But through the zeal and labors, notably of Alpheus Walker and N. H. Clark, the building was completed at a cost of thirteen thousand dollars, and on the 16th of April, 1873, was dedicated. In March, 1872, the mission had been named Christ Chapel, but in January, 1883, it received the name of Union Hill M. E. Church. Still another change was made on the 24th of April, 1876, when it assumed the name of Coral Street M. E. Church. Mr. Chase remained in charge for three years and was then succeeded by the Rev. H. D. Weston. In 1875 a vestry was built at a cost of three thousand dollars and dedicated in December of the same year. In the spring of 1878 the Rev. Jesse Wagner was appointed to the charge. His term of service closed in April, 1881, when he was succeeded by the Rev. Austin F. Herrick. About this time serious financial complications threatened the existence of the society. A compromise was at last happily effected, whereby claims to the amount of fifteen thousand dollars were canceled and a solid financial basis secured. In April, 1883, the Rev. Charles Young came in charge and remained till April, 1886, when the Rev. William P. Ray became his successor.

**ROMAN CATHOLICS.**—The canal and the railroad were the means of bringing Roman Catholicism into Worcester. First came the digging of the Blackstone Canal from Worcester to Providence; this brought many Irish laborers to Worcester and vicinity. The construction of the Boston and Worcester Railroad followed, bringing many more. These people and

their families naturally desired the kind of spiritual guidance to which they had been accustomed. As they found nothing of the kind then in Worcester, they asked Bishop Fenwick, of Boston, to send them a priest. In answer to this application, the bishop sent them the Rev. James Fitton, a recent student of his, then just settled in Hartford, Conn. This led to the inclusion of Worcester in the "missionary circuit" to which Mr. Fitton had also been appointed. He came to Worcester in 1834, and in the spring of that year held the first religious service of the Roman Catholic Church. It was held in the old stone building, still standing, on Front Street near the line of the old Blackstone Canal, the front wall, however, being now of brick. At that time only six or seven families, embracing about twenty-five persons, were enlisted. In the next year the first Roman Catholic church in Worcester was erected on the site now occupied by

*St. John's Church.*—It was named Christ Church, and was a wooden structure thirty-two by sixty-four feet. This sufficed until 1845, when it was removed to make way for St. John's. Christ Church, after its removal, received additions and became the "Catholic Institute." The corner-stone of St. John's Church was laid on the 27th of May, 1845, with imposing ceremonies, under the episcopal supervision of Bishop Fitzpatrick; and on the 24th of June, 1846, the church was dedicated with still more imposing ceremonies. The dimensions of the building were sixty-five by one hundred and thirty-six feet, and for a long time it was the largest church in the region. The cost was forty thousand dollars. It was ample for the whole Roman Catholic population, which at that time embraced only about thirteen hundred souls. Father Fitton, who may well be styled the father of Romanism in Worcester, left the town in 1843, and returned to Boston, where he was born, and where later on he died. He was a man of some literary parts and the author of several volumes. The Rev. A. Williamson succeeded Mr. Fitton in October, 1843, and remained till April, 1845, when he resigned because of ill health. His successor was the Rev. Mathew W. Gibson, who was characterized as "a man of great energy and power." He remained in the pastorate till April, 1856, and was largely instrumental in building not only St. John's, but also St. Anne's, spoken of further on. After Father Gibson came the Rev. John Boyce, who had been his predecessor's assistant. He died in 1864, while in charge, greatly regretted. He, too, was a writer of merit, "an able writer of fiction," and the author, among other things, of "Paul Peppergrass." His birthplace was Donegal, Ireland, and Maynooth was his *alma mater*. The Rev. Patrick T. O'Reilly, D.D., afterwards bishop of the diocese, was the successor of Father Boyce as pastor of St. John's. From 1857 to 1862 he had been the assistant pastor. In the latter year he removed to Boston, whence he returned to become the pastor of the Worcester church. Upon his elevation to the bishopric, in 1870, his assistant,

the Rev. Thomas Griffin, was appointed to the pastorate of St. John's.

*St. Anne's Church.*—This church was an offshoot of St. John's. Commenced in 1855, it was completed in 1856, under the direction of the Rev. John J. Power, who became its first pastor. He remained such until 1872, when the Rev. Dennis Scannell was appointed to the place, which he still held in 1888. In 1884-85 came a great enlargement and aggrandizement by the erection of "new St. Anne's." The old church was of wood, and the new one of brick and stone. The old one stood on the low level of the unsightly "meadow," hard by; the new one, placed on a sharp elevation, was made a conspicuous object of admiration for all beholders. The dimensions of the edifice were seventy by one hundred and fifty-seven feet. The auditorium has a capacity for seating one thousand one hundred persons. Twin towers, rising to a lofty height, form a distinguishing feature of this imposing edifice. It is one of the costliest churches in the city.

*St. Paul's Church.*—This church was formed on the 4th day of July, 1869, and on the same day the corner-stone of the superstructure was laid with appropriate ceremonies. The basement had been completed and served as a place for public worship until July 4, 1874, when the church itself (save the tower) was finished and dedicated. It is a Gothic structure, of cathedral proportions, with a façade of ninety feet in width, and with a length of one hundred and eighty-five feet, and stands upon elevated ground in the heart of the city. It is constructed of granite throughout, and cost two hundred thousand dollars. When its tower shall have been completed, according to the original plan, it will overtop any other structure in the city. This noble edifice owes its origin and completion to the Rev. John J. Power, D.D., the first and only pastor of St. Paul's, and the vicar-general of the diocese.

*Church of Notre Dame.*—This is the only French Catholic Church in Worcester. The first movement toward its establishment was in 1869. Its name in full is "Church of Notre Dame des Canadiens." The first pastor was the Rev. J. J. Primeau. In 1870 the Methodist Church on Park Street was bought for its use at a cost of thirty-two thousand seven hundred dollars. Here the first Mass was celebrated in June, 1870. At the beginning the church embraced seven hundred and forty-three souls, of whom eleven hundred and fifty-nine were communicants. In eleven years the first number had grown to be four hundred and thirty-three, and the number of communicants to be two hundred and thirty-five, while in 1884 there were over five thousand souls. In 1880-81 the great increase of the congregation required an enlargement of the edifice, and the result was, in effect, a new structure. The plain old building was transformed, by fine architectural touches, into a handsome and spacious edifice, adding much to the surrounding at-

tractions of the historic Common upon which it fronts. The dimensions are fifty-four by one hundred and twenty-eight feet; the cost of the improvements was thirty-five thousand dollars. The pealing of the *angelus* from the massive bell in its tower daily reminds the city of its existence and the faithful of their duty. After Mr. Primeau's retirement the Rev. Isadore Beaudry became in 1882 the pastor, and in the following year he was succeeded by the Rev. Joseph Brouillet, who was in charge in 1888.

Besides the church of Notre Dame, Father Brouillet has charge of several French missions, which he established after coming to Worcester. The first of these was,—

*St. Anne's*.—This mission was established at South Worcester on the 9th of January, 1886. A house was purchased by Father Brouillet at a cost of five thousand dollars, and was converted into a temporary home for the mission.

*St. Joseph's* was established on the 9th of January, 1887, at the corner of Wall and Norfolk Streets, on Oak Hill, where a chapel was built in that year at a cost of sixty-five hundred dollars. Incipient measures have been taken to add to the number of these missions.

When Father Brouillet came in 1883 he at once proceeded to take a census of the French Catholic population of Worcester, and found it to be eight thousand. According to his careful estimate, this had increased to nine thousand in 1888. Of that number four thousand were communicants.

*Church of the Immaculate Conception*.—This enterprise was inaugurated in February, 1872, under Bishop O'Reilly and Rev. Thomas Griffin, chancellor of the diocese. The church was organized in November, 1873; the erection of the church edifice was begun in the same year. In the next year the basement was completed and used for worship until December, 1878, when the whole superstructure was finished. It was dedicated by Father Power, vicar-general, with a large body of the priesthood assisting. The building is seventy feet wide by one hundred and twenty-four feet long, and has eleven hundred and fifty sittings. The cost was thirty-five thousand dollars. Rev. Robert Walsh became the pastor in 1874, and has remained such ever since.

*Church of the Sacred Heart*.—This, the sixth Roman Catholic church in chronological order, is located on Cambridge Street, at New Worcester. On the 2d of July, 1879, the first excavations for the building were made; and on the 14th of September following the corner-stone was laid by Bishop O'Reilly. On the 24th of January, 1880, the parish was organized, and at the same time the Rev. Thomas J. Conaty, assistant at St. John's Church, was appointed its first pastor. The superstructure was finished, and the basement furnished for use on Easter Sunday of the same year. On the 21st of September, 1884, the auditorium was opened for public service and the church was

then dedicated. There are eight hundred sittings in the basement and eight hundred and forty in the auditorium. The Sunday school has a membership of six hundred. The organization of total abstinence societies in this parish has been made a conspicuous feature by the pastor. The several societies for young men, young ladies and boys include three hundred and fifty members. The cost of the parish property was about eighty thousand dollars.

*St. Peter's Church*.—This church stands on the corner of Main and Grand Streets. The corner-stone was laid on Sunday, the 7th of September, 1884, by Bishop O'Reilly, under the supervision of the pastor, Rev. Daniel H. O'Neill. The event was marked by a great military display, with a procession of various orders through Main Street. The vicar-general and the chancellor of the diocese were also present assisting. The building is of brick, with granite trimmings, seventy feet by one hundred and thirty, with a massive tower, ninety-eight feet high. It has a seating capacity for one thousand, but for the present public worship is held in the basement.

*St. Stephen's Church*.—This church is on Grafton Street, at the corner of Caroline. It was founded in 1887, and is the most recently organized church of this order. The Rev. R. S. J. Burke was the pastor in 1888.

The Roman Catholic population of Worcester, other than that of French descent, was supposed to be about twenty-five thousand in the year 1888.

**EPISCOPALIANS**.—The parishes of the Protestant Episcopal Church in Massachusetts are organized under a special statute. This provides that the rector or one of the wardens, unless other provision is made in the by-laws, may preside at meetings with all the powers of a moderator; and the wardens, or wardens and vestry, may exercise all the powers of a standing committee. To secure as much uniformity as possible, the "Convention" of this church prints with its annual journals, and recommends for adoption, a standing form of by-laws for the government of the parishes. Among other things this Form provides that the wardens shall be communicants and that all officers shall be baptized men; that the rector, wardens, treasurer, clerk and vestrymen shall constitute "the vestry;" and that the rector shall be chosen by the parish, or by the vestry, when so authorized by the parish. A noticeable feature of this Form, in its latest expression, is, that "any person," subject to the other conditions, may become a member of the parish. In earlier editions of the Form the words used are "any male person." Provision is thus made for the admission of women to a partnership in the management of Protestant Episcopal parishes. This change in the direction of progress conforms also to the statutes of the Commonwealth. In general but not altogether exact accordance with these provisions, the Protestant Episcopal parishes in Worcester have been organized. The oldest, and the mother of the rest, is the parish of

*All Saints.*—The beginnings of the Episcopal Church in Worcester are reported by the late Judge Ira M. Barton in two letters written in the year 1835, but first printed in the year 1888. From this contemporary and authentic source of information it appears that in the former year Dr. Wainwright visited Worcester "to see as to the practicability of establishing a church here." An arrangement was then made for services in the Central Church, but through a misunderstanding it fell through. This failure was less discouraging than the difficulty in finding persons "to sustain the burden." "No such persons have yet offered themselves," wrote Judge Barton under date of October 2d. A little later the prospect had brightened. Under date of December 13th he wrote: "Regular church services were, for the first time, held in Worcester to-day." At that first meeting there were present "some sixty people." The preacher on the occasion was the Rev. Thomas H. Vaill, then in deacon's orders only. And now the time had arrived when this enterprise took to itself a body and a name by an act of incorporation under the style of the "Proprietors of the Protestant Episcopal Church in Worcester." The act bears date of April 8, 1836, and the incorporators named in the act are Thomas H. Vaill, Ira Barton and Edward F. Dixie. The experiment was fairly begun. For six months Mr. Vaill continued his ministrations and then left "thoroughly discouraged." As the present bishop of Kansas he still lives to look back upon this day of small things. Seven years of silence followed his departure, when, in 1842, services were again begun, never afterwards to be intermitted. On Christmas day of that year the Rev. Fernando C. Putnam held a service in the chapel on Thomas street belonging to the Central Church. Mr. Putnam was succeeded by the Rev. Henry Blackaller.

With Mr. Blackaller as minister in charge, Thomas Bottomly and Charles S. Ellis as wardens and Edwin Eaton as clerk, the first church of this order was well on its foundations. It continued, however, in a low condition until 1844, when the Rev. George T. Chapman, D.D., came and applied his sturdy shoulders to the work of upbuilding. Dr. Chapman had a zeal for his church. Organizing and assisting churches in various parts had been his self-appointed mission, and now the feeble church in Worcester was to feel the good effects of his help. Coming at Easter, he remained in charge of the parish for two full years. At the end of that time he gave place to the Rev. George H. Clark, who became the first regularly chosen and settled rector of All Saints. In January, 1849, Mr. Clark resigned because of ill health, and the Rev. N. T. Bent succeeded to the office. Mr. Bent remained till the spring of 1852, when the Rev. Archibald M. Morrison became the rector. At the end of four years, illness in his family compelled him to lay down his charge. A period of

three years now elapsed in which All Saints was without a rector. In this time the Rev. William H. Brooks and the Rev. Albert Patterson were the ministers in charge. But in December, 1859, the Rev. E. W. Hager became the rector, and so remained till August, 1862, when he resigned his place.

At the close of the year 1862 began the ministry of the Rev. William R. Huntington, which was destined to change the whole face of things for Episcopacy in Worcester. His ministry of twenty-one years was a period of constant and rapid growth. Dr. Huntington found his Church of All Saints feeble and left it strong. He found it poorly housed and left it rejoicing in one of the most beautiful and costly of our churches. He found it solitary and left it the mother of children, born and to be born. And yet, at the close of his ministry, he was moved to say that, "in the whole English-speaking world there is probably not a city of the size of ours in which the Episcopal Church is numerically so weak as ours." That this reproach is now measurably taken away is owing more to his agency and influence than to any other. It was on the 3d of December, 1862, that Dr. Huntington was both ordained and inducted into the rectorship of All Saints. His ministry began in the church on Pearl Street which had been erected in 1846 after plans drawn by Upjohn of New York. Dr. Huntington described it as "a beautiful specimen of rural architecture." It remained as originally built until 1860, when it was altered to gain additional sittings. In the course of twenty-eight years it was four times reconstructed; then, on Easter night, April 7, 1874, it was destroyed by fire. This was the signal for removal and enlargement.

On the 15th of May a committee was empowered to build a church and chapel; on the 29th of December ground was broken at the corner of Irving and Pleasant Streets; on the 13th of May following the first stone was put in place; on the 21st of July the corner-stone was laid; and on the 4th of January, 1877, the finished building was consecrated by Bishop Paddock. Church, chapel and parish building are grouped in one capacious structure. All the walls, including bell-tower and spire to the finial, are of red sandstone. The pulpit of the Pearl Street Church, a gift from Emanuel Church in Boston, rescued from the flames and erected for use in the new church, is a memorial of continuity; while encrusted in the interior wall of the tower-porch are stone relics of mediæval architectural ornament, given by the dean and chapter of Worcester (England) Cathedral, as a token of "brotherly regard and church unity."

Having declined various calls from different bodies to important ecclesiastical offices,—one, in 1874, to the office of bishop—Dr. Huntington at length accepted a call to the rectorship of Grace Church in New York, and in 1883 severed his long connection with All Saints'. By his published writings, by his unwearied fidelity to his parochial charge and by his wise ac-

tivity in the Church Conventions, he had come to be a power in his own communion.

Shortly after the termination of Dr. Huntington's service, the Rev. Lawrence H. Schwab became the minister in charge. He was succeeded by the Rev. Alexander H. Vinton, who was chosen to be the rector on the 28th of April, 1884, and who assumed the office in September following. Under his ministry the prosperity of the parish was continued. The number of communicants last reported was about four hundred.

*Parish of St. Matthew.*—In the winter of 1869 a mission chapel fund of \$721.21 was raised from a Christmas sale by the women of All Saints. This was the germ of the parish of St. Matthew. Additions were made to the fund from time to time, and in 1871 a mission was established at South Worcester. An association of communicants in All Saints was formed, with the rector of that parish as trustee, and by them an estate was bought at the corner of Southbridge and Washburn Streets. On this site a chapel was completed in September of the same year, and on St. Matthew's day, February 24, 1875, it was opened for public worship. The Rev. John Gregson, assistant minister at All Saints, was made the minister in charge, and he so remained for nearly a year. After him Mr. Thomas Mackay acted as lay reader until the following October, when the Rev. Thomas A. Robertson assumed the charge and continued in it for a period of nine months. Mr. Mackay then resumed his post, and with other lay readers held services until January 1, 1874, when the Rev. Henry Mackay became the minister in charge. This continued until the spring of that year; then the mission was organized with Henry L. Parker and Matthew J. Whittall as wardens. The Rev. Mr. Mackay remained the minister in charge until July, 1875. In April, 1876, the Rev. Amos Skeele was called to the rectorship, which he retained for several months; but in April, 1877, the church was again without a rector and Sunday services were cared for by the Rev. George S. Paine, of Worcester. To him succeeded the Rev. Alexander Mackay Smith, assistant at All Saints, by whom, it was said, "wonderful work was done." January 1, 1878, the Rev. George E. Osgood became the rector, and in September the church was "renovated" and again opened for public worship. All incumbrances having been at length removed and a deed of the land given by Sumner Pratt, St. Matthew's Church (or chapel) was consecrated on Quinquagesima Sunday in 1880. Mr. Osgood having resigned the rectorship January 16, 1881, on the 8th of April following the Rev. J. H. Waterbury became the rector but resigned in November of the same year. He, however, remained in charge until his death, which occurred in the next spring. In the summer of 1882 land for a parish building was secured on the corner of Southbridge and Cambridge Streets, and in the course of the season St. Matthew's Hall was erected upon it. In August the

Rev. Henry Hague assumed the charge of St. Matthew in connection with that of St. Thomas at Cherry Valley. In February, 1888, the number of communicants was one hundred and seventy-five, and the value of the parish property \$7,500, less an incumbrance of \$1,250. Thus, from a small beginning, with a frequently changing ministry, this parish had slowly grown through a period of nineteen years, until it appears to have come to rest on a permanent foundation. For its success much was due to the fostering care of Dr. Huntington.

*Parish of St. John.*—This parish was organized as part of a broad and long-cherished plan of Dr. Huntington. A scheme of four missions, embryos of four churches in different sections of the city, named after the four Evangelists, was what he had conceived and steadily aimed to realize. St. John's was the second in the order of the plan. It was begun by the formation of a Sunday-school, March 11, 1883. The first meeting was held in an upper room on the corner of Lincoln Square and Main Street, and the first church service was held by the Rev. Henry Hague, of St. Matthew's, on the 6th of January, 1884. On the 9th of March following, the first regular Sunday service was held by the Rev. John S. Beus, general missionary of the diocese. On the 9th of March the Rev. Edward S. Cross began work with the mission, and on the 13th of April took formal charge. On the 21st of the same month land for a church was bought on Lincoln street; on the 13th of May ground was broken; and July 5th the cornerstone was laid. On the 18th of September, 1884, the parish was organized under the laws of the state. Mr. Cross, the minister in charge, preached his farewell sermon on the 19th of October, and on the 30th of November, in the same year, the Rev. Francis C. Burgess entered upon his duties as the first rector of the new parish. Public worship in the church was held for the first time on Christmas Day. For a time the free church system was tried, but was soon abandoned, yet so as in the hope that under more favorable conditions it might be afterwards resumed. In the first four months of parish life the average congregation and the number of communicants increased two-fold. This growth continued until, in 1887, it was found desirable to enlarge the church in order to gain more sittings. This was accordingly done, at a cost somewhat exceeding \$2600. In 1888 the money to defray this cost had all been subscribed and paid. By this enlargement the whole number of sittings was increased to 308. At the last-named date the church and land were valued at \$17,000, upon which there rested a debt of \$9300. The number of communicants at this time was 209. This year witnessed a new departure for Episcopacy in Worcester by the union of St. John's with the Central (Congregational) Church in the observance of Lent. Services were held alternately in the two churches, conducted alternately by the two ministers.

Clergymen from abroad were also brought in to assist in this fraternal recognition, of whom chiefly to be mentioned are the Rev. Dr. Phillips Brooks and the Rev. Dr. Samuel Herrick, both of Boston. If any ill came out of this unwonted fraternization, it was never publicly reported. On the contrary, the continued prosperity of St. John's seemed to bear witness that this new departure was a safe step in the line of progress.

*Parish of St. Mark's Church.*—In the order of time this was the third in the scheme of four churches which Dr. Huntington set on foot. But not till some years after he had gone from Worcester did a good opportunity for inaugurating the enterprise present itself. At length the founding of Clark University, in the spring of 1887, became the signal for moving. That great educational project causing a marked advance in the price of real estate in the quarter selected for St. Mark's Mission, spurred on its friends to make haste and secure a suitable lot for church purposes. The purchase of a lot was the only object of the first meeting, which was in September, 1887; but this very speedily led to the formation of a mission by the name of St. Mark's Mission. A place for meeting was secured, and about October 1st a Sunday-school was opened. Public worship was held for the first time on the 23d of October, by the Rev. Alex. H. Vinton, rector of All Saints, other clergymen in and out of the city assisting. After this date the services of the Rev. Thomas W. Nickerson of Rochdale were secured. He continued to officiate until the Easter following, when the Rev. Langdon C. Stewardson took charge of the mission. He came fresh from a three years' course of theological study in the universities of Germany, prior to which he had been for five years rector of a church in Webster. "Under his leadership," says a competent authority, "the mission has made a progress which is believed to be unprecedented in the history of this diocese." The number of communicants, about forty at Easter, had nearly doubled within the next five months. From the beginning the mission was independent and self-reliant. No aid from any outside source was accepted. On the other hand, the mission, in that brief period, had raised out of its own resources the sum of twelve thousand two hundred dollars. With part of this the lot for church and chapel, already spoken of, was purchased on the corner of Main and Freeland Streets. On the 6th of September, 1888, the corner-stone of the chapel to be erected on this lot was laid, a solid silver trowel, given by Mrs. Ellen Lawson Gard, wife of its maker, being used in the ceremony. An imposing aspect was given to the occasion. At five o'clock in the afternoon nine clergymen from the city and other parts, with Dr. Huntington of New York, the originator of the enterprise, at their head, marched down the street in surplices and took their places by the corner-stone. When the ceremonial act was completed, Dr. Huntington made a brief address, admir-

able alike for its substance, expression and tone. "Rarely," said he, "is the building of a church under such assured circumstances. You have a marvelously chosen building site, you are in perfect harmony among yourselves, and your leader you love and trust. What more do you want? Is it the money to complete the building? That is a very doubtful advantage. The very fact that it is lacking is a spur to never-failing effort." Again he said: "We lay this stone in charity. If there are any within the hearing of my voice not of this household of faith" (and there were many) "let them not feel disquieted. We come not as destroyers, but maintainers of peace; not to divide, but to unite. The Episcopal Church sees in itself a great reconstructing influence. . . . There is one object, one purpose, and that the purpose of building up the kingdom of God." The plan contemplates in its ultimate realization a chapel and church of red sandstone throughout.

*St. Luke's Church*, the fourth and only one remaining to complete Dr. Huntington's quadrilateral of churches, in his own words uttered at the laying of St. Mark's corner-stone, "bides its time."

*UNIVERSALISTS—First Universalist Church.*—The first Universalist Society was formed on the 3d day of June, 1841, in accordance with the laws of Massachusetts. So said the Rev. Stephen Presson Landers in his historical address delivered a quarter of a century afterwards. Mr. Landers was the first pastor and had preached his sermon in Brinley Hall on the 2d of May previous. In the summer and autumn ten thousand dollars were subscribed for building a church. The pastor himself subscribed "more than he was worth." A very choice and central site on the corner of Main and Foster streets was bought for a little more than \$1.25 a square foot. But "stagnant water" caused delay. In 1842 a further subscription of more than five thousand dollars was added to the former. Then, early in 1843, ground was broken, and on the 22d of November in the same year the house was dedicated with a sermon by the Rev. Dr. Miner, of Boston. On the evening of the same day "was the recognition of our small church," wrote the historian, and also its first communion with thirty-one participants. The pastorate of Mr. Landers terminated on the 16th of June, 1844, when he preached his farewell sermon. His death occurred at Clinton, N. Y., on the 15th of April, 1876, in the sixty-fourth year of his age. On the 12th of March, 1845, Rev. Albert Case was installed as his successor. After somewhat more than four years he left his Worcester charge and engaged in secular business of various sorts. He was also settled again for a time as pastor at Hingham, Mass. He died at the age of about seventy on the 29th of December, 1877. It was noted of him, as a mark of great distinction, that he had, while in the Worcester pastorate, "attained to the thirty-third degree, the highest of the Masonic grades in the world." His successor, the Rev. Obadiah Horsford Tillotson, was

installed on the 27th of June, 1849. During his pastorate the increase of the congregation was such as to require more sittings in the church. To secure that end galleries were constructed in 1851. Mr. Tillotson preached his farewell sermon on the 31st of October, 1852. Meantime he had become a student-at-law and practitioner in the office of Judge Chapin, of Worcester; but finding the pursuit uncongenial, he resumed his former profession, to which he devoted himself for the remainder of his life. On the 19th of June, 1863, he fell a victim to consumption in the forty-eighth year of his age. His successor, coming in April, 1853, was the Rev. John Greenleaf Adams, D.D. After a highly successful pastorate of seven years he gave place to the Rev. Lindley Murray Burrington, who, after a year and four months, was compelled to resign because of long-continued illness. His term of service closed on the 1st of January, 1862. To him succeeded the Rev. Thomas Elliot St. John, who was inducted into office on the 1st of April in that year. With him began a new departure. The church was reorganized by the adoption of a new Declaration of Faith and a Constitution. This had seemed to be necessary because of changes growing out of "removals, withdrawals and forfeitures." Having put the church on this new footing, Mr. St. John closed his first pastorate in June of 1866 to become the pastor of a church in Chicago. After the intervening pastorate of Rev. Benjamin Franklin Bowles, who came on the 1st of October, 1866, and left December, 1, 1868, Mr. St. John resumed his old Worcester pulpit on the 1st of February, 1869, and continued to occupy it till April 1, 1879. Within this period the fine new church edifice on Pleasant Street was erected and occupied. After leaving Worcester, Mr. St. John pursued his ministry in various places until the autumn of 1881, when he accepted a call to the Unitarian Church in Haverhill, Mass. His successor, the Rev. Moses Henry Harris, entered upon his ministry with this church on the 5th of October, 1879. Mr. Harris was a native of Greene, in the State of Maine. He was graduated from the Canton Theological School in 1867, and had his first settlement in the ministry at Brattleborough, Vt., in 1870. From that pastorate of nine years and three months he came to Worcester. In 1885 the "Winchester Confession" was adopted by this church as a Declaration of Faith in place of the Declaration which had been adopted in 1862; the Constitution was also amended and the list of membership revised. The church then embraced one hundred and fifty-five members.

*All Souls Church.*—"In the spring of 1883 a committee was appointed at a meeting of the First Universalist Church to see if a room could be hired at the south part of the city in which to open a Mission Sunday-school for the extension of our church work in Worcester." This was the beginning of the Second Universalist Church. No suitable room could

be hired; then two friends of the cause, who "could not let the movement die for want of a place, offered the free use of their rooms." Accordingly, at one of these rooms, in the house of Mrs. Martin Russell, No. 10 May Street, the new school was organized on the afternoon of January 27, 1884. On the Wednesday following, a prayer-meeting was inaugurated; this and preaching by Mr. Harris, of the First Church, were maintained alternately throughout the winter. The natural result of this devotion to the work was growth; by spring "more room" was found necessary and this led up to thought of building. Money was not abundant, and Mrs. Lucy A. Stone, seeing the need, gave the land on which to build a chapel. Another act of encouragement was the gift of one hundred dollars by the sister of a former pastor of the First Church. As the women had been thus active in beginning the enterprise, so they were relied upon to carry it forward. Accordingly, "at a meeting to form a parish held on the 31st of July, 1884," Mrs. Stone and Mrs. Russell, were appointed to obtain subscriptions for the purpose of building a chapel. The result of their efforts was a subscription of one thousand three hundred and two dollars. By the last of October the building was begun and before the cold weather could interrupt was completed. In just one year from the time the Sunday school had been organized the chapel was dedicated. This was on the 27th of January, 1885. On the 21st of June following the church was duly instituted. During the summer the pulpit was supplied by Rev. Lee H. Fisher, a student at Tufts College. His services proved so acceptable that he was engaged to continue them till the next annual meeting. On the 1st of April, 1886, the Rev. Frederic W. Bailey entered upon his duties as first pastor of All Souls. Mr. Bailey immediately set about providing for a church edifice. Through his efforts the sum of three thousand four hundred dollars was obtained, with which a lot on the corner of Woodland and Norwood Streets was purchased, and the same was conveyed to the parish on the 20th of March, 1887. How to raise the money for the building of the church was the next and more pressing question. This was happily solved by Mr. James A. Norcross, of the famous firm of Norcross Brothers, builders, by the gift of fifteen thousand dollars in the name of himself and his wife, Mary E., upon three conditions: 1st, That the parish should raise seven thousand otherwise than by incumbrance on the property; 2d, That a certain room in the proposed edifice should be legally conveyed to Mr. Norcross and his heirs; and 3d, that the following inscriptions should be placed on the front of the edifice: "In memory of our Fathers and Mothers who are in Heaven. Our hope is to meet them in that heavenly home;" and "All Souls Universalist Church Edifice." The exact form of the gift was, "all the brownstone required for the exterior of All Souls Universalist Church cut and set in place." It was

assumed that fifteen thousand dollars would cover this expense. Mr. Norcross' proposition was presented on the 9th of November, in a long letter full of details. On the 20th All Souls Parish had a meeting, accepted the proposal, unanimously voted thanks to the donors, and took measures to comply with the first condition. The proposed building is of unique design, of bold architecture and studied simplicity. The main structure is seventy feet square with a round tower one hundred and fifty feet high on the corner of the streets. The principal audience-room is designed to seat about five hundred persons; other rooms adapted for all modern church requirements are embraced within the plan. It will be a central attraction for the important neighborhood in that quarter of the city.

FRIENDS.—"Meeting" and "meeting-house" are characteristic terms among the Friends. The Preparative, or, as it is called in England, Particular Meeting, is the unit. Several of these constitute a Monthly Meeting; these in turn constitute a Quarterly Meeting, and several Quarterly Meetings constitute the Yearly Meeting. The Monthly Meeting, which is the lowest corporate body, takes and holds property through trustees of its own appointing, for the benefit of its Preparative constituencies. All meeting-houses are so held. The Preparative Meeting exercises no discipline over its members. Discipline is administered by the Monthly Meeting upon an overture or complaint from the Preparative Meeting. Any party not satisfied with the discipline dealt out by this body may appeal to the Quarterly Meeting and to the Yearly Meeting in the last resort. There is no salaried minister, no sacrament, no set singing, no voting, no business official except a clerk. The clerk is the one important and sufficient official. He records no votes, since there are none to record; but he "takes the sense" or consensus of the meeting, and makes a minute of that. This sense he gathers from what any Friend may choose to say at the meeting. Having made his minute, he reads it, and if it is approved it stands as the sense of the meeting; and so standing, it is as binding and absolute as a vote elsewhere. In this way the clerk himself is made such. In this way one Friend may become an "approved minister" and another, because of bad behavior, may become "disowned."

From 1816 to 1837 families of Friends residing in Worcester went up to worship at Mulberry Grove, in Leicester. Later on they obtained leave to hold a Particular Meeting in Worcester. The place of meeting at first was in a room over Boyden & Fenno's jewelry store, in Paine's block. But in 1846 they built their present meeting-house on land given by Anthony Chase and Samuel H. Colton, two leading members of the Society. After this the Mulberry Grove Meeting gradually diminished and finally died out. The Worcester Meeting became a part of Uxbridge Monthly Meeting, of which the Uxbridge and

Northbridge Preparative Meetings were the remaining constituent parts. The Uxbridge Monthly Meeting is held in the three places just named twelve times a year, five of which are in Worcester. In due gradation, Uxbridge Monthly Meeting belongs to Smithfield (R. I.) Quarterly Meeting, and this to the New England Yearly Meeting, which is now held alternately at Newport, R. I., and Portland, Me.

The Worcester Meeting, though small in numbers, has included some of the best known, most worthy and most prosperous of her citizens. The names of Chase, Colton, Earle, Hadwen, Arnold and others have figured prominently in the past history of the city. Anthony Chase was for a generation the treasurer of Worcester County; John Milton Earle was known far and wide as the proprietor and editor of that child and champion of the Revolution, *The Massachusetts Spy*; Edward Earle became mayor of the city. But the Friends of Worcester have special reason to remember the name of Timothy K. Earle as one of the three principal benefactors of the Society. Choosing to be his own executor, Mr. Earle, shortly before his death, which occurred on the 1st of October, 1881, made a gift of \$5000 to Uxbridge Monthly Meeting, to be held in trust for the benefit of Worcester Preparative Meeting. The fund was to accumulate for ten years; then the income was to be used for repairs and improvement of the meeting-house. The surplus above what might be used for this purpose, when it should reach the sum of \$2000, was to be set aside as a fund for rebuilding in case of fire. On the other hand, if the meeting should ever come to an end, the deed of gift provided that the fund should be made over to the Friends' New England Boarding-School at Providence. Other gifts from other sources and for other purposes, but of less amounts, are also held in trust for this meeting. The clerk for a quarter of a century, first of the Worcester Meeting, and then of the Uxbridge Monthly Meeting, is James G. Arnold, a lineal descendant, through intermediate and unbroken generations of Friends, of Thomas Arnold, the earliest emigrant of the name and faith into the Providence and Rhode Island Plantations. But it must be said that the present prospects of the body do not justify the expectation that the future will be as the past. The number of members reported is about eighty, and this is less than it has been.

SECOND ADVENTISTS.—The Second Advent movement in Worcester was made in anticipation of the fateful 15th of February, 1843. On Thanksgiving Day in 1842 a meeting was held in East City Hall, at which a committee was appointed to secure a hall and hire preachers. Thenceforward, for a period of time, meetings were held almost every evening. For a part of the time the "Upper City Hall" was occupied as the place of meeting. When the 15th of February came and went and the sun continued to rise and set as usual, the time for the world's crisis was adjourned to a day in April. Disappointment then

led to further adjournments, but as time wore on and showed no sign of coming to an end, the Adventists, who had been gathered out of almost every denomination, gradually consolidated into a regular church organization. For the first seven or eight years no records were kept, because it was held to be inconsistent with the fundamental idea of Adventism. The first record appears under the date of April 14, 1850, and the first important thing recorded was the one Article of Association, which served as the basis of organization. This was in the nature of both creed and covenant. "The personal advent and reign of Christ on the earth renewed," was the distinguishing belief, and the solemn agreement to be governed by the Bible as the rule of faith and practice was the only covenant. Religious services were held in various halls until the year 1866, when a chapel was built and dedicated. The building was erected on leased land on Central Street, at a cost of \$3113.28. The dedication took place on the 14th of June. A succession of elders ministered to the church until the 15th of December, 1870, when Elder S. G. Mathewson was called to serve "one half the time." He remained in charge till October 17, 1875, when he preached his farewell sermon. Of late years preachers have been supplied by a committee chosen for that purpose. In 1883 the chapel was sold, and a hall for religious services secured in Clark's Block, on Main Street. In 1877 the membership was one hundred and forty-five, and one hundred and eighty-five in 1888. The amount of money annually raised for current expenses and care of the poor of the church exceeds \$2000, while contributions are made for missions abroad, and particularly in India.

**DISCIPLES OF CHRIST.**—The church of which the lamented Garfield was a minister is an exotic in New England. It had its origin in Western Pennsylvania and Eastern Ohio in the early part of the nineteenth century. Thence it spread through the Southwest and West until, in 1888, the number of communicants in the United States was reported to be about seven hundred thousand. Six universities, thirty-one colleges and six collegiate institutes provide the denomination with the higher educational facilities, while fifty-nine missions in Japan, China, India, Turkey, Africa and Australia, as well as other missions in various European countries, attest their zeal in the propagation of their faith. The central principle of the denomination is the union of all Christians on the basis of the Apostolic Church with the person of Jesus Christ as the only object of faith. Hence, discarding all sectarian names, they choose to denominate themselves simply "Disciples of Christ." They hold the great cardinal doctrines of the gospel but not in the terminology of the schools. They abjure speculative tenets touching Trinity and Unity but adhere to the "form of sound words" given in the Scriptures concerning the Father, the Son and the

Holy Spirit. Their polity is congregational, but they are not Congregationalists. Their distinguishing tenet is of baptism, but they are not altogether Baptists. They agree with the Baptists as to the mode and subjects of baptism, but differ as to its design. While the Baptists baptize believers because they are forgiven, the Disciples baptize them in order to secure the promised forgiveness. "He that believeth and is baptized shall be saved." The state of salvation follows, not precedes, the baptizing as well as the believing. Baptism will not save if repentance and faith are wanting. Baptismal regeneration they deny. Baptism is the only form necessary for admission into the church; there is no creed nor covenant. No one is excluded from the Lord's Supper, and this is observed every Lord's Day. The New Testament is held to be the sole book of authority; the Old Testament is helpful, but not now authoritative.

Only one church of this order exists in Worcester. It was organized on the 5th of August, 1860, with two elders in charge of its spiritual interests and two deacons in charge of its temporal interests. There was no parish organization, but the church itself was incorporated with trustees annually chosen to hold the property. Their first house of worship was the old Central Chapel on Thomas Street. But the surroundings were unfavorable and they felt hampered in their work. They therefore, in September, 1885, sold that property, and while making ready to build occupied the old Central Church on Main Street as a place of worship. In the next month they purchased a lot on Main Street opposite King, and there proceeded to erect an attractive church edifice at a cost in all of twenty-three thousand dollars. Its dedication took place on the 12th of September, 1886. In the twenty-eight years of its existence, the church has had for its ministers, William H. Hughes, William Rowzee, Alanson Wilcox, J. M. Atwater, T. W. Cottingham, Frank N. Calvin and the present minister, I. A. Thayer, who came from New Castle, Pennsylvania, and began his work in Worcester in October, 1887. To none of these do they apply the epithet Reverend, as the distinction of clergy and laity is not recognized. In 1888 the membership of the church was three hundred and seventy-three and that of the Sundayschool two hundred and fifty.

**FREE BAPTISTS.**—Two tenets—free will and free communion—distinguish the Free Baptists from other Baptists. They might perhaps be named the Arminian Baptists and the others the Calvinistic Baptists; but those names would not mark the radical distinction growing out of the terms of communion. Enough that each has chosen its own name; "Baptists," pure and simple, and "Free Baptists." This denomination had its origin in New Hampshire somewhat more than a century ago. Benjamin Randall had been a Congregationalist, afterwards became a Baptist, and then, by adopting and preaching the doctrines of the freedom of the will and free commu-

nion, became the founder of the Free Baptist denomination. This was in 1780. Within the century following, churches of this faith multiplied and spread east and west, until now the membership throughout the country is reported to exceed eighty thousand. In the county of Worcester there are three churches, one of which is in the city. The first preliminary meeting here was held at the house of Newell Tyler, on the 14th of September, 1880. Meetings continued to be held at intervals until the 7th of April, 1881, when the church was duly organized with thirty members. It continued to live without parish powers until the 3d of August, 1887, when by-laws were adopted preparatory to incorporation under Chapter 404 of the Acts of that year. On the 1st day of September following the church became a corporation by the name of the "First Free Baptist Church of Worcester." The Rev. A. J. Eastman, who had been the originator of the movement, was installed on the 7th of April, 1887, as the first pastor, and so continued for one year. The second pastor was the Rev. H. Lockhart. His term began on the 1st of May, 1883, and terminated on the 1st of March, 1887. On the 18th of May following the Rev. D. D. Mitchell became the pastor. The place of worship is "Free Baptist Hall," in Clark's Building, 492 Main Street.

**AFRICAN CHURCHES—*African Methodist Zion's Church.***—This church was organized in 1846. Its first place of worship was the "Centenary Chapel," which had been erected on Exchange Street in 1840, and which, at a later day, came into the hands of Zion's Church. The house was dedicated for this church in the year of its organization. Rev. Alexander Posey was the first pastor. To him succeeded the Rev. Levin Smith, in 1849. The third and most noteworthy pastor was the Rev. J. A. Mars. In 1854 the house was burned in the great fire of that year. In July, 1855, another house was begun, and by the 25th of September was completed and dedicated. A large part of the money for this expense was collected by Mr. Mars outside the society. After him came a succession of pastors whose names were not obtained.

***African Methodist Episcopal Bethel Church.***—This church was organized in the summer of 1867 in Lincoln House Hall. Dr. Brown was a leading spirit in the enterprise and continued to manage until a pastor was assigned. The original membership of the church was fourteen. The first pastor assigned by the Conference was Rev. Joshua Hale, whose term of service was two years. After him came in succession twelve pastors, whose names were Mr. Johnson, James Madison, Perry Stanford, Ebenezer Williams, Jeremiah B. Hill, Joseph Taylor, Elijah P. Grinage, D. A. Porter, Charles Ackworth, Mr. Grandy, A. W. Whaley, Mr. Thomas and G. B. Lynch. Then in 1887, Rev. J. B. Stephens was appointed to the charge, which he was keeping at the close of 1888. For a number of years their place of worship was at

the corner of Hanover and Laurel Streets. But in 1887 that property was lost and since then their place of worship has been at 302 Main Street. The number of communicants in 1888 was twenty-five and the number of families eight.

***The Mount Olive Baptist Church*** was a child of the Worcester Baptist City Mission Board. At first and for some years it was maintained as a mission. But the brethren of the mission having repeatedly asked for organization and recognition as an independent church, the Board at length yielded to their wishes. Accordingly, on the 24th of February, 1885, a council of the city Baptist Churches convened in the Pleasant Street Church and after due examination of twenty-two persons constituted them a church with the above name. For a long time the Rev. Charles E. Simmons served them in the gospel without compensation. Then they set about procuring a pastor. On the 24th of March, 1887, at their request, a council convened for the purpose of ordaining Hiram Conway, a student in Newton Theological Seminary, to the Mount Olive ministry. His examination having proved satisfactory, his ordination and recognition as pastor took place on the 29th in the Pleasant Street Church. In the summer of the same year house No. 43 John Street, with the connected lot, was purchased and fitted for public worship at a cost of about one thousand dollars. On the 10th of October, 1888, a membership of forty-one persons was reported.

The number of persons of African blood in Worcester by the census of 1885 was eight hundred and eighty-three; in 1888 the number was thought to be about one thousand.

**CHRISTADELPHIANS.**—The Christadelphians, or "Brethren of Christ," constitute a small body in Worcester. The order had its origin in the year 1832. Its founder was John Thomas, M.D., of New York, who believed and proclaimed that the true teaching of Christ was for the first time discovered in this nineteenth century by himself. Dr. Thomas became an itinerant, and went through the United States and the British Empire publishing his new-found gospel. Disciples were made and are to be found scattered through this country, Great Britain, Australia and India. Their belief will, perhaps, best be seen by what they do not believe. In their own printed words, then, "Christadelphians do not believe in the Trinity, in the co-equality and co-eternity of Jesus with the Deity, in the existence of Jesus before his conception at Nazareth, in the personality of the Holy Spirit, in the personality of the devil, in the immortality of the soul, in the transportation of saints to heaven and sinners to hell after death, in eternal torments, in baby sprinkling and pouring, in infant and idiot salvation, in Sabbatarianism, in salvation by good works apart from the gospel, in salvation without baptism, in the validity of baptism where the gospel was not understood and believed at the time of its

administration, in conversion apart from the intelligent apprehension of the Word, in the conversion of the world by the preaching of the gospel. They do not believe that the Old Testament has been set aside by the New, but, on the contrary, they base their faith on the writings of Moses, the Prophets and the Apostles comprehensively viewed, and reject everything contrary to their teaching."

To this non-belief they add the belief that "the faith of Christendom is made up of the fables predicted by Paul in 2 Timothy 4: 4, and is entirely subversive of the faith once for all delivered to the saints." They have no pastors, deacons or paid officers, but in the place of them have "serving brethren, presiding brethren and speaking brethren."

The first meeting of the "ecclesia" in Worcester was held in Temperance Hall, on Foster Street, in 1867. In the beginning there were only twelve members. This number increased in a few years to about sixty, then in twelve years fell back to twenty-two. The place of meeting is Reform Club Hall, at 460 Main Street. The sum of one hundred and fifty dollars covers the current yearly expenses.

**SWEDISH CHURCHES.**—By the census of 1875 there were then one hundred and sixty-six Swedes and Norwegians in the city of Worcester. In 1888 the number was estimated to be over six thousand. For this rapidly-growing part of the population five churches have already been provided. Two of these are Methodist, one is Baptist, one Congregational and one Lutheran. The oldest is the

*First Swedish M. E. Church.*—Work was begun among the Swedes in Worcester as early as 1876 by the Rev. Albert Ericson of the M. E. Church. By him a church was organized, to which the Rev. Otto Anderson afterwards preached. In the fall of 1879 Mr. Ericson removed to Worcester, resumed his work and remained in charge till 1882, when he was succeeded by the Rev. D. S. Sorlin. In 1883 a church was erected at Quinsigamond at a cost, including the lot, of six thousand seven hundred dollars, and was dedicated on the 31st of March, 1884. In the same year the Rev. C. A. Cederberg was appointed assistant preacher and in the year following the pastor in charge. In 1887 the Rev. Albert Haller was appointed to succeed him.

*The Second Swedish M. E. Church* was organized on the 9th of April, 1885. This church, a colony from the First, embraced ninety-four members, including twenty-nine on probation. With these came the Rev. Mr. Sorlin, pastor of the First Church, under appointment as pastor of the new organization. On the 1st of September, 1885, the church took possession of the chapel on Thomas Street, which had been purchased from the Christ Church Society for eight thousand dollars. By two successive additions at a cost of three thousand four hundred dollars, a seating capacity for more than five hundred was obtained; nor was this found to be sufficient. The growth of the society had

been so rapid that in November, 1888, there was a membership of two hundred and thirty-five. On the 29th of May, 1887, the Rev. H. W. Eklund of Stockholm, Sweden, became the pastor in charge. His ministry resulted in great spiritual and material enlargement.

*The Swedish Evangelical Congregational Church* in Worcester has its root in the Free Church movement in Sweden. This movement began about 1869 under Rev. P. Waldenstrom, D.D., who had been a minister of the Lutheran or State Church. Under his vigorous lead the membership of this Free Church had grown in the course of sixteen years to be one hundred thousand. Some of this communion having emigrated to this country had found a home in Worcester. In May, 1880, a few of these people began to meet for prayer and conference on Messenger Hill, while others met at Quinsigamond and elsewhere. In June, Rev. A. G. Nelson, pastor of a Swedish Free Church in Cannello, Mass., came by invitation and held several meetings. On the 15th of August the hall at 386 Main Street, over the *Gazette* office, was hired for religious services. Some old settees were borrowed from the Y. M. C. A., while a small yellow table, still preserved as a memorial of that day of small things, was bought and used for a "pulpit." In this place, on the 6th of September, 1880, the Swedish Free Church was organized, and here, on the 26th, Mr. Nelson held the first Sunday service. In October the Rev. George Wiberg was called from Iowa to become the first pastor. In May, 1881, the church, finding the hall on Main Street too narrow, removed its place of worship to a hall in Warren's Block, near Washington Square. On the 19th of August in the same year a council, finding this Free Church in substantial accord with its own, gave it a cordial welcome to the fellowship of the Congregational Churches. Only one other Swedish Congregational Church then existed in the country, that one being in Iowa. On the 14th of January, 1882, a parish was duly organized in the office of Henry L. Parker, Esq., in Flagg's building, under a warrant issued by him. Membership in the church was made a condition of membership in the parish. In November, 1883, Mr. Wiberg resigned his charge, and on the 1st of December following, Mr. Nelson, the first preacher to the church, became its second pastor. Leaving in July, 1885, he was succeeded by the Rev. Eric Nilsson, who began his work on the first Sunday in August of that year and was dismissed on the 6th of December, 1888. At the same time occurred the installation of the Rev. Karl F. Ohlsson, who had been called from Hedemora, Sweden, to the Worcester church. Its membership was then two hundred and fifty.

As early as 1882 this Swedish church enterprise had enlisted the lively sympathies of the Congregational body of the city, and a movement was then initiated to erect a church edifice. Through a building committee, of which S. R. Heywood was chair-

man and G. Henry Whitcomb treasurer, the money was raised, a commodious edifice erected on Providence street, near Union R. R. Station, and on the 25th of January, 1885, was dedicated with services by nearly all the Congregational pastors of the city. The cost, including land and furnishing, was nine thousand three hundred and ninety-five dollars, of which the Swedes contributed one thousand five hundred and ninety-five. As they gain financial strength the whole cost will probably be assumed by the parish.

A most active, efficient and leading person in all this enterprise was Dea. John A. Corneli. He had been a Lutheran and been urged by his Lutheran pastor in Boston to forward that interest on coming to Worcester. Being, however, converted at one of Major Whittle's meetings, he had left the Lutherans and united with the Summer Street Church. Afterwards he took a dismission from that church to assist in building up the church of his Swedish brethren. To him both its spiritual and temporal prosperity was largely due.

*The Swedish Baptist Church* grew out of a movement begun in 1879. In that year Mr. Anderson, a Swede, came from the Union Temple Church in Boston and united with the First Baptist Church in Worcester. Soon he had a Sunday school class of six or eight Swedes. Then he and his countrymen began to hold meetings in the vestry of the First Baptist Church. In 1881, the Swedish Baptist Church was constituted with a body of nine members. The Baptist City Mission Board now came to their help, and board and church co-operated in hiring a hall for religious services in Clark's Block, now Walker Building. In 1882, Rev. Peter A. Hjelm was called from Sweden to the pastorate. He remained till near the close of the year 1888, and was then succeeded by the Rev. L. Kalberg. The Mission Board had built, in 1855, a chapel on Mulberry Street at a cost, including land, of \$9500. Of this amount the church from the first assumed \$3000; in the end of 1888 that body had become so prosperous that it resolved to relieve the board entirely. In the same year the membership had increased to about two hundred and forty.

*The Swedish Evangelical Lutheran Gethsemane Church* was organized in 1881. In 1882 the Rev. Charles E. Cesander became the pastor. He was succeeded in 1883 by the Rev. Martin J. Englund, who was ordained on the 17th of June. In the same year the church was erected on Mulberry Street at a cost of about \$15,000. The Rev. Oscar M. Holmgren was Mr. Englund's successor, being installed in October or November, 1885. The installation of his successor, Rev. S. G. Larson, took place in April, 1888. The Augsburg Confession is the basis of the church organization. The membership in 1888 was about one hundred and seventy.

**JEWS.**—Polish Jews began to multiply in Worcester about the year 1874. In 1888 the number of souls was thought to be not less than five hundred. There are

among them two incorporated religious societies. The oldest of these made an attempt to become incorporated in 1880, which, through no fault of the society, resulted in failure to obtain what they sought. But in 1888 the society became a corporate body by the name which it had borne from the first,

*Sons of Israel.*—The method of admission to the synagogue, or church, is by ballot after the candidate has been proposed and personally examined as to his fitness. Five black balls defeat an election. Membership involves an obligation to make certain annual payments, and secures certain pecuniary advantages touching sickness and burial. A prime requisite for membership, whether in the outset or in continuance, is financial integrity. This society has had five ministers. The first was M. Metzger who came in 1880. After him came M. Touvim in 1882; M. Binkovich in 1884; M. Newman in 1885, and M. Axel S. Jacobson in 1887. In 1888 a synagogue was built on Green Street at a cost of \$11,000, including land, and was occupied for religious services in August of that year. About fifty persons are members of the synagogue and two hundred belong to the congregation. The synagogue possesses three rolls of the five books of Moses written on parchment, the finest of which cost \$150.

The second society is named the

*Sons of Abraham.*—It became incorporated in 1886. Besides Polish Jews it embraced some of Swedish nationality. Those constituting the society went out from the older body because of lack of agreement on certain matters. But their organization and doctrine and way of the synagogue are the same. In 1888 a synagogue of brick was erected by this society on Plymouth Street, and was to be ready for occupation by the end of that year. The cost of this, with the land, was also about \$11,000. In that year the membership was said to be forty. This synagogue, like the other, is the possessor of several copies of the Torah, or Law of Moses, executed in the same costly style, and kept in an ark or chest for use in the synagogue service.

Some half a dozen families of German Jews belong to Worcester, but have their religious affiliations with Boston.

**ARMENIANS.**—The Armenian nation was great and historical centuries before the Christian era. As early, perhaps, as any Gentile nation, they received the Christian religion; but not till the opening of the fourth century, and in the year 302, did the Armenian Church begin to be established. To St. Gregory, the Illuminator, belongs the honor of being its founder, and hence it is distinctively styled the Gregorian Church. Independent alike of the Greek and the Romish Churches, it resembled them in holding a hierarchy and the seven sacraments. This ancient church, through varying fortunes, has come down to our day and still exists in its native seat. An important city of that country is Harpoot, in the great loop

made by the river Euphrates, and there, early in the century, the American Board of Commissioners established one of their missions. In this way the Armenians came to have relations with Americans and to have knowledge of the United States. From Harpoot and vicinity many of them found their way to Worcester. The special attraction for them in this city was the great Washburn & Moen wire establishment. They began to be employed in that establishment in the year 1882, and in 1888 there were about two hundred and thirty-six on its pay-roll. This particular set towards Worcester was the means of drawing others who came and engaged in other employments. The whole number in the city was last reported at about five hundred. This is said to be a larger number of Armenians than is to be found, not only in any other place in the United States, but also larger than all those in Boston, New York, Brooklyn and Philadelphia together.

It was an obvious duty to provide for these Asiatic strangers edifying religious instruction. Accordingly, about the beginning of the year 1888, the Rev. H. A. Andreasian was invited to come from Harpoot and minister to them in their own tongue. Mr. Andreasian was a disciple of the American missionaries, and had become an evangelical Protestant as towards the Gregorian Church. He had been an ordained minister and preacher at Harpoot for twenty-one years. On receiving the call from Worcester he was given leave of absence from his charge in Harpoot for from one to three years. A place for worship was secured in Summer Street Chapel, and there every Sabbath a large portion of the Armenians in Worcester have diligently attended upon his ministry. There is yet no organized church, and the congregation embraces Gregorian as well as Protestant Armenians. The communion of the Lord's Supper is observed four times a year, and to it are invited "all who love the Lord Jesus Christ." The version of the Bible in use is that published by the American Bible Society in the Armenian language. The singing is congregational, conducted by Mr. M. S. T. Nahigian, who came to Worcester almost before any other Armenian. A serious drawback upon the future of the Armenians in Worcester is the almost entire absence of Armenian women, caused by the refusal of the Turkish Government to allow them to emigrate. The entire congregation on the last Sabbath of the year 1888 consisted of men, and mostly of young men. Mr. Andreasian regarded this as such a serious matter that he was determined to discourage the Armenian immigration, unless the women came also. About fifteen hundred dollars a year have been raised among themselves for church and burial purposes here and contributions to their poor at home. They have manifested their gratitude and a fine sense of the fitness of things by also making a voluntary contribution of two hundred dollars to the funds of the City Hospital.

GERMANS.—In 1875 the number of persons in Worcester born in Germany was four hundred and three. Thirteen years later the number of this nationality was estimated at somewhat more than one thousand. Of these a small portion are of the Roman Catholic faith, but without any separate church organization. The bulk of these are free from all ecclesiastical connection, except—as a leader of this sort put the case—"each is a little church by himself." Formerly, and from time to time, the Protestant Germans essayed to establish a German church, but with more of failure than of success. In 1886 Charles H. Stephan, a layman of German birth, came to the city and was much dissatisfied at finding such religious desolation among his countrymen. He at once bestirred himself to do what he might to remedy the evil. The result of his efforts was that, on the 30th of November, 1886, a company of Protestant Germans was brought together for religious service and worship. This first meeting was held in the Swedish Lutheran Church on Mulberry Street. A mission service continued to be held from that time on until April 10, 1888, when a church was organized under the name of the Evangelical Lutheran Church. Ten persons became members by signing the "constitution," and Charles H. Stephan and Walter Lester were elected deacons. The "unchanged" (*invariata*) Augsburg Confession was made the basis of the organization. The two sacraments are baptism and the Lord's Supper. Baptism is uniformly administered to infants a few days after birth by a ternary pouring of water from the hand upon the infant's brow. The Lord's Supper is administered four times a year, under the imperative rule of the Lutheran Church. In regard to this sacrament, Luther's doctrine of consubstantiation is strictly held by this Worcester church; the body and blood of Christ are received under and with the bread and wine, but not *in* the bread and wine transubstantiated, as the Romish Church teaches. The minister of the church is the Rev. F. C. Wurl, of Boston, who serves as a missionary under appointment by the German Home Mission, at Brooklyn, N. Y. Preaching is held in the hospitable and catholic Summer Street Chapel every alternate Sunday, while a Sunday school is maintained every Sunday. The average attendance upon the preaching is forty-five and thirty at the Sunday school.

CITY MISSIONS.—The Trinitarian Congregationalists had for many years maintained an unincorporated City Missionary Society. But under the efficient and stimulating lead of the Rev. Henry A. Stimson, D.D., with the hearty co-operation of others, both clergy and laity, a corporation was legally organized and established, December 10, 1883, under the name of the Worcester City Missionary Society. The object of the society was "to promote religion and morality in the city of Worcester and vicinity by the employment of missionaries; the establishment and

support of churches, Sunday schools, mission stations and chapels for the preaching of the Gospel of Jesus Christ; for the diffusion of Evangelical knowledge and for the fostering of such works of benevolence as are especially adapted to commend religion to those who undervalue or are ignorant of it." This step rapidly led to a great enlargement of Christian activity and giving in the direction of city missions. Before the incorporation, the sum of \$500 was about the limit of the fund annually raised for the uses of the society. After the incorporation, as appears by the several annual reports, the amount raised was, in the first year, \$2778.23; in the second year, \$3670.69; in the third year, \$3764.81; in the fourth year, \$3886.53; and in the fifth year, \$4006.71. With these means in hand a superintendent and assistants were employed, the city was canvassed, missions were established and preaching in them was maintained. Out of all this three organized churches have grown up, one of which speedily took matters into its own hands, became strong and erected one of the finest churches in the city. The Rev. Albert Bryant has been the efficient superintendent from the beginning. At the close of the year 1888 the society owned three chapels, valued at \$15,000.

In the autumn of 1881, the Baptist Churches took measures for the united prosecution of city mission work. On the 25th of March, 1885, this enterprise took body and form by becoming incorporated under the name of the Worcester Baptist City Mission Board. The object of the association, as declared in the Articles of agreement, was "to promote religion and morality in the city of Worcester and vicinity, the establishment and support of churches, Sunday schools, mission stations and chapels under the general management of Baptists, the employment of missionaries to labor in said city and vicinity for the furtherance of the above-named objects and the advancement of the cause of evangelical religion." The policy adopted was to have all the Baptist Churches represented in the Board and all contribute according to ability. Moreover, it was held to be good policy for each church to have special charge of some one mission, and, if able, to bear all its expenses. The French Mission was reserved from this arrangement and kept under the control of the Board. This mission was organized in 1881, and was placed under the charge of Rev. Gideon Aubin in 1886. Its support, in part, is furnished by the Home Baptist Mission of New York City. Other missions under the charge of this Board are, one at Quinsigamond and one on Canterbury Street, both of which were organized in 1885, and a mission at Adams Square, which was begun in 1886. The amount of property held by the Board and invested principally in three chapels is somewhat less than \$10,000.

In the spring of 1888, a mission of the *New Jerusalem Church*, or Swedenborgians, was begun in

Worcester. Such a mission had been established in 1874, had been continued for nearly four years and had then come to an end. The numbers embraced in the new mission did not exceed a score at the close of the year 1888, and were all women. These provided a place of assembly, which is in Walker Building, and there on stated Sundays the Rev. Willard H. Hinkley, of Brookline, Mass., a secretary of the General Convention, ministers to them as a missionary of the New Church. There is no church organization; the members belong to different churches in Boston and elsewhere. It appears from the New Church "Almanac" for 1889 that the number of societies in America then in "organized existence" was 141; the estimated number of "New Churchmen," 10,178; the number of churches and chapels, 82; and the total number of clergy in active service and otherwise, 113. Swedenborg died in 1772. His doctrines were first introduced into America in 1784; and the first New Jerusalem Church in the United States was organized in 1792, in Baltimore. The first society in Massachusetts was instituted in Boston on the 15th of August, 1818; the whole number in the State in 1888 was nineteen.

Besides the foregoing, there are various other missions, denominational and undenominational, that are independent and self-supporting.

In 1888, the total valuation, by the assessors, of church property, exclusive of schools, parsonages and other parochial property, was \$1,794,900. This amount was distributed among the several denominations as follows: Trinitarian Congregationalists, \$577,300; Roman Catholics, \$451,800; Baptists, \$193,300; Methodists, \$171,500; Episcopalians, \$165,100; Unitarian Congregationalists, \$98,400; Universalists, \$69,300; Disciples of Christ, \$27,600; Swedish Lutherans, \$11,500, and the balance among the smaller organizations. The cost of the New Old South, not yet exhibited on the books of the assessors, would increase the total valuation by more than \$100,000. The real value of the whole would no doubt exceed \$2,000,000.

Our historical review shows that while the largest growth has been in the line of the oldest church, the city has also been greatly hospitable towards other creeds of later advent within its bounds.

In the preparation of this sketch of the Worcester churches the following is a partial list of the authorities and sources of information which have been consulted: Lincoln's "History of Worcester," Lincoln's "Historical Notes" (in manuscript), Smalley's "Worcester Pulpit," Bancroft's "Sermons," Austin's "Sermon on War of 1812," "Pamphlets on the Goodrich and Waldo Controversy, 1820," *et seq.*; "Sketches of the Established Church in New England," Hoffman's "Catholic Directory," Hill's "Historical Discourse," "Journal of Convention of Protestant Episcopal Church," Dorchester's "Early Methodism in Worcester" (in manuscript), Roe's "Beginnings of Method-

ism in Worcester" (in manuscript), Green's "Gleanings from History of Second Parish in Worcester," Davis' "Historical Discourse on Fiftieth Anniversary of First Baptist Church," Wayland's "Sermon on Twenty-fifth Anniversary of his Ordination as Pastor of Main Street Baptist Church," Barton's "Epitaphs," Drake's "American Biography," Liturgy of New Jerusalem Church, New Church Almanac; printed manuals of the various churches and societies, manuscript records of same, including records of First Parish at City Hall, and of the church therewith connected (Old South) in the last century, in the handwriting of Rev. Mr. Maccarty; *Worcester Spy* newspaper, ancient copies of Psalm-books, "Twenty-fifth Anniversary Exercises of First Universalist Society," "One Position" of Disciples of Christ, Thayer's "Christian Union." Much information has also been obtained from pastors and other living persons, actors in and having knowledge of what took place. In this way knowledge of what is written about the Swedish, Arminian, German and Jewish ecclesiastical matters were chiefly obtained.

## CHAPTER CLXXXII.

### WORCESTER (*Continued.*)

#### PUBLIC LIBRARIES.

BY SAMUEL SWETT GREEN, A.M.

THE earliest public library in Worcester of which I have been able to find a trace is that of

THE MILITARY LIBRARY SOCIETY IN THE SEVENTH DIVISION.—The preamble to the agreement signed by the gentlemen who became members of the society recites the fact that "military science is essential to the military character," and states that the Legislature had passed a law which provided for the "creation and encouragement" of a library such as that of which the formation was contemplated, with the purpose of making "adequate provision" for "the advancement of the object of military inquiry, . . . the general diffusion of military knowledge" and "the formation and instruction of military men," to the accomplishment of which objects "the establishment of a military library would greatly conduce."

The subscribers agreed "to associate in the procurement of a library," which was "always to be kept in the town of Worcester, as the most central place." Their first meeting was held April 3, 1811. Major Levi Lincoln, Jr., Lieutenant Gardner Burbank and Dr. John Green were appointed a committee for the "procurement of books."

"John W. Lincoln was" at the same meeting "elected clerk" . . . and "chosen librarian." On June 13, 1811, rules and regulations were adopted by the society. One of those provided that "There shall

be chosen annually a clerk and librarian, both which offices shall be vested in one and the same member." On June 24, 1812, John W. Lincoln was chosen clerk and librarian, and Dr. John Green, Lieutenant John W. Lincoln and Major Isaac Sturtevant were constituted a committee for the procurement of books.

These few facts have been taken from a manuscript volume in the library of the American Antiquarian Society, which contains records of meetings of the military society and documents relating to its organization. The only other fact not yielded by that volume which I have found out respecting the library of the society is that in 1824, Dr. John Green deposited in the library of "The Odd Fellows," an organization to be spoken of presently, thirty-three volumes, which had belonged to the "late military library."<sup>1</sup>

THE LIBRARY OF THE FRATERNITY OF ODD FELLOWS belonged to a society which was formed in 1820 or 1821. The date of formation is inferred from a statement made in a manuscript volume in the possession of the American Antiquarian Society, which is, that rules adopted in regard to the management of the library of the society at a meeting of the organization held October 20, 1824, had been agreed upon by the members, at that date, in "the fourth year of their oddity and the second session." Among the rules is the following: "The fine for detention shall be six per centum on the first cost of the work per day." At the end of the year 1827 the library appears to have contained one hundred and sixty-three volumes, which were owned by it, and other books which had been deposited in the collection, but did not belong to it, such, for example, as the thirty-three volumes mentioned above, which had been the property of the military library.

The brotherhood consisted of well-known citizens, whose names are familiar to the student of the annals of Worcester. William Lincoln was at one time its librarian, and Isaac Davis served in the same capacity at a later date.

It should be added that the Fraternity of Odd Fellows appears to have had no connection with the organization known as the Independent Order of Odd Fellows, a chapter of which was established in Worcester a number of years after the formation of the Fraternity. The only sources of information regarding the library of the organization which I know of, are three manuscript volumes, which belong to the American Antiquarian Society. One of these, namely, that which contains a list of the books belonging to the library, has just been referred to. The others are: "Rules of the Library of the Fraternity of Odd Fellows" and "List of Books delivered by the Librarian."

<sup>1</sup> See "List of Books belonging to the Library of the Odd Fellows" for the titles of the books deposited in that library by Dr. Green. The volume containing the "Lists, &c.," is in the library of the American Antiquarian Society.

**LIBRARY OF THE AMERICAN ANTIQUARIAN SOCIETY.**—The gentlemen who wished to be incorporated as the American Antiquarian Society, in the petition which they caused to be presented to the General Court of Massachusetts, stated that one of their number was "in possession of a valuable collection of books, obtained with great labor and expense, the value of which may be fairly estimated at about five thousand dollars, some of them more ancient than are to be found in any other part of our country, and all of which he intends to transfer to the proposed society, should their project receive the sanction and encouragement of the Legislature."

The gentleman referred to in the petition was Isaiah Thomas, who, as editor, publisher and author, had brought together a large amount of valuable literary matter of the kind most suitable for an antiquarian and historical library. The prayer of the petitioners was granted, and the American Antiquarian Society was incorporated October 24, 1812. It was organized November 19th of the same year, and at a meeting of the society held in February, 1813, the president, Isaiah Thomas, carried out his intentions by presenting to it his private library. Thus the founder of the society became also the founder of its library. As before remarked, Mr. Thomas' library was valued at five thousand dollars. It should be stated in this connection, however, that a collection of books of the kind which constituted his library, if sold to-day, would bring a sum of money many times larger than that which represented its market value at the time of its gift to the Antiquarian Society.

Many books were given to the society for its library during the earlier years of the existence of the latter, and in October, 1819, it contained nearly six thousand volumes.

It is interesting to note the fact that in the beginning of the activity of the Antiquarian Society it appointed gentlemen of experience and learning in different States of the Union, to act as agents or receivers in collecting books and manuscripts for the library and articles for the cabinet, and that, as a result of this policy, contributions of books, pamphlets and relics of various kinds were forwarded to it from all parts of the country.

Mr. Thomas was unwilling to have the library and cabinet of the Antiquarian Society placed in a large city, fearing that, if so situated, their safety would be endangered by the presence of large fires. Guided also by fears that it was natural for a man to entertain who lived here at the time of the organization of the Antiquarian Society, he would not have them placed on the seaboard, because, in time of war, they would be subjected to more peril there from the ravages of enemies than in an interior town, where, with the modes of locomotion then available, they were much less likely to be disturbed. At his death, in 1831, Mr. Thomas bequeathed to the society such of his

books, engravings, coins, etc., as he had not already given to it, and left to it money to constitute the librarian's and the collection and research funds.

In October, 1872, Mr. Nathaniel Paine counted the number of volumes in a large portion of the library and made careful estimates regarding the number in the remaining portions. Reckoning ten pamphlets as constituting a volume, he made up his mind that there were about fifty-three thousand volumes in the library at the date mentioned. Taking this calculation as a basis, and adding to the number obtained subsequent acquisitions, and subtracting from the total the number of volumes which have been taken out of the library for purposes of exchange or for other reasons, it appears, according to a statement given to me by the librarian, that at the time of the annual meeting of the society in October, 1888, there were about ninety thousand volumes in the library, calling ten pamphlets a volume, as in the reckoning of Mr. Paine.

The library is very valuable, but in many respects cannot be compared in importance to the antiquary, with such magnificent collections as the Lenox Library in New York City, and the rich private library brought together by the late John Carter Brown, of Providence, and still owned by his family. Certain classes of books, however, are represented here by numerous and noteworthy examples. Thus, for instance, the library contains a large and exceedingly interesting collection of early volumes of the oldest newspapers of the United States. It also possesses many rare works which were printed in this country in the days of its infancy and a number of valuable manuscripts.

The feature which best distinguishes it from other libraries and museums is its unique collection of memorials of the Mather family. There are from three thousand five hundred to four thousand volumes of newspapers in the library. Among these are sixteen of the *Boston News Letter*, the first established newspaper published on this continent. These volumes are not wholly complete, however. The *News Letter* was first issued in 1704. The library also contains several volumes, bearing dates between 1719 and 1758, of the *Boston Gazette*, the second newspaper established in Boston, and specimen volumes of the *Boston Post Boy*, a paper which was first issued in 1734. It has, too, seven early volumes of the *New Hampshire Gazette*, started in 1756, and several of the *Newport Mercury*, established in 1758, the *Connecticut Gazette* and the *Connecticut Courant*, first printed in 1764. Of these the *New Hampshire Gazette* is said to be the oldest newspaper in the United States, still in existence, that has been issued without interruption or change of name since its establishment.

The file of the *Massachusetts Spy*, the first number of which was issued in Boston, July 17, 1770, and the first number of which printed in Worcester bears

the date of May 3, 1775, is nearly complete. This is the oldest existing newspaper in the State of Massachusetts.

The library also possesses volumes of Rivington's *Royal Gazette* and of Gaine's *Gazette*, published in New York while that city was occupied by British troops. The files of the *Polar Star* or *Boston Daily Advertiser*, the first daily paper started in Boston, are nearly complete. That paper was begun in October, 1796, but was discontinued after it had been published for a few months. The present *Boston Daily Advertiser* did not begin its life until March 3, 1813. That is the first daily paper that was permanently established in Boston. There is in the library a large proportion of the books printed in the United States before the year 1700. For example, it contains a copy of the "Bay Psalm-Book," which was issued from the press in Cambridge in 1640, and was the first volume printed in British America, and one of the first edition of Eliot's Indian Bible, the printing of which was finished at Cambridge in 1663.

The library also has a handsome and beautifully-bound copy of the second edition of that Bible, the printing of which ended in 1685, and several rare tracts in the Indian language prevalent in this vicinity. It possesses a large collection of Bibles. Among these there is a fine copy of the folio Bible printed by Isaiah Thomas at Worcester, Mass., in 1791. This was the first folio Bible in the English language ever published in America. Mr. Thomas had a great printing and publishing establishment in this town, and such was the excellence of the work which came from his presses that he won for himself the name of the American Baskerville. The library contains a collection of psalmody and church music which is large enough to deserve mention, and has a good collection of books which were printed in the fifteenth and sixteenth centuries.

Mr. James Carson Breevoort gave to it, a few years ago, a number of early books relating to Japan which he had been engaged for twenty-five years in bringing together. It also possesses accounts of many early voyages and travels, a large collection of almanacs, a valuable and extensive collection of biographical and genealogical works, a noticeably large accumulation of American school-books and of literary matter relating to slavery in this country and to the Civil War.

Among the manuscripts in the library are forty or fifty orderly-books and volumes containing records similar to those in books of that kind. The entries in these works bear various dates between the years 1758 and 1812. The matter in them relating to the period of the Revolution is of especial interest. The library also possesses a large collection of muster-rolls, army-orders and other military papers, with dates extending from 1745 to 1787. It has, also, two diaries of John Hull, mint-master,—one relating to private, and the other to public matters,—his letter-

book for the years 1670–1680, and a manuscript narrative by him of a voyage to Spitzbergen in the year 1613, and an interesting, interleaved Edinburgh almanac of the year 1768, with manuscript notes by Rev. Dr. John Witherspoon, who in that year was inducted into the office of president of the college at Princeton, N. J., and who became a member of the Provincial Congress of that State and of the Congress at Philadelphia which promulgated the Declaration of Independence, of which document he is one of the signers.

Dr. Witherspoon came to America in 1768, and a portion of the notes in the almanac were written in Scotland and Ireland and another portion in America. The library has a manuscript copy of the original Connecticut laws of 1650, the Curwen papers of the Salem family of that name; the Cragie manuscripts, written in the last half of the eighteenth century, several bound volumes of letters addressed to Isaiah Thomas, and of copies of letters of his own; William Lincoln's manuscripts, relating to Worcester, an interleaved copy of his history of the town, containing corrections and additions to that work, and Christopher C. Baldwin's papers concerning Sutton.

Among the more elegant manuscripts in the library are an illuminated missal on vellum, written perhaps as early as 1304, a Persian tale or romance which has gilt borders and is illustrated by highly-colored pictures, and a folio copy of the Koran which is adorned by illuminated borders.

The manuscripts in the library have lately been put in order, income from the recently received Alden Fund having been expended in doing the work.

Two large gifts of books have been made to the library within a few years—one in 1879, by the heirs of the late George Brinley, of Hartford, the other under the provisions of the will of the late Joseph J. Cooke, of Providence. In both instances permission was granted to the Antiquarian Society to bid off books to the value of five thousand dollars at the sales by auction of the collections of the benefactors. The books obtained at those sales form a very noteworthy addition to the library of the society.

At an earlier period in its history the library was the recipient of a valuable bequest of books and manuscripts from Rev. Dr. William Bentley, of Salem, (1759–1819). He gave to it, by will, all his German books, such volumes belonging to him as had been printed in New England, the manuscripts which he left that were not written in his own hand, a cabinet with its contents and all of his paintings and engravings.

Mr. William Bentley Fowle, his nephew and sole executor, bequeathed to the Antiquarian Society other portions of the library and literary remains of Dr. Bentley. In the collection obtained from these two sources are nineteen bound volumes of notes containing memoranda on various subjects, thirteen diaries, letters addressed to its owner by prominent corre-

tion, in 1812, to 1831. This was painted from life by E. A. Greenwood. It also possesses a marble bust of Mr. Thomas, which was the work of the late B. H. Kinney.

Of its second president,—1831–41,—as stated above, it has a portrait by Thomas Sully. It has no portrait of Edward Everett, its third president (1841–53), only a framed engraving of Wight's full-length portrait. The absence of a suitable likeness of Governor Everett is much to be regretted. Of Governor John Davis, its fourth president (1853–54), the society has a portrait, by E. T. Billings, taken from a daguerreotype, a bust by Henry Dexter, a representation of his head on a medallion and a life-size photograph finished by the use of crayon. It has a fine portrait, by Daniel Huntington, of New York, of the fifth president, the late Stephen Salisbury, who occupied that position for thirty years, from 1854–84. Of its living presidents, Senator George F. Hoar (1884–87) and Mr. Stephen Salisbury (1887), it has as yet no portraits.

The librarians of the Antiquarian Society have been Samuel Jennison (1814–25), William Lincoln (1825–27), Christopher Columbus Baldwin (1827–30 and 1831–35), Samuel M. Burnside (1830–31), Maturin Lewis Fisher (1835–38), Samuel Foster Haven (1838–March 31, 1881; Librarian Emeritus April 1, 1881, until his death, September 5, 1881) and Edmund M. Barton (1883). Of these gentlemen, the society has portraits of C. C. Baldwin and Samuel F. Haven. They were painted respectively by Chester Harding and Edward L. Custer. It also has copies of portraits of Columbus and Vespucci, made by Antonio Scardino from originals of Francesco Mazzola (Parmigianino) at Naples. Of Columbus it possesses likewise a full-length engraved portrait and a likeness by Salviati in the form of a modern Venetian mosaic. It has also a collection of engraved portraits and pictures of other kinds, and busts in marble or plaster of Washington, Franklin, Hamilton, John Adams, Jackson, Clay, Webster, Jared Sparks and others. Its halls are adorned with copies in plaster of two of the statues of Michael Angelo; one from his Christ in the church of Santa Maria Sopra Minerva at Rome and the other from the colossal statue of Moses in the church of S. Pietro in Vincoli, in the same city.

When Mr. Thomas gave his private library to the Antiquarian Society in the spring of 1813 he was requested to retain it in his possession until a suitable place could be prepared for its reception. Early in the year 1819 Mr. Thomas offered to put up a building at his own expense for the accommodation of the society and its library, and in August of that year a committee was appointed, at his request, to superintend its erection. The work was attended to at once and the central portion of the old Antiquarian Hall on Summer Street was dedicated to the uses of the society Au-

gust 24, 1820. The two wings were added to the main structure in 1832. The building, however, which still stands, although now (January, 1889) used for private purposes, proved too small to house the growing library and was also found to be damp. A new hall was therefore built on the site now occupied after a time. This was completed in 1853. But the rapidly increasing collection of books demanded still ampler accommodations and an addition to the present building was determined upon. That was finished in 1877. In putting up the existing building and adding to it the society was assisted by very generous contributions of money from the late Stephen Salisbury, who, as before stated, was its president for thirty years.

The executive officers of the society are appointed by the council of the society and perform their duties under the supervision of a sub-committee of that body.

The present librarian, as before stated, is Edmund Mills Barton. He had been assistant librarian for seventeen years before he was appointed librarian. Reuben Colton was assistant librarian from April, 1878, to February 1, 1889. At the latter date he resigned the position for the purpose of going into business. Miss Mary Robinson became connected with the library as cataloguer in the autumn of 1881. February 1, 1889, she was promoted to the position of assistant to the librarian.

A catalogue of the books in the library (pp. 571), was printed in 1837 by Henry J. Howland. A card catalogue has been in preparation for several years, and nearly all of the bound volumes in the collection have already been indexed. The society also has in its possession a manuscript catalogue of the books presented to it by Isaiah Thomas. The library is kept open from nine o'clock A.M. to five P.M. every secular day, excepting Saturday, when it is closed at one P.M.

This account of the library of the American Antiquarian Society has been gathered largely from the proceedings of the society. Particular indebtedness should be acknowledged to the recorded researches of Mr. Nathaniel Paine, as they appear in the volumes of the society's publications or in periodicals or separate pamphlets. The history of the Antiquarian Society, as distinguished from that of its library, is given under the head of societies, in another portion of the present work. That is also the case in regard to the other associations whose libraries are described and their histories given in the monograph which I am writing.

THE WORCESTER COUNTY ATHENEUM.—It is stated in the *Spy* of November 4, 1829, that "After the adjournment of the Lyceum on Wednesday last, pursuant to notice given at the close of the address in the meeting-house, a public meeting was held to consider the expediency of adopting measures to establish a public library for the County of Worcester." An association was formed to found a library. The

subscribers agreed to unite "for the purpose of establishing a Public Library in the Town of Worcester, to consist principally of such rare works in Science and Literature as are not usually found in private Libraries." The property of the society was divided into shares of twenty-five dollars each. At a meeting of the members of the organization, held December 16, 1829, it was voted to call the new association the Worcester County Athenæum, and January 8, 1830, Oris C. Wheeler was chosen librarian. At a meeting of directors, held the 2d of February, "William Lincoln and Isaac Goodwin reported that they had leased of Dr. John Green the room in the second story of the new brick building on Main Street, opposite Central Street, for the use of the Athenæum, and recommended that one share of the stock of the Athenæum be conveyed to him in payment of the rent for one year, which report was accepted.

March 4th the directors voted "that the Athenæum will receive the deposit of the books, minerals and property of the Worcester Lyceum of Natural History and pay the expenses of making the cases and cabinets belonging to that association," &c. Some of the property of the last-named society was afterwards stored in the rooms of the American Antiquarian Society, and remained there until, by a vote of surviving members, it was given to the organization now known as the Natural History Society, of whose collections it to-day forms a part. The Athenæum was incorporated in March, 1830, and those officers, under the act of incorporation, on the 14th of the following month.

It seems to have been in the main, a circulating library, but that it was not wholly so appears from the following regulations: "The Directors shall cause books to be procured for the library—and as certain books, from their value and beauty, may be liable to injury, or their use may be prevented by circulation, they may require such works to be retained in the apartments of the Athenæum." The librarian was appointed by the directors.

On the 18th of June, 1830, it was "voted that Alfred D. Foster, Frederick W. Paine and William Lincoln be a committee to make a catalogue of the books of the Athenæum," &c., and "that Oris C. Wheeler be Librarian, subject to the direction of this committee." On the 6th of the following December it was voted to execute a lease of Dr. Green's rooms, and on the same day the directors appointed William S. Lincoln Librarian "for the ensuing year." January 5, 1832, the directors reported that the library then "contained 2100 volumes, exclusive of the Cyclopaedia and unbound pamphlets."

Owners of shares (proprietors), life subscribers and annual subscribers could take out books from the library. William Lincoln, writing in 1836, stated that about three thousand volumes of what he denominates "general literature" had been collected by the Athenæum when he wrote. The library at that time was

kept in a room appropriated for the purpose in the old building of the Antiquarian Society on Summer Street.

The Athenæum has for a long time ceased to exist. Most of its books were given to the Antiquarian Society. This was a natural proceeding, as a large proportion of the members of the former society were interested in the latter organization. I find that a book was taken out from the library of the Athenæum as late a date as 1851.

Nearly all of the information relating to the Athenæum given here has been obtained by me from the following manuscript volumes in the library of the Antiquarian Society: "Rules and regulations, stock and property" and records of meetings: "Waste book"—this is a list, under the names of givers and depositors, of books placed in the library—a volume in which charges of books taken out from the library were made.

WORCESTER SOCIAL LIBRARY.—In the library of the Antiquarian Society there is a manuscript which is headed "Alphabetical List of the Proprietors of the Worcester Social Library." It is dated May, 1830. I find no evidence that this library was actually established. No mention of such an organization is made by William Lincoln in the "History of Worcester," which he wrote a few years after the date of the manuscript. There were several movements in Worcester about the year 1830 looking towards the formation of libraries. Thus as we have seen, the Worcester County Athenæum was started late in the year 1829 and incorporated in March, 1830. The Worcester Lyceum, of which I am now about to write, was organized in November, 1830.

WORCESTER LYCEUM.—Anthony Chase, the first secretary of the Worcester Lyceum, in a rough draft of a letter written to the secretary of the Lyceum in Medway, now in the possession of his son, Mr. Charles A. Chase, writes: "Our Lyceum was organized the 5th of November, 1830, though many of the preliminaries were settled previous to that time." This letter was written in 1831. Lincoln, writing a few years later, gives the date of its formation as November 4th. He adds: "The Lyceum" (about 1830) "is possessed of a good chemical apparatus and a well-selected library of about five hundred volumes, beneficially and extensively used by the young artisans and operatives of the village." Persons who have resided in Worcester for forty or fifty years remember that in their younger days the Lyceum was the main dependence of the people of the town for a circulating library, and that it was kept for many years at the residence of Mrs. Sarah B. Wood, on the south corner of Main and School Streets. The entrance to the house was on School Street. Mrs. Wood had a private school for children. The books of the Lyceum were in cases in the school-room, and Mrs. Wood served as librarian on one or two holiday afternoons every week. "By a provision of the constitution" of

the Lyceum, writes Mr. Lincoln, "no alienation of the property is to be made; to secure its preservation during any suspension of the society, the selectmen are authorized to deposit the collections with some incorporated literary institution of the town, to be held in trust and transferred to some new association for similar purposes."

In 1854 or early in 1855 the books belonging to the Lyceum were deposited in the rooms of the Young Men's Library Association, and a union of the Lyceum and the latter society was effected April 12, 1856. Thus the libraries of these two organizations were consolidated.

**LIBRARY OF THE YOUNG MEN'S LIBRARY ASSOCIATION.**—That society was formed in August, 1852, and fully organized in December of the same year. The act incorporating it was signed by the Governor, March 26, 1853, and accepted by the association on the 16th of the following month. Principal purposes of the organization were the establishment and maintenance of a reading-room and library. A reading-room was opened December 31, 1852, and in the following month steps were taken to obtain subscriptions in money and gifts of books to be used in forming a library; \$1300 was secured in cash, and contributions of books to the number of about eight hundred and fifty volumes were received. The library was thrown open to members June 18, 1853. It then numbered seventeen hundred volumes. Persons who were not members of the society were allowed to take books out of the library on the payment of an annual fee of one dollar. It appears from a report made in April, 1854, that during the first nine months of the existence of the library, 8620 volumes were taken out from it by 430 persons. At the date of the report the library contained 1762 volumes. John Gray was the first librarian. His services to the library became of great value at once, and continued to be so till the date of his death.

During the second year of the continuance of the Young Men's Library Association, which ended April, 1855, the Young Men's Rhetorical Society was temporarily merged in the former organization, and its library of about one hundred volumes came into the custody and soon into the full possession of the association. In April, 1855, the library of the association numbered 2126 volumes; 11,000 volumes had been taken out of it during the year preceding that date, which was the first complete year of its life. In December, 1855, the late Dr. John Green placed his large and valuable private library of 4500 volumes in the charge of the association, to be used for purposes of consultation and reference. The arrangements in regard to its care and use were consummated in April, 1856. According to these it was to remain in the custody of the association for five years or for a longer period, should such an arrangement be desired by both of the parties in interest.

April 12, 1856, the library of the Young Men's Li-

brary Association, consisted of two thousand six hundred and ten volumes. On that date the act approved by the Governor, March 15th, of the same year, providing for a union of that association and of the Worcester Lyceum, was accepted by both organizations and the name of the united societies became

**THE WORCESTER LYCEUM AND LIBRARY ASSOCIATION.**—One year later, April 11, 1857, we find that the circulating library of this organization contained three thousand eight hundred volumes and the reference or Green Library six thousand volumes. April 12, 1858, the circulating department had about forty-one hundred volumes and the Green Library sixty-five hundred volumes. During the year ending with that date the valuable and rapidly increasing library of the Worcester District Medical Association, comprising about twenty-four hundred volumes, was placed in a room in Worcester Bank block, adjoining the rooms of the Worcester Lyceum and Library Association, and put under the care of the librarian of the latter organization. April 9, 1859, the circulating department of the library under consideration contained four thousand three hundred and fifty volumes, and the Green library seven thousand five hundred volumes.

John Gray, the esteemed librarian of the Lyceum and Library Association, died suddenly in the latter part of 1859, and at a special meeting of the Board of Directors held November 25th of that year, the first regular business was to choose a committee to confer with Dr. Green in reference to the selection of a librarian. Dr. Chandler, Albert Tolman and T. W. Higginson were appointed the committee. At an adjournment of the meeting held the next day, that committee reported: "That an interview had been held with Dr. Green, in which he expressed a readiness and desire to present the Green Library to the city, as the foundation of a Free Public Library. That subsequently the committee had visited the Mayor," Honorable Alexander H. Bullock, "who expressed much gratification at Dr. Green's liberality and cordially entered into the plans. The following preamble and resolution were then adopted:

"WHEREAS, Dr. John Green has indicated to a committee of the directors of the Worcester Lyceum and Library Association, a desire to give his library to the city, on such liberal conditions that the directors believe it best the public should receive the gift:

"Resolved, That the Directors recommend that the library of the Association be also transferred to the city, provided suitable appropriations and arrangements are made for its reception." (Seventh annual report of the Worcester Lyceum and Library Association, signed by Edward Earle, president.)

The action of Dr. Green and of the Board of Directors was regarded gratefully by the city government, and after conferences between the representatives of the city and the other parties interested, "On December 16th, at a special meeting of the

*Samuel S. Green*

Association, called for that purpose, it was voted, on motion of Mr. N. Paine, that the Association accept and adopt the resolutions passed by the Board of Directors, at their meeting held November 25th, and that the Board of Directors have full power to carry out any arrangements that may be necessary under the resolves, including the transfer of the library."

The proposition endorsed in this vote was accepted by the city government December 23, 1859, and the library of the Worcester Lyceum and Library Association became almost immediately the property of the city of Worcester and a portion of the Free Public Library, which was established by an ordinance bearing the same date as the resolves of the City Council in which the gift of the association was accepted.

The manuscript records which contain an account of the organization and early meetings of the Young Men's Library Association are in the possession of the American Antiquarian Society. Other manuscript volumes which belonged to the association and its successor, the Worcester Lyceum and Library Association, are owned by the Free Public Library, which also has a bound volume containing all the printed reports of the two organizations and two catalogues—one issued in 1853 and the other in 1859.

**FREE PUBLIC LIBRARY.**—This institution, as stated above, came into existence December 23, 1859. The library was opened to the public April 30, 1860, in the rooms in Worcester Bank Block, which had been occupied by the two libraries out of which it was formed. Those quarters were regarded as temporary, however, since it had been stipulated by Dr. Green in the deed by which he transferred his collection of books to the city that the latter should put up a library building. This stipulation was early complied with, although it is understood that the vote providing for the erection of a building failed at first to pass in the Board of Aldermen. The Mayor, Hon. William W. Rice, exerted himself, however, to secure its passage, and by arguments addressed to one of the members of the board, who had opposed the measure, convinced him that it would be well to favor it, and in this way obtained the support needed for its adoption.

In the first annual report of the directors of the Free Public Library it is stated that prior to its foundation "the want of such an institution had for a long period been felt by the people of the city, and had repeatedly been made the subject of remark in the inaugural addresses of its chief magistrates. So great, however, would necessarily be the expenditure for its establishment, that no mayor of the city had felt authorized to treat the matter with any other language than that of desire and hope."

It had been the wish of some of the gentlemen who formed the Young Men's Library Association that the library which they were bringing together should be eventually merged in a free public library. Thus, for example, Mr. Thomas Wentworth Higginson

devoutly desired such a consummation. Mr. Gray, the librarian of the organization, entertained from the beginning of the library of the association the hope that such a plan would some time be carried out, and clung to it as a cherished wish until his death. The late Mr. Stephen Salisbury, in a letter written to the Council of the American Antiquarian Society January 21, 1852, a date which is earlier by a few months than that of the formation of the Young Men's Library Association, stated that the establishment of a Public Library was then regarded with much favor by the citizens of Worcester and would probably be accomplished with readiness and on a liberal and useful scheme, if suitable apartments for its accommodation were offered. He then went on to say that he would give to the society five thousand dollars, to be used in defraying the cost of a new building for its occupation, on condition that it would grant without rent and under such regulations as might be necessary, until the 1st day of January, 1875, for a Public Library for the citizens of Worcester, the use of the large hall in the lower story of the proposed building, with suitable finish and shelves for books and a room on the same floor sufficient for the office of the librarian. Mr. Salisbury's gift was accepted by the Antiquarian Society with the conditions imposed, but nothing further appears to have been done regarding so much of the subject-matter of his communication as related to the use of rooms in the lower story of Antiquarian Hall for the purposes of a public library. It is an interesting fact, stated by Mr. Barton in a report as librarian of the Antiquarian Society, in which Mr. Salisbury's letter may be found, that the latter gentleman and Doctor Green, when the communication was addressed to the council of the society, were both of them members of that body, and a rational curiosity would be gratified could it be found out whether Mr. Salisbury had Doctor Green's library in mind when he made the proposition just mentioned and reserved to himself, as he did, the right to designate the Public Library that should have the contemplated accommodation.

Whatever the fact respecting this matter may have been, however, the library of the Young Men's Library Association was formed a few months later, Dr. Green's library was soon after placed in its rooms, and both libraries were before long given to the city and formed the nucleus of the present Free Public Library, for the accommodation of which an especial building was put up.

On the 27th day of December, A.D. 1859, Dr. John Green gave to the city of Worcester, by a deed of gift bearing date of that day, a library of about seven thousand volumes "in trust for the free use of the citizens and the public forever, as a library of consultation and reference, but to be used only in the library building." This library had been collected from time to time, during a long professional career, at a cost of not less than ten thousand dollars, with the purpose

of some time devoting it to public uses. Among the terms and conditions of the gift were the following:

"First: The management of the Library, the custody of the books, and the regulations under which they may be used shall be vested in a Board of Directors, who shall be citizens of Worcester, to be chosen by the City Council in a convention of the two branches thereof, two of whom shall, after the first election, be chosen annually and shall hold their offices six years each.

\* \* \* \* \*

"Third: The City of Worcester shall forever pay the salary of a competent Librarian, to be chosen by the Directors, and shall furnish a suitable Library building for the books to be secure against fire, and to be constructed with reference to the future increase of the Library, and this building shall be kept warmed and lighted at the expense of the city and shall be provided with suitable accommodations for the convenience of those using the books and shall be kept open at all proper hours, according to the regulations of the Directors, for the use of the public.

"Fourth: No plan for a Library building shall be adopted without the concurrence of the Board of Directors.

"Fifth: The foregoing provisions may, during my life, be changed by the joint action of myself and the Directors in any manner which shall not impair the value and public utility of the Library, but they shall not be altered after my decease, nor shall any books, once added to the department established by me, ever be transferred to any other."

The Worcester Lyceum and Library Association gave its library to the city of Worcester in December, 1859, as has been already stated. That library consisted of about forty-five hundred volumes. Dr. Green gave his books to be used as a reference library. The Library Association contemplated the use of most of its books as the nucleus of a circulating library.

The City Council passed an ordinance, dated December 23, 1859, of which the following is the first section:

"The City of Worcester hereby accepts the donations of Dr. John Green and of the Worcester Lyceum and Library Association, and establish the Free Public Library of the City of Worcester."

The ordinance, as originally adopted and in its subsequent revisions, carries out, in provisions for the whole institution, the spirit of the conditions which Dr. Green imposed in regard to the library given by him.

In the first annual report of the directors of the library, presented to the city government in January, 1861, it is stated that "the building is now far advanced in the stages of erection."

It will be noticed that, by the terms in the deed of Dr. Green's gift, the spirit of which was embodied in the city ordinance also, the whole management of the library is placed in the hands of a Board of Directors, and not interfered with by the city government. This will be regarded as a wise provision, as the members of the board are chosen with reference to their fitness for the especial work to be performed. Sufficient supervision of the City Council is implied in the facts that it chooses the directors, and that it has wholly within its control the regulation of the amount of money it will appropriate yearly for the use of the library.

The conditions in the deed of gift require, also, it will be seen, the city to put up a building secure against fire, to keep the rooms frequented by users

comfortable, and to pay the salary of the librarian and other running expenses. In inducing the city to make heavy expenditures in carrying out the object he had in view in giving his library to the city, Dr. Green greatly added to the value of his gift. He may properly be regarded, not only as a public benefactor, but also what he is called in the fourth section of the original ordinance, by which he is made an honorary life director, as the "principal founder" of the library.

The Board of Directors, as constituted by the deed of gift and the city ordinance, is a conservative body. A custom, however, was observed for several years (and that has since been embodied in an ordinance), that no person should be eligible to fill a vacancy in the Board of Directors arising from the expiration of his term of office. The observance of this rule, while aiding to secure a progressive administration of the library, has also been useful in widening the interest of citizens in the institution, by introducing into its board of direction, representatives of various occupations and tastes prevailing in the community for which it was established. The year 1865 is memorable in the history of the library for the foundation of the reading-rooms. A fund of between \$10,000 and \$11,000 was raised for their endowment by subscription among the citizens of Worcester, chiefly through the exertions of Hon. George F. Hoar, at that time an influential member of the Board of Directors. The subscription paper was headed by the late Mr. Salisbury with a gift of \$4000; Mr. Hoar, Dr. Green, and forty other persons contributed \$100 apiece; twenty-five, \$50 each; thirty-eight, \$25 each; and other givers smaller sums. It is interesting to notice that the Worcester Lyceum and Library Association gave \$300 to the Reading-room Fund of its successor. The money raised was carefully invested, and the income of the fund has since been spent in furnishing the rooms with American and foreign papers and periodicals. This income, a few gifts, and \$400 taken annually from the city appropriation, now enable the library to place in its rooms current numbers of two hundred and eighty-nine journals, magazines and reviews.

With the foundation of the reading-rooms the library came substantially into its present form. The Green or reference library, the departments from which books may be taken out for use in homes or elsewhere, and the reading-rooms, constitute the Free Public Library of the City of Worcester.

Dr. Green died in the fall of 1865. According to the sixth annual report of the directors, he, from time to time, between the date of the deed of his original gift and that of his death, gave to the library 4968 volumes, in addition to the seven thousand contributed at the start. He also remembered the library generously in his will. The main provision of that instrument, for the benefit of the library, is described concisely and clearly in the report to which reference has just been made. That report was writ-

ten by Hon. Stephen Salisbury, the much respected president of the Board of Directors, in the year 1865. I make the following quotation :

"The probate of the last Will and Testament of Dr. Green, has made known his bequest to this City of Thirty thousand dollars, to be paid within one year after his decease, to the officer of the City authorized to receive it, and to be held with its future accumulations as a separate fund, designated in the Books of this City as the 'Green Library Fund;' and the Testator states that he 'aims not to gratify any personal feeling of his own, but to set apart and designate the Fund in a manner which shall forever keep it distinct from all others,' 'and which shall enable the people of Worcester at all times clearly to perceive its amount and condition.' He requires that the fund shall be kept, and that the income shall be collected by the authorized officer of the city; and he provides that the investment and management of said Fund shall be under the direction of a Financial Committee of three directors of this Library, annually to be chosen by ballot, and that said Committee shall annually report to the Board of Directors, and their report shall make a part of the annual Report of this Board to the City Council. It is required that three-fourths of the investments shall be made in 'real estate mortgage securities,' and one-fourth in Bank stock; and in taking landed securities, it is the 'desire and request' of the Testator, 'that in every instance first mortgages shall be taken for no larger loan than one-third of the value, of the security; and as to the use and expenditure of the income of said fund, it is directed that one-fourth part of said income shall be added annually to said fund, and that the remaining three-fourths of said income, after repaying any accidental loss that may happen to the principal, shall be expended by said Directors in the purchase of books, to be added to that department of said Free Public Library which was instituted by the Testator, and in repairing and re-binding the books of that department. Provided that when the invested fund shall reach the sum of One Hundred Thousand Dollars, one-fourth part of the income thereof, shall continue to be forever annually added to the principal, and three-fourths of the income of \$100,000, after replacing any losses of the principal, and neither more nor less, shall be applied to the increase and support of the Department of said Library instituted by the Testator; and the remaining part of the income of said fund, shall be applied and expended by said Directors for the benefit of the whole of said Free Public Library, as well for that part which is kept for circulating or lending, as for that part which was instituted by the testator."

The principal of the Green Library Fund has met with no loss. It has been increased by the addition of a quarter of every year's income. Five hundred and fifty dollars and eighty-five cents, the proceeds of a trust instituted by Dr. Green during his life, has also been added to the fund. That amounted December 1, 1888, to \$43,117.91. Fifty shares of bank stock, now held by trustees, will eventually come into the possession of the city, to be applied, besides his other bequests, in accordance with the testator's will, for the benefit of the library.

Hon. George F. Hoar, president of the Board of Directors in 1867, in writing the annual report for that year, after reciting provisions of Dr. Green's will, in regard to the library, remarks that, "Upon these provisions a grave, and until within a few years what would have been deemed a quite doubtful question of law arose, growing out of the policy of the law, which prohibits perpetuities." He then proceeds in an able argument to quiet fears which might be entertained. He speaks of the hesitation of the executors of the will of Dr. Green to pass over his bequest to the city, and narrates the action of the city and board of directors of the library. He compliments the family of Dr. Green for just and honorable conduct in facilitating the carrying of his wishes into effect, and states

that the Supreme Judicial Court, upon application, rendered a judgment, so far establishing the validity of the will as to order the fund to be paid over to the city. Mr. Hoar then cites two recent decisions of the Supreme Judicial Court of Massachusetts, and, after a discussion of the points at issue, announces his belief, "that the city may rightfully and lawfully obey the direction of the will, until a fund is accumulated, ample enough to defray all the expenses of the library, and so fulfil the beneficent purpose of the donor." It is well understood that when Mr. Hoar speaks of an ample provision for a library like the Free Public Library, he does not mean a paltry few hundred thousand dollars, but a much larger sum. It is worthy of remark, before leaving the consideration of Dr. Green's will, that he is careful to reiterate in it the terms and conditions contained in the original deed of his gift to the city, executed in 1859.

Here, then, there is in the City of Worcester a reference library, founded and endowed by Dr. Green. It is important to inquire whether the citizens of Worcester use the library which has been provided for them. Reports of the directors show that it was but little used for several years. They express regret that this was so, and it appears from their fifth annual report that the establishment of the reading-room resulted from a movement to increase the usefulness of the Green Library. It was thought that a reading-room would add to and bring out its value. Many of the newspapers and periodicals taken are bound, and the volumes placed on the shelves of the reference library. They thus add to its value. Readers of magazines and papers have curiosity awakened which they seek to satisfy by the use of atlases, encyclopædias and other works of reference. A taste for reading and the habit of reading are promoted by a reading-room; a desire to study often follows. A reading-room in this way brings out the value of a reference library. At the start the Green Library reading-room was not properly heated; this defect was remedied by the introduction of a steam-heating apparatus.

A step in the right direction was made by the directors in procuring a large collection of the best dictionaries, encyclopædias, etc. It was impossible for them to do all that they wished, for they could not get money enough, in the earlier days of the library, to enable them to carry out their plans. They did what they could with the means at their disposal. Still, the reference library was not much used. In 1871 there came a sudden growth in its use. This use increased rapidly in succeeding years. It is now very large. How has this increase been effected? It has been brought about by the use of very simple means. It was thought that the reason why people did not use the library was that they needed assistance in using it. A new librarian was appointed, and he was allowed to render such aid as was desired by frequenters of the library. Then, all

persons in the city who had questions to ask to which they might hope to find answers in books were cordially invited to come to the library and propound them. It was made a rule that everybody should be received with courtesy and made to feel that he is an owner of the library, and that its officers are bound to give a reasonable amount of time to finding answers to his questions. The youngest school-children, the humblest citizens, were to be received cordially, and an impartial courtesy extended to all. The plan worked admirably. It has been a cardinal principle that the officers should manifest a persistent determination not to allow an inquirer to leave the building without getting—if a possible thing to find it—an answer to his question. When books needed in answering questions are not found in the library, efforts are at once made to buy them. If their purchase cannot be afforded, or if they cannot be bought in time for present uses, pains are taken to find out whether they do not belong to some other library or to some individual accessible to the questioner, or they are borrowed by the librarian from some institution within the city or in some other place. Time is spent in doing such work as this,—the time, too, of persons whose service is somewhat costly. But this time is well spent. The personal relations of an accomplished librarian with users of a library are productive of great advantage. Few users of a reference library know what books to go to, to get answers to questions which they have to ask. Many need help in finding out and stating the exact question which they wish to have answered. The librarian or an assistant steps forward and helps them to give a definite shape to their inquiries, and then refers them to some master of the subject to which their inquiries relate. He gives them the best books, and keeps them from the productions of dabblers in knowledge.

Formerly, when the reading-room of the reference library was not filled with persons who had come to it for instruction, entertainment was sometimes offered to such as desired it in the form of stories and bound volumes of illustrated papers. That custom has long been discontinued, however, the legitimate uses of the library for study and serious reading having grown so large that there is no room for mere pleasure-seekers. That the efforts to build up a large use of the reference department were successful was evidenced at once by the statistics given in annual reports. From those it appeared that 7321, 12,408, 15,672, 20,550 and 22,833 persons, respectively, had books given them during the first five years of the new order of things, or helped themselves to books to be used in answering their inquiries, or to give them enjoyment. A very large proportion of these recipients of information and enjoyment received answers to serious inquiries. While, too, care has been taken to supply the wants of humble inquirers, the officers of the library have been equally

solicitous not to neglect the demands of more advanced students. While a half-hour has been readily spent in finding out for a curious boy how dates can be plucked from the top of the tall palm-tree, whatever time was needed has been cheerfully given to the scholar whose questions required reference to philosophical transactions or a Greek anthology, or to the public instructor in preparation for a lecture or review article. A reference library that is not used becomes very unpopular. Where such a library is so administered that a large constituency gets advantage from it, all will recognize it as a public benefit, and citizens unskilled in the niceties of scholarship will, in consideration of the benefit they themselves derive from the institution, be willing that money should be spent in supplying the wants of scholars. During the last ten years 51,674 volumes have been used annually on the average in the Green Library for purposes of reference, study and serious reading; 61,424 volumes were given to users for those purposes in the library year just closed, namely, that from December 1, 1887, to November 30, 1888.

The Free Public Library has become distinguished for the aid which it has rendered to schools. Every effort has been made there to help teachers to do their work, and especial facilities have been afforded them in pursuing studies. They have also been assisted constantly in their exertions to add to the pleasantness and profitableness of study by the children under their charge. Many of the teachers in Worcester have been very successful in awakening an interest in reading among their pupils and in raising the standard of reading among them. They have done this mainly by starting an interest in subjects, and then supplying books from the library to satisfy the curiosity aroused.

Immense numbers of books have been used in this way by the teachers, for their own benefit and that of their scholars. Space cannot be afforded here to describe the methods in use in the Public Library. They have been set forth from time to time in the pages of the *Library Journal* and in pamphlets containing papers and addresses of the present librarian.

It is enough to say in this place that the plans adopted in that library have led to results such as have approved themselves to the managers of libraries in other communities, and have been copied or adapted to local emergencies by a very large number of institutions in the cities and larger and smaller towns of the United States, and have attracted attention in foreign countries, and to a certain extent been introduced into England.

It will be remembered that among the "terms and conditions" imposed by Dr. Green in the deed by which he transferred his library to the city, is one which provides that the books shall "be used only in the library building." This provision was extended in his will to the use of all books bought with

money left by him and placed in the department which bears his name. It has sometimes been thought that the reference library would be more useful if the books in it could be taken to the homes of users. Now, however, the restrictive provision is, I think, generally believed to be a wise one by persons who have thought much about the matter. There was more reason formerly than exists now for anxiety on the part of citizens to have the books put in circulation. In the earlier days of the library the additions of books made to the circulating department were wholly inadequate to supply reasonable demands of users. The directors knew that this was so, and bought as many books as they could with the money at their command. Now the circulating department is generously cared for, and it is very seldom that a citizen feels it a hardship not to be able to take home books belonging to the Green Library. There are two weighty reasons why those books should not be taken away from the library building,—first, it is desirable that investigators should always find them at hand for consultation; second, books which are put in circulation become dirty and mutilated. Mr. Salisbury speaks forcibly on this head in the fifth annual report of the directors. He says of the measure of allowing books in the Green Library to be taken to the homes of users, that it “would be like killing the goose that laid the golden egg. For a time the use of the books would be stimulated and increased, but when they should become defaced and worn out by use, it would require to keep the library interesting and attractive, a larger expenditure than the majority of citizens would approve, and the most liberal givers might hesitate to place valuable books in a heap of rubbish.”

The Free Public Library is mainly dependent for its support upon an annual appropriation made by the City Council from money raised by taxation. This appropriation was very small at first. It continued small for several years. The directors saw that it was very important that more money should be placed at their disposal, and persistently urged the claims of the library for liberal support. Their efforts gradually bore fruit. The city began to grow also, and a greater readiness to spend money on improvements to manifest itself. With increased expenditures in other departments of the government, the annual appropriation of the library began to grow.

The sum of money given to it the first year of its existence was \$4000. The library had, besides that amount, \$88.26, which had been collected for fines and obtained in other ways. For the last ten years (1878–79, to 1887–88), the average annual municipal appropriation has been \$11,729, and so much of the money paid for dog-licenses as is applicable to library purposes. The amount received in that way has increased from \$1931.05 in 1870, the first year in which it came to

the library, to \$4006.89 in the last library year, 1887–88. In that year the municipal appropriation was \$14,500. The dog-law may be found in the public statutes, chapter 102. Examine especially sections 84, 98 and 107. Under the provisions of that law, in all the counties of the State, except Suffolk County, the money raised in towns by payments for licenses issued to owners of dogs, after a portion has been retained by the city for general purposes, and deductions have been made to cover the depredations of dogs among sheep and other domestic animals, must be appropriated by the towns to the support, either of public libraries or of the common schools. With appropriations now enjoyed \$6500 a year can be spent for books and periodicals. For the purchase of books the library has also available, it will be remembered, the income of the Green Library fund. The income of the reading-room fund, likewise, swells its resources and gives it means of buying periodicals and papers. A considerable sum, on the average over \$500 a year, is received from the collection of fines, the sale of catalogues and other miscellaneous sources. The average yearly receipts of the library from all sources during the last ten years have been \$17,530. During the library year just closed the receipts were \$21,305.87. These were received in the following amounts from the several sources of income: municipal appropriations, \$14,500; Green Library fund, \$1772.87; reading-room fund, \$462.48; dog-licenses, \$4006.89; fines, etc., \$563.63.

At the date of its foundation the library had 11,500 volumes in its two departments. A third department, known as Intermediate, has since been established. At the date of the last annual report, December 1, 1888, the number of books in the library was 73,669, divided as follows among its three divisions: Green Library, 22,255; Intermediate Department, 17,520; Circulating Department, 33,894. The average home use of the library for the last ten years has been 128,123 volumes. The use during the last library year was 142,449 volumes.

The average annual use of books for home purposes, for reference, study and serious reading in the library building and for use on Sunday during the last ten years has been 182,009. That use during the library year just closed was 206,290. The average daily use of books on secular days last year was 665. This number does not include, of course, the immense use of magazines, reviews and papers in the reading-rooms.

During the last complete year of the existence of the library of the Worcester Lyceum and Library Association, the precursor of the Circulating Department of the Free Public Library, 9,742 volumes were given out for home use. During the eight months spoken of in the first annual report of the latter organization, 31,454 volumes, or a daily average of 153, were delivered to users for the same purpose. Thus a great increase of use followed the change of

the library from a private to a public institution in which privileges were made free. The increase is also indicated by the fact that 3,200 applicants for cards to be used in taking out books received them during the first eight months of the library's existence. If we place side by side, however, the number 31,454 and that representing the use of books in the Free Public Library last year, namely, 206,290, a great growth is shown in this respect in the twenty-nine years of the library's life. The number of books lost and not paid for during the last library year was 16. The average annual loss for the past ten years has been 12. On the average, 254 volumes have been yearly withdrawn from the library because worn-out or for other reasons during the same decade.

The library of the Free Public Library has been selected with careful reference to the actual wants of its users. The standard of works placed in its circulating department has always been high and for many years has been raised gradually every year. The aim of the officers of the library has been to give to it a certain completeness in all branches of knowledge that the citizens of Worcester take an interest in. In a community such as Worcester it has proven useful to bring together a large collection of books relating to chemical and physical science and their applications, and the library has therefore secured many valuable sets of periodicals representing progress in those fields and of the transactions and proceedings of learned scientific societies and a large number of important works on mechanical and other applications of science. It has also bought numerous sets of periodicals and individual publications relating to the fine arts and their applications to industrial pursuits. While then the library has aimed to supply existing wants, it has been led in doing this to make a specialty of procuring works of the classes just enumerated.

At the start the library used for its circulating department copies of the catalogue of the Lyceum and Library Association. In 1861 a catalogue of the circulating department of the Free Public Library was issued. A list of additions was printed in 1867. Another catalogue of all the books in the same department was issued in 1870, and a supplement to that in 1874. In 1884 the present printed catalogue was published. It contains all the books which readily circulate that belonged to the library September 1, 1883, and consists of one thousand three hundred and ninety-two pages. It is intended to print a supplement to that catalogue during the present library year (1888-89). The library issues from time to time lists of additions to all departments of the library in sheets of four pages.

The library has outgrown its present quarters, and the city has bought a lot adjoining the one which is occupied by the existing building, and will, it is anticipated, begin the current year to put up on it a new building to be used in connection with the edifice now standing.

In the Green Library room there is a fine portrait of the founder of the reference library, which was painted by direction of the city government after Dr. Green's death, by the late William H. Furniss, of Boston, and a statue of Dr. Green, in plaster, by the late B. H. Kinney, of Worcester.

The librarians of the Free Public Library have been Zephaniah Baker (from February 17, 1860, to January 14, 1871), and Samuel Swett Green (from January 15, 1871).

The Free Public Library was the first public library in New England to open its doors to visitors on Sunday. On that day the reading-rooms of the library are open from 2 to 9 P.M. No books are given out in the circulating department to be taken home. The periodicals and papers can be freely used. Books are procurable also for use within the building from either department of the library. This experiment began in 1872. It appears from the yearly reports of the librarian that the number of persons who used the reading-rooms Sundays in the year 1872-73, for one Sunday less than the whole year, and yet for fifty-two Sundays, is 5,706; for 1873-74, 7,179; and for 1874-75, 10,142. The average annual use for the last ten years is 13,867. The librarian is present for two hours on Sunday afternoon to render assistance to inquirers seeking information from books. Two attendants remain in the rooms during the hours they are open, to see that they are kept comfortable, to preserve quiet and to aid readers. Those attendants are persons who do not serve the library on secular days, but who come to it only on Sundays. In regard to the character of the reading done on Sundays, it may be stated that it is mainly of magazines and papers. Some persons, however, engage in study every Sunday. The average number of volumes given yearly to readers on Sundays during the ten years just passed is 2,211. The number given to them during the last library year is 2,417. Since Elm Park has been opened and Lake Quinsigamond has become readily accessible, while the number of readers has remained about the same as before, the proportion of serious reading has greatly increased, as mere pleasure-seekers have lately to a large extent sought recreation at those popular resorts.

**LIBRARY OF THE WORCESTER DISTRICT MEDICAL SOCIETY.**—It has been stated that books given by Dr. Elijah Dix to the County Medical Society, the immediate predecessor of the existing medical association, formed the nucleus of the library now belonging to the Worcester District Medical Society. The statement seems to be incorrect, however. Dr. Dix promised to give to the earlier society books of the value of fifty pounds. Its thanks were voted to him, a librarian was chosen, a list of books was made out and forwarded to him, and committees visited him three times to confer regarding the matter, but no books appear to have been received by the society. The Worcester District Medical Society was

founded in 1804, but does not seem to have collected many books for a considerable number of years. Dr. Thomas H. Gage, in an address to the society delivered in 1862, states that "the first movement of which any fruit now remains, which may, indeed, be considered the beginning of the library, was the appointment of Drs. Oliver Fiske and John Green, in 1813, to obtain subscriptions and solicit books from profession and from laity to found a medical library." The junior member of the committee, who had been in practice four years when appointed to serve in that position, afterwards became the founder of the Free Public Library. Dr. Gage remarks that the committee met with success in its efforts. That could not have been great, however. Dr. Leonard Wheeler states that the librarian seems to have been "merely a personified hope of books until 1822." In 1822 that officer was authorized to receive from the Massachusetts Medical Society the quota of books which it was willing to lend to this district. The loan appears to have been practically a gift, for the general society never had any intention of reclaiming the books. In 1823 the District Society passed an order for printing its by-laws and a catalogue of its library. It began at that time also to have a committee for purchasing books. Few works could have been bought, however, in those early years, for, as Dr. Wheeler remarks, the whole amount of money received by the treasurer for the four years ending in 1828 was less than ninety dollars, and out of that sum refreshments had to be procured for the members of the society and some printing paid for.

In 1825 Daniel Waldo is thanked for "his very splendid and liberal donation of books." At that time the library contained, perhaps, one hundred volumes. The first recorded enumeration of books does not appear until 1836, when the number of books in the library was stated to be one hundred and twenty-eight. Many of those, the librarian reports, were "very valuable works." He adds, however, that the volumes were but little used, and Dr. Wheeler states that "most of them would seem to have remained unmolested for years excepting by worms." In 1843 Dr. Joseph Sargent reported that the library contained over two hundred volumes and that he found it in a room over Mr. Harris' bookstore, where it was little used.

A very important event in the history of the library was now impending. In 1845 a bequest of six thousand dollars was made to the society by Daniel Waldo, the income of which was to be used in buying books for the library. In 1851 Dr. Charles W. Wilder, of Leominster, left five hundred dollars, by will, to the society. The income of that bequest and of another of one thousand dollars, made by the late Harrison Bliss, of Worcester, in 1882, for library purposes, as well as that of a small investment known as the Available Reserve Fund, is spent for the benefit of the library. The amount which the library

committee has at its disposal annually is about four hundred and fifty dollars. As the society has no rent to pay for its rooms and the other expenses of the library are very small, most of that sum is used in buying books.

In 1861 the library contained two thousand two hundred and thirty volumes. It is estimated that in 1878 it possessed about four thousand five hundred volumes, and in January, 1886, it is stated to have had five thousand eight hundred and twenty-six bound books. One hundred and eighty-two duplicate volumes were included in that number. The value of the library at the last-mentioned date was estimated as eight thousand dollars. The library is in rooms in the building of the Free Public Library. Books may be taken from it for home use by members of the Worcester District Medical Society and by other members of the Massachusetts Medical Society resident in Worcester County. Its books may be used for purposes of reference within the building of the Free Public Library by all persons who are entitled to use the reference books of that institution, subject to the discretion, however, of the librarian of the Free Public Library. The medical library is an excellent working collection of books published in the English language and has undoubtedly done much to raise the standard of medical practice in Worcester and its vicinity. It is somewhat deficient in periodical literature, although much has been done during the last ten years in supplying that deficiency. It still lacks and much needs a large collection of pamphlet literature.

The library has been carefully rearranged within a few years and a card catalogue, which is kept up to date, has been prepared. About five hundred volumes are taken home by physicians annually, and the library is consulted for purposes of reference, it is estimated, about one thousand times in a year. The present librarian is Dr. A. C. Getchell. The library is prosperous and well managed.

Most of the information used in preparing the sketch of the District Medical Library was found in a manuscript address by Dr. Leonard Wheeler, delivered in May, 1878, and now owned by the library. An earlier address by Dr. Thomas H. Gage, delivered, as stated above, in 1862, has also been consulted to advantage. That address, in manuscript likewise, belongs to the library of the District Medical Society.

**LIBRARY OF THE WORCESTER COUNTY MECHANICS ASSOCIATION.**—The first public meeting which took into consideration the subject of the formation of the Worcester County Mechanics Association was held November 27, 1841. A constitution for the new organization was adopted December 11th of the same year, and on the 5th of February, 1842, its first board of officers was elected. July 2d, of the latter year, a committee was appointed "to confer with the trustees as to the expediency of establishing a library, and also to report some plan to the association

for effecting that object." That committee reported the 20th of the following December. The report was accepted, and it was voted "That the association do adopt the report and circular made by the Committee on the Library, and that the sum of two hundred dollars be expended in the purchase of books for the commencement of a library for the association, and that a committee of three be chosen to be associated with the committee of the trustees on the library and to carry into effect the suggestions contained in the report." February 7th, in the following year, a further sum of one hundred dollars was appropriated for the benefit of the library, and seven days later, the 14th of the month, a room and book-cases were provided for its use. April 13, 1847, it was reported that the library contained six hundred and seventy volumes. At the present time, January, 1889, it possesses more than nine thousand volumes. Most of these have been bought; a few hundred, however, have been presented to the society for its library.

The library has been selected with the purposes of supplying popular needs and a variety of tastes, and has a large collection of scientific books and of works relating to the applications of science to the industrial and particularly the mechanic arts.

A reading-room was established in 1864. That is supplied with many reviews, magazines, scientific and other papers.

The library and reading-room can be used only by members of the Mechanics Association and their families. Both are extensively used. They are maintained by an annual appropriation by the trustees of the association. The amount of that the present year is \$1500.

This sketch embodies information furnished from the records and reports of the Mechanics Association by its treasurer, William A. Smith, Esq.

**LIBRARY OF THE WORCESTER COUNTY LAW LIBRARY ASSOCIATION.**—The association organized June 21, 1842, under the provisions contained in Chapter 94 of the Massachusetts Statutes of 1842. For a history of the laws which have been made by the Commonwealth respecting law library associations, further references may be made to the General Statutes of 1860, Chapter 33, and to the Public Statutes of 1882, Chapter 40. See also the Statutes for 1882, Chapter 246, and those for 1885, Chapter 345.

Before the establishment of the present library there appears to have been somewhere in Worcester a meagre collection of law books, which the court and bar were at liberty to consult. Little is known, however, regarding the earlier library.

The existing collection is one of the best working law libraries in the country. The books in it are nearly all recent purchases, and they have been carefully selected with reference to the actual needs of occupants of the bench and members of the bar. The library contains complete sets of all the reports

of the United States Courts and of the courts in the different States and Territories of the country and in England and Ireland, and a very full collection of books which treat of English and American law in all its branches. It is also rich in English and American periodical law literature. Additions are continually made to the library. It has been of great advantage to the institution, that for thirty years it has been zealously cared for by Hon. Thomas L. Nelson, who is now the judge of the United States Court for the district of Massachusetts. It is well known that for twenty years Judge Nelson has been almost alone instrumental in securing means for building up the library and in selecting books to be added to it.

Fees paid by clerks of courts into the county treasury up to the amount of two thousand dollars are payable to the treasurer of the Worcester County Law Library Association. To this source of income must be added fees received by the county treasurer from clerks of courts, which have been collected by the latter, in the processes of naturalizing foreign-born men, and occasional special grants from the county commissioners. That board is allowed by law to make such grants, in its discretion, to the Law Library Association from moneys in the treasury of the county. The cost of the services of an assistant librarian and minor running expenses of the library amount to about six hundred dollars annually. The remainder of the income, which is a somewhat variable amount, but always a handsome sum of money, is available for the purchase of books. The library has received one gift which deserves mention. It consisted of eight hundred volumes, which were given to it by the will of the late Charles D. Bowman, Esquire, of Oxford, in 1858. There are now more than eleven thousand volumes in the library. When an addition was made to the South Court-House, in 1878, a large room was provided in it for the use of the library. That room is now occupied by it. The library is open the secular days of the week between the hours of 9 A.M. and 1 P.M. and from 2 to 5 P.M. Every inhabitant of the county is entitled to use the books of the Law Library, subject to such regulations as may be prescribed by the association which manages it, with the approval of the Supreme Court. The present librarian is T. S. Johnson, Esquire.

Several portraits of eminent, past and present, members of the Worcester County bar adorn the library room. Of those which have been given to the association and accepted by it, the portraits of the following judges, all deceased, hang in that room: Pliny Merrick, Benjamin F. Thomas, Charles Allen, Dwight Foster, the first two and the last having occupied seats on the bench of the Supreme Judicial Court, and the third having been chief justice of the Superior Court. Beside these portraits are others of the late Peter C. Bacon, and of United States Senator George F. Hoar. In the library room there is also a photograph from a portrait of Charles Devens, one of

the judges of the *Suprême Judicial Court*. Portraits of Levi Lincoln, Attorney-General of the United States under Thomas Jefferson, and of his son, Governor Levi Lincoln, and of Governor Emory Washburn have been placed on the walls of the court-room in the stone court-house, and a portrait of Ira M. Barton, formerly a judge of Probate, hangs in the Probate Court-room, in the same building. These belong to the Law Library Association.

The information contained in the foregoing sketch has been obtained from William T. Harlow, Esquire, clerk of the Worcester County Law Library Association, and from another officer of the society.

**LIBRARY OF THE WORCESTER COUNTY HORTICULTURAL SOCIETY.**—The Horticultural Society began to collect a library in the year 1844, four years after its formation and two years after it became a chartered organization. The library is in the building of the society, 18 Front Street, which was dedicated in the autumn of 1852, and is called Horticultural Hall. Before it was moved to that place, in 1861 or 1862, it had for many years been kept in the office of Mr. Clarendon Harris. The library began in a humble way under the fostering care of Doctor John Green, the first president of the society, Frederick W. Paine, Isaac Davis, Samuel F. Haven, William Lincoln, Anthony Chase, Samuel H. Colton, Clarendon Harris and others, and has grown gradually to its present size of about two thousand bound volumes. It also contains six hundred pamphlets and unbound periodicals.

The works in the library treat of horticulture in all its branches. It also contains two hundred volumes relating to agriculture. While the library owns many books of historical interest, its strength lies in works on horticulture and agriculture which have been published during the last forty years. It has a good collection of sets of English, French and American periodicals that belong to the department of horticulture. The library has been carefully selected with reference to the wants of its users. Books may be taken to their homes by members of the society. About three hundred volumes are taken out yearly. Probably twice as many are consulted in the library room every year.

Although, strictly speaking, none but members can use the books of the Horticultural Society, it should be added that the library is administered in the spirit of general helpfulness and that information can really be obtained from it by all persons who need it. The large room which it occupies is used as a reading-room, and that is supplied with the current numbers of leading horticultural magazines and papers of England and America. The library is inferior to that of the Massachusetts Horticultural Society in Boston, but is still one of the best collections of its kind in the country. An annual appropriation of three hundred dollars is made by the Horticultural Society for the maintenance and growth of the li-

brary and for providing periodicals for the reading-room.

The late Judge Francis H. Dewey recently left to the society a fund of one thousand dollars, the income of which is to be used for buying books for the library. The librarians of the society have been Anthony Chase, 1844 to 1851; Clarendon Harris, 1851 to 1862; Edward W. Lincoln, 1862 to 1871; George E. Francis, 1871; Edward W. Lincoln, 1872 to 1874; William T. Harlow, 1874; John C. Newton, 1875 to 1879; Charles E. Brooks, 1879, present incumbent.

The information embodied in this sketch has been obtained from Mr. Brooks, the librarian, and Mr. Edward W. Lincoln, the secretary and enthusiastic friend of the Horticultural Society.

**LIBRARY OF THE WORCESTER COUNTY MUSICAL ASSOCIATION.**—The association was formed in 1858, but did not begin to collect a library until five years later. Before 1863 it hired such musical works as it had occasion to use from publishers and others. It now has a very valuable musical library. It possesses more than sixteen thousand volumes of oratorios, cantatas and other large choral works, which have been brought out by the association at its concerts and festivals. It has scores and orchestra parts for about twenty such musical compositions. Besides the larger works it owns nearly five thousand copies of chorus selections from various authors, in sheets. The collection of the Worcester County Musical Association stands in New England next to that of the Handel and Haydn Society of Boston in the size and value of its library of choral works, and probably exceeds greatly in those respects every other musical library of a similar kind in this section of the country. Mr. George W. Elkins is the present librarian and has held that position for many years.

**LIBRARY OF THE WORCESTER CHORAL UNION.**—The Worcester Mozart and the Worcester Beethoven Societies united November 16, 1866, under the name of the Worcester Mozart and Beethoven Choral Union, and the new organization was incorporated, with the name of the Worcester Choral Union, March 31, 1871. The act of incorporation was accepted in the following year, and officers were chosen September 9, 1872. The present librarian is Mr. G. Arthur Smith. The library consists of three thousand one hundred and fifty-four volumes and pieces of music. No additions have been made to it for several years, and at the present time (February, 1889) it is packed in boxes and stored in the basement of one of the churches of Worcester.

The facts given in the last two sketches were furnished to me respectively by Mr. A. C. Monroe, secretary of the Worcester County Musical Association, and Mr. G. Arthur Smith, the present librarian of the Worcester Choral Union.

**LIBRARY OF THE WORCESTER SOCIETY OF ANTIQUITY.**—The Society of Antiquity was formed in 1875. It began to collect a library two years later.

That became at once available for the use of members of the society, but it was not opened to the public at stated hours, according to the plan observed to-day, until 1883. The library possesses six thousand one hundred and seventeen volumes, and seventeen thousand three hundred and forty-two pamphlets. A considerable portion of it consists of town histories, genealogies, and works treating of other subjects of especial interest to persons making investigations of the kind which members of such an organization as the Society of Antiquity would wish to engage in. The library grows almost wholly by gifts. The largest and most valuable of those which it has received is the library of the late Rev. George Allen. That was bought with money raised by subscription, by Hon. George F. Hoar, and presented to the society. The largest sums of money were subscribed by the late Mr. David Whitcomb, and by Mr. George Sumner. Mr. Allen's library numbered twenty-three hundred volumes and a like number of pamphlets. Besides containing books of other kinds, it "has been pronounced by competent authority to be one of the best representative collections of the New England theology of the olden time ever brought together" in this vicinity. This gift was received in the spring of 1884. Early in the following year Mrs. Charlotte Downes, of Washington, D. C., presented to the society the library of her late husband, Mr. John Downes. Both Mr. and Mrs. Downes had, at an earlier period, been residents of Worcester. The "Downes collection," as it is called, comprises four hundred and seventy-nine volumes, fifty-eight pamphlets, besides a noteworthy accumulation of six hundred and thirty-one almanacs, broadsides, papers, manuscripts, etc., which had been brought together by its former owner during the passage of a long life. It contains copies of twelve different editions of the "New England Primer," among them a copy of the original work issued in 1779, and a number of publications of Isaiah Thomas for children and other persons. The Society of Antiquity needs a fund, the income of which may be expended in the care and management of the library, and in buying books for it. The books now in the library are largely used. They are roughly classified as they appear on the shelves, but the library has not, as yet, either a printed or a manuscript catalogue. Members of the Society of Antiquity are provided with keys to the door which opens into the library rooms, and people generally can use the books at certain hours in the week, which can be found out by reference to the City Directory.

This sketch embodies information obtained from the printed Proceedings of the Society of Antiquity and from Mr. Franklin P. Rice, an influential member of that society.

**LIBRARIES OF COLLEGES, SCHOOLS, &C.**—In the library of the *College of the Holy Cross* there are about 15,000 volumes. These, writes the librarian, are

"arranged, for the present, in three principal rooms: the Theological, the Historical and the Academic; with a fourth apartment for miscellanies." He adds that as the library "is mainly intended for the use of the Faculty," and is made up of works which were bought with regard to the needs of the college and of several collections of books which have been bequeathed to it by Catholic clergymen, "theological and literary works" predominate in it. The library possesses an interesting black-letter Bible, in Latin, dated 1487, works by a group of the *literati* of the period of the Renaissance, copies of early editions of some of the English classics and other noteworthy volumes. While the students in the college have access to the general library "by means of their professors," they have special libraries to use, that are owned by societies to which they belong.

The library of the *Worcester Polytechnic Institute* contains 1,560 bound volumes and 1,200 pamphlets; that of the *State Normal School, Worcester*, 7,105 volumes (2,396 reference-books and 4,709 text-books); that of the *Worcester High School*, fully 2,000 volumes, exclusive of the text-books belonging to the city of Worcester; that of the *Worcester Academy*, 500 carefully-selected volumes; and that of the *Highland Military Academy*, 1,000 volumes. Other public and private schools also have small libraries. In the rooms of the *Superintendent of Public Schools* there is an interesting and somewhat extensive collection of text-books and of works which treat of schools and education.

**LIBRARIES OF HOSPITALS, &C.**—In the *Worcester Lunatic Hospital*, a State institution, there is a patients' library of about 1,900 volumes; 200 or 300 volumes are added to it yearly. These are bought with the income of money left to the hospital by Miss Abigail Wheeler and Miss Sarah C. Lewis. The bequest of the former amounted to \$4,600, that of the latter to \$1,300. The library is divided among different classes of books in about the following proportions: Fiction, 42 per cent.; Travels, 7 per cent.; History, 12 per cent.; Biography, 11 per cent.; Science, 2 per cent.; Poetry, 4 per cent.; Religious works, 2 per cent.; bound magazines, 20 per cent. The hospital has a medical library of about 300 volumes.

The *Worcester Insane Asylum*, also a State institution, is not provided adequately with books, having only about two hundred volumes in all for the use of physicians and patients. The trustees have no fund in their charge, the income of which may be spent in the purchase of books, but they have lately voted a small appropriation to be used in founding a library for patients. The superintendent is allowed to buy medical books in the exercise of his discretion, and the hospital is gradually acquiring a working library of books relating to the specialty of insanity.

The *City Hospital* has a medical library of about two hundred volumes and a collection of plates. It

has the income of the Curtis fund, one thousand dollars, and of the Sargent fund, five hundred dollars, to use in making additions to this library.

The patients' library consists of about two hundred bound volumes of miscellaneous contents, and has thus far relied in its accumulation upon the voluntary contributions of friends. The hospital has the nucleus of a library for nurses. At present this contains only about a dozen volumes and some pamphlets, but the superintendent expresses the hope that it may soon be increased. It is intended that this library shall be made up very largely of works which treat of nursing and the care of the sick.

The *Worcester County Homœopathic Medical Society* has a library of about one thousand volumes.

OTHER LIBRARIES.—The *Worcester Natural History Society* has a little library of three hundred and ninety bound volumes and about a hundred unbound volumes and pamphlets. The library which it uses at the camp in summer is additional to the one in its rooms, and consists at present of one hundred and fifteen volumes. A reading-room, supplied with magazines, is open to members of the society.

The library of the *Chamberlain District Farmers' Club* is usually included in a list of Worcester libraries. It consists only, however, of about fifty volumes of agricultural reports, reports from agricultural colleges and experiment stations, and United States consular reports.

There are a few libraries in Worcester, intended for grown-up persons, which are connected with Protestant religious societies in the place. The most important of these, perhaps, is the *Bangs Library* of the old Second Parish. This library was founded by Edward D. Bangs, who will be remembered as having been for several years Secretary of State in this Commonwealth. Mr. Bangs was a member of the Second Parish, and at his death left to the society the "sum of four hundred dollars, as a perpetual fund for a parish library, the income of which is to be applied to the purchase of useful books, particularly such as may be adapted to the religious and moral improvement of the young." The late Stephen Salisbury, also a member of the society, left to the Second Parish the sum of fifteen hundred dollars, the income of which is used in buying books for the Bangs Library. The library consists at present of 1020 volumes.

The *Library of the Jail and House of Correction* contains five hundred volumes. It is made up of stories, histories, biographies, religious works and a selection of books made with especial reference to the wants of Roman Catholic prisoners.

There is a collection of books in the rooms of the city clerk at the City Hall, which, as well as other libraries in different offices in that building, is valuable for municipal purposes. It is unnecessary to state that there are Sunday-school libraries belonging to different churches in Worcester. Mr. Jonas G.

Clark has given a somewhat large collection of books to the university which he has founded in Worcester. Very little is known, as yet, regarding the library, which still remains in Mr. Clark's possession. It is certain, however, that it contains many valuable works and numerous specimens of choice binding.

This chapter is devoted to giving a history and description of public libraries. It may not be improper to state here, however, that in the library of the late John B. Gough, the temperance orator, now in the possession of his widow, there is, perhaps, the best collection of the illustrations of the late George Cruikshank to be found in the world. Mr. Gough always hailed from Worcester when traveling and had his letters directed to him here, although his late residence, now occupied by his widow, is in the adjoining town of Boylston.

Among the libraries belonging to Catholic institutions there are, besides the library of the College of the Holy Cross, which has been described already, the "Sodality Library" in the Catholic Institute which belongs to St. John's Parish and consists of twelve hundred volumes, miscellaneous in character, which are used principally by members of the Sodality and of St. John's Guild, but which others who wish to do so may read; the library in the school-house on Vernon Street, which is called the Sunday-school library, and which is also owned by St. John's Parish. This consists of two thousand volumes on various subjects, but selected with reference to drawing out and developing moral qualities in the young, and is used mainly by attendants at Sunday-school, although free to other who may wish to use it; a library of one hundred and fifty reference and other books in the rooms occupied by the school of the highest grade in the same school-house; the Sodality library in the Convent of Mercy, on High Street, which consists of nine hundred and fifty volumes of histories, biographies, devotional works, tales, etc., for the use chiefly of grown-up persons; the library of St. Anne's Church, which contains five hundred volumes of a miscellaneous character and that of the Young Ladies' Society connected with the Church of the Sacred Heart, which consists at present of three hundred volumes.

## CHAPTER CLXXXIII.

### WORCESTER—(Continued.)

#### EDUCATIONAL HISTORY.

BY EDWARD B. GLASGOW, A.M.

#### I.—PUBLIC SCHOOLS.

It appears from the ancient records of Worcester that an ineffectual effort "to provide a writing master

to instruct the youth" was made at a town-meeting held in December, 1725. Worcester was then, as it might be said, but just established; for though some lands had been granted in this vicinity as early as 1657, various accidents, including the two wars of "King Philip" and Queen Anne, had prevented any permanent settlement until 1713.

The persons who had failed to obtain the writing-master in 1725 were not dispirited thereby; for a few months later, at a town-meeting, it was voted that the selectmen provide a sufficient school. Nevertheless, the end was not yet accomplished. In December, 1726, the question being raised again at a town-meeting, it was decided not to have a school. The great question would not, however, settle itself in so easy a manner. It arose once more in May, 1727, and a committee was named to provide a schoolmaster for one year. This would seem a substantial settling of the matter; and in January, 1728, as we find it recorded, the town granted sixteen pounds, ten shillings to pay the schoolmaster, but it also then authorized the assessment of other moneys to meet a penalty. The committee of May, 1727, had not attended to its duty, and no school had been set up; but the men of Worcester, hard-headed and positive, after the fashion both of Puritan and Saxon, were not thus to be trifled with. Certain citizens made complaint, and the town was "presented" by the Grand Jury for not providing a school. In consequence, the inhabitants of Worcester had to pay the charges of the legal process, viz., two pounds, eight shillings, six pence. This drastic remedy for neglect seems to have worked a cure; for thereafter the records, by direct or indirect mention, show that a school or schools were habitually maintained.

By the year 1731, there being then one hundred householders, as it is believed, it would seem that the needs of the town in respect to schools had much increased. Not only a schoolmaster was provided, but it was voted that a number of "school dames, not exceeding five," should be employed for the benefit of the small children in the remote parts of the town. This was the beginning of a custom, not then nor for many years afterward legalized, of employing women as teachers. It was supposed that a schoolmaster could be a man only, and that the term, as found in the laws, had no inclusive meaning as regards the feminine side of humanity. But common sense and the general convenience at last wrought a change in the interpretation of the law. The early schools of course were migratory, going here or there as circumstances might permit, having no fixed place and no exclusive building. The town seems to have thought itself rich enough in 1733 to build a school-house, and provision was made for a very modest structure, "twenty-four feet long, sixteen feet wide," to be placed near the centre. The committee in charge of this matter moved with such slowness, that full five years passed before the building was raised;

and, meanwhile, the formerly effective remedy of presentment by the grand jury was again tried, but for a somewhat different reason. In 1736 the town was presented for not maintaining a grammar school, and in 1738 the prosecution was still continuing. We do not learn how many pounds, shillings and pence the neglect cost the town this time, but apparently the honest tax-payers were much stirred up, for they voted May 15th of the last-named year that a school-house be erected "as soon as may be," at a place indicated on John Chandler's land. This little democracy had, however, like all democracies the world over, the custom of often changing its mind; accordingly, a month later, it was voted that the school-house be built at another spot, viz.: between the court-house and the bridge below the fulling-mill. Here, at last, at a point east of the old court-house, in what is now Main Street, the much-desired school-house was erected.

With the advance of the town in material prosperity, the desire to improve the schools went along apace. The sums appropriated seem of course petty to us, who are accustomed to the lavish expenditure of these days. In 1745 the sum allowed seems to have been one hundred and ten pounds, which, in purchasing power of the necessities of life—for the luxuries had not yet reached the colonies—might be said to equal five times that sum at the present day. In a community of one hundred and fifty households such a sum, *i. e.*, £550, or \$2750 would not now be thought a mean appropriation for public education. In this year also a somewhat complete scheme of operation for all the schools was reported by a committee, consisting of Jonas Rice, Daniel Heywood, Benjamin Flagg and Ephraim Curtis, whose plan was of such public-spirited sort as to warrant the giving here of their names. Their proposition was that the families living in the outskirts should have the use of their own school money as paid by them, and that the families in the centre should make up, by subscription or in some other way, a sum which, with their share of the tax, should be sufficient to maintain a grammar school (what we now call a High School) in the centre. It was proposed also that the families remote from the centre might send any of their children to the grammar school without paying therefor, and the outlying families were divided into rows, quarters or skirts, as they were indifferently called. No action in the way of approval was taken upon this report. It was doubtless too liberal in its scope to meet the favor of men who, in order to live at all, must live with a degree of economy that closely approaches penury. Yet it had an effect, for we find the town two years later voting to allow the quarters that shall keep schools their proportionate share of the tax, and two years later yet, in 1749, a committee, raised for the purpose, reported several localities in the outskirts where school-houses might be suitably built.

Thus things went on in the new settlement with

slow but manifest improvement. We may imagine the situation, if we will. In a valley not far from a mile wide, and on a ridge of land lying parallel therewith, was scattered the new and straggling town. It was as nearly as may be a homogeneous community, there being little intermixture of other strains with the original English type. As early, indeed, as 1718, some families of Scotch-Irish Presbyterians had come to settle in the new town—a class of people whose characteristics were not unlike those of the previous settlers, though their traditions and point of view were distinctly different. It would seem that these two sets of people should have readily assimilated; and indeed, after a few of the more strenuous Presbyterian families had moved away to New Hampshire, being provoked thereto by the destruction, under cover of night, of their partly-built meeting-house, the remainder grew together with the rest of the settlers, and were among the most useful of the citizens. With the exception of this admixture, the town of Worcester was as purely English as any in old England, and so continued well into the present century. That it was a community deeply religious is true; it but it was a religion not of the Puritan type, however harsh was its exterior. To be industrious, orderly, decently religious, with education enough, seems to have been their notion of a good life, as different from our modern freedom as from the too close-fitting habits of the Puritan days. The forest that topped the hills was primitive, the intervalles were virgin to the plough, the world was far away, whether of fashion or governmental authority. Labor and thoughts of peace made up the daily round, except as occasionally some straying Indian, begging for a bit of food, led to a recital of the dangerous times of old. So the village throve, its peaceful annals unbroken by any greater disturbance than the petty differences of the town-meeting.

When the summer of 1755 came on, the minister, the Rev. Thaddeus Maccarty, bethought him, as usual no doubt, to go to the Commencement at Harvard College. This annual pilgrimage, as to a Mecca, every good minister, especially if a son of Harvard, made as a matter of course. Beside his errand of pious reverence to the shrine of culture, the reverend minister had another commission of particular moment. The grammar school at Worcester needed a teacher, and Mr. Maccarty was given authority to find a suitable person. Among the graduates of that summer was one, who seems to have attracted the approving notice of the Worcester clergyman, for he forthwith engaged him for the post. This youth of twenty was no other than John Adams, afterward President of the United States, and the first of a family distinguished for essential greatness. What Mr. Maccarty thought of the young man whom he had employed, and whom he had frequent opportunities afterward to observe, would be interesting to know; what young John Adams thought of the Reverend Mac-

carty, as well as of several of his chief parishioners, may be read at length in the diary and letters that form part of the second volume of his works, edited by his grandson, Charles Francis Adams. It is not amiss to delay in the course of our sketch, in order to speak briefly of these things. Mr. Adams says of himself that he was "somewhat remarked as a respondent" at the Commencement, and that he was not twenty years of age when he set out for Worcester to be a Latin master. He was sent by the selectmen to board with Major Nathaniel Greene, in whose house he found a book on moral philosophy. He soon learned that the principles of deism had made some progress in this vicinity, and was gratified thereat, for he himself had grown in a liberal soil. However dull the town may have been, he seems to have found men to his taste among the inhabitants. Major Greene told him—in a prosy way—that the matters of the divinity and resurrection of Jesus Christ are very mysterious. Doubtless, Adams was too polite to do more than yield assent to his elder, but he entered in his diary that "mystery is a cover for absurdity." At Major Chandler's they talked of religious things also, and seemed to be agreed that liberal thoughts and good men are the world's need. When he took tea with the eminent lawyer, Attorney-General James Putnam, the talk turned again on such things, and Mr. Putnam remarked that the early Christians seemed to him enthusiasts,—an opinion upon which the diarist makes no comment. The occupation of teacher, no doubt, drew upon the spirits of the future great man. Writing to his friend Cranch in Boston, he speaks of the dreadful solemnity of the pedagogue on his throne, of the cringing multitude before him, and declares himself glad when he can escape from the scene to smoke his pipe in quiet. The trade was not to his mind, and it is no surprise to find that he shortly began the study of the law with Mr. Putnam. It appears that he continued to be the schoolmaster for three years, when, having been admitted to the practice of the law, he removed from Worcester to Boston.

During several years following the mastership of John Adams things pertaining to schools in Worcester went on, as we may suppose, in a somewhat humdrum fashion. There was a committee for the Centre, and another for the quarters, and what was necessary got itself done in some way. In November, 1759, the inhabitants of Baggachoage (Packachoag) petitioned for the privilege of hiring a schoolmaster, to be approved by the selectmen, so that they might have school kept all the year. It does not appear whether the petitioners proposed to tax themselves an additional sum for this purpose. If they did, so reasonable a request could hardly be negatived. It is, however, not unlikely that the town was fearful of allowing what might be a precedent for all the other quarters, and preferred to snub the over-topping Baggachoage people. At all

events the proposition did not meet favor. The time was approaching, however, when private enterprise was to come to the assistance of the public in matters of education. Such a period is inevitable as a community grows prosperous. Certain of the more conspicuous citizens, men of cultivation, according to the standard of the day, desiring, no doubt, better advantages for their families, as well as the common good, asked and received, in the year 1763, permission to erect a school-house on the town land where the selectmen might approve. Among the petitioners were James Putnam, referred to above, and the distinguished Judge John Chandler. A building was accordingly set up on a part of the land held for ministerial uses, eastward from Main Street, and not far southerly from what is now Foster Street. It was a modest building, having but two rooms in its single story. It is difficult to think that, as a specimen of educational architecture, it was any great improvement on the little school-house between the court-house and the bridge. Such as it was, it was, doubtless, sufficient, and by the judicious control which its proprietors exercised, the confidence of the townspeople was gained. We find the evidence of that in the following record :

1769, March 17th. A Com. on Schools report: That they have proposed to the proprietors of the Grammar school that the town allow said proprietors £16 the current year, said proprietors engaging that the said Grammar school shall be free for all persons in said town desirous of learning the languages (who shall) be admitted by said proprietors to have the same privileges and upon the same terms in said school, as the children of said proprietors, which proposals the said proprietors have accepted—and your committee are of opinion that the method of keeping English school in said town (should be) each part of the town draw the money they pay toward the whole sum raised the current year, and each have their proportion of the interest money belonging to said school—to be kept in the several parts of the town in such season of the year as shall be agreed on by the major part of said quarter. Your committee have divided the town into eight parts :

Centre of the town.	Stone's Quarter.
Tatnick.	Stowell's Quarter.
Smith's Quarter.	Capt. Curtis' Quarter.
Bagachoage.	Capt. Flaggs' Quarter.

This report was favorably received, and the division into parts or quarters was thereafter followed as proposed. The system thus inaugurated was the same, substantially, as was urged twenty-four years before, by the committee of Jonas Rice and others. From the terms used, we may infer that a Grammar School meant then the same as we now understand by High School. The "grammar" was that of Latin and Greek, referred to as "the languages," and the English, or non-language-teaching schools, were distinctly set off from the Grammar School. This was, of course, the popular and ordinary use of the terms. The words "high school" were probably not then used, except in a pleasant derision; and they are not found in the laws of the Commonwealth, in their present meaning, until a very recent time. Common usage has given them a special and accepted significance; and the term "grammar school" has been

degraded to its present use, and made to mean the same as English school in the records just quoted.

The troublous times of the War of the Revolution being now not far distant, the signs of coming disturbance were only too apparent to reflective minds.

Life, however, went on with that calmness, which is so marked a characteristic of English-speaking communities. The farmer ploughed, the artisan wrought, the trader continued his trading. Town-meetings, often of a peppery sort, were held as usual, and in none of them was the care of the schools slighted. Moneys were appropriated, committees named; the Grammar School and the rest were matters of concern; while all men talked of war and feared the worst. The customary annual appropriation for schools was, as it had been for a generation, about £100.

The student of the faded books of Town Records remarks, however, that in 1778 the sum of £200 was set apart for this purpose.

Before he has found himself a reason for this sudden doubling of the amount, he is surprised to observe that in the next year £600 are appropriated. In 1780 the amount increases, without comment, to £3000, and in 1781 the munificent sum of £4000 is appropriated. This extreme lavishness in a country village is inexplicable, until we remember that these sums were payable in the swiftly depreciating Continental money. The appropriation, thus expanded forty times in volume with the years of war-time, suddenly becomes again, in 1782, a plain £100.

Peace was at hand; the Continental money, instead of appreciating, had become entirely worthless, and presumably the £100 were made up of hard money that had been hidden away in stockings and corners by the thrifty villagers.

It is probable, nevertheless, that no little disorganization crept into the schools during these years of uncertainty and the critical times that followed. The town was presented once more by the grand jury, in 1785, for not maintaining a Grammar School. The semi-public Grammar School, erected on town land in 1763, was doubtless in operation; but some unreasonable tax-payers would insist on the town giving them Latin and Greek in its own schools.

To meet the wishes of these complainants, or, more strictly speaking, to save the town further trouble, it was decided that the committee should agree with the proprietors of the Grammar School now keeping; bargain with them, in fact, to instruct all who might come at the town's charge. No mention of further presentment of the town occurs; and we may infer that, henceforth, Worcester had always a public school at which any aspiring youth might fit himself for Harvard College, according to the requirements then made. These may be found in "The Laws, Liberties and Orders of Harvard College" as follows:

"When any scholar is able to read Tully, or such like Latin author, *extempore*, and make and speak true Latin in verse or prose, *suo, ut aiunt, Marte*, and decline perfectly the paradigms of nouns and verbs in the Greek tongue, then he may be admitted into the College; nor shall he claim admission before such qualification."

The constant desire for proper means of education led to the building, some years before the close of the last century, of another and more pretentious school-house. That before referred to as owned by an association of proprietors was of too small capacity, and, indeed, had now been put to other uses than it was meant for. A new undertaking was engaged in, not unlike the former. Elijah Dix, Joseph Allen, Levi Lincoln, John Green, Palmer Goulding and other citizens, having formed a stock company, erected a building, which contemporary writers describe with much appearance of pride. It stood on the west side of Main Street, at a point some two hundred feet north of what is now the head of Central Street, and on the spot covered by the Chadwick Building. The structure had two large rooms below, one for a grammar and the other for an English school; while above was one large hall, intended for occasions of display and exhibition. In the great hall there was a fire-place at each end, and on the roof was placed a cupola and bell. This building, smaller than thirty that Worcester has to-day, became the boasted "centre school-house." In 1801 the proprietors sold it to the inhabitants of the Centre District, by whom it was used for more than forty years.

During the first quarter of our century the affairs of the schools went on somewhat listlessly, yet with apparent increase of usefulness. The moneys appropriated grew from thirteen hundred dollars in 1803 to twenty-five hundred dollars in 1824, but there was evidently need of the intelligent control of a special or expert committee. Such committees as were from time to time raised were in earnest, but their sphere was limited and their advice held cheap. Thus the committees frequently advised that the grammar-school should be no longer a "moving" school, but fixed; but so practical a suggestion was long disregarded, and the peripatetic policy seems to have been followed until 1810 or later. In fact, the administration of the schools was a part only of the general management of town affairs. The selectmen, or such special committee as might be named, directed all things. Under this system the schools were likely to and did receive the same attention as any other town matter required by the general laws. Some thoughtful persons must have seen the need of expert control of the schools, and must have often reflected that the democracy of the town-meeting were not likely to permit any interference with the domain of their selectmen. If A, B, C or X could order the matters of the town roads, the town pound, or the town pump, why could he not also direct the schools? To this

question silence was the easiest answer. A community usually escapes from a period of mediocrity by some seeming accident that puts the right persons in authority. So it happened in Worcester, and the occasion which led directly to a most important advance, arose at a school-meeting of the Centre District, held in 1823. A committee was constituted to report in general what the schools required. The membership of this committee was of an order much beyond the common. There were Samuel M. Burnside, a lawyer of distinction; Rev. Aaron Bancroft, a learned minister, father of the historian; Levi Lincoln, also a lawyer and a man marked for greatness; Otis Corbet and Samuel Jennison. These gentlemen were able to agree on a report of important character and to secure its adoption by the people of the district. The essence of their report lay in the third recommendation as follows:

In the third place, Your Committee recommend, that a board of twelve overseers be chosen annually by ballot, whose duty it shall be, in conjunction with the Selectmen, to determine upon the qualifications of instructors and to contract with them for their services; to determine upon the attainments of scholars to be admitted into said schools respectively; to prescribe the course of instruction therein, and all necessary rules and regulations for the government thereof; to determine upon all complaints of instructors, of parents or of scholars, which may arise in relation to said schools, or either of them; to visit and examine said schools respectively, at stated periods during the year; to encourage, in every suitable manner, both instructors and scholars in the performance of their relative duties; and to make a report in writing annually to the District, of the condition of said Schools during the period of their office.

The recommendations of this committee, being once put into effect, made the schools and their management by overseers almost a co-ordinate branch of the government with all the other affairs of the town as ordered by the selectmen. Samuel M. Burnside, chairman of this committee, being sent a few years later to the General Court, laid before that body a scheme for the control of schools similar to this, embodying it in a general law. The Legislature passed the bill, and thus was established that *imperium in imperio*, which the school system of the Commonwealth is to-day.

The limits set for this sketch will not permit any detailed statement of the operations of the schools. The eminent men who constituted the committee of 1823 became forthwith, with one exception, members of the Board of Overseers. That abounding interest in the public weal which had inspired their recommendations equally animated them in the application of the system. From year to year their names appear in connection with school affairs, but more particularly those of Aaron Bancroft and Samuel M. Burnside. In 1825 the good minister, desirous no doubt of a little innocent pageantry, which should at once arouse the youth and please the eye of the elders, proposed that there should be an annual address before the assembled schools, each with its teacher at its head. It was to occur at the end of the scholastic year, was to be in some church, was to be on the importance of education, and should be followed by

prayer. The proposition was acceptable to the overseers, and the first of a long series of addresses was made by Mr. Bancroft himself. The address in the following year was by Mr. Burnside. This agreeable mode of ending the year's work continued for some ten years, during which time several of the most eminent citizens of Worcester did duty as orators of the day. In the number were the Rev. Alonzo Hill, Isaac Davis, Alfred D. Foster, John S. C. Abbott, Stephen Salisbury, Ira M. Barton and William Lincoln. A custom so innocent and profitable might well have been continued indefinitely, but it is probable that the increasing number of pupils made it inconvenient to assemble them in one place. At all events, the annual address seems to have been last given in 1836, at which time there were said to be twelve hundred pupils in the schools. The sum expended for school uses in that year was about five thousand dollars, and the number of teachers was thirty.

The Centre School-house, in due time, was found too small for the uses required of it. It was decided, therefore, to erect a separate building for the grammar or Latin department. Accordingly a brick school-house, the first one in town, was built in 1832 on Thomas Street, at the corner of Summer Street. This was, specifically, the "Latin school for boys," the girls yet receiving their higher tuition, which did not in general include the languages, in the Centre School-house.

The pupils of the Latin school who yet remain have very tender recollections of Charles Thurber, who was the principal during several years ending in 1840. He was a true teacher of the type of fifty years ago, severe, exacting, learned, yet withal lovable. Elbridge Smith, a later principal, was also a revered teacher, and remained with the Latin school until, and after, it was merged with the coming High School.

It was a very important step in the history of the Worcester schools when, in 1844, it was decided at a town-meeting to establish a "High School," in the modern sense, sufficient for the needs of one hundred and seventy-five pupils, and intended for the use of the whole town. Many persons had doubted the expediency of affording to girls the same advantages of a classical education as were given to boys. That doubt was laid aside by this time, and a building was projected on a liberal scale, to be styled the "Classical and English High School," and used for both sexes. Twelve thousand dollars were appropriated for the purpose, and a suitable structure was raised at the west corner of Walnut and Maple Streets. It was a brick building, with a basement for general uses, and two stories above, with three large rooms on each floor. Those on the first floor served for the English High School, those above for the classical department. This school met the wants of the growing city for almost a generation; but in the years of unusual prosperity that followed the War of the Rebellion it

was found too small. The building was, therefore, moved, as it stood, across Walnut Street to the north side, where it yet remains in use as a grammar school. Many of the most cherished recollections of the men and women now of ripe age in the city are tied up with this old building. Elbridge Smith, coming from the Thomas Street Latin School, was the first principal. Of those who served as principals or assistants, mention may be made of several who afterward became distinguished. Such are Nelson Wheeler, later a professor of Greek in Brown University; George P. Fisher, now professor in Yale University; James M. Whiton, eminent as a Greek scholar, and Daniel H. Chamberlain, Governor of South Carolina in the troublous times of reconstruction.

In 1848 the town of Worcester, leaving its village life, became a chartered city. There were then fifty-two teachers, something less than three thousand scholars, and the annual expenditure was about fifteen thousand dollars. All the powers and duties of the several school districts and their overseers now passed into the control of a School Committee, of which the mayor is, *ex-officio*, the head.

The present High School building was dedicated to public use in the year 1871. The need of greater accommodation having long been apparent, it had been suggested that the old building be taken for other uses and a suitable structure erected. After some years of delay the matter was approved by the School Committee, and their report, accompanied by a petition signed by more than a thousand citizens, was laid before the City Council. This body, by its committee on education, forthwith entered on the duty of erecting a building which, it was hoped, would answer the public needs for many years. The old building, as has been said, was removed, and the new one put on the same lot, but a few feet farther west. The city was then passing through an era of great prosperity, and the views of the committee in charge of the work were of a liberal order. It is not to be doubted that the comprehensive mind of the then mayor, James B. Blake, largely shaped the plans that were adopted. By a happy fortune the preparing of a design was entrusted to Mr. H. H. Richardson, who, though then but little known, was soon to achieve fame as America's great architect. He was the junior of Gambrell & Richardson, architects, of New York. In this early work the breadth of treatment and leaning toward the classic, so characteristic of Richardson's later productions, are easily observable. To relieve the expansive front he proposed a square clock-tower, which, rising to nearly twice the height of the main building, should end in a very graceful and slow-tapering spire. Four smaller spires, set on the corners of the chief structure, gave correspondence to the whole work. The material being brick, various colors were introduced, and to some extent a whitish sandstone, that harmonized well with the rest. This striking design

was accepted, and the work committed to builders, the Norcross Brothers, who have since carried to completion many of the most remarkable works of this gifted man. The designer and the builder, the mind and the head, thus fitly came together. The building has three floors, on the upper of which is a large hall used for assembling, for general purposes, all the pupils. There are, beside this, nineteen lofty and well-lighted recitation or lecture-rooms, with proper accommodation for five hundred scholars. At the present writing the number in attendance is much beyond that, and it is plain that before many months other arrangements will need to be made. The original division into a classical and an English department is observed, and the course of study is such that a graduate is quite competent to make unlimited advance thereafter in the way of self-culture without recourse to any college. The modern languages receive special attention both as literatures and colloquially, and the instruction in physics, the general sciences and mathematics, is justly regarded as very good. From the classical department the pupils go with honor to a dozen different colleges. The present principal, Alfred S. Roe, an alumnus of Wesleyan University, has had charge of the school during eight years, and has the aid of an able corps of teachers. They are twenty-two in number,—nine men and thirteen women,—sixteen being graduates of college, and all of some collegiate training.

The interest of the people in the High School is well indicated by the many gifts which liberal citizens have made from time to time for the purpose of adding to its efficiency or beauty. At the opening of the old High School building, in 1844, Stephen Salisbury purchased, for the use of the pupils, a set of philosophical apparatus that was very complete for the time. In 1859 Alexander H. Bullock, afterward Governor of the Commonwealth, established a fund for the purpose of giving medals annually to proficient students. This fund was later, by consent of the donor, changed to a fund for the benefit of the library and the purchase of apparatus. When the present building was dedicated other free-minded citizens gave a clock for the tower, a bell, bronze fountains and works of art. Of late years, too, the custom has become established for retiring classes to put on the walls, or in the lobbies of the building, some portrait or bust of famous men, of the ancient or modern days.

Many other noble gifts have been added, and a fine memorial tablet placed on the walls, testifying to the service of the High School boys in the armies of our country.

The present situation of the schools may be briefly described. The city owns over forty buildings, used exclusively for school-keeping, ranging from the elaborate High School to the humblest suburban school-house. These are valued, stating it roundly, at one million dollars. More than three hundred

teachers are employed, and the total enrollment of pupils is over fourteen thousand. The expenditure for school purposes last year was two hundred and forty thousand dollars, being about one-fifth of all the taxes paid in the city. These figures are drawn from the annual report of 1887.

The care of the schools is vested, as before said, in the mayor and a committee of twenty-four persons. Each ward of the city has three members in the committee, the term of office being three years. One member is chosen by ballot at the annual election, in each ward, and thus no more than a third of the committee are new to the work at any one time.

Certain standing sub-committees are named by the mayor in January of each year. These consist of five or six persons each, and have certain special matters left to them. Thus, there are at present five standing committees,—i.e., on school-houses, on books and apparatus, on teachers, on appointments and on finance.

There are also minor committees of visitation, named by the committee on appointments, whose duties are specially to visit and oversee the doings of the school to which they are assigned. Thus, in theory, at least, every school has frequent visits by its special committeeman, and is also open to the calls of any and all members of the committee. Both the minor and the standing committees report their doings and recommendations to the full committee, at a stated monthly meeting.

It would appear readily, from the foregoing, that the citizens chosen to these honorable and responsible duties are in daily close touch with the schools. But it is a truism that in these busy and material days few citizens are found able, even if willing, to give their time freely to the public concerns. It is therefore fortunate that the Commonwealth has provided a medium between the School Committees and the pupils, in the person and office of a superintendent of schools. The appointment of such an agent, being first authorized by law in 1854, has become habitual in all the larger towns of the State. Three men, before the present incumbent, have held that office in Worcester, viz.: Rev. George Bushnell, in 1858; Rev. J. D. E. Jones, during seven years up to 1865; and Col. B. P. Chenoweth, during two and a half years following the late war.

The present superintendent, Albert P. Marble, Ph.D., entered upon duty in October, 1868. He is a graduate of Colby University, and is, at present, president of the National Educational Association. During the twenty years of his service the cares of the office have more than doubled with the increase of the school population.

There was a time, fresh in our memory, when the duty of a committeeman, after the teacher had been engaged and sent to his work, was to attend at intervals, look important and ask a few hard questions. Everything else took care of itself.

To-day the superintendent of schools in Worcester is the chief of a great bureau of administration. He is a director of hundreds and thousands who unite in work as he orders.

Far from being able frequently to visit one teacher after another, and supervise his or her particular mode of teaching, he must sit in the centre, and see that the great business goes on in all its departments. The danger is, that a "machine" will be created, and individuality of teacher and pupil be everywhere impaired. Such a result is especially to be feared where, as here, the schools being of necessity graded, the pupils go from one to another by stated examinations. A distinct effort to avoid this evil, and to promote originality rather than system, has been a characteristic of the present superintendence of the Worcester schools. Among the means to this end have been the frequent assembling of teachers in conference, the urging upon them of private culture and the finding for pupils subjects of study or reading supplementary to the usual books, and designed to enliven their mental frame. In the matter of examination for promotion, while there is a formal exercise of that nature in the schools, both teacher and pupil are aware that the final test is the judgment of the teacher, based on daily notice of the pupil during the term past. Thus the much-complained-of strain of examination day, and the weeks before, is to a large degree avoided. Thus, too, the schools become a field of training for the many, and the average scholar, apt to be slow, is not made to suffer that the few brightest may shine forth.

A most useful adjunct to the public schools is found in the State Normal School. This is one of several schools established in different parts of the Commonwealth, in order to teach the teachers the art of teaching. It is doubtless true in this art, as in that of poetry, that the greatest is born, not made. Nevertheless, as it is possible to teach the elements of the poetic art, so it must be to show the moderately well-equipped scholar what it is to teach, though nature may not have given him the grand secret for himself. The State Board of Education, by a resolve (of the General Court), which went into effect in June, 1871, were authorized and required to establish a Normal School in the city of Worcester; and the trustees of the Worcester Lunatic Hospital were authorized and required to convey, for this purpose, a tract of land of not more than five acres, to be located by the Governor and Council, within certain limits. An appropriation of sixty thousand dollars was made, upon condition that the city of Worcester should pay the Board of Education, for the purposes named in the resolve, the sum of fifteen thousand dollars. This condition was promptly complied with. The tract was located by the Governor and Council September 2, 1871, and a few days later the conveyance was made by the trustees of the hospital to the Board of Education and its successors, in trust, as directed.

The Normal School was opened to pupils in September, 1874, the present principal, E. Harlow Russell, then assuming charge. The tract of land taken was a part of what had been called Hospital Grove, on a hill of considerable height, and with ledges of rock cropping out here and there. The stone for the building was quarried on the spot, and a massive and sufficiently imposing structure prepared. From any part of the grove one looks down on the bee-hive of Worcester, where, within a stone's throw, every kind of industry, in wood or iron, is pursued, and from the top of the building an extensive view may be had, ranging over several neighboring towns. The inner arrangements of the building are of a specially convenient and liberal sort, being devised by the principal, according to comfort and good sense.

The Board of Education, in 1880, declared the object of the school as follows:

The design of the Normal School is strictly professional, that is, to prepare in the best possible manner the pupils for the work of organizing, governing and teaching the public schools of the Commonwealth. To this end there must be the most thorough knowledge, first, of the branches of learning required to be taught in the schools; second, of the best methods of teaching these branches; and third, of right mental training. The time of one course extends through a period of two years, of the other through a period of four years, and is divided into terms of twenty weeks each, with daily sessions of not less than five days each week.

The studies of the two years' course are such as properly to fit the ordinary scholar for usefulness in the lower grades of the public schools, and a diploma to that effect is awarded. The four years' course being much more comprehensive, the student is required to take up Latin and French, with the privilege of German and Greek. During both courses very special attention is given to the science of education and the art of teaching, and the graduate goes forth a well-fitted teacher for any school whatever. The required age for admission, in young men, is seventeen years; in young women, sixteen years. If the applicant proposes to teach in the Massachusetts schools, his tuition and all text-books are free; otherwise there is an annual fee of thirty dollars. The principal is assisted by seven accomplished teachers, and the number of pupils in the last year was almost two hundred. Since the opening of the school there have been three hundred and forty-five graduates. A feature of the Normal School, which attaches it closely to the city public schools, is the apprenticeship system, so called. This is described in the annual catalogue, as follows:

The student, after three terms, or a year and a half in the Normal School, is allowed to go into one of the public schools of the city of Worcester to serve as assistant to the teacher of that school; to take part in the instruction, management and general work of teaching under the direction of the teacher; and even to act as substitute for the teacher for an hour, a half-day or a day, at the discretion of the latter and with the approval of the superintendent. One student only at a time is assigned to any one teacher; but each student serves in at least three grades of schools in the course of his term of service, the duration of which is six months or half a school year. After finishing his apprenticeship the student resumes his course at the Normal School, spending another half year there before receiving his diploma.

Regarding this system, it is not, of course, claimed that it is new. On the contrary, it is drawn from the experience of European countries. In its application here it has fully met expectation, and receives the constant approval of the School Committee. It should be said that the apprenticeship is voluntary—but those who look forward conscientiously to teaching are glad usually of the opportunity to see what they can do.

The anniversary of the Normal School, with its accompanying address, is one of the most interesting occasions that the round year offers to Worcester residents. Among those who have made formal addresses have been William T. Harris, LL.D., Rev. Thomas Hill, D.D., Mrs. Julia Ward Howe, President G. Stanley Hall, now of Clark University; Charles Dudley Warner, Professor E. S. Morse, of Salem, and John Fiske, of Cambridge. Thus is the graduate, as he takes leave of the still home of delightful study, cheered on his road to culture by the persuasions of ripe minds and bright wits.

## II. INCORPORATED INSTITUTIONS.

**COLLEGE OF THE HOLY CROSS.**—The inspiration to the founding of this institution came from the Right Reverend Benedict Joseph Fenwick, second bishop of Boston. It had long been a wish cherished by him to establish within his domain an institution for higher secular culture. The opportunity seemed to be at hand when, in 1842, the Rev. James Fitton, who had built a seminary for young men on the slope of Packachoag Hill, in Worcester, offered to give what he had there, with sixty acres of land, to the bishop. The site and the offer were altogether such as were desirable, and steps were at once taken towards the carrying out of the great project. The Fathers of the Society of Jesus, being asked to assume charge of the enterprise, did so in the autumn of 1843. Rev. Thomas F. Mulledy was appointed president, and temporary occupation was made of the old seminary and other small buildings, pending the erection (which was at once begun) of an imposing structure of brick and granite. With few students, and amid much financial distress, the work was urged forward. In 1846 the founder, Bishop Fenwick, dying, his body was brought and laid in the small cemetery, almost within the shadow of the college. In 1849, a class being almost ready to graduate, it was thought well that a charter of incorporation be asked from the State, so that the customary degrees might be granted. The application was refused when laid before the General Court, but another expedient presented itself. The young men being certified as worthy of a degree, in whatever department, the Georgetown College, in the District of Columbia, granted them the corresponding degrees, and so continued to do for many years.

In the year 1852 the college met with a misfortune which came near ending its career, the buildings

being almost entirely destroyed by an accidental fire. The loss was said to be fifty thousand dollars, with no insurance. Not enough remained of the buildings even to shelter the students, so that one hundred of them were billeted in various friendly houses in the city on the night following the fire. This calamity led to a temporary suspension of the college, and many feared a permanent abandonment of the enterprise; but such was not the mind of its faithful friends. They came promptly to the rescue, money was contributed, new buildings begun, and in October of the year following Holy Cross was again ready to receive its students. During the fourteen months that had passed since the fire the students had scattered into many other institutions, and the number that returned was small. The opening was really a beginning, as if on a new foundation. The college, however, thrived and grew, though slowly, and began to gain, as an institution, the favorable regard of many who were not Catholics. Among these was the great Governor, John A. Andrew. He visited the college in 1862, and attended the annual Commencement of the year following. It would appear that he was much impressed with the value of the training given, for he personally suggested to the faculty the wisdom of again applying for a charter of incorporation. The Legislature of 1865, when a charter was asked for, was found to be of different mind from that of 1849, and the much-desired instrument was obtained without opposition. It gives the faculty power to confer all such degrees as are usually conferred by colleges in the Commonwealth, except medical degrees.

The present situation of things at Holy Cross may be briefly described. One vast brick building, three hundred and twenty feet long, contains the lecture and recitation rooms, the library, chapel, dormitories for two hundred students, and the necessary apartments for the president and faculty. The president, Samuel Cahill, S.J., is assisted by a corps of twenty professors and instructors. The schedule of studies is in accord with that usually approved by the Society of Jesus, the course being ordinarily completed in seven years. The student is made familiar with the best Latin and Greek authors, while, side by side with these studies, goes a course in mathematics, extending to the highest branches. The modern languages receive special attention, as well as history in its manifold relations. In the last year of a student's stay he is especially trained in rational philosophy and the natural sciences. It is obvious that the product of study, as here pursued, is an exact and careful scholar, of high general culture. As might be naturally supposed, a considerable share of the graduates turn towards the priesthood, yet far the larger part are found to engage in the secular professions and in the varied employments of the day, whereby wealth and station may be secured.

**THE WORCESTER POLYTECHNIC INSTITUTE.**—This

institution originated in a fund of one hundred thousand dollars, given by John Boynton, of Templeton, in Worcester County. His purpose was to found a school, free to all residents of the county, wherein young men might learn, in addition to the ordinary subjects of study, some or all of the useful mechanic arts. The project commended itself to other men of philanthropic mind, and especially to the Hon. Stephen Salisbury and the Hon. Ichabod Washburn, both of whom added large sums to the original gift. The citizens of Worcester united also in a liberal subscription, so that, at length, the endowment amounted to nearly a half-million dollars. The institution was incorporated in 1865, and the work of preparation so pushed on that in November, 1868, the doors were thrown open to students. The charter gave the name of the institution as "The Worcester County Free Institute of Industrial Science;" but this somewhat cumbersome title, however expressive of the founder's intention, was changed in 1887, by special act of the Legislature, to that given above. Two theories were entertained as to the proper scope of the school. Should it be chiefly a school of the manual arts, adding thereto some knowledge of the scientific side of industrial processes? Should it, on the other hand, be a school of science, adding, however, a sufficient manual knowledge to enable the student intelligently to direct or engage in industrial processes? Probably most persons expected the former theory to be adopted, and looked forward to the production of a class of skilled workmen, but the second view prevailed with the governing body of the institute, and remains to-day the policy of the school.

Charles O. Thompson, a graduate of Dartmouth College, and a specialist in chemistry, returning from an examination of the best European polytechnic schools, was placed at the head of the faculty. He proposed a three years' course of study, afterward extended to four years, with a standard of scholarship higher than most young men who at first came for instruction could attain. The proportion of graduates was therefore small during several years, and some persons doubted if the aims of the principal were not unreasonable. Fortunately his views prevailed, though the future of the Institute was for several years a matter of grave doubt. As the grade of scholarship required became known, more capable students presented themselves, and the weaker stayed away; so that at length the high ideal was met, and the graduates began to be everywhere allowed the first rank among men of scientific ability. Professor Thompson retired from the post of principal in order to assume the organization of a similar institute at Terre Haute, Indiana, from which post he was soon unhappily removed by death. He was succeeded by the present principal, Homer T. Fuller, Ph.D., who assumed duty in 1883. The institute has now fifteen professors and instructors, and one hundred and fifty students. The buildings, used exclusively for in-

struction and practice, are four in number. Boynton Hall contains the offices of administration, the chapel, lecture, recitation and drawing-rooms. In the Washburn machine-shop, work is practically done in wood and iron, certain machines of which the institute has the control being sold to all parts of America. The Salisbury Laboratory, a new building, contains the mechanical, chemical and physical laboratories, and the lecture-rooms connected therewith. This building is a gift to the institute by Stephen Salisbury, who has also devoted to public uses a considerable piece of land, the Institute Park. In a fourth building is the magnetic observatory, with special appliances for isolation and accuracy. The established course of study is mainly scientific, with competent instruction in the modern languages. Those students who purpose to become mechanical engineers are taught practically the art of construction, being required to devote a specified part of their time to practice in the machine-shop.

Schools like the Polytechnic Institute are obviously a result of the material development of our country. The world is over-grown with wealth, and all the wealth only stimulates to the discovery of new ways of adding to the accumulation. Mines must be opened, ores reduced by new methods, the secrets of chemistry laid open, bridges built where our fathers would have deemed it impossible, mountains burrowed, and canals constructed that the navies of continents may pass by short-cuts from one ocean to another. That all this may be best done, requires just the kind of man that may be found in the institute graduates. "Studies," said my Lord Bacon, "serve for delight, for ornament and for ability." At the institute, it may be said that they serve for ability. The careless young man, whose parents want him to get a taste of cultivation, finds this school uncongenial. The ordinary levity of student life has little lodgment, and ability to do has more weight than all other considerations. The graduate goes forth a capable director in the special industry he has chosen for himself, a good chemist, engineer, constructor, a captain of industry.

THE CLARK UNIVERSITY.—Though favored much above most cities with the means of culture, Worcester is about to add to the existing institutions one of the greatest promise, not only for her own citizens, but for the country at large. Mr. Jonas G. Clark, a wealthy and liberal-minded man, announced two years ago his intention to establish a university, and to endow it to the extent, at least, of one million dollars. In response to a petition signed by him, and by Charles Devens, George F. Hoar, Stephen Salisbury, John D. Washburn, William W. Rice, Joseph Sargent, Frank P. Goulding and George Swan, a charter of incorporation was granted to the Clark University, with all the powers usually given. In May, 1887, the Board of Corporators was organized, with Jonas G. Clark, president, and John

D. Washburn, secretary. Steps were at once taken toward carrying out the project, and at this writing two very large brick buildings are almost finished, on land conveniently located in the southern part of the city. It is expected that students will be received in the autumn of 1889. Professor G. Stanley Hall, late of the Johns Hopkins University, Baltimore, has been chosen president, and is now visiting, for the purposes of observation, various universities in several countries of Europe. What final shape as regards its scheme of work the Clark University will take, has not been made known. It is, however, presumed that the first object of the corporation will be to establish what the name signifies in its highest meaning, to wit: a school of liberal culture for men who have already completed the ordinary college course, or have otherwise acquired an equivalent thereto. With that accomplished, the establishing of under-graduate courses will be easy, if considered desirable.

The Hon. Charles Devens, justice of the Supreme Judicial Court of the Commonwealth, presided on the occasion of the laying of the corner-stone of the principal building, October 22, 1887. The communication, then read, from the founder, contained these words:

Broad in its scope, liberal in its methods and comprehensive in its teachings, . . . we dedicate this University to Science, Letters, Art and human progress, in their best and most valuable forms.

The Hon. George F. Hoar, in making the chief address, spoke, in part, as follows:

A university . . . is a place where the highest instruction is to be obtained, . . . where libraries are to be found, which show the existing boundaries of human knowledge, and workmen and apparatus are found fitted and employed to extend them. These institutions have ever been among the most beneficent forces in American history. . . . The University is the natural ornament, the bright, consummate flower of democracy. It is the greatest of all levellers. . . . It is devoted to no sect or creed or statement of doctrine in which human presumption has sought to imprison the free spirit of truth, and to bar its onward pathway.

For the fulfillment of the purposes of founder and trustees, thus definitely expressed, the city waits with brightest hopes.

THE WORCESTER ACADEMY.—This school was projected, two generations ago, by persons of the Baptist faith, who desired an educational institute under their own control. After much conference, it was thought well to leave the organization with certain trustees, who in 1832 bought fifty-nine acres of land, with a building thereon, worth in all ten thousand dollars. This land lay, as then described, one-half mile south of the village; as the city now is, it was east of Main Street, and on the high land extending from Lagrange to Hammond Streets. In 1834 the institution was incorporated under the name of the "Worcester Manual Labor High School." Operations were begun then in earnest, and we learn by the catalogue of 1836 that there were in that year one hundred and thirty-five pupils in all, living in or attending the school. Isaac Davis was the

president of the trustees, a post which he held until age and infirmity forbade him. Otis Corbett was then secretary, and Ichabod Washburn treasurer. It was intended that the pupils should, by manual labor, pay a part of their living expenses; but no labor, except on the farm, was convenient, and as the prices for all things furnished were very low, the school was in continual financial straits. In 1846 the Legislature permitted the name to be changed to the "Worcester Academy," and the notion of manual labor was then abandoned. In that year there were one hundred and eighteen students, who were charged for board \$1.30 to \$1.50 per week, according as they did not, or did, use tea and coffee. The total necessary expenses of a term of eleven weeks were from \$23 to \$29. Such were the statements of the annual catalogue.

Under the new name things went on somewhat as before. In 1850 the total of pupils for the year was one hundred and seventy-six, and preparations were made for a new building of brick, one hundred feet long and four stories high. But the work only involved the academy more deeply in debt, and a proposition to change the location met with favor, more especially as it had a savor of financial gain. It was proposed to sell the lands of the academy, now appreciating in value, and buy, with the proceeds, the old Antiquarian Hall, it being then for sale. This was done in 1854, and the school was moved without delay to the new place, on the corner of Belmont and Summer Streets. The academy had thus, as said the catalogue of 1856, a sufficiently-equipped building, all paid for, and twenty-five thousand dollars beside, profitably invested.

Under the new state of things more was doubtless expected than came to pass. The pupils no longer lived in the academy, but where it suited them, in or out of town, and thus, perhaps, the *esprit de corps* was, to some extent, injured. Young women were also then admitted to the academy, a policy which, in a modified degree, is pursued to the present day. But the affairs of the school went on with reasonable efficiency until the time came for a more important change than the last. A large building and some acres of land were for sale on Providence Street. This had been (1850-53) a medical college, but afterward was used, first, for a ladies' collegiate institute, and then, during the war, for an army hospital. The trustees of Worcester Academy, having always a prudent financier in their president, bought this property in 1869 for the sum of forty thousand dollars.

The academy was forthwith moved to that spot, and there remains. The institution has never lacked benefits from its friends, although it has had times of severe pecuniary stress. To-day it is on a prosperous basis, the result of gifts made or pledged for its use, by friends in many parts of New England. Aside from the Hon. Isaac Davis, the most constant

friend and contributor to the academy's funds has been the Hon. Joseph H. Walker, now president of the trustees. The present principal, D. W. Abercrombie, A.M., a Harvard graduate, has had charge since 1883. There are now eight teachers and one hundred and thirty students, most of whom live in the buildings. The academy has two courses of instruction,—a college preparatory and a scientific, in both of which the various liberalizing studies of our modern days are carefully pursued.

Although the school is professedly under denominational control, it is contended that no limited views prevail in the management. The teachers are chosen from the graduates of several colleges, and the young men are likewise fitted for many different institutions. In view of its age and usefulness, the Academy is justly regarded with pride and interest by the citizens.

**THE WORCESTER MEDICAL INSTITUTION.**—This medical college was incorporated in 1849, chiefly through the efforts of Dr. Calvin Newton, a well-known divine and physician. In 1850 and 1851 imposing buildings (now the Worcester Academy) were raised on land given by John W. Pond, and a full course of instruction was established. The training was of the eclectic, Thompsonian or botanic order. There were fourteen graduates in 1851, and the future was bright, but difficulties arose that need not be detailed here, and the college ended its existence in a very few years.

**LADIES' COLLEGIATE INSTITUTE.**—This institution received a charter from the State in 1854. Its early status is not clear to one who investigates at this distance. It was held up as a project worthy the notice of wealthy philanthropists in February, 1855, though, doubtless, then a scheme only. The Rev. E. A. Cummings, signing himself "financial secretary," published a pamphlet detailing what was proposed, but which allows us to believe that the Collegiate Institute was not founded as yet. A later prospectus shows that the trustees had acquired the lands of the defunct medical hospital, of which possession was taken in 1856. Here was then set up a fully organized women's college, with power to grant degrees. It was, to some extent, befriended, if not directed, by persons of the Baptist faith. In 1857-58 there were in all one hundred and fifty pupils, for whom an elaborate course of study, linguistic and other, was provided. In 1860 the annual catalogue contained a cry for funds, as the income did not meet the outgo. Notwithstanding the appeal, matters did not improve with the institute, and it appears to have been closed soon after. The property entered upon a period of legal complications, from which it emerged to be bought by the trustees of the Worcester Academy, as before said.

**OREAD COLLEGIATE INSTITUTE.**—In 1848, Eli Thayer, having been before a teacher in the Manual Labor High School, established a seminary for young

ladies. The name, Oread, was fancifully adopted from Virgil's line, "*Hinc atque hinc glomerantur Oreades*" (Aen. 1, 500), and had special reference to the woody hill on which the building was placed. The institution was incorporated four years later, with power to grant degrees, and presently gained a high standing in the community. Its patronage and affiliations were mainly with the Baptist denominations, but with no purposed sectarian bias. The studies pursued were of a liberal order, with much that made for true culture. The Oread flourished for many years, and its doings were a conspicuous part of the social life of the city. After a varied history it at length fell into a stage of less prosperity, and the school has been of late discontinued. The picturesque building—a castellated structure of the olden time—still dominates from its height a good part of the city; but its lawns and groves are giving place to rows of modern brick houses.

### III.—PRIVATE SCHOOLS.

Schools, under private management, and with various degrees of excellence, have existed from time to time, during a century past.

The antiquary, delving into musty records, will learn of Thomas Payson's seminary for young ladies, in 1791, and of the school that this same person undertook in 1795, "near Dr. John Green, Jr." He will find, also, that in 1805 Mrs. Nugent had an academy for young ladies. It appears, too, that in 1828 Samuel M. Burnside, spoken of before, projected a law school, but with what success is not clear. It is probable that his prospectus, preserved among the treasures of the American Antiquarian Society, was the beginning and end of his project.

In the year 1831 Rejoice Newton, Levi Lincoln, Isaac Davis, Pliny Merrick, Thomas Kinnicutt and others—eleven in all—wishing to establish a school for young women, bought the old Chandler mansion on Main Street, nearly opposite the head of Park, where now a large business block stands. A school was opened the next year, under care of Mrs. Wells, who was succeeded by John Wright. The undertaking, however, came to an end in a very few years, and left little trace of its usefulness. But the details of any of these projects, if at hand, would not overmuch interest us.

There are, to-day, several private schools, but only one which justly calls for mention here. Caleb B. Metcalf, M.A., who had for several years been master of the Thomas Street Grammar School, left it in 1856 to establish, on Salisbury Street, a school that presently developed into the Highland Military Academy. The institution yet flourishes, with promise of long usefulness, Mr. Metcalf having of late yielded the active control to Joseph Alden Shaw, M.A., head master. The scholars received, being usually from twelve to sixteen years of age, live in the buildings and are under supervision. An established course of study prepares

them for entrance to any college or similar institution, or for a general business life. The object of the military department is to teach habits of promptness and a good carriage.

More than one thousand pupils have gone out from this institution, and they may be found in every State of the Union, exemplifying, in all lines of life, the training received at the academy.

Of the many institutions in the city not properly scholastic, but which aim at special culture in one way or another, it is not necessary to attempt detailed mention.

## CHAPTER CLXXXIV.

### WORCESTER—(*Continued.*)

#### SOCIETIES, ASSOCIATIONS AND CLUBS.

BY MR. NATHANIEL PAINE.

To give a detailed history of the many societies, literary, social and political, which have existed in Worcester would necessitate the occupying much more space than the limits of this history will admit.

In the period just before the War of the Revolution, impatience at the demands made by the British Government, and its infringement upon what men then thought were the rights of all men, caused the formation of a political society, which, though short-lived, had a marked influence upon municipal affairs which was far-reaching in its effects.

Many years after, when these rights were fully established, societies were formed for mutual protection against the ravages of fire, and for aiding each other in bringing thieves to justice. Then came societies for the literary and educational improvement of the people by the distribution of books, and by courses of lectures upon scientific subjects illustrated by suitable apparatus.

Societies and associations for philanthropic and benevolent purposes, as well as representative orders or chapters of the numerous secret societies of the county, are also established here. Churches and schools are represented by many societies, associations or clubs for special purposes in their line of work. Book clubs, athletic clubs and those especially for social purposes are also numerous.

With so large a number it is to be regretted that so few can be spoken of in detail, but it is the hope of the writer that the brief notices here presented may prove of some historical value.

THE AMERICAN POLITICAL SOCIETY, the earliest not of a religious nature, formed in Worcester, of which any record has been handed down, was organized December, 1773, by the leading Whigs for discussion and consultation upon the civil and re-

ligious affairs of the town. Its principal purpose was undoubtedly to influence and, as far as possible control the action of the loyalist party, which consisted very largely of the wealthy and influential men of the town. At a meeting held January 3, 1774, a committee, appointed at the house of Asa Ward the 27th of the previous month, reported a code of by-laws which was adopted. The committee, consisting of Nathan Baldwin, Samuel Curtis and Timothy Bigelow, in presenting the rules and regulations for the government of the society, prefaced them with the following preamble, setting forth the reasons for its formation and the objects in view: "Whereas, at this present time, the good people of this country in general (and with respect to some particular circumstances, the town of Worcester in particular) labor under many impositions and burdens grievous to be borne, which we apprehend would never have been imposed upon us if we had united and opposed the machinations of some designing persons in this Province, who are grasping at power and the property of their neighbors; for the prevention whereof, and the better securing our liberties and properties, and counteracting the designs of our enemies; we, whose names are hereunto subscribed, do by these presents incorporate ourselves into a society by the name of the American Political Society, and to meet at some public-house in Worcester, at least once in every month, to advise with each other on proper methods to be pursued by us, and each of us respecting our common rights and liberties, civil and religious; and for the regular ordering and conducting our said society in their meetings, they shall choose some one of the members of said society as a chairman," etc. The by-laws adopted indicate that it was to a certain extent a secret society, the first article reading as follows: "That no discourse or transaction in any of our meetings shall be communicated or divulged to any person or persons not belonging to our said society, by any ways or means whatever (such only excepted as are allowed to be made public by the unanimous vote of our said society), and if any person or persons shall be guilty of a breach of this article, he or they be punished with expulsion from our said society." The ninth and tenth articles, which are as follows, are in the same spirit: "9th. That every member of our said society shall have full power to dismiss himself from said society in the following manner, viz.: by informing them in any one of their meetings, in writing, that he will inviolably keep all the secrets of said society as faithfully as if he still belonged to it himself, and as they desire, but that he desires a dismission by a vote of said society, and that it may be entered on the journal of the transactions of said society that he was dismissed by his own desire. 10th. That each particular member of this our said society, reposing special trust and confidence in every other member of the society, looks upon himself as bound, and hereby binds himself by the ties of honor, virtue, truth,

sincerity and every appellation that is dear to him in this life, faithfully and truly to keep and perform for himself each and every of the articles herein mentioned and expressed to all intents and purposes."

At one of the meetings in February, 1774, the question as to the propriety of choosing any person to any office, who was not a professed friend to constitutional liberty, was discussed. April 4th there was an interesting meeting, over thirty members being present. Among the questions discussed and acted upon was that of preparing instructions to the representatives to the General Court, to be chosen the next month. It was also voted at this meeting that "this society will each one bear and pay their equal part of the fine and charges that may be laid upon Messrs. Joshua Bigelow and Timothy Bigelow, for their refusal to be empaneled upon the Grand Jury, at our next Superior Court of Assize for the county of Worcester, if they shall be chosen into that office, and that their refusal is founded upon the principle that they cannot consistently with good conscience and order serve if Peter Oliver, Esq., is present on the bench as Chief Justice or Judge of said Court, before he is lawfully tried and acquitted from the high crimes and charges for which he now stands impeached by the Honorable House of Representatives, and the major part of the Grand Jurors for the whole county join them in refusing to serve for the reasons aforesaid." Matters of town and church government were often discussed. At the meeting of May 2, 1774, the matter of Rev. Mr. Maccarty's salary was debated, as to whether an additional sum of twenty pounds, which had been allowed him, should be taken off for the year. June 10th, by a unanimous vote, it was agreed "not to purchase any English goods until the port and harbor of Boston shall be opened." At a town-meeting held on the 7th of March, 1774, the fourth article of the warrant was "for the town to consider and act and vote as they may think proper, upon a petition of twenty-seven citizens of the town, that some action be taken in relation to the act of Parliament giving a privilege to the East India Company to export teas to America, subject to duty, for the purpose of raising a revenue for his Majesty." The request was referred to a committee consisting of William Young, Josiah Pierce and Timothy Bigelow (all members of the Political Society), to take it into consideration and report in two hours. The committee promptly reported a long preamble with three resolutions, the substance of which was, "that the inhabitants refuse to buy, sell or in any way to be concerned with India teas of any kind until the act imposing a duty be repealed, and also to break off all commercial intercourse with those persons, in this or any other place, who should act counter to these resolutions," etc., etc. This action of the town called forth a protest from the loyalists against accepting the report of the committee, which was rejected by the meeting. The protest was, however, entered upon the records by Clark Chandler, the

town clerk, who was a loyalist, and this action on his part occasioned much excitement. When it became known to the members of the Political Society that the obnoxious protest had really been entered on the town records they were very indignant, and at once proceeded to show that they were, and upon a petition of Joshua Bigelow and others, a town-meeting was called the 22d of August, 1774, to consider the matter. This meeting was adjourned to the 24th of the same month, at which time it was voted, "That the town clerk do, in the presence of the town, obliterate, erase or otherwise deface the said recorded protest and the names thereto subscribed, so that it may become utterly illegible and unintelligible." That this vote was most thoroughly carried out, an inspection of the town records will give ample evidence, the obliteration being so complete that it is "utterly illegible and unintelligible." In 1776 it was found that the society was having too much influence in controlling the town-meetings, which occasioned an opposition to it, and it was finally dissolved in May of that year. It had, however, been a power for good in the community, and many of its members were useful and honored officers of the town, as well as doing efficient service in the War of the Revolution.

**WORCESTER FIRE SOCIETY.**—This ancient society was organized in January, 1793, and is still in existence, observing its old rules and regulations adopted at the outset although the service for which it was founded has long since been superseded by the appliances of modern inventions for the protection of property from fire. Its founders, says the preamble to the by-laws, "influenced by a sense of social duty, formed themselves into a society for the more effectual assistance of each other, and of their townsmen, in times of danger from fire." Among the original members were Joseph Allen, John Green, Stephen Salisbury, Sr., Daniel Waldo, Jr., Abraham Lincoln, Edward Bangs and Isaiah Thomas. Neither the records nor the newspapers of the day give the reasons for its formation. Probably the immediate cause was the destruction by fire on the 4th of January, 1793, of the weaver's shop of Cornelius & Peter Stowell, situated at the corner of what is now Park and Washington Streets. The by-laws adopted are almost, word for word, like those of a "Masonick Fire Society" instituted at "Glocester (Mass.) August 18th, 1789," which were printed at the press of Isaiah Thomas & Co., at Boston, and that also may have suggested to Mr. Thomas the idea of forming a similar society in Worcester. Meetings are held quarterly at some hotel and at the annual meeting, in January, an oration and poem are usually delivered. Reminiscences of the members, from its foundation to the election of Dr. George Chandler, in 1864, have been published, which give many items of local history, and indicate the prominence of its members in town affairs. From 1795 to 1831 the office of town treasurer was held by a member of this society, and

from 1790 to 1831, one or more of the Board of Selectmen. Since then a majority of the mayors of the city have also been members. It has also furnished three Governors of the State, United States Senators and Representatives, and an Attorney-General of the United States.

The number of members is limited to thirty, thus making it a somewhat exclusive society and this fact probably induced some gentlemen, who were unable to become members, to form other societies of a like nature.

THE MUTUAL FIRE SOCIETY was formed in July, 1822, but remained in existence only a short time. The Social Fire Society, formed in 1840, was also given up after a few years. Both these societies were organized on the same plan as the older society, but they seem to have lacked the elements of success that characterized the first.

THE WORCESTER SOCIETY OF MUTUAL AID IN DETECTING THIEVES was instituted in November, 1795, and keeps up its organization, although the objects for which it was formed are now much more effectually provided for by the city and State authorities. The first meeting was held at the tavern of Captain Daniel Heywood, November 2, 1795, Benjamin Heywood being moderator, also chairman of a committee to draw up rules and regulations. These were adopted at a meeting held November 16th, with a preamble setting forth the general objects of the society, which was as follows:

WHEREAS, the practice of stealing has become so prevalent of late that it has become necessary for the well-disposed to unite in the most effectual measures for protecting their property against those hostile invasions: We, the subscribers, do therefore associate together for the purpose of more effectually recovering any property that may at any time be stolen from any member of this society, and of mutually aiding each other in bringing offenders to condign punishment, hereby engaging to comply with the following rules and regulations.

From the records it would appear that no other meeting was held till January, 1801, and that at a meeting in February of that year the name of the society was fixed upon as "The Society of Mutual Aid against Thieves,"<sup>1</sup> and the admission fee fixed at six shillings. At the meeting of January 10, 1803, an assessment of "one shilling was made on each member to keep his dollar good," the sum of nineteen dollars and forty-seven cents having been expended in pursuing the thief who had stolen Captain John Pierce's horse, etc. At this meeting the first pursuing committee was chosen, who were "to hold themselves in readiness, at the shortest notice, to pursue any thief or thieves who may have stolen any property from a member of this society." The present treasurer and clerk is George M. Woodward; there is also a board of twelve directors and a pursuing committee of the same number. Although the organization is still preserved, the meetings are not held with any regularity, and it seems to be of but little interest to the members, save for its antiquity.

<sup>1</sup> Since modified to the present name.

THE AMERICAN ANTIQUARIAN SOCIETY, although not local in its membership, has its buildings and collections at Worcester, where it was founded in 1812. The first steps for its formation were taken at a meeting held at Sykes' tavern, in Worcester, by Isaiah Thomas, Nathaniel Paine, William Paine, Levi Lincoln, Aaron Bancroft and Edward D. Bangs. These gentlemen petitioned the State Legislature for an act of incorporation under the name of the American Antiquarian Society, with "such privileges and immunities as are usually granted by acts of incorporation to other public societies established under the laws of the Commonwealth.

As one of the inducements to the granting of these privileges, "they beg leave to state that one of their number<sup>2</sup> is in possession of a valuable collection of books, obtained with great labor and expense, the value of which may be fairly estimated at about five thousand dollars, some of them more ancient than are to be found in any other part of our country, and all of which he intends to transfer to the proposed society, should their project receive the sanction and encouragement of the Legislature." The prayer of the petitioners was granted, and the act of incorporation was approved by Governor Caleb Strong, October 24, 1812. The preamble to the act of incorporation was as follows:

WHEREAS, The collection and preservation of the antiquities of our country, and of curious and valuable productions in Art and Nature, have a tendency to enlarge the sphere of human knowledge, aid the progress of science, to perpetuate the history of moral and political events and to improve and interest posterity: Therefore be it enacted, etc.

The persons named in the act were gentlemen eminent for their learning and ability, who stood high in the confidence of the public; there were, besides, the petitioners already mentioned, Levi Lincoln, Jr., Samuel M. Burnside, Francis Blake, Isaiah Thomas, Jr., of Worcester, and Harrison G. Otis, Timothy Bigelow, John T. Kirkland, Josiah Quincy, Thaddeus M. Harris and others of Boston and vicinity.

The first meeting of the corporators, called by an advertisement in the *Massachusetts Spy*, addressed to the "American Society of Antiquaries," was held at the Exchange Coffee-house, in Boston, November 19, 1812, ten gentlemen being present. At this meeting an organization was made by the choice of Isaiah Thomas as president; William D. Peck, vice-president; Thaddeus M. Harris and William Jenks, corresponding secretaries; and Samuel M. Burnside, recording secretary. Another meeting was held in February, 1813, at which by-laws were adopted, and Dr. William Paine was chosen second vice-president; Levi Lincoln, Jr., treasurer; and Timothy Bigelow of Medford, Aaron Bancroft and Edward Bangs of Worcester, George Gibbs of Boston, William Bentley of Salem, Redford Webster and Benjamin Russell of Boston, councilors. At this meeting the president, in accordance with a previous intimation,

<sup>2</sup> Isaac Thomas.

presented to the society his collection of books, "estimated at four thousand dollars, after making the usual deduction of twenty per cent. from the appraised value."

The first anniversary of the founding of the society, being also the anniversary of the discovery of America by Columbus, took place at the Exchange Coffee-house in Boston, October 23, 1813. On this occasion an oration was delivered at the "Stone Chapel" by Rev. Professor William Jenks, of Bath, Maine.<sup>1</sup>

In 1817 active measures were taken to procure funds to defray the expense of erecting a building for the library and cabinet by appointing committees to solicit subscriptions. Some difficulty was experienced in the attempt to raise the necessary money to carry out the plans for building and it was not till early in 1819 that the society were relieved from their anxiety in the matter. At that time Mr. Thomas,

ally at the Exchange Coffee-house, but occasionally at the Marlboro' Hotel, Tremont House and Concert Hall. At one of the early meetings it was voted "that as the capital of the commonwealth generally offers the best means of ascertaining the real character and standing of such persons as may be proposed for membership in this society, and as the society are desirous that the utmost circumspection should be used in the admission of members," etc. . . "that action on the nomination for membership should only take place at a meeting in the town of Boston." This vote was soon after repealed, and thereafter nominations were made through the Council and acted upon at any regular meeting.

In February, 1819, a committee, appointed to prepare an address to the members, setting forth the society's objects and conditions, declared the institution to be, in all its concerns, *national*, although it

OLD ANTIQUARIAN SOCIETY HALL.

the founder and president of the society, offered to build at his own expense a suitable edifice for the reception of its valuable collections. This offer was gratefully accepted and in August of that year a committee was appointed at the request of Mr. Thomas to superintend its erection. The building was erected on Summer Street, in Worcester, was of brick, thoroughly built, and at the time, was considered well adapted to the purposes for which it was intended. An address at the dedication was made by Isaac Goodwin, August 24, 1820, in the Second Parish Church (Rev. Dr. Bancroft's). Till 1832 the annual meetings were held in Boston, usu-

ally at the Exchange Coffee-house, but occasionally at the Marlboro' Hotel, Tremont House and Concert Hall. At one of the early meetings it was voted "that as the capital of the commonwealth generally offers the best means of ascertaining the real character and standing of such persons as may be proposed for membership in this society, and as the society are desirous that the utmost circumspection should be used in the admission of members," etc. . . "that action on the nomination for membership should only take place at a meeting in the town of Boston." This vote was soon after repealed, and thereafter nominations were made through the Council and acted upon at any regular meeting.

In February, 1819, a committee, appointed to prepare an address to the members, setting forth the society's objects and conditions, declared the institution to be, in all its concerns, *national*, although it

derived its charter and its national appellation from the Legislature of Massachusetts. They say "This local authority was resorted to from doubts having been expressed whether Congress had the power to grant a charter without the District of Columbia. Its members are selected from all parts of the Union. Its respectability is inferred from its numbers and from its comprising men of the first standing and intelligence in the nation, and some of the first distinction in other countries. The objects of this institution are commensurate with the lapse of time, and its benefits will be more and more accumulating in the progression of ages. . . . The chief objects of the inquiries and researches of this society, which cannot too soon arrest its attention, will be American Antiquities—natural, artificial and literary."

<sup>1</sup> At the fiftieth anniversary observed at Worcester in October, 1863, Dr. Jenks, then of Boston, delivered an address on the "Duties of the American Antiquary," at which time only four of the original members of the society were living.

The building on Summer Street having been found

to be too small and too damp for the proper preservation of the rapidly accumulating collections, the present hall on Main Street was built in 1853. It is favorably situated in a locality free from dampness and is believed to be substantially safe from fire, besides being much better adapted than the first to the purposes of the society. Owing, however, to the rapid increase of the library—particularly of the department devoted to newspapers—it was found insufficient in size, and more space was soon required. The Hon. Stephen Salisbury, then the president, had anticipated this need, and presented a lot of land on Highland Street, in the rear of the building, and also provided funds for the erection of the addition, which was completed in January, 1878.

affairs of the society (and which also usually treat upon some special topic of antiquarian study and research), papers from other members and discussions of subjects of interest are always in order.

The library of the society, which now numbers over eighty thousand volumes, representing most departments of literature, being especially rich in early American publications, is fully noticed in the chapter on libraries. The collection of manuscripts is large and of great value and interest, including some of a very early date. They are conveniently arranged for reference and partially catalogued so that they can now be consulted with comparatively little trouble. It is not practicable, in the brief limits of this notice, to describe with particularity any special department.

NEW ANTIQUARIAN SOCIETY HALL.

Dr. Thomas, while president, had defrayed a large portion of the society's expenditures and begun the foundation of a permanent fund for its future support. At his death, in 1831, he bequeathed to the society the rest of his books, engravings, coins, etc., as well as money to constitute the Librarian's and the Collection and Research Funds. These funds have gradually increased and others have been founded for the support of various departments of the society's work. There are now twelve different funds, amounting in the aggregate to over one hundred thousand dollars, of which twenty thousand dollars was a bequest from Hon. Stephen Salisbury.

Regular meetings of the society are held twice a year, the annual meeting for the choice of officers being held in October, in their hall, at Worcester, and the semi-annual meeting at Boston, in April, at the rooms of the American Academy of Arts and Sciences. At these meetings, besides the regular reports of the council and librarian, upon the general

Suffice it to say the society have reason to regard the manuscripts in their possession as not by any means the least valuable of their collections. There is a cabinet of Indian and archaeological specimens of great interest to the antiquary, especially those from Yucatan and Central America.

The collection of engraved portraits, political broadsides and caricatures is of interest and value, as is the cabinet of coins and medals. The walls of the society's halls are adorned with portraits of former officers and eminent men of the past. The society have published six volumes of transactions under the name of "*Archæologia Americana*," which are devoted to archaeological and historical subjects—volumes five and six being a reprint of Thomas' "*History of Printing in America*," from the edition of 1810, also containing a list of books printed in what is now the United States previous to 1776. Since 1849 the proceedings of the society at its annual and semi-annual meetings have been regularly printed, and include, besides the ordi-

nary reports of the officers, valuable antiquarian and historical papers. The president of the society elected in October, 1888, is Stephen Salisbury, (Jr.); Vice-Presidents, George Bancroft, LL.D., George F. Hoar, LL.D.; Secretary of Foreign Correspondence, J. Hammond Trumbull, LL.D.; Secretary of Domestic Correspondence, Charles Deane, LL.D.; Recording Secretary, John D. Washburn; Treasurer, Nathaniel Paine; Librarian, Edmund M. Barton. By the provisions of the by-laws adopted in October, 1831, the number of American members of the society can at no time exceed one hundred and forty, but there is no limit to the number of foreign members.

THE WASHINGTON BENEVOLENT SOCIETY OF THE COUNTY OF WORCESTER.—One of the earliest temperance organizations in the county was instituted in Worcester, March 18, 1812, William Stedman being president, and Daniel Waldo, secretary. The certificate of membership, signed by the president and secretary was inserted in a small 12mo volume entitled, "Washington's Farewell Address to the People of the United States. Published for the Worcester Washington Benevolent Society. Boston. Printed by Jos. T. Buckingham, Winter Street, 1812." The volume was embellished with a portrait of Washington. This society, while of a charitable nature, was more especially interested in the cause of temperance, and in December, 1813, issued a circular signed by Nathaniel P. Denny, Joseph Goffe, Daniel Waldo, Isaac Goodwin and Bezaleel Taft. The object of the circular was to set forth the evils arising from the distillation of grain in the State, and to suggest the propriety of petitioning Congress "to levy a tax on domestic spirits, so heavy as to afford a rational prospect of diminishing the consumption."

The annual meeting of the society was held on the anniversary of the first inauguration of Washington as President of the United States, at which time an oration was delivered. Among the members who delivered orations were S. M. Burnside and John Davis. The organization was kept up till August, 1836, when it was dissolved, and a committee recommended that the funds be transferred to the "Worcester Agricultural Society;" the record of its transactions was also presented to the same society.

THE WORCESTER AGRICULTURAL SOCIETY was incorporated in February, 1818, and organized at a meeting held March 11th, by the choice of Levi Lincoln, Sr., president; Daniel Waldo and Thomas W. Ward, vice-presidents; Theophilus Wheeler, treasurer; Levi Lincoln, Jr., corresponding secretary, and Abraham Lincoln, recording secretary.

The first Cattle Show and exhibition of manufacturers was held October 7, 1819, which appears from the records of the society to have been very successful; the secretary's estimate, however, that "about two thousand attended the services in the meeting-house," must be taken with some grains of allowance. The pens for cattle, sheep and swine to number of

sixty or more were erected on the northerly side of the Common, and the "household and the domestic manufactures were exhibited in a building kindly granted by Hon. Nathaniel Paine, and the specimens were numerous and excellent." The address (which is one of the features of the Cattle Show, retained to the present day) was delivered at the Old South Church by Levi Lincoln, Jr., who for so many years after was identified with the society. After the exercises in the church the society marched to Eager's Hotel, where a dinner was served to the members and invited guests. Another feature, which was inaugurated soon after, and which was in vogue for many years, was a grand ball in some public hall. In closing the records of the proceedings of their first exhibition, Edward D. Bangs, the secretary, says, "Thus passed a proud day for the County of Worcester. May many more such days be continued by the present and future generations." In 1852 the society purchased the land now occupied by them opposite Elm Park, and in September, 1853, held the first exhibition there, when, for the first time in the history of the society, an admission fee was charged for non-members. The present building was erected and first occupied by the society for exhibitions in September, 1854. Of late years the annual fair or Cattle Shows have been often held at the society's grounds in connection with that of the New England Agricultural Society. The officers of the society for 1888 were: J. L. Ellsworth, president; Calvin L. Hartshorn and Ledyard Bill, vice-presidents; and L. F. Herrick, secretary and treasurer.

THE FRATERNITY OF ODD-FELLOWS, a literary, not a secret society, was organized about the year 1820, as appears from a record of their proceedings at a meeting held in October, 1824, "it then being the fourth year of their oddity." At this meeting rules and regulations were adopted, which would seem to apply only to the use of a library. Among the members who were the most active and influential men of the town may be mentioned the names of Emory Washburn, John Davis, Thomas Kinnicutt, Isaac Davis, Isaac Goodwin, Stephen Salisbury, C. C. Baldwin, Henry and Gardiner Paine, James Green and William Lincoln. The fifth anniversary of the formation of the society was celebrated December 8, 1824, at which time an oration and poem were delivered by members of the fraternity. In 1827 the society celebrated the 4th of July with an oration by Thomas Kinnicutt and a poem by Richard H. Vose.<sup>1</sup> The society ceased to exist many years ago; but there is no record of the date.

THE WORCESTER LYCEUM OF NATURAL HISTORY. —From the manuscript records of this society, now in the possession of the Worcester Natural History Society, it appears that the first session was held January 1, 1825. William Lincoln, the early histo-

<sup>1</sup> In the chapter on "Libraries" will be found a more extended notice of this society.

rian of Worcester, and Christopher C. Baldwin, librarian of the American Antiquarian Society, presented a form of constitution for consideration, which was adopted. The following paragraph from the preamble sets forth the objects of the society: "That scientific knowledge and human happiness are closely and intimately connected is a principle established by all experience. For the continued improvements in the arts we are indebted to the constant advances in sciences, medicine, manufactures, and the numerous processes of industry have derived their present perfection from the investigations of the laws of nature. Botany and mineralogy have furnished to the physician his most efficient arms and his most powerful antidotes to resist the attacks of disease; they have given to the agriculturist and the artist the means of conducting their operations with success," etc.

After a page or two more of the preamble, follows the constitution itself, consisting of twelve sections and twenty-two articles. The first officers were Dr. John Green, president; Dr. B. F. Heywood, vice-president; Frederick William Paine, treasurer; William Lincoln, recording secretary; C. C. Baldwin, corresponding secretary, and Charles Wheeler, librarian and cabinet-keeper. Among the members elected at the first meeting were John M. Earle, Clarendon Harris, George Allen and Samuel Jennison, the first named being soon after appointed curator of botany. The society appears to have held meetings from time to time till November 28, 1829, at which time the record stops. As no mention is made of this society in the "History of Worcester" by its accomplished secretary, we are led to suppose that the organization was not long kept up.

THE WORCESTER LYCEUM.—In 1827 Mr. Josiah Holbrook (to whom the Massachusetts *Spy* gave the credit of establishing lyceums in this country) issued a seven-page pamphlet, entitled, "American Lyceum of Science and the Arts, composed of Associations for Mutual Instruction, and Designed for the General Diffusion of Useful and Practical Knowledge." It was printed in Worcester by Samuel H. Colton & Co., and contained articles for the government of societies or lyceums, to be formed in different towns as branches of an American Lyceum. These lyceums were designed to diffuse knowledge in all departments of science, to "procure books, apparatus for illustrating the sciences, and collections of minerals or other articles of natural or artificial production." There were also "considerations" advanced to show the usefulness and advantages of such associations. It was probably at about this time that the Worcester County Lyceum was established, although the exact date cannot be ascertained. In October of 1829, however, a meeting of this society was convened at Worcester to hear an address from Emory Washburn upon educational matters. At this meeting, presided over by John Davis, with Ira M. Barton as secretary, discussion was had upon our common-school system,

also in relation to making maps and plans of the towns in Worcester County. Mr. Holbrook was present and exhibited several maps, and stated his intention to present one to each Lyceum in the county. This meeting was attended by prominent citizens from various towns in the county, who discussed, besides the matters above referred to, the expediency of adopting measures to establish a public library for the county, and a committee was appointed to devise a plan for such a library. This committee reported at an adjourned meeting, held at Thomas' Coffee-House, December 10, 1829, but it does not appear that any decided action was taken. This may have been for the reason that in November of the same year the Worcester Lyceum was duly organized, on which occasion an introductory address was delivered by Hon. John Davis, and some forty or fifty persons signed the constitution. It seems likely that the new society was made up very largely from the Worcester members of the Worcester County Branch of the American Lyceum, and it was represented in the meetings of the last named by delegates. Of the forty or fifty gentlemen who constituted the Worcester Lyceum in 1829-30, but six are now (1888) known to be living, viz., William S. Lincoln, Henry H. Chamberlin, George M. Rice, Henry W. Miller and Joseph Pratt, of Worcester, and Dr. John S. Butler, of Hartford. The first officers of the Lyceum were Rev. Jonathan Going, president; Anthony Chase, secretary, and an executive committee, consisting of Frederick W. Paine, Moses L. Morse, William Lincoln, Ichabod Washburn and Thomas Chamberlin.

The principal object of the Lyceum was to provide a course of lectures each year; a circulating library for the use of purchasers of season tickets to the lectures was also established. During the earlier years of the Lyceum from eighteen to twenty lectures were given in each course, which extended from October to April; later, six or eight only. The original price of tickets for the course was one dollar for persons over twenty-one years of age, seventy-five cents for those between eighteen and twenty-one years, and fifty cents for those between the ages of twelve and eighteen. In the course for 1839-40 there were twenty-two lectures given, of which fourteen were by citizens of Worcester, it being understood that the latter gentlemen were to receive no compensation for their services. A debating society was also formed, classes organized for study in various branches, and chemical apparatus purchased. In 1855 the Lyceum transferred their library to the Young Men's Library Association, but still continued its course of lectures till, by an act of the Legislature, approved March 15, 1856, it was fully merged into that association.

WORCESTER COUNTY HISTORICAL SOCIETY.—This society was incorporated February 19, 1831, John Davis, Samuel Jennison, Isaac Goodwin, William Lincoln and Joseph Allen being the persons named in the act. In a circular issued by the society, the

purpose of its formation was stated to be "collecting and preserving materials for a complete and minute history of the County of Worcester, . . . to ascertain those facts that will tend to develop the origin, advancement and present state of our public institutions and social relations, the geographical limits and appearance of our territory," etc.

This circular was sent to residents in the county, and called for such facts as might be in their possession relative to the subjects of inquiry. John Davis was the first president and held the office for many years. In October, 1831, the centennial anniversary of the establishment of Worcester County was celebrated by the Historical Society, an address being delivered by John Davis. The society ceased to exist many years ago, but the exact date of its dissolution cannot now be ascertained.

THE WORCESTER COUNTY ATHENÆUM was established as a stock company in 1830, the shares being twenty-five dollars each; and rules and regulations for its government were adopted December 16th of that year. The first board of officers consisted of Rev. George Allen, president; Rev. John Nelson, vice-president; Fred. W. Paine, treasurer, and William Lincoln, secretary. The object of the society, as indicated by a subscription paper prepared for signature by those who were to become members, was to form a public library in the town of Worcester, to consist principally of such rare works in science and literature as were not usually found in private libraries. The Athenæum had a room in the second story of Dr. John Green's block on Main Street, opposite Central Street. In March, 1830, the library of the Worcester County Lyceum of Natural History was transferred to the Athenæum, and the same month the society was incorporated, and in April elected officers under the charter. After a few years the Athenæum deposited its library in the hall of the American Antiquarian Society, and ceased to be an active corporation.<sup>1</sup>

PHRENOLOGICAL SOCIETY.<sup>2</sup>—Founded in May, 1834. Dr. S. B. Woodward, of the State Lunatic Asylum, was elected president; Stephen Salisbury, vice-president; Isaiah Thomas, secretary; Dr. Wm. Paine, treasurer; and Dr. John Green, Dr. O. H. Blood and Christopher C. Baldwin, directors. Meetings were to be held monthly, and the object of the society was to investigate the science of phrenology and ascertain its nature and the foundation there may be for it in truth. One of the directors, in writing of the society, says of the first meeting for organization: "Like all new converts, we are full of fury and enthusiasm, and we may think ourselves fortunate if we escape being rank lunatics." The society probably existed but a short time, and but lit-

tle can be found of its history. The immediate cause of its formation was probably the arrival in the United States of Spurzheim, the eminent Prussian phrenologist, whose lectures in Boston and other cities attracted the attention of educated men to the science he so ably presented.

THE WORCESTER COUNTY HORTICULTURAL SOCIETY.—The first steps taken for its formation were in the fall of 1840, and on the 19th of September of the same year it was organized by the choice of Dr. John Green as president; Dr. S. B. Woodward and Stephen Salisbury, vice-presidents; Benjamin Heywood, L. Lincoln Newton and J. C. B. Davis, recording secretaries; and William Lincoln and Dr. Joseph Sargent, corresponding secretaries. In May, 1841, a constitution and by-laws, reported by William Lincoln, Stephen Salisbury and William N. Green, were adopted, and in March, 1842, the society was incorporated, and became one of the permanent institutions of Worcester. In 1850 the society purchased the lot of land on Front Street now occupied by them, and began the erection of their hall, which was completed in time to hold an exhibition there in the fall of 1851. The first exhibition of fruits, flowers and vegetables was in 1840, at the time of the annual Cattle Show, and was in the hall of the Society of Friends, on Main Street, opposite the Waldo mansion. The exhibition was considered a great success, and for many years after was given at the same time as that of the Agricultural Society. Of late years exhibitions have been given weekly, except during the winter months.

The present officers of the society are: President, Henry L. Parker; Vice-Presidents, Stephen Salisbury, George E. Francis and H. F. A. Lange; Secretary, Edward Winslow Lincoln; Treasurer and Librarian, Charles E. Brooks. There is a good library of some two thousand volumes, a notice of which will be found elsewhere.

WORCESTER COUNTY MECHANICS' ASSOCIATION.—The first meeting to consider the question of forming a society in the interests of the mechanics of Worcester was held at the town hall November 27, 1841. This meeting was presided over by Ichabod Washburn (who afterwards became the benefactor of the association), and Albert Tolman was the secretary. The objects of the association were stated to be "the moral, intellectual and social improvement of its members, the perfection of the Mechanic Arts and the pecuniary assistance of the needy." A committee of fifteen, of which Anthony Chase was chairman, was appointed to prepare and report a plan for organization, and they reported at a subsequent meeting, but were not fully agreed as to the qualifications of members. A constitution was, however, adopted, which limited active membership to those engaged in some mechanical pursuits. An organization was effected February 5, 1842, by the election of William A. Wheeler, president; Ichabod

<sup>1</sup> For notice of the library of the Athenæum see chapter on libraries.

<sup>2</sup> The information in regard to this society was obtained from the MS. diary of C. C. Baldwin.

Washburn, vice-president; Albert Tolman, secretary; and E. G. Partridge, treasurer. The formation of a library for the use of members was early begun, and courses of lectures established; for an account of the success of the first-named, reference is made to the chapter on libraries. The first lecture was given in February, 1842, by Elihu Burritt "the learned blacksmith," and in the same year a course of lectures on geology, by Dr. Charles T. Jackson, of Boston. Courses of lectures have since been given during the winter months with few exceptions, and for the last few years, owing to the great increase in the membership of the association, two courses are given each winter. In 1848 the first exhibition of fair was held, and there have been others held from time to time since. The association was incorporated in 1850, and authorized to hold \$75,000 of real estate (afterwards increased to \$200,000), and personal estate to the value of \$25,000, since increased to \$50,000.

The need of a building for the use of the association early became manifest, and in May, 1854, the offer of Ichabod Washburn to give \$10,000 towards the purchase of land and the erection of a suitable building made it possible. By the aid of other subscriptions the association were enabled to purchase the lot of land on Main Street, formerly owned by Daniel Waldo, and to begin the erection of a building, which was completed and dedicated with appropriate ceremonies in March, 1857. There are two halls in the building—the smaller one being called Washburn Hall, in honor of the first benefactor.

Mechanics' Hall, then and now the largest in the city, has a seating capacity of about 2000 and has proved to be none too large for the public demands. In 1864 over 200 liberal-minded citizens subscribed about \$9000 for the purchase of an organ, to be placed in Mechanics' Hall, and in the fall of that year the fine instrument now in the hall, made by Messrs. Hook, of Boston, was completed and appropriately dedicated. It has proved a most valuable addition, and has been largely instrumental in making successful the Musical Conventions yearly held in Worcester.

In 1864 an Apprentices' Drawing School was formed, for instruction in mechanical and architectural drawing, which is said to be the first school of a like nature established in the country.

A summer school for boys, under the auspices of the association, was opened at the Polytechnic Institute, July 12, 1887, and has fully proved its usefulness. A similar school had been conducted in the association building for some years previous. The officers for 1888-89 are Robert H. Chamberlain, president; Ellery B. Crane, vice-president; William A. Smith, clerk and treasurer.

VERY REVEREND FATHER MATHEW MUTUAL BENEVOLENT TOTAL ABSTINENCE SOCIETY was organized November 4, 1849, with Rev. M. W. Gibson

as president, and incorporated in 1863, for the purpose of promoting the cause of temperance in Worcester. The immediate cause of its formation was the visit of Father Mathew to Worcester in October, 1849, on invitation of the mayor and other prominent citizens. The officers of the society in 1888 were: Richard O'Flynn, president; William Brown, vice-president; Timothy Murphy, treasurer; and John A. Garvey, secretary.

Other temperance organizations are the St. John's Catholic Young Men's Temperance Guild, organized in 1888; Worcester Reform Club, organized in 1876; Woman's Christian Temperance Union (two societies), organized 1874-78; Worcester Temperance Club, organized in 1878; Sons of Temperance (two divisions), organized 1865-82; Worcester Temple of Honor; Slow But Sure Lodge of Good Templars; Helping-Hand Lodge; Worcester District Temple, No. 3, organized in 1885; Stjernan Lodge, No. 21, O. of T., organized in 1884; Klippan Lodge, No. 43, O. of T., organized in 1885; Worcester Central Temperance League, organized in 1887; Daughters of the North, organized in 1886; and Sons and Daughters of Temperance Mutual Relief Association of Worcester County, organized in 1887.

WORCESTER NATURAL HISTORY SOCIETY.—In August, 1852, a call was published in the *Worcester Spy* for "the young men connected with Unitarian, Second Advent, Universalist, Friends' and Free Churches and all interested, to meet at Waldo Hall, to consider the propriety of organizing a Young Men's Christian Association worthy of the name." This meeting was called to order by Rev. Edward E. Hale, then pastor of the Church of the Unity, and organized by the choice of George F. Hoar as chairman and William Mecorney as secretary. It was resolved at this meeting that the secretary take the names of those persons present who were favorably disposed to the formation of an organization for the benefit of the young men of Worcester, in which all the members should have equal rights and privileges. About fifty names were handed in to the secretary in response to this resolution. A committee was also appointed to confer with the Young Men's Christian Association, previously formed in the city, to ascertain if any change could be made to render possible a union of the associations. This committee afterwards reported, that in their opinion a union could be formed between the two associations upon some liberal principles, but that the committee of the Christian Association had not power to act in the matter, and they recommended that no further action be taken in regard to a union, but that a meeting of citizens generally be called to take measures to form a society. Pursuant to such a call, a meeting was held at Waldo Hall; William R. Hooper presiding and Henry Chapin acting as secretary, at which time a constitution and by-laws were adopted. The first clause of the constitution was as follows: "The name

of the association shall be the Young Men's Library Association, and its object the improvement of the young men of the city of Worcester, by affording them intellectual and social advantages, by the maintenance of a library, reading-room and such courses of lectures and classes as may conduce to that end." An arrangement was made by which the new association assumed the lease and took the rooms, which had been handsomely fitted up and occupied by the Young Men's Christian Association. In December, 1852, the first election of officers took place, and Francis H. Dewey was chosen president; George W. Bently, vice-president; George F. Hoar, corresponding secretary; Nathaniel Paine, recording secretary; and Henry Woodward, treasurer. Fourteen directors were also elected.

At a meeting held the 1st day of January, 1853, action was taken, which resulted in obtaining an act of incorporation from the Legislature then in session, which was accepted by the association April 16, 1853. Another election of officers was held, resulting in the choice of the same gentlemen elected in December previous, and William Cross, Esq., as second vice-president. A subscription was started during the following year for the purpose of obtaining means to found a library; subscriptions being received both in cash and books. Over thirteen hundred dollars in cash was contributed and eight hundred and sixty-seven volumes given by public-spirited citizens.

The library was opened to the public June 18, 1853, upon the payment of one dollar per year. A reading-room was early established in connection with the library, and although quite poorly supplied with newspapers and periodicals when compared with the one now open to our citizens, was quite respectable, and freely consulted by the members. In 1855 an agreement was made with the Young Men's Rhetorical Society, by which that society was merged into this; their library was placed in the rooms and they had the use of the hall for rhetorical exercises. By the conditions of this union either society could discontinue the arrangement, and the Rhetorical Society withdraw their books, provided it was done before January, 1856. In 1853, by mutual consent, the rhetorical department of the association was discontinued, and the members thereof formed a new society. In 1856, by a special act of the Legislature, the Worcester Lyceum, established in 1829, was united to the library association, and by the same act the name was changed to

**THE WORCESTER LYCEUM AND LIBRARY ASSOCIATION.**—In 1854-55 a Natural History Department was formed for the study of the natural sciences, which has now become the main work of the association. This was done at the annual meeting of the association, in April, 1854, at which a committee was appointed, who were authorized to make the necessary arrangements for the organization of such a department. Prof. Louis Agassiz was invited by the

committee to visit Worcester, and consult with them as to the best plan of operations, which invitation was accepted, and the 28th of April, 1854, he, with the committee, inspected the collection of specimens formerly owned by the Worcester Lyceum of Natural History. This collection was in the possession of the American Antiquarian Society, and they kindly gave it to the new department as the nucleus of a cabinet.

The organization of the department was effected by the election of Rev. E. E. Hale as chairman, W. E. Starr secretary, and James B. Blake treasurer. Mr. Blake held the office but a few weeks, when Henry A. Marsh was elected in his stead; eight curators of departments were also elected. In the early part of the year 1856 another important and interesting event in the history of the association occurred: that of the generous proposition of Dr. John Green (then one of our oldest and most esteemed physicians) to place his valuable miscellaneous library in the charge of the association.

Hon. George F. Hoar, then president of the association, says in his annual report, "A contract has been entered into between Dr. Green and the association, by the terms of which, the books he has placed here, with such additions as he may see fit to make, are to remain in the Library, open to the free use of members, for at least five years, and longer if the arrangement shall be desired by both parties."

In November, 1859, the sudden death of Mr. Gray, the librarian of the association, caused the calling a meeting of the directors to make arrangements to fill the vacancy. Dr. Green's large interest in the question was acknowledged and appreciated, and a committee was appointed to consult with him as to the best course to pursue. At a meeting held the 26th of November the committee of consultation, consisting of Dr. George Chandler, Albert Tolman and T. W. Higginson, reported that Dr. Green had expressed a desire to present his library to the city of Worcester as a foundation of a free public library, and they recommended that the library of the association be also transferred to the city, provided suitable appropriations and arrangements were made for its reception.

The gifts of Dr. Green and the association were accepted by the City Council in December, 1859, thus establishing an institution which has proved so advantageous to our citizens. This final disposition of the library had long been hoped for by the more active members of the association, and its consummation was the cause of great satisfaction.<sup>1</sup> The Natural History Department and the winter course of lectures were now all that was left for the attention of members. The latter, however, was given up after a few years.

In the winter of 1866 the name of the society was

<sup>1</sup> For a full notice of the library, see the chapter on libraries.

again changed to the Worcester Lyceum and Natural History Association; since which time the principal object of the association has been the study of natural history and the collection of specimens for its cabinet. In 1880 the plan of giving instruction by means of free classes for the study of natural history was inaugurated, and has been continued since with great success. During the winter season classes are formed, free to members of the association, in such branches of natural science as seem, from time to time, most important and attractive, meeting weekly as a rule, and instructed by thoroughly competent teachers. The courses include from ten to twenty lessons each, and are designed to exemplify the best methods of modern scientific study. In 1881 the plan of a three years' subscription for the "purpose of continuing and rendering more useful the work of the society, to provide a competent Custodian, to furnish lectures and gratuitous instruction for classes in Natural Science, and to promote the study of Natural History," was carried into effect, and still continues in successful operation, most of the original subscribers renewing and increasing their subscriptions when they have expired.

Since 1882 the museum has been open daily, from 9 A.M. to 5 P.M., free to all,—books, specimens and the help of the custodian are at the service of all inquirers and students. A system of loans has been devised, by which the specimens can be loaned to teachers and schools and special students, in much the same way in which books are given out at the Public Library. By an act of the Legislature, approved March 6, 1884, the name was changed to the present one, "The Worcester Natural History Society."

In the same year a tract of land of between thirty and forty acres was secured on the west shore of Lake Quinsigamond, and was called Natural History Park. In the summer of 1885 the first "Summer Camp for Boys" was established there. The object of the Natural History Society in establishing this camp is to afford a pleasant and profitable place for boys to spend a part or the whole of their summer vacation. January 22, 1887, Mr. Thomas H. Dodge gave one thousand dollars for the purchase of tents and the building of a permanent structure, known as the "Dodge Pavilion," at the Park. Mr. and Mrs. Dodge afterwards added some five hundred dollars more toward the building and painting of the pavilion.

In 1888 Mr. Joseph H. Walker gave five thousand dollars to enable the society to secure a perfect title to the land. In the same year, through the efforts of Mr. H. H. Bigelow, a workshop, well stocked with tools, was built. The lumber and tools were contributed by the lumber dealers and the hardware merchants of the city. The summer school has proved a success, and may now be considered one of the established institutions of our city. Dr. W. H.

Raymenton has been the efficient president of the society since 1880, and to his untiring and enthusiastic efforts is largely due its recent rapid development and present flourishing condition.

The YOUNG MEN'S CHRISTIAN ASSOCIATION was originally organized March 9, 1852, the first steps for its formation being taken at a meeting held at the Old South Church, February 20th of the same year. Thomas Tucker (landlord of the American Temperance House) was the first president, with Nelson Wheeler (principal of the High School), P. L. Moen and S. A. Daniels, vice-presidents; A. G. Ward, secretary, and C. M. Miles, treasurer. The association occupied a finely-furnished room in the Worcester Bank Block on Foster Street, where a reading-room was established. The formation of the Young Men's Library Association the same year, with similar objects in view, seems to have been the cause of the Christian Association giving up their active organization soon after, and their room was taken by the Library Association. In June, 1864, the Christian Association was revived, or a new association formed, at a meeting held at the Lincoln House, and it was duly organized July 12th of the same year. The first president of this new association was Fred. A. Clapp. All the officers were selected from the evangelical churches of the city, and it has since continued one of the most active institutions of Worcester. In June, 1868, the association was incorporated by a special act of the Legislature, and soon after steps were taken looking to the erection of a building. It was not till nearly twenty years after, however, that much was accomplished in this direction. In October, 1885, a determined effort was made to raise the necessary funds for the purchase of land and erection of a building, which resulted in obtaining subscriptions from citizens of all the Protestant denominations to the amount of over ninety thousand dollars, making, with a fund previously given, about ninety-six thousand dollars. Early in 1886 a building committee, of which Albert Curtis was chairman, purchased a lot of land, between Elm and Pearl Streets, and the erection of the building was begun. The corner-stone was laid with appropriate ceremonies August 27, 1886, the principal address on that occasion being given by D. L. Moody. The building was completed in 1887, and dedicated in October of that year, the dedicatory address being given by the Rev. A. J. Gordon, of Boston. The cost of the land, building, furniture and equipment has been about one hundred and fifty thousand dollars.

The object of the association is the spiritual, intellectual, social and physical welfare of young men, to be accomplished by religious meetings, classes in German, book-keeping and other branches of education, lectures, and the use of a finely-equipped gymnasium, and rooms for social gatherings.

The association has a membership of from thirteen to fourteen hundred, and after nearly a quarter of a

century of active work has proved itself one of the most valuable and successful institutions of our city. The present officers are: W. A. Denholm, president; C. F. Rugg and William Woodward, vice-presidents; George F. Brooks, recording secretary, and Arthur E. Dennis, treasurer.

**WORCESTER SOCIETY OF ANTIQUITY.**—The preliminary meeting for the formation of this society was held at the residence of Samuel E. Staples in January, 1875. A constitution was adopted and the society organized February 13th, at a meeting held at the printing office of Tyler & Seagrave. The first board of officers, elected at the meeting, were Samuel E. Staples, president; Henry D. Barber, vice-president; Daniel Seagrave, secretary; Henry F. Stedman, treasurer; and John G. Smith, librarian. The object of the society, as stated in its constitution, was "to foster in its members a love and admiration for antiquarian research and archaeological science, and to rescue from oblivion such historical matter as would otherwise be lost." Meetings are held monthly, except in the month of August, at which valuable and interesting historical or antiquarian papers are presented. The society was incorporated in February, 1877, and has become one of the prominent institutions of the city. It has a valuable miscellaneous library, which is spoken of elsewhere. Since its formation seven volumes of proceedings have been published, containing many valuable historical papers. Among the publications of special local interest contained in these volumes may be mentioned: "The Records of the Proprietors, 1667-1778;" "Town records from 1722 to 1783;" and the "Records of the Court of General Sessions of the Peace, 1731 to 1737," copied from the original manuscripts, for the preservation of which, in printed form, the society is deserving of high commendation. The officers of the society, elected in December, 1888, were: For President, E. B. Crane; Vice-Presidents, Albert Tolman and George Sumner; Secretary, W. F. Abbot; Treasurer, H. F. Stedman; Librarian, Thomas A. Dickinson.

**THE WORCESTER ART SOCIETY.**—The first steps in the formation of this society were taken at a public meeting held at the Board of Trade rooms, April 16, 1877. The meeting was called "to consider the expediency of forming an association to promote the study of art in Worcester," and a committee, consisting of Stephen C. Earle, Burton W. Potter, Henry Woodward, Nathaniel Paine and Edward L. Davis, were appointed to consider the subject, and report a plan of organization. This committee reported in October of the same year, at a meeting presided over by Lucius J. Knowles, that it was expedient to form such an association. They also presented a draft for a constitution and by-laws, which were adopted November 27, 1877, at which time the first board of officers was chosen as follows: President, George F. Hoar; Vice-Presidents, L. J.

Knowles, Edward H. Hall and C. M. Lamson; Secretary, Rebecca Jones; Treasurer, Joseph E. Davis; Directors, Charles O. Thomson, Stephen C. Earle, B. W. Potter, Mrs. P. L. Moen and Mrs. Joseph H. Walker. It was early determined that one of the best methods of effecting the objects desired was to have an exhibition of paintings, and in March, 1878, the first exhibition was opened at the Board of Trade rooms, in Taylor's Block, opposite the Common. Over seventy oil and water-color paintings were loaned by members and others interested in art, which proved to be very successful, and several other exhibitions of a similar nature have since been given including, besides paintings, etchings, photographs and bric-a-brac. Later, lectures were given by specialists in different branches of the fine arts and by members of the society. Lectures have been given since, during the winter months, most of which have been illustrated by stereopticon views, and have proved of value to those who were present. Advantage has also been taken from time to time of the valuable collections of photographs and other art illustrations at the Free Public Library, and interesting meetings have been held there. In December, 1887, the society was incorporated under the general law of the State and elected the following board of officers: President, Nathaniel Paine; Vice-Presidents, Samuel S. Green and Charles A. Chase; Treasurer, Edward B. Hamilton; Clerk, John G. Heywood; Directors, Philip L. Moen, Jonas G. Clark, Henry A. Marsh, Burton W. Potter and William T. Harlow; Advisory Committee, Austin S. Garver, Charles S. Hale, Alexander H. Vinton, Edward B. Glasgow, Mrs. Helen B. Merriman, Mrs. Charlotte E. W. Buffington, Miss Emily W. Sargent and Miss Mary N. Perley.<sup>1</sup>

**THE ART STUDENT'S CLUB** was organized in 1880, incorporated in 1887 and is composed of artists and art students of Worcester and vicinity, its object being "the encouragement, promotion and practice of Art," and no one is eligible as an active member who is not a student in some branch of art. Two public exhibitions are held each year of the works of members, which have proved to be very attractive to the citizens of Worcester and a credit to the club. The improvement in the work of members is very marked from year to year, as shown by these public exhibitions. Monthly meetings are also held, at which active members are expected to furnish for inspection at least one original drawing or design. George E. Gladwin is president, Abbie J. Trask, clerk, and Frank E. Higgins, treasurer.

**MUSICAL SOCIETIES.**—The earliest musical society in Worcester, of which any reliable record is to be

<sup>1</sup> At the annual meeting in November, 1888, the same board of officers were chosen, with the exception that Edward B. Glasgow was elected as clerk in place of John G. Heywood, who was made one of the advisory committee, and William E. Rice was elected a director in place of H. A. Marsh, resigned.

found, was the Worcester Harmonic Society. The exact date of its formation cannot now be ascertained, but it was in existence as early as 1825, at which time Emory Perry was president and Henry W. Miller, secretary; and in October, 1826, the society gave an oratorio at the Old South Church. This society also furnished the music at the Fourth of July celebration in the last-named year, on which occasion Hon. Charles Allen delivered an oration. The society continued in existence for several years, occasionally giving concerts, and often furnishing the music on public occasions.<sup>1</sup>

In 1845 the Worcester Sacred Musical Society was formed, with Rufus D. Dunbar as president, and the next year gave a miscellaneous concert in Brinley (now Grand Army) Hall, and mention is made in the newspapers of a concert given in the spring of the following year. It is probable that this society was in existence only two or three years.

In September, 1850, the Worcester Mozart Society, the first regularly-organized association for musical culture, was formed, with Putnam W. Taft as president and Albert L. Benchley, vice-president. This society continued in active existence till November, 1866, when it was united with the Beethoven Society, formed in 1864, with Austin L. Rogers, president. The name after the union was the Worcester Mozart and Beethoven Choral Union, the first president being Edward Hamilton, William Sumner, vice-president, and Carl Zerrahn, conductor. The society was incorporated in 1872, by a special act of the Legislature, as the Worcester Choral Union, and I. N. Metcalf was chosen president, J. A. Titus, vice-president, and B. D. Allen, conductor.

The present Worcester County Musical Association was organized at a meeting held in Mechanics' Hall, October 2, 1863, with Samuel E. Staples, president, and a board of directors selected from various towns in the county. The object of the association is stated in its by-laws, "the improvement of choirs in the performance of church music; the formation of an elevated musical taste, through the study of music in its highest departments; and a social, genial, harmonious reunion of all lovers of music." The name under which it was originally known was the Worcester County Musical Convention,<sup>2</sup> and this name was retained till the adoption of the present one in 1871, at which time it was also voted to call the annual gatherings Musical Festivals. Since 1865 annual sessions of the Association have been held, at which oratorios of Handel, Haydn and Mendelssohn, also the best productions of Rossini, Gounod, Verdi

and others, have been given. The annual festivals of the Association have been constantly growing more popular, and it now has a prestige and a prosperity not equaled by any similar one in the country. The number in attendance increases yearly, and its patrons are not only from Worcester County and the State of Massachusetts, but lovers of music from both the New England and Middle States. Soloists from all parts of Europe, as well as of our own country, are procured, with the best available orchestral accompaniment, and a local chorus which has won well-deserved commendation from the best musical critics. The Board of Government for 1888 was Edward L. Davis, president; William Sumner, vice-president; A. C. Monroe, secretary; J. E. Benchley, treasurer; and eight directors—B. D. Allen, C. M. Bent, Charles I. Rice, J. Q. Adams, Daniel Downey, L. M. Lovell, C. C. Stearns, of Worcester, and B. L. M. Smith, of Whitinsville.

If space would permit, it would be of interest to speak in detail of other musical societies that have existed in Worcester, but mention can be made only of the Hamilton Club, named in honor of Edward Hamilton, for many years the leading singer of Worcester; the Schumann Club, organized in 1877; the singing society Frohsinn, organized in 1858, with G. A. Patz, musical director, and Benjamin Zaeder, secretary,—William Lichtenfels is now the president and Heinrich Rayerle, secretary; the Gounod Club, organized in 1886; the president is Henry F. Harris; Secretary, Josiah A. Rice; and Musical Director, E. N. Anderson.

**HIGH SCHOOL SOCIETIES.**—The High School Association was established in May, 1886, its object being "to renew and maintain school friendships, and to contribute in all practicable ways to the good of the school." A meeting of about thirty old members of the school had been held the previous month, at which a committee, with A. S. Roe, the principal of the school, as chairman, was appointed to prepare a plan of organization, and they reported May 24, 1886, a code of by-laws, which was adopted. Samuel S. Green was chosen the first president, and the first meeting of the association after its organization took place at the High School building, the occasion being the graduation exercises of the Senior class for that year. The members consist of the pupils and teachers in the school previous to September, 1865, and all graduates and teachers since that date. The privilege was also extended to all pupils and teachers of the Boys' Latin School and the Girls' High School—two schools merged into the present High School. The association now numbers nearly eight hundred members; the president is Edward L. Davis; A. S. Roe, secretary, and J. S. Brown, treasurer.

Other High School societies, which are literary in their character, are the Eucleia Debating Society, founded in 1858, and composed of young gentlemen; the Aletheia Club, founded in 1881, and composed of

<sup>1</sup> In 1815 there was a musical society in the county called the Old Hundred Musical Society, which gave a concert at Hopkinton, Mass., that year, and it is quite probable that some of the Worcester musicians and singers were members of it.

<sup>2</sup> A successful convention under the direction of Edward Hamilton and B. F. Baker, in 1858, was held under the name of the Musical Institute.

young ladies; the Sumner Club, founded in 1883, and the Assembly, founded in 1885, the two last named having male members only. There is also an Athletic Association, made up of members of the school who are interested in athletic games and amusements.

THE CONGREGATIONAL CLUB was organized in January, 1875, its purpose being "to encourage among the members of the Congregational Churches and societies of Worcester County a more intimate acquaintance; to more concert of action, and to promote the general interests of Congregationalism." Meetings are held six times a year, at which papers are read upon some special topic and discussions follow. Occasionally the meetings are of a distinctive social nature, and are participated in by both ladies and gentlemen. Rev. A. H. Coolidge, of Leicester, is president.

THE BRIGADE CLUB, originally composed of the officers of Third Brigade (Mass.) Volunteer Militia, and officers who had served in the army or militia, was organized in December, 1879. Gen. Josiah Pickett was chosen president, and still holds that office. Gen. R. M. Chamberlain was chosen vice-president, and Capt. Charles S. Chapin secretary and treasurer. The membership of the club has changed somewhat in the past few years and is not confined to military men.

THE COMMONWEALTH CLUB, organized in 1880, and incorporated in 1881, comprises many of the active business and professional men of the city, and is social in its objects. The club have commodious and pleasant rooms on Foster Street, with a reading-room, billiard-room and other conveniences for the use of members, and it has proved successful in providing a pleasant place of resort for many of our citizens. William J. Hogg is president, H. A. Currier secretary, and L. Delavan Thayer treasurer.

THE WORCESTER CLUB, incorporated in 1888, is strictly a social club, with a membership limited to one hundred and fifty. It has purchased and fitted up in an elegant manner a fine house on Elm Street, formerly the residence of the late Hon. Isaac Davis, and offers many attractions to its members. Excellent meals, well-served, are furnished to members and friends; there is also a dining-room for ladies which has proved very popular. A reading-room, library, billiard and pool-room, and other conveniences, are provided for its members, who consist of prominent professional and mercantile gentlemen of Worcester and vicinity. Hon. George F. Hoar is the president; Charles F. Aldrich, secretary; and James P. Hamilton, treasurer.

Boat clubs, and clubs composed of lovers of other athletic sports, are numerous, but want of space will prevent detailed notices of them.

The first regularly-organized boat club in Worcester of which any record has been found is the ATLANTA CLUB, established in 1859, and commenced

boating at Curtis' Pond, near Webster Square, soon after moving to Lake Quinsigamond, where they were the pioneers of systematic boating. The members of the club also had an active part in the arrangements for the first college regatta at the lake, in the summer of 1859. This club gave up active boating in 1865, but kept up their organization for several years after.

The present QUINSIGAMOND BOAT CLUB was organized as the PHANTOM CLUB in 1860, but soon after adopted their present name. It is still an active organization, having fine grounds on the west side of the lake, where they have erected a handsome clubhouse and a commodious boat-house, in which they have a number of racing and pleasure boats.

THE LAKESIDE BOAT CLUB also occupy a fine club and boat-house on the west side of the lake.

There are other organizations for athletic sports, connected with the Worcester Academy, the Polytechnic Institute, and College of the Holy Cross. Brief mention may be made of the Book Clubs now so numerous in the city.

These clubs are formed for the circulation of books and periodicals among their members, and usually consist of from twenty to thirty ladies and gentlemen. The first organization of this kind in Worcester, and the third in the State, is the WORCESTER BOOK CLUB, established in 1839, and still flourishing. The next was the REVIEW CLUB, formed in 1847, followed soon after by the WORCESTER READING CLUB, and later by several others, among which are BOOK CLUB NO. 4, WAVERLY, RIALTO and WEBSTER SQUARE CLUBS.

MASONIC SOCIETIES.—The institution of Free Masonry was established in Worcester in the year 1793, the first lodge chartered being "The Morning Star." In the spring of that year Isaiah Thomas ("The Patriot Printer of the Revolution"), Nathaniel Paine, Nathaniel Chandler, John Stanton, Ephraim Mower, Clark Chandler, Samuel Chandler, Charles Chandler, Benjamin Andrews, Joseph Torrey, John White, Samuel Brazer, John Stowers and Samuel Flagg petitioned the Grand Lodge for a charter, which was granted under the above name April 19, 1793, and the first board of officers was installed in June of the same year. They were: Isaiah Thomas, W. M.; Nathaniel Paine, S. W.; and Samuel Chandler, J. W. On the occasion of the installation Rev. Aaron Bancroft, pastor of the Second Parish (Unitarian) in Worcester, delivered an oration, which was printed by Isaiah Thomas. The year before Thomas had printed "The Constitution of the Ancient and Honorable Fraternity of Free and Accepted Masons, &c. To which are added, The history of Masonry in the Commonwealth of Massachusetts, &c. . . . Together with a large collection of songs, epilogues, &c." The volume is dedicated "To our illustrious Brother, George Washington, the friend of Masonry, of his country, and of man." It is a well-printed volume of two hundred and eighty-eight pages quarto, with a copper-plate frontispiece. The early meetings of the

lodge were held at Mower's Tavern, which was at the corner of Main and Mechanic Streets, afterwards the site of the United States Hotel, and now that of the Walker Building. Later the meetings were held at the United States Arms (where the Exchange Hotel now is), the landlord being Colonel Reuben Sikes. Meetings of the Morning Star Lodge were held with regularity, and it was in a flourishing condition till the time of the anti-Masonic excitement in 1829-30, when it became dormant for several years, as did the Masonic organizations generally. It was reorganized in March, 1842, with the following officers: Horace Chenery, W. M.; Henry Earl, S. W.; Asa Walker, J. M.; and Pliny Holbrook, secretary. Meetings were then held in a small hall in the upper story of Dr. John Green's block, on Main Street, now owned by the Merchants' and Farmers' Mutual Fire Insurance Company. The lodge, which is now in a prosperous condition and numbering over three hundred members, has its meetings in Masonic Hall on Pearl Street.

*Montacute Lodge* was chartered June 9, 1859, its members coming largely from the older lodge. Its first Master was William A. Smith, followed in 1860 by George W. Bently. Among the early members of the Montacute Lodge were Henry Goddard, Seth P. Miller, Lyman Brooks, John Firth, H. M. Witter and John A. Dana. It now has a membership of three hundred and sixty-six, with Joseph H. Dunkerton as Master.

*Athelestan Lodge* was chartered June 13, 1866, its members being taken from the other two lodges. The first Past Master was Henry Goddard; the present Master is F. A. Harrington. This lodge has a membership of about three hundred. Among the original charter members were Samuel T. Bigelow, James L. Burbank, David Scott, A. Y. Thompson, E. P. Woodward, L. B. Nichols, John D. Washburn and Geo. W. Bently.

*Quinsigamond Lodge*, chartered September 13, 1871, has a membership of about one hundred. The present Master is Edward B. Dolliver.

*Worcester Chapter, Royal Arch Masons*, organized in June and chartered in October, 1823, had among its original members Isaiah Thomas, James Wilson, Jonathan Going, Otis Corbett, Ephraim Mower and Benjamin Chapin, the last-named being the first High Priest, serving four years. During the anti-Masonic excitement this chapter, like other organizations of the order, remained in a quiescent state, but in 1846 became again active and is now in a prosperous condition, having a membership of two hundred and thirty-four. The present presiding officer is James H. Harrison.

*Eureka Chapter, Royal Arch Masons*, was instituted in 1870 and has a membership of over three hundred. The first High Priest was Rev. T. E. St. John; the present one is Forest E. Barker.

*Hiram Council, R. & S. M.*, was chartered in Sut-

ton December 13, 1826, and it was removed to Worcester in 1858. The first presiding officer after the removal to Worcester was Geo. W. Bentley; the present presiding officer is S. L. Shaffer. This council, the largest subordinate one in the United States, has now a membership of over five hundred.

*Worcester County Commandery of Knights Templar* was organized in Holden, Mass., and chartered in June, 1825. The first Commander was James Estabrook, the present one being George B. Buckingham. In the year 1845 the headquarters of the commandery were removed to Worcester, where it has since remained and is now one of the most prosperous of its grade in the jurisdiction of Massachusetts and Rhode Island, numbering over four hundred members.

*Ancient and Acceptable Scottish Rite*.—The following grades of this rite are established in Worcester under the jurisdiction of the Supreme Council 33° Northern Masonic Jurisdiction of the United States, and are in a prosperous condition.

*Worcester Lodge of Perfection, A. and A., Scottish Rite 4° to the 14°*, was instituted September 30, 1863, and has a membership of two hundred and fifty. Its presiding officer at the present time is Geo. F. Hewitt.

*Goddard Council, Princes of Jerusalem, A. and A., Scottish Rite, 15° and 16°*, was instituted June 17, 1870, and has a membership of one hundred and seventy. Its presiding officer at the present time is Geo. M. Rice, 2d.

*Lawrence Chapter of Rose Croix, A. and A., Scottish Rite, 17° to the 18°*, was instituted June 17, 1870, and has a membership of one hundred and seventy. Its presiding officers have been, Rev. Thomas E. St. John, Henry C. Wilson, Francis Brick, M.D., and George B. Buckingham, now in office.

*The Masonic Board of Directors* was organized in January, 1867; has in charge the lease of Masonic Hall, and the custody of its appointments and property.

*The Masonic Mutual Relief Association of Central Massachusetts* was organized in 1873. It has a membership of more than twenty-three hundred. Josiah Pickett is president and Wm. A. Smith, secretary. Its membership is confined to the Masonic fraternity, and are mostly residents of the New England States.

*Stella Chapter, No. 3, Order of the Eastern Star*, was organized in 1871. Its members, numbering about three hundred, are composed of Masons and their wives, mothers, sisters and daughters.

*The Grand Chapter of the Order*, organized in 1876, has twenty subordinates in its jurisdiction. N. W. Farrer, Easthampton, is Grand Patron; Mrs. J. A. Crane, Millbury, Grand Matron; and Daniel Seagrave, Worcester, Grand Secretary. For the facts in this notice of the Masonic societies, the writer acknowledges his indebtedness to Daniel Seagrave, of Worcester.

ORDER OF ODD FELLOWS.<sup>1</sup>—In the early part of the year 1844, Joseph W. Coburn, of Boston, who was the contractor for building the stone court-house in Worcester, had among his employés four men who were "Odd Fellows," and finding no lodge in the town, they took steps toward the formation of one. Samuel S. Leonard and George C. Taft, of Worcester, became members of Siloam Lodge, No. 2, of Boston, and they, with the four men before spoken of, petitioned the Grand Lodge of Massachusetts for a charter, and May 1, 1844, *Quinsigamond Lodge, No. 43*, was instituted, and held its first meetings in the old Masonic Hall, over what is now the Five Cent Savings Bank. The elective officers of Quinsigamond Lodge for its first term were, James Murray, Noble Grand; John F. Locke, Vice-Grand; George C. Taft, Secretary; Samuel S. Leonard, Treasurer. Freeman H. Pelton is the present Noble Grand and Herbert Wesley, Vice-Grand. Present number of members, five hundred and seventy.

*Worcester Lodge, No. 56*, was instituted December 20, 1844. The elective officers for its first term were, Samuel S. Leonard, Noble Grand; George H. Goodnow, Vice-Grand; Geo. C. Taft, Secretary; William Greenleaf, Treasurer; Geo. Hamilton, Per. Secretary. James H. Richardson is now the Noble Grand and Wm. B. Louney, Vice-Grand. Whole number of members, four hundred and twenty-five.

*Central Lodge, No. 168*, was instituted September 17, 1874. Its first presiding officer was, Nathan Taylor, Noble Grand. Its present Noble Grand is John E. Lloyd. Present number of members, three hundred and ten.

*Ridgely Lodge, No. 112*, was instituted September 19, 1882. Its first presiding officer was L. A. Williams; the present one is F. A. Quimby, and it has a membership of two hundred and twelve.

*Anchoria Lodge, No. 142*, was instituted March 31, 1887. Its first Noble Grand was Charles A. McFarland. Its present presiding officer is John F. Brierly, and it has a membership of eighty.

*Naomi Lodge, No. 18, Daughters of Rebekah*, was instituted June 27, 1872. Officers for the first term, Horace A. Richardson, Noble Grand; Hannah S. Rice, Vice-Grand; Sarah F. Church, Rec. Secretary; Julia A. Taylor, Per. Secretary, and Cynthia A. Hadley, Treasurer. Present Noble Grand, Emma C. Marden. Present number of members, four hundred and forty-five.

*Queen Esther Lodge, No. 33, Daughters of Rebekah*, was instituted March 24, 1881. Its first presiding officer was Lewis C. Stone. Augusta J. Hubbard is the present Noble Grand, and it has two hundred and ten members.

*Wachusett Encampment, No. 10*, was instituted May 16, 1845, with Albert Case as Chief Patriarch; B. H. Davis, High Priest; Samuel S. Leonard, Senior War-

den, and D. C. Thurston, Junior Warden. It surrendered its charter January 23, 1851, and was re-instituted October 20, 1869. Theo. H. Day is now Chief Patriarch and C. H. Hutchinson, High Priest. It has a membership of two hundred and ninety-five.

*Mount Vernon Encampment, No. 53*, instituted September 27, 1877, with Asa L. Burbank, Chief Patriarch. Daniel A. Harrington is now Chief Patriarch, and the number of members is two hundred and forty-five.

*Odd Fellows' Mutual Benefit Association of Worcester County* was organized October 13, 1871; incorporated October 15, 1877. S. V. Stone was the first president, and Nathan Taylor now holds the office. Present number of members, thirteen hundred, with a fund of fourteen thousand dollars.

Other secret societies are:

The D. O. H. Einigkeit Lodge (Germans), instituted 1853.

Knights of Pythias, instituted 1871-78 (various lodges).

Catholic Order of Foresters (various divisions), 1871-76.

Sons of St. George, 1872.

Patrons of Husbandry, 1873.

Knights of Honor (two lodges), 1885.

Royal Arcanum (two councils), 1877.

Knights of Labor, 1878.

Knights of Father Matthew, 1879.

Improved Order of Red Men, 1880.

United Order of the Golden Cross, 1880.

Independent Order of Mystic Brothers, 1881.

Order of United Friends, 1881.

Daughters of St. George, 1882.

United Order of Independent Daughters of Samaria, 1887.

Ancient Order of United Workmen, 1885.

Iron Hall, Branch No. 396, 1886.

Iron Hall Sisterhood, No. 601, 1887.

Ancient Order of Foresters.

Bay State Lodge, Knights of Honor.

U. O. of Independent Odd Ladies (three lodges) 1886.

Independent Order of Good Templars.

Supreme Council of Knights of the American Eagle.

Daughters of Pocahontas, Minnehaha Council.

Order of United Friends, 1881.

American Legion of Honor, Hope Council.

Order of Pythian Sisterhood, Order of the Star and Crescent.

There are many other societies and associations which undoubtedly deserve special mention, whose names do not appear in the foregoing account, and the writer regrets the necessity that compels their omission.

The following list of societies not before mentioned (including several that have ceased to exist), with the dates of their organization, so far as they could be ascertained, is given as being of historical interest.

<sup>1</sup> Prepared by Mander A. Maynard.

The names of some county societies which, though not strictly local, have their headquarters in Worcester, are included in the list.

Names marked with a \* indicate that the society has ceased to exist as an active organization.

Allen Associates, organized 1874.

Ancient Order of Foresters (two courts).

Ancient Order of Hibernians (three divisions), 1867-76.

Ancient Order of United Workmen (three lodges), 1885-87.

Arlington Club, 1883.

Armenian Club, 1888.

Assembly Debating Society, 1885.

Bankers' Athletic Association, 1886.

Bay State Fanciers' Association, 1888.

Barbers' Union.

British American Society of Worcester, 1883.

Brotherhood of Carpenters and Joiners, 1886.

Brotherhood of Locomotive Engineers, 1868.

Brotherhood of Locomotive Firemen, 1877.

\*Business Men's Exchange, 1874.

Carrollton Associates.

Catholic Order of Foresters.

Catholic Young Men's Lyceum, 1885.

Central Massachusetts Poultry Club, 1882.

Chamberlain District Farmers' Club, 1873.

Chautauqua Literary and Scientific Circle (three circles).

Children's Friend Society, 1848.

Eagle Associates.

Empire State Society, 1885.

Fairmount Associates, 1885.

\*Female Samaritan Society, 1827.

First Swedish Building Association, 1886.

Franklin Social Club.

## CHAPTER CLXXXV.

### WORCESTER—(Continued.)

#### THE NEWSPAPER PRESS.

BY CHARLES AUGUSTUS CHASE, A.M.

IN the history of American journalism Worcester has been conspicuous from the beginning. Of the large number of newspapers which have been published here at different times, many have perished because they have either outlived their usefulness, or because they were never of much use at all. Most of them have been conducted by gentlemen, and many of them by ripe scholars, so that their tone, except in a few cases,<sup>1</sup> has been elevated.

On May 3, 1775, between the battles of Lexington and of Bunker Hill, the *Massachusetts Spy*, which the sturdy patriot, Isaiah Thomas, had started in Boston on July 17, 1770, made its first appearance in Worcester, where it has been published to the present time. There are probably but three newspapers in the United States which can claim to be older than the *Spy*. The life of Mr. Thomas—patriot, printer, publisher and antiquarian—was one of exceeding interest, and constituted an important part of the history of Worcester. He arrived here on the day following the battle of Lexington, in which he had

taken part, and with the type and press, which had been secretly forwarded from Boston, resumed the publication of his paper. It was the organ of the Provincial Congress, and printed the documents required by that body until presses were established at Cambridge and Concord. The paper was published, under a lease, by Daniel Bigelow and William Stearns from June, 1776, to August, 1777, and by Anthony Haswell to June, 1778, when Mr. Thomas resumed the reins. Isaiah Thomas, Jr., became a partner with his father in 1799, and was sole owner from 1806 to 1814. Succeeding publishers were: William Manning to 1819; William Manning and George A. Trumbull to 1823; John Milton Earle and Anthony Chase to 1826; Earle & Chase and Samuel H. Colton to 1835; John Milton Earle alone until 1850, and with Thomas Drew until 1858. Since July 22, 1845, the *Massachusetts Spy* has been made up from the columns of its offspring, the *Worcester Daily Spy*.

Party spirit never ran more high in this country than at the beginning of the present century. The *Spy* held the views of the Federalists, and on the election of Thomas Jefferson as President many prominent gentlemen of Worcester and Boston subscribed a fund with which to start the *National Ægis* as the organ of the "Republicans"—soon to be called Democrats—of that time. The Hon. Francis Blake, a most able and gifted lawyer, was leader of the movement, and first editor of the paper, which appeared December 2, 1801. Able writers sent in frequent spirited communications to its columns, but its list of regular editors has been a most brilliant one. Following Francis Blake, the great chieftain, came Edward Bangs, Levi Lincoln, Samuel Brazer, William Charles White, Enoch Lincoln, Edward D. Bangs, Pliny Merrick, William Lincoln, Christopher C. Baldwin and William N. Green. All of these gentlemen were members of the bar, but found recreation and gratification in preparing the labored and thoughtful essay which served as the editorial for a weekly paper in the first half of this century. It suffered absorption into the *Massachusetts Yeoman* in 1833, but on January 24, 1838, the *National Ægis* again appeared, published by Henry Rogers, who had been the publisher for twenty-one years in the early days of the paper, and with William Lincoln again as editor. Mr. Lincoln was succeeded by Samuel F. Haven, and later by Alexander H. Bullock. Edward Winslow Lincoln was editor from 1846 to 1849, rounding up the very brilliant galaxy of writers for the *Ægis* while it was exclusively a weekly paper. As the *Ægis* and *Gazette* it is still printed as the weekly edition of the daily *Evening Gazette*.

The *Massachusetts Yeoman*, started September 3, 1823, was the organ of the Anti-Masonic party. It was founded by Austin Denny, who was its editor until his death, in 1830. Emory Washburn aided Mr. Denny in 1829.

<sup>1</sup> William Lincoln, in his history, thus alludes to a paper of the baser sort: "A paper borrowing its descriptive appellation from the worst of reptiles, *The Scorpion*, came out July 26, 1809, without the name of printer or publisher, resembling those abusive periodicals serving as safety valves to convey away the fermenting malignity of base hearts."

*John Milton Caule*

As the *National Ægis* was originally started as an organ of the Jeffersonian party, so the accession of General Jackson called forth the *Worcester County Republican* to support his views. Jubal Harrington was the editor, and was in due time appointed postmaster by General Jackson. The paper was merged in the *Palladium* in 1839. Major Ben: Perley Poore, who afterwards acquired a national reputation, was an apprentice in the *Republican* office.

The *Worcester Palladium* was established as a "National Republican" or Whig paper, January 1, 1834, by John S. C. Knowlton. In 1838 it espoused the cause of the Democratic party, but in 1856 it sustained the nomination of Fremont for the Presidency, and for the remaining twenty years of its existence it was conservatively Republican. Mr. Knowlton was a man of noble character—a forcible and able writer. He died in July, 1871. The paper was continued for four years by his daughters, when they sold it to Charles Hamilton, who had printed it for many years. Mr. Hamilton sold it to J. D. Baldwin & Co. in February, 1876, and it was merged in the *Massachusetts Spy*.

Jesse W. Goodrich, an able but somewhat eccentric lawyer, started the *Worcester Waterfall and Washingtonian Delegate*, February 26, 1842, and for more than ten years did excellent service in advocating the principles of "moral suasion" for both dealers and drinkers of ardent spirits. A difference with his publishers led him to establish the *Worcester County Cataract and Massachusetts Washingtonian*, March 22, 1843. The old paper was merged in the new in January, 1844, and the paper was published under a variety of names until 1854.

Elihu Burritt, known afterwards, all over the world, as "the learned blacksmith," came to Worcester in 1838, and on January 1, 1844, began the publication of the *Christian Citizen*, which was continued for about seven years. As the advocate of universal peace it attained a large circulation. Mr. Burritt was assisted by Thomas Drew, who was proud to be called the blacksmith's "striker," and also by James B. Syme, a brilliant Scotchman.

The foregoing notices include the most prominent of the numerous papers which were published here previous to the last decade. The subject has been treated in an exhaustive manner by William Lincoln in his "History of Worcester," and by Caleb A. Wall in his "Reminiscences of Worcester" (1877). To the pages of these works the reader is referred for further information on the subject and a more complete list of newspapers and magazines.

On June 23, 1845, when the population of Worcester was something over 10,000, the first daily newspaper appeared, the *Daily Transcript*. It was published and edited by Julius L. Clarke, who was afterwards State Auditor and later the Insurance Commissioner. May 1, 1847, the subscription list was sold to the publishers of the *Spy*, who retained

the name of *Transcript* for about a year, and then changed it to *Daily Spy*.

In April, 1851, the publication of the *Worcester Morning Transcript* was resumed by J. Burrill & Co., with Mr. Clarke in the editorial chair. Silas Dinsmore, Fiske & Reynolds, William R. Hooper and Caleb A. Wall were subsequent publishers. Messrs. S. B. Bartholomew & Co. (Charles A. Chase) bought the paper January 1, 1866, enlarged its size and changed the name to *Worcester Evening Gazette*. May 3, 1869, Charles H. Doe and Charles H. Woodwell, graduates of the *Boston Daily Advertiser*, purchased the paper, and since the death of Mr. Woodwell, January 30, 1871, it has been published by Charles H. Doe & Co., with Mr. Doe as editor and manager. The *Transcript* and the *Gazette*, like the weekly edition, the old *National Ægis* and the *Ægis and Gazette*, have had a succession of brilliant writers, including such men as Charles E. Stevens, Edwin Bynner, John B. D. Cogswell, Z. K. Pangborn and William R. Hooper. It is Republican in politics, but is independent of dictation from any quarter.

The *Worcester Daily Spy* first appeared, from the office of the *Massachusetts Spy*, July 22, 1845. In December, 1858, both papers were purchased of Messrs. Earle & Drew by Moses Farnum, of Blackstone, and S. S. Foss, of Woonsocket, R. I. The business was not congenial to Mr. Farnum, who had been trained as a banker, and as Mr. Foss became homesick, they sold out in March, 1859, to John D. Baldwin, who afterwards took his two sons, John S. and Charles C., into partnership. Mr. Baldwin had previously conducted a free-soil paper in Hartford, Conn., and for five years before coming to Worcester had published the *Daily Commonwealth* in Boston. He represented this district in Congress from 1863 to 1869, and died in 1883. Delano A. Goddard, afterwards editor of the *Boston Advertiser*, was for several years associate editor with Mr. Baldwin. His place was taken by J. Evarts Greene, who is now the principal writer for the editorial columns. On July 16, 1888, the *Spy* adopted the quarto form, and gave an illustrated history of its career, with portraits of Isaiah Thomas, John Milton Earle and John D. Baldwin. A Sunday edition of the *Spy* was inaugurated with the beginning of the following week.

The *Worcester Daily Times* was started in 1879 by James H. Mellen as a Democratic evening paper. It is also the organ of the labor organizations, and is a spicy sheet. Its editor has been for several years a conspicuous member of the Legislature, and is also prominent in the Common Council.

The first Sunday newspaper in Worcester, the *Sunday Telegram*, appeared in November, 1884. Its publisher was understood to be Austin P. Cristy, who had been known as assistant clerk of the District Court and as an active politician. A daily edition followed in 1886, called the *Worcester Telegram*.

Both papers are published by the Worcester Telegram Company. In politics they are close-communion Republican.

The *New England Home Journal*, a quarto weekly, is in its seventh year. Its numbers have contained several papers of historic value. W. F. Lockwood is the present publisher and E. P. Kimball is editor.

Since the Civil War of 1861-65 there has been a large migration hither of French Canadians, who now constitute a considerable percentage of the population. As early as 1869 *L'Idée Nouvelle*, a newspaper printed half in English and half in French, appeared, with Méderic Lanctot editor and publisher. It continued but three months. In October of the same year Ferdinand Gagnon brought out *L'Etendard National*, which was published here for a year and then removed to Montreal, but was dated at Worcester. In October, 1874, Mr. Gagnon established *Le Travailleur*, which has been very successful and influential. Since his death, some two years ago, it has been published by Charles Lalime, with Emile H. Tardivel as editor. It appears semi-weekly and is Democratic in politics.

*Le Courrier de Worcester*, now in its fifth year, is published by Belanger Frères. It advocated Republican principles until about a year ago, when it embraced the Democratic faith.

Two numbers of *Le Republicain* appeared in the autumn of 1888.

The Swedes, who now number some thousands, have two weekly journals in their own language. *Scandinavia*, published by the Swedish Publishing Company, is now in its fourth year. J. Forsstedt and Helge Sandberg are editors. Some of the ultra temperance men among the Swedes have recently started the *Fosterlandet*, published by the Northern Publishing Company, with Frank L. Malmstedt as editor.

The *Messenger*, an organ of the Catholic population, printed weekly, is now in its third year. James J. Doyle is publisher.

THE AMATEUR PRESS.—It seems proper here to give some notice of the juvenile newspapers which have been printed in Worcester. Of these the first was probably *The Evergreen*, Thomas Chase, editor. Its four pages were about two and a half by three inches, and it was printed by Albert Tyler, then an apprentice in the *Spy* office. Vol. I., No. 1 (the only one printed, we believe), was dated January 8 [1840], and contained a notice of the three lectures which George Combe had just given, by invitation of Alfred D. Foster and Anthony Chase, on Education and Mental Philosophy. It also recorded the recent arrival of Daniel Webster and family from Europe, after a tedious passage of thirty days.

A friend has exhumed from oblivion a copy of *The Joker*, printed by Charles A. Chase in 1845; type form about three by five inches, of which but one number was issued, for the amusement of his schoolmates.

In April, 1845, appeared *The Minute Gun*, Vol. I., No. 1, a two-column paper about eight inches in length, edited by Samuel Foster Haven, Jr. Young Haven's gifted father, for many years librarian of the American Antiquarian Society, was then editor of the *National Ægis*, and the little paper was probably put in type and printed by some of the compositors on the *Ægis*. The first number of that series was apparently the last. But on September 11, 1845, young Haven, having secured from the *Ægis* office a font of old type and a condemned card press, began the regular publication of *The Minute Gun*, with another Vol. I., No. 1, doing all the work with his own hands. It was a four-page paper, with single columns, two and a half inches wide and three and a half inches long, with the motto: "*Tandem fit surculus arbor*." The shoot in time becomes a tree." The whole number of the series was twenty-nine, and in the last five the vignette of a field-gun supplanted the peaceful motto. The paper was printed once a fortnight at first and afterwards weekly, the last number, of which only the outside was printed, appearing July 2, 1846. Young Haven was graduated at Harvard College, in the class of 1852, and, having studied medicine, began practice in Worcester. August 8, 1861, he left the city with the Fifteenth Regiment of Massachusetts Volunteers as assistant surgeon. He afterwards became full surgeon, and at the battle of Fredericksburg laid down his noble life.

The writer of this sketch, paying a visit to the printing-office of *The Minute Gun*, in a corner of the old Antiquarian Hall, was urged by his senior friend to embark in an enterprise of the same nature, and on January 1, 1846, *The Humble-Bee* first saw the light. It was of about the same size as its contemporary. The imprint announced that "*The Humble-Bee* is published every Thursday at No. 182 Main Street, Worcester, Mass. Terms: 3 cents for 4 numbers, payable in advance. Charles A. Chase, Editor, Publisher, Proprietor and Printer." In July the name of the sheet was changed to *The Bee*. In place of the former motto, "*multum in parvo*," now appeared the vignette of a bee-hive and the motto: "*hinc dulcia mella premes*." Of *The Humble-Bee*, under both names, thirty-six numbers were printed. The work was done by the youthful printer, not then in his teens, with old type and an old press, in the office of the *Spy*, of which an uncle was the proprietor. *The Minute Gun* and *The Humble-Bee* met with much favor, and contained many brilliant contributions from the friends of the young publishers.

Pliny Earle (2d), the son of John Milton Earle, printed from the *Spy* office, in January, 1852, the first number of *The Carrier Pigeon*, a two-column paper of four pages, about seven and a half inches in length. The paper was issued monthly at twenty-five cents per annum. The May number bore the imprint of Earle & Brown as publishers, J. Stewart Brown being the junior partner. The paper was prepared for the

press by the two partners, but the September number and those following were printed by "Howland & Alexander," two apprentices on the *Spy*. The December number contained the valedictory.

The publisher of *The Carrier Pigeon* brought out, in January, 1855, *The Heart of the Commonwealth*, a semi-monthly paper, about half as large again as its predecessor. Both papers were full of jokes, with a few advertisements. Mr. J. B. Syme, a writer on the *Spy*, wrote most of Master Earle's "heavy editorials," and some of his friends sent in communications of some merit.

Journalism at the High School began forty years ago. The compositions or theses in the classical departments were handed to one of the boys and one of the girls, who, as editors, selected such as suited their fancy and copied upon foolscap paper and read to the school. The journal thus formed was called *The Excelsior*. Four volumes are preserved in the High School Library.

The first printed newspaper issued from the High School was the *Thesaurus*. Thirty-two numbers appeared between November 1, 1856, and May 3, 1866.

Four numbers of the *High School Reporter* appeared between April 15 and June 15, 1879. John H. Martel was publisher and sponsor.

Two numbers of the *Worcester Student* appeared in September and October, 1879. This was the organ of the schools generally, but contained a High School department, conducted by J. H. McNamara.

The *High School Argus* appeared April 1, 1885, and eighteen numbers were issued between that time and June 20, 1886. Frank R. Batchelder, the editor, printed the paper with his own hands.

The *Academe*, the present organ of the school, started January 1, 1886. It was issued monthly during the first year, and was then changed to a semi-monthly.

Frank R. Batchelder's *Forget-Me-Not*, for March and April, 1886, had a High School department.

The *Senior Critic*, established by the class of 1886, appeared January 25th of that year. Twelve numbers were printed. It had occasional illustrations, and was a spicy sheet.

The High School publications have been very creditable to the editors and contributors.

The *Lilliputian*<sup>1</sup> was issued March 6, 1856, by Geo. E. Boyden and James Green, Jr. (afterwards Green & Oliver), a semi-monthly of eight pages. It was published four months, and was followed, July 24, 1854, by the *Pathfinder*, a four-page semi-monthly, printed by Master Green, the organ of the "Boys' Rocky Mountain Fremont Club." Four months later Charles F. Blood became the owner, and published it until March 28, 1857. Young Blood had printed four numbers of a second *Humble-Bee* in the summer of 1856.

The Young People's Mutual Improvement Society issued the *East Mount Monthly*, Stephen C. Earle, editor, through the year 1858.

The *Young American* appeared on December 18, 1858, edited by Edward Gray, but printed by E. R. Fiske, a professional printer. It was published semi-monthly for something more than a year.

From 1859 to 1872 we find no trace of juvenile papers except that about the latter year a few numbers of the *Boys' Stamp Gazette* and a second *Young American* appeared. In October, 1872, John I. Souther started the *Starry Flag*, which waved about six months.

Some twenty years ago special outfits for young printers were put upon the market. In December, 1875, Philip M. Washburn issued the first number of the *Philippic*, which was continued for six months.

June 11, 1877, John H. Starkie issued the first number of the *Amateur Press*, and is styled the father of the fraternity called "amateurdom," as far as Worcester is concerned. With the fifth number Arthur A. Wyman was admitted as associate editor, remaining two months.

Other amateur papers and their editors were:

The *Boys' Favorite*, John H. Martel, in August, 1877.

The *Yankee*, W. E. Smythe, in October, 1877.

The *Amateur Gazette*, J. G. Oliver and Charles A. White, November, 1877. A. A. Wyman took White's place in the following year, and G. E. Davis was admitted as a partner.

The *Tyro*, Smith & Ellis, February, 1878.

The *Avalanche*, Charles S. Knight, Jr., April, 1878.

The *Amateur Tribune*, A. A. Wyman and Charles D. Wheeler, May, 1878.

*Ours*, J. H. Martell and Henry Lemay, August, 1878.

The *Boys of Worcester*, C. S. Ellis, January, 1879.

The *Daily News*, J. H. Martell and George S. Dickinson, March, 1879.

The *Stamp Collector*, E. A. Welch, April, 1879.

The *Weekly Star*, E. P. Sumner, April, 1879.

The *Bay State Gem*, J. G. Oliver, September, 1879.

The *Go Ahead*, Frank R. Batchelder, August, 1882; name afterwards changed to *Forget-Me-Not*.

The *Bay State Pearl* (afterwards called the *Planet*), Frank S. C. Wicks, July, 1883. He published two numbers of the *Caduceus* in the autumn of 1888.

In 1883 and following years appeared the *Union*, L. E. Ware and Arthur C. Smith; *Mayflower*, Walter L. Brown; *Scrap-Book*, Alfred D. Flinn; *Golden Star*, H. and W. Holmes and Frank Cutter; *Ruby*, Harry A. Plympton; *Avalanche*, Frederick Cowell; *Worcester Amateur*, Miss Edith May Dowe.

In 1885 Joseph Melanefy and Frank S. Mawhinney issued the *Headlight*, to which Austin Rice was the principal contributor.

In September, 1885, Charles A. Hoppin, Jr., issued *The Breeze*, devoted wholly to amateur affairs. He is

<sup>1</sup> The remaining portion of this chapter is compiled from information kindly furnished by Charles A. Hoppin, Jr., a veteran "amateur."

a very enthusiastic newspaper man, has had some experience on the *Evening Gazette*, and is now in charge of the advertising department of Messrs. Denholm, McKay & Co.

Among the recent amateur publishers are: Harry Chamberlin and Joseph Sargent (3d). Several amateur organizations have been formed—local, sectional and national—in which some of the amateurs of this city have taken a prominent part: notably, Frank R. Batchelder, Frank S. C. Wicks, Alfred D. Flinn, Charles A. Hoppin, Jr., and Edith May Dowe. Complete files of most of the the Worcester papers are to be found at the library of the American Antiquarian Society. There is a marked contrast between the earlier and the later issues. The former catered to the general public, while many of the more recent seem to have looked for readers chiefly in the ranks of "dom," as the fraternity is styled. But the friendly rivalry among the members, scattered throughout the country, served to bring out their best efforts, and cultivated their diction and stimulated their thought.

## CHAPTER CLXXXVI.

### WORCESTER—(*Continued.*)

#### THE DRAMA IN WORCESTER.

BY NATHANIEL PAINE.

THE early history of the drama in Worcester is involved in much obscurity, from the fact that till within the last twenty or thirty years the newspapers paid but little attention to the strolling companies that occasionally performed here, and that notices of such entertainments were not usually promulgated by means of newspaper advertisements, but by posters or small bills distributed about the streets, which very soon became lost or destroyed. There was also a very strong sentiment in the community against theatrical exhibitions of any kind, so that, previous to 1848 or '50, the printed records are very meagre, and would seem to indicate that our people took but little interest, or did not have the time to patronize entertainments of that kind. Besides this, an act passed in April, 1750, against dramatic exhibitions was in force up to 1794 or '95. This act was "for preventing and avoiding the many and great mischiefs which arise from publick stage-plays, interludes and other theatrical entertainments, which not only occasion great and unnecessary expenses, and discourage industry and frugality, but likewise tend generally to increase immorality, impiety and a contempt of religion." The act provided that if "any person or persons shall be present as an actor in, or a spectator of, any stage-play, etc.—in any house, room or place where a greater number of persons than twenty shall

be assembled together, every such person shall forfeit and pay, for every time he or they shall be present as aforesaid, five pounds."

The first record of anything like a dramatic exhibition in Worcester is probably in William Lincoln's "History of Worcester," where it is stated that in 1787 Master Brown, a school-teacher, produced Addison's "Cato," with great success, at a quarterly examination of his school. The parts were probably taken by the pupils, and not in costume. It is said that similar exhibitions were continued for two or three years. Ten years later, in June, 1797, a Mr. Hogg, who advertises himself in the *Spy* as "late from the Boston Theatre," "informs the ladies and gentlemen of Worcester that the hall over the school-room<sup>1</sup> is fitted up for the purpose of representing some select and most admired dramatic pieces, a musical entertainment—"The Waterman"—a Dramatic Romance in one act called 'The Oracle, or Daphne and Amintor,' the whole to conclude with *pas-de-deux*. Doors open at 6½, performance begins at 7½. Front seats 3s., back seats 2s. 8d." The *Massachusetts Spy* evidently did not have a reporter at this performance, or else did not think it worth reporting, for nothing appears in its columns in regard to it. The company were in town several days, presenting, a week later, a piece entitled, "Like Master like Man," and the "Shipwrecked Mariner, with singing by Mr. Hogg." About the same time, Mons. Boullay "from the Old Theatre, Boston," opened a school "in the polite accomplishment of dancing and music." Possibly he may have participated in the *pas-de-deux* at Mr. Hogg's dramatic representation.

By a programme now in the possession of the American Antiquarian Society it appears that in July, 1817, Mr. West's Circus exhibited for one week on a lot between Front and Mechanic Streets, opposite Eaton's tavern, the entrance being on Mechanic Street. Again, in 1818, as appears from the same source, a grand tight-rope performance, with feats in posturing, leaping and tumbling, was given at "Hathaway's Hall;" "tickets, 50 cts., for sale at Hathaway's bar." This hall was in a hotel located on the present site of the Bay State House.

After the performance of Mr. Hogg's company there does not appear to have been a regular dramatic exhibition in Worcester for some forty or fifty years. The only entertainments offered to the public, besides concerts, were moving dioramas and monstrosities (like the Siamese Twins, who were exhibited in the hall of the Central Hotel in 1838), and an occasional equestrian exhibition. Later came the annual visits of "Blind Dexter," with his traveling van of "colored statuary," generally exhibiting on Main Street, near the Town Hall. In his advertising he says: "The above exhibition has not the advantage

<sup>1</sup> The school-house was owned by a stock company, but later became the property of the town and was known as the "Centre School."

f wealth of an incorporated association, basking in sunshine and affluence, but depends entirely upon the exertions of a humble individual, who was deprived of both eyes and one arm while engaged in blasting a rock."

For many years the selectmen would not license a circus to give an exhibition here, but it appears that on some unguarded moment they did, in May, 1832, license a company, much to the indignation of many good people of the town. The *Massachusetts Spy* thus comments on the action of the selectmen :

The Selectmen have licensed a company of strolling actors, calling themselves Circus Riders, to exhibit their fooleries here. We presume that in giving their consent the Selectmen had no idea of encouraging vice or dissipation, or of acting in opposition to the well-known wishes of a majority of their constituents. Who does not know that no one gets any good by attending such exhibitions? That by going, he encourages idleness, cruelty and vice! It is to be hoped that this is the last time we shall be troubled with such unwelcome visitors, and that our Selectmen will in future be careful not to lend their aid in encouraging them to come among us.

This protest seems to have had its effect, for no licenses were given to equestrian performances for the next twelve or fifteen years; those who desired to witness such exhibitions having to go to the adjoining towns of Millbury and Holden to do so. About the latter part of the year 1845, or the beginning of 1846, the selectmen ventured to give a license for a dramatic performance to one Dr. Robinson. The play produced was called "The Reformed Drunkard," and was claimed to be in the interest of temperance. This entertainment seems to have been condemned by many of the citizens, and when Dr. Robinson again applied for a license (the profits of the exhibition to go to some local society) the selectmen declined to grant it, and spread upon the town records their reasons for so doing. Their report, dated March 2, 1846, covers nearly two pages of the record-book, from which we make the following extracts, as indicating to some extent the feeling of the community towards theatrical exhibitions at that time. The selectmen say :

Much complaint has been made because the Selectmen have refused to license Dr. Robinson to exhibit a theatrical exhibition called "The Reformed Drunkard." To that man they could not grant such a license, even if they had no objections to the character of the exhibition. The last time that Robinson was permitted to hold such an exhibition here he took advantage of the very license which had been granted him by the selectmen to grossly insult the town. But Robinson's improper conduct has not been the principal reason for rejecting his application, as a similar request has been made by those to whom there was no personal objection. The selectmen have believed that the tendency of such an exhibition was demoralizing in the extreme, that it was calculated rather to increase the vice there represented than to diminish it. . . . If any want to see the consequences of intemperance let them visit the Poor-house, let them attend the weekly religious services at the Jail Chapel, and there they will witness the usual consequences of intemperance in a far better manner, etc. Do they not know that the French Dausseuse carried large sums of money from this country, and do they not also know that the number of the spectators would have been extremely limited if it had not been generally known that females would exhibit their persons in most indecent postures? Some months since Green, the self-styled "Reformed Gambler," delivered a lecture in this town, and the next day there was a greater sale of playing cards than had been for weeks and months previous; this surely was not for good.

About a year later, however, the selectmen licensed a company from Boston, who, under the name of "The National Athenæum," appeared for a season of two or three weeks at Brinley Hall (now Grand Army Hall). They opened with the play of "The Hunchback," under the management of G. G. Spear, in June, 1847. In the company were W. H. Smith, E. F. Keach, Mr. and Mrs. Vincent and Miss Louisa Gann, who appeared in several standard plays in a very acceptable manner, closing with "George Barnwell." That dramatic entertainments were still under a cloud in Worcester may be inferred from an article in the *National Ægis* in regard to this company, which says : "It has been intimated that a portion of our community, whose means enable them to frequent the opera, are indisposed to countenance this less imposing scene of recreation. . . . But we are unable to believe that an individual can have such an immense beam in his eye. . . ."

In the following year Mr. W. B. English gave a series of performances at Brinley Hall, under the name of "Tableaux Vivants," this name being given as less distasteful to the moral sense of many than that of theatre. "Rosina Meadows" was the first play produced, Mrs. Western (afterwards Mrs. English) taking the leading part. Mrs. English (who is still living, at the Forrest Home for Actors, at Philadelphia) says : "The company drew immense houses, many of the ladies of the audience appearing in evening dress." A few years later Mr. English again appeared at Brinley Hall, with his wife (Mrs. Western) and her daughters, Lucille and Helen Western, who afterwards had quite a notoriety in the theatrical world.

In 1850 Mr. Charles C. D. Wilkinson, late manager of the Worcester Theatre, made his first appearance on any stage, at Brinley Hall, with a company under the management of Mr. George C. Howard, in the role of *Tim* in "My Wife's Second Floor." Mr. Wilkinson, though not a native of Worcester, resided here in his early days, and received his education from the schools of Worcester. In 1851 he gave a series of "Parlor Entertainments" in the above-named hall, with a company composed mainly of members of his own family.

In the winter of 1850 a hall in the newly-erected Flagg's Block (on the site of the present block of that name) was occupied for a short time by the Howard (G. C.) and Fox (G. L.) Troupe, who gave a series of miscellaneous dramatic entertainments. The next autumn the hall was made more available for stage representations, and opened by a Mr. Burroughs, of Providence, under the name of the Worcester Dramatic Museum, and afterwards came under the management of Noah Gates, of Lowell. The leading ladies of the company were Mrs. Beissenherz (a most versatile actress, taking all parts from a chamber-maid to *Lady Macbeth*, and dancing between the acts), Mrs. Germon and Miss Steele. During the

first winter under Mr. Gates' management Mrs. George H. Barrett appeared as a star. In the spring of 1853 Mr. Gates applied for a renewal of his license. A remonstrance against its being granted was presented to the mayor and aldermen, which brought a strong petition in favor of it; so a public hearing on the question was given at the City Hall Monday evening, March 1st, which was largely attended. Dwight Foster appeared as counsel for the petitioners, and was supported by Dr. O. Martin and Dexter Parker, who spoke in behalf of the young men. Alfred Dwight Foster, Rev. Alonzo Hill, W. R. Hooper and others spoke against the granting of the petition. One of the arguments against the license was that the character of the plays presented was not of the best; that if the plays of Shakespeare and other standard dramatists were produced there would be less objection to it. Perhaps it was with a desire to influence the opposition to a more favorable view that "Romeo and Juliet" was brought out a night or two before, and the night the discussion was going on "Richard III." was being played at the Museum.

The Museum closed its doors the 5th of March, but opened again April 8th, having received a license with a condition that no one under eighteen years of age should be admitted. It was closed for the season June 18, 1852, with a benefit for Mr. W. M. Leman.

The Dramatic Museum was opened in September, 1853, by Gates & Brown, with J. B. Cartlitch as stage manager. During this season Mr. Denman Thompson, now so widely known by his impersonation of *Joshua Whitcomb* in the "Old Homestead" (at present a permanent attraction at the Academy of Music in New York), appeared at the Museum, "playing anything and everything, besides dancing hornpipes and fancy dances between the acts."

Other members of the company at this time were "Yankee Locke" (George E.), J. J. Prior and William Henderson (now manager of the Academy of Music at Jersey City). The license of the company expired at the close of the year, and in December application was made for its renewal. Again there was strong opposition to it, and the question was debated in the Board of Aldermen at two or three meetings without action. In the mean time the Museum closed its doors during a successful run of "Uncle Tom's Cabin." The matter was settled the night of Sunday, January 29, 1854, by the burning of Flagg's Block, which destroyed all the scenery and properties, as well as two dioramas that were being prepared for exhibition.

The first building erected in Worcester for theatrical purposes was completed in 1857, having been built by William Piper from plans by Boyden & Ball, on Front Street, opposite the city hall.<sup>1</sup> The *Daily Spy*, in speaking of the new building, says: "It is an edifice which, for architectural beauty and complete

adaptation to the purposes for which it was designed, may challenge comparison with any similar edifice in the country, except in the largest cities." The new theatre was opened February 9, 1857, under the management of Wyzeman Marshall, of Boston, an actor of an established reputation, with the play "Ingomar." An opening address, written by Mr. A. W. Thaxter, was recited by Miss Mary Hill (Mrs. Thaxter). In the cast were: Mr. Marshall as *Ingomar*, Miss Hill as *Parthenia*, Messrs. Beck, Stanton and Taylor as the *Three Citizens of Massilia* and Mr. Charles Wilkinson as *Lykon*. The entertainment concluded with W. W. Clapp's farce, "My Husband's Mirror," Mr. Wilkinson taking the leading part. The first season closed in May with a complimentary benefit to Mr. Marshall, tendered by several prominent citizens, among whom may be mentioned A. H. Bullock, Henry Chapin, Charles Devens, Rejoice Newton, J. D. Washburn, J. E. Estabrook and Adin Thayer.

Mr. Wilkinson became the manager the second season, opening August 24, 1857, with "Love's Sacrifice" and "Grimshaw, Bagshaw and Bradshaw," Mrs. Beissenherz being the leading lady. In March, 1858, Mr. M. V. Lingham became the manager, and was succeeded in the fall of the same year by Jacob Barrow, who brought out many standard plays, with a very efficient company, which included, beside Mrs. Barrow (who was a very accomplished actress), J. E. Owens, Charles Fisher, Miss Fanny Morant and Miss Charlotte Thompson. During Mr. Barrow's brief stay here, several of the good old comedies, like "The Rivals," "The Heir-at-Law" and "The Poor Gentleman," were produced. The theatre was reopened under the name of "Pouncefort's Athenæum" March 28, 1858, with Mr. George Pouncefort as manager. Mr. and Mrs. Pouncefort took the leading parts, opening with the "Lady of Lyons," and closing April 22d with "Still Waters Run Deep" and "Black-Eyed Susan."

During the summer the theatre was occupied occasionally by traveling companies, and October 12th it was again opened by Mr. Pouncefort, with "Don Cæsar de Bazan" and the farce of "Sarah's Young Man." Mr. and Mrs. I. Biddle were the comedians of the company. During a brief season Mr. Pouncefort introduced to a Worcester audience such actors as W. E. Burton, C. W. Coudock and J. W. Wallack. In November, 1859, a piece called "Ossawatomie Brown; or, the Harper's Ferry Insurrection," was brought out, and in the same month Mr. Wallack appeared for a few nights in the "Winter's Tale," "Hamlet," "The Iron Mask" and "Macbeth." The season closed December 20th.

Messrs. Myers and Boniface opened the theatre in March, 1860, for a short time, with Mrs. Barrow as leading lady, in such plays as "The Octoroon," "Sea of Ice" and similar pieces.

William B. English opened the theatre in 1860 for a brief season, with his step-daughters, Lucille and

<sup>1</sup> Now known as the "Front Street Musée."

Helen Western as the stars, they appearing in such pieces as "Jack Sheppard," "The French Spy" and "Three Fast Men," which were of a decidedly sensational character.

In October of 1860 the "Serious Family" was produced, with an unusually strong cast, including Mr. and Mrs. E. L. Davenport, Mr. and Mrs. John Gilbert, Mrs. Barrow and Miss Fanny Davenport.

In January, 1861, Mr. Pauncefort again took the management with Mrs. Barrow as the leading lady. Mr. John Gilbert appeared in February as *Sir Anthony Absolute* in "The Rivals," and again the next month in "Rob Roy."

In the spring of 1861 the excitement caused by the secession of the Southern States and the prospect of a call for troops at the North was so intense that entertainments of all kinds were poorly patronized, and the theatre performances became almost deserted. An afternoon performance was given at the theatre the 19th of April, at which the Holden Rifles, who were in the city on their way to the front with the Third Battalion of Rifles, under Major Charles Devens, were invited to be present. The departure of the troops, and the fact that the whole community were so much interested in the real tragedy which was being enacted that they had no time nor desire to witness any dramatic representations, caused the sudden closing of the theatre the next evening, with not a dozen persons in the audience.

In May, 1861, Charlotte Cushman appeared for two nights in "Guy Mannering" and "Romeo," and again for two nights in June as *Lady Macbeth* and *Queen Catharine*, supported by John Gilbert, J. B. Studley and Miss Viola Crocker. January 3, 1862, the last night of the season, a play called "Boys of Worcester County; or, the Battle of Balls' Bluff," was brought out, but it was not a marked success. In April of the same year "Uncle Tom's Cabin" was played for one week, closing April 15th with a benefit for John W. Stiles, a native of Worcester.

H. C. Jarrett, of Niblo's Garden, New York, opened the theatre for two nights in May, 1862, with a strong company, which included John Gilbert, Charles Barron, J. E. Owens and Miss Mary Wells, who appeared in "School for Scandal" and the "Poor Gentleman." The next month J. C. Meyers, of Providence, was here for a brief time, with Henry Langdon and Miss Annie Senter in the leading parts. During the next five years the theatre does not appear to have been open for regular seasons, but was occupied largely by traveling companies, a few nights at a time. In this way Laura Keane was here with a good company in June, 1863, producing "Our American Cousin." In July Miss Kate Reynolds, with a company from the Boston Museum, which included Mrs. J. R. Vincent, Stuart Robson, Owen Marlowe and John Wilson, played a short engagement.

In October, 1863, J. Wilkes Booth, the assassin of President Lincoln, appeared in "Richard III." and

the "Lady of Lyons," with Mrs. Barrows as the leading lady.

The theatre was opened from time to time during the next four years for brief seasons, with companies good, bad and indifferent, but during this period such players appeared as William Warren, Miss Josie Orton, Emily Mestayer, McKean Buchanan, Edwin Forrest (as *Richard* and *King Lear*), John Brougham, Tom Placide, L. R. Shewell and Mark Smith.

The last dramatic representation in the Front Street Theatre was November 27, 1867, with the play "Under the Gas Light," J. B. Booth being the manager. The theatre was soon made into offices and small halls, and not again used for dramatic purposes till the fall of 1888, when it was remodeled and improved, and is now known as the Front Street Musée, for variety shows and curiosities, under the management of George H. Batcheller.

The present Worcester Theatre, on Exchange Street, built by a stock company, and first called Music Hall, was opened to the public the evening of March 9, 1869, under the management of J. B. Booth, of the Boston Theatre Company. The pieces presented on the opening night were "The Lady of Lyons" and the farce of "My Neighbor's Wife." In the company were C. R. Thorne, Jr., Louis Aldrich, W. H. Lehman, Dan. J. Maguinnis, Mrs. J. B. Booth and Mrs. S. M. Leslie. The Music Hall was under the control of the proprietors of the Boston Theatre for ten or twelve years, during which period many actors and actresses of established reputation appeared on the boards. Space does not permit a complete list of these, but a few of the most noted may be mentioned.

Mrs. Scott Siddons appeared in "Faint Heart Never Won Fair Lady" in December, 1870; Mr. and Mrs. Barney Williams early in 1871. In May, 1873, Sothorn appeared in his great part of *Lord Dundreary* in "Our American Cousin." John E. Owens in February, 1871, Wyzeman Marshall in May of the same year, and J. W. Wallack, in the play of "The Iron Mask;" the next year Mr. and Mrs. J. W. Florence and Frank Mayo. In January, 1873, Carlotta Patti, Signor Mario (the great tenor), Miss Annie Louise Cary and Teresa Carreno, the pianist, gave a concert at the theatre, and drew an immense house.

In the fall of 1873 the theatre was newly painted and the auditorium fitted with new and more comfortable seats, and thereafter was known as the "Worcester Theatre," instead of "Music Hall." It was opened by the Boston Theatre Company October 28th, with L. R. Shewell and Mrs. Thos. Barry in the leading parts. Other prominent players who appeared during the next few years were Lester Wallack, F. S. Chanfrau, McKee Rankin, Sara Bernhardt, Lotta, Charles Fechter, Edwin Booth. During this period the theatre was often leased to strolling variety companies, minstrel shows and for various other entertainments, many of which were of rather poor quality.

In the summer of 1882 Mr. Charles Wilkinson took a lease of the theatre, and became the first resident manager. He opened it August 24, 1882, with a performance by the Alice Oates Opera Company. It was during Mr. Wilkinson's management that the first matinees, now so popular, were given in the theatre. The first experiment was not very encouraging, the receipts being only about twenty-five dollars, while the same company in the evening took over five hundred dollars. In November, 1882, the theatre was opened on Sunday evening for the first time, with a reading by J. E. Murdock, the veteran actor, and about five years later Rev. W. H. H. Murray lectured there on Sunday evening. In 1885 a large part of the stock of the Music Hall corporation changed hands, and the new owners made radical changes in the interior of the building, with special attention to the matter of safety against fire, and it now compares very favorably with the metropolitan theatres.

Mr. Wilkinson retained the proprietorship till his death, which took place March 2, 1888. During his management, a period of about seven years, he endeavored to present to his patrons first-class entertainments, and as a rule he succeeded in so doing, and Worcester theatre-goers were given an opportunity to hear many actors and actresses of established reputation in their favorite rôles. Such well-known representatives of the dramatic art as Henry Irving in "Louis XI.," Joe Jefferson in "Rip Van Winkle," Lawrence Barrett as *Hamlet*, Denman Thompson as *Joshua Whitcomb*, Edwin Booth, Wilson Barrett, Charles Wyndham, J. T. Raymond, Madame Modjeska, Salvini, E. A. Sothorn, Frank Mayo, Mary Anderson, Fanny Davenport, Margaret Mather, Fanny Janauschek, Rosina Vokes, Mrs. Langtry and many others of high rank on the stage appeared during Mr. Wilkinson's management.

Since the death of Mr. Wilkinson, his wife, Lillie Marden Wilkinson, has had the management, and has continued it upon the same plan as her husband, in giving to the public as good a class of performances as they would patronize. It is understood that at the close of the present season (1888-89) the management is to pass into other hands, and that extensive changes and improvements in the entrance and auditorium are contemplated.

Mention should be made of an amateur company of young ladies and gentlemen, who, a few years before the late war, appeared in farces and comedies in a small hall in the upper story of the late Dr. John Green's Block, on Main Street.<sup>1</sup> The young gentlemen of the company became, a few years later, the founders of the present Quinsigamond Boat Club.

During the Civil War several amateur performances were given at the theatre, or in some public hall, by ladies and gentlemen, for the benefit of the United States Sanitary Commission, or for local aid to troops

passing through the city to and from the seat of war. Most of these performances were given under the patronage of Mrs. Governor John Davis. Among the pieces thus produced were: "Still Waters Run Deep," "Follies of a Night," "Ici on Parle Français," and "Up at the Hills."

Since the close of the war the local post of the "Grand Army of the Republic" have from time to time produced military plays at the theatre, for the benefit of their charitable fund, which have been most generously patronized.

In later years the Quinsigamond Boat Club have given several excellent dramatic entertainments, in which the various parts, both male and female, were taken by members of the club and their friends. In this way they have presented the travesty of "Romeo and Juliet" in 1877, and again in 1879; the extravaganza of "Lord Bateman," 1878; "The Legend of the Rhine," 1879; and in April, 1888, "The Talisman, or the Maid, the Monk and The Minstrel." All of these were largely musical, and the club were ably assisted by local male vocalists.

In December, 1883, Mr. W. H. Bristol opened the "Dime Museum" in Washburn Hall, giving an exhibition of giants, dwarfs and curiosities of various kinds, with a variety stage performance. This is still continued and appears to have a generous patronage.

In 1882 and for a few years thereafter, dramatic performances were given at Bigelow's Garden and Skating Rink in the summer months, during which time several of the popular burlesque operas, like "Pinafore" and "Patience," were produced and drew large houses. In the same period entertainments were given by travelling theatrical combinations and minstrel shows, with occasional visits from Boston theatre companies.

The foregoing notice of dramatic representations in Worcester is necessarily very incomplete, the space given to this subject permitting only a brief general review, and many interesting details have been omitted.

## CHAPTER CLXXXVII.

### WORCESTER—(Continued.)

#### BANKING AND INSURANCE.

BY CHARLES AUGUSTUS CHASE, A.M.

THE *National Ægis* of December 21, 1803, contained an editorial article, three columns in length setting forth in full the advantages which would inure to a community from the establishment of a bank. A number of gentlemen had met at Barker's tavern,<sup>1</sup> on the evening of the 18th, Isaiah Thomas presiding, and had voted that it would be advan-

<sup>1</sup> Now owned by the Merchants' and Farmers' Fire Insurance Company.

<sup>1</sup> Now the Exchange Hotel.

tageous to the county to have a bank established at Worcester; that as soon as one thousand shares should be subscribed for, at one hundred dollars a share, an application should be made to the Legislature for an act of incorporation; and that the subscription paper should be opened at Barker's tavern on the first Tuesday of January following. Benjamin Heywood, Francis Blake, Isaiah Thomas, William Paine and Daniel Waldo, Jr., were chosen a committee to secure the subscriptions and call a meeting of the subscribers for organization. An advertisement in the *Ægis* and the *Massachusetts Spy*, headed "A Country Bank," set forth that "an association of gentlemen belonging to the town of Worcester, having contemplated the advantages which would accrue to the agricultural, commercial and mechanical interests of the county from the establishment of a bank in the town of Worcester," had appointed a committee to invite subscriptions from the citizens of the county, and gave notice of the place and manner in which subscriptions might be made. The response to this call was so liberal, that it was found that one hundred and eighty-three subscribers had applied for a total of twenty-six hundred and twelve shares. These subscriptions were graded down to fifteen hundred by a committee, and application was made for a charter with a capital of \$150,000, instead of the sum first proposed. The charter was granted March 7, 1804:—"An act to incorporate Daniel Waldo and others by the name and stile of the President, Directors & Company of the WORCESTER BANK."

The corporators, besides the above-named committee, were Daniel Waldo, Sr., Stephen Salisbury, Nathan Patch, William Henshaw, Nathaniel Paine and Elijah Burbank. The charter, which was to run for eight years from October 1, 1804, provided that the whole amount of capital should be paid in before March 1, 1805; that the bank might hold real estate for banking purposes to the amount of \$20,000; that neither their circulation nor their loans should at any time exceed twice their capital stock actually paid in and existing in gold and silver in their vaults. No bills could be issued of a less value than five dollars, and none between five and ten dollars; and the Commonwealth reserved the right to become an owner in the stock to an amount not exceeding \$50,000 of additional stock to be created.

As there were no savings banks then in existence, it was also provided that one-eighth part of the whole funds of the bank should always be appropriated to loans to the "agricultural interest," of not less than one hundred dollars or more than five hundred dollars each, and for a term not less than one year; and the bank was bound to loan to the State, whenever required by the Legislature, any sum not exceeding \$15,000, reimbursable in five annual instalments and at a rate of interest not exceeding five per cent. The charter was accepted at a meeting of subscribers to the stock, held April 10, 1804. At the same meeting

Daniel Waldo, Benjamin Heywood, Samuel Flagg, Isaiah Thomas, Daniel Waldo, Jr., Theophilus Wheeler and Samuel Chandler were elected directors. William Paine, Samuel Brazer, Ephraim Mower, Oliver Fisk and John Farrar were charged with the duty of looking up a site for a banking-house and of preparing a suitable plan. On the 20th of the same month, on recommendation of the committee, it was voted to purchase the lot of land belonging to Capt. Daniel Heywood, opposite to land owned by Nathaniel Paine, Esq., "situate on the Main Street, in Worcester, stated to contain one hundred and twenty-six rods," and "to build a house of brick that will accommodate a family and answer for banking purposes." This site, now occupied by the Central Exchange, was purchased, and a brick building, having two belts of marble on the front, was erected. It contained, besides the banking-rooms, a hall for the meetings of the stockholders and a tenement which was occupied by Hon. Daniel Waldo (second of that name) for several years, until he built his mansion just south of the bank, on the site of Mechanics' Hall. The north part of the first floor was afterward used as the post-office. The bank continued to occupy its rooms until the building was destroyed by fire in 1842. It kept the rooms (now occupied by the Mechanics' National Bank) in the New Central Exchange until 1851, when, in connection with the Boston and Worcester Railroad Company, the Worcester Bank block was erected, the bank securing full ownership in the following year.

As the time approached for the expiration of the original charter, a renewal was asked for from the Legislature. "Conflicting interests"—doubtless the exertions of the Boston banks—secured a rejection of the first petition, and of a second memorial. But at the June session in 1812 a new charter was granted, the capital being increased to two hundred thousand dollars.

The directors of the original bank in May, 1804, elected Levi Thaxter as cashier and Robert B. Brigham accountant, with the understanding that they should "enter themselves at some bank in the town of Boston, to be instructed, at their own expense, in the duties of their respective offices." A seal, having on it for device a buck, was adopted. Daniel Waldo, Jr., was authorized "to contract with Peter Marsh and Tarrant King, of Sutton, and David Hearsey, of Worcester, bricklayers, to work at \$1.58½ per day, board and liquor included." The banking-rooms were first used October 6, 1804, for a directors' meeting, at which Daniel Waldo, Jr., was elected president in his father's place. By-laws were adopted on the day following. It was decided that no discount should be made for a longer time than sixty days; that every note presented for discount should have one or more endorsers, unless stock was pledged as collateral security; that every person other than the promissor offering a note for discount should endorse

it; that every note should be attested by one or more witnesses; that no person should have his note renewed for more than four-fifths of the original sum; and at every renewal one-fifth of the original sum shall be paid. The first semi-annual report to the State, January 7, 1805, showed: Capital stock, \$150,000; debts due (*i.e.*, loans), \$185,645; monies deposited, \$166 [!]; notes in circulation, \$146,030; note of other banks, \$10,090; coined metals on hand, \$121,488.46.

The directors of the Worcester Bank had been justly indignant at the course of some of the Boston banks in opposing a renewal, in 1811-12, of the original charter of the bank here. When, therefore, the Suffolk Bank of Boston, in 1825, established the system, which in the end proved most beneficial, of a compulsory redemption of the bills of country banks, it was resisted by the Worcester Bank. A contest ensued, in which the Worcester Bank was sustained by the court. It afterwards fell in with the systems voluntarily and "not upon compulsion."

The managers of the bank have ever been judiciously conservative, and this trait, together with the patriotism of the directors, made the bank an effective ally of the government at the outbreak of the Civil War, in 1861. The bank made heavy loans to the government, and its own reputation and virtual endorsement induced the people of the city and its neighborhood to make heavy investments in the public funds, the bank acting as agent for the government in the matter. On the establishment of the national banking system, the propriety of organizing under that system commended itself to the judgment of the directors, but they did not like to surrender their old name and be thereafter known only by a number. In compliance with a general demand from the old banks of the country, the original National Banking Act was so modified as to allow them to retain their former names, prefixing or affixing the word "national." Having secured this privilege, at a special meeting of the stockholders, May 9, 1864, it was voted unanimously, on recommendation of the directors, to organize as the Worcester National Bank, with a capital of three hundred thousand dollars. The patriotic remarks of the Hon. Levi Lincoln, senior director, and the Hon. Stephen Salisbury, president, on the occasion, are spread upon the records of the bank. The Worcester Bank was, therefore, the first of the State banks here to adopt the national system. That its next younger sister, the Central Bank, should be the first to follow its example, ten weeks later, was eminently appropriate. The capital of the Worcester Bank had been increased to two hundred and fifty thousand dollars in 1851 and to three hundred thousand dollars in 1853. It is now five hundred thousand dollars.

The presidents of the Worcester Bank have been: Daniel Waldo, April 12 to October 6, 1804; Daniel Waldo, Jr., October, 1804, until his death, July 9,

1845; Stephen Salisbury, July, 1845, until his death, August 25, 1884; Stephen Salisbury, son of the latter, to the present time. Cashiers: Robert B. Brigham, 1804-12; Samuel Jennison, 1812-46; Levi Lincoln Newton, 1846-47; William Cross, 1847-64 (and vice-president, 1864-80); Charles B. Whiting, 1864-68; James P. Hamilton, 1869. Edward O. Parker, who had been connected with the bank for twenty-three years, and assistant cashier for nine years, resigned his position March 1, 1889.

The success of the Worcester Bank and the benefit which it conferred upon the whole central portion of the State prompted the leaders of thought and of business affairs, in due time, to establish a savings bank, to receive and carefully invest the surplus earnings of the people, and while thus encouraging good habits and promoting the prosperity of their depositors, to still further benefit the community by loaning out the money thus collected, in loans upon mortgages or other good security. At that time, as now, every town in this county had one or more citizens who were the natural trustees of the people. It was they who were consulted on business matters, who were most frequently appointed as executors of wills or as administrators of estates. These men, as well as the lawyers, used to visit Worcester often, and especially at court times, and they co-operated in the movement to establish a savings bank. *The National Ægis* of December 5, 1827, aided the movement by an able editorial article of a column's length.

The first report of the proceedings which we find, states that at an adjourned meeting, held at Thomas's Coffee-House,<sup>1</sup> December 6, 1827, a committee previously appointed (whose names are not given) reported a petition for an act of incorporation, which was signed by the gentlemen present, and another committee was appointed to present it to the Legislature. The petition was granted, and the charter of the WORCESTER COUNTY INSTITUTION FOR SAVINGS was issued February 8, 1828. It provided that the annual meeting should be held "some time during the regular term of the sitting of the Supreme Judicial Court for the county of Worcester, in the spring of each year,"—a time especially convenient for the trustees and corporators, who represented nearly every town in the county. On April 9, 1828, Isaac Goodwin, as secretary of the petitioners, published the charter, and called the corporators to meet at Thomas's Coffee-House on the 17th. The charter members were:—Daniel Waldo, Solomon Strong, Frederic W. Paine, Samuel B. Thomas, Pliny Merrick, Benjamin Butman, Andrew H. Ward, Stephen Salisbury, Jr., Seth Hastings, Samuel Jennison, Silas Brooks, David Brigham, William Steadman, Stephen Goddard, Calvin Willard, Simeon Sanderson, Oliver Fiske, Jesse Bliss, Benjamin Adams, Charles Allen,

<sup>1</sup> The successor of Barker's Tavern; also called, in 1804, Rice's Inn or "Sign of the Golden Ball." Now the Exchange Hotel.

*Charles A. Chase*

William S. Hastings, George Wall, James Draper, John W. Lincoln, Isaac Goodwin, John M. Earle and Emory Washburn. At the first meeting one hundred and seventy-two new members of the corporation were elected, and fifty-six were added at an adjourned meeting held two weeks later. These represented nearly every town in the county. Daniel Waldo was elected president, with twelve vice-presidents, and a board of twenty-four trustees. Isaac Goodwin was chosen secretary, and Samuel Jennison, cashier of the Worcester Bank, was the first treasurer. Of all the gentlemen named the last to survive was the Hon. Stephen Salisbury, who died August 24, 1884. The oldest living corporator is Henry W. Miller, Esq., of Worcester, who was elected May 1, 1828.

Mr. Waldo continued president until his death, in 1845, and was succeeded by Stephen Salisbury, who served until 1871, Alexander H. Bullock serving for the next thirteen years, until his death, in January, 1884. Stephen Salisbury, son of the second president, was elected president in April, 1884. The secretaries have been: Isaac Goodwin, elected 1828; William Lincoln, 1833; Thomas Kinnicutt, 1843; John C. B. Davis, 1848; Joseph Mason, 1850; Joseph Trumbull, 1853; J. Henry Hill, 1854. Mr. Jennison served as treasurer for twenty-five years, resigning in October, 1853, when the deposits amounted to \$1,473,312.<sup>1</sup> He was followed by Charles A. Hamilton, who held the office until his death, October 30, 1879. Charles A. Chase was elected treasurer November 10, 1879.

The original by-laws provided that the bank should be open every Wednesday from 2 until 5 o'clock P.M. The pass-books explained that this was "to save expense to those who put in their money, who would otherwise be obliged to pay more for the time of the clerks, if they were to attend every day." All money received was to be either specie or bills current at the Worcester Bank, and all payments were to be made in the same manner. The first deposit, fifteen dollars, was made by Hon. Abijah Bigelow, in the name of his daughter, Miss Hannah Bigelow, June 4, 1828. The account was closed in August, 1874, after her death. The whole amount of deposits credited to the account was \$460, and the payments amounted to \$1758.36. At the close of the second year the total deposits in the institution amounted to \$13,645. In contrast with this accumulation of two years it is interesting to observe that on the 31st day of December, 1888, the teller received from 469 depositors the sum of \$41,178.65 during the seven working hours of that single day. The whole amount of deposits on January 1, 1889, was \$10,480,487.47, and the assets, at their par value, amounted to \$11,084,307.12.

Isaac Goodwin, secretary of the corporation, made

the second deposit, fifty dollars, for Mrs. Sarah Thayer, of Sterling. Among the well-known names which follow early in the list are: (4) Aaron Bancroft, for Nancy J. Young, "domestic;" (7) Samuel Swan, for his son, Reuben Swan; (8) Benjamin Chapin, for John K. L. Pickford; (11) George Allen, for Lydia K. Adams; (13) John Brazer, by Samuel Brazer; (14) William Lincoln; (23-26) Samuel Jennison, for his children; (27-29) Levi Lincoln, for his two daughters and for Hannah Cook, a domestic. The oldest account now open is No. 77. This deposit, and No. 78, also now open, were made by Rebecca Foster, wife of the Hon. Dwight Foster, of Brookfield, for a granddaughter and grandson respectively. No. 77 still stands in the name of the original beneficiary, and No. 78 has been assigned to the great-grandson of Mrs. Foster. The next open account, No. 113, was made by Henry K. Newcomb, for Elizabeth Chandler Blake. The next, No. 140, was made by John B. Shaw. Over 90,000 accounts have been opened with depositors, and the number now outstanding is upwards of 23,300.

The promise by the founders of the institution of handsome returns to depositors has been more than kept. Here is a striking instance of the accumulation of a small sum of money to which its earnings have been added semi-annually. On March 6, 1841, Mr. Samuel R. Jackson, of Providence, who had previously been a merchant in Worcester, deposited the sum of \$15 for one of his daughters. Other sums, making in all a total of \$80, were deposited to her credit during the eight years following, and for this \$80 received by the institution, the depositor now has a credit of \$1,106.83. This fact speaks whole volumes in behalf of the policy set forth in the first article of the original by-laws, "of enabling the industrious and economical to invest such part of their property and earnings as they can conveniently spare, in a manner which will afford them both profit and security."

As the pioneer banking institutions of the county it has seemed proper to give the histories of the Worcester Bank and the Worcester County Institution for Savings somewhat in detail. With the growth of the city, stimulated by the growth of the Blackstone Canal to Providence in 1828, and the granting of a charter for a railroad to Boston in 1831, other institutions of the same kind were established, at first in Worcester and afterwards in many other towns of the county.

THE CENTRAL BANK, with a capital of \$100,000, was chartered March 12, 1829, the corporators being William Eaton, Leonard W. Stowell, Isaac Davis, Thornton A. Merrick, David Stowell, Pliny Merrick, William Jennison, Daniel Heywood, Gardiner Paine, Samuel Allen, Jr., Levi A. Dowley, Benjamin Butman, Asahel Bellows, Daniel Goddard, Isaac Goodwin, Artemas Ward and Anthony Chase. Benjamin Butman was president until his resignation, in

<sup>1</sup> A full and admirable biographical sketch of Mr. Jennison, from the pen of Rev. George Allen, appeared in the daily *Spy* and daily *Transcript* of March 17, 1860. Justice to the merits of his successor was also given by the newspapers and by the bank trustees.

August, 1836, and has been succeeded by Thomas Kinnicutt until his death, February 17, 1883, and the present incumbent, Joseph Mason. Otis Corbett was first cashier from May 16 to November 30, 1829, being succeeded by George A. Trumbull, who retired with the president in 1836. William Dickinson served from 1836-50; George F. Hartshorn, 1850-56 and 1859-62; George C. Bigelow, 1856-59; and the present incumbent, Henry A. Marsh, was elected in 1862, after serving the bank for nine years in other positions. The bank was reorganized under the national system May 18, 1864, and in 1865 increased its capital from \$250,000 to \$300,000. The banking office until 1853 was in the rooms now occupied by the Five Cents Savings Bank; then for sixteen years in the second story at "Harrington Corner" (corner of Main and Front Streets), and since 1869 on the first floor of the People's Savings Bank building.

THE QUINSIGAMOND BANK, with a capital of one hundred thousand dollars, was incorporated March 25, 1833, the incorporators being Nathaniel Paine, Samuel M. Burnside, John Coe, Otis Corbett, Ichabod Washburn, Stephen Salisbury, Frederic William Paine, Thomas Kinnicutt, George T. Rice and Levi A. Dowley. Samuel D. Spurr, Frederic William Paine, Isaac Davis, Alfred D. Foster, Levi A. Dowley, Emory Washburn and Samuel Damon constituted the first Board of Directors. The bank was opened in Dr. Green's block, now owned by the Merchants' and Farmers' Insurance Company, but soon removed to the south end of Flagg's building, at the north corner of Sudbury Street, and afterwards, September, 1854, to its present site, nearly opposite the original location. This bank and the Worcester National own the buildings which they occupy in part. The Quinsigamond Bank went into the national system in 1865. Its capital was increased to one hundred and fifty thousand dollars May 22, 1851, and to two hundred and fifty thousand dollars March 28, 1854. Its first president was Alfred D. Foster, who was succeeded by Isaac Davis, 1836-42; William Jennison, 1842-53; William Dickinson, to 1854; Isaac Davis, 1854-78; Edward L. Davis, 1878-84; and by Elijah B. Stoddard in 1884. Charles A. Hamilton was the first cashier, serving for twenty years, until 1853, when he resigned to become treasurer of the Worcester County Institution for Savings. His successors were: Joseph S. Farnum, from 1853 to 1873; Alden A. Howe, 1873-81; and John L. Chamberlin, 1881.

On April 9, 1836, Calvin Willard, Stephen Salisbury and Harvey Blashfield, received a charter as the CITIZENS' BANK, with a capital of five hundred thousand dollars, an amount considerably larger than the combined capital of the other two banks. The first Board of Directors consisted of Harvey Blashfield, Benjamin Butman, Pliny Merrick, William Lincoln, Ebenezer Aldrich, Edward Lamb, Nymphas Pratt, Frederic W. Paine and Calvin Willard. That Mr. Butman,

the first president, and George A. Trumbull, the first cashier, came directly from the same offices in the Central Bank is a fact which excites our attention, but at this time it is impossible to discover the reasons. No Darwinian process had developed the "interviewer" in 1836. Mr. Butman was building a block of two stores, with offices overhead, on the northeast corner of Main and Maple Streets, which he called "Maccarty Block," because it was upon the site of the Nathaniel Maccarty homestead; but although Mr. Butman retained the ownership for many years, it was known to the people, with the block joining it on the north, as "Brinley Row." The north store was occupied by Mr. Butman as the leading grocery of the town; the corner store was fitted up for the Citizens' Bank, which remained there until March, 1881, when it was removed to its present quarters, at the corner of Main and Front Streets.

In fixing their capital at half a million dollars the projectors had not foreseen—for they were but human—the great depression in business and the financial revulsion which were impending. Prudence and even necessity compelled them to reduce the capital from time to time until the present limit of one hundred and fifty thousand dollars was reached. From the time when it had settled down to "bed-rock," its management has been wise and conservative, and it has returned a generous income to its stockholders.

The presidents since Mr. Butman have been: Nymphas Pratt, chosen October, 1838; Pliny Merrick, October, 1839; Francis T. Merrick, October, 1842; Francis H. Kinnicutt, November, 1860; Benjamin W. Childs, September, 1885; and Samuel Winslow, January, 1889. Mr. Trumbull served as cashier until his death, in October, 1858. John C. Ripley, who had been clerk and assistant cashier for nineteen years, was cashier for eleven years until his death, October 10, 1869, and was succeeded by Lewis W. Hammond, the present incumbent.

THE MECHANICS' (NATIONAL) BANK is contemporary with the city itself, having been incorporated June 15, 1848, four months after the city received its charter. The corporators were Fred. Wm. Paine, Henry Goulding and Wm. T. Merrifield, and the capital was \$200,000, increased to \$300,000 in 1851, and to \$350,000, the present amount, in 1853.

The first Board of Directors included Wm. H. Goulding, Wm. T. Merrifield, Francis H. Dewey, Wm. M. Bickford, Charles Washburn, Harrison Bliss, Ebenezer H. Bowen and Alexander De Witt. Mr. De Witt was president from 1848 to 1855, from October, 1857, to October, 1858, and from October, 1859, to October, 1860; Francis H. Dewey, October, 1855, to October, 1857; Henry Goulding, 1858-59; Harrison Bliss, 1860 to July, 1882; Charles W. Smith, to March, 1883; David S. Messinger, to April, 1888, when he resigned, and was succeeded by Francis H. Dewey, eldest son of the second president. The cashiers have been Parley Hammond,

Nath Paine

to July, 1854, succeeded by Scotto Berry to February, 1866, when George E. Merrill, the present incumbent, was elected.

The bank began business in a new brick block, built by Gen. George Hobbs, on the south corner of Main and George Streets, but in October, 1851, removed to its present quarters, previously occupied by the Worcester Bank, in the Central Exchange. The bank entered the national system March 14, 1865.

On March 28, 1854, a charter was given to the CITY BANK, with a capital of \$200,000, the incorporators being William B. Fox, Henry Chapin and Frederic William Paine. The petitioners had asked for a capital of \$300,000; but the number of applications for bank charters in that year was unusually large, and the committee of the Legislature, disposed to be conservative, at first took the ground that no new bank was needed in Worcester. But Mr. Calvin Foster, who was interested in the new enterprise, employed Mr. Putnam W. Taft to canvass the city and obtain statistics of the volume of business yearly carried on at that time. The result of Mr. Taft's work showed an amount so large as to carry conviction to the minds of the committee. The charter was granted, and the bank began business in the second story of "Harrington Corner" (corner of Main and Front Streets), a favorite site for banking. About the beginning of the year 1855, however, it removed to the rooms which had been especially fitted for its use in the new building erected by Mr. Foster, on the southwest corner of Main and Pearl Streets, where it has since remained. George W. Richardson was the first president, and was succeeded by Calvin Foster in 1878. Parley Hammond was the first cashier, and his successor, Nathaniel Paine, has held the office since 1857. It organized as a national bank in 1864. Its capital is now \$400,000.

THE FIRST NATIONAL BANK, organized June 5, 1863, with a capital of one hundred thousand dollars was, as its name implies, the first one of the kind in Worcester. It was also the second in the State (the First, of Springfield, being its elder), and the seventy-ninth in the whole country. The first board of directors consisted of Parley Hammond, Ichabod Washburn, Nathan Washburn, Timothy W. Wellington, George Draper (of Milford), Edward A. Goodnow, Hartley Williams, Charles B. Pratt and Alexander Thayer. Mr. Hammond was the first president, and Mr. Goodnow has been president since January 8, 1867. Lewis W. Hammond was the first cashier, and was succeeded by Arthur A. Goodell July 18, 1864; George F. Wood, September 1, 1869; Arthur M. Stone, April 6, 1874, and Albert H. Waite, March 7, 1879. The bank was on the second floor at Harrington Corner until it moved into its present quarters in 1869. The original charter expired in June, 1882, but as Congress had not perfected the necessary legislation

which, a month later, gave existing banks the privilege of so amending their original articles of association as to extend their "period of succession" by an additional term of twenty years, another "First National Bank of Worcester" was, therefore, organized June 4, 1882, which succeeded the former without any interruption or friction. Its capital is now three hundred thousand dollars, and surplus two hundred thousand dollars.

THE SECURITY NATIONAL BANK was authorized June 7, 1875, with a capital of one hundred thousand dollars, and did business at the north corner of Main and Pleasant Streets. The directors were: Wm. H. Morse (president), John W. Wetherell, Edward H. Stark, Harlan P. Duncan, Gilbert J. Rugg, Frederick W. Ward and Benjamin W. Childs. Albert H. Waite was cashier. The bank gave up business in 1878.

THE WORCESTER MECHANICS' SAVINGS BANK was the second savings bank in Worcester in order of incorporation. It was chartered May 15, 1851. The presidents have been: Isaac Davis until 1855; Alexander De Witt to 1859; John S. C. Knowlton to 1862; Harrison Bliss until his death, in 1882; Francis H. Dewey until his death, in 1888; and J. Edwin Smith. Parley Hammond was treasurer for three years, and that office has been since filled, for nearly thirty-five years, by Henry Woodward. Except for the first three years, its rooms have been in the Central Exchange. Its deposits amount to \$4,255,975, and its assets to \$4,452,872.

THE WORCESTER FIVE CENTS SAVINGS BANK was incorporated April 1, 1854, at the time when the new idea of receiving deposits of less than one dollar was coming in vogue, and has now a large number of such accounts upon its books. Its first president was Charles L. Putnam, who was succeeded by George W. Richardson in 1877, Clarendon Harris in 1878, and Elijah B. Stoddard in 1884. Clarendon Harris, who was at the same time secretary of the State Mutual Life Insurance Company, was treasurer of this bank for the first eighteen years, being succeeded by George W. Wheeler (who had been city treasurer for many years previous) and by J. Stewart Brown in 1884. Its banking-rooms have always been in some part of the building it now occupies. Present amount of deposits, \$3,548,961; assets, \$4,309,825.

On May 13, 1864, was incorporated the PEOPLE'S SAVINGS BANK. The great impulse to business caused by the war, and the high wages paid on account of the cheapness of an over-inflated currency, made the time seem opportune for establishing a fourth savings bank in the city. This bank also promised a departure from the system which had been in vogue with the older banks throughout the Commonwealth. The practice had been to pay a fixed rate, generally two per cent., as a semi-annual dividend, and to make a division of the surplus earnings once in five years. But about this time a number of new banks were started, which promised to divide all their prof-

its once in six months. The older banks in the State were compelled, *nolentes volentes*, to fall into line, until, in 1876, the Legislature stepped in and made the old system compulsory upon all.

The People's Saving Bank began business in the second story at the south corner of Main and Pleasant Streets. Its business rapidly increased, and in 1869 it moved into its own marble-front building on Main street, opposite the Common. Its first president was John C. Mason, who resigned January 27, 1877, and was succeeded by William Cross, who resigned in 1879. Lucius J. Knowles filled the office until his death, February 25, 1884, and was succeeded by Samuel R. Heywood.

Charles M. Bent has been treasurer from the organization of the bank. The deposits are now \$5,108,796, and the assets \$5,363,605.

The vast issue of bonds by the national government during the great Rebellion, accompanied and followed by the issues by States, municipalities and railroads, created a demand for depositories where the people could safely store their securities and other personal property of value. The WORCESTER SAFE DEPOSIT AND TRUST COMPANY received its first charter from the State as the Worcester Safe Deposit Company in March, 1868, and its second in May, 1869. It receives deposits subject to check at sight, paying interest of two per cent. per annum on daily balances of one hundred dollars or over, but does not issue bills. It is also authorized to act as trustee in probate matters and the like. It assumes the direct custody of valuables, and lets small safes in its strong vaults, to which the renter alone has access. Its capital is \$200,000. George M. Rice has been president from the start. Samuel T. Bigelow was the first secretary, and was succeeded by Edward F. Bisco, July 1, 1872. It occupies the first floor of its own building, opposite the City Hall, and the basement of the People's Savings Bank building, which joins it on the south.

THE STATE SAFE DEPOSIT COMPANY was organized in 1887 solely for the purpose indicated by its name. Its vaults are in an extension, to the west, of the granite building owned by the State Mutual Life Assurance Company, and its vaults, doors, locks and safes are marvels of construction. It rents its safes at rates from five dollars upwards per annum, and has a special vault for the storage of silver, jewelry and other articles of value. A. George Bullock is president, Henry M. Witter secretary and Halleck Bartlett manager.

Co-operative banks, patterned after the building associations which had been so successful in Philadelphia and elsewhere, were introduced here in 1877. The Worcester Co-operative Savings Fund and Loan Association was incorporated October 19th in that year. Its name was changed later to WORCESTER CO-OPERATIVE BANK. At the end of eleven years it had issued its seventeenth "series" of shares, had

\$279,300 loaned on real estate, and \$11,395 on the shares, a surplus of \$2663, and a guaranty fund of \$500. The number of shares "in force" was 7710.

The Home Co-operative Savings Fund and Loan Association was incorporated June 10, 1882; name changed to HOME CO-OPERATIVE BANK in 1883. In November, 1888, it had issued its thirteenth series of shares, had \$173,300 loaned on real estate, and \$5055 on shares, with a surplus of \$5706 and a guaranty fund of \$229; 5712 shares in force.

The EQUITY CO-OPERATIVE BANK began business in March, 1887. November 1, 1888, there were 3041 shares in force, in four series, with \$35,850 loaned on real estate and \$725 on shares, a surplus of \$580 and a guaranty fund of \$19.

Stephen C. Earle is president of the Worcester Co-operative Bank, Enoch H. Towne of the Home, and Iver Johnson of the Equity. Thomas J. Hastings is secretary and treasurer of them all, and Edward B. Glasgow is their solicitor. The continued prosperity of the city has been favorable to their success. They have not yet been put to the strain of the great financial depressions which at intervals sweep over the country. The loans are bid off at auction by shareholders at a rate of interest varying from six to eight per cent.

The advantage and convenience of a CLEARING-HOUSE, to banks and business people alike, is so great that it is difficult for the lay mind to conceive of the comparatively infinite labor and trouble which would be caused if, as in anti-secession times, a check could be deposited or cashed only at the bank on which it was drawn. The Worcester banks, free, in great measure, from a petty jealousy which would be incompatible with harmony of action, joined in establishing a Clearing-House in 1861, being only eight years behind New York City, where the first Clearing-House in the country was established in 1853, followed by one in Boston in 1866. The main feature of this system may be thus described: At a given hour of each day (say twelve o'clock) the messenger of each bank appears at the Clearing-House, bringing all the checks upon other banks in the city which his bank has received on deposit from its regular customers. These checks he has assorted and listed on slips, which show how much the other banks are severally indebted to his bank. We will suppose that the total amount of checks thus brought in, say from the "Sagabastock" Bank, is \$50,000. Now, if the clerk at the Clearing-House finds that the aggregate amount of the checks upon the Sagabastock is but \$48,000, the latter is creditor to the amount of \$2,000, and receives from the manager of the Clearing-House a draft on Boston for \$2,000, which he takes back to his bank with the \$48,000 worth of checks, which are charged up to the various depositors by whom they were drawn; and as far as this part of the day's business is concerned, the Sagabastock teller and book-keeper will find no trouble in balancing their

*Chas. B. Pratt*

books at the close of the day. If, on the other hand, the other banks have brought in \$52,000 worth of checks on our messenger's bank, against the \$50,000 which he brought, he is informed that he is debtor to the Clearing-House by \$2000. He reports this fact to his own bank, and before the close of business carries to the manager of the Clearing-House the check of his own bank on Boston for \$2000. The manager mails to his correspondent bank in Boston the checks which he has received from the debtor banks, which offset the checks which he has given to the creditor banks, and the balance of the Clearing-House at its Boston bank is undisturbed.

The daily balances at the Clearing-House average about thirty per cent. of the whole volume of checks presented, or "clearings." The association includes the seven national banks of the city and the Worcester Safe Deposit and Trust Company. The annual clearings rose from \$6,051,763 in 1861 to \$10,314,804 in 1864. Dropping to \$9,046,438 in 1865, they rose, year by year, to \$28,931,349 in 1875. They fell to \$25,169,157 in 1876. In 1881 they mounted to \$49,224,751, but had dropped to \$38,551,145 in 1885. The total for 1886 was \$44,362,020; 1887, \$44,298,632; 1888, \$52,070,112, which was "high-water mark." The clearings for the week ending December 22, 1888, the heaviest in the history of the association, amounted to \$1,409,122, and the balances to \$337,344. The clearings were made for several years in the rooms of the Central Bank, but have latterly been made at the Citizens' Bank. Henry A. Marsh is president of the association, and Lewis W. Hammond is secretary and manager.

#### INSURANCE.

The prudent householders of the county early appreciated the benefits of fire insurance, and secured the passage of an act, February 11, 1823, incorporating the Worcester Mutual Fire Insurance Company. Of the eighteen incorporators, Levi Lincoln and Abraham Lincoln were of Worcester, and the rest from other towns in the county. The charter provided that no policy should be issued until subscriptions for at least two hundred thousand dollars been received; that the operations of the company had should be confined to this county, and that property should not be insured for more than three-fourths of its value. The first meeting of the incorporators was held June 19, 1823, at the Court-House. The first policy, signed by Rejoice Newton, president, and William D. Wheeler, secretary, was issued May 14, 1824. It insured Luther and Daniel Goddard—fifteen hundred dollars on their dwelling-house, occupied by themselves and their families, and the wood-house and barn attached thereto, and eleven hundred dollars on their brick store. The rate was one and three-quarters per cent. for the house and barn, and one and three-eighths per cent. on the store, the policy running for seven years. The house was situated on the east side of Main street, midway between

Thomas and School streets, and the store was a little to the south. Policy No. 2 insured Rejoice Newton three thousand dollars on his house and barn and four hundred dollars on his furniture. The buildings were on Front Street, on the site of the Chase Building. The rate was one and one-quarter per cent. for seven years. Nos. 3 and 4 were issued to Abijah Bigelow, and No. 7 to Daniel Waldo. Isaac Goodwin was secretary of the company from December, 1828, to 1832; Anthony Chase, to 1853; Charles M. Miles, to 1879. Frederic W. Paine was president from 1831 to 1853; Anthony Chase from 1853 until his death, in 1879, and Ebenezer Torrey until his death, in 1888. Charles M. Miles was vice-president and manager from 1879 until his death, in 1887. John A. Fayerweather, of Westborough, is president; Roger F. Upham, secretary and treasurer, and Frank P. Kendall, assistant secretary. Prudent management has brought continued prosperity and has secured the undiminished confidence of the people.

To meet the wants of merchants whose stocks in trade could not be insured in the older company, the Merchants' and Farmers' Mutual Fire Insurance Company was organized in 1846. Isaac Davis was president until 1884, and was succeeded by John D. Washburn; Charles L. Putnam was secretary for several years, succeeded by John D. Washburn and by Elijah B. Stoddard, the present incumbent. The officers are men of large experience in insurance matters, and the company, having safely weathered the great Boston fire of 1873, occupies a prominent position in the Commonwealth.

The First National Fire Insurance Company was organized in 1869, with Edward A. Goodnow president and Edward P. Howland secretary. Its capital is two hundred thousand dollars. Charles B. Pratt is president and R. James Tatman secretary.

The People's Mutual Fire Insurance Company was organized in 1847, and in 1865 was converted into a stock company. The "Boston fire" compelled it to wind up its business, paying its policy-holders a dividend of 73.6 per cent. E. H. Hemenway was the first president and Oliver Harrington secretary, who were succeeded by Henry Chapin and Augustus N. Currier.

The Bay State Fire Insurance Company, organized January 1, 1861, and having a capital of two hundred thousand dollars, and the Central Mutual Fire Insurance Company, organized a few years later, were also compelled to suspend business on account of the Boston fire. At that time William S. Davis was president of the former, and W. C. Crosby secretary. Of the latter William T. Merrifield was president; L. C. Parks, vice-president; Henry K. Merrifield, secretary, and Albert Tolman, treasurer.

The Manufacturers' Mutual Fire Insurance Company was chartered in 1834, for the special purpose of insuring manufacturing property. Its rooms were over the Citizens' Bank; after a temporary suspension

it was re-organized, and in 1861 was merged with the Mechanics' Mutual Fire Insurance Company, under the name of the Worcester Manufacturers' Mutual Fire Insurance Company. Hon. George M. Rice is president and Samuel R. Barton secretary.

THE STATE MUTUAL LIFE ASSURANCE COMPANY was organized in 1845 with a perpetual charter. The project was bitterly opposed in the Legislature by existing organizations, but it was carried through by the determined stand taken by John Milton Earle,<sup>1</sup> who was a Representative in that year. Mr. Earle was a director and vice-president of the company until his death. For twenty years the company carried a guaranty capital of one hundred thousand dollars, but since that time, the capital having been retired, it has been purely mutual. The management has been prudent from the start, and at present, while conservatively safe, is "in touch" with the great wealth and business enterprise of the American people. The interest received on the invested funds has more than paid all the death claims to the present time. The presidents have been: John Davis,<sup>2</sup> until his death, in 1853; Isaac Davis, who resigned January 4, 1882; Alexander H. Bullock,<sup>3</sup> who died suddenly January 17, 1882; Philip L. Moen, 1882-83; and Augustus George Bullock. Secretaries: Clarendon Harris, 1845-83 (resigned); and Henry M. Witter. Treasurers: William Dickinson, 1845-83 (resigned); and A. George Bullock.

The assets of the company December 31, 1888, were \$5,066,985, with 9,826 policies in force and a reserve, by the Massachusetts standard, of \$793,046.

## CHAPTER CLXXXVIII.

### WORCESTER—(*Continued.*)

#### MEDICAL HISTORY.

BY SAMUEL B. WOODWARD, M.D.<sup>4</sup>

*Individuals—Societies—Hospitals.*

IN preparing this account of the medical men who have "fought the good fight and kept the faith," recourse has been had to genealogies, manuscripts, public records and to the memories of the oldest of those now living among us. To the kindness of the librarians of the Antiquarian Library and Public Library, who have allowed free access to books and manuscripts; to members of the families of deceased

physicians; to physicians themselves and particularly to Doctors Sargent, Chandler and Bemis, without whose aid the work would have been impossible, is due whatever of accuracy may have been attained. The necessary limits of the article render it necessary to omit all mention of those physicians now practising in Worcester who have not been at least twenty years in the harness, except as their names may appear in connection with societies and public institutions.

1675.—At the first laying out of Quinsigamog, twenty-five acres of land were granted to Dr. Leonard Hoar, "to him and to his heyres." An ex-president of Harvard College, he, in 1671, had taken his degree at the University of Cambridge (England), and was then in practice in the vicinity of Boston. His death, in the same year, prevented actual settlement. The name of no physician can be found in the records of either the first or second attempts to found a town.

1718.—ROBERT CRAWFORD, who came with the Scotch-Irish colony of 1718, was in all probability the first physician of the place. He lived on the "Green Hill farm;" was employed as surgeon in the military expeditions of the time (in 1722 he was with Major John Chandler's company of scouts), and was alive at least as late as 1760. His wife died in 1730, aged twenty-six years, and was one of those buried in the Thomas Street burying-ground.

1736.—DR. ZACHARIAH HARVEY, who, "in 1740, slew 67 rattlesnakes,"<sup>5</sup> was here at least as early as 1736, when the birth of a son is recorded, and was still in town in 1747. The name appears also as Harney and Herny.

1743.—In this year (January 17th) died Dr. Ebenezer Whitney, leaving a "library valued at £4 6s., and drugs to the amount of £6 18s."

1744.—DR. NAHUM WILLARD, son of Colonel Samuel Willard, of Lancaster, who commanded a regiment at the capture of Louisburg, and brother of Colonel Abijah Willard, mandamus councillor in 1774 and later Tory refugee, was born in Lancaster (Harvard), May 28, 1722; began practice in Worcester, at or about the time of his marriage to Elizabeth Townsend, of Bolton (January 17, 1744), and for more than thirty years lived on the south side of the Common, in a house standing on the present site of the French Catholic Church. With him boarded for some time, while teaching school here, John Adams, afterwards President of the United States, in whose diary is the following entry: "Three months after this (October, 1755) the selectmen procured lodgings for me at Dr. Nahum Willard's. This physician had a large practice, a good reputation for skill and a pretty library. Here were the works of Dr. Cheyne, Sydenham and others, and Van Swieten's commentaries of Boerhaave." Adams "read a good deal in

<sup>1</sup> See the biography of Mr. Earle in another place.

<sup>2</sup> Governor and United States Senator.

<sup>3</sup> Governor.

<sup>4</sup> Dr. Woodward has not been able to read the proof of this chapter, since the portion of the work containing it was printed so late that the proof could not be sent to him in Europe, where he was at the time of printing.—EDS.

<sup>5</sup> Lincoln's "History of Worcester," p. 216.

these books," and was so enamored of them, that he "entertained many thoughts of becoming physician and surgeon." Dr. Willard was surgeon in Colonel Chandler's regiment, which left Worcester August 10, 1757, "to give aid and assistance to his majestie's troops." He remained with the army for over three years, and his bill<sup>1</sup> against the province of Massachusetts Bay, for attendance on various members of different companies during this time, amounted to £44 6s. 3d. He seems to have been a popular man, of good social position, on terms of intimacy with the Chandlers, Putnams and Paines, and always remembered by his former boarder, who, in his frequent journeyings through Worcester, never forgot to take dinner or tea with the "Dr." In 1771 Adams sees "little alteration in Dr. Willard or his wife in 16 years." But evil days came soon after to the popular physician. His best friends sided with the King. In 1774 he was one of the famous fifty-two "protestors" against "the treasonable doings" of the patriots in Worcester. With forty-two others he was obliged to sign a recantation, and May 8, 1775, was ordered "to prove his patriotism by either joining the American troops or providing a substitute, on pain of being considered willing to join an unlawful banditti to murder and ravage." A week later he was among those disarmed, and prevented from leaving town on any pretext whatever. Naturally embittered by these measures, his opinions were made known with a courage and boldness that brought upon him the wrath of the "Sons of Liberty," and he was compelled to sign a recantation of his "notorious scandals and falsehoods," and to acknowledge "the perverseness of his wicked heart," which led him to abuse and "most scandalously asperse" the proceedings of "Continental and Provincial Congresses, the selectmen of the town, and the Committee of Correspondence in general." His business was ruined, and he retired to Uxbridge, where his son, Dr. Samuel Willard, A.B. (Harvard) 1767, had been in practice since 1770. Still a stout loyalist, his name appears, in 1777, at the head of a short list of persons "esteemed as enemies, and dangerous to this and the other U. S. of America." He died in Uxbridge, April 26, 1792.

His son Levi, born in Worcester in 1749, studied medicine; practised in Mendon, and died there December 11, 1809.

1745.—DR. SAMUEL BRECK, A.B. (Harvard, 1742), son of Rev. Robert Breck, of Marlboro', where he was born May 17, 1723; married Elizabeth Cooley, of Springfield, in 1744; was for a short time surgeon in the Provincial army, and from 1745 to 1747<sup>2</sup> in practice in Worcester. He afterwards went to Windsor, Ct., and later to Sheffield, where he was "much

esteemed." He died in Springfield April 23, 1764. His house here, "on the common southeast from the meeting-house," was purchased by the town September 25, 1747, and was afterwards the residence of Rev. Thaddeus Maccarty.

1756.—DR. WILLIAM CRAWFORD, son of Robert, was in turn pedagogue, clergyman and physician. In 1757 he served as chaplain to a company sent to the relief of Fort William Henry. In 1758 he taught the village school, and boarded at Dr. Willard's, "47½ weeks at 6 shillings a week."<sup>3</sup> In 1759 he was chaplain of Colonel Abijah Ward's regiment, and in 1760 surgeon in the regiment of General Ruggles. No record of either birth or death remains. He was alive in 1770.

1757.—DR. JOHN GREEN was the son of Rev. Thomas Green, Baptist elder and physician, one of the earliest settlers of Leicester (Greenville), where he was born August 14, 1736.

Instructed in medicine by his father, he came to Worcester and built his house on the eminence now known as Green Hill, which, although relatively nearer town at that time, when many persons lived north of Lincoln Square, and "there were but seven houses on Main Street between that point and the old South church on the common,"<sup>4</sup> seems yet to have been at a distance that might well make prospective patients hesitate before storming the steep in the dead of night or in bad weather. Patients came, however; medical students, also, from Worcester and surrounding towns; Green Lane became a county road, and although, during the latter part of his life, his office was in a little wooden affair on the present site of the Five Cents Savings Bank, the doctor always lived in the Green Hill house, and there he died forty-two years later (October 29, 1799), aged sixty-three years.

An earnest patriot, he was, in 1773, a member (and the only medical member) of the American Political Society, which was formed "on account of the grievous burdens of the times," and did so much to bring about that change of public sentiment which expelled the adherents of the crown. He took a prominent part in all the Revolutionary proceedings, and, in 1777 was sent as Representative to the General Court. In 1778 and 1779 he was town treasurer, and, in 1780, one of the selectmen, the only physician who ever held that office. His first wife, Mary Osgood, died in 1761. His second wife, daughter of General Timothy Ruggles, of Hardwick, survived him, dying in 1814, at the age of eighty-four. A son, Dr. Elijah Dix Green, born July 4, 1769, A.B. (Brown) 1793, was a physician in Charleston, S. C.

1770.—DR. ELIJAH DIX, student with Dr. John Green, was both physician and druggist, fitting himself for the latter business by study with Dr. Wil-

<sup>1</sup> Original in Antiquarian Society's Library.

<sup>2</sup> Lincoln (p. 213-214) says he was here in 1730. He was then but seven years old.

<sup>3</sup> Town records of that year.

<sup>4</sup> "Caleb Wall Reminiscences," p. 216.

liam Greenleaf, of Boston. Born in Watertown, Massachusetts, August 24, 1747, early dependent on his own exertions, and desirous of taking a respectable position in society, he hired himself out to that eccentric but thorough scholar, the Rev. Aaron Hutchinson, of Grafton, he to receive board and education in return for his services. He practised medicine in Worcester from 1770 to 1795, residing for the last part of the time on the estate next south of the Judge Jennison house on Court Hill, with his office and druggist's establishment in a two-story building near by. The house was pulled down when F. H. Dewey's was erected on its site, but the two magnificent elm trees planted at his gate are still standing. His reputation as a physician was good, his practice sufficient, and as his business tact was equal to his professional skill, he accumulated property which was invested in lands in Maine (Dixmont), and later in chemical works, and in the wholesale drug business in Boston. To the latter place he removed in 1795, and on one of his expeditions to his Maine property in 1809, was, as was more than suspected, foully dealt with. In 1784 he went to England on business, bringing back a large assortment of medicines, valuable books and philosophical and chemical apparatus. He was the originator of the stock company which purchased land on the west side of Main Street, built the "Centre School-house," and maintained there for some years a higher school, or academy. He was a member of the first board of councillors of the County Medical Society. He was the first to plant elms on Main Street, and, by inducing others to follow his example, gave the town that mile-long double line of these trees that once shaded the road. From his garden came the Dix pear. To him Dix Street owes its name. With him lived the children of General Warren at the time of the battle of Bunker Hill. The late Dorothea L. Dix, the "American Florence Nightingale," was his granddaughter. Fire warden in 1790, he was one of the original members of the Worcester Fire Society, and his garden fence was decorated with one of the six ladders belonging to the town. He married (October 1, 1771) Dorothy, sister of Dr. Joseph Lynde, afterwards of Worcester. Two of his sons were physicians,—William Dix, A. B. (Harvard) 1792, M. D. (Harvard) 1795, died at Dominica, West Indies, April 4, 1799; and H. Elijah Dix, A. B. (Harvard) 1813, student with Dr. John Warren and later surgeon in the United States Navy, died at Norfolk, Virginia, in 1822.

1771.—WILLIAM PAINE, M.D., A.B. (Harvard, 1768), eldest son of Hon. Timothy Paine, was born in Worcester June 5, 1750. Graduated at Harvard in 1768, his name standing second in a class of forty, at a time when the names were arranged according to the dignity of families. He studied medicine for four years with the celebrated Dr. Edward A. Holyoke, of Salem, and began practice here in 1772. He opened

the same year in a little wooden building on Lincoln Square, the first drug-store in the county. Early identified with the royal cause, Dr. Paine is supposed to have assisted his uncle, Attorney-General Putnam, in drawing up the bold protest of 1774. He soon after went to England to complete his studies, and in 1775 received the degree of M.D. from the University of Aberdeen. Returning in May of that year, he found, on landing at Salem, that the war had begun, that he had been proclaimed as a refugee, and included in an act of banishment, "to be" (if he returned) "transported back to some place within the possession of forces of the King of Great Britain," and if he should return a second time "to suffer the pains of death without benefit of clergy." It was, of course, impossible to go home, and he returned to England.

In November of the same year (1775) he received the appointment of surgeon in the British Army, and joined the forces in America. He served in Rhode Island and New York until 1782, when he was appointed "Surgeon-General of the King's Forces in America," and ordered to Halifax. Here he remained until the reduction of the troops in 1783, when he was dismissed on half-pay with the grant of La Tete Island in Passamaquoddy Bay as a place of residence. He soon removed to St. John, where he entered into practice. He was in 1785 elected to the New Brunswick Assembly, and appointed clerk of that body. The act of banishment having been rescinded in 1787, he returned to his native country, living in Salem until the death of his father, in 1793, when he returned to Worcester, and took possession of the house on Lincoln Street, still standing, and latterly known as "The Oaks." Here for forty years he lived, practising medicine to some extent, but, in the latter part of his life, distinguished rather as a man of letters than as a physician. He received the half-pay of a British officer until the War of 1812, when, being called on for service, he resigned his commission, petitioned the Legislature of Massachusetts for naturalization as a citizen of the United States, and, on the granting of the petition, took formal possession of his property, hitherto held by his brother, Judge Paine. He died April 19, 1833, at the age of eighty-three. Dr. Paine became a member of the College of Physicians of London in 1781, and in 1790 was made an honorary member of the Massachusetts Medical Society. He was a member of the Society of Northern Antiquities of Copenhagen, of the American Academy of Arts and Sciences, of the Linnean, and of the Essex Historical Society. He was one of the founders of the Antiquarian Society, and from 1813–16 its vice-president. He was also one of the incorporators of Worcester Bank, the first bank in the county. He married, September 23, 1773, Lois Orne, daughter of Timothy Orne, of Salem. As a young man of twenty-one, "Dr. Billy Paine" was, by the evidence of John Adams, his whilom schoolmaster, very civil, agreeable and sensible. In

his later life he was considered "to possess extensive and profound learning and a refined literary taste, and was equally respected as physician and as citizen."<sup>1</sup>

1776.—DR. JOSEPH LYNDE, in practice here from 1775-83, was born in Charlestown, Mass., February 8, 1749, and came to Worcester with his father, Joseph Lynde, A.B. (Harvard, 1723), after the burning of the former town by the English. He lived on Main Street, on the present site of Bangs Block, was for some time in partnership with his brother-in-law, Dr. Dix, and finally went to Hartford, Conn., where he died January 15, 1829, aged eighty. These Lyndes were related to John Lynde, of Leicester, from whom Lynde Brook derives its name.

1781.—DR. JOHN GREEN, the second of the name, was a tall, strong man of fine proportions, who seemed eminently qualified to endure the hardships of a practice that extended far into the surrounding country. For the last nine years of his life he was practically the only physician in the place, and his death, after an illness of but a few hours, at the early age of forty-five, made a gap that it seemed for a time impossible to fill. Born in Worcester March 18, 1763, and instructed by his father, the first Dr. Green, he began practice at the age of eighteen, and for twenty-seven years devoted himself exclusively to his profession. Particularly skilled in surgery, his steady hand and keen eye were in demand for many an important operation, "while daily could be seen," says Charles Tappan, "Dr. Green and his half-dozen *students* mounted on horseback and galloping through the streets as if some one or more were in peril." Of the appearance of the doctor and his "students" something more may be learned from the "Reminiscences" of the Hon. Levi Lincoln, who, in describing him as one of the original members of the Worcester Fire Society, claims that Dr. Green would "often be followed in his queer-looking two-wheeled vehicle by a pack of *dogs*, or, superb horseman that he was, be seen on the backs of all manner of ungainly half-broken colts, at full gallop, accompanied by the pack giving mouth as if half a score of huntsmen were at their heels, to the infinite delight of all the urchins in the village." He lived at first in the little wooden office of his father, afterwards in the house next south, built by him and later occupied by his son. His wife was Nancy Barber, granddaughter of Robert Barber, of Northville. "To his funeral," says the *Massachusetts Spy* of August 17, 1808 (he died on the 11th of this month), "came the largest concourse of people from this and neighboring towns ever known to be collected here on a similar occasion." "Few have been so loved while living or so mourned when dead."

1781.—DR. THADDEUS MACCARTY, A.B. (Yale, 1766), son of Rev. Thaddeus Maccarty, was born in

Worcester, December 19, 1747. His early instructors were John Adams and the Rev. Aaron Hutchinson, of Grafton. His account of the former leads to the conclusion that Adams was a better President than pedagogue. "He used to sit at his desk nearly all the time engaged in writing (sermons, thinks Maccarty) and seemed, when not actually writing, absorbed in profound thought and abstracted from everything about him. He kept his school by setting one scholar to teach another."<sup>2</sup> Dr. Maccarty studied medicine with the eminent Dr. Frink, of Rutland, for four years, and in 1770 began practice in Dudley, in partnership with Dr. Eben Lillie. In 1773 he went to Fitchburg, being the first and for some years the only practitioner there. None of the five surrounding towns boasted a physician, and he was consequently called upon to do an astonishing amount of work. His nearest medical neighbor was Dr. Shattuck, of Templeton. In 1775 he was inoculated for the small-pox at a hospital in Great Barrington, by a certain Dr. Latham, who had at that time great reputation in the treatment of the disease by what was known as the method of Dr. Sutton. The method being a secret, a contract was made, by which Dr. Maccarty was empowered to use it in Fitchburg for twenty-one years, Dr. Latham to furnish medicines and to receive one-half the profits, while Dr. Maccarty was neither to sell the medicines nor to try, by analysis or otherwise, to discover their composition. He was also allowed to attend patients anywhere in Worcester County until Dr. Paine (then in England) should return. Escaping, by tact, a warm reception prepared for him on his return to Fitchburg (he was suspected of Toryism) and obtaining the necessary license from the Court of Sessions, he opened a small-pox hospital, where over eight hundred patients were inoculated and treated by Dr. Atherton, of Lancaster, and himself. His books show that the moderate fee £1 10s. was all that was demanded from each person for medical services.

In 1781 his father's failing health called him to Worcester, where he remained eight years, living, after his father's death, in the house on Park Street, east of Portland, formerly belonging to Dr. Samuel Breck. In 1784 he was town physician; in 1785 he was greatly honored by election to membership in the Massachusetts Medical Society, then in the fourth year of its existence; but his success in Worcester was not great, and, on the death of his wife, in 1789, he went to Keene, N. H., where he was for some time engaged in trade. In the epidemic of 1793-94 he managed successfully small-pox hospitals in Charlestown, N. H. and in Keene. In 1796 he became interested in the once famous Perkins "tractors,"—metal points, which, drawn over the skin, were supposed to cure neuralgia, rheumatism, and all manner of diseases, later shown

<sup>2</sup> Manuscript of John W. Stiles prepared for Mr. Lincoln's history. Copy in possession of Mrs. Henry Clarke, a descendant of Dr. Maccarty.

<sup>1</sup> Lincoln, p. 216.

to be as valueless as was the "blue glass" of a few years since, but then eagerly bought at fifty dollars the pair. He died November 21, 1802, aged fifty-five. His wife, to whom he was married in 1775, was Experience, daughter of Thomas Cowdin, of Fitchburg.

1783.—DR. SAMUEL PRENTISS, son of Col. Samuel Prentiss, of the Revolutionary Army, was born in Stonington, Conn., in 1759. For a time "military waiter" to his father, he then studied medicine with Dr. Philip Turner, of Norwich, and when qualified, re-entered the army as assistant surgeon and remained until peace was declared. From 1783–86 he was in Worcester, but there were already too many physicians here, and he removed to Northfield, where for more than twenty years he was almost the only operating surgeon in that section. He died in 1819, aged fifty-nine. Lincoln states that he was secretary of a short-lived medical society in 1785. Of this Society, which, if it existed, was the first association of physicians in the county, no trace remains.

1790.—OLIVER FISKE, M.D. A.B. (Harvard, 1787), was the son of the "well-beloved" Rev. Nathan Fiske, of Brookfield, where he was born, September 2, 1762. His prompt enlistment in the patriot army in 1780, at the age of eighteen, by stimulating others to follow his example, prevented a draft from the Brookfield company of militia already paraded for that purpose. After the expiration of his term of service he returned home and continued his preparation for Harvard College, which he entered in 1783. He taught school in Lincoln during the winter vacation of 1786–87, but procured a substitute and hastened to Worcester when Shays and his men appeared here, arriving in time to make the march to Petersham with General Lincoln. Returning to college, he graduated with his class, and after studying medicine three years with Dr. Atherton, of Lancaster, began practice in Worcester in 1790. He at once took a leading position, and was active in forming the County Medical Society, of which he was secretary from 1794–1802, and librarian from 1799–1804. He was the first president of the district society, councillor of the Massachusetts Medical Society, and in 1811 delivered the annual address in Boston, taking for his subject "Certain epidemics which prevail in the county of Worcester," describing the small-pox of 1796 and "spotted fever" of 1810. In 1824 Harvard honored him with the degree of "doctor of medicine." Popular, and as Bradford, in the "N. E. Biog." says of him, "a scientific physician, well acquainted with natural Philosophy, Chemistry and Physiology," Dr. Fiske, had he devoted himself to his profession, would undoubtedly have made his mark, both as practitioner and medical writer. But his profession soon became secondary to other objects. An ardent Federalist, he exerted no small influence in the party, and terse and epigrammatic articles from his pen, on the questions of the day, are scattered through the current literature of

the time. An orator of no mean ability, he was often called on. Some of these orations and political articles have been printed; more remain in manuscript. They have been described as useful and practical in matter, and singularly elegant in manner. In 1798 he was town treasurer; from 1800–1803 town clerk and, in 1803, was appointed special justice of the Court of Common Pleas. From 1813–15 he was a member of the Executive Council, and from 1816–1821 register of deeds. He was a member of the American Academy of Arts and Sciences, corresponding secretary of the Linnæan Society of New England, and from 1824–37 of the Worcester Agricultural Society also. He was a member of the Fire Society, and a councillor of the Antiquarian Society. Increasing deafness caused him to retire from active life about 1822, and the next fifteen years were largely devoted to horticulture and agriculture. He lived in the old Judge Jennison house on Court Hill, removed when State Street was opened, with an estate reaching from the Dr. Dix place to the Second Church, and extending up the hill as far as Harvard Street. He died in Boston, January 25, 1837, age seventy-four. A son, R. Treat Paine Fiske, A.B. (Harvard, 1818), was a physician in Hingham, where he died in 1866.

Among other physicians here, previous to 1800, were: Dr. Charles Wheeler, who died June 3, 1761, age thirty-one.

Dr. John Fiske, who died, probably in 1756, and who lived opposite the John Barnard place, on the road to Boston.

Dr. Thomas Nichols, born in Danvers in 1711, who came here from Sutton in 1765, and died December 9, 1794.

Dr. Joseph Walker, student with Dr. John Green, who died July 17, 1781.

Geo. H. Hall, A.B. (Harvard, 1781), M.B. (Harvard, 1788), who was in practice here for three years, married Sarah, daughter of Gardner Chandler, and in 1791 removed to Brattleboro', Vt., where he died in 1807.

Dr. Samuel Willard, one of the Lancaster Willards, here from 1790–92, and the two Walkers, George and William, sons of Captain John Walker, who commanded a company of foot in the provincial army. Wm. Walker, born in 1718, was in the army in Nova Scotia in 1755, and in Worcester in 1778, while from *Massachusetts Spy* of June 5, 1777, we learn that "Last Monday night sennight, George Walker, commonly called doctor, and one Galloway, two tories, were taken at Bristol and last Saturday were brought back and committed to goal here."

1794.—WORCESTER MEDICAL SOCIETY.—The charter of the Massachusetts Medical Society, granted in 1781, by its limitation of membership to seventy, practically excluded from its benefits the majority of physicians not in the immediate vicinity of Boston.<sup>1</sup>

<sup>1</sup> John Frink, of Rutland, was the only incorporator from Worcester County, and in the twenty-two years from 1781 to 1803 but four other Worcester County men were elected to membership, viz., Israel Atherton.

The physicians of the county of Worcester, therefore, at a meeting held December 18, 1794, voted to form themselves into a fraternity by the title of the Worcester Medical Society, for their "own improvement" and to make such knowledge as they might possess as generally useful as possible. By-laws were adopted, and the signers bound themselves to impress upon all their pupils the advantages of a regular medical education, and to recommend attendance upon the medical lectures annually given at the University of Cambridge. The society met semi-annually, alternately at Reed's tavern, in Rutland, and at Daniel Heywood's, in Worcester, until 1804, when it was merged in the district organization of the Massachusetts Medical Society.

The list of members includes the majority of those then prominent in the profession, and is as follows: Elijah Dix (Worcester), John Frink (Rutland), Eben H. Phillips (Charlton), John Green (Worcester), Oliver Fiske (Worcester), Abraham Lowe, John Green, Jr. (Worcester), Spencer Field, Seth Field (Brookfield), Jonathan Shearer, Estes Howe, Robert Cutler (last three county of Hampshire), Silas Allen (Leominster), William Cutler, Abraham Haskell (Ashby), Francis Foxcroft, Eras Babbitt, Daniel Fiske, Jona. Learned, Israel Whitin (Winchendon), Daniel Beard, Amasa Scott, Austin Flint (Leicester), William Lamb, Peter Snow (Fitchburg), Tilly Rice, Jr. (Brookfield), John Frink, Jr. (Rutland), Asa Miles, Thomas Babbitt (Brookfield), Amasa Beaman, Richard S. Bridge, Hezekiah Eldridge, Eddy Whittaker (Monson), Josiah Howe, William Stone, Matthias Rice, Rev. Jonathan Osgood (Gardner), John Field (Rutland), Nason Spooner (Templeton), Moses Phelps (Hubbardston), Israel Atherton (Lancaster), Nehm. Hinds (Pelham), Israel Trask (Greenwich), Ebenezer Morse (Boylston), Samuel Willard (Uxbridge), Robert Cutler (Amherst), Jonas Prescott (Templeton), William Stone (Greenwich), Samuel Guthrie (Brimfield).

1803.—DR. JOSEPH TRUMBULL, born in Suffield, Conn., October 12, 1756, and for a long time in practice in Petersham, came to Worcester and, in partnership with Isaiah Thomas, managed the drug-store originally established by Dr. Paine, and afterwards in the hands of Drs. Levi Sheppard and Eben Hunt, and of "Drs." Abraham Lincoln and Benjamin Green. He was married, February 14, 1786, to Elizabeth, daughter of Hon. Timothy and Sarah (Chandler) Paine, this marriage being the first solemnized in the Second (Unitarian) Church, and died at his residence in Trumbull Square, March 2, 1824. A martyr to gout, which, for seventeen years, confined him to his chair, he was unable to follow the active life of a physician, and in Worcester, when able to do anything, devoted himself to his drug business.

1804.—WORCESTER DISTRICT MEDICAL SOCIETY.—

The Worcester Medical Society had for several years been before the Legislature by petition and committee for an act of incorporation, but had been constantly thwarted by the Massachusetts Medical Society, which considered such action detrimental to its interests. A conference was finally held with a committee of the Worcester society, and after an act of Legislature (approved March 8, 1803) had been obtained, by which the powers of the older society were extended, it was agreed that four districts should be established—Middle, Southern, Eastern and Western; Worcester district to be the western, and to include those fellows living in the counties of Worcester, Hampshire, Hampden, Franklin and Berkshire. At a meeting of the County Society held September 26, 1804, an organization after this plan was effected; fourteen members of the local society became fellows of the Massachusetts Medical Society, elected officers and acquired the right to establish their own regulations "so that they be not repugnant to the bye-laws of the general society," to hold property and to dispose of the same. Although by the act the "Western District" included the physicians of five counties, all but one of the three hundred and forty-eight names on the rolls are those of Worcester County men, and no loss of members by the establishment of new districts occurred until the Worcester North District was set off, in 1858. Meetings, always in Worcester, were at first held semi-annually in June and September; later there were quarterly meetings, and still later a meeting was held every two months. Officers elected annually in May consist of a president, vice-president, secretary, treasurer, librarian, five censors (who examine candidates for admission) and a variable number of councillors, who represent the society at the general meeting of councillors in Boston. The present membership is one hundred and twenty-three. In 1845 six thousand dollars was given to the society by the Hon. Daniel Waldo, and in 1851 Dr. Charles W. Wilder, of Leominster, left five hundred dollars in his will. The income of these sums, together with that of a bequest of one thousand dollars from the late Harrison Bliss and the interest of another small sum of money called the Available Reserved Fund, is now devoted to the increase of the library, the third largest medical library in the State.

The presidents of the society since 1804 have been: Oliver Fiske, of Worcester, 1804-07; Thomas Babbitt, of Brookfield, 1807-13; Abraham Haskell, of Ashby, 1813-14; Jonathan Osgood, of Gardner, 1814-20; Abraham Haskell, of Ashby, 1820-25; Stephen Bacheller, Jr., of Royalston, 1825-29; John Green, of Worcester, 1829-37; Edward Flint, of Leicester, 1837-40; Benjamin F. Heywood, of Worcester, 1840-42; Charles W. Wilder, of Leominster, 1842-44; Joseph Stone, of Hardwick, 1844-46; William Workman, of Worcester, 1846-49; John G. Metcalf, of Mendon, 1849-51; Benjamin Pond, of Westboro', 1851-53; Thomas R. Boutele, of Fitchburg, 1853-55; Charles M. Fay, of Charlton, 1855-57; Joshua J. Johnson, of Northboro',

ton, of Lancaster; Samuel Willard, of Uxbridge; Thomas Babbitt, of Brookfield; and Thaddeus Maccarty, of Worcester.

1857-58; Alfred Hitchcock, of Fitchburg, 1858-59; Oramel Martin, of Worcester, 1859-62; Calvin P. Fiske, of Fiskdale, 1862-64; Joseph Sargent, of Worcester, 1864-66; Moses D. Southwick, of Blackstone, 1866-69; Rufus Woodward, of Worcester, 1869-70; Chauncy A. Wilcox, of Uxbridge, 1870-72; Thomas H. Gage, of Worcester, 1872-74; Joseph T. O. West, of Princeton, 1874-76; Henry Clarke, of Worcester, 1876-78; Frederick D. Brown, of Webster, 1878-80; Emerson Warner, of Worcester, 1880-82; Edwin B. Harvey, of Westboro', 1882-84; Albert Wood, of Worcester, 1884-86; George C. Webber, of Millbury, 1886-88; J. Marcus Rice, of Worcester, 1888.

The following physicians have been members of the society:
